Muḥammad, according to Mas'ūdī (*Tanbīh*), had ordered his followers to migrate to Medina; they set out in small parties. Among the first to reach Medina was 'Omar, afterwards Caliph. This migration had certainly been preceded by negotiations with the people of Medina, as Ṭabarī's *Chronicle* (Persian synopsis ii. 437 *sqq.*) relates. The Prophet himself set out accompanied by Abū Bakr. He left 'Alī behind to return some property entrusted him to their owners. 'Alī remained three days behind in Mecca and then joined the other emigrants.

A very popular legend is associated with the Prophet's migration. The Ḳuraish wished to slay him and appeared in the morning at his house; but they met only 'Alī who drove them back at the sword's point. They then rushed off to pursue Muḥammad on the road to Medina. When the latter heard of this, he hid with Abū Bakr in a cave and God willed that a spider should spin its web at the entrance to this cave. When the Ḳuraish saw the web, they thought it impossible that any one could be inside and passed by. This story explains the allusion in Sūra ix. 40: "when the two were in the cave and he said to his companion: Be not afraid, see! God is with us". (Cf. R. Basset, *La Bordah du Chaikh el-Bousiri*, p. 81—86, and the parallels given there).

Along the road the Anṣār came flocking up to the Prophet; they took the reins of his camel and begged him to settle among their tribes. But Muḥammad answered: "Let my camel go; it is obeying God's command". (Cf. Mas'ūdī, *Prairies d'Or*, iv. 139).

The traditions regarding the erection of the first mosque and institution of the Friday service are also connected with this journey. The Prophet is said to have entered the house of Sa'd b. Khaithama in Ḳubā and to have had a mosque built there. He is said to have performed the solemn Friday service (*ṣalāt al-Djum'a*) for the first time with the Banū Sālim, when he came among them on his way. Arriving in Medina he took up his abode with the Anṣārī Abū Aiyūb.

Authorities are not agreed on the exact date of the Hidjra. According to the most usual account, it took place on the 8th Rabī' I (20th Sept. 622). But this would not be the date of the departure from Mecca but of the arrival in Medina. According to other versions, it was the 2nd or the 12th Rabī' I. Al-Bīrūnī says that the Jews were just celebrating the 'Āshūrā festival (Day of Atonement) when the Muslims arrived in Medina.

The 8th was preferred as it was a Monday. According to a tradition, the Prophet is said to have answered when asked why he observed Monday especially, "on this day was I born, on this day I received my prophetic mission and on this day I migrated".

The fixing of the Hidjra as the beginning of the Muhammadan era dates from the Caliph 'Omar. The traditions which try to trace it to the Prophet himself are devoid of all probability. According to another tradition, Ya'la b. Omaiya, Abū Bakr's governor in the Yemen, was the first to use it, but the view that it dates from 'Omar is by far the most prevalent.

It is related in various forms that 'Omar after

having regulated the administration of finance and made up the registers and the levies of taxes found himself embarrassed about the dating, or rather he was reproached for not dating at all. According to a tradition quoted by al-Bīrūnī, Abū Mūsā al-Ash'arī wrote to him saying: "Thou art sending us letters undated". The Caliph discussed the matter with his officers and after investigating the customs of the Greeks and Persians it was decided to establish an era. Some proposed to date from the birth of the Prophet, but this date was not certain. 'Alī is then said to have proposed to take the Hidjra as the beginning of the era, as it marked the date when the Prophet began to assume sovereign power. This decision was come to in the year 17 or 18, some however say 16, but the general view is the year 17.

Before fixing this date the Muslims gave their years names such as "year of the permission", "year of the earthquake", "year of the farewell" etc. (Cf. al-Bīrūnī, *Chronology*, p. 35). When Muḥammad began his preaching, the Arabs were reckoning from the "year of the elephant".

The year of the Hidjra was then chosen as the year 1; but as the calendar was already fixed by the Ḳur'ān, the months were retained and Muḥarram was retained as the first month because business is resumed then after the pilgrimage. The era thus began, not with the day of the Hidjra but with the 1st day of the moon of Muḥarram of the Hidjra year. This first day fell upon a Friday and corresponded to the 16th Tammūz (July) 933 of the Seleucid era, and 622 of the Julian calendar.

(B. CARRA DE VAUX.)

ḤIKĀYA has had a varied history, of importance not only lexicologically but also in the development of Arabic literature. In Lane (pp. 618 *sqq.*) the history is unfortunately confused, but when we turn to the native lexicons (e. g. *Lisān*, xviii. 207 *sqq.*) we are met with the paradox that the meanings are not those found in the great mass of later Arabic writings and that the commonest later meaning, "story", "narrative", occurs hardly at all. The root does not come in the Ḳur'ān (there *ḥadīth* is commonest as a noun and *ḳaṣṣa* and *nabba'a* as verbs; on *asāṭīr al-awwalīn* see Sprenger, *Leben*, ii. 390 *sqq.*) and as used in traditions it means to imitate an action, usually in a bad sense (*Lisān*, *loc. cit.*). *Ḥikāya* is therefore *μίμησις*; and from that all follows. In the first instance it is mimicking for purposes of amusement; the professional *ḥākiya* is a mimic. Then imitation of speech may be reproduction; thus *ḥakaitu 'anhu 'l-ḥadīth* "I reproduced from him the tradition". It can also involve simple resemblance as though one thing reproduced another by being like it. So the meanings remained for at least the first four centuries. Theologically the distinction lasted much longer. In the *Kulliyāt* (xvii. cent. A. D.; quoted in *Muḥīṭ al-muḥīṭ*, i., 431b) *ḥakā* cannot be said of Allāh since there is nothing like his speech; but see Baiḍāwī on *Ḳur*. xxxviii. 164 and Ibn 'Arabshāh, *Fākihat al-Khulafā'*, ed. Freytag, p. 108, l. 25. In the *Fihrist* (latter part of iv. cent.) narratives are *akhbār*, sometimes *aḥādīth*, and stories told for entertainment are *asmār* or *khurāfāt* or *aḥādīth* but never *ḥikāyāt*; see, for example, the well known passage on the history of *The 1001 Nights* (pp. 304 *sqq.* and cf. p. 313). *Asmār*, of course, may also be historical, e. g. *al-asmār al-ṣaḥīḥa* (p. 305, l. 9) while *ḥadīth* has been, from beginning to end, the broadest word of all. But *ḥikāya* in the *Fihrist* means only a reproduction of a statement, a transcript, e. g. p. 275, l. 20 *ḥikāya min khaṭṭ* .... "a transcript from the handwriting of ...", l. 21, *mā hādhihi ḥikāyatuhu*, "of which this is a transcript". It may often be translated "statement", and is in *oratio recta* when there is nothing to the contrary. In Ḥamza of Iṣpahān (early part of fourth century) the usage of the root is the same, e. g. p. 17, l. 12, p. 64, l. 1, p. 65, l. 15, p. 201, l. 4 of ed. Gottwaldt. In the *Aghānī* (Abu 'l-Faradj d. 356) *ḳiṣṣa*, *ḥadīth* and *khabar* seem to be used indifferently for narrations, but *ḥikāya* as in the *Fihrist* and by Ḥamza, e. g. ed. Būlāḳ, i. p. 4, l. 20: *hādhā mā sami'tu min Abī Bakrin ḥikāyatan mal-lafẓu yazīdu wa-yanḳuṣu* "this is a general reproduction of what I heard from Abū Bakr although the expression may not be exactly in his words". Yet the verb *ḥakā* occurs in the meaning "narrate". See vol. viii. p. 162, ll. 7 and 10, where the verb and *ḥikāya* come side by side, the latter in the sense "imitation". Apparently the noun retained the original meaning longer. In Mas'ūdī's (d. 345-346) well known passage on the *Nights* (*Murūdj*, iv. 89 *sq.*; de Sacy in his *Mémoire* on the origin of the *Nights* gives the passage in four forms) *khurāfa* is the word used for such tales; *ḥikāya* does not occur. It may be said generally that the older translations of this word (e. g. by Gottwaldt, Kosegarten, Barbier de Meynard) are misleading. Thus in Mas'ūdī, viii. 16 *sq.* it is mimicking that is meant and not story-telling. But when we reach Ḥarīrī (d. 516) *ḥakā* is used at the beginning of the *Maḳāmāt* indifferently with *ḥaddatha*, *akhbara* and *rawā* in the sense "to narrate". But he also (ed. de Sacy², vol. ii, p. 420) uses *ḥakā* in the old sense of "resemble" which later became so archaic that the commentators had to explain it. With Ḥarīrī the change of meaning is complete, and when we turn to the oldest Mss of the *Nights* (both the Galland Ms and that of the "Story of Sul and Shumul" at Tübingen are of the early xivth cent. A. D., after A. H. 700) we find *ḥikāya* in normal use for a story told for entertainment. See Seybold's *Geschichte von Sul u. Schumul*, p. 164, and my "Story of the Fisherman and the Jinni", in the Nöldeke-*Festschrift*, passim. Of the words for such tales used in the *Fihrist* and by Mas'ūdī, *asmār* has fallen back to its original use of conversation and tales told at night in the desert life, and *khurāfāt* has developed to mean only ridiculously impossible stories, as opposed to those which are fictitious but pleasing; thus in Damīrī's *Ḥayāt al-Ḥayawān*, i. 185, l. 31 of ed. of Cairo 1313, *khurāfāt al-ru'yā*, and ii. 101, l. 25, *khurāfāt al-'arab*. Only in Tripoli, apparently, is it still the normal word for "story"; see Stumme, *Märchen aus Tripolis*.

We are now left with two questions. Can this

change of meaning be in any way bridged and explained? and, What must have been the character of the first *ḥikāyāt* in the new sense? There have always been stories in Arabic from those told in the Ḳur'ān and the competing translations from Persian by Naḍr b. al-Ḥārith (Ibn Hishām, p. 191), to the modern *ḥadūta* or Märchen, told in colloquial and, so far, reduced to writing and print only by European scholars and some eccentric Egyptians and Syrians. The very multiplicity of names for the different kinds of the story shows how they have been cultivated and how keenly they have been distinguished. Some of these names have been given above. Others are *riwāya* which began by being the oral recital of a narrative or a poem by a *rāwī* and has now become an ordinary word for "story" and the normal word for a play, comedy or tragedy, with or without *tamthīlīya* added; *mathal* (*amthāl*), the story as an example or illustration of some situation or precept, e. g. *Kalīla wa-Dimna* and all beast-fables (*'alā alsinati-l-ḥayawān*); *sīra* (*siyar*), "manner of life" and then "biography"; *nawādir*, unconnected anecdotes; *ḳiṣṣa* (*ḳiṣaṣ*), a story of any kind but specialized by Ḳur'ānic usage and that of the professional *ḳuṣṣāṣ* (Goldziher, *Muh. Studien*, ii. 161 *sqq.*) to legends of the past and stories about the prophets. To these last the first *ḥikāyāt* formed an exact opposite. They were not stories of the past but pictures of the present. This is made plain by the only example so far printed, *Ḥikāyat Abi 'l-Ḳāsim al-Baghdādī*, edited by Adam Mez under the title, *Abulḳâsim ein bagdâder Sittenbild*. The author, Muḥammad Abu 'l-Muṭahhar al-Azdī, shows in his preface that he knows that he is producing a new literary form. It is not to be a poem or a *risāla* or a *maḳāma* (he must have known those of Hamadhānī) but a realistic transcript of Baghdād manners and phrases in the person of a, for us, very disreputable representative who, however, seems to be regarded by the author as of literary refinement. Story there is none, but a day is filled with a dinner party and with scraps of verse and of ornate prose in the current forms of rhetoric, but all concrete and direct, written not for the sake of playing with words but of producing a picture of life. The use of a single figure to mirror the ideas and ways of a city he defends with a long quotation from Djāḥiẓ (*Bayān*, ed. Cairo, p. 31, ll. 12—24) who seems to have been the first to take pleasure in pictures of classes of the people. Yet it is only a new application of the realism of the old poetry of the desert to the artificial town life, marked, however, with all the coarseness of language and idea which distinguished the town from the desert and the new from the old. Of the *ḥikāya badawīya*, meant probably as a contrast, which the author says (p. 2, l. 16) he has added we have no trace left.

But *ḥikāya* in the quotation from Djāḥiẓ is evidently used of a mimic and not of a literary artist who creates a representative figure. The development which produced so striking a literary genre as that of Abu 'l-Muṭahhar calls, therefore, for explanation, and I would suggest that it was due to the influence of the Aristotelian doctrine of *μίμησις* in art (*Poetics*, i.—iv.). Djāḥiẓ died in A. H. 200 and Abu 'l-Muṭahhar wrote after 400 (Mez, p. xv.). But it is evident that the Poetics of Aristotle found translators and attention only slowly. There was a *Mukhtaṣar* by al-Kindī (d. about 247; *Fihrist*, p. 250, l. 5 and 257, l. 6) but no full translation until that of Mattā b. Yūnus (d. 328; *Fihrist*, pp. 250 l. 4, 263, last l.) and his pupil Yaḥyā b. 'Adī (d. 364) wrote a *tafsīr* on it (*Fihrist*, pp. 250 l. 4, 264, l. 14). In that translation (ed. by Margoliouth in his *Analecta Orientalia*) the word used for *μίμησις* is *ḥikāya*. The conception of literary art as an "imitation" of life may thus, when translated into Arabic forms, easily have resulted in Abū 'l-Muṭahhar's new literary type. The next development into "story" must have come very rapidly for we find that Ḥarīrī (d. 516) has forgotten so completely the earlier uses that he can apply *ḥikāya* even to such *amthāl* as the apologues in *Kalīla wa-Dimna* (ed. de Sacy[2], l. 13). When he implies in the same passage that his own *maḳāmāt* are also *ḥikāyāt* he is much nearer the true meaning, for they are certainly renderings of contemporary life though treated with artificial rhetoric and a playing with words for the sake of word-play. On this side they are the nearest that the Arabic of literature ever reached toward that life of the open road and of living by one's wits that is the mark of the picaresque novel. But in popular Arabic the same motif was taken up and extended in such tales as the cycle that surrounds the name of 'Alī al-Zaibaḳ. On the picaresque side these are true reproductions of life; there is an abbreviated recension of them in the *Nights* and much longer independent forms have been printed at Beyrout and Cairo.

But before *ḥikāya* reached the possibility of being used for any story it must have passed through a stage in which it meant a fictitious story, not of wonderful happenings in the past or in distant lands or by the agency of the djinn and of talismans, but of such life as its readers themselves knew. Examples would be the cycles in *The 1001 Nights* known as "The Hunchback" or, very differently, "Alī b. Bakkār and Shams al-Nahār". In this way a specifically new thing entered Arabic literature. There is no trace of it in the *Fihrist* even as there is no trace of the beginnings of the *maḳāma* as developed later by Hamadhānī and Ḥarīrī. We have record there of professional entertainers (*muḍḥikūn*, *mukamī'*, pp. 151—155), of wonderful tales, love-stories and stories of the djinn (pp. 304 *sq.*), but of nothing which can be identified as belonging to this particular genre. To Abu 'l-Faradj, the author of the *Aghānī*, Ibn Khallikān, in Wüstenfeld's text (n°. 451) ascribes a "Book of *ḥikāyāt*", but this elsewhere is read *al-ḥānāt*, "taverns", (Kosegarten, *Prooemium* to his ed. of *Aghānī*, p. 190, and so, decisively, Wright, *Chrestomathy*, p. 87, l. 11 from the autograph Ms.).

We have thus the appearance, practically at the same time between the fourth and the fifth centuries of the Hidjra, of two new forms which in their beginnings were closely akin but which quickly separated into two widely different types. The *maḳāma* was at first practically a *ḥikāya* in the original sense, and the *ḥikāya* of Abu 'l-Muṭahhar is practically such a monologue, though not one delivered standing as was the *maḳāma*. But to Abu 'l-Muṭahhar his new form was distinct from the *maḳāma* and was rather a development from the mimetic *ḥikāya*. The intention in the two forms was different and the difference is expres-

sed in the names applied to them by their authors. The *maḳāma* was an oration and therefore ran out in rhetoric; the *ḥikāya* was a reproduction and therefore turned to action and life. The latter transformation must have been aided by the rapid development in the verb *ḥakā* of the meaning "narrate". So *ḥikawātī* now means "public story-teller" and *ḥikāya* came to be applicable to any tale, while still retaining even in the colloquial (see Dozy, *sub voc.*) the possibility of the original meaning. And probably even in the *ḥikawātī* there is still some feeling left of the mimic, as the oriental story-teller always acts out his tale. Yet the terms are sometimes curiously confused. Thus in *Nuzhat al-Abṣār wa 'l-Asmā' fī Akhbār Dhawāt al-Ḳinā'* (date?) there is (pp. 82—89 of ed. of Cairo, 1305) a short realistic story *fī dhamm al-nisā'* which is called a *maḳāma*.

Only one consideration remains. This development has been conditioned and limited by a constant factor. The professed littérateur, at least in Arabic Islām, has always, with few and individual exceptions, looked down upon the story and refused to recognize it. He has never condescended to a narrative of fictitious facts and events told for its own sake. Such he left to professional entertainers, buffoons and the vulgar in general. The only stories recognised as forming part of polite literature have been those with an ulterior object. They have been apologues (*amthāl*) as in *Kalīla wa-Dimna*, *Fākihat al-Khulafā'*, *Sulwān al-Muṭā'* and the like; or simply vehicles for poetry and rhetorical prose, like *Law'at al-Shākī* and the whole range of *maḳāmāt*; or collections of historical and literary anecdotes like *I'lām al-Nās*, *al-Faradj ba'd al-Shidda* and *Maṣāri' al-'Ushshāḳ*; or stories with ethical or mystical purpose, as *Salāmān and Absāl* and *Ḥaiy ibn Yaḳẓān* of Ibn Sīnā and the *Mukhaiyalāt* of 'Alī 'Azīz of Crete. Yet Muslim writers were early in contact with stories in good literary standing which came to them from without. They had translations of Greek romances and of Persian and Indian tales (*Fihrist*, pp. 305 *sq.*; Ḥamza of Iṣpahān, p. 41 *sq.*). In the time of the compiler of the *Fihrist* also it was evidently possible for a reputable author to write stories; on p. 306, ll. 9 *sq.* he gives the names of several. See, too, (p. 304, ll. 21 *sq.*) how Djahshiyārī, a writer of distinction, could occupy himself with the compilation of a collection similar to *The 1001 Nights* and a brother of Shāfi'ī could transcribe it. But the popularity of such things under the 'Abbāsids was so great that the *warrāḳūn* took to writing them and that naturally affected their standing (p. 308, ll. 9 *sqq.*). The relation also to the professional jester and entertainer was too close; see on these pp. 140 *sq.* and especially on Abu 'l-'Anbas and his standing, partly as astronomer and partly as *nadīm* of al-Mutawakkil and purveyer of *bāh* literature, p. 151, ll. 23 *sqq.* So stories tended to be anonymous and to be classified with dubious subjects — stories of the *baṭṭālūn*, of Djuḥā, of *bāh* (pp. 313 *sq.*). This is well illustrated by *The 1001 Nights*. We have there stories showing in their structure a technical skill beyond any public reciter; but they are as anonymous as *Märchen*: their authors did not dare to own them. Such are "Ḳamar al-Zamān and Budūr", "The Three Ladies of Baghdād", "The Three Apples" and the realistic novels. The romances of chivalry, on the other hand, in so far as they professed to be biographies (*siyar*) and not *ḥikāyāt*, required the support of the authority of stated authors, but the names given are usually unknown to us and probably always false; cf. above on 'ANTARA, i. 362 and on BAIBARS, p. 589ᵃ *sq.*

The above holds of Arabic-speaking Islām. In Turkish, apparently, and still more in Persian, stories retained a position of higher literary respect and were treated with greater care as to style, although there also they tend to anonymity. Further, the Turkish *meddāḥ* corresponds closely to the old Arabic *ḥākiya*, and in the modern development of a new Turkish literature the art of the *meddāḥ* is influencing the realistic novel. For many specimens of *meddāḥ*-stories — strikingly resembling in type the *ḥikāya* of Abu 'l-Muṭahhar — see Georg Jacob's *Türkische Bibliothek*, passim, and on the whole subject the introduction to vol. i. 6 *sqq.* and Paul Horn, *Gesch. d. türk. Moderne*, pp. 12 *sqq.*

Bibliography has been given in the course of the article; but the first reference must always be to the *Einleitung* of Mez to his *Abulḳâsim*.

(D. B. MACDONALD.)

ḤIKMA, (Hebr. *ḥokhmā*, Syr. *ḥekhmethā*), "wisdom". In the ancient portions of the Ḳur'ān the term is applied to the Prophet's preaching (xvi. 126; liv. 4), then it is used as synonymous with "sacred, revealed book" (iii. 43. 75. 158; iv. 57; v. 110; xvii. 41; the "Gospel" xliii. 63) and applied to the Ḳur'ān itself (ii. 231; iv. 113; xxxiii. 34; lxii. 2). Its original acceptation is found in ii. 272; applied to David, ii. 252; xxxviii. 19, and to the sage Luḳmān, xxxi. 11. In this last passage it is explained by Ṭabarī, (*Tafsīr*, xxi. 39) as "knowledge (*fiḳh*) of religion, reason and truth" and by Baiḍāwī (ed. Fleischer, ii. 113, 2). "*Ḥikma* in the conventional language of the learned means the perfecting of the human mind by the acquisition of the speculative sciences and complete faculty for doing excellent deeds according to the ability possessed". The same idea of wisdom is already found in the Ḳatabān inscriptions where *Ḥ-K-M* is an epithet of the moon-god (Ditlef Nielsen, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, lxvi. (1912), p. 592, l. 25; H. Derenbourg, *Revue d'Assyriol.*, v. (1902), p. 117 *sqq.*). The lexicographers define *ḥikma* as "the knowledge of the best thing by means of the best science" (*Lisān*, xv. 30); "to be just in a judicial decision, to know the truth of things as they are and to act according to the requirements thereof" (*Tādj al-'Arūs*, viii. 253); "the science in which is sought the true nature of things, as they are in themselves, as far as is humanly possible (Ḥadjdjī Khalīfa, *Lex. Bibl.*, iii. 84). The word has practically come to be synonymous with *falsafa* [q. v.], which originally meant Greek philosophy set forth in Arabic (Ibn Khaldūn, *Prolegomena*, Būlāḳ, i. 399; Ḥadjdjī Khalīfa, iii. 89).

Ḥikmat al-Ishrāḳ, a kind of neo-Platonic mysticism, is the philosophy of illumination (*mashriḳīya*) [see FALSAFA, p. 50ᵇ *infra*]. Practised as early as the time of Avicenna who wrote a work entitled *al-Ḥikma al-Mashriḳīya*, it had at that time a secret character which it has since lost. The Alchemists call their science *ḥikma* (cf. *Mafātīḥ al-'Ulūm*, p. 256).

HĪLĀDJ (or Hailādj), a Persian word adopted into Arabic, as astrological term, associated with *kadkhudā* by Ibn al-Rūmī (died 284 = 897) in a celebrated verse. According to the *Burhān-i ḳāṭiʿ* s. v., where it is derived from the Greek, it means "chair of life". By its assonance to Ḥallādj, the word has given ʿAṭṭār a title for his *Hīlādj-Nāmah*, a long Persian poem, which describes the ideal of mystic union in the form of the story of a martyr.

HILĀL, an Arab tribe belonging to the Maʿaddī (Ismāʿīlī) group. Its genealogy is Hilāl b. ʿĀmir b. Ṣaʿṣaʿa b. Muʿāwiya b. Bakr b. Hawāzin ..... b. Kais ʿAilān. During the Djāhiliya they worshipped at Tabāla the idol Khalaṣa, called the Kaʿba of the Yemen, which was also worshipped by the Badjīla, Ḥārith b. Kaʿb and Khathʿam.

They lived in Nadjd (on the Yemen border) and were neighbours of the Sulaim [q. v.]. The following places belonged to them, al-ʿAblāʾ, Buraik (with the *Ḥarra* of the Banū Hilāl), Bamī, al-Furuḳ, al-Kuraiḥa (the two latter were already ruined by Hamdānī's time), Ghurwah, Marrān (a large town on the road to Baṣra with numerous wells, palms, and cornfields), Ṣariḥa or Ḍariḥa and the famous market place of ʿUkāẓ (in Hamdānī's time); the following wadis: Lyidhān, Kuniya, and Turaba (near Mecca, very fertile; shared with the Ḍibāb and ʿĀmir b. Rabīʿa), and the following mountains: Baiḍāʾ [with the lake al-Naḳʿāʾ; in Wüstenfeld, *Register*, p. 224, wrongly Boss and al-Baḳʿāʾ (Baḳʿāʾ)] and al-Kuīn. There were also many Hilāl at Bīsha [q. v.]. According to Hamdānī, they spoke good Arabic.

Historical. In the pre-Muḥammadan period, Ḍamra b. Māʿiz, chief of the Hilāl, on a raid slew several of the Azd; the chief of the Azd, the poet Ḥādjiz, then made war on them and took many prisoners. On the 'day' of al-Waḥīda (al-Waḥīdāt) between the ʿĀmir b. Ṣaʿṣaʿa and the Tamīm, the Hilāl fought on the side of the former and lost nearly 80 men killed. During the 'Fidjār' [q. v.] battles between the Ḳuraish and Kināna on the one side and the Hawāzin on the other we find the Hilāl on the side of their kinsmen, the Hawāzin [q. v.]. Just before the conclusion of peace between the Hawāzin and Ḳuraish and the Kināna, at the instigation of Wahb b. Muʿattib, the chief of the Thaḳīf, a tribe related to the Hawāzin, they made a raid upon the Banū Laith, a clan of the Kināna and stole their cattle, under the leadership of Kaiʿa b. Abī Ẓabyān in connection with other tribes of the ʿĀmir b. Ṣaʿṣaʿa. When, after the conquest of Mecca by the Prophet in 8 = 630, the Hawāzin and the Thaḳīf advanced against Muḥammad in Mecca under Mālik b. ʿAwf, the Hilāl also joined them. In the third year of the reign of the ʿAbbāsid Caliph al-Wāthiḳ (230 = 844-845) his general Bughā al-Kabīr sent an army against the Hilāl, who were then with the Sulaim creating unrest in Medina, and had three hundred of the malcontents thrown into prison in Medina; they attempted to escape from here along with the Sulaim prisoners but were prevented by the Medinese and, when they resisted, were massacred to a man. The tribe afterwards migrated to Egypt where they settled at first in the Nile Delta, but were afterwards conquered by the Fāṭimid Sulṭān al-ʿAzīz (365—386 = 975-996) and forced by him to take up their abode in Upper Egypt, as they had taken the side of the Ḳarmaṭians. Maḳrīzī tells us that in 797 they lived in the Aswān district in the province of al-Ṣaʿīd; among their clans in Egypt he mentions the Banū ʿAmr, Rifāʿa, Ḥadjir or Ḥudjair, Ḳurra (at Ikhmīm), ʿUḳba or ʿAḳaba (Wüstenfeld, *Maḳrīzī* (see Bibl.) p. 464 erroneously: Corra) and Djamūla near Aṣfūn (Uṣfūn; Wüstenfeld, *l. c.*: Asfun, a misprint) and Asnā. In the year 444 = 1052, at the instigation of the Fāṭimid Caliph al-Mustanṣir (427—487 = 1035—1094), they migrated to North Africa (Ḳairawān) where after considerable fighting they conquered the Ṣinhādja, the former governors in the Fāṭimids, then the real lords of the country. Many tribes in Africa trace their descent from Hilāl.

The migration of the B. Hilāl to Africa and the wars which they had to wage during the conquest of the country form the historical background of a collection of heroic tales and love stories, the romance or rather epic, *Sīra Banī Hilāl* (History of the B. Hilāl) which exists in two recensions (*Sīra al-Shāmīya* and *Sīra al-Ḥidjāzīya*) containing three cycles.

The first cycle describes the history (the *Sīra* proper) of the B. Hilāl in Bilād al-Sarw wa ʿUbāda. Two sons, Djābir and Djubair, are born to al-Mundhir, son of Hilāl, by his two wives Hadhbāʾ and ʿAdhbāʾ on the same night. Djubair goes off with his mother and afterwards becomes Sulṭān in Nadjd. — The Emirs Ḥāzim and Rizḳ of the line of Djābir rule in Bilād al-Sarw. Rizḳ marries al-Khaḍrā, the daughter of the Sherif of Mecca, whom he had sided against the king of Rūm. She bears him a son, the dark Barakāt, afterwards called Abū Zaid (Zēd). Ḥāzim's successor is his son Sirḥām (Sarḥān); the latter is succeeded by his son Ḥasan, who marries Kharmā, queen of the Yemen, after conquering the fire-worshippers in the land of Bardhakhīt, against whom Kharmā had appealed for help. India is conquered with the help of Abū Zaid and Ḥasan then goes with Kharmā to Bilād al-Sarw wa-ʿUbāda.

The second cycle deals with the migration (*riḥla*) of the Banū Hilāl to the land of Nadjd. A famine drove the Hilāl from Bilād al-Sarw to Nadjd, where they were received in the most kindly fashion by king Ghānim and his sons Dhiʾāb (Diyāb, of the line of Djubair) and their people, the Banū Zughba. The Hilāl conquer the king al-Haidabī, who was chief of the seven rulers of Nedjd; Ḥasan, who marries al-Nāʾila, sister of Dhiʾāb, then rules in Nedjd with vassal kings. A war breaks out between Dhiʾāb, who kills two of Ḥasan's brothers, and Abū Zaid; Dhiʾāb submits and peace reigns.

The third cycle deals with the migration of the Hilāl to the west (*Taghrība*) and their wars with the Zanātī Caliph in Tunis. In 460 = 1068 Abū Zaid with his retinue goes to Tunis to seek a more productive dwelling-place on account of the famine reigning in Nadjd. Saʿda, the daughter of the Zanātī Caliph, who falls deeply in love with

Mir'ī (Mar'ī), one of Abū Zaid's companions, uses her influence on their behalf. Abū Zaid then returns to Nadjd and the Banū Hilāl begin their migration westwards. After many adventures (the expedition into the land of the Persians with the seven Sulṭāns and their battles there, the capture of al-Māriya, daughter of the Ḳāḍī Budair, the battles with al-Ghaḍbān, king of the Kurds and Turkomans, with al-Bardawīl b. Rashīd (Baldwin I, 1109—1118) al-Serkasī Ibn Nāzih, al-Firmand, the ruler of Egypt, al-Māḍī, the king of Bilād al-Ṣa'īd, etc.) they enter the land of the Zanātī Caliph. Al-Zanātī advanced against the Hilāl and kills two of Dhi'āb's brothers. After al-Zanātī had been killed with the help of Dhi'āb, the struggle begins for the possession of the seven thrones and the fourteen citadels of the western land. Ḥasan and Abū Zaid are treacherously murdered by Dhi'āb. The orphans endeavour to avenge these murders. Under the leadership of Buraiḳ', son of Ḥasan and nephew of Dhi'āb, and al-Djāziya, Ḥasan's sister, they go out against Dhi'āb and slay him, after he has killed Djāziya by a kick. Buraiḳ', who thus takes the throne, by his tyrannical rule arouses a general rebellion among the B. Zughba in which he loses his life at the hands of Naṣr al-Dīn, son of Dhi'āb.

Of the two chief heroes of the romances, Abū Zaid and Dhi'āb, only the latter is found in history, but there he plays only an unimportant part, like Roland, the hero of the epic of the Charlemagne cycle.

The brief synopsis here given only covers the main outlines of this romance, so highly valuable for philology and the history of Arab culture, which contains a great number of separate stories. Cf. M. Hartmann, *Die Benī Hilāl-Geschichten* in the *Zeitschr. für afrikan. und ocean. Sprachen*, iv. 289 *sqq.*

HILĀL AL-ṢĀBĪ. [See AL-ṢĀBĪ.]

HILĀLĪ, the pen-name of BADR AL-DĪN. Of Čaghatāi origin and born at Astarābād he was educated at Herāt, and was patronised by 'Alī Shīr. The fullest account of him is by Sām Mīrzā who was a friend of his. (See Silvestre de Sacy in *Not. et Extraits*, iv. 285). The account there given of his begging to be put to death by a certain young man is not in the B. M. copies of the *Tuḥfat-Sāmī* and may be an interpolation. Hilālī's best known poem is the *Shāh u Darwīsh* (*Shāh u Gadā*). Bābur severely criticises its morality, and Rieu, II, 656, seems to take the same view, but Professor Ethé claims it to be a spiritual poem, and has translated it into German verse, *Morgenländ. Studien*, p. 197—282. See *India Off. Cat.*, N°. 1426, p. 785. Hilālī was put to death as a Shī'a heretic by 'Ubaid Allāh (Shaibānī's sister's son) in 939 (1532-1533).

Bombay, Part iii., vol. iii. 350, where he is called Mawlānā Nūr al-dīn; Ethé in *Grundriss der iran. Philologie*, ii. 228, 246, 297, 301. (H. BEVERIDGE.)

ḤILF (A.), a league or confederacy, originally of tribes or clans, which had previously formed more or less closed units. The ceremonial act by which the alliance was usually completed seems to have had for its object the unification of the previously separated groups. Cf. Joh. Pedersen, *Den Semitiske Ed* etc., Copenhagen 1912, p. 10, 20—32 (German ed., *Der Eid bei den Semiten*, 1914, p. 7, 21—31), where it is made probable that the idea of "swearing" is not the fundamental notion in the root *Ḥ-L-F* but has developed out of the notion of confederacy.

The parties, by the league, became *ḥulafā'* (sing. *ḥalīf*) to one another; a single individual could also enter into a *ḥilf* with a tribe. In this case the conception of *ḥilf* coincides often with that of *djiwār*.

Some confederacies are worthy of special mention, e.g. the *Ḥilf al-Muṭaiyabīn*, the league which 'Abd Manāf formed with several Ḳuraish clans against the 'Abd al-Dār, when the latter declined to give up their privileges. The name *al-Muṭaiyabūn* (the perfumed) is said to be derived from the fact that the confederates dipped their hands in a vessel of *ṭīb* (perfume) at the Ka'ba and then rubbed the Ka'ba. The *Muṭaiyabūn* are mentioned in a letter of Muḥammad to the Khuzā'a. — The 'Abd al-Dār on their part formed a league with other clans and were called *al-Aḥlāf* (Ibn Hishām, ed. Wüstenfeld, p. 84, *sq.*; Ibn Ḳutaiba, *Kitāb al-Ma'ārif*, ed. Wüstenfeld, p. 294; al-Ya'ḳūbī, ed. Houtsma, i. 287 *sq.*; al-Mas'ūdī, Paris edition, iii. 120 *sq.*; Caetani, *Annali dell' Islam*, i. Introd., §§ 85—87, ii. 1, anno 8, §§ 20—21 and other sources and works given there).

Ḥilf al-Fuḍūl was the name of a league of several Ḳuraish clans, who banded themselves together to intercede on behalf of those who were treated unjustly. At the formation of this confederacy Zamzam water, with which the edges of the Ka'ba had previously been washed, was drunk. The meaning of *al-Fuḍūl* is uncertain; the most varied explanations are given by the Arab authorities. Muḥammad is said to have been present at the conclusion of this alliance and to have esteemed it very highly (this is also told of the *Ḥilf al-Muṭaiyabīn*, e.g. al-Ṭabarī, *Tafsīr*, v. 35 *supra*). It is related of al-Ḥusain b. 'Alī that he once threatened an Umaiyad governor of Medina with the militia of the *Ḥilf al-Fuḍūl*. (*Aghānī*[1], xvi. 63—71; Ibn Hishām, p. 85 *sq.*; Ibn Ḳutaiba, *l. c.*; al-Mas'ūdī, iv. 122 *sqq.*; Caetani, *o. c.*, i. introd. §§ 146, 147). Cf. also the *Ribāb* (sing. *Rubbā*, cf. al-Ṭabarī, i. 1914, 11 2221, 3, 15; Ibn Duraid, *Kit. al-Ishtiḳāḳ*, ed. Wüstenfeld, p. 111; *'Iḳd*, Cairo 1316, ii. 41, cf. 39, 2 *sqq.*; *Aghānī*, s. Ind.; Caetani, *o. c.*, i. ii. s. Ind.), the "bloodlickers" (*La'aḳat al-Dam*; Ibn Hishām, p. 125; *Aghānī*, vii. 26, 28; Caetani, *o. c.*, i. Introd. §§ 160, 170), the *Aḥābīsh* (al-Ya'ḳūbī, i. 278 *sq.*; *Aghānī*, xix. 76 *sq.*; Caetani, *o. c.*, i. Introd. § 305, and *passim*) etc.

A hereditary right of the *ḥalīf* confirmed by Ḳur'ān iv. 37 (according to another view it refers to the brotherhood of the Muhādjirūn and Anṣār) was abolished by xxxiii. 6; cf. al-Ṭabarī, *Tafsīr*, v. 31—35; Th. W. Juynboll, *Handbuch des islāmischen Gesetzes*, p. 239 note.

In Islām which was to make all its adherents brothers the *ḥilf* was condemned; the Prophet is made to say: *lā ḥilfa fi 'l-Islām*, but he is said to have recommended the fulfilment of obligations of alliances contracted in the Djāhiliya (cf. also al-Ṭabarī, *o. c.*, v. 34, *sq.*).

On leagues of the modern Arab tribes cf. Jaussen, *Coutumes des Arabes au pays de Moab*, p. 149 *sqq.*, and on the *ḥalīf* in Bilād Arḥab (Yemen) see E. Glaser, *Meine Reise durch Arḥab und Hāschid*, in *Peterm. Mitth.*, 1884, p. 177[b].

ḤILL. [See ḤALAL.]

AL-**ḤILLA**, a town in the wilāyet of Baghdād, the capital of the sandjaḳ of the same name, with 30,000 inhabitants (Cuinet), was founded in 495 (1101—1102) by Ṣadaḳa b. Manṣūr al-Maryadī and given the name Ḥillat Banī Maryad (settlement of the B. Maryad). The site was happily chosen by the vigorous Arab emīr on the site which had once been occupied by the famous city of Bābel, ruins of which still exist some miles up the river. The river, which flows past the town and which has since about the vi[th] (xii[th]) century been regarded as Euphrates proper, was regarded by the Arab geographers as an arm of the main stream and was called Nahr Sūrā al-Asfal. Even before the foundation of Ḥilla there was a flourishing town here, called al-Djāmi'ain, on the left bank, while Ṣadaḳa built his town on the opposite side. The bridge of boats, by which communication between the two banks was carried on, soon became the main passage across the river on the road from Baghdād to Kūfa, which had previously led via Ḳaṣr Ibn Hubaira. Ḥilla as a result rapidly began to flourish and down to the present day has always been a centre of great importance, from the military point of view also.

Bibliography: Yāḳūt, *Mu'djam*, ii. 322 *sq.*; Ibn Djubair, ed. de Goeje, p. 214; Ibn Baṭṭūṭa, ii. 97; Ritter, *Erdkunde*, xi. 783 *sqq.* (where the older travellers are given); Le Strange, *The Lands of the Eastern Caliphate*, p. 71; Cuinet, *La Turquie d'Asie*, iii. 160 *sqq.*

AL-**ḤILLĪ**, ṢAFĪ AL-DĪN 'ABD AL-'AZĪZ B. SARĀYĀ, an Arab poet, born on the 5[th] Rabī' II 677 (26[th] Aug. 1278) at Ḥilla on the Euphrates, settled at the court of the Urtuḳids of Mārdīn and sang their praises. In 726 (1326) he went to Cairo to the court of al-Malik al-Nāṣir but soon returned to Mārdīn and died in 750 (1349) or 752 (1351) in Baghdād. As a rule he only follows in the footsteps of his predecessors in his very numerous poems. Only in popular poetry did he introduce an innovation by inventing a kind of *muwashshaḥ*, called *mudjammam*.

The collection entitled *Durar al-Nuḥūr*, in which the fame of the Urtuḳid al-Malik al-Manṣūr of Mārdīn is sung, contains 29 poems each of 29 distiches, all of which begin with the same letter and end with the letters of the alphabet in order. A poem entitled *al-Kāfiya al-badī'iya* is devoted to the praise of the Prophet and was annotated by the author himself. The *Kitāb al-'āṭil al-ḥālī* is a treatise on the metres of popular poetry called *zadjal*, *mawālī*, *kānkān*, and *ḥūmā*. His *Dīwān* was printed in Damascus (1297—1300) and Bairūt (1300); a poem in honour of Malik al-Ṣāliḥ Abu 'l-Makārim was translated by G. H. Bernstein into Latin (Leipzig 1816).

Hartmann, *Das Muwaššaḥ*, p. 76.

(CL. HUART.)

AL-**ḤILLĪ**, the native of Ḥilla [q. v.], the name of three esteemed Imāmiya theologians.

1. Nadjm al-Dīn Dja'far b. Muḥammad, called al-Muḥaḳḳiḳ, died about 674 (1275), author of the *Sharā'i' al-Islām*, the standard handbook on Shī'ī law (translated into Russian by Kazembeg, into French by Querry).

2. Djamāl al-Dīn al-Ḥasan b. al-Muṭahhar, called 'Allāma, died in 726 (1326); author of the *Khulāṣat al-Aḳwāl*, besides other treatises.

3. Aḥmad b. Fahd, died in 806 (1403), "Shaikh al-Muta'akhkhirīn".

Bibliography: Khwānsārī, *Rawḍāt al-Djannāt*, lith. Teheran 1307, pp. 20, 145, 235; Brockelmann, *Gesch. der arab. Litter.*, i. 406; ii. 164.

(LOUIS MASSIGNON.)

HILMEND [See HELMAND.]

ḤIMĀLA [See ḤAMĀ'IL.]

AL-**ḤIMĀR** (A.), the ass. Tame (*al-ahlī*) and wild (*al-waḥshī*, *al-fara'*) are distinguished. Some of the tame asses are beasts of burden, others are ridden; many of the latter are very swift. The ass can find its way again by a road even though it has only traversed it once before; its hearing is keen and it suffers little from disease. The ass is of special importance in Persia, Syria and Egypt. Many Arabs will not ride an ass out of pride, and it is not considered proper to mention the ass by its real name in good society. Its bray is exceedingly repulsive; the dog howls with pain when it hears it. When an ass brays, it has seen a devil; when a cock crows, it has seen an angel. If a stone be tied to an ass's tail, it will not bray. When an ass sees a lion, it stands still or runs at the lion; it is said to be saved thereby. If a man is bitten by a scorpion, he should sit backwards upon an ass and the pain then passes to the ass. The uses of various parts of the ass in medicine are innumerable.

Wild asses are so like one another that no man can distinguish them. The he ass is very jealous; when he sees a young male, he tears his testicles out with his teeth for fear he should cover a she ass, when he grows up. The she ass knows this and therefore shortly before foaling she goes to some inaccessible place and does not return to the herd until her foal has hard hoofs

and can run swiftly. It is further remarkable that individuals never separate from the herd, even though there are thousands of them. Hunting wild asses is therefore very easy. The hunter hides in a narrow pass and waits till a wild ass comes along and then kills it. The others could escape if they fled back, but as they remain together, the hunter is able to slay as many as he cares. This however does not agree with the descriptions of hunting scenes collected by G. Jacob from the poets.

There is a breed called *Akhdariya*, called after a stallion of Kisrā Ardashīr which bred with wild asses or those that had run wild. These are the finest and swiftest among wild asses. According to some authors, the wild ass reaches an age of 200, according to others, 800 years.

(J. RUSKA.)

ḤIMṢ (pronounced Ḥoms) is situated in the great Orontes plain of Central Syria, about a mile from the Orontes (Nahr al-ʿĀṣī) on a canal connected with it. The town, which has 50,000 inhabitants (of whom 15,000 are orthodox Greeks), is the capital of a Liwā' under a ḳā'immaḳām and belongs to the wilāyet of Damascus. It is connected by railway with Tripolis, with Ḥamā and Aleppo, and with Damascus via Rayāḳ.

Ḥimṣ (called 'Emesa' by the Greeks and Romans; on the various forms see the article 'Emesa' in Pauly-Wissowa's *Realencycl.*) is not one of the towns founded by the Seleucids; the town is first mentioned by Pliny; in the time of Pompey the adjacent Arethusa (Restan) was the seat of an Arab dynasty (see Marquardt, *Römische Staatsverwaltung*, i. 245). Emesa was the birthplace of the Emperor Elagabalus, who rebuilt with great splendour the famous temple of the sun-god here from whom he took his name, and furthered the prosperity of the town in every way by granting it privileges. In the Byzantine period also when we already find the name Χέμψ, it was a flourishing city and the see of a bishop.

At the end of the year 13 the inhabitants concluded a treaty with the Arabs by which by paying a sum of money they secured peace to protect their trade. In the beginning of 14, with the help of a Byzantine garrison, they were able to ward off an attack on the town but it fell to the Arabs at the end of the year after a two months' siege. They seem to have left the town again next year, at least, it is several times said that it surrendered to Abū ʿUbaida in 16 and received a grant of protection. On the division of Syria into military districts Ḥimṣ became the capital of a *Djund* [q.v.] It rebelled under Marwān II, was taken by storm and severely punished. As a rule the *Djund*'s of Ḥimṣ and Aleppo were administered by the same governor. We possess information on the revenues of Ḥimṣ for various periods [cf. ḤALAB]. While the figures for Ḥimṣ are wanting in the *Djirāb al-Dawla* and in al-Muḳaddasī, we still possess al-Yaḳūbī's and al-Iṣfahānī's figures. The yield of the taxes of Ḥimṣ (cf. Le Strange, *Palestine under the Moslems*, p. 44—48) (reckoning the dinār at 10 shillings) was:

a. for the reign of Hārūn al-Rashīd (170—193), according to a quotation from al-Djahshiyārī's *Kitāb al-Wuzarā'*, 320,000 dinārs and 1000 camel-loads of dried grapes (the vineyards of Ḥimṣ were famous and were only destroyed during the Crusades).

b. for the year 204 (Ḳudāma's *Kitāb al-Kharādj*) 118,000 dinārs (the same sum is given by al-Iṣfahānī, quoted by Ibn Khurdādhbih).

c. for the year 250, according to Ibn Khurdādhbih, 340,000 dinārs.

d. for the year 278, 220,000 dinārs (al-Yaʿḳūbī, who wrote about this time).

The low figures given by Ḳudāma, al-Iṣfahānī and al-Yaʿḳūbī are due to a different method of calculating the revenue; they have perhaps deducted the salaries of the officials or other administrative expenses in their calculation.

Under the Ḥamdānid Saif al-Dawla [q.v.] Ḥimṣ passed under the rule of the kings of Ḥalab and was frequently granted by them as a fief. Among those who there held it we may mention Saif's cousin, the famous poet Abū Firās ʿAlī, whom Saʿd al-Dawla deprived of the town. In 367 he granted Ḥimṣ to his general Bakdjūr, whose government of it was highly praised; a minaret of architectural interest (with Kūfic inscription) dates from his time. During this period Ḥimṣ suffered from the repeated ravages of the Byzantines. In 475 it belonged to the notorious Bedouin chief Khalaf b. Mulāʿib (cf. M. Hartmann, *Zeitschr. d. Deutsch. Pal. Vereins*, xxiv. 49—66), who recognised the Fāṭimid caliph as his overlord. Enraged at this and moved by the complaints of Khalaf's subjects against his cruelty, the Saldjūḳ Sulṭān ordered the Emīr of Syria to take him prisoner. He was besieged in 483, captured and brought in a cage to Iṣfahān. Ḥimṣ was granted to Sulṭān Tutush from whom his son Riḍwān inherited it. He granted Ḥimṣ in 491 to his stepfather Djanāḥ al-Dawla, who was murdered by the Ismāʿīlites in 491. Later we find an Emīr Ḳaradjā (perhaps identical with the vassal lord of Ḥarrān, one of Malikshāh's mamlūks. After his death in 506 his son Khirkhān [see ḤAMĀ] succeeded him and died in 525. His children, who were still minors, suffered a great deal from Zangī's efforts to conquer Ḥimṣ, till their guardian in 530 exchanged the city for Palmyra and Raḥba with Shihāb al-Dīn Maḥmūd, king of Damascus. The latter at first granted it in fief to his vizier Onör, but after long negotiations finally transferred it to his stepfather Zangī in 532 (Önör received other towns in compensation). Nūr al-Dīn inherited it from Zangī and his son Ismāʿīl from him, till Saladin received it in 570. Four years later he appointed his cousin Muḥammad b. Shīrkūh ruler of it. With one interruption (it was taken by al-Nāṣir Yūsuf II of Aleppo in 646 and ceded to him, but seems only to have remained a short time in his possession), his descendants remained rulers of Ḥimṣ till 661; they had readily opened their gates to the Mongol Khān Hūlāgū. From 661 it was governed by deputy-governors, sometimes attached to Ḥamā, sometimes to Damascus. In the xvii[th] century an aghā of a native family ruled there, independent of the Pasha of Damascus. In the xix[th] century Ḥimṣ passed, like Aleppo, under Egyptian rule (1831—1840) but it suffered so much from the arbitrary conduct [cf. ḤALAB] of the officials that a rebellion broke out, which was with difficulty suppressed.

Only a few insignificant ruins of the city wall (see plan) and gates survive, while of the citadel, which was destroyed by Ibrāhīm Pasha, a tower with an inscription of the year 594 of Saladin's cousin, Muḥammad b. Shīrkūh, and a gate still stand (see plan). The mausoleum of the great general Khālid b. al-Walīd and his wife Faḍḍa (plan 15) has recently been rebuilt. (The valuable inscriptions were previously copied by van Berchem, Freiherr v. Oppenheim and M. Sobernheim). A number of mills on the Orontes belong to Ḥimṣ, of which one, as the Arabic inscription shows, belongs to the year 824 A.H. and another with Turkish inscription to the year 975 (N.B. this is the only Turkish inscription of this period in Syria). The most interesting building is the great mosque (plan 11), in which half of the cathedral is said to have been incorporated at the beginning of the period of Muslim rule. Herzfeld writes the following note on it: The great mosque lies in the centre of the bazar and is entered from the south of it. The main entrance, on the west side, leads through a vaulted passage into the court, and a side entrance on the east leads directly into the ḥaram. The ḥaram is an oblong space with two naves each with 13 cross-vaultings. There is a small dome above the bay before the simple miḥrāb. In the west is a second, older miḥrāb with gold mosaic, which seems to belong to the earliest Muslim period. The court façade of the ḥaram shows that the plan has undergone many alterations. This wall was apparently originally the wall between the main and side nave of a basilika church of quite an unusual type: 4 large arches alternating with 3 double-storied sections, each of 5 small arches. The columns and capitals, of which many lie in the court of the mosque are remains of the ancient building. This court is oblong, surrounded by narrow cloisters, quite unadorned. An estrade with basin and miḥrāb almost fill it. Beside it, on the west, is a well with a cupola resting on six antique columns.

Bibliography: See the article ḤALAB. Epigraphy: some inscriptions have been discussed by v. Berchem in *Inscriptions de Syrie*, Cairo, 1897, p. 54—56 and in Frhr. v. Oppenheim's *Inschriften aus Syrien* etc., p. 4—13.

(M. SOBERNHEIM.)

ḤIMYAR, the name of an ancient stock in South Arabia. The form Homeritae, Ὁμηρῖται, in the classical authors suggests a diminutive formation; the Arabic form now usual is only found in Theodorus Anagnostes (6th century A.D.), *Hist. eccles.*, ii. ch. 58 (cf. Nicephorus Callistos, *Hist. eccles.*, xvi. ch. 37) in the form Ἀμεριται, or Ἰμεριται. Nonnosos, who went to Aksūm and South Arabia as the envoy of Justinian, and following him, Malalas use the form Ἀμερῖται, which goes back to the Ethiopian Ḥemēr. The form found in inscriptions is Ḥ-m-y-r-m with mimation and the plural '-ḥ-m-r-n, which presumably is to be pronounced Aḥmūrān (= al-Aḥmūr).

According to the Arab authorities, the Ḥimyar, who were divided into a number of smaller tribes, lived around Laḥdj, in the district of Ẓafār and Ridā' and also to the east in Sarw Ḥimyar and Nadjd Ḥimyar. The Homeritae are first mentioned in Aelius Gallus's account of his expedition to South Arabia in 25 B.C., preserved in Pliny, *Hist. Nat.*, vi. § 161, with the note that they are "the most numerous tribe" (*numerosissimus est*); according to Strabo, xvi. ch. 4, § 21, at the time of the Roman invasion Mariaba, i.e. Ma'rib, the capital of Saba', belonged to Ilasaros who ruled over the Rhammanites. This statement most probably refers to Ilīsharaḥ Yaḥḍub, king of Saba' and Dhū Raidān, i.e. of the Sabaeans and Himyarites, who is known from inscriptions. When the anonymous *Periplus Maris Erythraei* was written (about 70 A.D.), the Ḥimyarites ruled the greater part of South Arabia, namely, the coast of the Red Sea and Indian Ocean up to the frontiers of Ḥaḍramawt, with the corresponding interior, including the land of the Sabaeans; they also held a portion of the East African coast (Azania). Their king Charibaël "the legitimate ruler of the Ḥimyarites and Sabaeans" resided in Ẓafār (Ẓ-f-r in inscriptions; in addition to the form with T — Ταφάρ, Ταφαρον, Τάφαρα, Τάφαρ and Taphra — the spelling with S, Sapphar, is also found, in Pliny and Ptolemy; Ethiopian Ṣafār; not to be confused with the port of the same name on the Indian Ocean), which remained the chief city of South Arabia till the Persian occupation. This ruler was on friendly terms with the Romans. He seems to be identical with the Karib'īl W-t-r Yuh'im king of Saba and of Dhū Raidān, of the inscriptions, coins of whom are also known, struck in Raidān. The passing of the hegemony of South Arabia from the Sabaeans to the Ḥimyar took place about the end of the second century B.C. and may have been partly brought about by the discovery of the sea-route to India by the admirals of the Ptolemies, whereby Saba' lost its importance as the centre of the overland trade of South Arabia. Greek and Roman sources are alike silent regarding the further history of the Ḥimyarites down to the 4th century; the inscriptions so far discovered give a series of kings' names but without precise dates. In the reign of the Emperor Constantine II. (337—361) Christianity was introduced by the Indian Theophilos, a native of Dīū; he built churches in 'Aden and Ẓafār and other towns; even at this time there were numerous Jewish communities there (Philostorgius, *Hist. eccles.*, iii. ch. 4). According to another account in Theodoros Anagnostes, *l. c.*, the conversion of the Ḥimyarites did not take place till the reign of Anastasius (491—518). About the middle of the 4th century the Abyssinians, the '-ḥ-b-sh-n of the inscriptions, i.e. the rulers of Aksūm, found a firm footing in South Arabia and Aeizanas, the king of Aksūm, a contemporary of Constantius II, in his inscriptions includes among his titles that of "king of the Ḥimyarites and of Raidān". The Abyssinian invasion seems to date back as early as the third century; Marcianus (beginning of the 5th century) calls the Homeritae an Ethiopian people, and this description is often repeated in the older Byzantine writers. The Roman emperors were in regular communication with them (see *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxxv. p. 73), partly in the interests of trade and partly to secure their support against the Sasanians who were endeavouring to penetrate into South Arabia through 'Omān. About 521 the native princes under Dhū Nuwās (Dunaas, Damnos, Damianus of the Greek sources) aroused a serious rebellion against the Abyssinian invaders. Dhū Nuwās, who is said to have professed Judaism and to have organised the persecution of Christians in Nadjrān, which has become famous through

the martyrology of St. Arethas, fell in 526 in battle with Kaleb Ela-Aṣbaḥa, king of Aksūm, and the land passed under the sway of an Abyssinian dynasty, whose founder, Ela-Abraha, made himself independent of Aksūm a few years after the withdrawal of Kaleb Ela-Aṣbaḥa. We possess an authentic source for his history and his relations with Byzantium, Persia and Abyssinia, as well as with the Ghassānids and other Arab princes, in the great inscription of Ma'rib of the year 540, in which he also gives an account of the restoration of the great dam. In this period arose the "laws of the Ḥimyarites" and other apocryphal works, which are associated with the name of St. Gregentios, bishop of Ẓafār under Ela-Abraha, and his successor (Migne, *Patrol. Graeca*, vol. 86, i. coll. 563—784). In the reign of the Emperor Justin II, about 570, the Ḥimyar chiefs invited the Persians into the country. Masrūḳ, the last ruler of the dynasty of Ela-Abraha (corrupted to Sanaturkes in Theophanus Byzantius), fell in battle with the Persians, who placed the country under military occupation, leaving the various districts (*mikhlāf*) under native princes. The Persian governors (*marzubān*) resided in Ṣan'ā'. When Muḥammad sent his first envoys to the Yemen, the kingdom of the Ḥimyar, as such, had long ceased to exist and the new religion was adopted without appreciable opposition by the Ḥimyar chiefs, as well as by the descendants of the Persians, the so-called Abnā'.

The inscriptions hitherto found in South Arabia in the local alphabet, which we usually call Ḥimyaritic inscriptions, belong to widely varying periods, from about 700 B. C. to about 550 A. D. and only a few fragments among them owe their origin to the Ḥimyar in the narrower sense of the word. Linguistically they fall into two main groups, the Sabaean and Minaean Inscriptions; the Ḥimyar texts belong to the former group. The coins hitherto discovered — almost all silver — apart from a few of the earlier issues, are on the other hand mainly to be ascribed to the Ḥimyar. The alphabet (called *musnad* by the Arabs, which however in the inscriptions only means 'inscription'), a variety of the Phoenician alphabet adapted to the Ethiopian, contains all the consonants of the Arabic language with the addition of a variant of the sibilant س. The Sabaean-Ḥimyar language is an Arabic dialect which is distinguished from northern Arabic by certain grammatical peculiarities (mimation instead of nunation, replacement of the article by the affix *-ān*, *haf'al* for *'af'al* in the 4th form of the verb) and also in vocabulary. On the other hand the supposition of the Arab philologists that the later South Arabian dialects or even the dialects of Mahra and Ḳāra are offshoots from the ancient language of the Ḥimyar has proved incorrect, although they have preserved in their vocabulary many roots and words, which are not known to Northern Arabic, but which are found in the inscriptions.

Before the discovery of the inscriptions the accounts of the Arabs formed, with the scanty records in ancient and Byzantine authors, our only source for the ancient history of South Arabia. The *tubba'*'s of the Yemen are already mentioned in the Ḳur'ān and the kings of the Ḥimyar were henceforth known in history by this name; we now know from the inscriptions that the kings of the Sabaeans and Ḥimyar always called themselves *malik* and that *tubba'* is a corruption of the name of the powerful family of Baṭa' of the tribe of Hamdān. The same inscriptions teach us that the statements in the literary sources on the Ḥimyar *ḳail* and *adhwā* (kings and feudal lords) are for the most part based on misunderstandings. The lists of kings handed down in this way to us and the doings of individual *tubba'*'s are still more unreliable. In the Ḳur'ān we find allusions to the Old Testament story of the queen of Sheba, to persecution of the Christians by Dhū Nuwās in Nedjrān (not certain, see *Zeitschr. der Deutsch. Morgenl. Ges.*, xxxv. 610 *sqq.*) and to the expedition of a *tubba'* against Mecca. At quite an early period the expositors of the sacred book and the story-tellers at the court of the first caliphs began to devote attention to the ancient history of the country (Ibn 'Abbās, Ka'b al-Aḥbār, Wahb b. Munabbih, 'Abīd b. Sharya); although several of them belonged to Yemen, they made less use of genuine popular tradition than of foreign legends, e. g. the Alexander romance and Jewish traditions, and added other matter of their own invention.

The last traces of this kind of historical research are popular works still eagerly read like the story of Bilḳīs and Dhu 'l-Karnain, the *Sīra Saif b. Dhī 'l-Yazan*, etc. The works of three natives of South Arabia are much more serious however: *al-Tīdjān fī Mulūk Ḥimyar* of Ibn Hishām, the celebrated biographer of the Prophet, the *Iklīl* and the *Ṣifat Djazīrat al-'Arab* of al-Hamdānī, as well as the so-called 'Ḥimyarite ḳaṣīda' with commentary, and the lexicon *Shams al-'Ulūm* of Nashwān (died 573); they read the ancient *musnad*'s, although their language was no longer entirely comprehensible to them, and used them in their genealogical and historical researches; how far they worked from old native traditions has still to be investigated, but in any case they were also independent of the scholars already mentioned. Only the information regarding the last century before Islām can be used for the writing of history proper.

Bibliography. A bibliography, particularly of epigraphy down to 1893, is given in F. Hommel, *Südarabische Chrestomathie*, p. 63 *sqq.*, continuations to 1908 in O. Weber, *Studien zur Südar. Altertumskunde*, iii. 71—101. On the older history of the Ḥimyar cf. the essays by O. Blau and others in the *Zeitschr. der Deutsch. Morgenl. Ges.*, xxii. 654—673; xxiv. 559—592; xxv. 525—592; xxvii. 295—363; xxx. 320—324; xxxi. 61—74; Sprenger, *Die alte Geographie Arabiens* (1875). On the Abyssinian invasion: George, *De Aethiopum imperio in Arabia Felici* (Berlin 1833), A. Dillmann, *Über die Anfänge des Axumitischen Reiches*, Berlin 1879; *Zur Geschichte des Axumitischen Reichs vom IV. bis VI. Jahrhundert*, ibid. 1880, and *Bemerkungen zur Grammatik des Geez und zur alten Geschichte Abessiniens* in *Berliner Sitzungsber.*, 1890, i.; W. Fell, *Die Christenverfolgung in Südarabien und die himjarisch-äthiopischen Kriege nach abessinischer Überlieferung* in *Zeitschr. d. Deutsch. Morgenl. Ges.*, xxxv. 1—74, thereon ibid., 693—710; J. Guidi, *La lettera di Simeone, vescovo di Bêth-Arśâm, sopra i martiri Omeriti* (Roma 1881); E. Glaser, *Die Abessinier in Arabien und Afrika* (1895); Carlo Conti Rossini, *Un documento sul Cristianesimo*

nello Yemen (Roma 1911); lastly the royal inscriptions of Aksūm (most recently in vol. iv. of the "*Deutsche Aksum-Expedition*", 1913). In addition to the publications of inscriptions, indicated by Hommel and Weber, *op. cit.*, and many articles, which have since appeared in the learned journals, there should also be noted the continuation of the Paris *Corpus Inscriptionum Semiticarum* and Martin Hartmann, *Der Islamische Orient*, vol. ii.: *Die Arabische Frage mit einem Versuche der Archaeologie Yemens* (Berlin 1909). The Himyaritic Coins are described by G. Schlumberger, *Le Trésor de San'a*, Paris 1880; Barclay V. Head, *Num. Chron.*, *N.S.*, xviii. 273, 284; xx. 303—310; D. H. Müller, *Südar. Alterthümer im Kunsthistorischen Hofmuseum* (Vienna 1899), p. 65—78. The Arab traditions have been collected by A. Schultens, *Historia Imperii Joctanidarum*, Harderovici Gelrorum 1786, and Caussin de Perceval in his *Histoire des Arabes avant l'Islamisme*; cf. also the pertinent passages in Ibn Isḥāḳ, Ibn Ḳutaiba, Ṭabarī, Ḥamza Iṣfahānī, Mas'ūdī, Ibn Khaldūn. On Nashwān and Hamdānī: v. Kremer, *Die Himyarische Kasideh*, Leipzig 1865, *Über die Südarabische Sage*, ibid. 1866, and *Altarabische Gedichte über die Volkssage von Yemen*, ibid. 1867; D. H. Müller, *Zeitschr. d. Deutsch. Morgenl. Ges.*, xxix. 620—628, *Südarabische Studien*, Vienna 1877, *Die Burgen und Schlösser Südarabiens*, i. and ii., ibid. 1879—1881, with supplement in the *Südarab. Alterthümer* etc., p. 80—95; Captain W. F. Prideaux, *The Lay of the Himyarites*, Sehore 1879. The main source for the historical geography is the *Ṣifat Djazīrat al-'Arab* of al-Hamdānī (ed. by D. H. Müller, Leiden 1884—1891); cf. also the extracts from Ibn al-Mudjāwir in Sprenger's *Post- und Reiserouten des Orients*, Leipzig 1864; on the South Arabian dialects see the *Études sur les Dialectes de l'Arabie Méridionale* of Count Landberg, vol. i., ii., Leiden 1901 *sqq.*, and the works of A. Jahn and D. H. Müller on *Die Mehri- und Soḳoṭri-sprache* in *Südarabische Expedition* etc., iii. and iv. (Vienna 1902).

(J. H. Mordtmann.)

HIND, daughter of the Meccan 'Utba b. Rabī'a, of the family of 'Abd Shams, which was related to the Hāshimids. She was the wife of Abū Sufyān, to whom she bore several children including Mu'āwiya, afterwards Caliph. Tradition seems to take a special delight in drawing an unusually repulsive and no doubt caricatured picture of the short, stout woman, who certainly had a very passionate temperament. Her hatred of Muḥammad was increased by the fact that Ḥamza killed her father in the battle of Badr. With other women she accompanied the Meccans on their expedition against Medina in the year 3 and was one of the most ardent in urging on the men to battle; when Ḥamza fell in the conflict on the hill of Uḥud, she is said to have mutilated his body and bitten his liver. When the Prophet attacked Mecca in the year 8, she stormed against her cautious and far-seeing husband who wished to hand over the city without striking a blow. According to some narrators, the Prophet on this occasion condemned her and a number of other people to death but afterwards pardoned her; this is probably only a malicious invention, as other writers make no mention of it and in some traditions she makes a very stormy appearance at the paying of homage; it is moreover very improbable that Muḥammad would have injured by such an order the feelings of Abū Sufyān, who had met his overtures halfway. Besides she had every reason to be content with the new regime as her son was made governor of Syria; according to one story, she took part in the battle of the Yarmūk with undiminished vigour by urging on the Muslims to circumcise with their swords their uncircumcised opponents. In the end Abū Sufyān divorced her and she is said to have vigorously revenged herself by various intrigues. Some traditions make her die in the reign of 'Umar, others under 'Uthmān.

(Fr. Buhl.)

HIND, The general name for India in Arabic and Persian chronicles and geography. The earlier writers generally make a distinction between Sind and Hind; the first name being confined to the countries bordering on the Indus and Mihran, and the other to India beyond the limits of the Muhammadan conquest. This is the use in Ibn Khurdādhbih, al-Mas'ūdī, Ibn Hawḳal and al-Bīrūnī, and is clearly shown in Ibn Hawḳal's map (reproduced in Elliot and Dowson, Vol. I. p. 32). In later times the name Hind was extended to embrace the whole of India, the term Hindūstān being restricted to the Northern plain of the Ganges and Djamnā, and such is the modern use. After the invasions of the Ghaznawids and Ghūrids it became less usual to speak of Sind as a separate country from Hind. The name Hind is originally identical with Sind, the Skr. *sindhu* 'a river' becoming *hendu* in the Avesta, and having first been applied to the R. Indus was extended to the country adjacent to it.

(M. Longworth Dames.)

HINDĀL MĪRZĀ, fourth son of Bābur, born early in 1519. His real name was Muḥammad Abu 'l-Nāṣir, but the name Hindāl "Taker of India" was bestowed upon him by his father who was then meditating the conquest of India. Hindāl's mother was Dildār Begam, so that he was the full brother of Gulbadan Begam, the Memoirs-writer. He proved unstable and foolish, rebelled against his elder brother Humāyūn, and had the faḳīh Bahlūl brutally murdered in order to show his adherents that he would always be an irreconcilable rebel. He was killed in eastern Afghanistān, in November 1551, in a night-attack made by his brother Kāmrān on Humāyūn's camp. By this time, Hindāl had become reconciled to Humāyūn, and died, fighting for him. The good-natured monarch was inclined to lament his death, but Mun'im Khān coolly told him that he was bewailing his own gain, for now he had one enemy the less (Bāyazīd Biyāt's Memoir quoted by Erskine). Hindāl was buried at Kābul, near his father. His daughter Ruḳaiya Begam was Akbar's

first wife, but had no children. She brought up Shāh Djahān, and died in Agra at the age of 84 in January 1626. (Blochmann 309).

(H. Beveridge.)

HINDĪ, a modern Indo-Aryan vernacular, descended from an earlier Prakrit, and comprising two distinct languages, 1. Western Hindī, spoken by more than 40 millions of persons inhabiting the Gangetic Dōāb and the country to the north of it, and 2. Eastern Hindī, spoken by 22 millions in Awadh (and throughout India wherever men from Awadh have wandered in search of employment), Baghelkhand and Čhattīsgarh. The chief dialects of Western Hindī are Hindūstānī [q. v.], Bangarū, Bradj Bhāshā, Kanawdjī and Bundēlī; only the first of these, under the appellation Urdū [q. v.] has been extensively used as a literary medium by the Indian Muhammadans. The names of a few Muhammadans are recorded who occasionally wrote verses in Bradj Bhāshā. Abu 'l-Faiḍ (commonly known as Shaikh Faiḍī), the friend of Akbar, and Faiḍī's younger brother, Fahīm, and Akbar's great general, Khān Khānān Mīrzā 'Abd al-Raḥīm, all wrote Hindī *dōhā's* (or couplets), doubtless under the influence of the strong interest which the emperor took in Hindu thought and literature. Less illustrious poets of the same period were Saiyid Mubārak 'Alī Bilgrāmī (b. 1583), Saiyid Ibrāhīm (b. 1573) who became a Vaishṇava and was known by the name of Ras Khān, and his pupil, Ḳādir Bakhsh. Such instances however are rare, and when Muhammadan poets, such as Amīr Khusraw, are said to have written Hindī verses, the dialect they employed was Urdū rather than any form of Bhāshā. (*Journ. As. Soc. Beng.* XXII, 443). The legend that Sa'dī ever wrote verses in Hindī has been shown to be without historical foundation (*Journ. As. Soc. Beng.* xxi. 513 *et seq.*).

Eastern Hindī has three chief dialects, Awadhī, Baghelī and Čhattīsgaṛhī. Works in Eastern Hindī by Muhammadan writers are rare; the most notable is the Padumāwatī of Malik Muḥammad Djā'isī, written in the Awadhī dialect about 1540; it is a romantic epic founded on the story of the taking of Čitōr by 'Alā' al-Dīn Khildjī in 1303; the poet himself explains that the story is an allegory of the search of the soul for true wisdom.

Up to the early part of the nineteenth century all Hindī literature was in poetry; Hindī prose first took its rise under the influence of English officials, but the cultivation of it has been almost exclusively confined to Hindu writers and any account of it would therefore be out of place here.

Bibliography: G. A. Grierson, *The Modern Vernacular Literature of Hindustan* (Calcutta, 1889); *Linguistic Survey of India*, vols. vi, ix (Calcutta 1904 *sqq.*); *The Padumāwatī of Malik Muhammad Jaisi*, ed. by G. A. Grierson and M. M. Paṇḍit Sudhākara Dvivēdī. (Calcutta, 1911).

HINDŪ-KUSH, a lofty and extensive range of mountains which forms an extension of the Himālaya to the south-west from the region of the Pamir. It extends from about 73° E. and 37° N. to about 66° E. and 35 N. The continuation of the range further west bears various names (Kūh-i-Bāba, Siyāh-Bubuk etc.) this portion being generally known to modern geographers as the Paropamisus, although the Paropamisus of the ancients no doubt included the Hindū-kush. The name Caucasus was also used by the Macedonians, the name according to Arrian having been bestowed upon this range by Alexander's soldiers in flattery. The north-eastern part of the Hindū-Kush rivals the Himālaya in the height of its peaks and the extent of its glaciers, some peaks being over 25 000 feet in height, among these Rakhipōsht south of Hunza and Tirachmir west of Čitral are among the best known. The extreme north-east Hindū-kush at its point of junction with the Pamir forms the boundary between three systems of drainage, those of the Indus, the Oxus and the Tarim, while further west it forms the watershed between the Indus and the Oxus, and can be traversed by several passes. From Hunza the Kilik Pass leads to Sarikōl and Yārkand, and also to upper Wakhān. From Yāsin and Mastūdj the Barōghil Pass leads also into Wakhān, and other passes from Čitrāl into the same country. The most important pass from Čitrāl is the Dorāh Pass leading into Badakhshān by the Warōdj and Kōkča valleys, and the Mandal Pass gives communication also between Kāfiristān and the Kōkča valley. North of Kābul the best known passes are the Khawāk, Kaushān, (or Ghōrband) and Bāmiān passes, by one of which Alexander crossed Bactria from Kābul and back again to that region on his Indian expedition. The central block of the mountains between the Kābul and Kunar river to the south and Badakhshān, up to the high range between the Mandal and Khawāk passes, is occupied by the wild and inaccessible country of Kāfiristān. This has now come under Afghān rule since its conquest by 'Abd al-Raḥmān, and the countries of Badakhshān and Wakhān to the north are also under the same rule, but in the north-eastern part of the southern slopes Čitrāl, Yāsin, Hunza-Nagar and Gilgit are politically attached to British India, and the Chinese empire embraces the nothern slopes from the Pamir eastwards. The pass of Bāmiān was traversed in the 7th cent. A. D. by the Chinese pilgrim Hiouen Thsang who saw the gigantic Buddhist figures on the face of the cliff which modern travellers have found still in existence. Invaders of India and Afghānistān have usually preferred the easier route over the passes near Herāt, but the passes near Kābul have been used from time to time. Tīmūr travelled by Bāmiān on his return from India. Bābur came from Kundus to attack Kābul in 910 (1504) probably by the Kaushān Pass, and Humāyūn followed the same route in 953 (1547). Shāh Djahān's army under Rādja Djagat Singh met with disaster in crossing the Hindū-kush to attack the Uzbags in 1056 (1645), and tradition ascribes the name *Hindū-kush* "Hindū-slayer" to the losses undergone by his Rādjput troops. Awrangzēb two years later experienced great hardships in his retirement from Balkh in the same region and lost 5000 men. Bābar gives a fairly minute description of the Hindū-Kush passes in his memoirs. He came into Ghōrband from the Andarāba valley, evading the army sent to watch for him in the Pandjshīr valley, by which he would have come out of the mountains if he had made use of the Khawāk Pass. It may be added that Bābar uses the name Hindū-kush which proves that the legendary ex-

planation of the word mentioned above is without foundation. In more modern times these passes have been frequently traversed by Afghān armies. ʿAbd al-Raḥmān crossed the Hindū-kush in the middle of winter and his army suffered severely. According to Burnes the name Hindū-Kush was originally used for one peak only, which is visible from both Kābul and Kunduz.

HINDŪSTĀN. [See INDIA.]

HINDŪSTĀNĪ is the name given by European scholars to that dialect of Western Hindi [q. v.] whose original home is the Upper Gangetic Doāb. As this dialect was in general use in the neighbourhood of the city of Dihlī at the time of the Muhammadan conquest, it came to adopted by the invaders as a *lingua franca* and was by them carried into all those parts of India in which Muhammadan rule prevailed. The various forms of this dialect are by native authors called by different names, but as employed by the Muhammadan invaders it was called *zabān-i-Urdū* (the language of the camp) or *urdū-i-muʿallā ki zabān*; on to the original dialect as they found it used by their Hindu subjects, they grafted a vocabulary which was to a very large extent Persian, with a certain admixture of Arabic and Turkī words. As thus modified this dialect is known to those who speak it and write it only by the appellation Urdū, (the name Hindūstānī never being used except under European influence); the reader is therefore referred to the article Urdū for an account of the language and literature.

HINGLĀDJ, a *shrine* of great antiquity situated in the western part of the state of Las-Bēla in Balūčistān on the river Hingōl not far from its mouth. It may possibly be the temple of Mahēshwara mentioned by the Chinese pilgrim Hüan Tsang in the 7th century as existing in the principal town of Adhyavakila (Las-Bēla). In modern times it is a Muhammadan shrine and Hindu temple of Durgā, the consort of Siva (Mahēshwara). The Muhammadan dedication is to Bībī Nānī, a female saint who is venerated in other parts of Balōčistān, and whom Masson, with some probability, identified with the Nanaia of the Kushān coins, the Anāhita of Babylonia. There are said to be figures carved on the rocks in an inaccessible site.

(M. LONGWORTH DAMES.)

HIPPOKRATES. [See BUḲRĀṬ.]

AL-ḤĪRA, the *capital of the Lakhmid kings*, 3 Arab miles south of Kūfa, an hour's ride southeast of Nadjaf (Meshhed ʿAlī), on the lake of Nadjaf, now almost dry close to the edge of the desert. The name is Aramaic (corresponding to the Syr. *ḥertā*, and Hebr. *ḥāṣēr*) and means literally "camp" but was transferred as a proper name to the permanent camp of the Lakhmid chiefs under Persian suzerainty, from which the city gradually developed. The date of its origin, placed by the Arabs in the time of Nebuchadnezzar, cannot be accurately fixed; bishops of al-Ḥīra are mentioned at the synods as early as the beginning of the fifth century A.D. For further information see the articles LAKHM and DJADHĪMA (now found in inscriptions, see *Florilegium de Vogüé*, p. 389, 463 *sqq.*). The situation was a favourable one as the country between Nadjaf and the Euphrates was intersected by canals and rich in cornfields and date-groves. The air is also celebrated for its salubrity. Among the inhabitants, as the mention of bishops shows, there were a number of Christians who professed the Nestorian creed. Among them were the family of the Ḥīra poet ʿAdī b. Zaid. The Lakhmid princes themselves finally adopted Christianity and Hind, the mother of king ʿAmr (reigned after 550), founded a monastery in the city. Near Ḥīra were a number of strongholds including the 'white citadel', built by a Persian king, Ibn Bukaila's citadel and the citadel of the ʿAdasīs of Kalb; cf. also the article AL-KHAWARNAḲ. Among the products of the city the saddles of al-Ḥīra are mentioned by the ancient poets (Imruʾ al-Kais, 4, 39, Nābigha, 5, 25). The town had reached a certain stage of civilisation and poets gathered eagerly round the court of the kings. Traditions also relate that the art of writing was well known in Ḥīra and spread from there to Arabia. After the death of Nuʿmān III (602) the Persian kings incautiously abolished the system of Lakhmid vassals and placed Persian governors in the city, to whom the Arab princes were subordinate. This was still the arrangement in 633, when Khālid attacked Ḥīra at the head of the Muslim army. The town surrendered without a battle and pledged itself to pay a considerable tribute. Its importance henceforth ceased, although it existed till much later and is occasionally mentioned. The ʿAbbāsids did not choose it as a residence and the rise of Kūfa threw it more and more into the background. The Caliph Hārūn al-Rashīd however made a short stay in Ḥīra and erected buildings there, but this aroused great resentment in Kūfa, so that he left the town. Under Muḳtadir (908—932) it suffered like the rest of the Sawād from the raids of the Bedouins, so that the government had to send an army thither. In the last half of the 10th century, it is described as extensive but thinly populated. The decline of the whole district afterwards affected Ḥīra severely so that in the end it utterly disappeared from the face of the earth. Its site is now pastureland where only a few low mounds and heaps of sherds recall its past.

ḤIRĀ' (also written Ḥarā', and without hamza), a mountain some three Arabian miles from Mecca in a N. E. direction, facing Thabīr [q. v.], so that these two are often mentioned together, and sometimes compared to two waves of the sea. Both are without water or vegetation other than a few thorns. Ḥirā' is higher than Thabīr, and is crowned by a steep and slippery peak, which the Apostle with some companions once climbed. Muḥammad was in the habit of staying here with his wife, and it was in a cave of this mountain that he received his first revelation. Hence the present name Djabal Nūr. The cave is still shown. On his return from al-Ṭā'if Muḥammad also hid himself here until he could enter Mecca.

ḤIRZ or **ḤURZ** (A.) Amulet. [See ḤAMĀ'IL.]

ḤISĀB or 'ILM AL-ḤISĀB, is the name given by the Arabs to the whole field of arithmetic; *al-ḥāsib*, also *al-ḥassāb*, is the calculator, arithmetician. Arithmetic was one of the four propaedeutic or mathematical sciences (*'ulūm riyāḍiya* or *ta'līmiya*), which, as in antiquity, comprised arithmetic, geometry, astronomy and music. It is divided into two parts, theoretic or speculative (*naẓarī*), which was sometimes also given the Greek name *arithmāṭīḳī*, and is essentially based on the vii.th—ix.th books of Euclid, and practical (*'amalī*), arithmetic proper.

About the year 770 Hindu scholars brought, along with their siddhāntas (astronomical works), arithmetical lore to the court of Baghdād, notably the Hindu numeral system with the zero (Sanskr. *śūnya*, Arab. *ṣifr* = empty). Recent researches (cf. F. Nau, *Note d'Astronomie syrienne* in the *Journal Asiatique*, 10th series, Vol. 16, No. 2, p. 258 *sqq.*) however make it possible that a knowledge of the Hindu numerals with the zero had reached Syria even earlier, and that the Omayyad conquerors of North Africa and Spain perhaps brought the older so-called Ghubār figures (*al-ghubār* = dust (on the counting-board) to the west from Syria, before the newer numerals spread in the east from Baghdād.

But although these Indian numerals were known in certain circles of the learned, the great majority of Arab arithmeticians and astronomers were reluctant to have anything to do with this ingenious Indian invention, just as at a later period in the Christian middle ages the Arabic numerals made very slow progress against the Roman. The majority of the authors of Arabic arithmetics in the xi.th century still wrote all the numbers out. Among the representatives of this conservative school we may mention al-Karkhī (Abū Bakr Muḥammad, c. 979—1036) with his *al-Kāfī fi 'l-Ḥisāb* (the essentials of arithmetic); there is a manuscript of it in Gotha, of which A. Hochheim has published a German translation (Halle 1878—1880). Others, especially the authors of astronomical tables, made use of the old Semitic and Greek practice of using the letters of the alphabet as numerals (Arab. = *Ḥisāb al-Djumal*), cf. the edition of al-Battānī's tables by C. A. Nallino, 3 parts, Milan, 1899—1907. As a champion of the use of Hindū numerals in reckoning we may mention Muḥammad b. Mūsā al-Khwārizmī (780—840), the author of the oldest Arabic arithmetic known to us (only in a translation however) as well as of the oldest work on algebra and of the oldest astronomical tables. This arithmetic was translated into Latin, by whom is not known, and this translation edited by B. Boncompagni, *Trattati d'arithmetica*, i., Rome 1857. — Among these users of Hindū numerals was a contemporary of al-Karkhī, 'Alī b. Aḥmad al-Nasawī (c. 980—1040), who wrote *al-Muḳni' fi 'l-Ḥisāb al-Hindī* [the satisfying (account) of Hindu arithmetic]; this work has not yet been published in its entirety; on it cf. F. Woepcke in the *Journal Asiatique*, 1863, i. 492 *sqq.* and N. Suter in *Biblioth. Mathem.*, 3rd series, Vol. vii. (1906), p. 113—119. In these two contemporary works, the *Kāfī* and the *Muḳni'*, the two schools of arithmetic were striving for supremacy; it seems that in the east the Hindū arithmetic was for long neglected while in the west it was able to hold its own. — Of arithmetical works by Arabs of the west, we may mention the *Kitāb al-Ṣaghīr fi 'l-Ḥisāb* (the "little book on arithmetic") by Abū Zakariyā Muḥammad al-Ḥaṣṣār, who probably lived in the xii.th century, of which the present writer has published a translation of the most important sections in *Biblioth. Mathem.*, 3rd series, Vol. ii. (1901), p. 12—40, the *Talkhīṣ*, a synopsis of the preceding work by Ibn al-Bannā' (c. 1260—1340) of which A. Marre has published a French translation (Rome 1865, first appeared in the *Atti dell' accad. pontif. de Nuovi Lincei*, Vol. xvii, 1864); lastly the *Kashf al-Asrār 'an 'Ilm al-Ghubār* (revelation of the secrets of the art of the Ghubār i. e. of counting with the numbers used by the Arabs of the west) by Abu 'l-Ḥasan 'Alī al-Kalaṣādī (died 1486 in Tunis), of which F. Woepcke has published a French translation in the above mentioned *Atti etc.*, Vol. xii, 1859; it was published in Arabic in Fez in 1315 = 1897-1898.

We cannot here go into details of the methods of counting as space is limited but shall only emphasise a few points that differ from modern procedure. We may first mention that Muḥammad b. Mūsā, unlike the Hindūs, begins addition and subtraction on the left hand side; the erasion of the left hand figures required for this purpose was facilitated for the Arabs by their custom of counting on the dust-board; al-Ḥaṣṣār also still begins subtraction (not however addition) on the left; al-Kalaṣādī was the first to begin both operations on the right; it thus required six centuries for the simplest and most natural way entirely to supercede the others, but we do not doubt that in the interval practical arithmeticians had here and there adopted the natural way.

Al-Nasawī still did not use a horizontal line to indicate fractions being content, like the Hindūs, simply to place the numerator over the denominator; al-Ḥaṣṣār was the first to write fractions in our present form with a horizontal line. — Astronomers in their calculations chiefly used sexagesimal fractions as the Babylonians and the Greeks had done before them; e. g. $3\frac{5}{8}$ would be written thus = 3 partes, 37 min. 30 secs. (3° 37' 30") i. e. $= 3 + \frac{37}{60} + \frac{30}{3600}$.

The square root was extracted in the same way as at present; the Arabs expressed surds approximately in the usual fractional form, as they were not yet acquainted with decimals. A sign for the square root is not found till al-Ḳalaṣādī, who uses the initial letter of *djidhr* (= root) for it.

The Arabic arithmetics also contain applications of the principal operations to everyday and commercial purposes, and even to geometry also, i. e. calculation of areas and volumes. — To the domain of the theory of arithmetic but usually also included in the practical handbooks belong the tests of the correctness (proofs by casting out sevens and nines) of calculations, summation of arithmetical and geometrical series, of square, cubic and biquadratic numbers, the theorems regarding perfect and related numbers, etc.

We cannot here go into any details of certain branches of arithmetic like *ḥisāb al-khaṭāʾain* (*regula duorum falsorum*), *ḥisāb al-dirham wa 'l-dīnār* (calculation of drachms and dinars) etc., which in any case belong rather to the realm of algebra. Finally, we have still to mention that the Arabs, besides counting on paper or on the dust-board, had also a system of counting on the hands, fingers or "air" (*ḥisāb al-yad* or *al-hawāʾ*). There are a number of MSS. in existence on this form counting, cf. Suter, *Die Mathem. u. Astron. d. Araber*, and *Nachträge* (*Abhandlungen z. Gesch. d. mathem. Wissensch.*, x. 203; xiv. 181), and the review *al-Mashriḳ*, iii. 1900, p. 171—174.

Mathem.*, i.[2] Leipzig 1894, 3[d] ed. 1907, viii[th] section: Araber; F. Woepcke in the *Journal Asiatique*, 1852, ii.; 1854, ii.; 1863, i. etc.; Dieterici, *Propädeutik d. Araber*, p. 1—22; *Mafātīḥ al-ʿUlūm* (ed. van Vloten), p. 184—201. (H. SUTER.)

ḤIṢĀR (A.), castle, fortress, citadel (from the Arabic *ḥaṣara*, "to compress, to surround in order to capture"; *ḥāṣara* "to enclose, to besiege").

Anadolu Ḥiṣār is the name of the fortress, now in ruins, built by the Ottoman Sulṭān Bāyazīd I Yildirim on the Bosphorus between Kandilli and Gök-Ṣu ("the sweet waters of Asia") to facilitate the siege of Constantinople; in conjunction with Rumili-Ḥiṣār, which Muḥammad II Fātiḥ built in 1452 opposite it, it completely commanded the passage and the latter actually earned its name Boghāz-Kesen (throat-cutter). [see BOGHĀZ, i. p. 737[b]].

Ḥiṣār is further found as a component of many place-names in Asia Minor: Ḳara Ḥiṣār-i Ṣāḥib (the minister's black fortress), official name of Afyūn Ḳara Ḥiṣār in the province of Khudāwendigār; Shābīn Ḳara Ḥiṣār (black alum fortress) in the province of Trapezunt; Aidin Güzel Ḥiṣār (the beautiful palace of prince Aidin), the ancient Tralles; Aḳ Ḥiṣār (white castle), Thyatira in Lydia; Arab Ḥiṣār (Arab fortress), Alabanda; Ḳoč-Ḥiṣār (Ram castle), near the salt lake of Tuzgöl, near Aḳ-Serai; Kilise Ḥiṣār (Church fortress), south of Nigde on the site of Tyana; Ḳara Ḥiṣār-i Dewelü, a village in the ḳaḍā of Dewelü (sandjaḳ Ḳaiṣariya, province Angora) between Nigde and Ḳaiṣariya, where may still be seen the ruins of an ancient castle, called Zendjibār; Eski Ḥiṣār (old castle) is a village with ruins at Gebice, the ancient Lybissa; also the site of the ancient Laodicea ad Lycum, north of Denizli; Ḥiṣār-djiḳ (little castle) is a village in the nāḥiya Ala-ḳam (ḳaḍā Bafra, sandjaḳ Sāmsūn, province Trapezunt); lastly Ḥiṣārliḳ, in the sandjaḳ Bigha, marks the site of Troy.

Bibliography: Alī Djewād, *Lughāt-i Djoghrāfiye*, p. 329, 330, 603. (CL. HUART.)

ḤIṢĀR, on Russian maps Gissar, a district in Bukhārā. The capital of the same name lies in a fertile and well tilled, but damp and unhealthy area on the bank of the Khānaka which flows into the Kāfirnihān; not far from Ḥiṣār the Kāfirnihān leaves the broad valley and enters a narrow ravine. Cf. the view of Ḥiṣār in Fr. v. Schwarz, *Turkestan*, p. 233. The site of the town approximately corresponds to that of the Shūmān of the Arab geographers, cf. AMŪ-DARYĀ (i. 340[a]). The name "Ḥiṣār-i Shādmān" or simply "Ḥiṣār" is first found in the history of Tīmūr as the residence of one of the most powerful Turkish-Mongol kings who divided the country among themselves during the troubled times that followed the death of the Emīr Ḳazāghan (759 = 1358) (*Ẓafar nāmah*, Ind. ed., i. 40), and later as an arsenal (*sarrādjkhāna*) of Tīmūr (*ibid.*, p. 451). Under the Tīmūrids as well as under the Uzbegs Ḥiṣār owed its importance to its being a strong fortress and the residence of actually independent kings or chiefs. The area ruled from Ḥiṣār attained its greatest extent in the second half of the ix[th] = xv[th] century under Maḥmūd Mīrzā (son of Sulṭān Abū Saʿīd, cf. i. 105 *sq.*) whose kingdom included all the lands up to the Hindū-Kush (*Bāburnāmah*, ed. Beveridge, fol. 26[b]); yet even in the time of the Tīmūrids Ḥiṣār was considered a small and poor country (*ibid.*, fol. 56[b]). On the great misfortune, which overtook Ḥiṣār during the last battles between the Tīmūrids and the Uzbegs (only 60 men are said to have left out of the population of the town) cf. the *Taʾrīkh-i Rashīdī*, transl. by E. D. Ross, p. 262. When the kingdom of the Uzbegs in Mā warāʾ al-Nahr had collapsed after the decline of its first dynasty (cf. ABU 'L-KHAIR, i. 25), Ḥiṣār passed under the sway of the Turkoman tribe of Yūz. From the beginning of the xviii[th] century till 1869 the rulers of Bukhārā were only able to enforce the homage of the Beg of Ḥiṣār by force of arms and for brief periods at a time only; only under Russian suzerainty did the Emīr Muẓaffar succeed in breaking the power of these hereditary rulers and permanently uniting the district with Bukhārā (cf. BUKHĀRĀ, i. 782[b]). About the middle of the xviii[th] century the inhabited land of Ḥiṣār, as Muḥammad Wafā Karmīnagī (*Tuḥfat al-Khānī*, Ms. of the Asiatic Museum, c. 581[b], f. 196[a]) tells us, began at the village of Mīr Shādī in the valley of Surkhān; in the xix[th] century districts further to the west, like Bāisūn and Shīrābād were also reckoned to Ḥiṣār; in the south, besides the ancient Čaghāniyān [q. v. i. 811], Ḳabādiyān and a portion of the ancient Khuttal with Ḳurghān-Tübe also belonged to Ḥiṣār; on account of the great extent of the former Ḥiṣār territory the range, which forms watersheds between the Zarafshān and the upper Amū-Daryā, is called the Ḥiṣār range by the Russians. The Beg of Ḥiṣār now only rules the land between the upper Surkhān and the Wakhsh; this office is usually filled by a son of

the Emir or by another prince of the ruling house. The people still frequently rebel against the government. The cultivation of saffron mentioned by the Arab geographers is no longer pursued; the chief products are cereals and flax and the land is of some economic importance for Bukhārā, although the only method of transport is still by beasts of burden; vehicles are quite unknown. The land was first opened to European exploration by the Russian Ḥiṣār expedition of 1875 ("Gissarskaja ekspedicija"). (W. BARTHOLD.)

ḤIṢĀR FĪROZA, an ancient town in the Pandjāb, the headquarters of the district of Ḥiṣār, the centre of a tract of country formerly known as Hariāna, which formed part of the province of Sawālakh. The district lies in the dry belt between the Satladj and Djamnā on the northern fringe of the Rādjpūtāna desert. Part of it is sandy waste but part is irrigated by a branch of the Western Djamnā Canal. It lies between lat. 28° 36′ and 30° N. and long. 74° 29′ and 76° 20′ E., has an area of 5271 sq. m. and pop. (in 1901) of 781,717. The western part of the district (Sirsa) is inhabited by the Bhaṭṭī Rādjpūts and was formerly known as Bhaṭṭiāna. The town of Sirsa (formerly Sarsuti) derives its name from the river Saraswatī. The Ghaggar river, which receives the now shrunken Saraswatī in seasons of flood, still flows near Sirsa, and its waters have been utilized in modern irrigation works. The Musulmān population (202 009) is mainly of Rādjpūt origin, and is locally known by the name of Rāngar. Besides Ḥiṣār the capital and Sirsa the principal towns are Bhiwānī, a large trading centre, Hānsī [q. v.] and Fatḥābād (like Ḥiṣār founded by Fīrūz Shāh). Fīrūz Shāh Taghlāḳ took especial interest in this district, the home of his mother, who was of Bhaṭṭī Rādjpūt descent, and he founded here the town of Ḥiṣār Fīrūza, which took its name from him, in the year 757 (1356), and, to irrigate the dry tract in which it stood, constructed a canal from the Djamnā. There was no doubt an older town on the spot, as the fort built by Fīrūz Shāh is to a great extent constructed of fragments of Hindū buildings. Ḥiṣār was long a place of importance. It was taken by Bābur in 932 (1526) and bestowed by him (with the district, which yielded a kror of rupees) on his son Humāyūn. Humāyūn in his turn assigned it for the maintenance of Akbar, and put the 'foster-father' (*atgah*) Shams al-Dīn in charge. Under Akbar it became the headquarters of a *sarkār*, and was a mint for the coinage of copper under Shēr Shāh Sūrī, Humāyūn and Akbar. At the end of the 18th century it came into the power of George Thomas (see under HANSI) who built a fort named Georgegaṛh, now corrupted into Djahādj. In 1857 the district fell into anarchy for a time during the mutiny.

LONGWORTH DAMES.)

ḤISBA, a technical term in administrative law, the meaning of which is, act of counting, office of *muḥtasib*. The word then acquired the special meaning of police, and finally the police in charge of the markets and public morals. It is in this latter, the narrowest, meaning that *ḥisba* is used by those authors who deal with Muslim law (Māwardī, Ibn Khaldūn, Maḳrīzī etc.), but there can be no doubt that *ḥisba* meant something more than the office of *muḥtasib* in the narrower sense. Occasional references in historians (*Dār al-Muḥāsaba wa 'l-Mawārīth* or *wa 'l-Mawārīṯ*) show that *ḥisba* was the name of the registry office, where deaths and births were registered and estates and the funds for orphans administered. We also find the *ḥisba* as office of weights and measures (= *Dār al-ʿIyār*), as well as the supreme audit office, and finally as army commissariat. [Cf. also the article MUḤTASIB].

HISHĀM B. ʿABD AL-MALIK, ʿUmaiyad Caliph, son of the Caliph ʿAbd al-Malik b. Marwān and ʿĀʾisha, daughter of Hishām b. Ismāʿīl, governor of Medina. He was proclaimed Caliph in Shaʿbān 105 = January 724 and began his reign by dismissing ʿUmar b. Hubaira, governor of the ʿIrāḳ. Khālid b. ʿAbd Allāh al-Ḳasrī was appointed his successor and ruled the province for nearly fifteen years and earned the gratitude of the populace by its peaceful development under him. His enemies, however, ultimately succeeded in bringing about his downfall. In Djumādā I 120 = May 738 the Caliph dismissed him and gave the vacant office to Yūsuf b. ʿUmar al-Thaḳafī. Khālid was thrown into prison and only released in Shawwāl 121 = September 739. About the same time, Zaid b. ʿAlī, a great-grandson of the Caliph ʿAlī, set up as a pretender in Kūfa and readily gained numerous adherents among the volatile people of that city. But his plans were betrayed; when he was about to raise the standard of revolt, he had to give way to superior forces and was mortally wounded.

In 106 = 724-725 Asad, Khālid's brother, had been appointed governor of Khorāsān, where feuds between the Arab tribes and the activities of ʿAbbāsid emissaries caused him great trouble. In 109 = 727-728, Asad, who had only held his office under the control of his brother, was replaced by Ashras b. ʿAbd Allāh al-Sulamī, who became involved in war with the Soghdians and the Turks and could only hold his position for two years. He was succeeded by al-Djunaid b. ʿAbd al-Raḥmān [q. v.], who continued the war against the Turks.

During his long reign Hishām continued the war against the Byzantines vigorously but with varying success. Naval enterprises were undertaken every summer on a large scale, in which ʿAbd Allāh b. ʿUḳba and later ʿAbd Allāh b. Abī Maryam commanded the fleet, while the Caliph's two sons Muʿāwiya and Sulaimān, conducted the land operations. In 122 (740) the Arabs under ʿAbd Allāh al-Baṭṭāl were severely defeated at Akroinos in Phrygia and al-Baṭṭāl himself fell in the battle. But when the Byzantines in the following year attacked the capital of Melitene the Caliph himself hurried to its assistance and they had to

retreat. On the Caspian shores the Turkish tribes gave the Caliph's troops much trouble. In 112 = 730-731 the latter were defeated at Ardabīl. Hishām's brother, Maslama, then carried out several successful expeditions, but the final triumph of Muslim arms was particularly due to Marwān b. Muḥammed, afterwards Caliph.

At the same time ʿAbd al-Raḥmān b. ʿAbd Allāh al-Ghāfiḳī, governor in Spain, defeated Eude, Duke of Aquitaine, but was in turn defeated by the Franks under Charles Martel, in Ramaḍān 114 = October 732, between Tours and Poitiers. Further the Berbers were discontented, because they were not treated by the Arabs as fellow-citizens on equal terms but as vassals paying tribute, and the Khāridjī propaganda poured oil on the flames. In the end a great rebellion broke out and in 123 = 741 Hishām had to send a Syrian army under Kulthūm b. ʿIyāḍ against the Berbers. But the Syrians suffered a fearful defeat: Kulthūm fell and his nephew Baldj b. Bishr escaped to Spain with only a third of his army.

Hishām died in al-Ruṣāfa on the 6th Rabīʿ II 125 = 6th February 743. He was an upright and conscientious Muslim. He particularly endeavoured to look after the finances of the state but his economy occasionally degenerated to parsimony. Besides foreign foes, ʿAbbāsid emissaries and Khāridjī agitators were gradually undermining Umaiyad power and in spite of his merits the Caliph could not prevent its increasing decline.

HISHĀM B. AL-ḤAKAM ABŪ MUḤAMMAD, one of the most distinguished Shīʿī theologians of the earlier period. He was a client of the Banū Shaibān and spent his youth in Kūfa, although his actual birthplace is believed to have been Wāsiṭ; he moved to Baghdād in 199 (814-815) but died soon afterwards (according to one tradition however, he is said to have lived into the reign of al-Maʾmūn). He was held in great esteem by the Barmakid Yaḥyā b. Khālid and presided at all the disputations which were held in his presence; he was also acquainted with Hārūn al-Rashīd himself. He seems at first to have been a pupil of Djahm b. Ṣafwān [q. v.]. His acquaintance with the ʿAlid Djaʿfar who died in 148 (765) made him one of his followers, so that he became one of the most intimate friends of his son Mūsā b. Djaʿfar. Henceforth the Shīʿī doctrine of the Imāmate was the central point of his belief and doctrine around which his views on other theological and philosophical questions grouped themselves. His teaching was frankly anthropomorphic as in his view God could not otherwise influence material things. The question of the creation or non-creation of the Ḳurʾān was in his view an idle one, as the Ḳurʾān is the word (*kalām*) of God and therefore a quality (*ṣifa*), which cannot be defined by other qualities. The same of course holds in his opinion with regard to the other *ṣifāt*. It is not quite clear what his attitude was to the question of the freedom of human action but, according to the express testimony of Ibn Ḳutaiba, (*Mukhtalif al-Ḥadīth*), he belonged to the Djabariya, which attitude is probably to be traced to his early intercourse with Djahm b. Ṣafwān.

Hishām wrote a number of works, the titles of which are detailed in *Fihrist*, p. 175 *sq.*, but they are all lost. The Arab authorities mention his disputations with the Muʿtazilī Abū 'l-Hudhail [q. v.] and state that his teaching was further developed by his pupils, not however without deviations in many points.

Bibliography: Horten, *Die philosophischen Systeme der spekul. Theologie im Islam*, p. 170, note 2; the passage there quoted from al-Baghdādī is to be found in Muḥ. Badr's edition, p. 48 *sq.* (cf. Index). Cf. also *Wiener Zeitschrift für die Kunde des Morgenl.* Vol. iv. p. 226.

HISHĀM I, ABU 'L-WALĪD AL-RAḌĪ or AL-ʿĀDIL, son of ʿAbd al-Raḥmān I [q. v.], was the second Umaiyad Emīr of Cordova (172—180 = 788—796). Although more humane, just and pious than his energetic, cunning father, he was able to maintain himself against his rebellious brothers and to carry the Muslim arms once more, after an interval of several decades, into the Christian lands to the north and even into southern France, as far as Astorga, Oviedo, Gerona, and Narbonne. It was he who first gave a stimulus to the influence of the stricter school of law and theology of the contemporary Medina teacher Mālik b. Anas in Spain and thus prepared the way for the narrow-minded fanatical views of the Spanish faḳīhs. He completed the great mosque of Cordova which had been begun by his father and restored the bridge (Alcántara), built by the governor al-Samḥ [q. v.] over the Guadalquivir, which had fallen into ruins. This capable ruler died all too soon at the age of 37 and was succeeded by his son al-Ḥakam I (796—822) [q. v.].

HISHĀM II, ABU 'L-WALĪD AL-MUʾAIYAD B. AL-ḤAKAM II AL-MUSTANṢIR, was the tenth Umaiyad of Cordova (366—399 = 976—1009 and again from 400—403 = 1010—1013). While under his nine predecessors on the throne of Cordova the whole administrative power had been actually in the hands of the rulers (Amīrs and Caliphs) themselves, Hishām II's personality falls into the background and disappears as a mere shadow behind the all-powerful chancellor, the Ḥādjib (grand vizir) Almanzor [cf. AL-MANṢŪR] the great statesman and general (died 1002) and his son ʿAbd al-Malik al-Muẓaffar [q. v.], (died 1008), while Al-

manṣūr's second and incapable son 'Abd al-Raḥmān Sanchol was soon overthrown (1009). Hishām II was placed in tutelage immediately on his accession, when only ten years of age, by his unnatural mother, the Basque Ṣubḥ (= Aurora), al-Ḥakam's favourite wife, in conjunction with her favourite and lover Almanzor, educated to bigotry, and finally interned in the new Royal residence al-Zahra west of Cordova, till he became the veriest puppet in their hands, whereby a way was prepared for the rapid decline of monarchical power and the speedy fall of the once brilliant caliphate of Cordova. A pseudo-Hishām, alleged to have reappeared (he was said to have disappeared during the massacre by the Berbers in Cordova in 1013) also served the unscrupulous 'Abbādid [q. v.] Abu 'l-Ḳāsim Muḥammad I b. Ismā'īl of Seville as a figurehead to deceive the people.

HISHĀM III, al-Mu'tadd, son of the incapable, ephemeral Caliph 'Abd al-Raḥmān IV al-Murtaḍā (408 = 1018) great great-grandson of the great 'Abd al-Raḥmān III (912—961), was the sixteenth and last feeble Umaiyad of Cordova, who could not prevent the breaking up of the great caliphate into smaller and smaller local kingdoms (Span. *Reyes de Taifas*, arab. *Mulūk al-Ṭawā'if*) which had been going on since the beginning of the xith century: 418—422 = 1027—1031 (died 1036).

ḤIṢN (a.), fortress, citadel.

ḤIṢN al-AKRĀD, originally called Ḥiṣn al-Safḥ, 'castle on the slope', see van Berchem, *Journ. Asiat.*, 1902, p. 446 *sq.*, now often pleonastically called Ḳal'at al-Ḥiṣn, is situated on the plateau of al-Buḳai'a, which is bounded on the south by Djebel 'Akkār and Lebanon, on the north by the Nuṣairī hills. It is the official residence of a ḳā'immaḳām. It takes its name 'castle of the Kurds' from a Kurdish garrison established there by Shibl al-Dawla Naṣr, king of Aleppo, in the first half of the fifth century A. H., who were granted the surrounding lands and forests in fief on condition that they protected the important road between Ḥamā and Ḥimṣ, the great towns of the Orontes plain, and Tripolis, from the enemy. The castle of the Kurds is said to be identical with one built there by Rameses II. It was taken during the Crusades by Tancred of Antioch in 503 (this date is not quite certain) and transferred to the knights of St. John in 537 by Raymond II of Tripolis. The knights had more and more cause to feel insecure as the position of the Crusaders in Syria became weaker. Their situation was all the more dangerous because they had been excluded from the ten years' truce of 626 between the Emperor Frederick II and Sulṭān al-Malik al-Kāmil, as they had not taken the side of the Emperor who had been excommunicated by the Pope. They had therefore every reason to strengthen the defences of the castle more and more; Nūr al-Dīn and Saladin had endeavoured in vain to capture Ḥiṣn al-Akrād. The citadel is protected by two lines of defences, an outer and an inner. It lies on the top of the hill which slopes to the north and east. On the west it is protected by a ditch which is continued round on the south side at no great depth. Thus defined it is approximately a trapezium, of which the south is the most vulnerable. The strongest defences had therefore to be built there. From the description of the capture of the fortress it appears that further earth- and wood works were raised outside the outer surrounding wall, which would have perhaps become quite gigantic, if the Sulṭāns had not kept the Knights from increasing them by agreements and threats (the Emperor Frederick II had actually pledged himself to see that the defences of castle of the Kurds were not strengthened). On the north and west it is surrounded by ramparts which at certain distances are strengthened by round towers.

The hall in the tower vaulted with pointed arches and lit by great embrasures is built to accommodate ballistas and a gallery runs along the ramparts provided with protruding sentry boxes. Over this gallery is a pinnacled parapet with shotholes in the middle. The door of the entrance tower was difficult to take, for in consequence of its low situation it could be defended through the three small rooms projecting over it with openings in the floors. Through the gateway one enters a covered gallery, which turns to the south but turns again on reaching the south of the corner tower and ascends to the upper entrance at the east tower.

A portion of the west side of the open space between the outer and inner lines of defence is so built as to collect water in it. It is connected with the cisterns which are below the castle. The inner defences rise on the south and west side above a masonry escarpment of great strength obviously an escarpment lining the natural rock, while on the north and east side the rock is not escarped. A great open staircase leads from the courtyard to the terrace.

The Knights of St. John were able to maintain a garrison of 2000 men in this strongly fortified castle. With their help they forced the princes of Ḥimṣ and Ḥamā to pay tribute in return for freedom of passage for their caravans. They had afterwards to give this up and their situation became more and more precarious. Sulṭān Baibars, who wished to free Syria entirely from the Crusaders, decided to take Ḥiṣn al-Akrād. After taking advantage of a stay in Syria to make a reconnaissance in person accompanied only by 40 horsemen, he led a great expedition against the fortress next year in 669. On the first day of the attack, 19th Radjab 669 = 3rd March 1271, he took the weakly defended outer works; next he soon succeeded in making a breach in the wall and capturing the entrance tower, which was now exposed to attack from the inner gallery as well as the outside. On the 15th March the second tower was taken, on the 29th Baibars fought his way into the courtyard and erected balistas there to attack the donjon. On the 8th April the Knights were reduced to surrender and were granted a safe conduct to Tripolis. Sulṭān Baibars remained there till the end of the month and conducted the restoration operations in person. Ḥiṣn al-Akrād was selected as the residence of the governor of the Syrian 'conquests' and it was not till the capture of Tripolis in 686 by Sulṭān Ḳalā'ūn that the governor's residence was transferred to the latter town. After peace and security had been

restored to Syria with the departure of the last Franks Ḥiṣn al-Akrād gradually lost its importance. It suffered nothing from Tīmūr Lank's invasion (about 803). The fortress, which is the residence of a ḳā'immaḳām, is still for the most part well preserved.

Bibliography: The architectural history of the castle has been studied in great detail by Baron Rey, to whom the accompanying plan is also due, in his *Étude sur les Monuments de l'Architecture militaire des Croisades en Syrie*, Paris 1871, p. 46 *sqq.*; extracts from it are contained in A. v. Essewein's *Die Romanische und Gothische Baukunst*, iv., 1, Military Architecture.

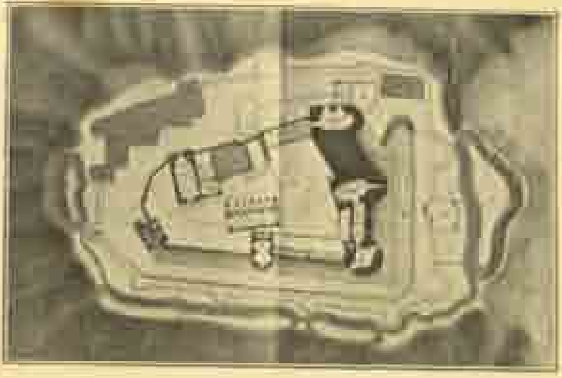
The Arabic inscriptions in the castle (only briefly discussed by Ch. Schefer in Rey) have been fully edited by van Berchem in *Inscriptions arabes de Syrie*, Cairo 1897 (p. 64—69) and in Freiherr v. Oppenheim's *Inschriften aus Syrien etc.*, with an account of the capture of the Ḥiṣn by Baibars. All the inscriptions of the fortress and town with their history (with extracts from the sources and bibliography) have been edited by Sobernheim in the *Corp. Inscr. Arab.*, ii. 14—35 (with a plan of the mosque and illustrations). (M. SOBERNHEIM.)

ḤIṢN AL-GHURĀB ('Raven Castle'), a hill with a fortress upon it in South Arabia, near the harbour of Bīr 'Alī Madjdiba in 30° 59′ 20″ North. Lat. and 45° 24′ 30″ East. Long. in the land of the Wāḥidī [q. v.]. The harbour of Ḥiṣn al-Ghurāb in ancient times was the well-known Cane Emporium (Κανὴ ἐμπόριον) of the *Periplus Maris Erythraei* and of Ptolemy, the קנא of the South Arabian inscriptions), a very important centre for the frankincense trade of the neighbourhood and an intermediate station for the trade between Egypt and India. The name Ḥiṣn al-Ghurāb is derived from the black colour of the hill, which is about 1500 feet high, of volcanic origin and composed of different formations such as basalt, sandstone, trap, and slates. Ḥiṣn al-Ghurāb was probably in very early days an island; now it is connected with the mainland by a isthmus of sand, on which a town used to stand, of which now only the ruins are to be seen in the form of huge pieces of basalt lying scattered at the foot of the hill. Ruins of houses, walls and defensive works are also found towards the top of the hill. On the topmost slope is a quadrangular tower. The hill can only be ascended from one side; the route is by a zigzag way (*manḳal*) hewn out of the rock.

Not far from Ḥiṣn al-Ghurāb is a group of small, uninhabited islands, of which the most important are Sikha, also called Kanbūs, and Barrāka. The little island of Hillāniya with pearl-fisheries is quite near Ḥiṣn al-Ghurāb on the west side. Opposite Ḥiṣn al-Ghurāb rises the isolated hill of Shawrān, at the foot of which lies a plain, called Maidān, covered by hundreds of small black, probably volcanic mounds called *ḥadh'a*. On the summit of the Djebel Shawrān is a very deep round crater called Ḳarif (Basin) of Shawrān, surrounded by shrubs.

In the rocky face of the hill four South Arabic inscriptions are engraved of which the most important is the well-known ten-line inscription of Ḥiṣn al-Ghurāb which belongs to the time of the Ḥimyar-Ethiopic kings and was inscribed to commemorate the fortification of Ḥiṣn al-Ghurāb. It is of particular importance, as it is dated (640 = 525 A. D.). From the inscription it seems that Ḥiṣn al-Ghurāb in ancient times was known as 'Urr Māwiyat.

Ḥiṣn al-Ghurāb was first visited by Captain Haines and J. Wellstedt in 1834. Wellstedt, Cruttenden and Hulton made the first copies of inscriptions the same year. In 1870 Ḥiṣn al-Ghurāb was visited by Miles and Munzinger who took new and more reliable copies. Lastly Comte de Landberg took photographs as well as copies of the inscriptions when he visited Ḥiṣn al-Ghurāb on the 21st February 1896 along with General Cunningham.



Editions elucidations and translations of the inscriptions are to be found in Gesenius (*Hallische Litteraturzeitung*, 1841, p. 396), Rödiger (in Wellsted's *Reisen in Arabien*, Halle, 1842, ii. 355, 359), Fresnel (*Journal Asiatique*, iv. Series, vol. vi. [1845], p. 191), Praetorius (*Zeitschr. d. Deutsch. Morgenl. Ges.*, xxvi. [1872], 436—440; J. H. Mordtmann (ibid., xxxix. [1885], 230—334) and xliv. [1890], 176); Glaser, *Skizze der Geschichte und Geographie Arabiens*, i. 8 *sqq.*; do., *Die Abessinier*, p. 131—134.

Bibliography: In addition to the works already mentioned, J. R. Wellstedt, *Account of some Inscriptions in the Abbyssinian character, found at Hassan Ghorab* etc. in the *Journal of the Asiat. Soc. of Bengal* (Calcutta), Vol. iii. (1834), 554—556; K. Ritter, *Erdkunde*, xii. 312—322, 624, 862—863; H. Freiherr von Maltzan, *Reise nach Südarabien*, p. 225—227 (also contains translation of the inscriptions); A. Sprenger, *Die alte Geographie Arabiens*, p. 83 (§ 101, 102); Comte de Landberg, *Arabica*, iv. (Leiden 1897), p. 63—76 (and appendix with photograph of Ḥiṣn al-Ghurāb and neighbourhood and the large inscription) and *Arabica*, v. (Leiden 1898), 181. (J. SCHLEIFER.)

ḤIṢN KAIFĀ, a town in the Djazīra (Mesopotamia), on the right (south or east) bank of the Tigris, in 37° 40′ N. Lat. and 41° 30′ East. Long. (Greenw.), about halfway between Diyār Bakr and Djazīrat Ibn 'Umar, about 3 days' journey (60—70 miles) from either.

Ḥiṣn Kaifā dates from very ancient times. The many ancient caves and grottos still in existence belong to the pre-Armenian (Chaldean) period and show that there was a settlement here as early as about 800 B. C. In the border wars between Romans and Persians during the later Empire the town (Κῆφας, Cepha) played an important part on account of its commanding fortress. As the see of a Syrian bishop it is mentioned at the council of Chalcedon (451); Muḳaddasī (*c.* 345 = 985) particularly notes the numerous churches there. Ḥiṣn Kaifā during the middle ages also enjoyed no mean strategic and commercial importance. The former was due to its strong citadel, the latter to its position as a centre of trade between Diyār Bakr and Djazīrat Ibn 'Umar. Since about the 12th century a fine bridge has existed over the Tigris, the traffic over which had probably been busy for centuries.

When the 'Abbāsid power gradually declined, the real authority in Mesopotamia as in other provinces of the Caliphate passed into the hands of prominent local dynasties. Ḥiṣn Kaifā in this way passed in turn to the Ḥamdānids, Marwānids and Urtuḳids. Under the latter, who had their

Plan of Ḥiṣn al-Akrād according to Rey.

View of Ḥiṣn al-Akrād.

Reconstruction of Ḥiṣn al-Akrād according to Rey.

Late E. J. BRILL Ltd. Leyden.

capital here from 495 (1101), the town reached the zenith of its prosperity. For over 130 years it was the political centre of a power, which, although in nominal dependence on the Saldjūḳs, ruled for a time extensive areas in Mesopotamia and Armenia, particularly the districts of Diyār Bakr, Mārdīn (Mardin) Mayyāfāriḳīn, Naṣībīn (Nisibis) and Kharpūt. Cf. the article ORTOḲIDS.

In the year 629 (1232) the Aiyūbids overthrew the Ortoḳid kingdom of Ḥiṣn Kaifā, on this dynasty cf. Bidlīsī, *Sharafnāme*, Book ii., section 5. In 658 (1260) the town was taken and destroyed by the Mongols; since then it has continued to decline. When Mustawfī wrote (about 740 = 1340) it still had a considerable population, but was already for the most part in ruins. It seems to have revived somewhat under the Aḳ-Ḳoyunlū [cf. i. 225], particularly under the sons of Uzun Ḥasan, if we may judge from the buildings still standing. This agrees with the account of the Venetian J. Barbaro, who visited the town in 1471 and describes it as quite imposing (see Ritter, *op. cit.*, xi. 89). For the rest, Ḥiṣn Kaifā henceforth shared the vicissitudes and political changes of the rest of Mesopotamia. According to the Turkish administrative system of the time, Ḥiṣn Kaifa belongs to the ḳaḍā of Awīnah of the sandjaḳ of Mardin in the wilāyet of Diyār Bakr and lies on the border between the ḳaḍās of Awīnah and Midyād; cf. Cuinet, *La Turquie d'Asie*, ii. (1891), p. 519. The present inhabitants of the town are Armenians (the majority) Kurds, Syrian Christians, and Turks.

Impressive architectural remains still bear eloquent testimony to the great prosperity which Ḥiṣn Kaifā repeatedly enjoyed during the Islāmic period of the middle ages. They have only recently been studied for the first time by Miss Bell and S. Guyer; but some of the inscriptions and reliefs still await more detailed study. Of these monuments the following deserve particular mention: 1. the citadel (*ḳal'a*) with remarkable gates which crowns the town on a rocky eminence; 2. the Djāmi' al-Malik, the mosque in the centre of the town with a tall minaret, on which is a long and important inscription (a decree); 3. a mosque, much ruined, near the bank of the Tigris, a fine building, also with a tall, slender minaret and an inscription on its erection by Khalīl b. Uzun Ḥasan, the sixth ruler of the Aḳ-Ḳoyunlū dynasty (died 883 = 1478); 4. the ruins of an ancient madrasa near the east wall of the lower town. The four buildings mentioned are all on the south (or east) of the Tigris; on the north (or west) bank of the river are 5. a *turbe* in the Persian style with the mausoleum of Zeinab Beg, a son of Uzun Hasan (about 1500); 6. a *ziyāra* with fine details of ornament. Another important piece of architecture is 7. the old bridge over the Tigris, now allowed to fall into ruins, which probably owes its origin to the Ortoḳid Ḳarā Arslān (or his father). It consists (or rather once consisted) of a large arch thrown clear over the river and two smaller arches at each side supported by pillars. Yāḳūt describes it as the finest erection of its kind that he had ever seen.

Lastly we may mention the slopes on the north shore with their numerous caves and tombs often dating back into remote antiquity. The inhabitants of the village of Kaṣr there almost all live in these caves. Ḥiṣn Kaifā may without contradiction be described as the troglodyte capital of Mesopotamia.

The name Ḥiṣn Kaifā = the fortress of Kaifā (or rock fortress) seems, if we think of the name of a district or people, Cephenia, Kephenes (Assyr. probably Kipani), preserved by ancient writers, to describe the town originally as the centre or the military centre of a district of the same name. In Syriac literature, the place is called Ḥeṣnā (d') Kēphā. In place of Ḥiṣn Kaifā we frequently also find an abbreviated form Ḥiṣn Kaif; cf. also the place-name Tell Kēf north of Mōṣul. At the present day the most usual form of the name of this town seems to be Ḥasan-Kēf; according to some traditions, a Persian named Ḥasan founded the town. This corruption and explanation of the ancient name Ḥiṣn Kaifā is clearly only the result of a popular etymology. Equally worthless are the Turkish etymologies Ḥasankēf = Ḥasan's "delight" and Ḥisn (Ḥuṣn)-Kēf = "good (beautiful) humour".

(M. STRECK.)

ḤIṢN MANṢŪR, the capital of the ḳaḍā of the same name in the sandjaḳ of Malatia; usually called ADIYAMAN, with about 10,000 inhabitants, mainly of Armenian origin. The name Ḥiṣn Manṣūr is derived from an Omaiyad Emīr Manṣūr b. Dja'wana who was slain in 141 (758) by command of the 'Abbāsid al-Manṣūr. Hārūn al-Rashīd afterwards had the citadel fortified and placed a garrison in it. Ḥiṣn Manṣūr or Adamān was thus the successor of the ancient adjacent town of Perre, the site of which is still traceable by aqueducts and rock-tombs. It is nevertheless only rarely mentioned in later times; in the 6th (xiith) century it belonged to the Ortoḳids.

ḤIṢN ZIYĀD. [See KHARPUT.]

ḤISSAR. [See ḤIṢĀR.]

ḤISSARLIḲ, an eminence celebrated as the site of the ancient Troja, as has been established by Schliemann's investigations in 1870—1890. Cf. Dörpfeld, *Troja und Ilion*, Athens 1902. [See ḤIṢĀR.]

HĪT, a town in the most westerly part of the 'Irāḳ (Babylonia), situated in about 33° 35′ N. lat. and 42° 48′ E. long (Greenw.), on the right bank of the Euphrates on an eminence which is perhaps of artificial origin. The mediaeval Arab itineraries estimate the distance between Hīt and Baghdād at 33 parasangs (about 130 miles) or 3½–6 days' journey; cf. Streck, *Babylonien nach den Arab. Geographen*, i. (1900), p. 8. Some Arab geographers like al-Iṣṭakhrī and Ibn Ḥawḳal already include Hīt in Djazīra (Mesopotamia); on the whole, however, it has generally been considered a frontier town of Babylonia. In al-Muḳaddasī's time (xth century) it was of some importance; at the beginning of the xiiith century Yāḳūt describes it as a little place; at the beginning of the xixth century Olivier estimated the number of its inhabitants at about 1000 (see Ritter, *op. cit.*, p. 752), Černik about 70 years later at 2000; Chesney counted 1500 houses. The situation of Hīt is described as picturesque; the walls and two gates have survived; otherwise there is no prominent building. There Yāḳūt mentions the tomb of the distinguished jurist 'Abd Allāh b. al-Mubārak who died in Hīt in 181 = 797 on his way through it; cf. also al-Mas'ūdī, *Murūdj al-Dhahab* (ed. Paris), vi. 294, 503, and the reference in Yāḳūt, *op. cit.*, vi. 508.

Hīt is a very ancient settlement; it is mentioned under the name Id as early as the beginning of the ixth century B. C. in an Assyrian inscription (Annals of Tukulti-Ninib II); see Scheil, *op. cit.* Herodotos and apparently also Isidor Characenus know the town as "Is, in Zosimus it is called Ἴζα; Hīt is the Syriac form of the name, which has been adopted by the Arabs. The name is apparently derived from its most characteristic product, asphalt (*Assyr. iddū, ittū*). In 16 (629) Hīt passed into the power of the Arabs; in 334 it was taken by the Ḥamdānids (see Weil, *Gesch. d. Chalifen*, ii. 695).

Hīt is a town of considerable commercial and industrial importance. The caravans trading between Babylonia and Syria, particularly between Baghdād and Ḥalab cross the Euphrates here. This circumstance has given rise to a flourishing transport business and a busy trade. Even in ancient times the district of Hīt was celebrated as being exceedingly productive of asphalt and naphtha; there are a whole series of wells there which yield this product: even the above quoted Assyrian text commemorates this feature of the town. A place, called 'Ain Kaiyāra (= spring of bitumen) near Hīt is mentioned, e. g. in Abu 'l-Fidā', *Annales*, ed. Reiske-Adler, iv. 241. A small river which flows into the Euphrates near Hīt carries down with its current many blocks of asphalt. Bitumen is used in different ways in Hīt: for example ships are caulked with it or it is burned in kilns for lime. From ancient times asphalt has been used in Babylonia as a cement; cf. also Abu 'l-Fidā (*Geography*, *op. cit.*). There is a considerable export trade in bituminous products from Hīt; they are carried down the river in boats and the busy shipbuilding trade of Hīt is also directly due to the asphalt. South of Hīt are several quarries which were worked even in ancient times; at the present day there is a line of rails from them to the Euphrates; cf. A. Musil in the *Anzeig. der Wien. Akad. der Wissensch.* 1913, i (I. N. E. Arabia and Southern Mesopotamia, p. 11). The Arab geographers of the middle ages also note the wealth of datepalms and the extensive cultivation of cereals around Hīt. It was further noted for its excellent wine; cf. the poems of Abū Nuwās (ed. Kremer, n°. 12, p. 46), and R. Geyer's *Mā bukā'u* of al-A'shā (*Sitz. Ber. d. Wien. Akad.*, Vol. 149, vi.), p. 145, 14. Near Hīt a ruined area, called Ulāya al-Maḳlūba (= "the transformed city"), is pointed out; there is a legend attached to it which, as Mez in the *Zeitschr. für Assyriol.*, xxiii. 220, points out, strikingly recalls the Frau Hitt legend in Innsbruck.

(M. STRECK.)

ḤIZB (A., pl. *aḥzāb*) means "a party, faction, division". It is probably an Ethiopic loan-word, the original Arabic meaning of the root being "to befall" of a misfortune (*aṣāba*) and "to be rough, coarse" (*ghaluẓa*); so formerly Nöldeke (*Neue Beiträge*, p. 59, note 3). In the Ḳur'ān the word is used of confederates and mostly in a bad sense. Thus the *Sūrat al-aḥzāb* (xxxiii) deals with the siege of Medina by the Jewish tribes confederated with those of Mecca, Nadjd and Tihāma (Ibn Hishām pp. 668 *sqq.* *Ghazwat al-khandaḳ*). In a good sense it occurs of the *ḥizb Allāh* in Ḳur. v. 61, lviii. 22. But from „portion, division" it soon acquired the same technical meaning as *wird* i.e. a set portion of the Ḳur'ān, or of devotional formulae of any kind, imposed by any one upon himself for recitation; for cases of this use in the traditions see *Lisān*, i. p. 299 ll. 9 *sq.* As applied to the Ḳur'ān this developed in some Muslim countries until there was a normal division of the text into sixty *aḥzāb*, like that into the thirty *adjzā'*. So in Egypt; see Lane, *Modern Egyptians*, chap. xxvii, *Arabian Nights*, chap. v. note 38. But apparently this did not and does not hold everywhere. Al-Ghazālī, in the *Iḥyā'*, in dealing with the recital (*tilāwa*) of the Ḳur'ān (Book viii of Quarter I. Bāb ii.; ed. with comm. of Saiyid Murtaḍā iv. pp. 470 *sq.*) speaks of the thirty *adjzā'*, but of *ḥizb* only generally; the

number of aḥzāb depends upon the usage of each worshipper. So still in India, for Hughes' *Dict. of Islam* does not recognise the word nor, apparently, does the *Dict. of Techn. Terms*. With the rise of the darwīsh fraternities the word became peculiarly associated with them. In Egypt each fraternity is a *ḥizb* (Lane, *Modern Egyptians*, chap. xviii) and *ḥizb* is also used of the "office" of each fraternity recited at the regular Friday service (*ḥaḍra*) in the *zāwiya* or *takiya*, and consisting of extended selections from the Ḳur'ān and of other prayers (see DHIKR above). From this apparently, came a narrower use as applied to forms of prayer (*du'ā'*) drawn up by conspicuous saints and to be recited, either regularly or in special cases of need. Islām has always treasured such forms. The latter part of Book ix. of Quarter i. of the *Iḥyā'* (*Kitāb al-adhkār*; cf. above, vol. v. pp. 62 *sq.*) consists of a collection of such celebrated *ad'iya* of authorship from Adam to the Ṣūfī saints; see, too, al-Djāḥiẓ, *Kitāb al-Bayān*, ii. 127 *sqq.* of ed. of Cairo 1313. But to judge from the *ḥizb*'s described by Brockelmann (*Gesch.*, index under *ḥizb*, vol. ii. pp. 622 *sq.*) and by Ḥādjdjī Khalīfa (III, pp. 56—60) the word *ḥizb* was not applied to such prayers until well on in the sixth Muslim century. Al-Ghazālī (d. 505 = 1111) speaks only of *du'ā*'s and the first recorded *ḥizb* is by 'Abd al-Ḳādir al-Djīlānī (d. 561). After that there are many: by Ibn 'Arabī (d. 638), Aḥmad al-Badawī (d. 675), al-Nawawī (d. 676), *etc.* The most famous of all is the *ḥizb al-kabīr* by al-Shādhilī, called also *al-ḥizb al-ṣaghīr*, to distinguish it from one longer but less celebrated by the same author. It is a favorite with travellers, especially those by sea, as it is in great part a „subjecting" (*taskhīr*) of the sea to them. It was written in 656, the year of his death, by inspiration from the Prophet, and contains the Most Great Name of Allāh. That same year Baghdād was taken by the Mongols, and al-Shādhilī is asserted to have said that it could not have been captured if his *ḥizb* had been recited there. The text is given in full by Ibn Baṭṭūṭa (vol. i. pp. 40 *sqq.*; cf. also *Zeitschr. d. Deutsch. Morgenl. Ges.* vol. vii. p. 25; the transl. by Burton, *Pilgrimage*, chap. xi. is very incomplete) and is poor devotionally, but has many Ḳur'ānic references and quotes repeatedly the mysterious letters which occur at the beginnings of certain sūras. This has given it talismanic value and ensured its popularity. A plural, *ḥizāb*, occurs in the *Fihrist*, p. 307, l. 7 (see also *note*) with the meaning "spells", but the text is uncertain. The authority for Ahlwardt's assertion (*Verzeichnis*, iii. p. 325) that the *aḥzāb* are so called because the invocations of Allāh in them are arranged "in gewissen Gruppen" he does not give.

Bibliography: Add to references above Ahlwardt, *Verzeichnis der ar. Handschr. zu Berlin*, vol. III. pp. 407—414.

(D. B. MACDONALD.)

ḤIZḲĪL (EZEKIEL) b. BŪZĪ, whose mother when advanced in years prayed to God for offspring and had her prayer granted, was the successor of Kālib. He is not mentioned by name in the Ḳur'ān but in Sūra ii. 244 ("Didst thou not see those men who abandoned their dwellings in their thousands from fear of death? and God said "Die!" Then he restored them to life") an allusion to Ezekiel xxxvii. 1—10 is generally recognised.

Of the various traditions in Tha'labī, p. 148 and Ṭabarī, i. 536, 538, the following, which are of Talmudic origin may here be mentioned. In the days of Ḥizḳīl a plague carried off numerous Israelites. Many corpses could not be buried and became food for birds and beasts. By God's command Ḥizḳīl proclaimed "Ye dead bones, God commands you to assume again the flesh that covered you!" At once the bones clothed themselves with flesh and once more had skin, blood, veins, and arteries. Ḥizḳīl continued "O breath of life, make these bodies live again". They were breathed upon by the spirit of life and rose in their dead clothes. They returned to their people again, founded families and multiplied (Sanh., 92; Gen. R., 14; Cant., 7).

According to Tha'labī, p. 101, one of the members of Fir'awn's council in Egypt was likewise called Ḥizḳīl, while Kisā'ī calls him Ḥarbīl. He was originally a carpenter. Mūsā's mother applied to him to make a small box in which to place her new born son and throw him into the sea; but he hurried to the royal police to tell them of it. His tongue then became paralysed and he lost the power of speech. He only regained it after swearing that he would betray nothing. Henceforward he honoured Mūsā in secret and protected him from all danger. (Cf. Ḳur'ān, 40, 29).

(J. EISENBERG.)

AL-ḤODAIDA (Hodīde, Hudīda), a seaport in Arabia, on the Red Sea about 110 miles N.N.W. of Mokhā [q. v.], the most important port for the coffee trade in Yemen and a landingplace for pilgrims to Mecca from Central Africa. It is under the protection of a patron saint, Shaikh Ṣadīḳ, whose festival is celebrated on the fifteenth day of the month Sha'bān. In the time of Niebuhr and Seetzen, al-Ḥodaida belonged to the Imām of Ṣan'ā'. In 1837 Ibrāhīm Pasha was commander in the town. Since 1899, al-Ḥodaida, which was previously a part of the great wilāyet of Yemen, has been a separate wilāyet. The town is fortified and is surrounded by many palmgroves and other fruit trees. It has a considerable garrison and possesses a post and telegraph office, a military hospital and a powder magazine. The streets are small and irregular but densely populated. Most of the houses are straw huts, only the houses of rich merchants being of stone. The bazaar is small and very dirty but well stocked with all necessaries. In the suburbs live, besides Arabs, many Banians, Somalis, Persians, Jews and Abyssinians. The climate of al-Ḥodaida is healthy and the town free from fever. The temperature which is always very hot reaches its height in April, May, August, and September. Among the articles brought to this port to be exported are besides the staple, coffee, (the export of which, however, has now considerably diminished particularly on account of the vast supplies exported from Brazil), goat- and cowhides (to Europe, America and Australia), millet and materials for packing coffee, dried fruits, dates, frankincense, resin, clothstuffs and mother-of-pearls; which are obtained among the reefs of al-

Ḥodaida, were also at one time exported. The imports include English, American, and Indian silk and woollen goods, sugar (from India, China, France and Austria), tobacco (from Egypt, Turkey and Persia), petroleum (at one time mainly from America, now from Batum), rice (from India) raisins, dates and honey, which are transported hence to other towns, particularly Ṣan'ā'. The trade with al-Ḥodaida is mainly carried on by British Indian ships; in recent years Greek and particularly Italian ships have had an increasing share in it. Manzoni in 1883 estimated the number of inhabitants of al-Ḥodaida at 20,000; according to other statements, the town has nearly 50,000 inhabitants.

(J. SCHLEIFER.)

AL-**HODH** (Ḥōḍ), a semi-desert region in Western Africa. It is a plain, lying to the east of Timbuktu between the Sahel on the south and the Tagant on the north, stretching over a distance of about 200 miles. A zone of steppes called Mrīya (mirror) separates the Hodh from that part of the western Sahara known by the name of al-Djūf. Three well-defined divisions may be distinguished in the Hodh. In the south is a region of sand and thorny brushwood, fairly rich in wells and sustaining quite a numerous population of Fūl and Sarakole as well as Moorish herdsmen. To the north of this lie rocky plateaus, often ferruginous, separated by valleys with black soil bottoms, which the winter rains turn into impassable marshes. Lastly, the northern part is covered with white sand dunes, separated by basins of black earth. Arab or Arabicised Berber tribes, of whom the chief are the Aghelal, the Ulād al-Nāṣir, the Ida Budjellan of whom some, like the Namadi, are only Muslim in name, roam freely over the Hodh. Lying outside the main caravan routes, the Hodh is still one of the least known regions of the Sahara.

Bibliography: Barth, *Travels*, v.; *Le Sahel soudanais et le Hodh* in *La Géographie*, xii. (1905) 130 *sqq.*; Arnaud, *Chasseurs et pêcheurs du Tagant et du Hodh* in *La Géographie*, xiii. (1906), 148 *sq.*, Marquart, *Benin Sammlung* .... Leyden 1913, p. clxi. *sqq.* There is further information on Hodh in two chronicles still inedited, recently discovered in the Sūdān, the *Ta'rīkh of the Kunta*, by Sīdī Muḥammad b. Sīdī al-Ḥabīb and the chronicle known as the *Chronicle of Ibn 'Arabī*.

(G. YVER.)

ḤODJAILA, a village in South Arabia, at the foot of Ḥarāz [q. v.] about 1900 feet above the sea level, a border village of the Tihāma. It belongs to the ḳaḍā of Manākha [q. v.] and to the mudīrlik of Mitwaḥ on Djebel Ṣa'fān (Ḥarāz). It has a market and Turkish barracks. The low cottages (*'arīsh*) of the village are built of large unhewn stones without mortar. The people of Ḥodjaila are of a chestnut brown colour and resemble gipsies; they belong some to the tribe of Khawlī, others to the Ziyādīnī. Around the village many partridges are found whence its name. Moreover a kind of wild duck called *Khulal* is found in the waters of the neighbourhood and there are also many other kinds of birds. The women of Ḥodjaila dress their hair in a peculiar fashion; they twine the plait around their ears. Glaser proposes to identify Ḥodjaila with the Shaṭṭ al-Ḥadjal of Hamdānī (*Djazīra*, p. 105, 18).

Bibliography: E. Glaser, *Von Ḥodeida nach Ṣan'ā* in *Petermanns Mitteilungen*, Vol. xxxii. (1886), p. 5—6.

(J. SCHLEIFER.)

AL-**HOFHŪF** (HOFUF, FOOF), a town in Arabia, capital of the province of Ḥasā (Ḥaṣā [see AL-AḤSĀ]. The town, which is surrounded by extensive gardens and datepalm groves, is divided into three parts: 1. the Kōt (fortress) in the northeast); 2. the Rafīya (Refey'iya, "eminence" so called on account of its rising ground, in the northwest and west); 3. the Na'āthar (in the south and west). The Kōt, a large fortress with very high, thick walls and towers (about 16 on each side with winding stairways) is about 500 yards long and 400 broad and surrounded by a deep ditch; it contains 2000—3000 people. The governor of Ḥasā (during Palgrave's stay in Hofhūf he was a negro named Bilāl) resides in the Kōt and the Nadjdī zealots (the fanatical members of the Wahhābī sect) dwell there also; in it is the Wahhābī mosque. A second isolated fortress dating from the xviii[th] century, called Khuṭaim ("muzzle") is situated near the southern gate of the town. The Rafīya quarter is inhabited by old and aristocratic families, hostile to the Wahhābīs; its situation is a very healthy one and it contains many fine houses and broad, clean streets. In this quarter is the market place, a long pillared hall with an arched roof, *al-ḳaiṣāriya*, with workshops of shoemakers, smiths and carpenters, and shops containing weapons, clothes, embroideries, gold and silver ornaments and other wares, partly imported from Baḥrain, 'Omān, Persia and India. The Na'āthar quarter is the most thickly populated; it occupies about half the town and contains a large mosque: its population is a mixed one, consisting chiefly of merchants, small tradesmen, weavers, artisans and including also strangers from Persia, 'Omān, Baḥrain, Ḥarīḳ [q. v.] and Ḳaṭar [q. v.]. In the centre of the town opposite the market place is the public square, a long quadrangle about 300 yards by 80, where the stands of the barbers and the workshops of numerous smiths and shoemakers stand and dates (the fine *khalāṣ* kind, the best in Arabia, which are grown only in Ḥasā), vegetables, firewood, smoked locusts, etc are sold in numerous booths. The weekly market of Hofhūf is held on Thursdays on an open space before the north gate of the town. Here coarsely woven cloaks, old brass vessels, old swords, sandals, camels, dromedaries and asses are sold by the country people, while bracelets and anklets, looking glasses, European drinking glasses, strings of beads, also cereals and fruits (corn, meal, *khalāṣ* dates, sugarcane), coal, wood, etc. are sold by the regular traders. According to information supplied to W. Schimpers by a Wahhābī, in 1836 the town had 40,000 inhabitants; W. Palgrave gives the figure of 23,000—24,000 for the year 1862.

In the tenth century Hofhūf like the rest of Ḥasā was the scene of the Ḳarmaṭian wars; it was from here that the Ḳarmaṭian leaders undertook their raids into Syria and Mesopotamia. In the beginning of last century Hofhūf fell into the power of the Wahhābīs who as elsewhere introduced their views here by force. The rule

of the Wahhābīs was a heavy burden on the town and the people of Hofhūf as of the rest of Ḥasā enthusiastically welcomed the Egyptians when Nadjd was conquered by Ibrāhīm Pasha; the oppressive taxes which the Egyptians levied on them as well as the servile treatment with which the citizens of the town were treated soon brought about a general rising not only in the town but throughout the country which put an end to Egyptian rule for ever and restored its independence to Hofhūf as to the rest of Ḥasā. After the reconquest of Nadjd by the Wahhābīs Hofhūf was only taken after stubborn fighting. The walls of the town, like those of other towns, were partly destroyed, the fortress levelled to the ground, new mosques built and old ones restored.

Before the conquest of Ḥasā by the Wahhābīs, Hofhūf was a flourishing emporium of trade. It had busy relations with ʿOmān, Persia and India on the one side and Baghdād and Damascus on the other. Hardware, cloths of the poorer qualities, silk, gold and silver thread, ironmongery, swords, spears, earthenware, and other articles were imported. Besides *khalāṣ* dates (which still are a lucrative article of export, particularly to India) and sugar-cane, the robes of Hofhūf highly prized on account of their excellent quality and fine make, were exported and brought the merchants rich profits; the copper and silver vessels (coffee-pots) manufactured in Hofhūf also used to enjoy a great reputation. On account of the fanatical hatred with which the Wahhābīs in the provinces under their rule put down all that is connected with fine raiment (particularly silk) and adornment, trade has now quite declined. The people of Hofhūf before Wahhābī rule had been accustomed from ancient times to make excursions, particularly in autumn, often for longish periods to the Djebel Moghūr, situated to the northeast of Ḥasā, where they sought to recuperate themselves with music, song, and other recreations after their strenuous labours; now Wahhābī fanaticism forbids them to do this openly, under penalty of fines or even imprisonment.

HOLWĀN. [See ḤULWĀN.]

HORMUZ (ORMAZD, AHURA MAZDA, the name of the supreme being of the Zoroastrians, at a much later period applied to the planet Jupiter), the name borne by five kings of the Sāsānian dynasty.

Hormuz I, son of Shāpūr, reigned for only a year (272—3). He had previously been governor of Khurāsān and had distinguished himself in war with the Romans; he is also said to have given Mānī when persecuted a place of refuge in his palace in Dastagird.

Hormuz II (308—9), son of Narses and grandson of Shāpūr I, was killed by the Arabs after he had defeated them. He was the father of Shāpūr II, who was born after his death and of a prince named Hormuz; the latter was kept in confinement but managed to escape after thirteen years and went to Constantinople from which he accompanied the Emperor Julian on his Persian campaign. The ruins of the palace of Hormisdas (the Greek form of his name) are still pointed out in Stambul, in the wall which separates the city from the sea of Marmora.

Hormuz III was the son of Yezdegird II and succeeded his father. During his brief reign, (457—9) he had to fight his younger brother Fīrūz, who had procured the assistance of the Hayāṭila (Hephthalites, White Huns) by ceding them the cities of Ṭāleḳān and Tirmidh in Bactria. Fīrūz was victorious and killed his brother. During this war Dīnak, the mother of the two brothers, took over the government in Ctesiphon.

Hormuz IV (578—590) was the son of Khusraw Anūshak-Rawān and the daughter of the khāḳān of the Turks, whence he was called Turkzād (scion of the Turks), (Ṭabarī, *Annals*, i. 965; al-Bīrūnī, *Chronology*, p. 123). According to the Byzantine sources, he was a haughty and foolish ruler, who imprisoned the Emperor's envoys and only released them under pressure from the Magi. His troops were several times defeated in battle by the Romans (586). The rebellion of Bahrām Čōbīn also took place in his reign. Hormuz was deposed, thrown into prison and strangled without his son Khusraw Parwīz preventing it.

Hormuz V, grandson of Khusraw Parwīz, fought against his aunt Azarmī-dokht and maintained his position till the first year of Yezdegird III's reign, when he was put to death by his own soldiers in Nisibis (632).

(CL. HUART.)

HORMUZ (HURMUZ, ORMUS), in the middle ages the most important commercial port of Persia, situated at the entrance to the Persian Gulf; about 1300 the name was transferred to a small island opposite the ancient town and is still attached to it. Hormuz was of importance for the lands on the Indian ocean as trade between Western Asia and India passed through its port; traffic by sea had also been established between China and Hormuz. A district of Ἁρμόζεια is first mentioned by Nearchus, who explored the Persian coast from the mouth of the Indus (Arrian, *Indica*, 32—35; Onesikritos in Juba's *Epitome* in Pliny, *Hist. Nat.*, VI, 27-28). The location of this district is established by the fact that the Anamis (Andania) flowed into the sea here. The town (Harmuza) is mentioned by Cl. Ptolemaeus Marcianus (*Peripl. Maris extern.*, 27); the Hermopolis of Ammianus Marcellinus (XXIII, 6, 40) is probably identical with it. The situation of the town is wrongly given in Ptolemy; Marcianus agrees with Nearchus and is perhaps indirectly dependent on him.

The district of Hormuz, the land of Caramania, was very rich in agricultural products (wine, wheat, barley, rice and indigo) and in minerals (gold, silver, copper, iron, cinnabar, and salt); but it had no importance in the world's commerce. It was the Arabs who first opened up this district to foreign trade, whereupon Hormuz attained its great importance in the XIV—XVI[th] century. The mediaeval accounts, European as well as Oriental, show that Hormuz was a port of world wide

fame. The foundation of the town is ascribed to Ardashīr Pāpakān (224—241), founder of the Sāsānian dynasty, but it was only after the Arab conquest that it attained prominence. From it horses were exported to India as was the case as late as the xvth century. The fact that China under the T'ang dynasty (627—961) attained great importance, at the same time as the Arab empire, brought about closer relations between Western Asia and China, in which trade played an important part. The Arabs visited India mainly by the sea route while in return Indian and Chinese ships came to the Persian Gulf to Hīra and Hormuz. Hormuz is mentioned by Ibn Khordādhbih as a calling-place on the route from Basra to China. A Chinese account (of circa 785—805) describes the sea-route from Canton to the Persian Gulf and mentions as the most westerly point the "important market of the Ta-Shi (Arabs)" the harbour of Mo-lo, which Rockhill and Hirth take to be Hormuz, while A. Herrmann identifies it with Basra.

Of the older Hormuz on the mainland, we learn that it was situated one parasang (four miles) from the sea on a river, which ships ascended to the town. Idrīsī, Iṣṭakhrī and Maḳdisī describe the town as the chief market of Kirmān. Indigo is mentioned as the most important product of the district. Yāḳūt particularly notes that Hormuz had attracted all the trade with India.

After about 1100, Hormuz was under Arab rulers, of whom Rukn al-Dīn Maḥmūd (1246—1277) is known to us from Marco Polo. A full history of the dynasty is given from a lost Persian source in Teixeira, *Relaciones de P. Texeira d'el origen descendencia y succession de los Reyes de Persia y de Hormuz*, etc. After 1262 Hormuz was under the rule of the Ilkhāns of Persia. It cannot be certainly ascertained what brought about the transference of the town from the mainland to the torrid, barren island. Abu 'l-Fidā' says that the old town was destroyed by 'Tatars'. But the Mongols hardly touched the coast of Kirmān. Ibn Baṭṭūṭa expressly distinguishes between the Hormuz of the mainland and 'New Hormuz', an island 3 parasangs from the coast. The references of Marco Polo, who twice visited the place (1272 and 1293) are to the Hormuz on the mainland. He describes the business of the port in a striking fashion and particularly notes the export of horses to India. The island town founded by Ḳuṭb al-Dīn was, in spite of unfavourable natural conditions, a thriving centre of the world's commerce from the xivth to the xviith centuries. The appearance of the Portuguese in India decided the fate of Hormuz: in 1507 the island was taken by a Portuguese fleet, but the Portuguese allowed the native rulers to remain on condition that they paid tribute. With the help of an English fleet Shāh 'Abbās the Great won Hormuz from the Portuguese, which, apart from an interval under the rule of 'Omān, has ever since belonged to Persia. It was the will of Shāh 'Abbās that his new foundation Bender 'Abbās [q. v. i. 694 sq.] should take the place of Hormuz. The decline of Hormuz dates from this time and now it no longer exists as a town.

We have brief accounts of the island town in Ibn Baṭṭūṭa who stayed there in 1331 and in 'Abd al-Razzāḳ. The town was very frequently visited by European travellers, first in 1321 by Odorico of Pordenone. He was followed by Odoardo Barbosa, Caes. Frederick (1589) and Jos. Salbancke. The account of the Russian merchant Afanasiy Nikitin (c. 1580) is of particular interest. The information afforded by these sources on the nature of the town, its trade and its highly developed civilisation, have been collected by R. Stübe in his monograph mentioned below.

HORMUZAN, Hormuzdān. [See hurmuzān.]

HORUK. [See arūdj.]

HOSHANGSHAH GHURI, the second king of the Ghūrī dynasty of Mālwa, ascended the throne in 1405-1406. In 1407 Muẓaffar I of Gudjarāt invaded Mālwa, defeated and captured Hoshangshāh, and imprisoned him on the ground that he had poisoned his father, who had been Muẓaffar's friend. Hoshangshāh was released and regained his kingdom but throughout his reign was engaged in constant hostilities with Gudjarāt, from which his kingdom suffered severely. In 1420 Hoshangshāh annexed the Gond state of Kherla to his kingdom, as a feudatory state, and in 1422 led a most daring raid to Djādjnagar (perhaps Djādjpūr) in Orissa, captured the rādja by an artifice and

compelled him to surrender several elephants as the price of his freedom. On returning to his kingdom he discovered that Aḥmad I of Gudjarāt was besieging his capital, Māndū. Hoshangshāh, seizing a favourable opportunity, threw himself into Māndū, whereupon Aḥmad Shāh raised the siege and marched towards Sārangpūr. Hoshang followed and attacked him but was defeated and shut himself in Sārangpūr. He was again defeated when following Aḥmad, who retired from Sārangpūr. Later in the same year Hoshang made a rash and ineffectual attempt to seize the strong fortress of Gwāliyār. In 1428 Aḥmad Shāh Bahmanī of the Dakhan appeared before Kherla, which he claimed as an appanage of Berār, but retreated when he heard that Hoshang was marching to relieve the place. Hoshang followed him and forced an action, in which he sustained a severe defeat. In 1433-1434 Hoshang marched against Kālpī and Ibrāhīm Shāh Sharḳī of Djawnpūr marched to oppose him, but was recalled by the news that Mubārak Shāh of Dihlī was advancing on Djawnpūr, and Kālpī fell, without a blow, into Hoshang's hands. On his way to Māndū, Hoshang punished some Hindū marauders who had invaded his dominions and then hastened on his way to compose the quarrels between his sons, which embittered his later years. Disputes and intrigues regarding the succession were so virulent as to disturb the unfortunate monarch's last moments and hasten his end. He died on July 6, 1435, and was succeeded by his eldest son, Ghaznīn Khān, entitled Muḥammad Shāh.

(T. W. HAIG.)

HŌT, a Balōč tribe, one of the five main divisions of the race. The tribe is still found under this name in Makrān, but those who invaded the Pandjāb in company with the Rinds and Dōdāīs are better known by the names of the tribes formed at a later date, such as part of the Khōsa tribe and the Bilōčānī section of the Mazārīs. The Hōts ruled as Nawwābs at Dēra Ismā'īl Khān for two hundred years until they were conquered by Afghāns. Hōts are still numerous throughout the South Pandjāb.

Raverty alludes to them as Hūts, but confounds them with the Dōdāīs, from whom they were distinct.

(M. LONGWORTH DAMES.)

HUBAL, the name of an idol, which was worshipped at Mecca in the Ka'ba but otherwise is only known from a Nabataean inscription (*Corp. Inscr. Semit.*, ii. n°. 189 = Jaussen et Savignac, *Mission Archéol. en Arabie*, i. 169, 170) where it is mentioned along with Dushara and Manōtu. It is thus probable that the tradition according to which 'Amr b. Luḥaiy [q. v.] brought the idol with him from Moab or Mesopotamia, is correct in retaining a memory of the foreign, to be more accurate Aramaic, origin of Hubal, although the substance of the tradition is otherwise quite legendary. The name cannot be explained from the Arabic for the etymologies in Yāḳūt etc. condemn themselves, but Pocock's supposition that Hubal is equivalent to הבעל, although defended by Dozy, is hardly better founded. Another tradition indeed relates that Hubal was an idol of the Banū Kināna, worshipped also by the Ḳuraish, and had been placed in the Ka'ba by Khuzaima b. Mudrika wherefore it used to be called Hubal Khuzaima. It is further related that the idol was of red carnelian in the form of a man; the Ḳuraish replaced the right hand which was broken, by a golden one; it was the custom to consult the idol by divination with arrows; this was done for example by 'Abd al-Muṭṭalib with reference to his son 'Abd Allāh, etc. We learn nothing further about the cult of this idol and the legends are quite worthless for the comprehension of the real nature of the deity. After the conquest of Mecca Hubal shared the lot of all other idols and the image was removed from the Ka'ba and destroyed.

HŪD, the prophet who, according to the Ḳur'ān, appeared among the 'Ād [q. v.]. He is represented as one of their kinsmen (*akh*) and his genealogy (which is transmitted in various forms) therefore coincides in part with that of their founder 'Ād. He is also identified with 'Ābir (the Biblical 'Eber, the ancestor of the Hebrews); in another reference he is called the son of 'Abd [q. v.]. His figure is even more shadowy than the picture of his people and like every warner he is represented in the same position as Muḥammad in Mecca, i. e. he found only infidelity and pride among the people and his followers were few. God therefore punished the 'Ād with a three years' drought, as the later legend tells us. A deputation was sent to Mecca to pray for rain there. God made three clouds appear in the sky, one white, one red and one black. One of the deputation, called Ḳail, was given the choice of one of the three by a voice from heaven. He chose the black one with the result that a terrible storm broke over the 'Ād and destroyed the whole people with the exception of Hūd and his followers (Sūra, 69, 7). Hūd is said to have lived 150 years. There are various traditions regarding his grave. There is a Ḳabr Hūd not far from Bi'r Barahūt [q. v.]. In Ibn Baṭṭūṭa (ed. Paris, i. 205, ii. 203) it is mentioned that the grave of Hūd is in the great mosque at Damascus; according to other traditions he rests near the Ka'ba with 98 other prophets.

In the article 'Ād attention has already been called to the fact that the existence of a tribe of 'Ād is problematic. This is still truer of Hūd. The word Hūd in the Ḳur'ān is a name for the Jews as a body (Sūra, ii. 105, 129, 134, and the verb *hāda* means to profess Judaism (ii. 59, iv. 48 etc.). The proper name looks as if it had been derived from the verb and the noun; the tradi-

tional identification of Hūd with the ancestor of the Hebrews probably points in the same direction. Hirschfeld is perhaps correct when he calls Hūd an allegorical figure (*Beiträge z. Erklärung des Korān*, Leipzig 1886, p. 17, note 4). Von Kremer's suggestion (*Über die südarabische Sage*, p. 21 *sq.*), that the crater of Baraḥūt was the immediate cause of the rise of the Hūd legend is worthy of note.

(A. J. WENSINCK.)

HŪD. After the assassination of Mundhir II b. Yaḥyā (cf. 1035/18) in the year 430 (1039) Abū Aiyūb Sulaimān b. Muḥammad seized the government of the town of Saragossa and became the founder of a dynasty which ruled there and, according to Codera, in Lerida, Calatayud, and Tudela also till 503 (1110). The dynasty is known as the Banū Hūd, because Hūd, one of the Arabs who came to Spain at the conquest, was the ancestor of the family. There are various forms of the genealogy of Hūd preserved. The founder of the dynasty was commander of the Christian troops at Lerida in Mundhir's reign and when he became lord of Saragossa took the name al-Mustaʿīn. According to Codera, *Estudios criticos de Historia Arabe española*, p. 362 *sqq.*, he divided his power among his sons so that each of them became governor of one of the above mentioned towns, when Sulaimān died in 438 (1046—7). Of the rulers of Saragossa alone do we possess further details. In it there reigned in succession Aḥmad al-Muḳtadir till 474 (1081), his son Yūsuf al-Muʾtamin till 478 (1085), his son Aḥmad al-Mustaʿīn (ii.) till 503 (1110). The last-named's son ʿImād al-Dawla ʿAbd al-Malik lost his throne to the Almoravid ʿAlī b. Yūsuf in 503 (1110); authorities differ as to how this happened. ʿImād al-Dawla escaped to Rueda and lived there till 524 (1130). Cf. also the article MUḤAMMAD B. YŪSUF B. HŪD.

ḤUDAIBIYA, a valley a short day's journey (*marḥala*) from Mecca, *i. e.* about 9 miles distant. A portion of it was included in the *ḥaram* of Mecca, which extended farthest in this direction. About the time of the Hidjra this barren valley was the centre of a local cult with a well and a sacred tree. A modest village afterwards arose here as the centre of the surrounding lands, which were rich in subterranean water.

It was towards the last months of the year 6 A. H., after the destruction of the Jewish clans and the humbling of the *munāfiḳūn* in Medina, that Muḥammad was able to consider himself master of the situation. He therefore thought the moment had arrived for conducting a demonstration against Mecca as an answer to the siege of the Khandaḳ which had been attempted by the Ḳuraish. His persistent policy had made all preparations. He had assiduously concentrated the attention of his people on the metropolis of Mecca; the alteration of the *ḳibla*, the application of the legend of Abraham, who was represented as the builder of the Kaʿba, and the obligation to pilgrimage, which was now laid upon all believers, had no other object. The Prophet seems at first to have meditated a military demonstration; 1400—1600 armed men were to have accompanied him. He then altered his plan and expressed his intention of performing the *ʿumra* (lesser pilgrimage); the sacrificial animals taken with him were to complete the illusion. He would enter Mecca as a sovereign or force the Ḳuraish to negotiate with him. His military escort was strong enough to gain the respect of the Meccans but too small to suggest thoughts of an attack. The Ḳuraish took no risks and occupied the approaches. Muḥammad had scarcely entered the sacred territory when he came upon their outposts. Before this resistance he retired to Ḥudaibiya and entered into negotiations with them. He limited his demands to a request to be allowed to visit the national sanctuary with his followers, which was at first refused. Long and wearisome negotiations followed. As ʿOmar did not dare to go to Mecca as plenipotentiary, ʿOthmān was chosen for the purpose, as the prestige of his family, the influential Omaiyads, protected him. When the rumour of his death became current, Muḥammad collected his followers at the sacred tree of Ḥudaibiya and demanded the oath of fealty from them. This is the *baiʿa* of Ḥudaibiya, also called the "*baiʿa* of the tree" or *baiʿat al-riḍwān* ("*baiʿa* of the agreement"), an ambiguous allusion to a passage in the Ḳurʾān (xlviii. 18) which is traditionally said to allude to these events. All the participators bear the name *Shadjarī* in the history of Islām, from the tree under which the ceremony took place. A few days later ambassadors arrived from Mecca. The treaty to be concluded was discussed clause by clause and word by word. In the protocol Muḥammad had to refrain from using the formulae of Islām and the title of Prophet. He even pledged himself henceforth to send back deserters from the Ḳuraish, while the Meccans made no such pledge with respect to Muslims. As to the *ʿumra*, they were to be allowed to perform this in the following year provided they came without weapons except the swords by their sides.

This agreement severely disillusioned the companions who had already become impatient of the long period of inactivity and the want of booty. In reality, however, in his struggle against Mecca the Prophet had here obtained an important diplomatic success. While on his side he surrendered no rights that he had won but only simple claims, he brought the Ḳuraish oligarchy to negotiate with him on equal terms. He was for the first time recognised before all Arabia as a power in the land. The Ḳuraish entered into negotiations with the former fugitive and leader of a body of fugitives, who had broken all bonds with their homes and the *Dār al-Nadwa* [q. v.] entirely blotted out the past. Abu 'l-Ḳāsim would take full advantage of it and be able to make full use of the freedom of movement now guaranteed him by a formal agreement. Medina had nothing more

to fear from Mecca. A means would be found to get round the burdensome concessions and to rescind the treaty. In the meanwhile Muḥammad decided to slay in Ḥudaibiya the sacrificial animals he had brought with him and added certain ceremonies of the pilgrimage to the rite.

HUDHAIL, a large Arab tribe, belonging to the North Arabian group. Their genealogy is Hudhail b. Mudrika b. al-Yās b. Muḍar. They were a brother tribe of the Khuzaima. They inhabited the mountains of Sarāt Hudhail, which bear their name, between Mecca and Medina and were neighbours of the Sulaim [q. v.] and Kināna [q. v.]. In the time of Djāhiliya they worshipped the idol Suwā' (destroyed by 'Amr b. al-'Āṣ in 8 = 630) at Ruhāṭ and, like the Ḳuraish, Khuzā'a, and other tribes, also Manāt (destroyed in 8 = 630 by Sa'd b. Zaid) at Ḳudaid, mentioned in Ḳur'ān liii. 19, 20. The Hudhail produced a great many poets, of whom the most important are the contemporaries of the Prophet, Abū Dhu'aib [q. v.] and Abū Khirāsh.

The following places are mentioned, with others, as belonging to the Hudhail: Athīl (in Tihāma), 'Aḍh, al-Athāthīth (Wüstenfeld, *Register*, p. 233: al-Athātt), Aḥrad, 'Ain, al-Anwāṣ, 'Aly, Alinna, al-'Ardj (a large town near Ṭā'if), Baslim, Baṭn 'Anf, Baṭn Nu'mān, Djadad, al-Djadjr, Huthum, al-Ḥarāḍa, al-Ḥikāb, Haiyara, Dūn Farwā', Dabāb, Khalṣal, al-Kurūb, al-Liṯh, al-Manḥat, al-Muntaḍā, Nimr (several villages), Rāya, Rahā Bīṭān, Raḥb, Rakhmān, Rutaila, Ruhāṭ (3 miles from Mecca, also given as a wādī), al-Tilā', and 'Urna; mountains: Arāl, 'Adr, al-A'ẓam ('Uẓm in Wüstenfeld, *Register*, p. 133, given both as a mountain and a village), al-Fuḍl, Faḥl, Ghazwān (a very high peak, on which the town of Ṭā'if stands, rich in game and honey), Habl, Kabkab, al-Karās, Khanthal, Kinthil, Kurāsh, Laban, Ma'īd (Wüstenfeld, *Register*, *l. c.* Ma'īd), Makā, Numār, Nabā'i, (also given as a wādī), Salām, Sal', Ṣudā'id, Shumnuṣīr, Uḍhar, al-Watar, Yasūm, Zara'; the wādīs include: al-Ḍaḥī, Dulāk, Ḥudaiba, Halya (Halbe), Sa'ya (according to some, a mountain), Udām (all in common with the Kināna), al-Ḍadjan (al-Ḍadjn), Kāfir, Nakhla 'l-Shāmiya (two wādīs, which unite at Baṭn Marr), Shadjna, Wādī 'l-Ḳaṣāṣ, and Tadjāri'.

Historical. The Hudhail endeavoured to tempt the Tubba' Abū Karib to rob the Ka'ba when he came to Mecca, in order that he might thereby incur divine punishment. Abū Karib, warned of this by two learned Jews, had the instigators beheaded. When the Abyssinian king Abraha (in the "year of the elephant") tried to destroy the Ka'ba, the Hudhail, along with the Kināna, Ḳuraish and other neighbouring tribes, took up arms against him unsuccessfully; 'Abd al-Muṭṭalib and Khuwailid b. Wāthila, the chiefs of the Hudhail, and Ya'mar b. Nufātha, chief of the Bakr b. 'Abd Manāt, then offered to cede him the third part of Tihāma, if he would spare the Ka'ba and leave the country, but Abraha declined.

After the battle of Uḥud in 4 = 626, the Banū Liḥyān, a clan of the Hudhail, assembled at 'Urna with other tribes around Mecca under Sufyān b. Khālid, to conspire against Muḥammad. The Prophet, being told of this, had Sufyān murdered by 'Abd Allāh b. Unais. 'Abd Allāh brought his head to the Prophet and was presented by him with a stick which, according to the Prophet, was to serve as a mark of recognition on the day of resurrection. 'Abd Allāh is said to have been buried with this stick, which he carried all his life. In the same year a number of Hudhail fell upon six companions of the Prophet at the watering-place of Radjī'; they were on their way from Muḥammad to the 'Aḍal and Ḳāra to instruct them in the principles of Islām. The Hudhail slew four and brought the others to Mecca, where they sold them to the Ḳuraish. After the conquest of Mecca by the Prophet in 8 = 630, a number of the Khuzā'a fell upon a section of the Hudhail and slew one of them: the Prophet, learning of this, during the midday service next day before the Ka'ba made an appeal to the Khuzā'a, urging them to refrain from further bloodshed.

The Hudhail still exist on the Djebel Kora, a number of ranges round Ṭā'if, on one of which is the village of Ra's al-Kora, according to Burckhardt, the most beautiful spot in the Ḥidjāz, and far famed for the quality of its water. Here they encamp with their numerous herds and grow wheat and barley in the very charming valleys of these hills. Their clean little houses, scattered over the plain in groups of four or five, are built of stone or earth. There are also settlements of the Hudhail at Mabede, the southern suburb of Mecca, where they sell dates, corn and cattle. Before their conquest by the Wahhābīs, they were only provisionally under Mecca and paid no taxes.

SCHLEIFER.)

HUDHUD, the hoopoe, belongs to the order *Scansores* and bears a remarkable tuft of feathers on its head. Much is related concerning its habits and character, of which only a part can be mentioned here. Its piety is particularly emphasised. In Umaiya b. Abi 'l-Ṣalt (ed. Schulthess, in *Beiträge zur Assyriologie*, viii. 26, 84 sq. cf. also Ibn Ḳutaiba, *Kitāb al-Shi'r*. ed. de Goeje, p. 279

sq.) there is a story that the hoopoe enshrouded its dead mother and carried the body on its back and head till it found a resting-place for it; this is why its back is brown. It is also related that the tuft of feathers was a reward for this act. — When its mate dies, the hoopoe does not look for a new wife. — When its parents grow old, it feeds them. It bears different *kunya*'s in Arabic, e.g. *Abū 'Ibād, Abu 'l-Sadjdjāda*, after the numerous bows of its tuft as it walks. It makes its nest in dung so that it has an unpleasant smell. Its feathers, heart etc. are used in various ways. The Prophet is said to have forbidden it to be killed; according to some, its flesh is forbidden, according to others, it is permitted. The hoopoe plays a prominent part in the legend of Solomon and Bilḳīs. This was apparently already developed by Muḥammad's time as may be concluded from Sūra xxvii. 20 *sqq.* In this passage we are told that Solomon assembled the birds and the hoopoe was missing. When he arrived late, he gave an account of the queen of Saba' and was entrusted by Solomon with the bearing of a letter to the Sabaeans.

The later writers as a rule give the whole story as follows. The hoopoe possesses the power of seeing where water is through the earth. He was therefore used by Solomon on his pilgrimage to Mecca to find water. But on one occasion the hoopoe whom Solomon had appointed for this purpose, named Ya'fūr or Yaghfūr, while on the journey, took a trip to the south and reached the garden of Bilḳīs where he made the acquaintance of another hoopoe named 'Ufair. The latter told him a great deal about the queen of Saba'. In the meanwhile Solomon was looking in vain for water for his army (or according to another version for ritual ablutions). He sent the vulture (*nasr*) to assemble the birds and the hoopoe was missing. The eagle (*'uḳāb*) was sent to fetch him. But he was already on his way back and was brought by the eagle before Solomon, who talked to him severely but finally, after hearing his account of Bilḳīs sent him with a letter to the Sabaeans.

Another version of the beginning of the story, relates that Solomon on his pilgrimage was being carried with all his retinue on a carpet by the winds to Arabia. The birds were ordered to fly above the carpet in such a compact mass that those sitting on it should be entirely protected from the sun. But Solomon detected a little ray of light in one place; so he concluded that one bird was missing. He then held a roll-call and it was found that the hoopoe was absent; the story continues as before.

It is also related that the hoopoe once invited Solomon and his army to a feast on an island. When the guests had arrived, he threw a dead locust into the sea and said "Now eat, O thou Prophet of God! If the meat be lacking, there is at least plenty of sauce". Solomon and his soldiers laughed for a year at this joke.

On the relationship of the Jewish hoopoe-legend to the Muslim, see Grünbaum, *Neue Beiträge zur Semitischen Sagenkunde*.

In North Africa, hoopoes are made out of silk, leathers, etc., and used for magical purposes (Doutté, *Magie et Religion dans l'Afrique du Nord*, p. 270 *sq.*).

ḤUDJARĪYA. [See ḤUDJRA.]

ḤUDJDJA (A.), proof, document. The word is also used as a title in the science of Tradition for one who has reached the highest stage in it, knows 300,000 traditions by heart and everything connected with them; hence al-Ghazālī's title, *Ḥudjdjat al-Islām*. Among the Ismā'īlīs, *ḥudjdja* is one who is appointed leader of the propaganda by "the Imām of the time". The number of the *ḥudjdja*'s is 12. They occupy the same position as the *naḳīb*'s in the propaganda of the 'Abbāsids, on the model of the 12 disciples of Christ and the 12 *naḳīb*'s of the Prophet. The simple missionaries (*dā'ī*) are subordinate to them. Among the "Twelvers" the twelfth Imām bears the title *Ḥudjdja*.

ḤUDJR b. 'Adī of the tribe of Kinda, the "first martyr" of the Shī'a. The sect would like to give him the title of "companion of the Prophet" but it is denied by the oldest authorities. The Shī'a likewise, with as little ground, makes him take part in the first Syrian campaigns, when he is said to have conquered the district of Mardj 'Adhrā; but the object of this clearly is simply to connect him from the earliest time with this place, which was to be the scene of his martyrdom. At an early period Ḥudjr threw himself heart and soul into 'Alī's cause and fought for him at the "battle of the Camel" and at Ṣiffīn. We later find him in Egypt with Muḥammad, son of the Caliph Abū Bakr, who was governing this province in 'Alī's name. After 'Alī's son Ḥasan had given up his claim to the Caliphate, Ḥudjr became the moving spirit in all the 'Alid intrigues in Kūfa. The governor Mughīra b. Shu'ba had even to offer him money to obtain peace. Mughīra's successor, Ziyād b. Abīhi, endeavoured to bring him to a more reasonable frame of mind; but his efforts failed with this unruly spirit, who always wanted to play an important part. On Ḥasan's death, Ḥudjr entered into negotiations with his brother Ḥusain; the pretender had been invited to take command over his followers in Kūfa. During Ziyād's absence in Baṣra Ḥudjr had attempted to stir up a revolutionary movement. Ziyād hurried back with all possible speed and endeavoured to settle the affair peacefully. But when the negotiations fell through, Ziyād had Ḥudjr arrested along with those leaders of the Shī'a party who were most deeply compromised. The matter was taken to the courts and an indictment prepared and signed by the most prominent men in Kūfa; finally Ḥudjr was taken with his companions to Mu'āwiya in Syria. After the Caliph had arranged a new trial and asked the advice of the leading men of Syria, he sentenced Ḥudjr to death and had him executed in Mardj 'Adhrā near Damascus. In his last moments 'Alī's follower utterly lost his courage. His

death opens the martyrology of the Shī'a; hence the importance assigned to this rather everyday episode, which was really nothing more than an incident in the domestic troubles of the 'Irāk. Ziyād "throughout maintained a correct attitude and Mu'āwiya even inclined to the side of leniency" (Wellhausen), for he pardoned the majority of Hudjr's accomplices.

(H. LAMMENS.)

HUDJRA (A.), room, chamber, particularly (with the article) 'Ā'isha's room, where the Prophet and his two successors Abū Bakr and 'Omar were buried, now one of the greatest sanctuaries of Islām. [Cf. the article MEDINA.]

Hudjariya is derived from the same word; it was the term applied in Egypt to the slaves who were quartered in barracks near the royal residence. During the Fāṭimid period, these were organised by al-Afḍal on military lines as a kind of bodyguard under the command of an emir, who bore the title al-Muwaffaḳ. Their number then amounted to 3000 men. Cf. Maḳrīzī, *Khiṭaṭ*, i. 443.

HUDJRĪYA, (HOGRIYA, HODSCHERIE), the name of a tribe in South Arabia. Their land lies to the north of the land of the Ṣobēḥī (Subaihi, [q. v.]) between 43° 40′ and 44° 42′ East Long. Greenw. and 13° 5′ and 13° 13′ North Lat. and is entirely mountainous. The climate is tropical; the principal product is coffee. Among the mountains we may mention Djebel Ṣabr (Ṣabir [q. v.]) which is described by Hamdānī in his *Djazīra* as a very high mountain, among wādīs, the Wādī Warazān which joins the Wādī Tebban, the river of Laḥedj [q. v.], and belonged in Hamdānī's time to the Saḳāsik, and the Wādī Ma'ḳa (Mo'ḳa); among towns, Dobhan belonging to the important clan of Sherdjebī (Shergebi), which at one time had an independent Sulṭān, with about 500 inhabitants (of whom about a fifth are Jews), an old Ḥimyar palace, a bazaar and a Saturday market, Dār Shawwar, the chief place of the powerful clan of Ḥammād, which has an 'āḳil of its own, with about 300 inhabitants (including only a few Jews), several *sūḳs* and a Friday market, Herawa on the wādī of the same name with about 500 inhabitants (including a few Jews), a small bazaar and a Tuesday market, Dimena, near Ta'izz [q. v.] with about 600 inhabitants (of whom a tenth are Jews). In the land of the Ḥammād there is a hot mineral well with a bath, called Birket Ḥammām, visited by many Arabs, but access to it is forbidden to Jews.

The Hudjrīya claim to be true Ḥimyars, and are said to have at one time formed one tribe with the Ṣobēḥī. They were earlier under the Imāmate of Ṣan'ā, but became independent on the decline of its power. Since the middle of last century they have become for the most part subject to the Dhū Muḥammad, who are descended from the Bakīl (see HĀSHID and BAKĪL), and were formerly in the pay of the Imāms of Ṣan'ā, and obtained possession of a large part of the Yemen on the latter's overthrow.

The Dhū Muḥammad maintain small garrisons among the Hudjrīya, levy taxes on them and administer justice among them. Their chief representative bears the title Ḳā'id. Many Hudjrīya seek to escape the rule of the Dhū Muḥammad, who as followers of the heterodox Zaidī sect are hateful to them as Shāfi'īs, by migrating to Aden, where they earn a livelihood as labourers.

(J. SCHLEIFER.)

AL-**HUDJURĀT**, plur. of *Hudjra* (q. v.); title of Sūra xlix.

AL-**HUDJWĪRĪ**. [See DĀTA GANDJ BAKHSH.]

HUDNA, a calm, truce, armistice; *al-Hudna* denotes especially the truce made between Muḥammad and Ḳuraish at al-Ḥudaibiya. [See this art.]

(T. H. WEIR.)

HUDŪD (A.), Plur. of *ḥadd* [q. v.]

HUELVA, the ancient Onuba, Arabic Walba, a town in the province of Spain of the same name, on the left bank of the Odiel, an important port, accessible at high tide to seagoing ships, for the copper and sulphur mines of Rio Tinto and Tharsis, which are near it. In the middle ages it was, according to Idrīsī, a small, thickly populated, walled town with flourishing trade and industries. The present population is 29,000. After the fall of the Omaiyad dynasty, Huelva had its own rulers, the Bakrī Abū Zaid Muḥammad b. Aiyūb and Abū Muṣ'ab 'Abd al-'Azīz. In 1051 the latter ceded the town to al-Mu'taḍid of Seville on condition that he was left the little island of Shaltīsh (Saltes), but when he saw that this was of no use to him, he sold his ships and armaments to al-Mu'taḍid and went to Cordova. Huelva henceforth shared the fortunes of Seville.

Bibliography: Idrīsī, *Description de l'Afrique et de l'Espagne*, ed. Dozy and de Goeje, p. 178 sq.; Dozy, *Histoire des Musulmans d'Espagne* iv. 84 sq.; Baedeker, *Spain and Portugal*; Madoz, *Diccion. Geogr.*, ix. 260 sqq.

HUESCA, the ancient *Osca*, Arabic Washka, a town in the Spanish province of the same name, 50 miles E. of Saragossa. The number of inhabitants is now 12,600. Huesca was conquered as early as 96 (713) by the Arabs, and seems during the period of Arab rule to have formed for a time an independent principality under Muḥammad b. 'Abd al-Malik al-Ṭawīl, died 301 (913—4). Cf. Codera, *Estudios criticos de Historia árabe Española*, p. 234 sqq. In 1096 the rule of the Moors ended and Huesca became for a brief period capital of Aragon, till the seat of the government was moved to Saragossa in 1118. Idrīsī, *op. cit.*, p. 176, only mentions the name of the town.

Bibliography: in Madoz, *Diccion. Geograf.* ix. 290 sqq.

HUFĀSH, a high mountain in South Arabia, belonging to the al-Maṣāni' range of the Sarāt group, on the Wādī Surdud near Ḥarāz [q. v.]. It is often mentioned by Hamdānī in his

Djazīra, along with the adjacent large mountain of **Milḥān** (called after the Ḥimyar Milḥān b. 'Awf b. Mālik) the real name of which was Raiṣhān. Not far from the latter, (which in Hamdānī's time was said to possess no fewer than ninety-nine springs and had a large mosque [called Masdjid Shāhir] on its summit, Shāhir), there lies a treasure, according to popular belief, as the same author tells us, which many Arabs sought but could never reach, as a snake barred the way in the shape of a high mountain, as soon as they tried to approach it. In Niebuhr's time, Ḥufāsh formed a separate district to which Djebel Milḥān also belonged. Among places of some importance in Ḥufāsh he mentions Sefekīn, a small town surrounded by a wall, the residence of the Dawla (Dōla) and the two villages of Bait al-Nushēli and Bait al-Shumma.

Bibliography: Hamdānī, *Djazīra*, p. 68, 32, 79, 123, 125, 126, 190; K. Niebuhr, *Beschreibung von Arabien*, p. 249; *Petermanns Mitteilungen*, vol. xxxii. (1886), Plate I. (J. Schleifer)

ḤUKM (A.), plural *aḥkām*, primarily the infinitive of *ḥakama*, and so "a restraining" like *ḥikma*. All *ḥikma* is, in the classical language *ḥukm*, but the latter denotes also: 1. a judgment or legal decision (Ḳur'ān 21, 78), especially of God (13, 41); 2. a logical judgment expressed in a *djumla*; 3. the exercise of administrative authority, rule or dominion (similarly *ḥukūma*); 4. an ordinance or decree, synonymous with *ḳaḍā'* (Ḳur'ān 18, 25); 5. a rule in grammar, and then a rule generally. (See further in Dozy, *Supplément*).

Bibliography: Lees' *Dictionary of Technical Terms*, Pt. I, 372 *sqq.* (T. H. Weir.)

ḤŪLA, a town in Arabia, in the province of Sedeyr (Sudair) in Nadjd, north of Ḥuraimila [q. v.]. The inhabitants are partly tradesmen and partly agriculturists. Its trade and prosperity has markedly increased under Wahhābī rule. During Palgrave's stay in Nadjd, Ḥūla was one of the most flourishing places in Sedeyr. The town is surrounded by walls.

Bibliography: Palgrave, *A Narrative of a Year's Journey in Arabia* (London 1865), i. 338 *sq.* (J. Schleifer.)

al-ḤŪLA, one of the districts attached to the province of Damascus, lying 'between Bānyās and Tyrus'. Its southern end is the Lake of Ḥūla, which the geographers also call Lake Ḳadas, formed by the Jordan and surrounded by swamps full of springs. The present inhabitants use the name Baḥrat al-Khēṭ. According to Muḳaddasī the water was dammed back by the erection of a wall to increase the lake. The banks were covered with *ḥalfā'* plants, out of which the inhabitants wove mats and ropes. The lake is full of fish, among which Muḳaddasī mentions the *bunnī*, which had been introduced from Wāsiṭ. (Cf. Fleischer, on Levy's *Neuhebr. Chald. Wörterbuch*, i. 285 (see also *Zeitschr. d. Deutsch. Pal.-Vereins*, xiii. 75). The district of Ḥūla, part of which is low-lying, produced wool and rice and included a large number of villages, according to Ẓāhirī, more than 200.

Pal.-Vereins*, ix. 252; Dalman, *Palästina Jahrbuch* 1912, p. 44. (Fr. Buhl.)

HÜLÄGÜ (also written Hulāgū) a **Mongol conqueror** and founder of a Mongol kingdom in Persia, born about 1217 A. D. Sent by his brother Möngke at the head of an army against the Ismā'īlīs and the Caliph, he left Mongolia in 651 = 1253 but did not cross the Āmū-Daryā till the 1st Dhu 'l-Ḥidjdja 653 = 1st January 1256. There he received the homage of most of the petty rulers of Persia and the Caucasian lands; in the course of the year 654 = 1256 the greater number of the Ismā'īlī strongholds were taken without difficulty; on the fall of the dynasty cf. the article ASSASSINS (i. 491). On Wednesday and Thursday 9th—10th Muḥarram 656 = 16th—17th January 1258 the Caliph's army was routed in a pitched battle and on the following day Hülägü stood before the walls of Baghdād, where he met with no resistance to speak of; on the fate of the Caliph, his line and his capital, see the article BAGHDĀD (i. 563). An attempt made in 658 = 1260 to conquer Syria failed; Hülägü succeeded in taking Ḥalab and advanced as far as Ḥārim [q. v.] himself, sending his generals to lay siege to Damascus, but was forced to return to Persia on hearing of the death of the Great Khān Möngke: on 25th Ramaḍān 658 = 3rd Sept. 1260 the army which he had left behind was destroyed by the Egyptians. Hülägü later tried to renew the struggle and with this object entered into an alliance with the Franks but was unable to execute his purpose. On the unsuccessful war with the kingdom of the Golden Horde in 660 = 1262 cf. BERKE (i. 738).

The petty kingdoms in al-Djazīra, Kurdistān and Asia Minor as well as the Christian territories south of the Caucasus were incorporated as vassal states in the kingdom founded by Hülägü so that his power stretched from the Āmū-Daryā almost to the Mediterranean and from the Caucasus to the Indian Ocean. The sovereign took the title Ilkhān ("subordinate khān" or "khān of the tribe"); he, like his successors down to Ghāzān Khān (cf. ii. 149), reigned in the name of the Great Khān living in Mongolia (later in China). Hülägü himself was also called "the great Ilkhān" (*Ilkhān-i buzurg*). The Christian element in his people was particularly favoured by Hülägü and especially by his Christian wife Dokuz Khātūn, often to the detriment of the Muslims. The towns destroyed during his wars were in part rebuilt even in Hülägü's time; he himself in times of peace delighted to live in northwestern Ādharbaidjān, particularly on the banks of Lake Urmiya, where many edifices, such as the famous observatory on a hill north of Marāgha, a palace in Alātāgh, temples of idols (*butkhānahā*) in Khōi, etc. were built. Most of these buildings were still standing 40 years later when Rashīd al-Dīn was writing his work; remains have not yet been discovered. Hülägü built or restored (cf. Yāḳūt, i. 313, on the earlier fortress on the same island) a strong castle on the mountainous peninsula of Shāhī on the east shore of the lake, which had once been an island (whether this was still the case in Hülägü's time is not certain; Rashīd al-Dīn only speaks of a mountain on the bank of the lake): the treasures won in battle in Persia and other lands were kept there; Hülägü and his successor Abaḳa [q. v., i. 4] were

buried there. According to Egyptian sources, the tower in Shāhū collapsed in 681 = 1282—3 and fell into the lake with all its treasures; no such catastrophe is mentioned in the Persian authorities. Ḥāfiẓ-i Abrū (cf. above ii. 213) only says that in his time the castle was quite uninhabited (cf. Rashīd al-Dīn, ed. Quatremère, p. 316 *sq.*; Le Strange, *The Lands of the Eastern Caliphate*, p. 160 *sq.*). Hūlāgū died on Sunday 19th Rabīʿ II 663 = 8th February 1265. According to the Mongol custom, beautiful young maidens were buried with him; this is the last occasion on which this custom is mentioned among the Persian Mongols, even in the heathen period.

AL-ḤULAL AL-MAWSHIYA FĪ DHIKR AL-AKHBĀR AL-MARRĀKUSHIYA, an anonymous work, dealing especially with the history of Marrākush. The author begins his story with the foundation of the city; he deals in detail with the history of the Almoravids and Almohads but on reaching the Marīnids, he only gives a summary list of the rulers of this dynasty. We find at the end of the book that he lived in Marrākush. The work has been attributed to Ibn Baṭṭūṭa (!) and by its recent editor to Lisān al-Dīn b. al-Khaṭīb; but the author himself tells us (p. 136) that he compiled (completed?) the work on the 12th Rabīʿ I 786 (4th May 1384). Dozy's manuscripts are dated 783 and Ibn al-Khaṭīb was assassinated at the beginning of 776 (1374). The preface and the chapter on Yūsuf b. Tāshfīn's expeditions to Spain were published by Dozy, *Scriptorum Arabum loci de Abbadidis*, ii. 182—209; he has also given the chapter on the Almohad Abū Yaʿḳūb's expedition in his *Recherches sur l'histoire et la littérature de l'Espagne* (3rd ed., Appendix xxvii, pp. lxx-lxxix). A short extract is given in Amari's *Appendice alla Biblioteca Arabo-Sicula* (Leipzig 1875), p. 62—63. The text has been published very inaccurately at Tunis (n. d.) with the biography of the supposed author Ibn al-Khaṭīb. In the xviith century a Spanish translation was made which is now in the Government House at Algiers; it was inserted (without indication of provenance) by Conde in his *Historia de la dominacion de los Arabes en España*, iii. ch. ix—lviii.

Bibliography: R. Basset, *Notice sommaire des manuscrits orientaux de deux bibliothèques de Lisbonne* (Lisbon 1894), p. 11—24; Jacqueton, *Les Archives espagnoles du Gouvernement Général de l'Algérie* (Algiers 1894), p. 98—109; Pons Boigues, *Ensayo bio-bibliográfico*, p. 393—5. (RENÉ BASSET.)

ḤULMĀNĪYA, a mystic sect founded in Damascus by Abū Ḥulmān al-Fārisī al-Ḥalabī. He appears to have been a disciple of Ibn Sālim of Baṣra (died 297 = 909); he was admitted among the Ṣūfī Shaikhs in the *Taʿarruf* of Kalābādhī (s. v. *ḥulūl*) but excommunicated by the Ashʿarīs for having maintained the theses 1. that God is present in the person of men endowed with physical beauty (*ḥulūl*) 2. that everything is allowed (*ibāḥa*) to him who knows to worship the presence of God in them. This is perhaps a corruption of the Sālimiya thesis on the divine *tadjalli*.

Bibliography: Maḳdisī, *Badʾ wa Taʾrīkh*, ed. Huart, ii. 90—92; Salamī, *Ghalaṭāt* (cf. s. v. ḤULŪL); Baghdādī, *Farḳ*, ed. Badr, p. 245-6; Hudjwīrī, *Kashf al-Maḥdjūb*, transl. Nicholson, p. 131, 260. (LOUIS MASSIGNON.)

ḤULŪL, a philosophical term, derived from *ḥalla* "to loosen, unfold, alight, settle in a place (*maḥall*)", whence its classical acceptations in Muslim theology, the relation between a body and its place, an accident and its substance. *Ḥulūl* has also been applied to the substantial union 1. of the body and the soul, *ḥulūl al-rūḥ fi 'l-badan*, 2. of a divine spirit with man, *ḥulūl al-ʿaḳl al-faʿʿāl fi 'l-insān* (Fārābī, *Ārāʾ Ahl al-Madīna al-fāḍila*, ed. Cairo, 1906, p. 86), *ḥulūl al-lāhūt fi 'l-nāsūt* (cf. AL-ḤALLĀDJ). The Aristotelian doctrine of hylomorphism, like the Christian doctrine of the incarnation, proposed the union to matter of a spiritual substance, its specific form; it may be compared to a force in its sphere of action. Almost all Muslim theologians (*Mutakallimūn*) reject it; followers of atomism, with al-Ashʿarī, admitted *ḥulūl* in case 1., for they saw in the *rūḥ* a subtle body, even in the angels and demons, but they rejected it in case 2. as submitting the divine essence to a partition (*tadjazzī*), and to transmigration (*tanāsukh*), whence the excommunication both by Sunnīs and Shīʿīs of the following sects as *Ḥulūliya* on the same grounds as the Christians: (*a*) the extreme Shīʿa (*Ghulāt*): Sabaʾiya, Bayāniya, Djanāḥiya, Khaṭṭābiya, Namiriya (Nuṣairiya), Muḳannaʿiya, Rizāmiya, Bāṭiniya, Ahl-i ḥaḳḳ, Druses, *b*. Sunnī Ṣūfīya: Ḥulmānīya [q. v.], Fārisiya (cf. AL-ḤALLĀDJ), Shalmaghāniya. *c*. Monists. Ittiḥādīya (Ibn Taimiya calls "*ḥulūl muṭlaḳ*" their "*waḥdat al-wudjūd*", cf. "*tadjassud al-aʿmāl*" Farghānī, *Muntaha 'l-Madārik*, (ed. Cairo 1293, ii. 84—86; cf. IBN AL-ʿARABĪ).

(LOUIS MASSIGNON.)

ḤULWĀN, Greek Χάλα, a very ancient town at the entrance to the Zagros passes, Zagri Pylae = 'Aḳaba-i Ḥulwān, now utterly deserted. The site of the town on the left bank of the Ḥulwānrūd south of Sar-i Pūl is still recognisable by the ruins of a building called Ṭāḳ-i Girra (illustrated in Flandin and Coste, *Voyage en Perse*, iv. Pl. 214), which dates from Sāsānian times. According to Arab tradition (cf. Ṭabarī, in Nöldeke, *Geschichte der Perser und Araber*, p. 138), the town was founded by Kawādh I (488—490) but in reality it is much older and existed under the same name (Khalmanu) even in the Assyrian period. The surrounding country is very fertile, fruit-trees being particularly numerous, and the figs of Ḥulwān are celebrated in the east under the

name *shāh amrūd* (king's figs). There are also many sulphur springs around the town.

When the Arabs under Djarīr b. ʿAbd Allāh captured Ḥulwān in 19 (640), it was a flourishing town and continued to enjoy its prosperity in the early centuries of the Hidjra. The Arab geographers sometimes place it in ʿIrāḳ ʿArabī but more usually in the province of Djibāl. The town was surrounded by a wall, which had 8 gates, which are detailed by al-Muḳaddasī. The great mosque was in an ancient castle in the centre of the town, and the Jews had a synagogue, which was held in great reverence, outside the walls. Towards the end of the fourth (beginning of the tenth) century an almost independent dynasty was ruling in Ḥulwān, which was founded by Muḥammad b. ʿAnnāz and became very important under his son Abu 'l-Shawk (cf. FĀRIS B. MUḤAMMAD, ii. 68). In 437 (1046) Ḥulwān was burned by the Saldjūks under Ibrāhīm Ināl; it also suffered severely from earthquake, for example in 544 (1149), so that by the seventh century it was in ruins. The Arab poets devote much attention to Ḥulwān on account of two palm-trees which used to be there and of which they have much to tell.

ḤULWĀN, a village in Egypt on the right bank of the Nile, 3 farsakh south of Fusṭāṭ, celebrated by the Arab poet Ibn Ḳais al-Ruḳaiyāt (ed. Rhodokanakis, iii. 6 *sqq.*) in a panegyric on ʿAbd al-ʿAzīz b. Marwān [q. v.], who had a pleasure-garden there. The village still exists and has given its name to the health resort of Ḥelwān, which lies farther inland and is of modern origin; it now has over 8000 inhabitants and is much visited.

Bibliography: Yāḳūt, *Muʿdjam*, ii. 321; Baedeker, *Egypt*[6].

HUMĀ (P.), the bearded griffon, the largest of the birds of prey of the old world, which lives by preference in the neighbourhood of eternal snows; it is the *Lämmergeier* of the Alps. It carries off the bones of dead animals, smashes them on the rocks and eats the fragments; so that the poet Saʿdī is able to say that the *humā* is superior to other birds, because instead of feeding on living flesh it only requires bones (*Gulistān*, i. story 15). According to a popular belief, which is very ancient, the shadow of a *humā* falling on a person's head is a sign that he will be raised to a throne, whence the epithet *humāyūn*, "august". One who deliberately kills a *humā* will perish within forty days. The good omen associated with this bird is again shown in another verse of the *Gulistān* (Book I, story 3): "No one shall go to seek the shadow of an owl, even if there were no *humā* in the universe".

Bibliography: D. C. Phillott, *Bāz-nāma-i Nāṣirī*, p. 27, note 1; Riḍā-Ḳulī-Khān, *Farhang-i Nāṣirī* (talismanic objections).

(CL. HUART.)

AL-ḤUMAIDĪ, ABŪ ʿABD ALLĀH MUḤAMMAD B. ABĪ NAṢR FUTŪḤ B. ʿABD ALLĀH B. FUTŪḤ B. ḤUMAID B. YAṢIL AL-AZDĪ, whose father was born in Cordova in the quarter of al-Ruṣāfa, and afterwards went to live in Majorca, was born in the latter place some years before 420 = 1029. After studying in Spain under the direction of Abū ʿOmar Yūsuf b. ʿAbd al-Barr and Abū Muḥammad ʿAlī b. Aḥmad b. Ḥazm al-Ẓāhirī, to whom he was particularly attached, he set out for the east in 448 = 1056. During his travels he studied the *Risāla* and the *Mukhtaṣar al-Mudawwana* with their author, the jurist Ibn Abī Zaid. He visited Cairo, Mecca and Medina, Syria and the ʿIrāḳ and settled in Baghdād where he died in the night of Monday—Tuesday 17th Dhu 'l-Ḥidjdja 488 = 17th—18th December 1095. He was buried in the Bāb Abraz cemetery but his remains were removed in Ṣafar 491 = January 1098 to the Bāb Ḥarb cemetery and interred near the tomb of Bishr al-Ḥāfī. Among his eastern teachers are mentioned Abū ʿAbd Allāh b. Abi 'l-Fatḥ, the historian Abū Bakr al-Khaṭīb, Abū Naṣr Ibn Mākūlā, and among his pupils, Yūsuf b. Aiyūb al-Nahrūmī, Muḥammad b. Ṭarkhān, and his teacher Abū Bakr al-Khaṭīb. Jurist, traditionist, historian and man of letters, al-Ḥumaidī was regarded by his contemporaries as the greatest master of his time not only for his learning but also for the sweetness of his character. A professed Ẓāhirī, he led a simple life and his only ambitions were for learning.

Of the eleven works mentioned by his biographers we only possess his *Djadhwat al-Muḳtabis fī Dhikr Wulāt al-Andalus wa Asmāʾ Ruwāt al-Ḥadīth wa Ahl al-Fiḳh wal-Adab wa Dhawī 'l-Nabāha wal-Shiʿr* preserved in the Bodleian, *Cat.*, i. 783.

Litt.*, i. 338.

(MOH. BEN CHENEB.)

HUMĀYŪN PĀDISHĀH. Full name Naṣīr al-Dīn Humāyūn, also styled Djahānbānī, and after his death, Djannat Āshiyānī (nesting in Paradise), eldest son of Bābar and Māham Bēgam, born Kābul citadel 6 March 1508, emperor of India end of December 1530, died at Dihlī by a fall down stairs from the roof of his library, 27 Jan. 1556; father of Akbar by Miryam Makānī, Ḥamīda Bānū. He was a good natured and generous prince, and inherited graceful manners from his father and from his mother who was of a Persian, saintly family and related to Sulṭān Ḥusain. He was also a scholar and a mathematician, but he was indolent and addicted to opium. In his youth he was an active soldier, and conquered Gudjarāt. But he could not control his brothers or himself. He bore with the former for a long time, but at last caused Kāmrān to be blinded. He went to Bengal and lived carelessly at Gaur. Twice defeated by Shīr Khān he had to fly to Persia. There Ṭahmāsp helped him to recover his throne. His

success in regaining India was chiefly due to his general Bairām Khān who won for him the victory at Māchīwāra and also that over Sikandar Sūr at Sirhind in June 1555. He had a poetical turn and wrote a Dīwān. His widow Ḥādjdjī Bēgam, erected a massive tomb over him near Dihli.

HUMĀYŪN-NĀMA, the title of the Turkish version of the *Kalīla wa-Dimna* (q. v.).

AL-**HUMAZA** (A.), the slanderer; title of Sūra civ.

AL-**ḤUMS**. This is the name traditionally given to the inhabitants of the *ḥaram* of Mecca at the time of Muḥammad's appearance, in so far as they were distinguished by special customs during the *iḥrām* [q. v.] from the other tribes who were together known as al-Ḥilla.

The Ḥums are said to have cooked or eaten no butter when in a consecrated state and to have preserved no milk so that they allowed cows, etc. with young to be suckled freely; they are also said to have refrained from consuming curd (*aḳiṭ*) and flesh and from the use of oil and perfumes as well as from sexual intercourse. They cut neither their hair nor nails and wore a new robe, which had not to be made of wool or hair. It is further said of them that they did not come to 'Arafāt, but made *wuḳūf* in al-Muzdalifa (according to another tradition in Namira, cf. Snouck Hurgronje, *o. c.*, p. 130 *sqq.*) and from there began the *ifāḍa* (this is said to be forbidden in Ḳur'ān ii. 195 cf. al-Ṭabarī, *Tafsīr*, ii. 163 *sqq.*), that they only lived in leather tents, made the circuit of the Ka'ba in sandals and did not enter their dwellings through the usual entrance (but, for example, through an opening in the roof). On the last named custom, against which Ḳur'ān ii. 185 is directed, there are discrepant traditions, according to which it was rather the Anṣār who practised it (see also al-Ṭabarī, *op. cit.*, ii. 105 *sq.*); in al-Azraḳī, p. 112 *infra*, however, the Aws and Khazradj are included among the Ḥums.

It is further stated that the clothes of the Ḥilla, after they had completed the *ṭawāf*, had to remain at the sacred place. They were thrown about around the Ka'ba as *laḳā* (in other circumstances also a garment could become *laḳā*, cf. al-Azraḳī, p. 118, 2 *sqq.*) and mouldered away under the influence of the weather. One who wished to keep his robe, took it off at the entrance to the sanctuary and made the circuit naked or in a garment borrowed or hired from one of the Ḥums (cf. Robertson Smith, *Lectures on the Religion of the Semites*², p. 451). It is also said that the Ḥilla, who came to perform the Ḥadjdj or 'Umra, were not allowed to eat the food which they brought with them from the *ḥill*. They could only eat food given by or purchased from the people of the *ḥaram*. Ḳur'ān vii. 27, 29 is said to refer to these two last customs (cf. also al-Ṭabarī, *op. cit.*, viii. 104, 14 *sqq.*, 108—111).

The meaning of the word *Ḥums* (sg. *Aḥmas*; also *Aḥmasī*) is obscure; the opposite Ḥilla, according to Wellhausen, points to the meaning "consecrated"; according to Nöldeke (in a private letter), who is inclined to doubt the reality of this contrast, al-Ḥums, like *al-Aḥāmis* (*Ḥamāsa*, p. 283, v. 1), might mean "the hot" with reference to the corresponding root; the denominative *ḥammasa* is used in al-Azraḳī, p. 123, 14, 17, of a mother, who by a vow dedicates her son to be an *aḥmasī*; cf. 1 Sam. i. 10 *sq.*

Bibliography: Ibn Hishām (ed. Wüstenfeld), p. 126 *sqq.*; al-Ya'ḳūbī (ed. (C. VAN ARENDONK.)

ḤUNAIN, a deep and irregular valley, with clusters of palmtrees, situated a day's journey from Mecca on one of the roads to Ṭā'if; the scene of the famous battle, the second mentioned by name in the Ḳur'ān (ix. 25—26) fought soon after the surrender (*fatḥ*) of Mecca. The confederate tribes of the Hawāzin did not wish to await the result of this last trial of strength before mobilising all the forces at their disposal. They posted themselves in the defiles commanding the plain of Ḥunain. Their commander Mālik b. 'Awf brought their families and flocks with them; their presence, he thought, would make his men invincible.

On the course of the battle we have a number of notices, all inspired by the text of the Ḳur'ān. The latter testifies that — in spite of the imposing number of Muslim warriors — the action began with a complete rout of the Prophet's forces. His army owed its safety to the intervention of "invisible troops". Setting out from this statement each author has set about a compilation representing these two phases of the battle, not forgetting to magnify the valour of his own fellow tribesmen or of individuals of special interest for the early history of Islām. For the rest the confusion and the contradictions of these accounts show that at quite an early period the *Sīra* found great difficulty in reconstructing the development of the manoeuvres in the battle.

On leaving the narrow oasis of Ḥunain the road enters winding gorges, suitable for ambuscades. In them Mālik b. 'Awf awaited the Muslims, coming along in no order and not suspecting the presence of the enemy. Surprised by the sudden attack of the Bedouin cavalry, overwhelmed by a hail of arrows, the Prophet's soldiers retired in disorder. "In spite of its size, the earth appeared too small for the fugitives" (Ḳur'ān ix. 25); for a moment Muḥammad, left alone, was in great danger. Tradition has great difficulty in glossing over this cowardly desertion; it throws the responsibility for it on the Bedouin allies of the tribe of Sulaim and on the *ṭulaḳā'* or still unbelieving Meccans. The accounts — according to their Ḳuraishī or Anṣārī origin — claim for the Muhādjirūn or Medinese respectively the honour of not having given way. These versions which are inspired by the court of Baghdād display no less zeal in favour of the Hāshimids. All authors, except the Shī'a, endeavour to protect the reputation of the future Caliphs Abū Bakr and 'Omar. In the hagiologies of Islām it is considered a signal merit, indeed a marvel, to have stood firm at Ḥunain.

Victory finally rested with the Muslims. On this point we have the statement of the Ḳur'ān, confirmed by the advance of the Prophet to lay siege to Ṭā'if. The access to this town was therefore open. How then was the advantage restored to the Muslim arms? Here again the Ḳur'ān suggests the answer: "God sent invisible troops from on high to chastise the unbelievers". Khālid b. al-Walīd, who commanded the cavalry, was among the few Muslims wounded that day. He must therefore have been risking his life and it seems legitimate to give him the credit of the victory, equally claimed for the Anṣārs by the Medinese school. Ḥunain was not a battle, but two routs; first that of the Muslims, then that of the Bedouins of Hawāzin. This accounts for the large number of prisoners — 6000 women and children are mentioned — and the almost negligible total of the Muslim losses, about twelve killed. The booty captured was enormous, over 24,000 camels. The fleeing Bedouins sought refuge behind the ramparts of Ṭā'if.

Bibliography: Yāḳūt, *Mu'djam* (Egyptian edition), iii. 354; Bakrī, *Mu'djam* (ed. Wüstenfeld), p. 287; Ya'ḳūbī, *Hist.* (ed. (H. Lammens.)

ḤUNAIN b. Isḥāḳ. His full name was Abū Zaid Ḥunain b. Isḥāḳ al-'Ibādī; he was a member of a family belonging to the Christian Arab tribe of 'Ibād and was born at Ḥīra in 194 = 809-810, where his father was an apothecary; he was celebrated as a physician and as the translator of numerous Greek works into Syriac and Arabic. As a young man he came to Baghdād where he became a pupil of the physician Yaḥyā b. Māsawaih. He completed his education in Asia Minor and became particularly proficient in the Greek language, which qualified him for his later translations. On returning to Baghdād he began his literary activity with the support of the Banū Mūsā, for whom he had collected Greek works, and became physician to the Caliph al-Mutawakkil. On account of his attitude to iconoclasm he was suspected of blasphemy and excommunicated by Bishop Theodosius; he thereupon took poison out of melancholy and died in Ṣafar 260 = December 873.

Of his own works there have survived the *Kitāb al-Mudkhal fi 'l-Ṭibb*, transl. into Latin and printed as *Isagoge Johannitii ad Tegni Galeni* or *Johannitii Isagoge in artem parvam Galeni*; another version of the same work entitled *Kitāb al-Masā'il fi 'l-Ṭibb li 'l-Muta'allimīn*; a *Kitāb al-Mawlūdīn*; ein *Kitāb Ikhtiṣāru'at al-Falāsifa fi Ḥuyūt al-Ḥikma fi 'l-A'yād wa-Tafāwut al-Ḥikma bainahum*; several works on physics and astronomy; the "Aphorisms of the Philosophers" in a Hebrew translation. Among translations it is principally those of Platonic, Aristotelian or Hippocratic works that are ascribed to him, also that of Dioscorides' περὶ ὕλης ἰατρικῆς, but especially almost all the works of Galen; so that, according to Ibn Abī Uṣaibi'a, "hardly anything by Galen exists which was not translated or improved by him". In addition, translations of the *Quadripartitum* of Ptolemy etc., are ascribed to him.

There can be no doubt that of the numerous translations ascribed to him a portion are to be placed to the credit of his school, notably to his son Isḥāḳ b. Ḥunain, his nephew Ḥubaish and others. It may be particularly mentioned that the translation of Galen edited by M. Simon is ascribed to Ḥubaish as a result of a critical analysis of its language by G. Bergsträsser. For the details see the Bibliography.

(J. Ruska.)

HUNZA-NAGIR. The two districts of Hunza and Nagir, which occupy an isolated valley between 36° and 37° N. and 74° 25' and 75° E., are generally considered as one country under the joint name of Hunza Nagir (often written Hunza-Nagyr). This valley communicates by difficult gorges with Gilgit, and is drained by the Kandjut River which falls into the Gilgit River a tributary of the Indus. From the north it can be approached by passes leading on to the Tāghdumbāsh Pāmir, by which there is communication with Sarikol and Yārkand. On the North-West and South-East the valley is bounded by impassible mountains, spurs of the Hindūkush and Muztāgh ranges, some peaks exceeding 25,000 ft. in height, of which Rakipōshi south of Nagir is the best known. The population is Muhammadan, but while the people of Nagir are Shī'ah those of Hunza, like their neighbours of Wakhān, belong to the Mawlāi sect. The Hunza people are more warlike than those of Nagir. They are apparently of the same race. They speak two languages; the Shinā dialect of Gilgit being spoken in lower Nagir, and the Burushaski, a non-Aryan and non-Turkish tongue of uncertain affinities, being spoken in Hunza and upper Nagir. In the northern district a branch of the Wakhī race, speaking its own Ghalča tongue, is found. The easy communications with Wakhān by the Kilik Pass have led to the intrusion of a Ghalča race south of the Hindū-Kush. The same cause made it easy for robbers from Hunza to raid the traffic from Yārkand to India by the Karakoram Pass where the so-called Kandjūti robbers inspired great terror until restrained by the extension of British power. The name Kandjūti is derived from Kandjut, the name by which Hunza is known in the Pāmirs and Sarikōl, a name which Biddulph compares with Hunzu, one local form of the name Hunza. The people of Nagir took no part in these raids, which were winked at by the Chinese authorities as a reward for assistance given by Hunza in suppressing a rebellion at Yārkand in 1847. The Chinese also paid a subsidy to the ruler of Hunza. The traffic in slaves carried on by the Hunza raiders was a great scourge to the races under Kashmir rule, especially the people of Baltistān.

Hunza and Nagir were and still are governed by separate chiefs, each known by the name of *Thum*, a word of uncertain origin.

Little is known of the early history of this region. The easy passes leading to the north may have been traversed by Kushān invaders from Badakhshān in the second century B. C. but the routes leading into Čitrāl were more probably followed. Buddhism was certainly the prevailing creed from the commencement of the Christian era, and a well preserved tope still exists at Thol in Nagir. The date of the introduction of Islām is not known, but the prevalence of the Shī'a and Mawlā'ī sects seems to point to its having come in by Badakhshān and Wakhān, and not from the south. But few European travellers visited the country before the war of 1891, the principal were Lockhart, Biddulph, Grombchewtsky, Durand and Younghusband. The Sikhs attempted to subdue it after their occupation of Gilgit, in consequence of the perpetual raids from Hunza, but met with a disastrous defeat in 1848. Further unsuccessful attempts were made by the Dogra rulers of Kashmir, but in 1869 the Thum of Hunza agreed to pay tribute. No Kashmiri was however allowed to enter the valley. After the appointment of British agents at Gilgit the Thums of Hunza and Nagir entered into agreement to put an end to the raids, but in 1891 they recommenced and the chiefs threatened to attack the fort of Čalt. A small force of Gurkhas and Dogras under British officers was then sent into the country, and after the brilliant storming of the hill forts of Nilth and Thol, the Gorge of the Kandjūt river was forced, the Thum of Nagir submitted and the Thum of Hunza fled over the Pamirs. Since that time the country has been included within the boundary of British India. The internal administration has not been interfered with, but it is traversed by a good road and travellers can pass through it in safety. A body of Kandjūtis served under British officers in the Čitrāl campaign of 1895. The town of Baltit, at an altitude of 8400 feet, is the capital of Hunza and the town of Nagir that of Nagir. The territories of the two countries are separated by the Kandjūt River.

(M. LONGWORTH DAMES.)

ḤŪR (A.), plural of *ḥawrā'*, fem. of *aḥwar*, literally "the white ones" i. e. the maidens in Paradise, the black iris of whose eyes is in strong contrast to the clear white around it. The nomen unitatis in Persian is *ḥūrī* (also *ḥūr-i-bihisht*), Arabic *ḥūriya*. The explanation of the word found in Arabic works "those at whom the spectator is astounded (*ḥāra*)" is of course false and is therefore rejected even by other Arab philologists.

These maidens of Paradise are described in various passages in the Ḳur'ān. In Sūra ii. 23, iii. 13, iv. 60, they are called "purified wives"; according to the commentators, this means that they are free alike from bodily impurity and defects of character. In Sūra lv. 56, it is said that their glances are retiring i. e. they look only upon their husbands. "Neither man nor djinn has ever touched them"; this is interpreted to mean that there are two classes of them, one like men and the other like the djinns. They are enclosed in pavilions (lv. 72). They are compared to jacinths and pearls (lv. 58).

Later literature is able to give many more details of their physical beauty; they are created of saffron, musk, amber and camphor, and have four colours, white, green, yellow, and red. They are so transparent that the marrow of their bones is visible through seventy silken garments. If they expectorate into the world, their spittle becomes musk. Two names are written on their breasts, one of the names of Allāh and the name of their husband. They wear many jewels and ornaments etc. on their hands and feet. They dwell in splendid palaces surrounded by female attendants and all possible luxury etc.

When the believer enters Paradise, he is welcomed by one of these beings; a large number of them are at his disposal; he cohabits with each of them as often as he has fasted days in Ramaḍān and as often as he has performed good works besides. Yet they remain always virgins (cf. Sūra lvi. 35). They are equal in age to their husbands (ibid. 36), namely 33 years (al-Baiḍāwī).

These are all very sensual ideas; but there are also others of a different kind. In discussing the Ḳur'ānī term "wives" (ii. 23), al-Baiḍāwī asks what can be the object of cohabitation in Paradise as there can be no question of its purpose in this world, the preservation of the race. The solution of this difficulty is found by saying that, although heavenly food, women, etc., have the name in common with their earthly equivalents, it is only "by way of metaphorical indication and comparison, without actual identity, so that what holds good for one may hold for the other also". In another passage (on Sūra xliv. 54) al-Baiḍāwī observes that it is not agreed whether the *ḥūrī*'s are earthly women or not.

Sale (*The Koran*, London 1821, *Preliminary Discourse*, p. 134) thinks that Muḥammad owed the idea of the maidens of Paradise to the Parsis. Dozy (*Het Islamisme*[2], Haarlem 1880, p. 101, note) has refuted this view with the observation that Sale's Parsi source is much younger than the Ḳur'ān and the relationship is therefore reversed. In the article DJANNA it is suggested that Muḥammad misunderstood Christian pictures of Paradise and that the angels in them are the originals of the youths and maidens of the Ḳur'ān.

(A. J. WENSINCK.)

ḤURAIMILA (ḤURAIMLA), a town in Arabia in the north of Riyāḍ [q. v.], the capital of Nedjd, in the province of Sedeyr (Sudair) on the border between the latter and the province of 'Āriḍ, the birthplace of the founder of the Wahhābī sect, Muḥammad b. 'Abd al-Wahhāb. It is surrounded by strong fortifications and in 1862 had, according to Palgrave, 10,000 inhabitants. Inside the town on an elevation is a large fortified citadel of architectural importance, which was erected along with the other citadels in Nedjd after the conquest of Dar'iya [q. v.] by the Egyptians under

Ibrāhīm Pas̲h̲a. During Palgrave's stay there in 1862 the governor of the town was a native of the town, a fanatical Wahhābī, named Ḥejāj.

(J. Schleifer.)

AL-HURMUZĀN, King of Susiana. As a commander of a Persian division he took part in the battle of al-Ḳādisiya in 16 = 637, but escaped by flight and retired to his country of Ḵh̲ūzistān, from which he offered a vigorous resistance to the Muslims. According to the usual statement, he invaded Maisān and Das̲h̲tmaisān, but was driven out by the united forces of Baṣra and Kūfa and had to sue for peace and cede the Muslims a considerable portion of his lands. In consequence of a border feud with the Banū 'l-'Am, he is said to have again taken up arms and for a second time was forced to make peace on disadvantageous terms. It is clear at any rate that the cunning and energetic Persian was a very dangerous opponent and the troops of the Arab Caliph were only able to overcome him with difficulty. The population of the two provinces of Fārs and al-Ahwāz was stirred up to renewed resistance by emissaries of the Persian king Yazdadjird III and as al-Hurmuzān's attitude grew more and more threatening, the Caliph 'Omar sent a powerful army against him under al-Nu'mān b. Muḳarrin. The opposing forces met at Arbuk. After a stubborn resistance al-Hurmuzān had to take to flight and went to Tustar, while al-Nu'mān entered Rāmhurmuz. He then advanced against Tustar and joined forces with other Arab divisions which had meanwhile come up. al-Hurmuzān was blockaded, but only after eighteen months or, according to another statement two years, did the besiegers succeed in taking the strong fortress and then only by treachery. The Arab general, Abū Mūsā al-As̲h̲'arī, declined to decide al-Hurmuzān's fate himself but sent him to the Caliph. The year of the taking of Tustar is variously given as 17 = 638-9, 19 = 640, 20 = 640-1, 21 = 641-642. When al-Hurmuzān was brought before 'Omar, he succeeded in saving his life by his cunning but only on condition that he adopted Islām. He was able to be useful to the Caliph in various ways on account of his knowledge of Persian affairs. But when 'Omar was murdered in 23 = 644 by a Persian Christian, al-Hurmuzān, probably without reason, was suspected of being an accomplice and killed by 'Ubaid Allāh, son of the Caliph.

AL-ḤURR B. 'ABD AL-RAḤMĀN AL-THAḲAFĪ, governor of Spain. His period of office is said to have covered about three years (98—100 = 717—719). During this time he made many districts of Spain tributary and extended his raids beyond the Pyrenees. The Arab chroniclers, however, have little to tell of his rule, the Christians (*Chron. Pac.*), who call him Alahor (Alaborr), also give no details. It is clear from their allusions, however, that he was feared by the Christians as well as hated by a section of his countrymen for his extortions and therefore dismissed by 'Omar II.

(Louis Massignon.)

ḤURŪF (A.), Plur. of *Ḥarf* [q. v.].

ḤURŪFĪ, a S̲h̲ī'ī sect founded by Faḍl Allāh of Astarābād at the end of the viiith (xivth) century A. H., introduced into the Ottoman empire by one of his disciples, 'Alī al-A'lā, and adopted by the Bektās̲h̲ī dervishes. Their creed, which is epitomised in the *Maḥram-nāma*, composed in 828 = 1425, is based on the idea that the universe is eternal and moves with an unceasing rotation, which is the cause of the changes observed in it. These changes are divided into cycles, the beginning and end of which are marked by similar phenomena, the appearance of an Adam at the beginning and a last judgment at the end. God is manifest in the person of man, particularly his face, for man was made in the image of God.

This manifestation is produced under the successive forms of the prophet, saint and God; Muḥammad was the last of the prophets, then came the saints, from 'Alī to Ḥasan 'Askarī, the eleventh Imām; Faḍl Allāh, the last of the saints is also the first of the divine series, he is God incarnate. The distinguishing feature of man is speech or language which is written with the 28 characters of the Arabic alphabet; calculations derived from the numerical value of the letters borrowed from the Ismā'īliya (St. Guyard, *Fragments Ismaëlis*, p. 108 *sqq.*) play a great part in their doctrines, but they also make use of groupings of the alphabet by letters composed of one, two, three or four written characters. The lines in the features number seven (four eyelashes, two eyebrows and the hair, or else two halves of the moustache, two whiskers, the beard divided into two, and tuft on the lower lip), multiplied by the number of the elements, we get 28, the number of letters in Arabic alphabet. Their chief books are the six *D̲j̲āwīdān*, the *Ḥaḳīḳat-nāma*, *Istiwā-nāma*, *Hidāyet-nāma* and *Maḥram-nāma*, some in Persian mingled with passages in the Astarābād dialect, others in Ottoman Turkish (Cf. FAḌL ALLĀH and BEKTĀS̲H̲IYA). Unlike other dervishes, they have no *wird* or *d̲h̲ikr*: every morning they meet in the house of their spiritual chief, called *bābā*, and he gives each one by the hands of a servant, a glass of wine, a slice of bread and a piece of cheese (those present make a great noise); the superior takes the glass of wine and gives it to each one present who takes it respectfully, touches his face and eyes with it and drinks it. They have a kind of confession to the *bābā*.

al-ḤUSAIN b. ʿAbd Allāh. [See ibn sīnā.]

al-ḤUSAIN b. Aḥmad. [See abū ʿabd al-lāh al-muḥtasib and ibn khālawaih.]

al-ḤUSAIN, the second son of ʿAlī and Fāṭima, born in Medina in the fourth or fifth year a. h. As in the case of his brother al-Ḥasan [q. v.] — the two are known together as *al-Ḥasanān*, the 'two Ḥasans' — tradition pictures the young Ḥusain overwhelmed with marks of tenderness by his maternal grandfather. This is what ʿAlī is said to have thought of them: "Ḥasan is a spendthrift thinking of nothing but the pleasures of the table and entertaining. As to Ḥusain he is mine and I am his". Unfortunately for the future of his line events were to verify the truth of this judgment of Fāṭima's husband; they were to prove the existence in the son of the same indecision and the same lack of intelligence that had been the ruin of the father. During the troubled Caliphate of ʿAlī, Ḥusain remained in obscurity. Less lively than Ḥasan, he did not imitate his life of foolish extravagance and pleasure. After ʿAlī's death he followed his elder brother into retirement in Medina and during Muʿāwiya's reign, particularly after Ḥasan's death made him head of the Shīʿa, he resisted the sollicitations of his partisans in the ʿIrāḳ and maintained a more dignified attitude to the Umaiyads than the dissipated Ḥasan. The accession of Yazīd altered his views and Ḥusain decided to listen to the appeal once more made by his ʿIrāḳ partisans. But before doing anything he resolved to test how matters stood through his cousin Muslim b. ʿAḳīl [q. v.]. On the latter's arrival thousands of Shīʿīs rushed to swear fidelity to Ḥusain. Muslim wrote to the son of ʿAlī to persuade him to come to take charge of the movement. In the meanwhile ʿUbaid Allāh b. Ziyād [q. v.], being appointed governor of the ʿIrāḳ, had succeeded in capturing Muslim and executed him. Leaving Mecca, where he had sought refuge after refusing to swear fealty to Yazīd, Ḥusain took the road to Kūfa, according to Muslim's instructions. A few stages from this town he learned of the tragic end of his emissary. ʿUbaid Allāh had established outposts on all the roads leading from the Ḥidjāz to the ʿIrāḳ and parties of cavalry were patrolling the roads. The weak escort of relatives and devoted followers attached to Ḥusain came in contact with one of these detachments. On their refusal to halt ʿUbaid Allāh's horsemen accompanied them at a short distance. In this fashion they reached Karbalāʾ [q. v.], destined to be ten days later the scene of Ḥusain's death. During these ten days the character of the pretender proved more and more feeble. His former irresolution seized him again. The circle of steel formed by the soldiers sent by ʿUbaid Allāh closed in around him. The Omaiyad governor wished to persuade or force him to surrender. He cut off all access to the Euphrates, hoping to reduce him by thirst. Ḥusain remained obdurate, being persuaded of the inviolability of his person and hoping for a revulsion of feeling in his favour among the soldiers of Kūfa, who had been secretly won over to the Shīʿa but had been terrorised by the execution of Muslim.

The 10th Muḥarram 61 a. h. (10th October 680) dawned. ʿOmar b. Saʿd b. Abī Waḳḳāṣ [q. v.] had taken command of the 4000 men assembled at Karbalāʾ. Ḥusain was summoned to surrender at discretion. The ultimatum being unanswered, ʿOmar executed a turning movement to envelope the son of ʿAlī. His partisans tried to resist. Ḥusain did not stir; he played none of the heroic parts so fondly described by the Shīʿīs. An engagement resulted in which Ḥusain fell wounded in many places. His tents were pillaged. At first merely a police operation, the scheme degenerated into a general mêlée. "It did not last long; just time to slay a camel or to take a nap". Thus a verbal report delivered to Yazīd describes it. The Caliph deplored this ending; he had neither desired nor ordered it. His instructions were to secure the person of Ḥusain, to prevent him prolonging a dangerous agitation. He treated the ʿAlids who survived the catastrophe of Karbalāʾ with honour, provided generously for their needs and gave them an escort to Medina. Ḥusain's descendants vegetated there in obscurity, at variance with their relatives the Ḥasanids. They usually left to their cousins the right of enforcing the political privileges of ʿAlī's family in Arabia.

On the significance of the death of Ḥusain in the faith of the Shīʿa see this article and the article muḥarram.

(H. Lammens.)

al-ḤUSAIN b. ʿAlī, Bey of Tunis (1705—1735), founder of the Ḥusainī dynasty still reigning there. He was the son of a Greek renegade and at the Algerian invasion of 1705-1706 held the office of an Agha. After the capture of the Dey Ibrāhīm, Ḥusain was elected Bey by the Aghas while Muḥammad Khōdja was elected Dey on the 20th Rabīʿ I 1117 (10th July 1705). After Ḥusain had driven back the Algerians he rid himself of Khōdja Muḥammad, who was put to death along with the ex-Dey Ibrāhīm who had been meanwhile released. When soon afterwards a son was borne to him by a Genoese captive, he had it decided by a council specially summoned for the purpose that his power should be transmitted to his descendants (1710).

Throughout his reign Ḥusain, whose confidant was a Frenchman named Raynaud, endeavoured to live on good terms with European powers. He concluded treaties with France (1710 and 1728), England (1716), Spain (1720), Holland (1728) and Austria (1725). On the other hand he did not succeed in restraining piracy and the attacks of the corsairs forced France twice (1728 and 1731) to send a fleet to Goletta.

At first Ḥusain's reign was a very peaceful one at home, and the people enjoyed peace such as they had not known for long. "The roads" writes Muḥammad al-Saghīr b. Yūsuf "were safe and the land flourishing, the country-houses and gardens became populous again and numerous palaces were

built in the country, which had never happened before". The Bey himself undertook important works: he restored the walls of Ḳairawān, improved the aqueducts of Tunis, erected bridges and reservoirs and finally built mosques and madrasas in Sfax, Gafsa, Susa, and Tunis (mosque of Bardo and al-Madrasa al-Ḥusainiya).

From 1729, however, Tunisia suffered from severe disturbances. ʿAlī Pasha, the Bey's nephew, discontented because he was excluded from the government, had fled from Tunis with his son Yūnus and stirred up a rising of the tribes in the interior. Defeated by Ḥusain he fled to Algeria where he was imprisoned by the Dey Kurabdi. The latter's successor Ibrāhīm released him and by arrangement with him made an attack on Tunisia. Ḥusain abandoned by a portion of his Arab troops was defeated at Smendja (4th Sept. 1735) and had to retire to Kairawān, while ʿAlī entered Tunis and had himself proclaimed Bey after promising to pay a yearly tribute to Algeria. Ḥusain now sought to take the offensive again; after defeating ʿAlī's son Yūnus on 3rd November 1735 he advanced up to the walls of Tunis but did not dare storm the town. Returning to Ḳairawān he was besieged by Yūnus' troops for five years. On the 16th Ṣafar 1152 (18th May 1740), the town was taken by storm. Ḥusain, who had succeeded in escaping, was brought back by the enemy's cavalry and Yūnus cut off his head.

(G. YVER.)

AL-**ḤUSAIN** b. ʿALĪ. [See IBN MĀKŪLĀ, AL-MAGHRIBĪ, AL-ṬUGHRĀʾĪ.]

AL-**ḤUSAIN** b. ḤAMDĀN was the son of the founder of the Ḥamdānid dynasty [q. v.]. At the beginning of 281 (895), when the Caliph al-Muʿtaḍid was reducing the Ḥamdānid family to obedience, Ḥusain, who was in the castle of Dair Zaʿfarān, surrendered and was with his father carried to Baghdād. In 283 Ḥusain undertook to capture the fugitive Khāridjite leader Hārūn on condition that his father should be set free. In this he succeeded and the Caliph kept his promise. From this moment the Ḥamdānids occupied a high place at the court of the Caliph. Ten years later Ḥusain was sent in pursuit of Abū Ghānim the Carmatian (Karmaṭī), who had invested Damascus, but failed to overtake him, but in the following year (294 = 906-7) he defeated the followers of Zikrawaih in Syria.

When the end of the Caliph al-Muʿtaḍid drew near, Ḥusain put forward Ibn al-Muʿtazz as successor. When al-Muḳtadir became Caliph (295 = 908), Ḥusain attacked the palace in order to seize his person. The attempt failed and Ḥusain and the other conspirators scattered. Ḥusain fled to Mosul, but was captured at Takrīt. He was, however, pardoned and made prefect of Kumm and Kāshān. From Kumm in 297 (909) he set out against the Ṣaffārid Laith b. ʿAmr, but the armies did not meet. Later he took part in the expedition against Sabkarī the opponent of Laith, who was taken prisoner (middle of 298 = 910).

In 301 (913-4) Ḥusain's brother ʿAbd Allāh b. Ḥamdān rebelled, but, on the advance of the Caliph's troops, submitted and was restored to his province. In the following year Ḥusain, who was now governor of Diyār Rabīʿa, threw off his allegiance, and ʿAbd Allāh was again deposed and imprisoned. The greater part of the Caliph's troops were in Egypt, and as soon as they returned, Ḥusain fled, but he was arrested and his whole family carried to Baghdād. He did not lose heart, as he believed his brothers and himself were indispensable to the Caliph. His brothers were in fact set at liberty and shortly afterwards restored to office. Ḥusain alone was put to death (303 = 917).

Bibliography under Art. ḤAMDĀNIDS.

(T. H. WEIR.)

AL-**ḤUSAIN** b. AL-ḤUSAIN, last Dey of Algiers (1818—1830). Born in Smyrna about 1765. Ḥusain was filling the office of *Khōdja al-Khail* when the Dey ʿAlī struck down by the plague appointed him his successor. Ḥusain was proclaimed without opposition. He was a well educated man, moderate in his views, who did not desire power and only accepted it with reluctance. He was considered benevolent and just, and hastened to inaugurate his reign by an amnesty and the abolition of various violent measures taken by his predecessors. Nevertheless, soon after his accession his assassination was twice attempted by the Janissaries. He therefore lived in the Ḳaṣba under the protection of a guard of Zwāwa.

The situation in the Regency at this time was a very troubled one. The provinces in the east and in the west were in full rebellion. The Nememsha, the tribes of the Awrās and of the Sūf, and the natives of Great Kabylia had taken up arms against the Turks. The Derḳāwa marabouts, followed by the Tidjāniya preached rebellion in the Tell and Southern Oran. Ḥusain undertook to restore Turkish authority; in this he succeeded with the help of the Beys of Constantine and Oran and through the military talents of the Agha Yaḥyā. Peace was restored in the east about 1820 and in the west also in 1828. At the same time the Dey showed his devotion to the Muslim cause by sending a fleet to the Levant, which from 1821 to 1827 took part with the Ottoman fleet in the struggle against the insurgent Greeks.

Ḥusain's relations with the European Powers were also very strained. His refusal to adhere to the decisions of the Congress of Aix la-Chapelle regarding the abolition of privateering provoked a naval demonstration by the English and French, which however was without result (1819). The expulsion of Macdonnell, the English Consul, had more serious consequences. England sent Admiral Sir Harry Neale to demand reparation; after fruitless pourparlers (February—March 1824) the fleet bombarded the town from the 17th to 29th June. The damage done was insignificant however and the Algerians imagined they could brave the Christian powers with impunity.

While the affairs of the bankrupt Bakri Busnach were being arranged, the Dey, who felt himself wronged by the French government, made violent recriminations. His discontent made itself manifest in the insult to Consul Deval on the 30th April 1827. Not content with refusing all satisfaction for this outrage, Ḥusain ordered the destruction of the French establishments at La Calle. These outrages resulted in the blockade of the Algerian coast (1827—1830). During this period the French government made several attempts to negotiate with the Dey, but he, probably

relying on the support of the British government, refused to come to any arrangement. He scarcely disavowed the attack on the ship "La Provence" which was fired on by the Algerian batteries on the 30th July 1829, although it was protected by a flag of truce. Unable to obtain any redress by diplomatic means Charles X's ministers changed their methods. An expedition against Algiers was decided upon the 31st January 1830 and the troops disembarked at Sīdī Ferruch on the 14th June. Left to his own resources, and deprived of the best general Yaḥyā Agha, whom he had himself put to death in 1828, Ḥusain was incapable of resisting for long. On the 4th July, after the occupation of Fort l'Empereur by the French, he resigned himself to accepting the terms imposed by General de Bourmont.

Articles 2 and 3 of the capitulation guaranteed the ex-Dey the retention of all his private property and the right to retire whither he pleased. The French government, however, objected to his going to Malta and Ḥusain demanded to be conducted to Naples, where he arrived on the 9th August 1830. After a short sojourn in this city he went to Leghorn from where, through Jewish merchants in regular relations with Algiers, he was able to negotiate with the malcontents of the town and the native chiefs of the interior. Arriving in Paris in 1831 to beg a pension and the restitution of his estates he received an honourable welcome but obtained nothing from the government, now enlightened on his real attitude. On his return to Leghorn he continued his tactics. Then feeling himself too closely watched, he left Leghorn for Alexandria, where he died in obscurity in 1838.

AL-ḤUSAIN B. MANṢŪR. [See AL-ḤALLĀDJ.]

AL-ḤUSAIN B. MUḤAMMAD. [See AL-RĀGHIB AL-IṢFAHĀNĪ.]

AL-ḤUSAIN B. NUMAIR of the Kinda tribe of Sakūn, leader of the Sufyānids. He fought in the Omaiyad ranks at Ṣiffīn. On the accession of Yazīd I he governed the important district (*djund*) of Ḥimṣ. While holding this office he intervened with the Caliph on behalf of Ibn Mufarrigh, the satirist, imprisoned by ʿUbaid Allāh b. Ziyād. When the expedition against the sacred towns of the Ḥidjāz was decided upon, Ḥusain was appointed lieutenant to the commander in chief, Muslim b. ʿUkba (q. v.). In this capacity he distinguished himself at the battle of the Ḥarra. On the death of Muslim during the advance on Mecca he took command of the expedition. For two months he besieged the town and was about to take it, when the death of Yazīd suspended operations. After vainly endeavouring to persuade Ibn al-Zubair to accompany him to Syria to be proclaimed Caliph there, Ḥusain led his army back to Syria. Marwān b. al-Ḥakam having become Caliph by the general agreement, he sent Ḥusain to Mesopotamia under ʿUbaid Allāh b. Ziyād. There he crushed the Shīʿa led by Sulaimān b. Ṣurad (24th Djumādā II 65 = 6th January 685). Three years later (67 = August 688) he died from wounds inflicted by Ibrāhīm b. al-Ashtar in the battle on the Khāzir.

(H. LAMMENS.)

ḤUSAIN B. SULAIMĀN, the Ṣafawid, Shāh of Persia, 1694—1722. In the reign of this feeble ruler the kingdom of the Ṣafawids, which since the reign of ʿAbbās I had produced no powerful or important prince, collapsed. The approaching fall of the dynasty is said to have been foretold by dreams and prophecies, so that Ḥusain's father changed his true name of Ṣafī to Sulaimān on his accession. On Sulaimān's death the 25-year old Ḥusain was recognised as Shāh without difficulty, as an elder brother had been condemned to death by his father himself. The young ruler left the affairs of state in the hands of the nobles of the kingdom, notably the iʿtimād al-Dawla (prime minister) Fatḥ ʿAlī Khān, and was under the influence of the mullas, so that at the beginning of his reign he made an endeavour to suppress energetically the drinking habits prevalent at court and among the nobility, without success, however. The early years of his reign passed comparatively peacefully and only in the frontier provinces, Georgia and Kandahār, were affairs in an unsatisfactory condition. But when the unruly Khān of Georgia, Gurgīn Khān came in person to Iṣfahān to make excuses for his conduct, the Georgian troubles seemed to be at an end; it was even thought that a means had been found through them to put an end to the disturbances in Kandahār also, by sending Gurgīn Khān there as governor backed by Georgian troops.

The possession of Kandahār had long been disputed between the Ṣafawids and the Great Mughal; this was not the main trouble however but the fact that the Afghān tribes of the district, namely the Ghalzai (q. v. ii. p. 138 *sq.*), were Sunnīs and consequently hated Persian rule, particularly as a governor, who had once been an infidel (for Gurgīn Khān had only found favour after his adoption of Islām) was now to hold them in check. Mīr Wais, then chief of the Ghalzai, seemed particularly dangerous to the Georgian: to get rid of him he sent him to Iṣfahān with secret instructions to the Ṣafawid ministers to keep him there; but Mīr Wais soon found an opportunity of winning the influential men at the head of affairs to his side by suitable presents and obtained permission to make the pilgrimage to Mecca. He took advantage of his stay in the holy cities to get a fatwā from the religious authorities there making it the duty of the Sunnī Afghāns to wage a holy war against the infidel Georgians and the heretical government. Armed with these documents, he returned to Persia and later to Kandahār. Gurgīn Khān was assassinated and Mīr Wais then seized the fortress of Kandahār (1708). The Persian government then sent Khusraw Khān, a

nephew of the murdered Gurgīn Khān, with Georgian and Persian troops to enforce obedience upon the rebel Afghāns, but they were put to flight by Mīr Wais. Nevertheless, affairs seemed to be taking a better turn for the Persians when Mīr Wais died in 1715 and his brother 'Abd Allāh Khān seemed inclined to make peace with the Persian government, but the latter was soon after murdered by Maḥmūd, a son of Mīr Wais, who continued the resistance to the Persian troops.

In the meanwhile difficulties had been raised also in other parts of the kingdom by the Kurds and Uzbegs, while the Arabs of Masḳaṭ seized Baḥrain. The Persians hoped to regain this island with the help of the Portuguese fleet, but the commander-in-chief, Luṭf 'Alī Khān, a brother-in-law of the prime minister, rightly thought it an urgent necessity to suppress the Ghalzai who, under Maḥmūd, had invaded Kirmān. He actually succeeded in defeating the rebels but was prevented from following up his victory by the discontent in Iṣfahān at his abandoning the Baḥrain expedition, and was refused the necessary supplies with which to advance on Ḳandahār. His and the 'Itimād al-Dawla's enemies even took the advantage of the occasion to rouse the Shāh's wrath against them with the result that the prime minister was blinded and Luṭf 'Alī Khān, who had retired to Shīrāz, was thrown into prison. Ḥusain thus prepared for his own downfall, for Maḥmūd immediately occupied Kirmān and advanced with his troops against Iṣfahān. The Ṣafawīds once more collected a considerable army to check the Afghān advance but in the battle of Gulnābād, east of Iṣfahān, the Persians suffered a terrible defeat (1722). Iṣfahān itself was thereupon besieged and, although it held out for a long time as the Afghāns lacked any of the necessary siege artillery — Ṭahmāsp, the Shāh's son had in the meanwhile escaped to Ḳazwīn and Tiflis and was endeavouring to raise a new army with which to relieve the capital — such a terrible famine at length arose in it that Ḥusain was forced to capitulate and resign the Persian throne in favour of Maḥmūd. The unfortunate prince was forced to be a spectator, when some time later, after the Persians had treacherously massacred the Afghan garrison of Ḳazwīn, which Maḥmūd had meanwhile captured, Maḥmūd in revenge instituted a terrible massacre in Iṣfahān and afterwards put to death over a hundred members of the Ṣafawīd family. Maḥmūd then went mad, and Ashraf, a son of the 'Abd Allāh Khān who had been murdered by him, made it a condition that, if he was to succeed to the throne, his father's murderer should be put to death, which was done in 1725. The new Khān Ashraf was comparatively lenient in his treatment of Ḥusain, but Russia and Turkey had been exploiting the unsettled state of Persia to their own advantage and left him no rest. Although he made peace with Turkey in 1727, he had again to take up arms when the general, later famous as Nādir-Shāh, took up Ṭahmāsp's cause that was supported by the Russians. He was repeatedly defeated by Nādir and had to take to flight. In revenge he had the aged Ḥusain put to death in 1729 but was himself murdered by robbers a year later. On Ṭahmāsp's fate and the end of the Ṣafawīd dynasty see the articles NĀDIR-SHĀH and ṢAFAWIDS.

ḤUSAIN 'AWNĪ PASHA, four times War Minister and once Grand Vizier under 'Abd al-'Azīz, one of the most remarkable personalities of his age, was a native of Isparta (wilāyet of Ḳōnya), where he was born in 1820, the son of a tax-farmer. When sixteen he came to Constantinople to study theology but entered the military school in which he ultimately became a teacher of military sciences. On the outbreak of the Crimean War (1853) he entered the army with rank of Lieutenant-Colonel and distinguished himself in the fighting at Kalafat and Četate. At the end of the war he took part in the Mingrelian campaign as chief of the general staff of the *Serdar-i-ekrem* 'Omar Pasha. On the conclusion of the war he became director of the military school; during the war with Montenegro (1862) he commanded a division under 'Omar Pasha; for the next two and a half years (August 1863 till the beginning of 1866) he acted as interim War Minister and was in 1867-1868 entrusted with the suppression of the Cretan revolution; on performing this task, he was promoted to be *mushīr* (general commanding). From the beginning of 1869 till September 1871 he was War Minister in 'Alī Pasha's cabinet; a few days after the latter's death (6th Sept. 1871) he was dismissed by his successor, the notorious Maḥmūd Nedīm Pasha, and banished to Anatolia, recalled from exile in 1872, and sent to Smyrna in November of the same year as walī of the province of Aidīn. The Grand Vizier Mütердjim Muḥammad Rushdī Pasha appointed him the to Ministry of Marine on the 25th January 1873 but he exchanged this for the War Office after a few weeks on the 15th February, when Es'ad Pasha became Grand Vizier. A year later — on the 14th February 1874 — he became Grand Vizier in place of Shirwānīzāde Muḥammad Rushdī, successor of Es'ad Pasha, but continued to hold the portfolio of War Minister. On the 23rd April 1875 he was dismissed from both offices and a few days later sent a second time as walī to Smyrna. By the 22nd August of the same year he was back at the War Office for the third time; a few days later his enemy Maḥmūd Nedīm became Grand Vizier a second time and dismissed him on the 2nd October, to be sent after a few weeks as walī to Brusa. After Maḥmūd Nedīm's fall (13th April 1876) he was again summoned to Constantinople as War Minister and in this office along with Midḥat Pasha supported by Mütердjim Muḥammad Rushdī and the Shaikh al-Islām, Ḥasan Khairullah, brought about the deposition of the Sulṭān 'Abd al-'Azīz (30th May 1876). On the 4th June the dethroned Sulṭān committed suicide; Ḥasan Bey, a Circassian officer devoted to him,

resolved to avenge his death and shot Ḥusain ʿAwnī Pasha in the night of 15th—16th June 1876 in Midḥat Pasha's konak, where he and the other ministers had assembled at a council.

ḤUSAIN DJAHANSŌZ, ʿALĀʾ AL-DĪN the GHŌRID. [See DJAHĀNSŌZ, I. 998b].

ḤUSAIN HAMADHĀNĪ, a Bābī author, who wrote the history of the Bāb, edited by E. G. Browne under the title *The Taʾrīkh-i-Jadīd or New History of Mīrzā ʿAlī Muḥammad the Bāb* (Cambridge 1893). In his office of secretary to a minister Mīrzā Ḥusain accompanied the Shāh on his journey to Europe, spent some time in Stambul and on his return to Persia in 1291 (1874) was thrown into prison but afterwards released. He then entered the service of a Zoroastrian named Mānakdjī (or Mānukdjī) who asked him to write a history of the Bāb. When he had finished this task, he intended to give a full exposition of the Bāb's teaching but was prevented by his death in 1299 (1881-1882). The above information is given by Browne, *op. cit.*, Introduction, p. xxxvii *sqq.* from Tumanski in *Zapiski Vost. Otd. Imp. Arch. Obsh.*, Vol. viii. 33—45. In a later publication, entitled *Kitāb-i Nuqṭatu ʾl-Kāf, compiled by Ḥājjī Mīrzā Jānī of Kāshān* (Gibb Memorial Series, vol. XV), Browne has given a full account of the relationship between the works of Mīrzā Ḥusain and Mīrzā Djānī Kāshānī, Introduction, xxxiv. *sqq.* and *A New History*, etc. p. 339 *sqq.*).

ḤUSAIN MĪRZĀ B. MANṢŪR B. BAIḲARA (Black Prince?), and styled Abu'l Ghāzī. This famous king of Khurāsān was born at Herāt in Muḥarram 842 A. H., June 1438, and reigned there, with one interruption, from Ramaḍān 873 (March 1469), to the last month of 911 (May 1506). He was a distinguished soldier and sovereign, and was a munificent patron of letters. He also attempted poetry, and composed a dīwān, but it does not seem to have been of much value. According to Sām Mīrzā, he is also the author of a book called the *Madjālis al-ʿUshshāḳ*, which is a mixture of prose and poetry, and contains biographies of a number of mystics and spiritual lovers (Rieu's *Catalogue*, I, 351b). But though his name appears on the manuscript as the author, both Bābur in his *Memoirs*, and Khwāndamīr in his *Ḥabīb al-Siyar* (vol. iii. Part 3, p. 330 of Bombay ed.), say that the real author is Kamāl Ḥusain Gāzargāhī. And this seems probable, for if Sulṭān Ḥusain had written the book, he would hardly have put himself at the end of it as one of the mystics, and have described himself. He was of very high birth for he was a direct descendant of Tīmūr, both by his father and his mother (Fīrūza Bēgum). His career resembled that of the emperor Bābur, for he suffered much distress in his early years and afterwards attained to great prosperity. He had contests with Abū Saʿīd and his sons, and it was not until the death of the former that he got possession of Herāt. He was a younger son, and his undistinguished elder brother Bāiḳarā served under him for several years as governor of Balkh. His court was the most brilliant in Asia, and as Bābur says, his Age was a wonderful Age. The poets Djāmī, Hātifī, ʿAlī Shīr, Hilālī, Bannāī, the painters Bihzād and Shāh Muẓaffar, various musicians, and Ḥusain Wāʿiẓ the author of *Anwār-i Suhailī*, ʿAbd Allāh Marwārīd who was a sort of Admirable Crichton, the two historians (grandfather and grandson) Mīr Khwānd and Khwāndamīr, and Dawlat Shāh, the biographer of poets, and the famous calligrapher, Sulṭān ʿAlī of Mashhad, adorned his court.

One of Sulṭān Ḥusain's greatest feats was his long and rapid march to Herāt in August 1470 which resulted in the capture and execution of his competitor Yādgār Muḥammad, a great grandson of Shāhrukh. Sulṭān Ḥusain was a man of passionate character, and a wine-bibber. He divorced his first wife, although she was the mother of his eldest son, and, according to Bābur he was so infatuated with one of his pages that he put his name on his coins. It is the fact that the words Bihbūd appear on his coins, but it is not certain if they refer to the page, whose name and title were Bihbūd Beg. Sulṭān Ḥusain had a large family of sons and daughters, but seven of the sons died in his life time, and the others were, for the most part, no credit to him, and only survived him for a year or two. The eldest, Badīʿ al-Zamān lived the longest, not dying till 1517, when he succumbed to the plague at Constantinople. One of Sulṭān Ḥusain's worst actions was his allowing his wife Khadīdja, to get from him, while under the influence of liquor, a warrant for the execution of his grandchild. His sons rebelled against him, and he was obliged to take the field against them, and defeat them. In his old age, and when suffering much from rheumatism etc., he marched out against Shaibānī and his Özbegs, and died at the village of Bābā Ilāhī. He was buried at Herāt, but according to Colonel Yate's report (*Journ. As. Soc. Bengal*, 1887, p. 98) the tomb cannot now be identified. He was the last of the Tīmūrid kings. His two sons Badīʿ al-Zamān and Muẓaffar reigned together for a short time but were defeated by Shaibānī, and Muẓaffar shortly afterwards died. Muḥammad al-Zamān, the son of Badīʿ al-Zamān, eventually went to India, and after vainly trying, with the help of the Portuguese, to succeed Bahādur Shāh, as king of Gudjarāt, rejoined his brother-in-law Humāyūn, and was drowned at Čawsa, after the battle with Shēr Khān, in 1539.

Bibliography: Dawlat Shāh, *Tadhkira* which contains at the end an account of Sulṭān Ḥusain's feats of arms down to 885 (1480); ʿAlī Shīr, *Madjālis al-Nafāʾis*; Bābur's *Memoirs*, under the year 911 A. H., which gives a full, but not favourable account of Sulṭān Ḥusain and his court; *Rawḍat al-Ṣafā* of Mīr Khwānd, and *Ḥabīb al-Siyar* of Khwāndamīr; Sām Mīrzā's *Biographies of Poets*; *Notices et Extraits*, vol. iv. p. 262 *sqq.*, in which Silvestre de Sacy gives a translation of Dawlat Shāh's account; Ferté, *Vie de Sultan Hussein Baïkara traduite de Khondémir*; ʿAbd al-Razzāḳ, *Maṭlaʿ al-Saʿdain*, vol. II., which gives some new facts about Sulṭān Ḥusain's early career.

(H. BEVERIDGE.)

ḤUSAIN PASHA, better known under the denomination AGHA ḤUSAIN PASHA, or AGHA PASHA,

the son of a certain Ḥādjdjī Muṣṭafā, was born in Adrianople in 1190 (1776) though popular tradition considers Rūsčuk as his birth-place. As his father had moved to Bender he was enlisted there in the 9th band (*bölük*) of the Janissaries and came to Constantinople in 1203 (1788-1789). Later on he took part in the Russian War (1807—1812) and soon occupied a prominent position among the *aghas* (sergeants) of the Janissaries. After having been promoted to the rank of *segbānbashi*, the Grand Vizier, Silāḥdār ʿAlī Pasha, drew the Sulṭān's attention to him and his qualities. As the Sulṭān was just then about to dissolve the Janissary bands and get rid of them in some way, he was on the look-out for a number of energetic men fit and ready to help him in this difficult enterprise. So Ḥusain was made *ḳul-ket̲h̲üdā* on the 10th Rabīʿ II 1238 (25th December 1822) and further *agha* of the Janissaries on the 14th Djumādā II (26th February 1823). The importance of his position enabled him within a few months to get rid of the most dangerous leaders of the band, partly by discharging them into the Provinces, or by using more violent means. For these services he was raised to the rank of Vizier end of 1238, and was henceforward known as Agha Pasha. The Janissaries soon knew him to be their deadly enemy, and in order to protect him against their machinations, the Sulṭān had to dismiss him on the 20th Ṣafar 1239 (26th October 1823). He became governor of Brusa and Izmīd instead, as well as commander of all the forts of the Bosphorus and their garrisons, so that in case of need he could at once be at the Sulṭān's disposal. During the great Janissary insurrection that broke out three years afterwards it was specially Ḥusain's personal bravery and his usual severity that finally broke the resistance of the rebels, so completely that this troop was suppressed (14—16th June 1826). He was rewarded by being promoted and named *serasker* of the newly organised army (*ʿasākir-i manṣūre-i muḥammediye*). In Shawwāl 1242 (May 1827) he handed over charge to the famous Khosraw Pasha and retook the command of the Bosphorus forts. During the Russian War (1828-1829) he figured as commander in chief of the army; he took up his headquarters in the fortified camp of Shumla, and successfully defended this, but could not prevent the Russians from taking the most important forts on the lower Danube. In spring 1829 he was replaced by the Grand-Vizier Reshīd Meḥemmed, and he himself went to Rusčuk as commander (*muḥāfiẓ*); all the same his military operations remained just as unlucky as they had been hitherto. The war once over, he governed the *wilāyet* of Adrianople, but received orders to lead the army against Egypt in 1832. In this campaign his second in command, Meḥemmed Pasha, was beaten in the battle of Ḥamā (9th June), and Ḥusain was severely defeated by Ibrāhīm Pasha in the Pass of Bailān (29th July); owing to this renewed bad military experience he was discharged from his office as general (31st August), but thanks to the fact of his being personally on very good terms with Milosh of Serbia he was sent to Widīn as *muḥāfiẓ* and remained there from the 17th Rabīʿ I 1249 (4th August 1833) till beginning of Febr. 1844. He returned there in the same position beginning of Shawwāl 1262 (October 1846) and kept it till he died on the 2nd Djumādā II 1265 (25th April 1849).

(J. H. Mordtmann.)

ḤUSAIN PASHA, called ʿAmūdja-zāde ('Uncle's son'), a name given him by his cousin Fāḍil Aḥmad Pasha, was the son of Ḥasan Agha, the younger brother of the great Köprülü Meḥemmed Pasha; he grew up in the golden period of the Köprülü and reached the age of thirty without distinguishing himself further than for his attachment to the delights of a life of careless ease. After the defeat of Ḳara Muṣṭafā before Vienna in 1683 and the fall of this grand vizier, who was devoted to the Köprülü, he was sent in disgrace from the capital, first of all as governor of Shahrizūr and a year later as *muḥāfiẓ* (military governor) in Čardaḳ in the Dardanelles, where he spent five years. In Radjab 1100 (April-May 1689) he received the rank of vizier and was sent as *muḥāfiẓ* to Sedd al-Baḥr at the entrance to the Dardanelles. In Shaʿbān 1102 (May 1691) he returned to Constantinople to conduct as *ḳāʾim-maḳām* the affairs of the grand vizier who was absent in the field. He fulfilled the same duties again from Djumādā II till the middle of Shawwāl 1105 (end of January till the 9th June 1694) and then went back to his former post on the Dardanelles. On the 14th Djumādā I 1106 (31st December 1694) he was appointed *ḳapudan pasha* and entrusted with the recapture of Chios which had been occupied by the Venetians. He succeeded in defeating the Venetian fleet in two battles (9th and 18th February 1695) off the Spalmadore Islands in the Bay of Chios, whereupon the Venetians abandoned the island without striking a blow. At the end of Ramaḍān 1106 (middle of May 1695) he resigned his command of the fleet and remained in Chios as *muḥāfiẓ*. In Muḥarram 1107 (Aug.-Sept. 1695) he went as *wālī* to Ḳoniya and Adana; in the early months of 1108 (Aug.-Sept. 1696) he was transferred to Belgrade as *muḥāfiẓ*. The grand vizier Elmās Meḥemmed Pasha fell in the battle of Zenta on the 1st Rabīʿ 1109 (11th Sept. 1697); Ḥusain was appointed his successor and led the defeated army back to Adrianople. In the following year he concluded the fifteen years' war with Austria and its allies — Venice, Russia and Poland — by the treaty of Carlowitz. After holding the reins of government for five years he resigned on the 11th Rabīʿ II 1114 (4th Sept. 1702) in consequence of an incurable disease and retired to his estate at Silivri, where he died on the 29th Rabīʿ of the same year (22nd Sept.). Apart from his attachment to strong waters, with which his country men reproached him, and which earned him the nickname of *sarkhosh* (the drunken), there were no serious defects in his character. A contemporary (Paul Lucas, *Voyage au Levant*, ii. 134) justly says of him: *c'étoit l'homme de tout l'Empire qui l'avoit le mieux servi ... fort honnête homme, et dont tout le monde parloit bien*; the French ambassador Ferriol (Bonnac, *Mémoire historique sur l'Amb. de France*, p. 116) says: *il a gouverné l'empire pendant cinq ans avec tant de modération qu'on a dit que le vizirat était mort avec lui*. He was in fact distinguished not only for probity and magnanimity but also for a rare states-

manship; nor was it mere love of ease but a wise self-restraint when he entrusted the execution of his plans to tried men like Ḥusain Mezzomorto, Rāmī Muḥammad and Alexander Mavrocordato. His memory is not less honoured for the numerous public buildings and institutions which he left behind him in various towns of the empire, notably in Adrianople. His summer-residence (*yālī*) at Anadolu Ḥiṣār on the Bosporus forms one of the sights of the capital and still testifies to the love of splendour and artistic sense of its builder.

(J. H. Mordtmann.)

ḤUSAIN PASHA, called Deli (the dare-devil), a native of Yenishehir in Anatolia, served in the imperial palace as a common wood-cutter till he attracted the attention of Murād IV by an example of his extraordinary physical strength; his rough pranks and witty sallies were no less pleasing to the sulṭān, who after a short time made him his *muṣāḥib* (confidant) and *büyük mīrākhōr* (Master of the Horse). On the 4th Muḥarram 1044 (30th June 1634) he was appointed *ḳapudan pasha* and accompanied the sulṭān on his campaign against Eriwān; on his way back, on the 9th Djumādā I 1045 (21st October 1635), he received the governorship of Egypt, which he held till the 15th Djumādā II 1047 (4th November 1637). On the accession of Sulṭān Ibrāhīm (Shawwāl 1049 = February 1640) he was again appointed *ḳapudan pasha* and soon afterwards on the 22nd Djumādā I 1050 (9th Sept. 1640) *muḥāfiẓ* (military governor) of Oczakow. In the following year he besieged for three months Azow, which had been taken by the Cossacks and then went in late autumn to Bosnia as wālī. In 1054 (1644) we find him for a brief period governor of Baghdād; from there he was transferred in Ramaḍān of the same year (November 1644) as wālī to Budin (Ofen). After the outbreak of the war with Venice he went to Crete as *muḥāfiẓ* of the fortress of Canea, taken on the 17th August 1645, and landed there on the 15th Dhu ʾl-Ḥidjdja 1055 (1st February 1646). In July of the same year he took over the supreme command of the forces in the island, captured the important town of Rhethymnos and conducted the siege of Kandia in the following years but was unable to take this last bulwark of Venetian power. After being thirteen years in the field and having on the one hand assured the success of Turkish arms by his remarkable bravery, and on the other won over the native Greek population to Turkish rule by diplomatic measures, he was recalled towards the end of 1068 (middle of 1658) and on the 14th Shawwāl (15th July 1658) appointed *ḳapudan pasha*. On the 7th Rabīʿ I 1069 (3rd December 1658) he received the governorship of Rūmeli; the grand vizier Köprülü Muḥammad Pasha, who had long been meditating the ruin of Ḥusain, who was hated by him on account of his popularity and because he was a candidate for the highest office in the empire, succeeded by his intrigues in persuading the Sulṭān some months later — in the spring of 1659 — to imprison him in the Seven Towers and have him executed for alleged abuse of his powers.

Bibliography: Naʿīmā, *Taʾrīkh* (particularly ii. 688 *sq.*); Ḥādjdjī Khalīfa, *Fedhleke* and *Taḳwīm al-Tawārīkh*; Kantemir, *History of the Ottoman Empire*, p. 524 *sq.*; v. Hammer, do., Vol. v. and vi.; Zinkeisen, do., Vol. v. and vi. The exact date of Ḥusain Pasha's execution is not given. The year and approximate date — shortly after Djumādā I 1069 (March-April 1659) — are certain from Naʿīmā and Levin Warner's letter of the 22th April 1569 (*De Rebus Turcicis Epistolae ineditae*, p. 57 *sq.*).

(J. H. Mordtmann.)

ḤUSAIN PASHA, surnamed Küčük owing to his diminutive stature, was originally a Georgian slave, who had been offered to Sulṭān Muṣṭafā III by his master, the Silihdār Ibrāhīm Pasha in 1181 (1767-1768). He grew up in the Imperial Serai together with his foster brother, afterwards the Sulṭān Selīm III. When Selīm came to power on the 11th Redjeb 1203 (9. 4. 1789) Ḥusain became his first attendant (*bash čokadār*) and a few years later on the 16th Redjeb 1206 (10th March 1792) he was appointed *ḳapudan pasha* with the rank of a vizier. In accordance with Selīm's plans of reform and with almost unrestricted authority from him, Ḥusain worked hard for the twelve years during which he occupied this post, at the reorganisation of the imperial navy and the arsenal. He succeeded in reorganising the whole Ottoman navy, on the model of the British and the French navies, with the help of foreign technologists, so that he is fully entitled to be called the founder and creator of modern Ottoman naval power. As leader of the fleet he had less occasion to add to his fame. It is difficult to defend the oppressive contributions levied by him on the islands of the Archipelago, during his annual expeditions in the Aegean Sea; these were partly the cause of the Greek insurrection. On the other hand he managed more or less to suppress piracy in these districts; on his first cruise, for instance, he destroyed Lambro Katsoni's (Canzani) filibustering fleet (1792) and even captured this latter's infamous lieutenant, the pirate Karakatsani. Although he knew little or nothing of military matters, he was entrusted in 1212 (1798) with the command of the army sent against the famous Pazwanoghlu of Widdin. Ḥusain Pasha besieged and blockaded him with a fleet of gunboats, but without success, so that he gave up and returned to Constantinople in autumn. In 1800 he spent several months cruising in the waters of Alexandria, and in the following year he united his forces to the British sent to reconquer Egypt. At the beginning of March he landed in the vicinity of Alexandria at the head of 6000 men, mostly Albanians, and joining the British forces, took part in the campaign against the French. As is well known, this expedition ended with the latter's retreat from Egypt. At the beginning of Shaʿbān 1216 (Dec. 1801) he returned to Constantinople, where he was received and celebrated by the people as the reconqueror of Egypt, and covered with honours by the Sulṭān. On the 23rd Shaʿbān 1218 (7th Dec. 1803) Ḥusain Pasha died in Ḳuručeshme (Bosphorus), not yet 46 years of age, in the summer residence of his wife, the Princess Esmā Sulṭān. His mausoleum in Eyyūb was long considered a curiosity of the capital, and became famous as did the epitaph on it composed by the historian Wāṣif (cf. v. Hammer, *Constantinopolis und der Bosporos*, Vol. ii. p. lxviii.; Wāṣif, *Taʾrīkh*, p. 11).

(J. H. MORDTMANN.)

ḤUSAIN PASHA [See MEZZOMORTO.]

ḤUSAIN RAḤMĪ, a notable representative of the modern school of Turkish literature, one of the most widely read if not the most popular Turkish writer of the present day. He owes his eminence to his remarkable sketches of life of the populace which he reproduces in masterly fashion in vivid colours in life-like snapshots which reflect the whole freshness and artlessness of the surroundings. In his work there is a certain connection with the popular art of the storytellers (*meddāḥ*, q. v.) and their masterly skill in imitating the real, rough everyday life of the people, which Raḥmī was the first to introduce into Turkish literature. His scenes from everyday life reproduce the vernacular and form a regular mine for linguistic and ethnographic research with their idioms, the exact wording and meaning of which seems sometimes even to escape the author himself and which will be sought in vain anywhere else. In striking contrast with this natural, realistic style, which assures Raḥmī an abiding importance, is his other style supposed to be distinguished and professing to be cultured, which is a hybrid between the language of journalism and the intolerably involved Turkish official language, the notorious *bāb-i-'ālī ṭarīḳī*, and lowers him to the most ordinary mediocrity. Apart from the composition of his scenes of popular life, the whole of the rest of his artistic technique is on the same level of commonplace mediocrity. In his novels one cannot help receiving the impression of seeing before one's eyes a collection of splendid pictures with a very poor explanatory text.

In spite of his polemical theorising of recent years, Raḥmī does not take his work as an author very seriously. His easily won reputation prevented a strenuous, profitable development of his talent and a thorough and artistic working up of his usually licentious themes. The construction of the plot almost always leaves everything to be desired. The plots are too obvious and awkwardly developed. The endeavour to be didactic in the secondary episodes not unfrequently destroys the artistic effect of the scenes borrowed from the life of the people.

Raḥmī who had studied French models, professes to be a realist, although he condemns Zola as too extreme. His humour, his choice of subject and his method have earned him the not inappropriate name of the Turkish Paul de Kock. An ardent patriotism impels him to emphasise the characteristics of his own people which he vindicates in contrast with the sickly imitation of foreign customs and to lay bare the harm caused by slavish imitation of the pseudo-European in Ottoman society. But he firmly avoids any idealising and does not spare with his humour the old types of Turkish society, whom he draws in contrast to the modern excrescences.

He began his activity as an author with translations from the French of which an example may be seen in vol. iii. of the *Arabat ḳitāb-khānesi djeb romanlari* (Constantinople 1309 = 1891-2), which contains the *Parisde bir izdiwādj* (A Marriage in Paris) and a humorous story by Jules Claretie (*Ḳiz refīḳ-i ḥayāt*) and also a translation of Alfred de Musset's *Frédéric et Bernerette*.

His first independent work devoted to ridiculing the aping of European customs: *Ayna yahūd shīk* (The Looking-glass and the Coxcomb) already shows the true character of his talent. In 1313 (1895) appeared the humorous satirical novel, *Mürebbiye* (The Lady Teacher), 2nd ed. 1325, probably on the whole his best work, which at once made him famous. He boldly attacks the system of education in vogue in Constantinople with its casual governesses, the often very suspicious women teachers. His novel which appeared, like most of his works, in serial form in the *Iḳdām* made a great stir and aroused resentment in all quarters, among conservative people on account of its indecency, among progressives for its apparent hostility to progress, and resulted in a vigorous press campaign against Raḥmī and the *Iḳdām* itself. The humorous collection of letters, *Muṭallaḳa* (The Divorced Woman), 1314 (1896), translated into German by Imhoff Pasha in his pictures of Turkish life, vol. i., is directed against the senseless severity of the Muslim divorce and thus treats of the problem of female emancipation, a very delicate one in Turkey. Friedrich Giese has translated some interesting fragments of the novel *'Iffet* (*Chastity*), which appeared in the same year, as "*Die Volksszenen aus Ḥusēn Raḥmī's Roman* عفت" in *Orientalische Studien Theodor Nöldeke zum 70. Geburtstag gewidmet*, 1906. Next followed *Bir muʿādele-i-sewdā* (Equilibrium of Love). In 1315 (1897) appeared his longest novel *Metres* (The Mistress), which already shows a falling off, in 1316 (1898) *Tesādüf* (Encounter), and in 1319 (1901) *Nimetshināsh*. From *Shīpsewdi* on, the artistic qualities of his novels begin to decrease still more. In *Shīpsewdi* itself the description of the dance of the negress with the Agha, in spite of its eroticism, must be described as a pearl of Raḥmī's descriptive art. His latest works, *Kuʿrably sikhyt altynda bir izdiwādj* (A Marriage among the counts), *Ghūl-i yābānī* (the Ghoul of the Desert), and *Djadi* (The Witch), brought him sharp criticism, particularly from the literary circle of the periodical *Kalem* (Fikret's school), notably from Shihāb al-Dīn. His last work *Djadi ḳarylyry* (the Witch boats), which appeared in 1329 (1910) under the device "Not till the day on which the importance of the purity of our language is recognised, will literature begin" is mere polemic.

Haupt's *Katalog* Nº. 12 (1906), p. xi. *sq.*; Wl. Gordlewski, *Ocerki po novoj osmanskoj Literaturje* (Moscow 1912) p. 75—79. (THEODOR MENZEL.)

ḤUSAIN SHĀH b. MAḤMŪD, last Sulṭān of the independent kingdom of **Djawnpūr** [q. v.], seized the throne of his brother Muḥammad Shāh in 863 (= 1458), when the latter was embarrassed by the invasion of his territories by Bahlūl Shāh, Sulṭān of Dihlī [q. v.]. Ḥusain Shāh made peace with Bahlūl, and agreed upon a truce for four years. A successful campaign in Orissa and another in Gwalior added considerably to his wealth and importance, and in 878 he took advantage of Bahlūl's absence in the Pandjāb to advance upon Dihlī. After an indecisive action, a fresh truce was made, but the conflict between these rival powers was soon renewed, and con-

tinued, with brief intervals of peace, until Bahlōl entered Djawnpūr at the head of a victorious army and established his son Bārbak there as viceroy. Ḥusain Shāh fled to Bihār, but was treated with great generosity by his conqueror, who allowed him to retain a tract of country yielding a revenue of five lakhs a year. Bahlōl died in 894 (= 1488) and was succeeded by his son Sikandar; in 1493 Ḥusain Shāh made a last attempt to recover his kingdom, and collecting a large force marched against Sikandar Lōdī; but he was defeated in the neighbourhood of Benares and fled to Gawr to the court of ʿAlāʾ al-Dīn Ḥusain Shāh, king of Bengal, by whom he was honourably received; he died there in 905 (= 1499), but his body was interred at Djawnpūr, close to the superb Djāmiʿ Masdjid which had been erected during his reign.

ḤUSAIN WAʿIẒ KĀSHIFĪ. [See KĀSHIFĪ.]

ḤUSAINĀBĀD, the name of a town in Bengal, which was a mint of the Kings of Bengal Ḥusain Shāh, Naṣrat Shāh and Maḥmūd Shāh III between the years 899 (1493) and 939 (1532). It is generally supposed to be a name of the capital Gaur [q. v.], bestowed on it by Ḥusain Shāh, but Blochmann held that it was near Gaur but not identical with it. The identity with Gaur does not admit of much doubt, and similar titles (Naṣratābād, Maḥmūdābād) seem to have been bestowed upon the same capital by Naṣrat Shāh and Maḥmūd Shāh. The name Ḥusainābād (or Ḥasanābād) on the copper coins of the Mughal Emperor Shāh ʿĀlam II probably also refers to Gaur.

(M. LONGWORTH DAMES.)

ḤUSAINĪ, plur. Ḥusainiyūn, a name borne by those sherifs of Morocco who trace their descent from al-Ḥusain, son of ʿAlī and Fāṭima, the daughter of the Prophet. Unlike the Ḥasanī [q. v.] the Ḥusainī came at a relatively late date to Morocco, where they in numbers at any rate never attained the importance of their cousins. They form two main groups, the *Ṣiḳiliyūn* and the *ʿIrāḳiyūn*.

The *Ṣiḳiliyūn* (i. e. those who came from Sicily) were driven from their original home by the Norman conquest. They fled first to Spain and thence to Morocco in the reign of the Marīnid Sulṭān Abu 'l-ʿAbbās Aḥmad b. Abī Sālim (end of the xivth century). They trace their descent from al-Ḥusain through ʿAlī al-Riḍā.

The *ʿIrāḳiyūn*, the descendants of al-Ḥusain through Ibrāhīm al-Murtaḍā, left Spain after the conquest of Granada by the Christians and sought refuge in Fās (1492).

Bibliography: al-Ḳādirī, *al-Durr al-sanī*, p. 64 *sqq.*, Fās 1309; Ibn al-Ḳāḍī, *Djadhwat al-Iḳtibās*, Fās, n. d., p. 125; al-Kattānī, *Salwat al-Anfās*, Fās, 1316, ii. 218. (A. COUR.)

ḤUSAINĪ SĀDĀT AMĪR, (RUKN AL-DĪN ḤUSAIN B. ʿĀLIM B. ABI 'L-ḤASAN), born at Guzīv, a village in Ghūr, in 671 (1272), was a famous author and a renowned Ṣūfī poet. He came to Multān and became a disciple of Rukn al-Dīn Abu 'l-Fatḥ (ob. 735 = 1335) the grandson and successor of Bahāʾ al-Dīn *Zakariyāʾ* of Multān (ob. 666 = 1267). He afterwards settled in Herāt where he died, according to the *Nafaḥāt al-Uns*, in 718 (1318), according to the most recent researches however not till 729 (720?). Among his works the following may be mentioned: *Nuzhat al-Arwāḥ* a Ṣūfī work in mixed prose and verse, in which the rules of the spiritual life are explained and illustrated by anecdotes and sayings of holy men; *Zād al-Musāfirīn* "Provisions for travellers", rules of the religious life, illustrated by anecdotes and fables; and many other tracts such as *Kanz al-Rumūz*, *Rūḥ al-Arwāḥ*, *Ṣirāṭ mustaḳīm*, *Sī Nāma*, and *Ṭarb al-Muslimīn*, all of them treating of mystic love.

(M. HIDAYET HOSAIN.)

AL-ḤUSĀM B. DIRĀR AL-KALBĪ, ABU 'L-KHAṬṬĀR, governor of Spain 125—127 (743—745). After Baldj b. Bishr [q. v.] had fallen in battle in 124 (742) and his successor Thaʿlaba b. Salāma had sold the Spanish Anṣārs defeated and taken prisoner by him as slaves for a low price, Ḥanẓala b. Ṣafwān, governor of Ifrīḳiya, sent Abu 'l-Khaṭṭār to Spain as governor. According to Ibn al-Ḳūṭiya and Ibn al-Athīr, this was done at the express command of the Caliph Hishām, after Abu 'l-Khaṭṭār, who hated the Syrians bitterly, had sent him a poem in which he reminded him of the enmity of the Kaisīs. Abu 'l-Khaṭṭār at once set free the imprisoned Arabs and broke the resistance of the Syrians by sending a number of their chiefs to Africa and dividing the rest among various towns and districts in Spain, where they were allotted for their support one third of the harvest which the natives had to pay to the state treasury. But their discontent continued and became dangerous to the governor, when a certain chief named al-Ṣumail [q. v.], who had been personally insulted by him, undertook the leadership of the Syrians and caused the civil war to flame forth again. When Abu 'l-Khaṭṭār met them on the banks of the Guadalete, a portion of his troops failed him so that he had to take to flight and was captured (745). Soon afterwards, however, he was released by some of his followers but a new attempt to face the Syrians had the same lamentable result except that Abu 'l-Khaṭṭār escaped his enemies this time. But he had now to agree to make common cause with Ibn Ḥuraith, who had at first been on the side of his enemies but whose claims to be recognised as Emir of Spain had met with the resistance of al-Ṣumail: Abu 'l-Khaṭṭār had even to grant him precedence. Nevertheless, both were captured in an encounter at Secunda on the Guadalquivir, opposite Cordova, and put to death (130 = 747).

ḤUSĀM AL-DAWLA. [See FĀRIS B. MUḤAMMAD.]

ḤUSĀM AL-DĪN. [See TIMURTĀSH etc.].

AL-**ḤŪT** = the fish, more accurately *al-Ḥūt al-djanūbī* was the name given by the Arabs to the constellation of the Southern Fish the largest star in which is Fomalhaut [q. v.]. *Al-Ḥūt*, however, is also used of the zodiacal sign of Pisces, for which we find in al-Battānī, etc. the dual *al-Samakatān* = the two fishes; Ptolemy uses the plural Ἰχθύες for this sign and Ἰχθὺς νότιος for the former. *Ṣāḥib al-Ḥūt* = Jonah.

Bibliography: Al-Battānī (ed. Nallino), ii. 166, 176, iii. 265, 274; Ḳazwīnī, *Kosmographie* (ed. Wüstenfeld), i. 38, 41; L. Ideler, *Untersuchungen über den Ursprung u. die Bedeutung der Sternnamen*, p. 202 and 284.

(H. SUTER.)

AL-**ḤUṬAIʾA**, 'the dwarf', a nickname originally given in contempt to the Arab poet DJARWAL B. AWS, who belonged to the *Mukhaḍramūn* [q. v.]. His genealogy was despised; he had cause to attach himself sometimes to the ʿAbs clan and sometimes to the Dhuhl. The date of the commencement of his poetical activities is usually antedated in an impossible fashion by literary tradition, he was most probably a younger contemporary of ʿUrwa b. al-Ward [q. v.]. He was converted to Islām but his religion was very superficial. In the reign of Abū Bakr he took part in the *Ridda* [q. v.] rising. His character is very unfavourably described; a low avarice and venality form the main characteristics of his literary career. He wandered among the Arab tribes singing and begging, lavishing extravagant panegyrics on any liberal Maecenas and threatening the less bountiful with lampoons. In ʿOmar's reign he was imprisoned for lampoons directed against Zibriḳān b. Badr. Nothing definite is known of the year of his death. Arab tradition makes him survive into the reign of Muʿāwiya I. Abulfeda (*Annales*, i. 375) even puts the date of his death at 69 = 688 A. D., which is hardly credible. The most probable supposition is that he died about 30 A. H. = 650 (Brockelmann, i. 41). His versatile poetic talent, especially in these two branches of poetry, is highly praised. Later poets mention him as a distinguished predecessor (*Zeitschr. d. Deutsch. Morgenl. Ges.*, xlvi. 41; also Kumait, ed. Horovitz, nº. 4 v. 11, Bahāʾ al-Dīn Zuhair, ed. Palmer, p. 217, 3), philologists of the second and third centuries actively collected his poems, which however even at a very early period (notably by Ḥammād al-Rāwiya) had been corrupted by interpolations. Of the two recensions of his *Dīwān*, that in which unauthentic portions were leniently dealt with by Abū ʿAmr al-Shaibānī and Ibn al-Aʿrābī has survived in its entirety, while Abū Ḥātim al-Sidjistānī's recension in which the elimination of suspicious passages is more strictly performed, has only survived in isolated fragments. The extant manuscripts of the *Dīwān* and the editions based on them give the first recension. The *Dīwān* of Ḥuṭaiʾa was published with an introduction and explanatory notes by the present writer (in vol. 46 and 47 of the *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, and reprint, Leipzig, 1893), and later with Sukkarī's commentary and glosses by the editor, Aḥmad al-Shinḳīṭī (Cairo, Taḳaddum press, n. d.). In addition to the mss. mentioned in the former edition the *Dīwān* (with Sukkarī) also exists in Stambul, Fātiḥ-Library, nº. 3821 (a copy of it in Cambridge, see E. G. Browne's *Handlist* nº. 384); a portion in the Catalogue ʿĀṭif Ef. nº. 2777 (according to Rescher).

Bearers of the name *al-Ḥuṭaiʾa* are also found in later times; so Abu 'l-ʿAbbās b. al-Ḥuṭaiʾa is quoted by Subkī, *Ṭabaḳāt al-Shāfiʿīya*, iv. 234, 2, and an Aḥmad b. al-Ḥuṭaiʾa, *ibid.*, 279, 12 (both in the vith century A. H.)

(I. GOLDZIHER.)

HUTAIM (HETEIM, HATEMI, TEHIMI, HITEM, plur. Hutaimān, Hetēmān), a large tribe of nomads which is scattered throughout the Ḥidjāz, Nadjd and Egypt. Their chief settlements are at Djidda, Liṭh and al-Wadjh; smaller bodies of the Hutaim live near al-Ḥidjr, al-ʿUlā ('Ally), Khaibar (here they are makers of cheese), in the Ḥarrat al-Khaibar (near Khaibar), on the Wādī 'l-Rumma above Medina, where they are neighbours of the Ḥarb, and in the vicinity of Mecca. In Egypt they are found south of Helwān and in considerable numbers in the eastern delta near Zaḳāzīḳ. During the spring after the rainy season many of the Hutaim encamp with their herds of sheep and goats on the islands of the Red Sea at the exit from the Gulf of ʿAḳaba (Nuʿmān [Naamān, Neimān], etc.) and on the west coast of the sea at Abū Shaʿr, where they catch fish, which are numerous there, and tortoises which yield excellent shell.

In Djidda, al-Wadjh, Yanbuʿ, and other ports they sell fish, butter, milk, honey, goats, and sheep to the pilgrims and caravans. The following subdivisions of the Hutaim are mentioned: Ibn Barrak, Ibn Dummuk (min al-Khlaiz), Ibn Djellidān, Halzān, al-Kabid (Gabid), Fehyāt (see Fehyt), al-Khreisāt, al-Mothābara, Bedīwna (on the Djebel Dukhān below al-ʿAlly), Banū Rashīd (numbering about 2000 souls), al-Ferādisa, Ḳeraṭas (al-Wadjh), al-Neimat, al-Thubba or Ibn Simra (Simri, the three latter at Khaibar); also the so-called ʿArab al-Hisās (south of Helwān, very prosperous) and the Banū ʿAiṣ (in the eastern Delta).

The origin of the Hutaim is unknown; they are therefore not regarded as Bedouins and are despised by the Arabs who do not intermarry with them; the Sherārāt [q. v.] so feared for their treachery are held to be related to them; the traveller Rüppel considers them to have come from Yemen. According to legend, the Prophet once visited a camp of the Hutaim where a dog was served up to him as a meal; Muḥammad in anger is said to have forbidden his followers to enter into marriages with them or to eat with them. The travellers Burckhardt, Rüppel, and Wellsted describe them as industrious, kind and hospitable. The Hutaim on the islands of the Red Sea are poor and live under wretched conditions, they dwell partly in caves and caverns; they pay tribute (two dollars a head) to the Ḥuwaiṭāt [q. v.]. The Hutaim in Ḥidjāz and Nadjd are more prosperous than Bedouins usually are. Their camels are of the finest. They are well armed and excellent shots. A portion of the Hutaim pays tribute to the Shammar chief Ibn Rashīd.

Bibliography: C. Ritter, *Erdkunde*, xii. 174—177, 207, 213; xiii. 218, 271—272, 307—311; Ch. M. Doughty, *Travels in Arabia Deserta*, i. 94, 95, 125, 198, 280, 282, 318, 427, 564, 570; ii. 20, 24, 64, 65, 70, 72, 114, 174, 175, 179, 208, 209, 210, 218, 219, 220, 231, 239, 240, 276, 535; M. Freiherr v. Oppenheim, *Vom Mittelmeer zum Persischen Golf*, ii. 118. (J. SCHLEIFER.)

HUWA HUWA, literally "he is he", or "it is it", means:

a. in logic what is represented as entirely identical e. g. "Muḥammad b. ʿAbd Allāh" and "the Prophet". (Peano and the modern logicians express this equation by the sign ═══).

b. in Mysticism the state of the saint whose completed personal unity testifies to divine unity in the world.

al-**ḤUWAIṬĀT** (ḤWEṬAT, ḤAWEIṬĀT, ḤOWEṬAT, HOWEYTAT, HOWADAT, HOWAITAT; sing. Ḥuwaiṭī), an Arab tribe in the northern Ḥidjāz and on the Sinai peninsula; their settlements in the Ḥidjāz reach southwards from al-ʿAḳaba to beyond al-Wadjh; they are neighbours of the Balī [q. v.] and Djuhaina [q. v.] with the latter of whom they are on bad terms. Formerly the Djudhām [q. v.] occupied their settlements.

There is a large settlement of the Ḥuwaiṭāt on the Wādī Maḳnā, where they have many huts and thick palmgroves; they only stay here during the date-harvest. Between ʿAin Ṭuna and al-Muwailiḥ (Moila), a station for pilgrims on the Red Sea, they have good pastures where they encamp during the rainy season with their numerous flocks of sheep and goats. In autumn they live in the oasis Ḳhān al-Ḥadjdj in the neighbourhood of Djebel Ṭubaiḳ, north of Tabūk. In the hot season they go back to Ghamm; here as well as in the little villages in al-Ḥismā near al-ʿAḳaba they tend their extensive date orchards and cultivate their fields of dhura. In Yanbuʿ and other ports they sell butter, milk, goats and sheep to the pilgrims and travellers along the coast; in Nadjd they exchange them for cattle. Many of the Ḥuwaiṭāt are camel-drivers and camel dealers; those in Palestine are traders (particularly among the Bedouins). In Burckhardt's time they carried on a busy trade with Cairo; every year a caravan of over 4000 camels went from the Ḥuwaiṭāt to the Egyptian capital, where they bought wheat, barley and clothing. The Ḥuwaiṭāt are considered descendants of the ancient Nabataeans; according to a common belief among them, they are descended from two brothers of the Ḥarb [q. v.]. The founder of the tribe is said to have been Ḥwēṭ (Ḥuwaiṭ), a native to Egypt, who came to al-ʿAḳaba on a pilgrimage and is buried in al-Ḥismā. Of the ten or twelve subdivisions of the Ḥuwaiṭāt, which were given to him, Burckhardt mentions the following as the most powerful; the ʿOmrān (perhaps identical with the ʿImrān, the present northern neighbours of the Ḥuwaiṭāt al-Tihāma [on the Red Sea]), al-Djāzī (al-Dahasl, probably the Ḥwēṭāt [Kawm] b. Djāzī or Huwaiṭāt al-Saḥḥa in A. Musil, now the most important group in Arabia Petraea, who live in the town of al-Shera and the eastern desert and number nearly 800 families), al-Meṭāʿ and al-Kamāl. C. M. Doughty mentions the following divisions: Allowīn (ʿAlāwīn [ʿAllāwīn]) or Ḥwēṭāt b. Djāzī in Musil, the second main group in Arabia Petraea, 100 families strong, living in al-Ḥismā), Sukkī, Selīm (nomads, probably the Zawāʾida [al-Zaidī] in Musil, who are reckoned to the Ḥuwaiṭāt b. Djāzī), al-Terābīn, Tiāha (al-Tiyāha) and Darāwesha (Darāwsha [b. Darwish], a division of the Ḥuwaiṭāt b. Djāzī). The Terābīn, the most powerful tribe in the country between Bīʾr al-Sebaʿ and al-Nakhl (about 15,000 men) and the Tiyāha, an influential tribe at Bīʾr al-Sebaʿ, who, according to Musil and Jaussen, do not belong to the Ḥuwaiṭāt but are merely their neighbours.

The Ḥuwaiṭāt are a warlike tribe and are feared by the pilgrims for their ambushes (they beset the roads to al-ʿUlā [ʿAlly]). Every year they raid the neighbouring tribes, the Balī, Shammar etc. During the Egyptian campaigns, Muḥammad ʿAlī was only able to subdue them by bestowing annual gifts on their shaikhs. They still receive at the present time considerable gifts in gold, garments, and food from the Turks, particularly in times of political unrest. In 1873 the inhabitants of al-Kerak (north of Maʿān, were defeated by the Ḥuwaiṭāt. In 1877 there was a great battle between them and the people of al-Kerak and al-Shōbak (north of Petra) in which they were again victorious. They levy a yearly tribute of two thalers a head on the Hutaim [q. v.] to whom they grant protection. They also receive tribute from the Sherārāt [q. v.], the people of Taimāʾ, from some emigrants in Djawf al-Sirḥān [q. v.], from the town of Kāf in the Wādī Sirḥān, al-Shōbak (Shawbak, north of Petra), etc. Palgrave estimates the number of Ḥuwaiṭāt, who are under Shammar chiefs, at 20,000. According to al-Batanūnī, their total number is 70,000.

HUWAIZA [See ḤAWĪZA.]

HUWĀRA (Berber HOWĀRA) is the name of one of the most important Berber tribes. It must be confessed that the genealogists are not agreed as to the place which should be allotted to it in the Berber family, quite apart from the legends, which give it a Yemenī origin. The Arabic etymology of the name (*tahawwara*) has given rise to suggestions detailed by al-Idrīsī and attacked by Ibn Khaldūn. The most probable view is that their eponymous ancestor, was descended from Aurīgh, son of Brānes. The tribes and clans of the Huwāra were very numerous; among the most important are the B. Kamlān, the Ghariyān, the Warghā the Zekkāra, the Maslata and the Maḍjra. At the Arab conquest, these tribes, as the Muslim historians inform us, took Tripo-

ṭlānia and the country of Barḳa. Some even settled in the Sahara desert near the Lamṭa and took the name Hoggar (a contraction of Hawwāra, Huwār); they would thus be the ancestors of the modern Tuāreg. Others founded the town of Aghmāt in Southern Morocco. They became converts to Islām but afterwards apostasised; they later zealously adopted the doctrines of the Khāridjīs and shared in all their rebellions, in that of Abū Yazīd also, particularly those who had settled in Ifrīḳiya, Awrās and Serū. They became so weakened by oppression by the Fāṭimid caliph Ismāʿīl al-Manṣūr and later by the Ḥafṣid Emīr Abū Zakariyā, that they played no part in political affairs afterwards. In the xivth century we find them spread all over north Africa, between Barḳa and Alexandria, from Tebessa to Bedja and to the sea, in the valley of the Shelif where they had founded the town of al-Baṭḥā, which has now utterly vanished and between Mascara and Relizane where they had built the Ḳalʿa of the B. Huwāra, the modern Ḳalʿa of the B. Rāshid. One of their families the B. Khaṭṭāb had founded a kingdom in Zīla; on its downfall they founded another in Fezzān, which was destroyed by the Kurd Ḳarāḳūsh, who put the last ruler of this family, Muḥammad b. Khaṭṭāb b. Yaṣliten, to death by torture, in order to gain possession of his wealth. Of those who occupied the central Maghrib Ibn Khaldūn says: (the tribes) graze herds of sheep, but as they are oppressed with taxes they no longer show the pride and independence, which once distinguished them when their armies won bloody victories. Scattered and weakened they are now despised".

(RENÉ BASSET.)

ḤUWWĀRĪN a place on the road from Damascus to Palmyra and Ḥimṣ, about midway between them. It is celebrated as a resort of Yazīd I. The district was inhabited in ʿAbd al-Malik's time by *Nabaṭ*, i. e. natives who were Christians and spoke Aramaic. This remained the case down to the time of the Mamlūks of Egypt. Yazīd died at Ḥuwwārīn and was buried there; this is confirmed by contemporary poetry. The inhabitants still point out a ruin called Ḳaṣr Yazīd, 'Yazīd's castle'. This name is probably only an echo of the literary tradition, according to which there were lasting links between Yazīd and Ḥuwwārīn.

I.

AL-**IBĀḌĪYA**, usually called ABāḌIYA in North Africa, are the followers of ʿAbd Allāh b. Ibāḍ [q. v.]. A few additions may here be made to what has been written in i. p. 3, chiefly with reference to the North African Abāḍīs. The first rising of the Ibāḍīs took place in the last years of the reign of Marwān II, under ʿAbd Allāh b. Yaḥyā Ṭālib al-Ḥaḳḳ and Abū Ḥamza (129 = 747). ʿAbd Allāh had homage paid him in Ḥaḍramūt, then conquered Ṣanʿāʾ and sent Abū Ḥamza to Mecca; the latter defeated the Omayyad governor at Ḳudaid and brought Medina also under his sway. In the following year 130 (748) however, Marwān sent ʿAbd al-Malik Ibn ʿAṭiya against him; Abū Ḥamza was put to flight in the Wādī 'l-Ḳurā, took refuge in Mecca, whither ʿAbd al-Malik followed him, and was taken and executed there after a vigorous resistance. A short time afterwards the Ibāḍī caliph ʿAbd Allāh b. Yaḥyā met the same fate. According to Shahrastānī, ed. Cureton, p. 100, ʿAbd Allāh b. Ibāḍ also took part in this rising but this statement seems to be inaccurate, as Ibn Ibāḍ, according to more reliable statements, died in the reign of ʿAbd al-Malik nearly half a century previously. A second rising under al-Djulandā in ʿOmān in 134 (751—2) was put down by the ʿAbbāsid general Khāzim b. Khuzaima.

In the meanwhile the Ibāḍī movement spread to North Africa; on its vicissitudes there cf. the article ABāḌITES. In Arabia itself it found a hospitable soil in distant ʿOmān and in time became the predominant sect there cf. the article ʿOMĀN. From there it was later brought to Zanzibar.

The Ibāḍīya form a separate community in Islām alongside of the Sunnīs and Shīʿīs and have their own rules of faith and religious laws, which, however, on the whole agree with those of the Sunnīs and only deviate on certain questions. They also recognise the Ḳurʾān and Ḥadīth as the source of religious knowledge, but instead of Idjmāʿ and Ḳiyās they have Raʾy [q. v.]. They show their Khāridjī origin not only on these points but also on the question of the Imāmate, although in a different fashion from the Azraḳīs. We cannot here enter into details of their conception of *walāya*, *barāʾa* and *wuḳūf*, especially as they are not agreed among themselves on them. Al-Shahrastānī, al-Baghdādī, etc. mention a schism of the older Ibāḍīya into 3 or 4 sects; the Ḥafṣiya, the Ḥārithiya, the Yazīdiya and those who admit of an obedience which has not God as its object. In the later history of the community, notably in North Africa, further differences of opinion revealed themselves. Several theological works of their leaders are mentioned in *Fihrist*, p. 182 *sqq*., more about which is given in *Bibliography* to the art. ABāḌITES. The chief source is the work made known by Sachau, *Mittl. des Semin. für orient. Sprachen*, 2th Abteilung ii. 1 *sqq*., and ii. 47 *sqq*., entitled *Kashf al-Ghumma al-Djāmiʿ li-Akhbār al-Umma*.

IBLĪS, the personal name of the Devil. The word is probably a corruption of διάβολος; the native philologists derive it from the root *b-l-s* "because Iblīs has nothing to expect (*ublisa*) from the mercy of God". He is also called *al-Shaiṭān* (Satan), *'Aduww Allāh* (enemy of God) or *al-'Aduww*. *Al-Shaiṭān* however is not a proper name. In the Ḳur'ān he appears mainly in the early history of the world (ii. 32; vii. 10; xv. 31 *sq.*; xvii. 63; xviii. 48; xx. 115; xxxviii. 74 *sq.*) as rebellious at the creation of Adam and as the tempter of Eve in Paradise: After Allāh had formed Adam [*q. v.*] out of earth and breathed the breath of life into him, he issued an order to the angels to bow down before him. The only one who refused to do so was Iblīs, because he, being created of fire, thought it beneath his dignity to pay homage to a being made of earth. He was therefore banished and cursed; but he begged postponement of his punishment till the Day of Judgment; he was granted this as well as power to lead astray all those who are not true servants of God. When Adam and Eve were in Paradise, he tempted them to eat of the fruit of the tree. Muḥammad has here combined two independent myths, the creation of Adam and the temptation of Eve in Paradise. It is to be noted that in the story of the creation, the devil is always called Iblīs; in the story of Paradise, however, al-Shaiṭān, at least when not denoted by a pronoun. The story of Iblīs is based on Christian tradition. In the *Life of Adam and Eve*, § 15 (Kautzsch, *Apokryphen*) it is related that Michael had commanded the angels to worship Adam. The Devil objected that Adam was less important and younger than they; he and his hosts refused and were cast down upon the earth. According to the *Schatzhöhle* (ed. Bezold, p. 15 *sq.* of the Syriac-Arabic text), God gave Adam power over all creatures. The angels thereupon reverenced him, except the Devil, who had become jealous and said: He ought to worship me, who am light and air, while he is only earth. He was therefore cast out of heaven with his hosts; then he was called Satan, Daemon, etc.

Muslim tradition has adorned the Ḳur'ānic account with various features, some well known. The difficulty had first to be overcome that in the Ḳur'ān Iblīs is numbered among the *Djinn* [*q. v.*] as well as among the angels, and these are usually considered two different classes of beings. Zamakhsharī says that Iblīs is only a *Djinnī* and that the name angel in the Ḳur'ān applies to both classes (*Kashshāf* on Sūra xx. 115). But it is also said that Iblīs was an archangel. Others say that the Djinn were a division of the angels, who had to guard Paradise (*al-Djanna*); hence their name (Ṭabarī, *Annales*, i. 80). These Djinn were created of the fire of *Samūm* (Sūra xv. 27) while the angels are created of light (Ṭabarī, *ib.*, p. 81.) In the beginning the Djinn inhabited the earth. But they quarrelled with one another and finally blood was shed. Allāh then sent Iblīs who, at that time, bore the name of 'Azāzīl or al-Ḥārith, with a troop of angels against the brawlers who were driven back into the mountains. According to other accounts however, Iblīs was one of the earthly Djinn and was brought back a prisoner to heaven by the angels sent by Allāh to punish the unruly Djinn; he was still quite young at this time (*ib.*, p. 84). The name al-Ḥakam is also given to Iblīs before his fall, as Allāh had appointed him judge over the Djinn, he filled this office for 1000 years. He then became vain of the name and created unrest among the Djinn, which lasted another 1000 years. Allāh then sent fire which consumed them; but Iblīs took refuge in heaven and remained a faithful servant of Allāh till the creation of Adam (*ib.*, p. 85; Mas'ūdī, *Murūdj*, i. 50 *sqq.*)

But there are other traditions about the pride of Iblīs. Ṭabarī (*ib.*, p. 83) relates that he felt himself superior to the other angels, whereupon Allāh said: "I will create a *khalīfa* on earth" (Sūra ii. 28); Ṭabarī (*ib.*, p. 79 *sq.*) further says that Iblīs was one of the archangels and ruled over the Djinn on earth and in the lowest heaven. He then became rebellious and was called *Shaiṭān radjīm* by Allāh.

In the discussion of the story of Paradise in Tradition it is related how Iblīs obtained access to Paradise. The view, also found in Christian authors, is generally prevalent that he made use of a serpent for this purpose. According to some authorities, he tried all the animals in vain; according to others, he began with the peacock, which he once saw at the gate of Paradise. He promised to tell him three words which would protect him from death on condition that he let him enter. But the peacock would not and told his experience to the serpent. The latter allowed Satan to sit between its teeth (according to others in its belly) and carried him in. The serpent was on intimate terms with Eve; and Satan now talked out of its mouth. He told the woman of the fruit of the tree which gave immortality, as an angel had told him. When Eve had gone to the tree, Iblīs appeared in the form of an angel. According to others, he brought her the fruit of the tree himself, with the well-known result. Iblīs, Adam, and Eve were banished from Paradise and cursed. (The Ḳur'ān places the banishment of Iblīs after the story of the creation). The serpent, previously a beautiful quadruped was condemned to crawl upon its belly. Iblīs was granted postponement of his punishment. Henceforth he had to live in ruins, tombs and filthy places. His food is flesh offered to idols, his drink wine, his pastimes music, dancing, and poetry. His descendants are seven times more numerous than those of men.

In the end Iblīs shall be thrown into hell-fire with his hosts and the damned among men. „Then shall they (the idols) be thrown into it (i. e. into hell) as well as those who have been seduced and the hosts of Iblīs". (Sūra, xxvi. 94 *sq.*). The phraseology of this verse recalls Matthew, xxv. 41: "Then shall he say also unto them on the left hand: Depart from me, ye cursed, into everlasting fire prepared for the devil and his angels".

But in the meanwhile he plays many a trick on men, and leads them astray except the believers

(Sūra, xxxiv. 19). The *hātif* [q. v.] so frequently mentioned in Arabic literature is often simply the voice of Iblīs. For example, he is said to have warned ʿAlī in this way not to wash the Prophet's corpse; another *hātif* then brought the Prophet's son-in-law into the right course again (Thaʿlabī, *Ḳiṣaṣ*, p. 44).

Allāh once granted John the Baptist an interview with Iblīs. He asked the Evil One, when he had the greatest influence on men and the answer was: "when they have eaten and drunk their fill". John thereupon resolved never to reach this stage.

On his propagation it is said that he lays two eggs as often as he rejoices over the rebelliousness of the children of Adam and young are born from these eggs. It is also said that he has both male and female organs and impregnates himself.

IBN (A.), Son.

IBN ʿABBĀD, Abu 'l-Ḳāsim Ismāʿīl b. ʿAbbād b. al-ʿAbbās b. ʿAbbād b. Aḥmad b. Idrīs al-Ṭālaḳānī, vizier of the two Būyids Muʾaiyid al-Dawla and Fakhr al-Dawla, born in Dhu 'l-Ḳaʿda 326 (September 938). His father had been Rukn al-Dawla's vizier; he himself received the name 'al-Ṣāḥib' (the companion) on account of his relations with Abu 'l-Faḍl b. al-ʿAmīd [v. ibn al-ʿamīd] or Muʾaiyid al-Dawla, who appointed him his secretary. After the fall of Abu 'l-Fatḥ b. al-ʿAmīd [v. ibn al-ʿamīd] he was raised to the rank of vizier and when Muʾaiyid al-Dawla died in 373 (984) and the power passed to Fakhr al-Dawla, the latter confirmed him in his office. He held the grand viziership till his death and during his long tenure of office exercised a very great influence over Fakhr al-Dawla. In 377 (987-8) he undertook an expedition to Ṭabaristān, arranged affairs there and captured several fortresses. Ibn ʿAbbād died in al-Raiy in Ṣafar 385 (March 995) and was buried in Iṣfahān.

(K. V. Zetterstéen.)

IBN ʿABBĀD, Abū ʿAbd Allāh Muḥammad b. Abī Isḥāḳ Ibrāhīm b. Abī Bakr ʿAbd Allāh b. Mālik b. Ibrāhīm b. Muḥammad b. Mālik b. Ibrāhīm b. Yaḥyā b. ʿAbbād al-Nafzī al-Ḥimyarī al-Rundī, generally known as Ibn ʿAbbād, a lawyer, mystic poet, and preacher, was born in 733 (1332-3) in Spain at Ronda, where he spent his youth, learned the Ḳurʾān by heart at the age of seven and began to study language and law. He then went to Fās and Tlemcen to complete his studies. He returned to Morocco, settled at Salā where he studied under Aḥmad b. ʿĀshir; on the latter's death, after spending some time at Tangier under the Ṣūfī Abū Marwān ʿAbd al-Malik, he was brought to Fās and entrusted with the post of *khaṭīb* at the mosque of al-Ḳarawiyīn, which he held for fifteen years, i. e. till his death on Friday 3rd Radjab 792 (= 17 June 1390). He was buried inside the Bāb al-Futūḥ.

Among his teachers we may mention al-Sharīf al-Tilimsānī, al-Maḳḳarī, grandfather of the author of the *Nafḥ al-Ṭīb*, Abū ʿAbd Allāh al-Maḳḳarī, and among his pupils Yaḥyā al-Sarrādj, al-Khaṭīb b. Ḳunfudh and Abū ʿAbd Allāh b. al-Sakkāk are specially noted.

A Ṣūfī of the order of al-Shādhilī, Ibn ʿAbbād is best known by his commentary on the *Ḥikam* of Ibn ʿAṭāʾ Allāh al-Iskandarī (*Ghaith al-Mawāhib al-ʿaliya Sharḥ al-Ḥikam al-ʿAṭāʾiya*) published at Būlāḳ in 1285 and at Cairo in 1303, 1306.

Bibliography: Ibn al-Ḳāḍī, *Djadhwat al-Iḳtibās*, Fās 1309, p. 200; al-Kattānī, *Salwat al-Anfās*, Fās 1316, ii. 123; Aḥmad Bābā, *Nail al-Ibtihādj*, Fās 1317, p. 287; do., *Kifāyat al-Muḥtādj* (ms. of the Medersa of Algiers), fº. 145 vº.; Maḳḳarī, *Nafḥ al-Ṭīb*, Cairo 1302, iii. 175.

(Moh. Ben Cheneb.)

IBN AL-ABBĀR, Abū Djaʿfar Aḥmad b. Muḥammad al-Khawlānī, Arab poet, lived at Seville and died in 433 (1041-1042). Besides a *Dīwān*, there should, according to Ḥādjdjī Khalīfa, be ascribed to him four works usually attributed to the author of the *Takmila* and of the *Ḥullat al-Siyarāʾ* [see next art.].

Bibliography: Ibn Khallikān, *Wafayāt*, Cairo 1310, i. 44; al-Ḍabbī, *Bughyat al-multamis*, p. 132, nº. 352; Codera *al-Muʿdjam* (*Bibl. arab.-hisp.*, IV), *Introduction*, p. XIV; Boigues, *Ensayo bio-bibliográfico*, p. 409; Ḥādjdjī Khalīfa, *Lexicon bibliogr.*, ed. Flügel, Nº. 934, 2165, 2846, 5130. (Moh. Ben Cheneb.)

IBN AL-ABBĀR, Abū ʿAbd Allāh Muḥammad b. ʿAbd Allāh b. Abī Bakr b. ʿAbd Allāh b. ʿAbd al-Raḥmān b. Aḥmad b. Abī Bakr al-Ḳuḍāʿī, an Arab historian, a scion of the Ḳuḍāʿī's settled in Onda, their ancestral estate in Spain, born at Valencia in Rabīʿ II, 595 (Febr. 1199), was a pupil of Abū ʿAbd Allāh b. Nūḥ, Abū Djaʿfar al-Ḥaṣṣār, Abu 'l-Khaṭṭāb b. Wādjib, Abu 'l-Ḥasan b. Khaira, Abū Sulaimān b. Ḥawṭ, Abū ʿAbd Allāh Muḥammad b. ʿAbd al-ʿAzīz b. Saʿāda etc.

For over twenty years he was on the closest terms of intercourse with the principal traditionist of Spain, Abu 'l-Rabīʿ b. Sālim, who induced him to complete the *Ṣila* of Ibn Bashkuwāl. He was also secretary to the governor of Valencia, Abū ʿAbd Allāh Muḥammad b. Abī Ḥafṣ b. ʿAbd al-Muʾmin b. ʿAlī, and afterwards to his son Abū Zaid, and lastly to Zaiyān b. Mardanīsh. When Don Jayme, king of Aragon, besieged Valencia in Ramaḍān 635 (April—May 1238), Ibn al-Abbār travelled with an embassy to the Sulṭān of Tunis, Abū Zakariyā Yaḥyā b. ʿAbd al-Wāḥid b. Abī Ḥafṣ, to give him a document, by which the governor and people of Valencia recognised the suzerainty of the Ḥafṣid kingdom. He met Abū Zakariyā on the 4th Muḥarram 636 (17th August 1238) and recited to him a poem rhyming in *sīn*, in which he appealed for help for the Muslims. Soon after his return to Valencia, only a few days before or after the capture of the town by the Christians in Ṣafar 636 (Sept.—Oct. 1238) he sailed with his whole family to Tunis. According to Ibn Khaldūn, he went straight to Tunis, while

al-Ghubrīnī assures us that he went first to Bougie and taught there for a time. The Sulṭān of Tunis received him graciously and appointed him his secretary, with the duty of writing the king's style and titles immediately under the *basmala* in his edicts. But soon afterwards this office was taken from him and given to Abu 'l-'Abbās al-Ghassānī, who was a matchless expert in Eastern calligraphy, which the Sulṭān preferred to the Maghribī hand. Ibn al-Abbār felt this insult deeply but continued in spite of all warnings to place the king's title upon the documents, which had been drawn up by him. Confined to his own house, he composed an *I'tāb al-Kuttāb* which he dedicated to the Sulṭān. The latter pardoned him and restored Ibn al-Abbār to office, mainly through the intervention of his son al-Mustanṣir. After Abū Zakariyā's death his successor al-Mustanṣir made Ibn al-Abbār his trusted adviser, but the latter so offended the king and his courtiers by his behaviour that he was finally put to torture. Among his confiscated writings was found a satire against the Sulṭān, which so enraged the latter that he ordered its author to be slain by spear-thrusts. Ibn al-Abbār died on Tuesday morning, 20th Muḥarram 658 (6th January 1260) and on the following day, his body was burned along with his books, poems, and other products of his studies on one funeral-pyre. Ibn al-Abbār, who was called *al-Fa'r* (the mouse) for some unknown reason, composed a number of works on history, tradition, literature, and poetry, of which only the following have survived: 1. *Kitāb al-Takmila li-Kitāb al-Ṣila* (ed. Codera, Madrid 1889); 2. *al-Mu'djam fī Aṣḥāb al-Ḳāḍī al-Imām Abī 'Alī al-Ṣadafī* (ed. Codera, Madrid 1886); 3. *Kit. al-Ḥulla al-Siyarā'* (one part publ. by Dozy, Leiden 1847—1851, another by Müller in *Beitr. zur Gesch. der westl. Araber*, München 1866—1878); 4. *Tuḥfat al-Ḳādim* (Casiri, *Bibl. Arab.-Hisp.*, I, Nº. 354, 2; Derenbourg, *Les man. arab. de l'Escurial*, Nº. 356, 2); 5. *I'tāb al-Kuttāb* (Casiri, *o. c.*, Nº. 1726).

(MOH. BEN CHENEB.)

IBN 'ABD AL-ḤAKAM, 'ABD AL-RAḤMĀN B. 'ABD ALLĀH B. 'ABD AL-ḤAKAM B. A'YAN, ABU 'L-ḲĀSIM, the earliest Arab historian of Egypt whose work has survived, was a member of a notable Egyptian family. His father, 'Abd Allāh (died 214 = 830), was very learned in tradition and jurisprudence, and the author of books in these fields; he was the head of the Mālikite school in Egypt, and was also associated with the Ḳāḍī as censor of witnesses. His four sons were all men of importance: Muḥammad, widely celebrated as a jurist and author, and his father's successor as leader of the Mālikites of Egypt; 'Abd al-Ḥakam, and Sa'd, also renowned (especially the former) for their learning; and 'Abd al-Raḥmān. The family suffered in the persecution under al-Wāthiḳ, refusing to subscribe to the doctrine of the created Ḳor'ān; later, in the year 237, they became permanently disgraced in the community because of an embezzlement which was proved against them (al-Kindī, ed. Guest, p. 462 *sqq.*, 472, 1 *sqq.*).

'Abd al-Raḥmān (generally known as Ibn 'Abd al-Ḥakam) died at al-Fusṭāṭ in 257 (871). He was mainly interested in tradition and made extensive collections based on the principal Egyptian authorities, of whom his father was one. His chief work was the *Futūḥ Miṣr*, in seven Divisions, as follows: 1. Egypt, and its ancient history; 2. The Muslim conquest; 3. The *Khiṭṭa*'s of al-Fusṭāṭ and al-Djīza, and the *Ikhṭiṭā*'s of Alexandria; 4. Organization and administration of Egypt under 'Amr b. al-'Āṣ, and the extension of the conquest beyond Egypt to the south and west; 5. The conquest of North Africa after the death of 'Amr, and the conquest of Spain; 6. The Ḳāḍīs of Egypt, down to the year 246; 7. Egyptian traditions derived from the Companions of the Prophet who came to Egypt. The manner of the whole compilation shows its author to have been an expert collector of traditions and not very critical of his material. His chief interest was in the period of the Companions and their immediate successors; hence in his treatment of the ḳāḍīs he gives much space to the earliest, but less and less to the later ones down to his own day; hence also in his important chapter on the khiṭṭas the formal tradition holds a subordinate place, and he simply collects whatever information he can find.

The work of Ibn 'Abd al-Ḥakam was extensively used by the early historians of Egypt. Among the later works, Suyūṭī's *Ḥusn al-Muḥāḍara* is in large part a transcript of it, and it furnishes Maḳrīzī with many chapters; in both cases the text quoted is much inferior to the original. Yāḳūt cites it *in extenso* for a considerable part of his Egyptian material. See further the Introduction to the edition of the *Futūḥ Miṣr* now (1914) being published in the Gibb Memorial Series, London.

There are mss. of the work in the British Museum, Paris (2), and Leiden (an abridgment). Partial translations have been made by Ewald (*Zeitschr. f. Kunde d. Morgenl.*, iii. 3, 1840, p. 336—352), de Slane, Karle, Jones, La Fuente, and Torrey (in *Bibl. and Semit. Studies*, New York, 1901, p. 279—330); see Brockelmann, *Gesch. d. arab. Litt.*, with the Nachträge.

Bibliography: Ibn Khallikān (ed. Wüstenfeld), nos. 322, 582 (Trans. de Slane, ii. 14, 598); *Ḥusn al-Muḥāḍara* (Bibliogr.), i. 134, 136, 206; Abu 'l-Maḥāsin, i. 629; Wüstenfeld, *Geschichtschreiber* nº. 63; Dozy, *Recherches*, 3e éd., p. 36 *sq.*; Brockelmann, *Geschichte d. arab. Litteratur*, i. 148, ii. 692; al-Kindī, ed. Rhuvon Guest, Introd., p. 22 *sqq.* (C. C. TORREY.)

IBN 'ABD RABBIHI, AḤMAD B. MUḤAMMAD ABŪ 'OMAR, a Spanish Arab author, born 10th Ramaḍān 246 = 29th Nov. 860 in Cordova, a freedman of the Umaiyads ruling there, died 18th Djumādā I 328 = 3rd March 940. His principal work is the anthology *al-'Iḳd* (the addition *al-*

farīd was made by later copyists); it is divided into 25 books, which are called after jewels: the 13th book is called *al-Wāsiṭa* and the corresponding pairs on either side of it are called after the same jewels, in the second part with the addition of *al-thāniya*. The matter is taken from the usual *adab* books, the *'Uyūn al-Akhbār* of Ibn Ḳutaiba being particularly made use of; the *ṣāḥib* Ibn 'Abbād [q. v.] is said to have rejected the book as it disappointed his expectation of finding Spanish history in it. It was printed at Būlāḳ 1293, Cairo 1302, 1305, 1317, 1321. Among his poems, of which al-Ḥumaidī was acquainted with more than 20 volumes, there were *Muwashshaḥāt* and a group which he called *Mumaḥḥiṣāt*; they were the love poems of his youth, to which he added in his old age concluding verses of ascetic tenor in the same metre and rhyme.

Bibliography: al-Tha'ālibī, *Yatīmat al-Dahr*, i. 412—436; Ibn Khāḳān, *Maṭmaḥ al-Anfus*, Stambul 1302, p. 51—53; Yāḳūt, *Irshād al-Arīb*, ed. Margoliouth, ii. 67—72; Ibn Khallikān, Būlāḳ 1299, Nº. 45; al-Suyūṭī, *Bughyat al-Wu'āt*, p. 161; Wüstenfeld, *Die Geschichtschreiber d. Araber*, Nº. 107; M. Hartmann, *Das arab. Strophengedicht* i. *Das Muwashshaḥ*, p. 23; Brockelmann, *Gesch. d. ar. Litt.*, i. 154. (C. Brockelmann.)

IBN 'ABD AL-WAHHĀB. [See Muḥammad.]

IBN 'ABD AL-ẒĀHIR, Muḥyī 'l-Dīn Abū 'l-Faḍl 'Abd Allāh b. Rashīd al-Dīn Abū Muḥammad 'Abd al-Ẓāhir b. Nashwān al-Sa'dī al-Rawḥī, born in Cairo on the 9th Muḥarram 620 = 1223, and died there in 692 = 1292 (*Durrat al-Aslāk fī Daulat al-Atrāk*, *Orientalia*, ii. 1846, p. 285; Wüstenfeld, *Geschichtschreiber*, Nº. 366). Not much is known about his life but he played an important part under the three Baḥrī Mamlūks al-Malik al-Ẓāhir Baibars, al-Manṣūr Ḳalā'ūn and al-Ashraf Khalīl as private secretary, *Kātib al-Sirr* or *Ṣāḥib Dīwān al-Inshā'* (on this office see Maḳrīzī, *Khiṭaṭ*, i. 402; ii. 225 *sq.*; Quatremère, *Histoire des Sultans Mamlouks par Makrizi*, ii. 2, p. 222, Note 40, and 317 *sqq.*). According to some he was the first holder of this office, though others say his son; in other sources the office is said to be much older (see Moberg's work quoted below p. xiii. *sq.*) and he is said to have succeeded Ibn Luḳmān in 678 in the reign of Ḳalā'ūn (Quatremère, ii. 1, p. 7, 27). In this office he had to read all letters coming in and to compose all important letters and documents; he seems to have performed these tasks even in the reign of Baibars, for in 661, when Baibars took the oath of fealty to the Caliph, Ibn 'Abd al-Ẓāhir was present and composed the caliph's *khuṭba* (Quatremère, i. 1, p. 150, 183; Casanova, p. 495); in 662 he drew up the *taḳlīd* by which al-Malik al-Sa'īd was installed as heir-apparent (Quatremère, i. 1, p. 241), and later he drew up the marriage contract between him and Ḳalā'ūn's daughter (*op. cit.*, i. 2, p. 132); he also wrote the *taḳlīd* which declared Ḳalā'ūn's son as heir-apparent (*op. cit.*, ii. 1, p. 26). In 666 he was with an Emir in 'Akkā to receive the commandant's oath of fealty, but without success (*op. cit.*, i. 2, p. 57) and he looked after the affairs of state when Ḳalā'ūn's son was governor during his father's journey (Casanova, p. 495). He spent some time in Damascus (Maḳrīzī, *Khiṭaṭ*, ii. 324).

The *Annals* which he compiled on the reigns of the three Sulṭāns above mentioned are of great importance. The biography of Baibars (Part i. to 663, Brit. Mus., Nº. 1229) was used by Maḳrīzī and al-'Asḳalānī, *Kitāb Ḥusn al-Manāḳib* (Moberg, p. xvii *sq.*) and al-Nāṣir Shāfi' made an excerpt from it (Casanova, p. 499 *sq.*). The history of Ḳalā'ūn is traced from 681 till his death and official documents are given (Casanova, p. 502). We only possess a third of the biography of al-Ashraf (years 690-691), published by Moberg except some waḳf documents (see Bibl.). Of importance also is his *Kitāb al-Rawḍa al-bahiya al-ẓāhira fī Khiṭaṭ al-Mu'izziya al-Ḳāhira* (Ḥadjdjī Khalīfa, ii. 147; iii. 161, 499), which Maḳrīzī made great use of in his *Khiṭaṭ* chiefly for archaeology (Becker, *Beiträge zur Gesch. Ägyptens unter dem Islam*, p. 23, 30; Guest in *Journ. Roy. As. Soc.*, 1902, p. 120, 123). His *Tamā'im al-Ḥamā'im* treats of carrier-pigeons (Maḳrīzī, *Khiṭaṭ*, ii. 231 Quatremère, ii. 2, p. 118, Note 49; Casanova, p. 505). For his other works see Brockelmann.

His son Fatḥ al-Dīn b. 'Abd al-Ẓāhir is also mentioned as *Kātib al-Sirr* and seems to have attained an even higher position than his father in this capacity (Maḳrīzī, *Khiṭaṭ*, i. 226; Casanova, p. 497). He died before his father in 691.

Bibliography: Axel Moberg, *Ur 'Abd Allāh b. 'Abd az-Ẓāhir's Biografi över Sultanen el-Melik al-Aśraf Ḫalīl*, Lund 1902 (Dissert., arab. Text, Swedish transl. and Introd.); P. Casanova in *Mémoires publiés par les membres de la mission archéologique au Caire*, vi. p. 495—505; Abu 'l-Maḥāsin al-Taghribirdī, ed. Juynboll, ii. 411, 415, 482; Brockelmann, *Gesch. der arab. Litt.*, i. 318 *sq.*

(J. Pedersen.)

IBN 'ABDŪN, Abū Muḥammad 'Abd al-Madjīd Ibn 'Abdūn al-Fihrī, a Spanish Arab poet, born in Evora, whose poetical talent early attracted the attention of the governor of Evora, 'Omar al-Mutawakkil Ibn al-Afṭas, and when the latter became ruler of Badajoz [see i. 178b *sq.*] he became his secretary in 473 (1080). The fall of the Afṭasid kingdom in 485 (1092) forced him to enter the service of Sīr b. Abī Bakr, leader of the Arab troops. We afterwards find him again as secretary at the court of the Almoravid 'Alī b. Yūsuf in 500 (1106). He died in his native town Evora in 520 (1126). Ibn 'Abdūn owes his fame chiefly to a poem, much admired by the Arabs, entitled *al-Bashshāma* and dealing with the fall of the Afṭasids. 'Abd al-Malik b. 'Abd Allāh al-Ḥaḍramī wrote a historical commentary on it. The latter is known as Ibn Badrūn and was born in Silves and was still alive in 608 (1211) but nothing further is known of him. This commentary with Ibn 'Abdūn's poem was published by Dozy in 1846 under the title *Commentaire historique sur le poème d'Ibn Abdoun par Ibn Badroun*; Hoogvliet had previously published *Prolegomena ad editionem celebratissimi Aben Abduni poematis in Interitum Aphtasidarum inceptam*, Leiden 1839. The text of the poem itself is also given in al-Marrākushī's history, ed. Dozy, p. 53 *sqq.*; there is a French transl. by Fagnan and a Spanish by Pons Boigues (see Bibl.). 'Imād al-Dīn Ibn al-Athīr [q. v.] also wrote a commentary on it.

Bibliography: The Arabic sources are detailed in Dozy's preface to his edition already

mentioned, in Brockelmann, *Gesch. der arab. Litt.*, i. 271, and Pons Boigues, *Ensayo bio-bibliogr.*, p. 190 *sqq.*, 260 *sqq.* (on Ibn Baḥīla).

IBN ABĪ 'ĀMIR. [See AL-MANṢŪR.]

IBN ABĪ 'L-'AWDJĀ', 'ABD AL-KARĪM, uncle on his mother's side of the celebrated Ma'n b. Ṣā'ida, a crypto-Manichaean, who was taken prisoner by Muḥammad b. Sulaimān governor of Kūfa and afterwards put to death in 155 (772) by him without the Caliph's authority, for which some sources say the governor was dismissed. When he was being led to death he is said to have boasted that he had invented 4000 traditions which were contradictory to the prescriptions and prohibitions of Muslim law. He is said, for example, to have invented in the name of Dja'far al-Ṣādiḳ [q. v.] a calculation of the commencement of the fast in the month of Ramaḍān, although the law is well known to lay it down that the exact moment for its commencement is not till the new moon has been seen. Among the Shī'is however the period of the new moon is fixed by calculation. Cf. *Zeitschr. der Deutsch. Morgenl. Gesellsch.*, lxviii, 406.

Bibliography: Ṭabarī, ed. Leiden, iii. 375 *sq.*; *Fihrist*, p. 338; al-Bīrūnī, *Chronology of Ancient Nations*, p. 80 (text 67 *sq.*); al-Shahrastānī, transl. von Haarbrücker, ii. 410; al-Baghdādī, *al-Farḳ baina 'l-Firaḳ*, ed. Muḥ. Badr, p. 255 *sq.*; Horten, *Die philosoph. Systeme*, etc., p. 155.

IBN ABĪ DĪNĀR, ABŪ 'ABD ALLĀH MUḤAMMAD B. ABI 'L-ḲĀSIM AL-RU'AINĪ AL-ḲAIRAWĀNĪ, an Arab historian, wrote a history called *al-Mūnis fī Akhbār Ifrīḳiya wa Tūnis* in 1110 (1698) or according to a statement in a manuscript in 1092 (1681). As he mentions in the preface the work falls into eight divisions; the first contains the description of Tunis, the second of Ifrīḳiya, the third of the conquest of Ifrīḳiya by the Muslims, the fourth the history of the 'Ubaidis, the fifth that of the Ṣinhādja, the sixth that of the Banū Ḥafṣ, the seventh and eighth the history of Turkish rule. The final chapter discusses the latest events in Tunisia. The book was printed in Tunis in 1286 A. H. and translated into French by Pellissier and Rémusat, Paris 1845.

Bibliography: Roy, *Extr. du Catal. des Manuscrits de la Bibl. de la Grande Mosquée de Tunis* (Tunis 1900), n°. 4960, p. 50; Brockelmann, *Gesch. d. arab. Lit.*, ii. 457.

(RENÉ BASSET.)

IBN ABI 'L-DUNYĀ, ABŪ BAKR 'ABD ALLĀH ('UBAID ALLĀH) B. MUḤAMMAD AL-ḲURASHĪ, Arab author, born 208 = 823, tutor of the 'Abbāsid Caliph al-Muktafī, died 14th Djumādā II 281 = 21st Aug. 894. Of his numerous works which were all devoted to Adab the following have survived: 1) *al-Faradj ba'd al-Shidda*, modelled on al-Madā'inī's work of the same title, in Berlin (see Ahlwardt, *Verzeichnis der ar. Hdss. der Kgl. Bibl.*, N°. 8731), Damascus Ẓāhiriya s. Ḥabīb al-Zaiyāt, *Khazā'in al-Kutub fī Dimashḳ wa-Ḍawāḥīhā* (Cairo 1902), p. 30, N°. 20, 2, printed in India 1323, reprinted Cairo n. d.; al-Suyūṭī's epitome, *al-Aradj fi 'ntiẓār al-Faradj*, in which other sources however were also used has been printed along with Ibn Kadīb al-Bān's *Ḥall al-'Iḳāl* under the title, *Tuḥfat al-Muhadj bi-Talwīḥ al-Faradj*, Cairo 1317. 2) *Kitāb al-Ashrāf*, Vol. 2, Damascus, *op. cit.*, p. 40, N°. 132, 2. 3) *Makārim al-Akhlāḳ*, in Berlin, s. Ahlwardt, *op. cit.*, N°. 5388 (vgl. N°. 5436, 2), and in the Brit. Museum, Or. 7595, s. *A descriptive List of the Arabic Mss. acquired by the Trustees since 1893*, London 1912, p. 64. 4) *Kitāb al-Aẓama*, The Wonders of Creation, in Vienna, s. (C. BROCKELMANN.)

IBN ABĪ ḤADJALA, AḤMAD B. YAḤYĀ ABU 'L-'ABBĀS SHIHĀB AL-DĪN AL-TILIMSĀNĪ AL-ḤANBALĪ, an Arab poet, an imitator of 'Omar b. al-Fāriḍ, born in 725 = 1325 in Tlemcen, settled in Cairo after making the pilgrimage and died of the plague as superior of the Ṣūfī monastery founded by Mandjak, on the 20th Dhu 'l-Ḳa'da 776 = 2nd May 1375. Of his works that have survived (detailed in Brockelmann, *Gesch. d. arab. Litt.*, ii, 13), the following are printed: 1. *Dīwān al-Ṣabāba*, a history of celebrated lovers with a selection of erotic poems, Cairo 1279, 1291, 1305 and on the margin of the *Tazyīn al-Aswāḳ* of Dā'ūd al-Anṭākī, Būlāḳ 1291, Cairo 1308. 2. *Sukkardān al-Sulṭān al-Malik al-Nāṣir*, an anthology on the significance of the number 7 for Egypt, composed in 757 = 1356, Būlāḳ 1288.

Bibliography: al-Suyūṭī, *Ḥusn al-Muḥāḍara*, i. 329; Ibn Ḥabīb in *Orientalia*, ii. 440; Wüstenfeld, *Geschichtschreiber der Araber*, N°. 437.

(C. BROCKELMANN.)

IBN ABĪ RANDAḲA AL-ṬURṬŪSHĪ, ABŪ BAKR MUḤAMMAD B. AL-WALĪD B. MUḤAMMAD B. KHALAF B. SULAIMĀN B. AIYŪB AL-FIHRĪ, known by the names of al-Ṭurṭūshī and Ibn Abī Randaḳa (Ibn Farḥūn vocalises it Rundaḳa), an Arab authority on law and tradition, born about 451 (1059-1060) at Tortosa, died in Sha'bān 520

(22th Aug.—19th Sept. 1126) or, according to another account, in Djumādā I 525 (April 1131) at the age of 75. After studying law and belles-lettres in his native town and afterwards in Saragossa with the Ḳāḍī Abu 'l-Walīd Sulaimān b. Khalaf al-Bādjī, he made the pilgrimage to Mecca in 476 (1083) and thereafter went to Baghdād, Basra, Damascus, and Jerusalem to teach as well as study. On his return he spent some time in Cairo and then settled in Alexandria as a teacher of law and Ḥadīth. He spent his whole life as a pious ascetic in contented poverty and self-denial. Among his teachers in the east we may specially mention Abū Bakr Muḥammad b. Aḥmad b. al-Ḥusain al-Shāshī and Abū 'Alī Aḥmad b. 'Alī al-Tustarī. His most important pupils were Abū Bakr Ibn al-'Arabī, Abū 'Alī al-Ṣadafī, the Mahdī Ibn Tūmart and, in as much as he had obtained an *idjāza* from al-Ṭurṭūshī, also the Ḳāḍī 'Iyāḍ.

Of the twelve works ascribed to him by his biographers, only three are known to us. 1. *Taḥrīm al-Istimnā'*, a small treatise in which the illegality of onanism is demonstrated (Berlin, Ahlwardt, *Verz.*, N°. 4981); 2. A synopsis of *al-Kashf wa 'l-Bayān 'an Tafsīr al-Ḳur'ān* of Abū Isḥāḳ Aḥmad b. Muḥammad al-Tha'labī al-Nasābūrī (Cairo, Khed. Libr., *Fihr.*, i. 209); 3. *Sirādj al-Mulūk*, a kind of treatise on politics and government which contains a large collection of more or less interesting anecdotes in 64 chapters (cf. Th. Zachariae, *Die Weisheitssprüche des Sānāḳ bei aṭ-Ṭorṭūšī*, in *Wien. Zeitschr. f. d. Kunde d. Morgenl.*, xxviii. 182 *sqq.*), completed on the 14 Radjab 516 (19 Sept. 1122) at Fusṭāṭ and dedicated to the author's patron, the vizier al-Ma'mūn Abū Muḥammad b. al-Baṭā'iḥī al-Umawī (printed, Būlāḳ 1289, Cairo 1319).

Bibliography: Ibn Khallikān, *Wafayāt* (Cairo 1310), i. 479 (ed. Wüstenfeld, N°. 616, wrongly "Ibn Abī Zandaḳa"); Ibn Farḥūn, *al-Dībādj al-mudhahhab fī Ma'rifat A'yān 'Ulamā' al-Madhhab* (Fās 1316), p. 250; al-Maḳḳarī, *Nafḥ al-Ṭīb* (Cairo 1302), i. 362; al-Suyūṭī, *Ḥusn al-Muḥāḍara* (Cairo 1321), i. 215; al-Ḍabbī, *Bughyat al-Multamis*, p. 125, N°. 295; Ibn Bashkuwāl, *al-Ṣila*, p. 517, N°. 1153; Dozy, *Recherches*³, ii. 234—240; Yāḳūt, *Mu'djam al-Buldān*, iii. 529, s. v. *Ṭurṭūsh*; Wüstenfeld, *Geschichtschreiber der Araber*, p. 77, N°. 229; Quatremère, *Journ. As.*, 1861; Ibn Khaldūn, *Muḳaddima*, transl. de Slane (*Not. et Extr.*, XIX), i. 82; Ibn Taghrībirdī, *al-Nudjūm al-Zāhira*, ed. Popper, p. 385; Pons Boigues, *Ensayo bio-bibliográfico*, p. 181, N°. 150; *Mémoires de l'Acad. de St. Pétersb.*, vi° Série, Sc. polit., hist. et philol., ii. (1834), p. 92; *Bull. scient.*, iii. (1838), S. 63, *Bull. hist.-phil.*, iii. 221, iv. 338; Wüstenfeld, *Gesch. der Fatimiden-Chalifen*, p. 289, 291; Moh. Ben Cheneb, *Étude sur les personnes ment. dans l'Idjāza de Sîdî 'Abd el Qâder al-Fâsî*, N°. 153; Brockelmann, *Gesch. der arab. Litt.*, i. 459, ii. 703 below; Huart, *Arabic Literature*, p. 287.

(MOH. BEN CHENEB.)

IBN ABI 'L-RIDJĀL, whose full name was ABU 'L-ḤASAN 'ALĪ B. ABI 'L-RIDJĀL is the Arab astrologer often quoted in mediaeval Europe under the names ALBOHAZEN (also ALBOACEN) or ABENRAGEL. Whether he belonged to Spain (Cordova) or North Africa is uncertain; we only know that he spent a portion of his life at the court of the Zīrid Mu'izz b. Bādīs b. al-Manṣūr (406—454 = 1016—1062) in Tunis. It is also probable that he is identical with the Abu 'l-Ḥasan al-Maghribī, who attended the astronomical observations made in 378 (988) in Baghdād by order of the Būyid Sharaf al-Dawla under the supervision of the astronomer Abū Sahl Waidjan b. Rustam al-Kūhī. From a prophecy in his principal astrological work we may conclude that he cannot have died before c. 1040. This book is entitled *al-Bāri' fī Aḥkām al-Nudjūm* (the distinguished [book] on horoscopes from the constellations): it still exists in Arabic in various libraries (Brit. Mus., Ind. Off., Paris, Berlin, Escurial, etc.). It was translated by Jehuda b. Moses (1256) from Arabic into Spanish and soon afterwards from the latter language into Latin by Aegidius de Tebaldis and Petrus de Regio. The Latin translation was several times printed first of all in 1485 in Venice under the title: *Praeclarissimus liber completus in judiciis astrorum, quem edidit Albohazen Haly filius Abenragel*, etc. He also wrote an *Urdjūza* on astrology on which Aḥmad b. al-Ḥasan b. al-Ḳunfūdh al-Ḳusanṭīnī wrote a commentary in 1373 (Escurial, Brit. Museum, Oxford, Cairo).

Bibliography: Ibn al-Ḳifṭī (ed. Lippert), p. 353; Wüstenfeld, *Übersetz. arab. Werke in das Lateinische seit dem 11. Jahrh.*, p. 89; Steinschneider, *Vite di matematici arabi tratte da un' opera inedita di Bernardino Baldi*, etc. in the *Bullettino di bibliografia e di storia delle scienze mat. e fis. di Boncompagni*, V, 493—508, Estratto, 1873, p. 67—82; do., *Die hebr. Übersetz. des Mittelalters*, Berlin, 1893, p. 578—580); Suter, *Abhandl. z. Gesch. d. Math. Wissensch.*, x. 100 and xiv. 172 *sq.*

[H. SUTER.]

IBN ABI 'L-RIDJĀL, AḤMAD B. ṢĀLIḤ, Arab historian, jurist and poet, belonging to the Shī'ī sect of the Zaidīs in Yemen, born in Sha'bān 1029 (July 1620) at al-Shaḥaṭ, a place in the Bilād Ẓhurā in the district of al-Ahnūm, died in the night of Wednesday the 6th Rabī' I 1092 (25th-26th March 1681) aged 62 years and 7 months and was buried at al-Rawḍa (an hour's journey N. of Ṣan'ā') near a house which belonged to him. He spent his whole life in Yemen. He studied the Ḳur'ān, tradition, and law at Shahāra, Ṣa'da, Ta'izz, Ibb, al-Ḥadjja and Ṣan'ā' and studied under all the Zaidī, as well as the Shāfi'ī, Ḥanafī or Mālikī scholars, who lived in Yemen or travelled through it, notably the Mālikī Aḥmad b. Aḥmad al-Shalbī al-Ḳairawānī (died at Ṣan'ā', where he was expounding the *Taḥrīr* of Euclid, on the 22nd Djumādā I 1064 = 10th April 1654). He finally settled in Ṣan'ā' where the Imām al-Mutawakkil 'ala 'llāh Ismā'īl b. al-Manṣūr billāh al-Ḳāsim (died 1087 = 1677) granted him for the period of his reign (1055—1087 = 1645—1677) the offices of preacher in the mosque (*Khaṭīb Ṣan'ā'*) and secretary whose duty it was to compose official documents as well as the answers to the theological and legal questions laid before the Imām.

1. His chief work is a biographical dictionary, arranged in alphabetical order, entitled *Maṭla' al-Budūr wa-Madjma' al-Buḥūr*, which contains about 1300 biographies of prominent members of the Zaidī sects of 'Irāḳ and Yemen, ranging from the sons and descendants of Zaid b. 'Alī (died 121 = 739) down to the author's own contemporaries. It was long thought to be lost and only

known from the extracts given by al-Muḥibbī (*Khulāṣat al-Athar*, i. 220; Wüstenfeld, *Geschichtschr.*, N°. 583). It has only recently been discovered in its entirety in Milan (see Griffini, *Lista dei manoscritti arabi nuovo fondo della Biblioteca Ambrosiana*, in *Riv. degli Studi Orient.*, iv. 1046—1048, N°. 254—256 of the *Lista*; 18 of these biographies have been published by Griffini in his notes in an earlier essay, *I Manoscritti Sudarabici di Milano* in *Riv. d. Stud. Or.*, ii. 1—38, 133—166; iii. 65—104). For his *Maṭla' al-Budūr* the author used various biographical collections which only survive in fragments in Milan, Berlin, and London manuscripts, particularly the works of Aḥmad b. 'Abd Allāh Ibn al-Wazīr (entitled *Ta'rīkh Āl al-Wazīr*), al-Ahdal (*al-Tuḥfa fī 'Ulamā' al-Zaidīya*), Ibn Faṇd (*al-Lawāḥiḳ al-nadīya*), al-Ḥākim (*al-'Uyūn fī Ma'rifat al-Zaidīya*), Yaḥyā b. al-Mahdī al-Ḥusainī (*Ṣilat al-Ikhwān*), the author of the *Ṭabaḳāt al-Zaidīya*, and others. But he was always careful to call attention to those points in which the authorities utilised did not agree among themselves or with the historical traditions surviving down to his time in Yemen. He had also a good knowledge of the geography and archaeology of those districts of South Arabia in which he had travelled and his dictionary therefore gives information concerning them, which is of importance even for the numismatics and Arab epigraphy of Yemen.

2. His gloss (*Ta'līḳ*) on the *Mushadjdjar* (genealogy of the Zaidī Imāms) of Ibn al-Djalāl likewise pertains to the history of the Zaidī sect (holograph of the author in Milan, Ambrosiana, *Riv. d. St. Or.*, iii. 580). In his biography (Ambrosiana, n. f., *B.* 132; s. *Riv. d. St. Or.*, iv. 1047-8) there are also mentioned 3. his *Taisīr al-I'lām bi-Tarādjim A'immat al-Tafsīr al-A'lām* (biographies of Ḳur'ān commentators) as well as a genealogical study of his own family: *Inbā' al-Abnā' bi-Ṭarīḳa Salafihim al-ḥusnā djum'a li-Nasab Āl Abi 'l-Ridjāl*. Other works by him are 4. *I'lām al-Muwālī bi-Kalām Sādātihi al-a'lām al-mawālī*, a treatise on the evidences and authorities in support of the Imāmate of 'Alī (Brit. Mus. Ms.; cf. Rieu, *Suppl.*, N°. 217, ii.); 5. *Tafsīr al-Sharī'a li-Wurrād al-Sharī'a*, a theological treatise in defence of the Zaidī doctrine (Brit. Mus. Ms.; cf. Rieu, *Suppl.*, N°. 217, i.). The same subject is discussed in 6. *al-Riyāḍ al-nadīya fī anna al-Firḳat al-nādjiya hum al-Zaidīya* (Ambrosiana, n. f., *B.* 133, f°. 3^a) and in 7. *al-Mamādīn*, commentary on *al-'Aḳīda al-ṣaḥīḥa*, a treatise on the articles of the sect by the abovementioned Imām al-Mutawakkil Ismā'īl b. al-Manṣūr billāh al-Ḳāsim (Ambros., *B.* 133, f°.); 8. Gloss (*Ḥāshiya*) on *al-Athār* (essay on Zaidī *Furū'*; cf. Brockelmann, ii. 187) concluding with the chapter *al-Waṣāyā*; 9. *Madjālis*; 10. *al-Wadjh al-musfir fī Ḥukm al-Rūḥ alladhī djā'a al-Ḥaḍar*; 11. *Madjāz man arāda 'l-Ḥaḳīḳa*; 12. *al-Hadiyya li-man madjhūl*; 13. *Bughyat al-Ṭālib wa-Shinḥar*; 14. *al-Djawāb al-shāfī lil-'Abd al-'Azīz al-Damadī*; 15. *Tadhkirat al-Ḳuṭṭāb allatī fī 'l-Ṣadūr fī Ḥuḳūḳ al-Adjiṭṭam allatī fī 'l-Ḳubūr*; 16. a large number of *Rasā'il* or treatises on different subjects. 17. His *Dīwān* was collected by one of his brothers who gives us specimens of it in his biography of the author. In the latter besides a list of 47 scholars with whom Ibn Abi 'l-Ridjāl kept up relations, we find the complete text of the *Idjāza* or diploma which granted the holder the right to teach all the sciences in which he had himself been instructed (see Ambrosiana, Nuovo Fondo, *B.* 132, f. 2^a—11^r, and *Riv. d. St. Orient.*, iv. 1047 *sq.*).

Bibliography: E. Griffini, *Lista dei manoscritti arabi nuovo fondo della Biblioteca Ambrosiana di Milano*, in *Riv. degli Studi Orient.*, iv. 1046—1048, N°. 254—256; Brockelmann, *Gesch. der arab. Litt.*, ii. 406. (E. GRIFFINI.)

IBN ABĪ ṬĀHIR ṬAIFŪR, ABU 'L-FAḌL AḤMAD, Arab man of letters and historian, born 204 (819) at Baghdād, died there in 280 (893), a descendant of an Irānian family from Khurāsān (Marw al-Rūdh), which was among the devoted adherents (*Abnā' al-Dawla*) of the 'Abbāsids, was first of all a teacher, then a private tutor in wealthy families and finally followed the trade of a copyist of manuscripts, for which he opened a shop in the Sūḳ al-Warrāḳīn. A work by him on plagiarism (*Kitāb Sariḳāt al-Shu'arā'*), now lost, made him several enemies who charged him with superficiality and the lack of a thorough knowledge of Arabic grammar. Al-Mas'ūdī (*Murūdj*, vii. 333) thought highly of his poems, some of which he quotes, and al-Khaṭīb al-Baghdādī praised his learning. His father's nickname *Ṭaifūr*, means = 'hopping little bird', if it is not to be derived from the Old Persian *takhmaukhra*, 'son of the crown'. Of his *Ta'rīkh Baghdād* only the sixth volume has survived in a unique manuscript in the British Museum, lithographed and translated into German by Dr. H. Keller (Leipzig 1908); it is the history of the city and the 'Abbāsid state from 204 (819) to the death of the caliph al-Ma'mūn in 218 (833), and is one of the sources of the Annals of Ṭabarī. His *Kitāb al-Manẓūm wa 'l-Manthūr* is an anthology of poetry and rhetoric, of which the eleventh (*Balāghāt al-Nisā'* wa-*Ṭarā'if Kalāmihinna* etc., Cairo 1326) and twelfth parts (out of 13) are preserved in the Brit. Mus. His 45 other works are lost.

Bibliography: *Fihrist*, p. 146; F. Wüstenfeld, *Geschichtschreiber der Araber*, N°. 78; Brockelmann, *Gesch. d. arab. Litt.*, i. 138; Cl. Huart, *Journ. Asiat.*, 10th Ser., Vol. xiii. 1909, p. 333. (CL. HUART.)

IBN ABĪ UṢAIBI'A, MUWAFFAK AL-DĪN ABU 'L-'ABBĀS AḤMAD B. AL-ḲĀSIM AL-SA'DĪ AL-KHAZRADJĪ, physician and biographer, born in Damascus in 600 (1203), studied medicine there and afterwards in Cairo at the al-Nāṣirī hospital. Among his teachers special mention may be made of the botanist Ibn al-Baiṭār [q. v.]. In 634 (1236) he received a position in a hospital in Cairo, which he exchanged in the following year for the office of physician to the Emir 'Izz al-Dīn Aidamir in Ṣarkhad. There he died in 668 (1270). Ibn Abī Uṣaibi'a's chief work are his biographies of celebrated physicians and doctors, which he composed under the title *'Uyūn al-Anbā' fī Ṭabaḳāt al-Aṭibbā'* for the vizier Abu 'l-Ḥasan b. Ghanā'im al-Sāmirī, ed. A. Müller, Cairo 1299 (1882), Preface, Königsberg 1884.

Bibliography: Leclerc, *Histoire de la médecine arabe*, ii. 187 ff.; A. Müller, *Über Ibn Abi Oçeibi'a und seine Geschichte der Ärzte* in *Travaux du VIe Congr. intern. des Orientalistes à Leide*, ii. 259 *sqq.*, and other articles, see the references in Brockelmann, *Gesch. d. arab. Litt.*, i. 326.

IBN ABĪ ZAID AL-ḲAIRAWĀNĪ, ABŪ MUḤAMMAD 'ABD ALLĀH B. ABĪ ZAID 'ABD AL-RAḤMĀN, a Mālikī jurist, belonged to a family which

came from Nafza whence the *ethnic* al-Nafzī, but he was born in 310 (922-3) at Ḳairawān, where he died on Monday 30th Shaʿbān 386 = 14 September 996 and was buried in his house.

He vigorously defended his school both in prose and verse and was perhaps the first who clearly expounded the principles of law. He was called Mālik the younger and was and still is regarded as an authority. His teachers were numerous not only in Africa but also in the east on the occasion of his journey to perform the pilgrimage to Mecca. We may mention here his debt to Abū Bakr Muḥammad b. Muḥammad b. al-Labbād who is his best authority, Abu 'l-Ḥasan Ḥasan b. Muḥammad al-Khawlānī, Abu 'l-ʿArab Muḥammad b. Aḥmad b. Tamīm, Muḥammad b. Mūsā al-Ḳaṭṭān, Ibn al-ʿArabī, and others; he received *idjāza*'s from the most notable teachers of his time. Among his pupils are mentioned Abū 'l-Ḳāsim al-Barādhiʿī, Ibn al-Fakhkhār, etc. Of the thirty works mentioned by his biographers only the following survive: 1°. *al-Risāla*, a compendium of Mālikī law finished in 327 = 939, publ. several times in Cairo; ed. by A. D. Russell and Abdullah al-Maʾmūn Suhrawardy, *First Steps in Muslim Jurisprudence consisting of excerpts from Bākūrat al-Saʿd of Abū Zayd, Arabic text, English transl., notes, and short histor. and biogr. introd.*, London 1906; Fagnan, *La Risâla de Kayrouani*, French transl., Paris 1914; 2°. A collection of traditions. Brit. Mus., *Cat. Cod. MSS. Or.*, n°. 888, viii.; 3°. A poem in honour of the Prophet, Brit. Mus., *Cat.* n°. 1617, xi.

Bibliography: Ibn Farḥūn, *al-Dībādj*, Fās 1316, p. 140; Ḳāḍī ʿIyāḍ, *Mukhtaṣar al-Madārik* (ms. of the writer), f°. 240; Ibn Ḳunfudh, *Tabaḳāt* (ms. of the writer), f°. 2 v°.; Ibn Nādjī, *Maʿālim al-Īmān*, Tunis 1320, iii. 135—152; Brockelmann, *Geschichte d. ar. Litt.*, i. 177; M. Ben Cheneb, *Étude sur les pers. ment. dans l'Idjâza du Cheikh ʿAbd el Qâdir al-Fâsy*, N°. 522; Russell and Suhrawardy, *Muslim Jurispr.*, *Prologue*. (MOH. BEN CHENEB.)

IBN ABĪ ZARʿ, ABU 'L-ḤASAN (var. ABŪ ʿABD ALLĀH) ʿALĪ AL-FĀSĪ, historian of the Maghrib, author of two works, one entitled *Zahrat al-Bustān fī Akhbār al-Zamān*, which seems lost, the other *al-Anīs al-muṭrib bi-Rawḍ al-Ḳirṭās fī Akhbār Mulūk al-Maghrib wa Taʾrīkh Madīnat Fās*. Nothing is known of the life of the author, who is also called Abū Muḥammad Ṣāliḥ b. ʿAbd al-Ḥalīm al-Gharnāṭī. His work, which begins with the Idrīsid dynasty, is very important for the history of Morocco to 724 (1324), a date which cannot be much before the year of his death. He is sometimes quoted by Ibn Khaldūn. He made use, often without naming them, of a certain number of authorities and it seems, at least under the Marīnids, of official documents also. His book forms the basis of a work (or was rewritten) by Muḥammad b. Ḳāsim b. Zakūr (died 20 Muḥarram 1120 = 11 April 1708), entitled *al-Maʿrib al-mubīn ʿammā taḍammanahu 'l-Anīs al-muṭrib wa Rawḍat al-Nasrīn* (al-ʿAlamī, *al-Anīs al-muṭrib*, Fās 1315, p. 28). It was published for the first time by Tornberg, *Annales regum Mauritaniae*, with Latin translation and notes, Upsala, 2 v., 1843—1846, and lithographed at Fās 1305 A. H. It was translated in a very unsatisfactory fashion into German by Dombay, *Geschichte der mauritanischen Könige*, Agram, 1794—7; into Portugese by Moura, *Historia dos soberanos mohametanos*, Lisbon, 1824; into French by Beaumier, *Roudh el-Kartas, Histoire des souverains du Maghreb*, Paris, 1860. A fragment of the text is given in the *Crestomatia arábigo-española* of Simonet and Lerchundi, Granada, 1881, N°. 63. A new edition, with French translation, is in preparation.

Bibliography: Besides the prefaces to the translations quoted, Abu 'l-ʿAbbās Aḥmad al-Ḥalabī, *al-Durr al-nafīs* (Fās, 1314), p. 17; Wüstenfeld, *Die Geschichtschreiber der Araber*, N°. 39; Gayangos, *The History of the Mohammedan Dynasties* (London, 1840—3), ii. 516; R. Basset, *Recherches bibliographiques sur les sources de la Salwat el-Anfâs* (Algiers 1905), p. 12-13; Brockelmann, *Gesch. d. arab. Litt.*, ii. 240-1. (RENÉ BASSET.)

IBN ʿADHĀRĪ. [See IBN AL-ʿIDHĀRĪ.]

IBN AL-ʿADĪM. [See KAMĀL AL-DĪN.]

IBN ʿADJARRAD, ʿABD AL-KARĪM, a Khāridjī sectarian, after whom his adherents are called ʿAdjārida. We possess no data for his biography; from al-Shahrastānī's account it can only be deduced that he was one of the followers of ʿAṭiya b. al-Aswad al-Ḥanafī. This ʿAṭiya however was at first a follower of Nadjda b. ʿĀmir [q. v.] but afterwards separated from him and became chief of the Khāridjīs of Sidjistān, Khorāsān, Kirmān and Kūhistān. His date is thus the first half of the viiith century and although he, like ʿAṭiya, had separated himself politically from Nadjda, both belonged, from the point of view of the historian of religions, to that section of the Khāridjīs who are called Nadjadāt after Nadjda or Nadjdiya after the district in which he appeared, i. e. to those who occupy a position midway between the rigid Azraḳīs and the milder Ibāḍiya. According to al-Baghdādī, the ʿAdjārida were divided into 10 minor divisions: the Khāzimiya, the Shuʿaibiya, the Maimūniya, the Khalafiya, the Maʿlūmiya, the Madjhūliya, the Ṣaltiya, the Ḥamziya, and the Thaʿāliba who are again divided into 6 sections. The tenth not mentioned by him is probably the Aṭrāfiya mentioned by al-Shahrastānī. Among these the Ḥamziya may be particularly mentioned on account of the part which their chief, Ḥamza b. Atrak, played in politics for many years, till he finally died of wounds in the reign of al-Maʾmūn. Ṭabarī only briefly mentions him but al-Baghdādī gives many details of him.

Bibliography: al-Shahrastānī, ed. Cureton, p. 92, 95 *sqq.*; al-Baghdādī, *al-Farḳ*, p. 72 *sqq.*

IBN ĀDJURRŪM, ABŪ ʿABD ALLĀH MUḤAMMAD B. MUḤAMMAD B. DĀWŪD AL-ṢANHĀDJĪ, known as IBN ĀDJURRŪM, a Berber word which means, according to the commentators, religious man and ṣūfī (ascetic, Shilḥa: *agurram*). His grandfather Dāwūd is said to have been the first to bear this name. His relatives belonged to the neighbourhood of the little town of Ṣafrū but he was born at Fās in 672 (1273-4) and died there on Sunday 20th Ṣafar 723 (1st March 1323). He was buried the next day within the town in the Andalusian quarter near the Bāb al-Djīsīyīn (wrongly Bāb al-Ḥadīd) which now bears the name Bāb al-Ḥamrāʾ (it is now closed) to the right of the Bāb al-Futūḥ.

After studying in Fās he performed the pilgrimage to Mecca and, while passing through Cairo, studied under the celebrated Andalusian grammarian Abū Ḥaiyān Muḥammad b. Yūsuf of Gra-

ḥuda (died at Cairo in 745 = 1345) who gave him an idjāza. He is said to have composed his Muḳaddima with his face turned toward the Ka'ba during his stay in the sacred city. According to his contemporaries, he was lawyer, man of letters, mathematician, and above all grammarian. He further possessed an extensive knowledge of the science of the orthography and recitation of the Kur'ān. He taught grammar and the Kur'ān in the mosque of the Andalusian quarter in Fās. He seems to have written a commentary on the didactic poem by al-Shāṭibī [q. v.] on the recitation of the Kur'ān and, according to the *Tadhkira* of Tādj al-Dīn b. Maktūm, several other works and numerous *urdjūza*s on the variant readings and the recitation of the Kur'ān. The work which has come down to us and rendered him famous is *al-Muḳaddima al-Ādjurrūmiya fī Mabādi' 'Ilm al-'Arabiya*. Owing to its brevity, which is the cause of the favour in which it was and is still held even at the present day from the Atlantic to the Euphrates, this work, which is a synopsis, erring on the side of succinctness, of the *Djumal* of Abu 'l-Ḳāsim 'Abd al-Raḥmān b. Isḥāḳ al-Zadjdjādjī, has become the basis of grammatical studies. On account of its conciseness, often at the sacrifice of clearness, it is easily learned by heart in the schools, although it is not very useful to beginners who require more lucidity in the exposition of principles. In any case the grammar contains in a concise form information on the declension of nouns and conjugation of verbs and use of the cases. The *Ādjurrūmiya* has been published in a number of European editions of which the most important are:

1°. *Kit. al-Ādjurrūmiya*, Medici Press, Rome 1592;

2°. P. Kirsten, *Liber tertius Grammaticae Arabicae*, Breslau, 1610 (Latin transl. of ed. of Rome);

3°. Thomas Erpenius, *Grammatica Arabica dicta Gjarumia, et libellus cent. regent., cum version. latin. et comment.*, Leidae 1617;

4°. R. P. F. Thomas Obicini, *Grammatica arabica* الاجرومية *appellata. Cum versione latina ac dilucida expositione*. Press of the Propaganda, Rome, 1631;

5°. Chr. Schnabel, (*Epist. quaedam et*) *Particula prima Agrumiae cumque commentariorum*, Arab. et Lat., Amstelodami, 1755; *Contin. Agrumiae cumque comment.*, Arab. et Lat., ibid. 1756 (commentary of al-Azharī).

6°. L. Vaucelle, *L'Adjroumieh*, *par Mohammed b. Daoud, grammaire arabe, traduite en français et suivie du texte arabe*, Paris 1833;

7°. E. Combarel, *La Djarroumiyé, nouvelle édition du texte arabe*, Paris 1844;

8°. L. J. Bresnier, *Djarroumiya. Grammaire arabe élémentaire* ... *de Mohammed b. Daoud el-Sanhadji. Texte arabe et traduction française accompagnés de notes explicatives*, Algiers 1846; 2nd ed.; ibid. 1866;

9°. J. J. S. Perowne, *al-Adjrumiah. The Arabic text, with the vowels, and an English translation*, Cambridge, 1852;

10°. E. Trumpp, *Einl. in das Studium der arab. Sprache. Ajrûmiyyah des Muh'ammad bin Dâûd, arab. Text mit Übers. u. Erläut.*, München 1876;

(MOH. BEN CHENEB.)

IBN AL-AḤMAR. [See MUḤAMMAD B. YŪSUF.]

IBN AL-AḤNAF, ABU 'L-FAḌL AL-ʿABBĀS, one of the court poets of Hārūn al-Rashīd. His forefathers were Arabs of the tribe of Ḥanīfa in al-Yamāma who had settled in Khurāsān, but much Persian blood flowed in his veins. He was maternal uncle of Ibrāhīm al-Ṣūlī. He accompanied Hārūn on his expeditions to Khurāsān and Armenia, and when he died about 192 A. H. (808) al-Maʾmūn was ordered to perform his funeral rites, but al-Masʿūdī gives a different account of his end. Some say he survived al-Rashīd. All his poetry is romantic or erotic in character, and rather affected and unnatural in style. He was entirely eclipsed by his contemporary Abū Nuwās [q. v.], as in character and refined taste he far surpassed him. His *Dīwān* has been printed along with that of Ibn Maṭrūḥ (Constantinople 1881), with a biography of each poet taken from Ibn Khallikān.

Bibliography: Ibn Khallikān (ed. Wüstenfeld), N°. 319; *Aghānī*, VIII, 15 *sqq.*; Ibn Ḳutaiba, *Kit. al-Shiʿr* (ed. de Goeje), p. 363, 518, 525—7; al-Masʿūdī, *Murūdj al-Dhahab*, chap. cxvii; Brockelmann, *Geschichte* etc., i, 74 *sq.*, cf. 514 *supra*. (T. H. WEIR.)

IBN AL-ʿALḲAMĪ, MUʾAIYAD AL-DĪN ABŪ ṬĀLIB MUḤAMMAD B. AḤMAD, was the last ʿAbbāsid wazīr. His grandfather is said to have been named al-ʿAlḳamī on account of having dug the canal of that name [q. v.]. Ibn al-ʿAlḳamī was distinguished for his learning and integrity and for penmanship. He was a great collector of books and a patron of learning. Some authorities say that it was he who invited Hūlāgū to come to Baghdād. After the capture of the city Ibn al-ʿAlḳamī was put in charge of it. He died a few months later in Djumādā I 655 (1257). He had been wazīr to al-Mustaʿṣim [q. v.] for fourteen years.

Bibliography: Ibn al-Ṭiḳṭaḳā, *al-Fakhrī*, ed. Derenbourg, p. 455 *sqq.*; Abu 'l-Fidāʾ (ed. Reiske-Adler), iv. 550 *sqq.*; al-Kutubī, *Fawāt al-Wafayāt*, Būlāḳ 1283, ii. 189 *sqq.* (T. H. WEIR.)

IBN AL-ʿAMĪD, the name of two viziers:

1. ABU 'L-FAḌL MUḤAMMAD B. ABĪ ʿABD ALLĀH AL-ḤUSAIN B. MUḤAMMAD AL-KĀTIB, called Ibn al-ʿAmīd after his father who was known as al-ʿAmīd and had been Mardāwīdj's vizier. In 328 (939-940) Ibn al-ʿAmīd was appointed vizier by the Būyid Rukn al-Dawla. He was held in great esteem by the latter and his influence continued to increase. In 344 (955-6) the Khorāsānians under Muḥammad b. Mākān advanced against al-Raiy and Iṣfahān, which fell into their hands. Ibn al-ʿAmīd was defeated; while the enemy were engaged in plundering however he fell upon them and put them to flight, Ibn Mākān himself being wounded and taken prisoner. Ibn al-ʿAmīd then retook Iṣfahān and al-Raiy remained in the hands of Rukn al-Dawla. In 355 (966) it became known that an undisciplined horde of Khorāsānians, said to number not less than 20,000 men, were setting out to fight for Islām primarily on account of the Byzantine successes. Rukn al-Dawla granted them free passage through his territories; on reaching al-Raiy, however, they demanded help in men and money from the Būyids. The vizier promised them a moderate sum; but when it proved impossible to satisfy their demands, they began to plunder and rob and Ibn al-ʿAmīd's house was attacked and he himself wounded. Rukn al-Dawla finally succeeded in driving out the undisciplined Khorāsānians and when the latter received reinforcements, they also were defeated. The prisoners were brought to al-Raiy but then released. In 359 (969-970) Ibn al-ʿAmīd was sent with an army against the Kurd chief Ḥasanwaih [q. v.]; but he died on the way, according to the usual statement in Ṣafar 360 December 970), according to others in the previous year (359). Ibn al-ʿAmīd was also celebrated as a scholar and was called the 'second Djāḥiẓ'.

Bibliography: Ibn Khallikān (ed. Wüstenfeld), N°. 707 (transl. de Slane, iii. 256 *sqq.*); Ibn al-Athīr (ed. Tornberg), viii. 199—446; Amedroz, *The Vizier Abu-l-Faḍl Ibn al-ʿAmīd* in *Der Islam*, iii. 323—351.

2. ABU 'L-FATḤ ʿALĪ B. MUḤAMMAD, son of the preceding, born in 337 (948-949), called Dhu 'l-Kifāyatain ("possessor of the two faculties") on account of his skill with the sword as well as the pen. He accompanied his father on his campaign against Ḥasanwaih and concluded peace with the latter after his father's death, and then returned to Rukn al-Dawla in al-Raiy and assumed the office of vizier. He filled the office during Rukn al-Dawla's reign; but he made enemies through his youthful arrogance and in particular his relations with ʿAḍud al-Dawla, son of Rukn al-Dawla, became very strained. On the death of Rukn al-Dawla in 366 (976) he was confirmed in his office by his successor, Muʾaiyid al-Dawla; but when he incited the army against the latter's secretary, the influential Ibn ʿAbbād [q. v.] and a revolution was feared, he was thrown into prison at the instigation of ʿAḍud al-Dawla and tortured and his possessions were confiscated. He succumbed to the torture in the same year.

Bibliography: Yāḳūt, *Irshād al-Arīb* (ed. Margoliouth), v. 347—375; Ibn Khallikān, see under N°. 1; Ibn al-Athīr (ed. Tornberg), viii. 446, 473 *sqq.* (K. V. ZETTERSTÉEN.)

IBN AL-ʿAMĪD. [See AL-MAKĪN.]

IBN ʿAMMĀR, *a*) ABŪ ṬĀLIB AMĪN AL-DAWLA, AL-ḤASAN, the Shīʿī Ḳāḍī of Tripolis, who seized the reins of government towards the middle of the fifth century A. H. after the death of the Fāṭimid governor Mukhtār al-Dawla b. Bazzāl and made himself independent of the Egyptian caliph. The town flourished under his rule and became the centre of the intellectual life of Syria. He founded a celebrated school and a library said to have contained over 100,000 volumes. After his death his nephew Djalāl al-Mulk Abu 'l-Ḥasan ʿAlī b. Muḥammad b. ʿAmmār seized the throne and held it till his death in 492. He was succeeded by his brother (see next article).

Bibliography: The above account is based on Muḥammad b. Shaddād (Leiden MS., N°. 1466 (*Cat.*², ii. 5), f. 101ᵛ), and Nuwairī, Paris, Bibl. Nat., Ms. ar. 1578, f. 116ʳ); *Matériaux pour un Corpus Inscriptionum Arabicarum*, ii. fasc. 1. p. 39 *sqq.*

b) ABŪ ʿALĪ FAKHR AL-MULK ʿAMMĀR B. MUḤAMMAD succeeded to the throne in 492 A. H. but was unable long to enjoy the peace which had reigned under his predecessors. His rich and flourishing cities attracted the cupidity of the Crusaders. In 495 Raymond St. Gilles appeared before Tripolis and, although he had to be content with a payment of tribute, he built a fortress opposite the city on the so called "pilgrims' hill"

(the modern citadel of the town) for his operations against Tripolis. Ibn 'Ammār succeeded in defending himself for some years. Raymond died in 498, but his successor drew an even stronger ring round the town. In 501 'Ammār decided to seek the help of the Saldjūḳ Sulṭān Muḥammad in Baghdād and left Tripolis. His absence had disastrous results (see TRIPOLIS). The inhabitants handed over the town to the Fāṭimid caliph. The latter seized 'Ammār's treasures, his followers and his family. Tripolis was thus deprived by him of its resources and its best defenders. 'Ammār, who had not been able to persuade the Sulṭān to send an expedition to his help, did not return to Tripolis. He occupied Djabala for a time with the help of the troops of the Atābeg Toghtegin of Damascus. In 502 Tripolis and Djabala fell into the hands of the Franks. 'Ammār remained for a time at Toghtegin's court and was granted al-Zabadānī (in the valley of the Baradā) in fief by the latter. He then went to the court of Mas'ūd, prince of Mōṣul, and remained his vizier till 512.

He was later in the service of the 'Abbāsid caliph (Ibn al-Athīr, ed. Tornberg, x. 365, 399). The family of 'Ammār seems to have come to Egypt from the Maghrib with the Fāṭimid caliphs; al-Ḥasan b. 'Ammār, the chief of the Kitāma, is mentioned towards the close of the ivth century A.H. as a high official in Egypt. A member of the family, ḳāḍī of Alexandria, was executed as a traitor in 487. The name of the Banū 'Ammār is associated with the zenith of Tripolis' prosperity. As Aleppo under the Ḥamdānid Saif al-Dawla was a centre of poetry so Tripolis under the ḳāḍī al-Ḥasan b. 'Ammār was a celebrated seat of learning. To the ḳāḍī Fakhr al-Mulk 'Ammār fell the difficult task of defending Tripolis against the attacks of the Crusaders, but he could not hold out permanently on account of the discord among the Muslim chiefs.

Bibliography: As above; cf. also *Recueil des Histor. Orientaux*, iii., Paris.

(M. SOBERNHEIM.)

IBN 'AMMĀR, ABŪ BAKR MUḤAMMAD, an Arab poet of Spain, of obscure origin but a cultivated man, lived in the vth (xith) century and at first led a wandering life, singing the praises of any one who cared to reward him. He met the governor al-Mu'tamid, son of al-Mu'taḍid, Emir of Seville, in Silves. This young prince took a liking to the wandering poet and made him his favourite. The latter, as ambitious and talented as he was poor, knew how to flatter his patron's wishes, took part in his amusements and abetted him in them. When scandalous rumours of their doings reached the Emir of Seville's ears, Ibn 'Ammār was banished. Al-Mu'tamid did not forget him, however, and after al-Mu'taḍid's death, as heir to the throne he recalled Ibn 'Ammār from exile and gave him an office as minister.

The poet's ambition filled him with jealousy of his colleague at al-Mu'tamid's court, the vizier and poet Ibn Zaidūn. After the capture of Cordova, to which al-Mu'tamid migrated with his whole court, Ibn 'Ammār, by all sorts of intrigues and with the help of the chief of the body guard Ibn Martin, succeeded in having Ibn Zaidūn sent back to Seville. Ibn 'Ammār now thought himself sufficiently free from observation and secure from punishment to devise a plot against his master. Entrusted with the conquest of Murcia, he took the town with the help of al-Mu'tamid's troops and declared himself an independent emir, but was soon driven from Murcia by Ibn Rashīḳ. He took refuge in a fortress, the commander of which, Ibn Mubārak, took him prisoner and sold him to the Emir of Seville. When brought before the latter he might have won his favour again, had not his enemies, among whom was also a son of Ibn Zaidūn, denounced him as the instigator of a conspiracy. Aroused by this new treachery of his favourite, al-Mu'tamid cut off his head (479 = 1086).

Ibn 'Ammār's poems, which show the greatest originality and technical skill, do not appear to have been collected in a *Dīwān* but there are copious extracts in al-Marrākushī, *The Hist. of the Almohades*, p. 77 *sqq.*; al-Maḳḳarī, *Analectes*; Ibn Khāḳān, *Ḳalā'id al-'Iḳyān*, p. 83—99; Ibn Bassām (Ms. 3322 of the Bibl. Nat. Paris) and in 'Imād al-Dīn al-Iṣfahānī (Ms. 3330 of Bibl. Nat. in Paris).

(A. COUR.)

IBN AL-ANBĀRĪ, s. AL-ANBĀRĪ, i. 349b. The work mentioned there was completely edited by G. Weil in 1913: *Die grammatischen Streitfragen der Basrer und Kufer*.

IBN (AL-)'ARABĪ, ABŪ BAKR MUḤAMMAD B. 'ALĪ, MUḤYI 'L-DĪN, AL-ḤĀTIMĪ AL-ṬĀ'Ī (as a descendant of Ḥātim al-Ṭā'ī [q. v.]) AL-ANDALUSĪ, a celebrated mystic of pantheistic doctrine, styled by his followers al-Shaikh al-Akbar; in Spain he was also called Ibn Surāḳa but in the East generally Ibn 'Arabī, without the article, to distinguish him from the Ḳāḍī Abū Bakr Ibn al-'Arabī (see next art.). He was born 17th Ramaḍān 560 (28th July 1165) at Murcia. In 568 (1172-3) he removed to Seville which he made his home for nearly thirty years. There and also at Ceuta he studied Ḥadīth and Fiḳh. He had visited Tunis in 590 (1194), and in 598 (1201-2) he set out for the East, from which he did not return. In the same year (598) he reached Mecca; in 601 he spent twelve days in Baghdād, to which he returned in 608 (1211-2), and he was back in Mecca in 611 (1214-5). Here he stayed for some months, but the beginning of the following year finds him in Aleppo. He visited also Mōṣul and Asia Minor. His fame went with him everywhere and he was the recipient of pensions from persons of means, which he bestowed in charity. When in Asia Minor he received from the Christian governor the gift of a house, but he presented it to a beggar. Finally he settled in Damascus and died there in Rabī' II 638 (Oct. 1240); he was buried at the foot of Djabal Ḳāsiyūn, where his two sons were later buried.

As to ritual, Ibn 'Arabī belonged nominally to the Ẓāhirī school of his compatriot Ibn Ḥazm (q. v., cf. Goldziher, *Die Ẓâhiriten*, p. 185 *sq.*), but he rejected *taḳlīd* (recognition of authority in doctrinal matters) and in matters of belief he passed for a bāṭinī (esoteric). Although conforming to the practice of the Muslim faith and professing its beliefs, Ibn 'Arabī's sole guide was the inner light with which he believed himself illumined in a special way. He held that all Being is essentially one, as it all is a manifestation of the divine substance. The different religions were thus to his opinion equivalent. He believed that he had seen the beatified Muḥammad, that he knew the Greatest Name of Allāh, and that he had acquired a knowledge of alchemy, not by his own labour, but by revelation. He was denounced as a *Zindīḳ*,

and in Egypt there was a movement to assassinate him.

His principal work, *al-Futūḥāt al-Makkīya*, which was later epitomised by al-Sha'rānī (d. 973), gives a complete system of mystic knowledge, in 560 chapters, of which chapter 559 contains a summary of the whole. His contemporary Ibn al-Fāriḍ (d. 632), being asked by Ibn 'Arabī for a commentary on his *Tā'īya*, replied that the best commentary was his own *Futūḥāt*. This work was printed in Būlāḳ in 1274, Cairo 1320. Next to the *Futūḥāt* comes the *Fuṣūṣ al-Ḥikam*, begun in Damascus in the beginning of 627 (end of 1229), printed with Turkish commentary, Būlāḳ 1252, and lithographed with the commentary of 'Abd al-Razzāḳ al-Ḳāshānī, Cairo, 1309, 1321.

In 598 (1201-2), on his arrival at Mecca, Ibn 'Arabī had made the acquaintance of a learned lady of that town, and, on his return thither in 611 (1214-5), he wrote a small collection of love-poems celebrating her learning and loveliness and their mutual friendship; but in the following year he found it advisable to write a commentary on these, explaining them in a mystical sense. These poems with an English translation of both poems and commentary have been published by R. A. Nicholson (*The Tarjumān al-Ashwāḳ, a Collection of Mystical Odes*, Or. Transl. Fund, New Ser., vol. xx, (London 1911). This is the only one of Ibn 'Arabī's numerous works which has appeared in a European edition with the exception of a small glossary of Ṣūfī terms appended to the *Ta'rīfāt* of Djurdjānī edited by Flügel in 1845, and a short treatise, ascribed to him in a Glasgow MS., called the *Kitāb al-Adjwiba*, of which an English translation appeared in the *Journal Roy. As. Soc.* for 1901.

Other of his works which have been printed are: *Muḥāḍarat al-Abrār*, on literary and historical topics (Cairo 1282, 1305), a *Dīwān* of religious poetry (Būlāḳ 1271, Bombay 1890); a commentary on the Ḳur'ān, Būlāḳ 1283, Cairo 1317; *Kit. al-Akhlāḳ* Cairo s. a. (= *Makārim-i Akhlāḳ*, Turkish transl. of Aḥm. Mukhtār, Stambul 1314); *Amr Muḥkam*, with Turk. transl., Stambul 1315; *Tuḥfat al-Safara ilā Ḥaḍrat al-Barara*, Constantinople 1300, Turk. transl., Stambul 1303; *Mawḳi' al-Nudjūm* [illegible] *al-Ilāhīya*, Cairo 1325; *Mawāḳi' al-Nudjūm wa-Maṭāli' Ahillat al-Asrār wa 'l-'Ulūm*, Cairo 1325.

Altogether some 150 of his writings are known to exist, and this is said to be only half of what he actually composed.

Various theologians took exception to the contents of his writings and charged him with heretical doctrines such as *ḥulūl* [q. v.] and *ittiḥād* [q. v.] Still he found many followers and zealous defenders. Whilst Ibn Taimīya, al-Taftazānī and Ibrāhīm b. 'Umar al-Biḳā'ī denounced him as a heretic, amongst his defenders were found 'Abd al-Razzāḳ al-Ḳāshānī [q. v.], al-Fīrūzābādī (cf. H. al-Zaiyāt *Khizā'in al-Kutub fī Dimashḳ*, etc., p. 50, n°. 20, 2) and al-Suyūṭī.

Bibliography: Sibṭ Ibn al-Djauzī, *Mir'āt* (ed. Jewett), p. 487; al-Sha'rānī, *al-Yawāḳīt wal-Djawāhir*, Cairo 1306, p. 6—14; al-Maḳḳarī, ed. Dozy e. a., i. 567—583; *Khātimat al-Futūḥāt*, ed. Būlāḳ 1274, iv; Ḥādjdjī Khalīfa, Ind. (vii. 1171): Hammer-Purgstall, *Literaturgeschichte d. Araber*, vii. 422 sqq.; von Kremer, *Gesch. der herrsch. Ideen des Islams*, p. 102 sqq.; R. A. Nicholson, *The Lives of 'Umar Ibnu 'l-Fāriḍ and Ibnu 'l-'Arabī* in *Journ. Roy. As. Soc.*, 1906, p. 797 sqq.; do., *A Literary History of the Arabs*, p. 399 sqq.; do., *The Tarjumān al-Ashwāḳ*, London 1911; do., *The Mystics of Islam*, London 1914, s. Ind.; M. Schreiner, *Beitr. z. Gesch. d. theol. Bewegungen im Islām* in *Zeitschr. d. Deutsch. Morg. Gesellsch.*, lii. 516—525 (also published separately, p. 52 sqq.); Asín Palacios, *La psicología según Mohidin Abenarabi* in *Actes du XIVe Congrès intern. des Orient.*, Alger 1905, iii. 79—150; Goldziher, *Vorlesungen*, p. 172 sqq. and index; Macdonald, *Muslim Theology*, p. 261 sqq.; Brockelmann, i. 441 sqq., and the literature given there. (T. H. Weir.)

IBN AL-'ARABĪ, Abū Bakr Muḥammad b. 'Abd Allāh, a Spanish traditionist, born at Seville 468 (1076), travelled in the east while still a boy with his father and studied under the most famous jurists of the day in Syria, Baghdād, Mecca and Egypt, for example, al-Ṭurṭūshī and al-Ghazālī [q. v.]. When his father died in 493 (1099) at Alexandria, he returned to Seville and there filled the office of chief Ḳāḍī. He was afterwards forced to migrate to Fās and continued his studies there till his death in 543 (1148). He is said to have composed over 40 different works, which are however for the most part lost. The titles of several are given in the works mentioned below.

Bibliography: Ibn Khallikān, *Wafayāt*, ed. Cairo 1299, ii. 292 sqq.; Ibn Bashkuwāl, *al-Ṣila*, i. 50, 1181; al-Maḳḳarī, ed. Dozy etc., i. 477—489, and passim; Pons Boigues, *Ensayo bio-bibliográfico*, p. 216 f.; Goldziher in *Zeitschr. der Deutsch. Morgenl. Gesellsch.*, XXXVIII, 672.

IBN 'ARABSHĀH, Aḥmad b. Muḥammad b. 'Abd Allāh b. Ibrāhīm Shihāb al-Dīn Abu 'l-'Abbās al-Dimashḳī al-Ḥanafī al-'Adjamī, born in 791 = 1392 in Damascus, was taken with his family to Samarḳand in 803, when Tīmūr conquered Damascus and carried off many of its inhabitants (cf. *Vita Timuri*, ed. Manger, Leovardiae, 1767—1772, ii. 143 sqq.); there he studied with al-Djurdjānī, al-Djazarī and others, and learned Persian, Turkish, and Mongol. In 811 he went to Khiṭā in Mongolia where he studied Ḥadīth with al-Shīrāzī, later to Khwārizm and Dasht (in Serāī and Ḥādjdjī Tarkhān), where he still was in 814 (*Vita Timuri*, i. 379). He came through the Crimea to Adrianople, where he became a confidant of Muḥammad I b. Bāyazīd. He translated several books for him into Turkish (al-'Awfī, *Djawāmi' al-Ḥikāyāt wa-Lawāmi' al-Riwāyāt*, Ḥādjdjī Khalīfa, ii. 510; Abu 'l-Laith, *Tafsīr*, Ḥādjdjī Khalīfa, ii. 354; Dīnawarī, *Ta'bīr*, Ḥādjdjī Khalīfa, ii. 312) and conducted the Sulṭān's correspondence in Arabic, Turkish, Persian, and Mongol. In 824 he went to Ḥalab, in 825 to Damascus, where he studied Ḥadīth with his friend Abū 'Abd Allāh Muḥammad al-Bukhārī (cf. *Vita Timuri*, i. 33). In 832 he performed the Ḥadjdj, in 840 he migrated to Cairo and was there on friendly terms with Abu 'l-Maḥāsin al-Taghrībirdī amongst others. He died in 854. His chief work is the *'Adjā'ib al-Maḳdūr fī Nawā'ib Tīmūr* (Ḥādjdjī Khalīfa, ii. 122 sq.; editions in Brockelmann, besides Calcutta 1818; transl. into Turkish by al-Murtaḍā Naẓmī Zāde al-Baghdādī 1110 = 1698, Ḥādjdjī Khalīfa, iv. 190; vi. 544), in which Tīmūr's conquests and the conditions under his successor are described. Tīmūr is represented as a cruel profligate and tyrant, but towards the end

(ed. Manger, ii. 781 *sqq.*) his great qualities are appreciated. The book contains valuable descriptions of Samarḳand and its learned world (*ii.* 855 *sqq.*). His *Fâkihat al-Khulafâ' wa-Mufâkahat al-Ẓurafâ'* in ten chapters, written in the month of Ṣafar 852 (Ḥâdjdjî Khalîfa, iv. 445) contains a mirror for princes and beast-fables, according to Ḥâdjdjî Khalîfa "like *Kalîla* and *Dimna* and *Sulwân al-Muṭâ'*" (see Chauvin, *Bibliographie*, ii. n°. 140—144), but, as Chauvin has shown (*op. cit.* ii. 145—149), is actually a version of the Persian *Marzubân-Nâmah* in the recension of Sa'd of Warâwîn (cf. Houtsma in *Zeitschr. d. Deutsch. Morgenl. Ges.*, lii. 350 *sqq.*; a selection in Freytag, *Locmani Fabulae*, p. 72 *sqq.*; complete edition see below). The introductory portion of an edition of his *al-Ta'lîf al-ṭâhir fî Shiyam* .... *Abî Sa'îd Djaḳmaḳ* was published as a posthumous work of S. A. Strong in the *Journ. Roy. As. Soc.*, 1907, p. 395 *sqq.* 10 works are mentioned under his name, among them a work on Arabic, Persian, and Turkish, *Tardjumân al-Mutardjim* (Ḥâdjdjî Khalîfa, ii. 278). See also Ḥâdjdjî Khalîfa, iii. 158; iv. 190, 232, 270, 311; v. 479, and Freytag's work mentioned below.

Of his sons the following were authors: 1°. Al-Ḥasan, wrote *Iḳâẓ al-Zâ'ir wa-Bayân al-'Udwân fî Ta'rîkh al-Nâbulusî al-Khâ'in al-Khawwân*, in rhymed prose, on al-Nâbulusî and his tyrannical proceedings against Damascus. See Brockelmann, *Gesch. d. arab. Litt.*, ii. 30.

2°. Tâdj al-Dîn 'Abd al-Wahhâb, born 813 = 1411 in Ḥâdjdjî Tarkhân, died 901 = 1495; wrote a commentary on Abû Laith's *Muḳaddima* and various other works of little importance. See Brockelmann, *Gesch. d. arab. Litt.*, ii. 19 *sq.*

Bibliography: Freytag, *Fructus Imperatorum et Jocatio Ingeniosorum*, i.—ii., Bonn 1832 (edition of the *Fâkiha*, p. xxv.—xxxiii. sketch of his life based on al-Sakhâwî and Taghrîbirdî); Pertsch, *Verzeichnis der arab. Hdschr. zu Gotha*, N°. 94, 1840, 1841, 2696; Wüstenfeld, *Geschichtschreiber der Araber*, N°. 488; Brockelmann, *Gesch. d. arab. Litt.*, i. 196; ii. 28—30. (J. Pedersen.)

IBN 'ASÂKIR, the name of several Arab authors, of whom the following are the best known.

1. The historian of Damascus, 'Alî b. al-Ḥasan b. Hibat Allâh Abu 'l-Ḳâsim Thiḳat al-Dîn al-Shâfi'î, born in Muḥarram 499 = Sept. 1105 in Damascus, studied in Baghdâd and the principal cities of Persia, became professor at the Madrasa al-Nûriya in his native city and died on the 11th Radjab = 25th January 1176. In his principal work, the *Ta'rîkh Madînat Dimashḳ*, he collected, after the fashion of the *Ta'rîkh Baghdâd* of al-Khaṭîb al-Baghdâdî, the biographies of all the men who had ever been connected with Damascus. Of the 80 volumes of the original, of which Vols. 1 and 2 were printed in Damascus 1329-1330, only odd ones have survived: in addition to those given in Brockelmann, *Gesch. d. arab. Litt.*, i. 331; there are others in Strassburg (s. *Zeitschr. d. Deutsch. Morgenl. Ges.*, xl. 316), Stambul (Dâmâd Ibrâhîm Pâshâ, N°. 872—882, 'Âṭif Efendi, N°. 1812—1819), Cairo (s. *Fihrist al-Kutub al-maḥfûẓa bi'l-Kutubkhâna al-Khidîwîya*, v. 25), Damascus (s. Ḥabîb al-Zaiyât, *Khazâ'in al-Kutub fî Dimashḳ*, p. 75 *sq.*, cf. Horovitz in *Mitt. d. Sem. f. or. Spr.*, x. 50 *sqq.*), in Tunis, Zaitûna (Houdas-Basset, N°. 65); cf. also the extract by Ismâ'îl b. Muḥammad Djarrâḥ al-'Adjlûnî (died 1162 = 1749) in Tübingen (s. Seybold, *Verzeichnis*, N°. 65; cf. Sauvaire, *Histoire de Damas* in the *Journ. As.*, 1894—1896). In addition to his other works mentioned by Brockelmann, *loc. cit.*, we may now mention *al-Mu'djam*, notices of celebrated men, particularly Ṣûfîs, with an appendix, *Kitâb al-Wahm*, by Muḥammad b. 'Abd al-Wâḥid al-Muḳaddasî, died 643 (1245) in the Brit. Mus., Or. 7735 (s. *Descriptive List of the Arab. Mss. acquired by the Trustees since 1894*, London 1912, p. 35), as well as a fragments of his *Amâlî* in Damascus, al-Zaiyât, *op. cit.*, p. 29, N°. 5).

Bibliography: Yâḳût, *Irshâd al-Arîb*, ed. Margoliouth, V, 139—146; Ibn Khallikân, Bûlâḳ 1299, N°. 414; al-Subkî, *Ṭabaḳât al-Shâfi'îya al-kubrâ*, iv. 273—277; *Liber classium virorum*, *auct. Dahabio*, ed. Wüstenfeld, Gottingae 1833-1834, xiv. 16; Wüstenfeld, *Die Geschichtschreiber der Araber*, N°. 267.

2. His son al-Ḳâsim, born 527 = 1132, died 600 = 1203, wrote in addition to other works *al-Djâmi' al-mustaḳṣâ fî Faḍâ'il al-Masdjid al-Aḳṣâ*, one of the two main sources of the *Bâ'ith al-Nufûs* of Ibn al-Firkâḥ; cf. al-Subkî, *Ṭabaḳât al-Shâfi'îya*, v. 148. (C. Brockelmann.)

IBN 'ÂṢIM, Abû Bakr Muḥammad b. Muḥammad b. Muḥammad b. Muḥammad b. 'Âṣim, a Mâlikî jurist, author, and grammarian, born on the 12th Djumâdâ I 760 (11th April 1359) at Granada, where he died on the 11th Shawwâl 829 (15th Aug. 1426).

During his studies he continued to follow the trade of a bookbinder and latter filled the delicate duties of chief ḳâḍî of Granada. His teachers were Abû Sa'îd Faradj b. Ḳâsim b. Aḥmad b. Lubb al-Tha'labî, chief muftî of Granada, the author Abû 'Abd Allâh Muḥammad b. Muḥammad b. 'Alî al-Ḳaidjâṭî, the celebrated champion of the Sunna Abû Isḥâḳ Ibrâhîm b. Mûsâ b. Muḥammad al-Shâṭibî, 'Abd Allâh b. al-Imâm al-Sharîf of Tlemcen, etc. Of the ten works ascribed to him by his biographers we know only two: 1. *Tuḥfat al-Ḥukkâm fî Nukat al-'Uḳûd wa 'l-Aḥkâm* or briefly *al-'Âṣimîya*, a sketch of Mâlikî law in 1698 Radjaz-verses (printed Algiers 1322, 1327 and Fâs; publ. in Cairo publ. in the *Madjmû' al-Mutûn*; with French transl. by Houdas and Martel, *Traité de droit musulman*, *La Tohfat d'Ebn Acem*, *texte arabe avec trad. fr.*, *comment.*, *juridique et notes philolog.*, Algiers 1882—3); 2. *Ḥadâ'iḳ al-Azâhir fî Mustaḥsan al-Adjwiba wa 'l-Muḍḥikât wa 'l-Ḥikam wa 'l-Amthâl wa 'l-Ḥikâyât wa 'l-Nawâdir*, a collection of more or less interesting anecdotes, popular proverbs, answers to which there is no reply, etc., divided into 6 *ḥadîḳa* (garden) of which each includes one, two or three chapters (printed in Fâs n. d.; this edition should be compared with the Paris MS. Bibl. Nat., *Catal.*, N°. 3528 and the Brit. Mus. MS., Rieu, *Suppl.*, N°. 1145, 1.).

Bibliography: Aḥmad Bâbâ, *Nail al-Ibtihâdj* (Fâs 1317), p. 299; do., *Kifâyat al-Muḥtâdj*, MS. of the Medresa in Algiers, f. 153 v°; Brockelmann, *Gesch. d. arab. Litt.*, ii. 264. (Moh. Ben Cheneb.)

IBN 'ASKAR, Muḥammad b. 'Alî b. 'Omar b. Ḥusain b. Miṣbâḥ, was born at al-Ḥiṣn in the district of Ḳaṣr al-Ṣaghîr in north Morocco. He is known to fame as the author of the *Dawḥat al-Nâshir li-Maḥâsin man kâna min al-Maghrib*

min Ahl al-Ḳarn al-'āshir, a collection of biographies of learned men and saints whom he had known personally or at second hand, composed about the year 1575. The Ḥasanī Sharīf 'Abd Allāh al-Ghālib was, contrary to custom, succeeded by his son Muḥammad in 1573. War broke out between Muḥammad and his uncle 'Abd al-Malik. Ibn 'Askar threw in his lot with the former and was slain at the battle of Wādī 'l-Makhāzin close to Ḳaṣr al-Kabīr, in which Muḥammad along with Dom Sebastian of Portugal perished, 'Abd al-Malik dying at the commencement of the battle (August 1578; Wafrānī, *Nuzhat al-Ḥādī*, ed. Houdas, p. 73 *sqq.*). The *Dawḥa* is continued by al-Wafrānī, *Ṣafwat man intashar min Akhbār Ṣulaḥā' al-Ḳarn al-ḥādī 'ashar*, Fās n. d. Cf. also *Nashr al-Mathānī* of Muḥammad b. al-Ṭaiyib. The *Dawḥa* has been lithographed at Fās, in 1891, *Nashr al-Mathānī* in 1892.

Bibliography: *La "Daouhat an-Nachir"* .... trad. par A. Graulle, *Archives Marocaines*, xix. (1913). (T. H. Weir.)

IBN al-'ASSĀL. During the first half of the xiiith century A. D. there took place among the Copts a pronounced religious and intellectual renaissance, assuming, by the necessity of the case, an Arabic form. In it three brothers, known as the Awlād al-'Assāl, were prominent. Al-'Assāl, the father, to judge from the titles given to him in the MSS., was of high rank and good family, and there is mention also of a *dār*, or great house, in Cairo as belonging to an Ibn al-'Assāl. Unfortunately this name is given in the MSS. to all the three brothers, and the resultant confusion was first fairly disentangled by Rieu (*Suppl. to Cat. of Arab. MSS in Brit. Mus.*, p. 18) and Alexis Mallon (*Journ. as.*, Nov.-Dec. 1905, p. 509 *sqq.*). Yet much remains uncertain. Of them al-As'ad Abu 'l-Faradj Hibat-Allāh was the philologist and exegete. He wrote in Arabic a Coptic grammar (Mallon, *Une École de Savants égyptiens au Moyen Age* in the Beyrouth *Mélanges*, i. 122 *sqq.*); edited an eclectic Arabic version of the Gospels, in which he calls himself *al-kātib al-Miṣrī* (Guidi, *Le traduzioni degli Evangelii in arabo e in etiopico*; D. B. Macdonald, *Ibn al-'Assāl's Arabic version of the Gospels* in *Homenaje á Codera*, p. 375 *sqq.* — gives text and translation of introduction); also wrote an introduction to the Epistles of Paul (de Goeje in *Cat. Cod. orient.* (Leiden), v. p. 83). Al-Ṣafī Abu 'l-Faḍā'il was a canonist and controversialist. Besides several theological tractates he compiled an abbreviated collection of the canons formulated at the Coptic synod held in Cairo in A. D. 1239 at the church of the Ḥārat Zuwaila (Renaudot, *Hist. Patr. Alex.*, p. 585 *sq.* The third brother, Abū Isḥāḳ, was apparently younger. He speaks of his two brothers as already famous, and in one place adds to their names a formula (*raḥimahumā 'llāh*) implying that they were dead. He himself apparently held some official position, for he is called *al-Mu'taman*, also *Mu'taman al-dawla* and *al-ṭin al-maṣīḥī*. His most important work was a *Sullam*, a Coptic-Arabic vocabulary, embracing the words used in the liturgical books, arranged in the alphabetic order of their rhymes. This vocabulary was published in 1643 by Kircher in his *Lingua aegyptiaca restituta*, pp. 273-493, and the introduction has been given in text and translation by Mallon in his *École des Savants égyptiens* in the Beyrouth *Mélanges*, ii. 214 *sqq.* A general collection of canons of the Church "from those of the Apostles to those of the Emperors" is assigned to him by Rieu on the authority of Brit. Mus. MS. Or. 1331; it was completed in A. D. 1238. In 1895 Arabic sermons (*khuṭab*) ascribed to him in some MSS. were published by Gomma Mīkhā'īl and in 1906 some theological tractates, from the *Uṣūl al-Dīn*, which are also ascribed to him in some MSS., by Louis Cheikho in his *Seize traités théologiques* (p. 110 *sqq.*). There they are assigned to Abu 'l-Faradj, just as Gomma gives the sermons to al-Ṣafī. Besides this uncertainty we have almost no precise dates for the lives of the brothers. The *Khuṭab* published by Gomma are asserted to be from an autograph MS. dated 1214, which is against their being by the youngest of the brothers.

Bibliography is given above. The most important references are to Alexis Mallon.

(D. B. Macdonald.)

IBN 'AṬĀ' ALLĀH, Aḥmad b. Muḥammad Abu 'l-Faḍl Tādj al-Dīn al-Iskandarī al-Shādhilī, an Arab mystic and one of the most vigorous opponents of Ibn Taimīya [q. v.], died on the 16 Djumādā II 709 = 21 Nov. 1309 in the Madrasa al-Manṣūriya in Cairo. Of his works detailed by Brockelmann, *Gesch. d. ar. Litt.*, II, 117-118, there have been printed 1) *al-Ḥikam al-'Aṭā'iya* with the commentary of Muḥammad b. Ibrāhīm b. 'Abbād al-Nafzī al-Rondī, died 796 = 1394, Būlāḳ 1285, Cairo 1303, 1306 (with the commentary of 'Abd Allāh al-Sharḳāwī on the margins). On it there is a Turkish commentary *al-Mubham fī Sharḥ al-Ḥikam* by Māhir Kastamunili Ḥādjdjī Aḥmed, Stambul 1323; an anonymous Malay commentary printed in Mecca (1302), is mentioned by Snouck Hurgronje, *Mekka*, ii. 387, 7. 2) *Tādj al-'Arūs wa Ḳamʿ al-Nufūs* (or *al-Ḥāwī fī Tahdhīb al-Nufūs*), Cairo 1275, 1282, 1305, 1327. 3) *Laṭā'if al-Minan fī Manāḳib al-Shaikh Abi 'l-'Abbās wa-Shaikhihi Abi 'l-Ḥasan*, biographies of the Ṣūfīs Shihāb al-Dīn Aḥmad al-Mursī (died 686 = 1287) and his teacher Taḳī al-Dīn 'Alī b. 'Abd Allāh al-Shādhilī (died 656 = 1258), Tunis 1304, lith. Cairo 1277, along with *Miftāḥ al-Falāḥ wa Miṣbāḥ al-Arwāḥ*, on the margin of the *Laṭā'if al-Minan* of al-Sha'rānī, Cairo 1321.

Bibliography: Subkī, *Ṭabaḳāt al-Shāfi'īya al-kubrā*, v. 176; Suyūṭī, *Ḥusn al-Muḥāḍara*, i. 301; 'Alī Bāshā Mubārak, *al-Khiṭaṭ al-djadīda*, vii. 70; Wüstenfeld, *Die Geschichtschreiber der Araber*, N⁰. 382. (C. Brockelmann.)

IBN A'THAM al-KŪFĪ, Muḥammad b. 'Alī, Arab historian, of whom we only know that he died about 314 = 926 (s. Frähn, *Indications bibliographiques*, p. 16), whom Wüstenfeld (*Geschichtschr.*, N⁰. 541) erroneously places in the year 1063 A. H. He wrote from the Shī'ī point of view a romantic history of the early caliphs and their conquests, Pertsch, *Verzeichnis der arab. Hdss. der Herzogl. Bibl. zu Gotha*, N⁰. 1592, which Muḥammad b. Muḥammad Mustawfī al-Harawī translated into Persian in 596 = 1199, s. Rieu, *Catalogue of the Persian Mss. in the British Museum*, i. 150 (where other Mss. are detailed), from which is taken *The History of the Conquest of Zoor and The Flight and Murder of Yezdejherd-Transl. from the Persian of Ahmad ibn Asem of Cufa*, by E. Gerrans, in Ouseley's *Oriental Collections*, i.

63, 161 *sqq.* (Pers. text in Wilken's *Pers. Chrestomathie*, p. 132, 1., Germ. transl. in *Asiat. Museum*, ii. 161) and *The Invasion of Nubia* and *Historical Anecdote*, transl. by W. Ouseley, in *Oriental Collections*, i. 333, ii. 58.

(C. BROCKELMANN.)

IBN AL-ATHĪR. This name was born by three brothers, natives of Djazīrat Ibn 'Umar [q. v.] who are among the most celebrated and important Arab scholars and authors.

1. The oldest brother was 1. MADJD AL-DĪN ABU 'L-SA'ĀDĀT AL-MUBĀRAK B. MUḤAMMAD, born in 544 (1149), died at Mōṣul in 606 (1210) cf. Ibn al-Athīr, *Kāmil*, xii. 190. He devoted himself mainly to the study of the Ḳur'ān, tradition and Arabic grammar. The titles of the works composed by him are given by Ibn Khallikān, *Wafayāt*, ed. Wüstenfeld, Nº. 524, Yāḳūt, *Irshād*, ed. Margoliouth, vi. 238 *sqq.*, and by Brockelmann, *Gesch.*, i. 357. As to the events of his life, he studied grammar with Ibn al-Dahhān at Mōṣul, and Ḥadīth at Baghdād, then entered the service of the Emir Ḳaimāz, who acted as regent for a considerable period in the reign of Saif al-Dīn Ghāzī, and was chief of the chancellery under Ghāzī's successors Mas'ūd b. Mawdūd [q. v.] and Nūr al-Dīn Arslān Shāh [q. v.], although, as his brother tells us, he was reluctant to assume this high office, and only did so at the wish of Nūr al-Dīn. He became lame as the result of an illness and is said to have composed most, if not all as Ibn Khallikān tells, of his works after this misfortune. He made his house a *ribāṭ* for Ṣūfīs.

2. The second brother, 'IZZ AL-DĪN ABU 'L-ḤASAN 'ALĪ B. MUḤAMMAD, born 555 (1160) at Djazīra, died at Mōṣul in 630 (1234) is the author of the famous history, *al-Kāmil fi 'l-Ta'rīkh*, often quoted here. He also wrote the history of the Atābegs of Mōṣul (ed. in the *Recueil des Historiens arabes des Croisades*, vol. ii.), an alphabetical dictionary of the contemporaries of Muḥammad entitled *Usd al-Ghāba fī Ma'rifat al-Ṣaḥāba*, ed. Cairo, 1280, and a synopsis of the *Kitāb al-Ansāb* of al-Sam'ānī [q. v.] entitled *al-Lubāb*, which was still further epitomised by al-Suyūṭī under the title *Lubb al-Lubāb* (ed. Veth, Lugd. Bat. 1840). The most important of these works, the chronicle, ends with the year 628 and is a compilation of the greatest value. On the first part of it cf. Brockelmann, *Das Verhältnis von Ibn-el-Aṯīrs Kāmil fit-ta'rīḫ zu Ṭabarīs Aḫbār errusul walmulūk*. 'Izz al-Dīn studied in Mōṣul and Baghdād and also travelled in Syria, for the rest he lived only for knowledge as a private scholar. Cf. Ibn Khallikān, *Wafayāt*, ed. Wüstenfeld, Nº. 433; Brockelmann, *Geschichte* i. 345 (where other literature is given).

3. The third brother, ḌIYĀ' AL-DĪN ABU 'L-FATḤ NAṢR ALLĀH, born 558 (1163) in Djazīra, died 637 (1239) in Baghdād, was particularly distinguished as a stylist. His work on rhetoric, *al-Mathal al-sā'ir fī Adab al-Kātib wa 'l-Shā'ir* (printed Būlāḳ 1282), enjoys a great authority in the Muslim world. Other writings of his are given by Ibn Khallikān and Brockelmann, *Gesch.*, i. 297. Unlike his brother the historian, Ḍiyā' al-Dīn led a very active life. Introduced to Ṣalāḥ al-Dīn by the Ḳāḍī al-Fāḍil [q. v.] he entered his service in 587 and soon afterwards became vizier of al-Malik al-Afḍal, son of Ṣalāḥ al-Dīn. When Damascus was taken from him, Ḍiyā' al-Dīn escaped with great difficulty to Egypt in a bolted box, and did not appear again till al-Afḍal had become lord of Sumaisāṭ in compensation for his previous territory. But he only remained a short time here, entered the service of the ruler of Ḥalab in 607 (1210) only to leave it soon after to seek his fortune first in Mōṣul, then in Irbil and Sindjār. In 618 (1221) he obtained a position as chief of the Dīwān al-Inshā' at the court of Nāṣir al-Dīn Maḥmūd, prince of Mōṣul. He died there on one of his journeys to Baghdād. His son Sharaf al-Dīn Muḥammed, who was also an author, died in his youth in 622 (1225).

Bibliography: Ibn Khallikān *Wafayāt*, ed. Wüstenfeld, Nº. 734; Brockelmann, *op. cit.*; Goldziher and Margoliouth in the references given by Brockelmann.

Still other authors are known under the name Ibn al-Athīr e. g. 'Imād al-Dīn Abu 'l-Fidā' Ismā'īl, died 699, on whom cf. Brockelmann, *op. cit.*, i. 341; Goldziher, *Abhandlungen zur arab. Philologie*, i. 71, mentions another.

IBN AL-'AWWĀM, whose full name was ABŪ ZAKARĪYĀ YAḤYĀ B. MUḤAMMAD B. AḤMAD B. AL-'AWWĀM AL-ISHBĪLĪ, the author of a large work on agriculture, *Kitāb al-Falāḥa*. Practically nothing is known of the life of this author: we only know that he flourished towards the end of the xiith century and that he lived in Seville. Ibn Khaldūn mentions him although not being acquainted with his book which he considers a recension of *al-Falāḥa al-Nabaṭīya* [see IBN AL-WAḤSHĪYA]; neither Ḥādjdjī Khalīfa nor Ibn Khallikān quote him.

Casiri in his *Catalogue* was the first to call attention to the complete manuscript preserved in the Escurial. It was then edited with a Spanish translation in 1802 by his pupil J. A. Banqueri. The book is divided into 34 chapters of which the first 30 deal with agriculture and the last 4 with cattle-rearing. E. Meyer gives a summary of it in his *Geschichte der Botanik*. Clément-Mullet published a French translation in 1864. Dozy (*Suppl.*, Introd., p. xviii) and after him C. C. Moncada severely criticise both editor and translator.

Bibliography: J. A. Banqueri, *Libro de Agricultura. Su autor el doctor excelente Abu Zacaria Iahia . . ., Ebn El Awam, Sevillano*, Tom. i—ii., Madrid 1802; C. C. Moncada, *Sul taglio della vite di Ibn al-'Awwâm* in *Actes du 8e congrès des Orientalistes*, Stockholm 1889, ii. 215—257; E. Meyer, *Geschichte der Botanik*, iii. 260—266; Brockelmann, *Gesch. d. arab. Litt.*, i. 494 *sq.*

(J. RUSKA.)

IBN BĀBŪYA, ABŪ DJA'FAR MUḤAMMAD B. 'ALĪ B. ḤUSAIN B. MŪSĀ AL-ḲUMMĪ AL-ṢADŪḲ, was one of the four greatest of the collectors of the Shī'a Traditions. In the prime of life, 355 (966), he went from Khurāsān to Baghdād and many learned men of the place became his pupils. He died in Raiy 381 (991) and is also known as al-Ṣadūḳ. Of his writings the following may be mentioned: 1. *Kitāb man lā yaḥḍuruhu 'l-Faḳīh*, a work on the Shī'a Traditions. It is one of the four books of Shī'a Traditions, called *al-Kutub al-Arba'a*. [The other three are *a*. *al-Kāfī* by Abū Dja'far Muḥammad b. Ya'ḳūb al-Kulīnī, d. 328 (939) or 329 (940); *b*. *Tahdhīb al-Aḥkām*; *c*. *al-Istibṣār* both by Abū Dja'far Muḥammad b. al-Ḥasan b. 'Alī al-Ṭūsī, d. 460 (1067)]. 2. *Ma'ānī al-Akhbār*, a collection of Shī'a Traditions. 3. *'Uyūn Akhbār al-Riḍā*, an ac-

count of the life and sayings and doctrines of ʿAlī al-Riḍā, the eighth Imām of the Shīʿa. 4. *Kitāb Ikmāl al-Dīn wa Itmām al-Niʿma*, a work on the Shīʿa doctrine of the hidden Imām, partly edited by E. Möller, *Beiträge zur Mahdilehre des Islams*, i., Heidelberg 1901.

It is said that he was the author of three hundred works; al-Nadjāshī in his work *Kitāb al-Riḏjāl*, p. 276 (Bombay ed. 1317), enumerates 193 of his works.

Bibliography: *Fihrist*, p. 196; al-Ṭūsī, *List*, ed. (M. HIDAYET HOSAIN.)

IBN BADJDJA, i. e. AVEMPACE (according to Ibn Khaldūn *bādjdja* is a Frankish word, meaning silver) or to give him his proper name ABŪ BAKR MUḤAMMAD B. YAḤYĀ, also known by the name of IBN AL-ṢĀʾIGH, i. e. filius Aurificis, a celebrated Arab philosopher. Ibn Bādjdja was born in Saragossa towards the end of the vth (xith) century and was for about 20 years vizier to Abū Bakr b. Ibrāhīm, a brother-in-law of the Almoravid ʿAlī b. Yūsuf, who acted as the latter's governor in Granada and afterwards in Saragossa. He afterwards went to Fās and there fell a victim to the intrigues of his enemies. In 533 (1138) he is believed to have been poisoned at the instigation of the physician Ibn Zahr. His enemies, among whom was Fatḥ Ibn Khāḳān [q. v.], stirred up the populace and the authorities against him by decrying him as an atheist, who had rejected the Ḳurʾān and the dogmas of Islām.

Ibn Bādjdja, who died young, was not only a philosopher but was also well acquainted with natural science, astronomy, mathematics and medicine; he had also a great reputation as a musician. He wrote commentaries on several works of Aristotle and published other treatises also, which are detailed by Leclerc from Ibn Abī Uṣaibiʿa but are for the most part now lost or have only survived in Hebrew or Latin translation. Cf. *Die Abhandlung des Abū Bekr Ibn al-Ṣāig "Vom Verhalten des Einsiedlers"* (*Kit. Tadbīr al-Mutawaḥḥid*), according to Moses Narbonis synopsis.... ed. by Dr. D. Herzog, Berlin 1896 (*Beitr. zur Philos. des Mittelalters*, Heft 1). For an appreciation of his philosophical views the reader may be referred to the works of Munk and de Boer given below.

Lippert, p. 406; Munk, *Mélanges*, p. 383 *sqq.*; Leclerc, *Histoire de la médecine arabe*, ii. 75 *sqq.*; de Boer, *Geschichte der Philosophie im Islam*, p. 156 *sqq.*

IBN BADRŪN. [See IBN ʿABDŪN.]

IBN AL-BAIṬĀR, ABŪ MUḤAMMAD ʿABD ALLĀH B. AḤMAD ḌIYĀʾ AL-DĪN IBN AL-BAIṬĀR AL-MĀLAḲĪ, the celebrated botanist and herbalist. He probably belonged to the Ibn al-Baiṭār family of Malaga (cf. Ibn al-Abbār, *al-Muʿdjam*, Nº. 35, 165, 241) and was born in the last quarter of the vith (xiith) century. As his teacher of botanical subjects, special mention should be made of Abu 'l-ʿAbbās al-Nabātī, with whom he used to collect plants in the vicinity of Seville. When about 20 he set out to travel through North Africa, Morocco, Algiers and Tunis to study botany. Reaching Egypt, where the Ayyūbid al-Malik al-Kāmil was then reigning, he entered his service, was appointed *Raʾīs ʿalā sāʾiri 'l-ʿAshshābīn* i. e. "chief botanist"; on al-Kāmil's death he continued in the service of his son al-Malik al-Ṣāliḥ Nadjm al-Dīn who lived in Damascus. From Damascus Ibn al-Baiṭār botanised in Syria and Asia Minor as a herbalist and wrote the two books, which have made his name famous, as the result of his studies and practical research: the *Kitāb al-Djāmiʿ fi 'l-Adwiya al-mufradāt* (so Ibn Abī Uṣaibiʿa, ii. 133); printed in 1291 under the title *Kitāb al-Djāmiʿ li-Mufradāt al-Adwiya wa 'l-Aghdhiya*, a collection of "simple remedies" from the animal, vegetable, and mineral worlds collected from Greek and Arabic authors and his own experiments and arranged in alphabetical order, and the *Kitāb al-mughnī fi 'l-Adwiya al-mufrada*, a book on *materia medica* arranged according to the organs affected, in brief form for the use of physicians. Ibn Abī Uṣaibiʿa was a pupil of Ibn al-Baiṭār and accompanied him on botanical excursions in the neighbourhood of Damascus, but he does not give much information about him. Ibn al-Baiṭār died in 646 (1248) in Damascus.

J. v. Sontheimer's translation of the first named work is defective; the edition published by Leclerc in *Notices et Extraits*, xxiii. i., xxv. i., xxvi. i. (1877—1883) may be considered reliable.

(J. RUSKA.)

IBN BAḲIYA, NAṢĪR AL-DAWLA ABŪ 'L-ṬĀHIR MUḤAMMAD B. MUḤAMMAD B. BAḲIYA, Bakhtiyār's vizier. Ibn Baḳiya was born in Awānā and was of humble origin. He was first employed at Muʿizz al-Dawla's court as master of the kitchen and in Dhu 'l-Ḥidjdja 362 (Sept. 973) Bakhtiyār gave him the office of vizier. After the conquest of Baghdād and the imprisonment of Bakhtiyār in 364 (975) by ʿAḍud al-Dawla, Ibn Baḳiya went over to the latter and was granted Wāsiṭ and the surrounding country. As soon as he entered this town he abandoned his allegiance to ʿAḍud al-Dawla. The latter was defeated and had to retire to al-Fārs and abandon the capital Baghdād to Bakhtiyār. Ibn Baḳiya then reappeared in Baghdād where he did his utmost to incite Bakhtiyār against ʿAḍud al-Dawla. In 366 (976-7) the latter advanced and defeated Bakhtiyār at al-Ahwāz. The latter had to flee and went to Wāsiṭ. In Dhu 'l-Ḥidjdja of the same year (August 977)

he had Ibn Baḳiya seized and blinded as the latter had shown himself too independent. Soon afterwards the vizier was handed over to his enemy ʿAḍud al-Dawla, who had him trampled to death by elephants in Shawwāl 367 (May 978). Ibn Baḳiya was 50 years of age at the time of his death.

Bibliography: Ibn Khallikān (ed. Wüstenfeld), Nº. 709 (transl. by de Slane, iii. 272 *sqq.*); Ibn al-Athīr (ed. Tornberg), viii. 462—6, 479—482, 495 *sq.*, 507.

(K. V. ZETTERSTÉEN.)

IBN AL-BALADĪ, SHARAF AL-DĪN ABŪ DJAʿFAR AḤMAD B. MUḤAMMAD B. SAʿĪD, al-Mustandjid's vizier. In 563 (1166-8) Ibn al-Baladī, who at that time was *Nāẓir* in Wāsiṭ, was appointed vizier. There was an old feud between him and the Ustād-dār ʿAḍud al-Dīn Muḥammad b. ʿAbd Allāh. After the murder of the caliph in Rabīʿ II 566 (December 1170) by ʿAḍud al-Dīn and the Emīr Ḳuṭb al-Dīn, they forced his successor al-Mustaḍīʾ to appoint ʿAḍud al-Dīn vizier, whereupon Ibn al-Baladī was executed.

Bibliography: Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 426—9; Ibn al-Athīr (ed. Tornberg), xi. 216 *sqq.*, 230, 237.

(K. V. ZETTERSTÉEN.)

IBN AL-BANNĀʾ ("son of the architect"), whose full name was ABU 'L-ʿABBĀS AḤMAD B. MUḤAMMAD B. ʿOTHMĀN AL-AZDĪ, a versatile Moroccan scholar, especially distinguished in mathematics, astronomy, astrology and other secret sciences, and also in medecine. He was born in Marrākush on the 9th Dhu 'l-Ḥidjdja 654 = 28th Dec. 1256 (according to others 639, 649 or even 656). After studying grammar, Ḥadīth, Fiḳh, and mathematics in his native town, he went to Fās where he studied under the physician al-Mirrīkh, the mathematician Ibn Ḥadjla, and the astronomer Ibn Makhlūf al-Sidjilmāsī. He was for a considerable time a follower of the Ṣūfī ʿAbd al-Raḥmān al-Hazmīrī, who admitted him to his order. He often fasted in complete retirement; his biographers praise his noble character and pure life. Ibn al-Bannāʾ died on Saturday the 6th Radjab 721 (Aug. 1321) in Marrākush, where he was buried outside the Bāb Aghmāt; 723 or 1724 is also given as the year of his death. Of the 74 writings which are ascribed to him, a whole series of mathematical and astronomical works are still extant in libraries (cf. the references in Brockelmann, *op. cit.*). Here we will only mention *Talkhīṣ Aʿmāl al-Ḥisāb* (Synopsis of the operations of Calculation), publ. in a French transl. by A. Marre in the *Atti dell' Accad. pontif. de' Nuovi Lincei*, Vol. xvii. 1864, repr. Rome 1865. Several Arab scholars have written commentaries on this *Talkhīṣ* which is said to be a synopsis of the arithmetic of a certain Abū Zakariyā al-Ḥaṣṣār (cf. *Biblior. mathem.* 3d Ser., Vol. ii., p. 12—40); among these we may mention Aḥmad b. al-Madjdī and ʿAlī b. Muḥammad al-Ḳalaṣādī (cf. *Abhandl. z. Gesch. d. math. Wissensch.*, x. 180—182). F. Woepcke has made an excerpt on the summation of series from the first commentary, entitled *Passages relatifs à des sommations de séries de cubes*, Rome, 1864; the same scholar has given several passages in translation from the second in the above mentioned treatise and in the *Journal Asiatique*, Ser. vi., Vol. i. (1863), p. 58—62. — Ibn al-Bannāʾ shows some advance on the older Arab mathematicians of the East in Arithmetic, particularly in counting with fractions; he is also to be considered one of the chief users of Indian numerals in the form used by the Western Arabs (*Ghubār* figures). [Cf. the article ḤISĀB].

Astronomen der Araber u. ihre Werke* (*Abhandl. zur Gesch. der Mathem. Wiss.*, Number x., Leipzig 1900), p. 162 *sqq.*, Nº. 399.

(H. SUTER—MOH. BEN CHENEB.)

IBN BARRĪ, ABŪ MUḤAMMAD ʿABD ALLĀH B. BARRĪ B. ʿABD AL-DJABBĀR B. BARRĪ AL-MAḲDISĪ AL-MIṢRĪ, Arab grammarian and philologist, born at Damascus 5th Radjab 499 (13th March 1106), died at Cairo in the night of Friday-Saturday 27th Shawwāl 582 (9th-10th Jan. 1187), a scholar of extraordinary repute, who is considered a philological authority and is called by many "king of the grammarians". The author of the *Lisān al-ʿArab* has borrowed a great deal from him. His teachers were the grammarians Abū Bakr Muḥammad b. ʿAbd al-Malik al-Shantarīnī, Abū Ṭālib ʿAbd al-Djabbār b. Muḥammad b. ʿAlī al-Maʿāfirī al-Ḳurṭubī, Abū Ṣādiḳ al-Madīnī, Abū ʿAbd Allāh al-Rāzī etc. His best pupil was Abū Mūsā ʿĪsā b. ʿAbd al-ʿAzīz al-Djazūlī. He is the author of the following works: 1. *Kitāb al-Tanbīh wa 'l-Īḍāḥ ʿammā* (var. *ʿalā mā*) *waḳaʿa min al-Wahm fī Kitāb al-Ṣiḥāḥ*, corrections and additions to Djawharī's *Dictionary*; he is said to have died when engaged on the root *waḳsh* and ʿAbd Allāh b. Muḥammad b. ʿAbd al-Raḥmān al-Baṣrī completed his work (Derenbourg, *Mss. ar. de l'Escurial*, Nº. 585); 2. *Ḥawāshī ʿala 'l-Muʿarrab*, critical notes and additions to al-Djawālīḳī's dictionary of foreign words (Derenbourg, *op. cit.*, Nº. 772, 3); 3. *Kitāb Ghalaṭ al-Ḍuʿafāʾ min al-Fuḳahāʾ*, a collection of neologisms or errors of speech in the jurists (ed. by Ch. C. Torrey in *Oriental. Stud. Th. Nöldeke gewidmet*, Gieszen 1906); 4. *al-Djawāb ʿan al-Ḥarīrī*, a small pamphlet in defence of the *Maḳāmas* of al-Ḥarīrī against the sharp criticism of Ibn al-Khashshāb (pr. Constantinople 1320).

The thirteen verses on the different meanings of the word *khāl*, which Brockelmann ascribes to him and which are in the *Lisān*, are by Thaʿlab (cf. Abū Hilāl al-ʿAskarī, *Kitāb al-Ṣināʿatain*, Constantinople 1320, p. 335).

Bibliography: Ibn Khallikān, *Wafayāt* (Cairo 1310), i. 268; al-Suyūṭī, *Ḥusn al-Muḥāḍara* (Cairo 1321), i. 255; do., *Bughyat al-Wuʿāt* (Cairo 1326), p. 278; Abu 'l-Fidāʾ, *Taʾrīkh* (Constantinople 1286), iii. 75; al-Subkī, *Ṭabaḳāt al-Shāfiʿīya* (Cairo 1324), iv. 233 *sqq.*; Brockelmann, *Gesch. d. arab. Litt.*, i. 301 *sq.*; *Tādj al-ʿArūs s. v.* ... (MOH. BEN CHENEB.)

IBN BARRĪ, ABU 'L-ḤASAN ʿALĪ B. MUḤAM-

MAD B. ʿALĪ B. MUḤAMMAD B. AL-ḤUSAIN AL-RIBĀṬĪ, an Arab philologist, born about 660 (1261-2) at Tāza, where he died in 730 or 731 or 733 (1329—1333) and was buried, although some place his tomb in Fās, wrongly.

Widely acquainted with Islāmic sciences he was particularly esteemed as an authoritative critic of the different recensions of the Ḳurʾān and his *al-Durar al-Lawāmiʿ* is as popular in North Africa as the *Adjurrūmiya*.

After being *ʿadl* (professional witness) for a period he was appointed to conduct the official correspondence of the government at Tāza, an office which he held till his death, on the recommendation of a pupil of his, a ḳāḍī, who did not care to see his former teacher in this subordinate position.

Of his works only two have survived to us: 1. 30 radjab verses *fī Makhāridj al-Ḥurūf*, in which the author marks the place of articulation of the Arabic letters (Ms. Berlin, *Verzeichn.*, Nº. 548); 2. *al-Durar al-Lawāmiʿ fī Aṣl Maḳraʾ al-Imām Nāfiʿ*, a poem of 242 Radjaz verses, which was completed in 697 (1298) and deals with the recension of the Ḳurʾān according to Nāfiʿ b. ʿAbd al-Raḥmān b. Abū Nuʿaim al-Madanī (d. 159 = 775-6 or 169 = 785), often published in Cairo and Tunis in the collections of treatises on recensions of the Kurʾān and its orthography).

Bibliography: Ibrāhīm b. Aḥmed al-Mārighnī al-Tūnisī, *al-Nudjūm al-ṭawāliʿ ʿalā ʾl-Durar al-lawāmiʿ* etc. (Tunis 1322), p. 231; Brockelmann, *Gesch. d. arab. Litt.*, ii. 248 *sq.*

(MOH. BEN CHENEB.)

IBN BASHKUWĀL, ABU ʾL-ḲĀSIM KHALAF B. ʿABD AL-MALIK B. MASʿŪD B. MŪSĀ B. BASHKUWĀL B. YŪSUF B. DĀḤA B. DĀKA B. NAṢR B. ʿABD AL-KARĪM B. WĀḲID AL-ANṢĀRĪ, Arabic biographer, a descendant of a family belonging to Shorroyon (Xorroyon, Sorrion) near Valencia, born on the 3rd Dhu ʾl-Ḥidjdja 494 = 29th Sept. 1101 at Cordova, acquired here and in Seville a great knowledge of Tradition and the history of his native land and was for a period representative of the Ḳāḍī Abū Bakr Ibn al-ʿArabī in a quarter of Seville. He died at Cordova on the night of Tuesday/Wednesday the 8th Ramaḍān 578 = 4th/5th Jan. 1183. His most important teachers were Abū Muḥammad Ibn ʿAttāb, Abu ʾl-Walīd Ibn Rushd, Abū Bakr Ibn al-ʿArabī, etc.; among his pupils all of whom predeceased him, we may mention Abū Bakr b. Khair and Abu ʾl-Ḳāsim al-Ḳanṭarī.

Ibn Bashkuwāl enjoyed a special reputation among all compilers of Arabic biographical dictionaries and, according to Ibn al-Abbār, he was the last authority on Tradition in Cordova and the soundest authority on the history of Spain.

Of the 50 works which he is said to have composed only two are known to us: 1. *Kitāb al-Ṣila fī Taʾrīkh Aʾimmat al-Andalus etc.*, a biographical dictionary of the Arab scholars of Spain, completed on the 3rd Djumādā I 534 = 27th Dec. 1139, a supplement to the biographical dictionary of Ibn al-Faraḍī (ed. F. Codera in *Bibl. Arab. Hisp.*, Vol. i. and ii., Madrid 1883); 2. *Kitāb al-Ghawāmiḍ wal-Mubhamāt min al-Asmāʾ*, a dictionary of authorities on Tradition, whose names are difficult to spell or are easily confused with others (Berlin, *Verz.*, nº. 1673).

Bibliography: Ibn Khallikān, *Wafayāt* (Cairo 1310), i. 172; al-Dhahabī, *Tadhkirat al-Ḥuffāẓ* (Haiderābād n. d.), iv. 132 *sqq.*; Ibn Farḥūn, *al-Dībādj* (Fās 1316), p. 116; Ibn al-Abbār, *Takmila*, nº. 179; do., *al-Muʿdjam*, nº. 70; al-Suyūṭī, *Ṭabaḳāt al-Ḥuffāẓ*, ed. Wüstenfeld, xvii., nº. 1; Wüstenfeld, *Die Geschichtschreiber der Araber*, nº. 270; Pons Boigues, *Ensayo bio-bibliográfico*, nº. 200; Brockelmann, *Gesch. der arab. Litt.*, i. 340.

(MOH. BEN CHENEB.)

IBN BAṬṬŪṬA (BAṬŪṬA), MUḤAMMAD B. ʿABD ALLĀH B. MUḤAMMAD B. IBRĀHĪM, ABŪ ʿABD ALLĀH, AL-LAWĀTĪ AL-ṬANDJĪ, Arab traveller and author, born on the 14th Radjab 703 = 24th Febr. 1304 at Tangier, began the pilgrimage to Mecca 725 = 1325. He went via North Africa through Upper Egypt to the Red Sea. As he could not find a safe crossing here he turned back and reached his destination via Syria and Palestine. From Mecca he went through the ʿIrāḳ and thence visited Persia as well as Mōṣul and Diyār Bakr. He next paid a second visit to Mecca where he spent the years 729 and 730. A third journey led him over South Arabia to East Africa and back to the Persian Gulf. From Hormuz he returned to Mecca and thence went via Egypt and Syria to Asia Minor and the Crimea. He visited Constantinople in the retinue of a Greek princess, wife of Sulṭān Muḥammad Uzbek. From the Volga he went through Khwārizm, Bukhārā, and Afghānistān to India. In Dihlī he undertook the office of ḳāḍī. Two years later he joined an embassy setting out for China but only reached the Maldives where he filled a judicial office for 1½ years. From there he went to China via Ceylon, Bengal and Further India. Whether he went beyond Zaitūn and Canton is uncertain. Via Sumatra (cf. Snouck Hurgronje, *Arabië en Oost-Indië*, Leiden 1907, p. 7 *sqq.*; French transl. *Rev. de l'Hist. des Rel.*, lvii. 1908, 62 *sqq.*) he returned to Arabia where he landed in Muḥarram 748 at Ẓafār. After a journey through Persia, Syria and Mesopotamia he made the pilgrimage for the fourth time, from Egypt. He then went back through North Africa and entered Fās in Shaʿbān 750. After a very brief stay here he went to Granada. His last long journey took him in 753-4 to the Negro lands, to Timbuktu and Melli. He returned to Morocco via the oases of Agades and Tawāt. Here he dictated the account of his travels to the scholar Muḥammad b. Muḥammad b. Djuzay (cf. de Slane, *Journ. As.*, 1843, i. 244 *sqq.*), who wrote the narrative in a literary style frequently modelled on Ibn Djubair's work. The latter died in 757 = 1356 soon after the completion of his task; his holograph is partly preserved in the Paris Ms. Suppl. 907. Ibn Baṭṭūṭa died in 779 = 1377 in Morocco. His work *Tuḥfat al-Nuẓẓār fī Gharāʾib al-Amṣār wa ʿAdjāʾib al-Asfār*, was edited by Defrémery and Sanguinetti, 4 vols., Paris 1853—1859; 3rd ed. 1893; repr. Cairo 1287-1288, 1322. Further literature given is by H. von Mžik, *Die Reise des Arabers Ibn Baṭūṭa durch Indien und China (XIV. Jahrh.)*, in *Bibl. denkwürdiger Reisen*, Vol. 5, Hamburg 1911.

(C. BROCKELMANN.)

IBN AL-BAWWĀB, "the porter's son" a name of ABU ʾL-ḤASAN ʿALĀʾ AL-DĪN ʿALĪ B. HILĀL, a celebrated Arab calligrapher, son of a porter of the audience hall of Baghdād. He was also called Ibn al-Sitrī. He died in 413 = 1022 or 423 = 1032 and was buried beside the tomb of Aḥmad b. Ḥanbal. He had a wide knowledge of law, knew the Ḳurʾān by heart, and wrote

out 64 copies of it. One of these written in *Rīḥānī*-script is in the Lāleli mosque in Constantinople, to which it was given by Sulṭān Selīm I. The *Dīwān* of the pre-Islamic poet Salāma b. Djandal, copied by him, is in the library of the Aya Ṣofya. He invented the *Rīḥānī* and *Muḥaḳḳaḳ* scripts and founded a school of calligraphy which survived to the time of Yāḳūt al-Musta'ṣimī.

Bibliography: Cl. Huart, *Calligraphes*, p. 80; Ibn Khallikān, *Wafayāt*, n°. 468, transl. de Slane, II, 282; Ḥabīb-Efendi, *Khaṭṭ u Khaṭṭāṭān*, p. 44. (Cl. Huart.)

IBN BĪBĪ, Nāṣir al-Dīn Yaḥyā b. Madjd al-Dīn Muḥammad Tardjumān (the "interpreter"), Persian historian. His father was *munshī* and interpreter at the court of the Saldjūḳs of Asia Minor and more than once a member of diplomatic missions to foreign princes. He died in 670 = 1272. He received the name Ibn Bībī from his mother, who had a great reputation as a fortune-teller and was therefore held in great esteem by Sulṭān Kaiḳubād I (616—634 = 1220—1237); we know nothing of the life of Ibn Bībī himself, but he appears to have been well acquainted with the famous Mongol vizier 'Alā' Malik Djuwainī [q. v.], for he dedicates to him his chief work, a history of the Saldjūḳs of Asia Minor in the vii[th] (xiii[th]) century. This chronicle, which is composed in unusually florid Persian, is entitled *al-Awāmir al-'alā'iya fi 'l-Umūr al-'alā'iya*, because it deals mainly with the history of 'Alā' al-Dīn (Kaiḳubād), and survives in a unique ms. (Aya Ṣofya, n°. 2985). An unknown epitomiser composed a synopsis of it, which was published in 1902 by Houtsma in his *Recueil de textes relatifs à l'histoire des Seldjoucides*, Vol. iv. The latter also published a Turkish version of the same work in the 3[rd] volume of this collection (incomplete). At the time of the publication of his work, the existence of a manuscript of the original work was unknown to Houtsma.

IBN BUṬLĀN, Joannes or Abu 'l-Ḥasan al-Mukhtār b. Ḥasan, a Christian physician in Baghdād. From there he set out in 440 (1049) via al-Raḥba and al-Ruṣāfa to Ḥalab and thence to Anṭākiya and Lādhiḳiya, finally reaching al-Fusṭāṭ in Egypt, where he met his colleague 'Alī b. Riḍwān. Their intercourse led to sharp polemics and produced several controversial pamphlets. Extracts from Ibn Buṭlān's epistle are given in Ibn al-Ḳifṭī, *Ta'rīkh al-Ḥukamā'*, ed. Lippert, p. 298 *sqq*. Relations finally became so strained that Ibn Buṭlān left Egypt and went to Constantinople, where the plague was then raging (446 = 1054). It is evident from this that the statement in Ibn al-Ḳifṭī, *op. cit.*, that he died at Anṭākiya in 444 (1052) is wrong, although Ibn Abī Uṣaibi'a also tells us that he returned to Anṭākiya. He was still alive in 455 (1063). His principal work is called *Taḳwīm al-Ṣiḥḥa*, of which a Latin transl. was published in 1531 at Strassburg under the title: *Tacuini sanitatis Elluchasem Elimithar medici de Baldath*. In the following year there appeared at the same place a German transl. by M. Herum, *Schachtafeln der Gesundheit*. Other works are given by Leclerc and Brockelmann, s. the *Bibl*. The *Da'wat al-Aṭibbā' 'alā Madhhab Kalīla wa-Dimna* mentioned there was published in 1901 by Dr. Bishāra Zalzal in Alexandria.

Bibliography: Ibn Abī Uṣaibi'a, ed. Müller, i. 241 *sqq*.; Ibn al-Ḳifṭī, ed. Lippert, p. 294 *sqq*.; Leclerc, *Histoire de la médecine arabe*, i. 489 *sqq*.; Brockelmann, *Geschichte der arab. Litt.*, i. 483; H. Derenbourg, *Vie d'Ousâma ibn Mounkidh*, p. 15, 488 *sqq*.

IBN AL-DAIBA' was called after his ancestor 'Alī b. Yūsuf (*Daiba'* is said to mean "white" in Nubian, according to al-Muḥibbī, *Khulāṣat al-Athar*, iii. 192, and *Tādj al-'Arūs*, v. 325), the South Arabian Historian and Traditionist Abū 'Abd Allāh 'Abd al-Raḥmān b. 'Alī b. Muḥammad b. 'Umar ... b. Alī b. Yūsuf, Wadjīh al-Dīn al-Shaibānī al-Zabīdī, who was born on the 4[th] Muḥarram 866 (9[th] Oct. 1461) at Zabīd. From his tenth year he had the benefit of the tuition of his uncle, Djamāl al-Dīn Muḥammad b. Ismā'īl, Muftī of Zabīd, under whose guidance, after learning the Ḳur'ān, he proceeded to study various sciences, notably mathematics and *fiḳh*. After studying under other teachers and making the pilgrimage in 884 and 885, he became a pupil of Zain al-Dīn Aḥmad b. 'Abd al-Laṭīf al-Sharadjī (died 893), devoting particular attention to history. He afterwards went to Bait al-Faḳīh where he specially studied Ḥadīth under two members of the scholarly family of Ibn Dja'mān. After a third pilgrimage (896), with which he combined a stay in Mecca in order to study Ḥadīth under al-Sakhāwī (d. 902 = 1497), he began to devote himself to literature. Through his work as a historian he won high favour with the Ṭāhirid al-Malik al-Ẓāfir II Ṣalāḥ al-Dīn 'Āmir (894—923 = 1489—1517), who presented him with robes of honour, allotted him lands and gave him a professorship at the Djāmi' of Zabīd. Ibn al-Daiba' died in Radjab 944 (Dec. 1537). His works are: 1. *Bughyat al-Mustafīd fī Akhbār Madīnat Zabīd*, a history of Zabīd and its rulers to the year 901 (begins 21 Sept. 1495), the most important part of which is the section on the ix[th] (xv[th]) century; it finishes with his autobiography as *Khātima*. This work has been rendered into Latin by C. Th. Johannsen, with introduction and notes, from the defective Copenhagen ms. (*Historia Jemanae*, Bonn 1828, Mss. in Brockelmann, *l. c.*, and Aya Ṣofya, N°. 2988; Blochet, *Cat. de la Coll. ... Schefer*, N°. 5807, 6060). Continuing this work down to 923 (1517) he wrote *al-Faḍl al-mazīd*. A second appendix brings it to 924 (Mss. in Brockelmann, *l. c.*, and Aya Ṣofya, N°. 2988); 2. *Ḳurrat al-'Uyūn fī Akhbār al-Yaman al-maimūn*, which is in part compiled from al-Khazradjī's *Kit. al-Kifāya*, and in part contains the same material as the preceding work. (Mss. in Brockelmann and Blochet, *o. c.*, N°. 5821, 6058); 3. *Aḥsan 'l-Sulūk fī man (fī nayn man) waliya Zabīd min al-Mulūk*, a historical Radjaz poem on the princes of Zabīd, Berlin, *Verz.*, N°. 9763; Brit. Mus., *Cat.*, N°. 1583, i.; Khed. Bibl., *Fihr.*, v. 138; Blochet, *o. c.*, N°. 5832, ii.; Houtsma, *Catal. d'une Coll.* ..., N°. 400, iii.; 4. *Taisīr al-Wuṣūl ilā Djāmi' al-Uṣūl min Ḥadīth al-Rasūl* (cf. Brockelmann, i. 357), printed Cairo 1331; 5. *Tamyīz al-Ṭaiyib min al-Khabīth mimmā yadūr 'alā Alsinat al-Nās min al-Ḥadīth* (Mss. in Brockelmann, *l. c.*, and Princeton, *Litt.*, N°. 32; pr. Cairo 1324); 6. *Kit. Faḍā'il Ahl al-Yaman* (*odor F. al-Y. wa-Akhbār*), cf. Griffini, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, lxix. 75. Ibn al-Daiba' further mentions in his autobiography *Ghāyat al-Maṭlūb wa-a'ẓam 'l-Manna fīmā yaghfir 'llāh bihi 'l-Dhunūb* and *Kashf al-Kurba fī Sharḥ Du'ā' Abī Ḥarba*; Ḥādjdjī Khalīfa (iv, N°.

8176) further mentions *al-'Ikd al-bahir fi Ta'rikh Dawlat Bani Tahir*, which is said to be taken from the *Bughyat al-Mustafid*.

Bibliography: Johannsen, *op. cit.*, p. 8 *sqq.*, cf. 197 *infra sq.*, 239, 249; Rieu, *Suppl.*, N°. 586, i.; Brockelmann, *Gesch. d. arab. Litt.*, ii. 400 *sq.*, cf. 185 and 712; (biographical material in mss., which could not be used here, is mentioned in *Cat. Cod. Mss. Orient. Mus. Britt.*, ii. p. 672[b], note *a*). (C. VAN ARENDONK.)

IBN DAISĀN, a Syrian philosopher of Parthian origin, known by his graecised Syriac name Bardesanes. His father was called Nuhama, his mother Nahsiram; both migrated from Persia to Edessa after 139 A.D. Their son was born in 154 and received his name from the river Daiṣān which waters Edessa. Brought up at the court of king Ma'nū along with the latter's son Abgar he learned astronomy and astrology; in 179 he was converted to Christianity by Bishop Hystaspes. Although an opponent of Valentine, Marcion and the other gnostics, he created a cosmological system clearly allied to the gnostic. He died in 222. The Muslims are only acquainted with his speculations on good and evil and light and darkness, from which it appears that his system was dualistic. The school founded by him lasted till late in the middle ages. His followers were divided into two sects, of which one represented the view that light mixed with darkness of its own accord, in order to improve it, but could not free itself again; the others hold that light after it has felt the dampness and the evil smell of darkness, which involuntarily overwhelms the light, attempts to free itself from it. One section of his followers inhabited the swampy lands (*baṭā'iḥ*) of the lower Euphrates, others were found scattered as far as Khurāsān and China. He was regarded as a precursor of Mānī. He actually seems to have been particularly an astrologer (Eusebius, *Praepar. evang.*, vi. 9). As such, he teaches that individual beings are subject to the power of controllers or rulers above them, namely the planets. What is called fate is the mode of activity which God has allotted the planets and elements; this activity modifies the intelligence in its descent to the soul and the soul in its descent to the body. Human life is limited by natural laws and further by fate; human freedom consists in taking up the battle with fate and limiting its power as far as possible.

IBN DJAHĪR, the name of four viziers:

1. FAKHR AL-DAWLA ABŪ NAṢR MUḤAMMAD B. MUḤAMMAD B. DJAHĪR, born in Mōṣul in 398 (1007—8). He first entered the service of the Banū 'Uḳail, who had been ruling in his native city since 386 (996); but when the 'Uḳailid Ḳuraish b. Badrān wished to throw him into prison he fled to Aleppo where the Mirdāsid Mu'izz al-Dawla b. Ṣāliḥ appointed him his vizier. He next left Aleppo and was appointed vizier to Naṣr al-Dawla Aḥmad b. Marwān, lord of Diyār Bakr. After the latter's death in 453 (1061-2) he was confirmed in this office by his son and successor Niẓām al-Dīn; but he refused to stay and went to Baghdād. Here the Caliph al-Ḳā'im appointed him vizier in the following year. In 460 (1067-8) Fakhr al-Dawla was dismissed but was restored to office in Ṣafar 461 (December 1068). The Caliph died in 467 (1075) and his successor al-Muḳtadī confirmed the vizier in his office but dismissed him in 471 (1078-9). Fakhr al-Dawla was sent in 476 (1083-4) by the Saldjūḳ sulṭān against Diyār Bakr, to take it from the Marwānids. Manṣūr b. Naṣr, the ruler of Diyār Bakr, thereupon allied himself with the 'Uḳailid Muslim b. Ḳuraish; the latter had however to flee to Āmid where he and Manṣūr were besieged by Fakhr al-Dawla. Muslim succeeded in escaping; but as Mōṣul was captured about the same time by 'Amīd al-Dawla, Fakhr al-Dawla's son, Muslim had to sue for peace and soon afterwards the governorship of Mōṣul was restored to him. After Za'īm al-Ru'asā', another of Fakhr al-Dawla's sons, had seized the town of Āmid, Fakhr al-Dawla took Maiyāfāriḳīn and was appointed governor of Diyār Bakr. According to the usual account, this happened in 478 (1085). He was soon afterwards dismissed however, but in 482 (1089-1090) Malikshāh sent him to Mōṣul of which he took possession. He died there in 483 (1090).

Bibliography: Ibn Khallikān (ed. Wüstenfeld), N°. 711 (transl. de Slane, iii. 280 *sq.*); Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 394 *sqq.*; Ibn al-Athīr (ed. Tornberg), x. 11—121; Ibn Khaldūn, *'Ibar*, iv. 320 *sq.*; Weil, *Gesch. der Chalifen*, iii. 128—132; Amedroz, *The Marwānid Dynasty at Mayyāfāriqīn*, *Journ. Roy. As. Soc.*, 1903, p. 136 *sqq.*

2. 'AMĪD AL-DAWLA ABŪ MANṢŪR MUḤAMMAD B. FAKHR AL-DAWLA B. DJAHĪR, son of the preceding; born in 435 (1043-4). By his marriage with a daughter of the vizier Niẓām al-Mulk in 462 (1067-1070) he entered into closer relations with the ruling Saldjūḳ family. After her death in 470 (1077-8) he married her niece and in Ṣafar 472 (August 1079) the Caliph al-Muḳtadī appointed him his vizier at the request of Niẓām al-Mulk. In 476 (1083-4) he was dismissed but restored to office in Dhu 'l-Ḥidjdja 484 (Jan.-Febr. 1092) and held this office for nine years. In Ramaḍān 493 (July-August 1100) he was dismissed through the efforts of Barkiyāruḳ. The latter accused him of embezzling the revenues of Diyār Bakr and Mōṣul, which his father and he had governed during the time of Malikshāh, and had him arrested with his brothers. 'Amīd al-Dawla had to pay a huge fine and died in prison on the 16[th] Shawwāl 493 (24[th] Aug. 1100).

Bibliography: Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 399 *sq.*; Ibn al-Athīr (ed. Tornberg), x. 41—203 [see also under N°. 1].

3. ZA'ĪM AL-RU'ASĀ' ḲAWĀM AL-DĪN ABU 'L-ḲĀSIM 'ALĪ B. FAKHR AL-DAWLA B. DJAHĪR, brother of the preceding. In 478 (1085) Za'īm al-Ru'asā' conquered Āmid [see under N°. 1] and after

Maiyāfāriḳīn also had fallen into the hands of his father, the latter sent him with the booty, won from the Marwānids, to Iṣfahān to the Sulṭān Malikshāh. In Shaʿbān 496 (May—June 1103) the Caliph al-Mustaẓhir appointed him vizier but dismissed him in Ṣafar 500 (October 1106). Zaʿīm al-Ruʾasāʾ then went to al-Ḥilla to the Mazyadī Saif al-Dawla Ṣadaḳa; in 503 (1109-1110) he was again appointed vizier by the Caliph.

Bibliography: Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 404; Ibn al-Athīr (ed. Tornberg), x. 93-4, 225, 251, 262, 275, 305, 335.

4. Niẓām al-Dīn Abū Naṣr al-Muẓaffar b. ʿAlī b. Muḥammad b. Djahīr al-Baghdādī (or Abū Naṣr Muḥammad b. Muḥammad b. Djahīr), Niẓām al-Dīn was first of all Ustād-dār (master of ceremonies); after the death of the vizier Sadīd al-Dawla Ibn al-Anbārī in 535 (1140-1) the Caliph al-Muḳtafī appointed him his successor.

Bibliography: Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), 418 *sq.*; Ibn al-Athīr (ed. Tornberg), xi. 52; Houtsma, *Recueil de textes relatifs à l'histoire des Seldjoucides*, ii. 194.

(K. V. Zetterstéen.)

IBN DJAMĀʿA, the name of family of scholars belonging to Ḥamāt, whose members are therefore quoted by this name only and not infrequently confused with one another. Here may be mentioned:

1. Badr al-Dīn Abū ʿAbd Allāh Muḥammad b. Ibrāhīm al-Kinānī al-Ḥamawī an Arab jurist, born 639 (1241) and died 733 (1333). He studied at Damascus and was afterwards mudarris there; in 687 (1288) he became ḳāḍī of Jerusalem, in 690 (1291) chief ḳāḍī of Cairo, in 693 (1294) chief ḳāḍī of Damascus. From 702 he again held the office of chief ḳāḍī of Cairo, with one brief interruption till 727 (1327). His official duties did not prevent him teaching in several madrasas and also engaging in literary work. His most important work is his book on constitutional law, *Taḥrīr al-Aḥkām fī Tadbīr Ahl al-Islām*, on which cf. von Kremer, *Culturgesch. des Orients*, i. 403 *sq.* Through an error in Ḥādjdjī Khalīfa, ii. 210, also in Flügel, *Cat. Wiener Hofbibliothek*, Nº. 1830, Brockelmann, *Geschichte* etc., ii. 94, has ascribed this work to Nº. 4 below, although he attributes it correctly on ii. 75, (only with a slightly different title which he gives from Cod. Berol., Ahlwardt, Nº. 5613). For other writings of Ibn Djamāʿa see Brockelmann.

2. Abū ʿOmar ʿAbd al-ʿAzīz, ʿIzz al-Dīn, certainly the son of the preceding, born in 694 (1294) at Damascus, afterwards chief ḳāḍī of Egypt and Syria. But when his representative at Damascus died in 765 (1364), he resigned the office and became mudarris in Cairo. He died in 767 (1366) on a pilgrimage to Mecca. On his writings cf. Brockelmann, ii. 72, and references given there.

3. Ibrāhīm b. ʿAbd al-Raḥmān, Burhān al-Dīn, grandson of Nº. 1., born 725 (1325) in Cairo. He studied in his native city and in Damascus, became khaṭīb in Jerusalem in 773 (1371), chief ḳāḍī of Egypt and mudarris at the Ṣalāḥiya, but returned to Jerusalem in the following year. In 781 (1379) he again became chief ḳāḍī of Cairo and finally in 785 (1383) ḳāḍī of Damascus, where he died in 790 (1388). See Brockelmann, ii. 112.

4. Abū ʿAbd Allāh Muḥammad b. Abī Bakr, grandson of Nº 2, born in 759, became a physician and teacher of philosophy in Cairo. He died in 819 (1416) of the plague. See Brockelmann, *op. cit.*, ii. 94. He wrote a commentary on the dogmatic poem, *Badʾ al-Amālī*, see Brockelmann, *op. cit.*, i. 429.

Bibliography: given in the article.

IBN al-DJARRĀḤ, the name of two viziers:

1. ʿAbd al-Raḥmān b. ʿĪsā b. Dāʾūd. After the dismissal of Ibn Muḳla in 324 (936) the Caliph al-Rāḍī offered the vacant office to the former vizier ʿAlī b. ʿĪsā; but as he declined the offer, on the grounds of old age and feeble health, the office was given to his brother ʿAbd al-Raḥmān. But the latter was not fit for the onerous duties and only held office for three months; he was then thrown into prison with his brother and condemned to pay a heavy fine. In 329 (941) he again appears in history; after the appointment of Kūrtegīn as Amīr al-Umarāʾ he performed the duties of a vizier for a period at the court of the Caliph al-Muttaḳī but without receiving the corresponding title.

Bibliography: Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 381 *sq.*; Ibn al-Athīr (ed. Tornberg), viii. 135, 211, 234 *sq.*, 280; Weil, *Gesch. der Chalifen*, ii. 662.

2. ʿAlī b. ʿĪsā b. Dāʾūd, brother of the preceding, born in 245 (859). As a supporter of the pretender ʿAbd Allāh b. al-Muʿtazz, ʿAlī was banished to Wāsiṭ in 296 (908) after the murder of ʿAbd Allāh, but received permission to go to Mecca from al-Muḳtadir's vizier Ibn al-Furāt. In 300 (912-3) the Caliph appointed him vizier and he reached the capital in the beginning of the following year. He materially improved the finances of the state by his rigid economy; the troops were discontented however because he decreased their pay and his measures also brought him into disfavour in other quarters. He therefore asked the Caliph to accept his resignation; but the latter declined. Towards the end of 304 (917) however he was dismissed and imprisoned. Ibn al-Furāt was appointed his successor. The latter clung to office for a year or two, until he was replaced in Djumādā I 306 (November 918) by Ḥāmid b. al-ʿAbbās, who was old and feeble and at first allowed himself to be guided by ʿAlī b. ʿĪsā. ʿAlī however soon quarrelled with Ḥāmid and, after a rising in Baghdād in 308 (920-1) on account of the increased cost of living, ʿAlī was offered the vizierate but declined it. As Ḥāmid lost the Caliph's favour and ʿAlī's economy aroused discontent, the vizierate was again given to Ibn al-Furāt in Rabīʿ II 311 (August 923). ʿAlī was thrown into prison and after Ibn al-Furāt had extorted a considerable sum from him, he banished him to Mecca and gave the governor there instructions to send him on to Ṣanʿāʾ. On the intercession of Muʾnis, the prefect of police, ʿAlī was pardoned on the fall of Ibn al-Furāt and returned from exile in 312 (925). In Dhu 'l-Ḳaʿda 314 (Jan.—Feb. 927) he was summoned to Baghdād from Damascus, where he was then living, through the influence of Muʾnis and given the vizierate. He did not take up office till the beginning of the following year; but when it was found that the finances were again in a chaotic condition and the Caliph declined to follow his advice, he asked leave to resign on the ground that he was too old for the duties of the office. The Caliph at first declined but was finally persuaded and in

Rabīʿ I 316 (May 928) ʿAlī was dismissed and replaced by Ibn Muḳla [q. v.]. The Caliph al-Rāḍī afterwards twice offered him the vizierate, first immediately after his accession and again in 324 (936). As he refused on both occasions, Ibn Muḳla and the brother of ʿAlī, ʿAbd al-Raḥmān, respectively were given it. ʿAlī b. ʿĪsā died in Dhu 'l-Ḥidjdja 334 (July-August 946).

(K. V. ZETTERSTÉEN.)

IBN AL-DJAWZĪ, ʿABD AL-RAḤMĀN B. ʿALĪ B. MUḤAMMAD ABU 'L-FARADJ (ABU 'L-FAḌĀʾIL) DJAMĀL AL-DĪN, an Arab author, Ḥanbalī faḳīh, preacher and universal historian, born in 510 = 1116 at Baghdād, settled there after the usual journeys of study, and died in 597 = 1200. His ardent devotion to his *madhhab* led to the strictest criticism of Tradition; he even prepared an edition of al-Ghazālī's *Iḥyāʾ* purified of all weak traditions. His literary activity covered all the knowledge of his time. He exercised the greatest influence as a preacher (cf. Ibn Djubair, 2nd ed., p. 220 *sqq.*); his numerous edifying works are recommended for public reading even by al-Subkī, *Muʿīd al-Niʿam*, p. 163. Brockelmann, *Gesch.*, i. 502 *sq.* gives a list of his writings. Of his history of the world, *al-Muntaẓam wa-Multaḳaṭ al-Multaḳam*, the most important of his works to us, there have since become known the mss. in Paris, Bibl. Nat. (Blochet, *Catal. de la Coll. .... Schefer*), Nº. 3909, in the British Museum (Add. 7320; s. Amedroz, *Journ. Roy. As. Soc.*, 1906, p. 851 *sqq.*, 1907, p. 19 *sqq.*; cf. *ibid.*, 1904, S. 273 *sqq.*), Damascus, Ḥabīb al-Zaiyāt, *Khazāʾin al-Kutub fī Dimashḳ* etc., p. 78, Nº. 62; on the Stambul Mss. s. Horovitz, *Mitt. Sem. Or. Spr.*, x., 6. The following works from his pen are now also known: 1) *Kashf al-Niḳāb ʿan al-Asmāʾ wal-Alḳāb*, cod. Leid. 1487 (not yet catalogued), s. Barbier de Meynard, *Journ. As.*, 1907, 173 *sqq.* 2) *Aʿmār al-Aʿyān*, Damascus, al-Zaiyāt, p. 31, Nº. 28, 4; vgl. Horovitz, *op. cit.*, x. 43. 3) *Mukhtaṣar ʿUdjālat al-Muntaẓir, Sharḥ Ḥāl al-Khaḍir*, Damascus, al-Zaiyāt, p. 33, Nº. 63, 1. 4) *Durr al-Lumaʿ wa 'l-Duʿāʾ fī Ṣawm Yawm al-Ghaim*, *ibid.*, p. 45, Nº. 37, 3. 5) *al-Mudjtanā min al-Mudjtabā* (from Nº. 32 in Brockelmann?), *ibid.*, p. 37, Nº. 124, 2. 6) *Muthīr al-Ghurām al-Sākin fī Faḍāʾil al-Bilād wa 'l-Amākin*, *ibid.*, p. 82, Nº. 46. 7) *Durrat al-Iklīl* (so to be read) *wa-Kashf al-Ḳināʿ* (so to be read) *ʿan al-Ḳināʿ*, s. (C. BROCKELMANN.)

IBN AL-DJAWZĪ, SIBṬ, SHAMS AL-DĪN ABU 'L-MUẒAFFAR YŪSUF B. ḲIZOGHLU, grandson of the preceding on his mother's side. His father Ḳizoghlu was a Turkish slave of the vizier Ibn Hubaira [q. v.] and afterwards manumitted by him. Yūsuf was born in 582 (1186) in Baghdād and brought up by his grandfather; he studied in his native city, set out to travel in 600 and finally became professor and preacher in Damascus, where he died in 654 (1257). He is the author of a universal history (not yet printed) in several volumes, entitled *Mirʾāt al-Zamān fī Taʾrīkh al-Aʿyān*. The latter part of it covering the years 495—654 has been reproduced in facsimile by J. R. Jewett (Chicago 1907), while some extracts from the years 450—532 were given in the *Recueil des Historiens des Croisades, Historiens Orientaux*, Vol. iii. p. 65 *sqq.*

Bibliography: in Brockelmann, *Gesch. d. arab. Litt.* i. 347.

IBN AL-DJAZARĪ, SHAMS AL-DĪN ABU 'L-KHAIR MUḤAMMAD B. MUḤAMMAD B. MUḤAMMAD B. MUḤAMMAD B. ʿALĪ B. YŪSUF AL-DJAZARĪ, an Arab theologian and authority on the readings (*ḳirāʾāt*) of the Ḳurʾān, born at Damascus in the night of Friday/Saturday 25th Ramaḍān 751 (30th Nov.—1st Dec. 1350), knew the Ḳurʾān by heart by the year 763 (1363) and a year later was able to recite pieces from it in prayer. After devoting some attention to Ḥadīth, he studied the various ways of reading the Ḳurʾān, of which he mastered seven in 768 (1367). In the same year he made the pilgrimage to Mecca and thereafter went to Cairo where by the year 769 (1368) he had mastered thirteen ways of reading the Ḳurʾān. Returning to Damascus he devoted himself to Ḥadīth and law and studied under the two pupils of al-Dimyāṭī, al-Abarḳūhī and al-Asnawī. He then went back to Cairo to study rhetoric and the sources of law, and then went to Alexandria to hear the pupils of Ibn ʿAbd al-Salām. In 774 (1373) he received permission to deliver fatwās from Abu 'l-Fidāʾ Ismāʿīl b. Kathīr, in 778 (1376) from Diyāʾ al-Dīn, and in 785 (1383) from the Shaikh al-Islām al-Bulḳīnī.

After teaching *Ḳirāʾāt* for a period he was appointed ḳāḍī of Damascus in 793 (1391). But when his property in Egypt was confiscated in 798 (1395), he went to Brusa to the court of Sulṭān Bāyazīd b. ʿOthmān. After the battle of Angora (end of 804 = 1402), he was sent by Tīmūr to Kashsh in Transoxania, and later to Samarḳand, where he lectured publicly and met the Sharīf al-Djurdjānī. After Tīmūr's death in Shaʿbān 807 (Febr. 1405) Ibn al-Djazarī went to Khorāsān, then to Herāt, Yazd, Iṣfahān and finally to Shīrāz, where, after teaching for some time, he was appointed ḳāḍī by Pīr Muḥammad against his will. He then went to Baṣra and thence to Mecca and Medina (823 = 1420). After a stay of several years in these towns he returned to Shīrāz where he died on Friday the 5th Rabīʿ I 833 (2nd Dec. 1429).

He is the author of the following works: 1. *Kitāb al-Nashr fi 'l-Ḳirāʾāt al-ʿashr* (Berlin, Nº. 657; Escurial, Derenbourg, *Les mss. arab.*, Nº. 129; Constantinople, Nūr-i ʿOthmāniya, Nº. 97; Khed. Libr., *Fihr.*, i. 117; Tunis, Maktaba ʿAbdalliya, i. 176); 2. *Taḥbīr al-Taisīr fi 'l-Ḳirāʾāt*, commentary on the *Taisīr* of al-Dānī on the readings of the Ḳurʾān (Khed. Libr., *Fihr.*, i. 92; Berlin,

N⁰. 590; Constantinople Nūr-i ʿOsmānīya, N⁰. 60); 3. *Taiyibat al-Nashr fi 'l-Ḳirāʾāt al-ʿashr*, poem of 1000 Radjaz verses on the ten ways of reading the Ḳurʾān, completed in Shaʿbān 799 = Mai 1396 (pr. Cairo 1282, 1307); 4. *al-Durra al-muḍīya fi Ḳirāʾāt al-Aʾimma al-thalātha al-marḍīya*, poem of 241 Ṭawīl verses, finished 823 = 1420; pr. Cairo 1285, 1308); 5. *Hidāyat* (var. *Ghāyat*) *al-Mahara fi Ziyādat al-ʿashara*, poem on the same subject (Aya Sofya, N⁰. 39); 6. *Mundjid al-Muḳrabīn wa-Murshid al-Ṭālibīn*, treatise in seven chapters on the same subject (Berlin, N⁰. 656); 7. 41 Ṭawīl verses rhyming in *lā* on 40 difficult questions of Ḳurʾān readings (Berlin, N⁰. 526); 8. *al-Muḳaddima al-Djazarīya*, a poem of 110 Radjaz verses on the recitation of the Ḳurʾān (pr. Cairo 1282, 1307); 9. *al-Tamhīd fi ʿIlm al-Tadjwīd*, treatise on the recitation of the Ḳurʾān, finished 769 = 1367 (Paris Bibl. Nat., N⁰. 592, ii.); 10. *Kifāyat al-Almaʿī fi Āyat yā Arḍu 'bla'ī*, on the different ways of reciting Sūra xi. 46 (Khed. Libr., *Fihr.*, vii. 578); 11. *Mukhtaṣar Ṭabaḳāt al-Ḳurrāʾ al-mutammā bi-Ghāyat al-Nihāya*, the shorter of two works which the author devoted to the same subject (Constantinople, Nūr-i ʿOsmānīya, N⁰. 85); 12. *Muḳaddimat ʿIlm al-Ḥadīth*, on the technology of Ḥadīth (Berlin, *Verz.*, N⁰. 1084); 13. *al-Hidāya ilā Maʿālim al-Riwāya*, a poem of 370 Radjaz verses on the tradition of Ḳurʾān recitation preserved by the Ḳurʾān readers (Escurial, Casiri, N⁰. 1786, 1808); 14. *ʿIḳd al-Laʾālī fi 'l-Aḥādīth al-musalsala wa'l-ʿawālī*, finished 808 = 1405 at Shīrāz (Paris, Bibl. Nat., N⁰. 4577, iii.; a similar work is contained in N⁰. 4577, iv.); 15. *al-Risāla al-bayānīya fi Ḥaḳḳ Abawai al-Nabī*, a treatise on the conversion of the parents of the prophet to Islām (Berlin, N⁰. 10343); 16. *al-Mawlid al-kabīr*, a biography of the Prophet (Brit. Mus., *Suppl.*, N⁰. 525); 17. *Dhāt al-Shifāʾ fi Sīrat al-Nabī wa 'l-Khulafāʾ*, a Radjaz poem on the biography of the Prophet and the first four caliphs with a brief survey of the history of Islām to the reign of Bāyazīd and the siege of Constantinople by the Turks, composed at the request of Pīr Muḥammad, ruler of Shīrāz, and finished on the 25th Dhu 'l-Ḥidjdja 798 = 30th Sept. 1396 (Mss. in Brockelmann); 18. *al-Ḥiṣn al-ḥaṣīn min Kalām Saiyid al-Mursalīn*, a Ḥadīth collection for use in prayers (pr. Cairo 1279, 1315; Algier 1328); 19. *Mukhtaṣar al-Naṣīḥa bi 'l-Adillat al-ṣaḥīḥa*, a treatise on ethics based on Ḥadīth texts (Khed. Libr., *Fihr.*, vii. 564); 20. *al-Zahr al-fāʾiḥ*, an exhortation to virtue (pr. Cairo 1305, 1310); 21. *al-Iʿlām fi Lawāzim al-Kitāba*, a short treatise on calligraphy (Berlin, N⁰. 8); 22. 52 Radjaz verses on astronomy (Berlin, N⁰. 8159, iii.).

Bibliography: Ṭashköprüzāde, *al-Shaḳāʾiḳ al-Nuʿmānīya fi ʿUlamāʾ al-Dawlat al-ʿUthmānīya* (on the margin of Ibn Khallikān, *Wafayāt*, Cairo 1310), i. 39; al-Suyūṭī, *Ṭabaḳāt al-Ḥuffāẓ*, xxiv., N⁰. 5; Muḥammad ʿAbd al-Ḥaiy al-Laknawī, *al-Fawāʾid al-bahīya fi Tarādjim al-Ḥanafīya* (Cairo 1324), p. 140, note 1; Wüstenfeld, *Die Geschichtschreiber der Araber*, N⁰. 474; *Journ. As.*, Ser. 9, iii. 259; Brockelmann, *Gesch. d. ar. Litt.*, ii. 201 *sqq.*; Huart, *Arab. Lit.*, London 1903, p. 356. (Moh. Ben Cheneb.)

IBN DJAZLA, Abū ʿAlī Yaḥyā b. ʿĪsā of Baghdād, known in the West as Ben Gesla, was a Christian, but, under the influence of his Muʿtazilī schoolmaster, he turned Muḥammadan on the 11th Djumādā II 466 (11th Febr. 1074). On account of his fine handwriting he was employed as copyist by the Ḥanafī ḳāḍī at Baghdād. He learnt medicine from Saʿīd b. Hibat Allāh, physician to the Caliph al-Muḳtadī. He lived in the Karkh quarter of Baghdād and not only gave his services both to the people of that quarter and to his own acquaintances without reward, but supplied them with medicine as well. He died in Shaʿbān 493 (June 1100). His best known work is the *Taḳwīm al-Abdān fi Tadbīr al-Insān*, tables in which diseases are arranged as are the stars in astronomical tables, of which a Latin version was printed at Strassburg in 1532. He also drew up an alphabetical list of medicinal herbs and drugs called *Minhādj al-Bayān fīmā yastaʿmiluhu 'l-Insān* for the Caliph al-Muḳtadī. He composed, besides, a treatise against Christianity, and wrote verses.

Bibliography: Ibn Abī Uṣaibiʿa, ed. Müller, i. 255; Ibn al-Ḳifṭī, *Taʾrīkh al-Ḥukamāʾ*, ed. Lippert, p. 365; Ibn Khallikān, ed. Wüstenfeld, N⁰. 822; Wüstenfeld, *Geschichte d. arab. Aerzte u. Naturforscher*, p. 84; Leclerc, *Histoire de la médecine arabe*, i. 493 *sqq.*; Steinschneider, *Polem. und apologet. Lit.*, p. 37; Brockelmann, i. 485 cf. ii. 705. (T. H. Weir.)

IBN DJINNĪ, Abu 'l-Fatḥ ʿUthmān, was born in Mōṣul before 300 A. H. (Pröbster, p. x., ca. 320), the son of a Greek slave belonging to Sulaimān b. Fahd b. Aḥmad al-Azdī. His teacher was the Baṣrī Abū ʿAlī al-Fārisī al-Fasawī, with whom he was associated for forty years till the latter's death, partly at the court of Saif al-Dawla in Ḥalab and partly at the court of ʿAḍud al-Dawla in Persia; according to Yāḳūt, he held the post of *Kātib al-Inshāʾ* at the court of the latter and his successor. In both places he was on friendly terms with al-Mutanabbī, with whom he discussed grammatical questions and on whose *Dīwān* he wrote a commentary. He also sought other teachers (Rescher, p. 5 *sq.*). He succeeded al-Fārisī in Baghdād and died in 392 = 1002. He devoted himself especially to grammar and is celebrated as the most learned authority on *taṣrīf*; he occupied a position midway between the Kūfa and Baṣra schools. His most important works are *Kitāb Sirr al-Ṣināʿa wa-Asrār al-Balāgha* (on Arabic vowels and consonants) and *Kitāb al-Khaṣāʾiṣ fi ʿIlm Uṣūl al-ʿArabīya*; besides other philological works he also wrote poems.

Bibliography: Brockelmann, *Geschichte der arabischen Litteratur*, i. 125 *sq.*; G. Flügel, *Die grammatischen Schulen der Araber*, p. 248—252; E. Pröbster, *Ibn Ginnī's Kitāb al-Mugtaḍab* (*Leipziger Semitistische Studien*, i., 1904); O. Rescher, *Studien über Ibn Ginnī* (*Zeitschr. f. Assyriologie*, Vol. xxiii., 1909, p. 1—54); Ibn Khallikān, *Wafayāt al-Aʿyān*, ed. Wüstenfeld, iv. N⁰. 425; Yāḳūt, *Irshād al-Arīb* (Gibb Memorial), v. 15—32 (his works, p. 29—32). (J. Pedersen.)

IBN DJUBAIR, Abu 'l-Ḥusain Muḥammad b. Aḥmad al-Kinānī, Arab traveller, born at Valencia in 540 (1145), studied *fiḳh* and *ḥadīth* at Jātiva, to which his family belonged. As secretary to the governor of Granada Abū Saʿīd b. ʿAbd al-Muʾmin, he is said to have been forced to drink wine on one occasion and to atone for this sin he undertook a pilgrimage. From Granada he set out in 1183 via Tarifa to Ceuta and thence by ship to Alexandria. As the

Christians barred the usual way to Mecca he had to travel by Cairo, Ḳūs, 'Aidhāb and Djidda. He afterwards visited Medina, Kūfa, Baghdād, Mōṣul, Aleppo, and Damascus and then embarked at Acre for Sicily to return to Granada via Cartagena in 1185. He travelled in the East on two further occasions, 585—587 (1189—1191) and 614 (1217), but on the latter journey he only reached Alexandria, where he died. His description of his travels is one of the most important works in Arabic literature, and is also particulary important for the history of Sicily under William the Good. Cf. M. Amari, *Voyage en Sicile sous le règne de Guillaume le Bon, texte arabe suivi d'une traduction et de notes*, 1846, and his *Bibliotheca Arabico-Sicula*; edition of the Arabic text by Wright, Leiden 1852, new edition by de Goeje, 1907 (Gibb Memorial, vol. v.); Italian transl. by Schiaparelli: *Viaggio in Ispagna, Sicilia, Siria e Palestina, Mesopotamia, Arabia, Egitto etc.*, 1906.

Bibliography: Pons Boigues, *Ensayo bio-bibliogr.*, p. 267 *sqq.* (further references there); Brockelmann, *Geschichte* etc., i. 478.

IBN DUḲMĀḲ, Ṣārim al-Dīn Ibrāhīm b. Muḥammad al-Miṣrī (the name is derived from the Turkish *tokmak* "hammer", cf. Ḥādjdjī Khalīfa, ii. 102) was a zealous Ḥanafī and wrote a work on the *ṭabaḳāt* of the Ḥanafīs, *Naẓm al-Djumān*, in 3 volumes, the first of which deals with Abū Ḥanīfa (Ḥādjdjī Khalīfa, iv. 136, vi. 317); on account of his depreciatory references to al-Shāfi'ī he was flogged and thrown into prison. His history of Egypt, *Nuzhat al-Anām*, in about 12 vols. to the year 770, was of the greatest importance (Ḥādjdjī Khalīfa, ii. 102; vi. 323; G. Weil, *Gesch. d. Chalifen*, iv. vii. *sq.*). By command of the Sulṭān al-Malik al-Ẓāhir Barḳūḳ he wrote a history of the rulers of Egypt to the year 805; he further wrote a separate history of this Sulṭān, *'Iḳd al-Djawāhir fī Sīrat al-Malik al-Ẓāhir Barḳūḳ*, abbreviated under the title *Yanbū' al-Maẓāhir* (Ḥādjdjī Khalīfa, ii. 102; iv. 230; vi. 524). According to Ḥādjdjī Khalīfa, his historical works were largely utilised by al-'Ainī and al-'Asḳalānī (i. 442; ii. 118). A work now lost dealt with Cairo and Alexandria. He wrote a large work on 10 cities of Islām, *Kitāb al-Intiṣār li-Wāsiṭat 'Iḳd al-Amṣār*, devoting one volume to each city; of these the volumes describing Cairo and Alexandria are preserved in Cairo and have been published by Vollers. According to Vollers (p. 4) he used better authorities than al-Maḳrīzī. The latter, for a time his pupil, did not use his work, according to Vollers. Ibn Duḳmāḳ also wrote a work on Ṣūfī biographies, *al-Kanūz al-makhfīya fī Ta'rīkh al-Ṣūfīya*, also a book on the organisation of the army, *Tardjumān al-Zamān* (Ḥādjdjī Khalīfa, ii. 277), and a book on the interpretation of dreams, *Fawā'id al-Fawā'id* (*l. c.*, iv. 392). According to al-Suyūṭī, *Ḥusn al-Muḥāḍara fī Akhbār Miṣr wa 'l-Ḳāhira*, i. 255, he died in 790 = 1388, aged over 80; so also Ḥādjdjī Khalīfa, i. 447; ii. 102, 277; but in any case he was still alive in 793 (s. Vollers, *Introduction*) and Ḥādjdjī Khalīfa elsewhere gives the date of his death as 809 = 1406 (ii. 149; iv. 230, 592; vi. 323, 357, 514).

Bibliography: Wüstenfeld, *Die Geschichtschreiber der Araber*, N°. 457; Vollers, *Description de l'Égypte par Ibn Doukmak* (*Bibliothèque Khédiviale*), Cairo 1893). (J. Pedersen.)

IBN 'L-DUMAINA, 'Abū Allāh b. 'Ubaid Allāh b. Aḥmad, Abu 'l-Sarī, an Arab poet of the clan of 'Āmir b. Taim Allāh of Khath'am. Very little is known of his life. In the *Kit. al-Aghānī* it is related that he treacherously slew Muzāḥim b. 'Amr, a relative of his wife Ḥammā' who had relations with her and had reviled him in a poem, and then strangled Ḥammā' and beat to death her little daughter. Ibn al-Dumaina was arrested on the accusation of Djanāḥ, the murdered man's brother, but was released for want of evidence. A long time afterwards he was attacked in Tabāla, while reciting his poems, by Muṣ'ab, another brother of Muzāḥim, and mortally wounded. According to another tradition, a (second?) attempt by Muṣ'ab on his life in the market place of al-Abla' was successful. If the Aḥmad b. Isma'īl, mentioned in *Aghānī*, xv. 153, 9 *sqq.*, is identical with the governor of Mecca who appears in Ṭab., iii. 740, Ibn al-Dumaina was a contemporary of al-Rashīd.

His poems where highly prized and several were set to music. The Mss. Berl., *Verz.*, N°. 7476, i., and N°. 8255, i., are said to contain several of his ḳaṣīdas with biographical details. Al-Zubair b. Bakkār wrote a *Kit. Akhbār Ibn al-Dumaina*, as did Ibn Abī Ṭāhir Ṭaifūr (*Fihr.*, p. 111, 11 *sq.*, 147 ₅).

Bibliography: *K. al-Aghānī*¹, xv. 151 *sqq.*, and Ind.; Ibn Ḳutaiba, *K. al-Shi'r* (ed. de Goeje), p. 458 *sq.*; *Ḥamāsa* (ed. Freytag), p. 541, 598 *sq.*, 604 *sq.*, 606, 620 (Egypt. ed. 1296, iii., 115 *sq.*, 170 *sq.*, 176 *sq.*, 178, 191); 'Abd al-Raḥīm al-'Abbāsī, *Ma'āhid al-Tanṣīṣ*, Ms. Leyden, p. 32—86 (Cairo 1274 [p. 74], 1316). (C. van Arendonk.)

IBN DURAID, Abū Bakr Muḥammad b. al-Ḥasan b. 'Atāhiya al-Azdī (on the name Duraid, see *Ḥamāsa*, ed. Freytag, p. 377 l. m.), according to his own account, a native of Ḳaḥṭān, was born in the reign of al-Mu'taṣim in 223 = 837 in Baṣra (in the *Sikkat Ṣāliḥ*). He studied in Baṣra under such teachers as Abū Ḥātim al-Sidjistānī, al-Riyāshī, al-Ushnandānī and al-Aṣma'ī's nephew. In 257, when the Zandj were massacring in Baṣra, he escaped the danger and went with his uncle al-Ḥasan (others al-Ḥusain), who had undertaken his education, to 'Omān where he spent 12 years. He then went to Djazīrat Ibn 'Omar (read this for 'Umān; Ibn Khallikān has Baṣra) and thence to Fārs, where he stayed at the court of the Mīkālids as their favourite and was chief of a Dīwān. He compiled for them a *Kitāb al-Djamhara fī 'Ilm al-Lugha*, which is dedicated to Abu 'l-'Abbās Ismā'īl b. 'Abd Allāh b. Mīkāl (Ḥādjdjī Khalīfa, ii. N°. 4202), and he wrote in honour of the Mīkālids his famous poem *Maḳṣūra* (on the difference between Ibn Hishām, al-Mas'ūdī, and Ibn Khallikān with regard to the names of the corresponding Mīkālids see Axel Moberg, *Geschichte von 'Obaidallah b. Ahmed al-Mikali*, Leipzig, 1908, p. 10). He had older models for this kind of poetry, in which each verse ends in an *alif maḳṣūra* (see al-Mas'ūdī, *Murūdj*, viii. 304) and was himself imitated by his successors; this poem has been several times annotated and published. When the Mīkālids were deposed in 308 = 920 and migrated to Khurāsān Ibn Duraid went to Baghdād; here he was recommended by al-Khuwārī to the Caliph al-Muḳtadir and received from him a pension of 50 dīnārs a month. In spite of the fact that he was a noted spendthrift and winedrinker, he reached a great age. When 90 he was seized with paralysis; he recovered

however and lived two more years in spite of a second shock. He died in 321 = 933 on the same day as al-Djubbā'ī and was buried in the 'Abbāsiya cemetery in Baghdād. He is represented as the most learned philologist of his time and the best critic of poetry; he is also called *a'lam 'l-Shu'arā' wa-ash'ar 'l-'Ulamā'*. Besides the great dictionary, *al-Djamhara*, he wrote on various special branches of lexicography, e. g. *Kitāb al-Sardj wa 'l-Lidjām* (ed. Wright, in *Opuscula Arabica*, Leiden 1859), two books on the horse, one on weapons, on clouds and rain, on ambiguous expressions useful for one forced to swear an oath (*Kitāb al-Malāḥin*, ed. Thorbecke, Heidelberg 1882) etc. His philology was to him a patriotic duty; against people like the Shu'ūbiya he wrote the *Kitāb al-Ishtiḳāḳ* (ed. Wüstenfeld, Göttingen 1854) to explain the etymological connections of Arab names (see Goldziher, *Muhammedanische Studien*, i. 209). Among his pupils were al-Sīrāfī, al-Marzubānī, Abu 'l-Faradj 'Alī al-Iṣbahānī.

Bibliography: Ibn Khallikān, *Wafayāt al-A'yān*, ed. Wüstenfeld, N°. 648; Wüstenfeld, *Register zu den genealogischen Tabellen*, 1853, p. 313 *sq.*; *Kitāb al-Fihrist*, ed. Paris, viii. 304; Abu 'l-Maḥāsin Ibn Taghrī Birdī, *al-Nudjūm al-Zāhira*, Lugduni 1861, p. 256—258; Flügel, *Die grammatischen Schulen der Araber*, 1862, p. 111; Yāḳūt, *Irshād al-Arīb ilā Ma'rifat al-Adīb* (Gibb Memorial, vi.), vi. 483—494; Brockelmann, *Geschichte der arabischen Litteratur*, i. 111 *sq.* (J. Pedersen.)

IBN FAḌL ALLĀH. [See FAḌL ALLĀH.]

IBN FAḌLĀN, properly Aḥmad b. Faḍlān b. al-'Abbās b. Rāshid b. Ḥammād, Arab author, composer of an account (*risāla*) of the embassy sent by the Caliph al-Muḳtadir to the king of the Volga Bulghārs [cf. bulghār, i. 786 *sqq.*]. As he was a client (*mawlā*) of the Caliph and of the conqueror of Egypt Muḥammad b. Sulaimān [see cairo, i. 818a] he was certainly not of Arab origin. He seems to have taken part in the embassy as a theologian and authority on religious matters. The real ambassador appointed by the government was Sūsan al-Rassī, a client of Nadhīr al-Ḥaramī mentioned by 'Arīb (ed. de Goeje, p. 58). The embassy left Baghdād on the 11th Ṣafar 309 (21st June 921), went first to Bukhārā, thence to Khwārizm, and only then to the land of the Bulghārs, the capital of which was reached on the 12th Muḥarram 310 (12th May 922). Nothing is known of the route or time of the return to Baghdād; as little is known of the life of the author of the *Risāla*. The latter seems to be used as early as the ivth (xth) century by al-Iṣṭakhrī and al-Mas'ūdī; it is expressly quoted and extracts given by Yāḳūt (s. v. Itil, Bāshghird, Bulghār, Khazar, Khwārizm and Rūs); the work is only known to later writers from these quotations, although Yāḳūt (i. 113, 11) mentions specially that in his time the *Risāla* was extant in numerous copies. Cf. C. Brockelmann, *Gesch. der arab. Litt.*, i. 227 *sq.*; Bar. V. Rosen, *Prolegomena k novomu izdaniju Ibn Fadlana* (*Zapiski Vost. Otd. Imp. Russk. Arkh. Obshč.*, xv. 39 *sq.*); bibliographical references also there. (W. Barthold.)

IBN al-FAḲĪH, Abū Bakr Aḥmad b. Muḥammad b. Isḥāḳ al-Hamadhānī, Arab geographer, wrote a comprehensive *Kitāb al-Buldān*, about the year 290 (903), which is often quoted by al-Muḳaddasī and Yāḳūt. The work itself is lost; a compendium prepared from it which, according to de Goeje, is possibly the work of a certain 'Alī b. Ḥasan al-Shaizarī (about 413 = 1022) was published by the latter scholar in 1885 (*Bibl. Geogr. Arab.*, Vol. v.). He is further said to have written a book on the best poets of his time. Practically nothing is known of the life of the author; to the few data collected by de Goeje in his *Praefatio* may be added a brief notice in Yāḳūt's *Irshād al-Arīb*, ed. Margoliouth, ii. 63, from which it appears that he and his father were both celebrated as traditionists.

Bibliography: given in the article.

IBN al-FARAḌĪ, Abu 'l-Walīd 'Abd Allāh b. Muḥammad b. Yūsuf b. Naṣr al-Azdī b. al-Faraḍī, an Arab biographer, born in the night of the 23rd Dhu 'l-Ḳa'da 351 = 22nd/23rd Dec. 962 in Cordova, studied law and tradition there as well as literature and history, particularly with Abū Zakariyā Yaḥyā b. Mālik b. 'Ā'idh and with the ḳāḍī Muḥammad b. Yaḥyā b. 'Abd al-'Azīz, known as al-Kharrāz.

In 382 (992) he made the pilgrimage and on his way attended the lectures of the jurist Ibn Abī Zaid al-Ḳairawānī and Abu 'l-Ḥasan 'Alī b. Muḥammad b. Khalaf al-Ḳābisī in Ḳairawān and also studied in Cairo, Mecca and Medina. Returning to Spain he taught for a time in Cordova and then became ḳāḍī of Valencia in the reign of the Marwānid Muḥammad al-Mahdī. During the conquest and sack of Cordova by the Berbers he was murdered in his house on Monday the 6th Shawwāl 403 = 20th April 1013. His body was not found till the fourth day after his death in a heap of rubbish, already so disfigured and decomposed that it had to be buried without washing and without a winding-sheet. It is said that on his pilgrimage to Mecca Ibn al-Faraḍī seized the covering of the Ka'ba and prayed God that he might die a martyr's death, but afterwards regretted his prayer when he thought of the horrors of a violent end, although he hesitated to recall his petition out of reverence for the pact he had made with God. He had an extensive knowledge of law, Ḥadīth, literature, and history and had collected a valuable library on his travels. Only one work of his has survived, a *Kitāb Ta'rīkh 'Ulamā' al-Andalus*, a collection of biographies of the Arab scholars of Spain (ed. by Codera, *Bibl. Ar.-Hisp.*, vii. viii., Madrid 1891).

Bibliography: Ibn Khallikān, *Wafayāt* (Cairo 1310), i. 268; al-Dhahabī, *Tadhkirat al-Ḥuffāẓ* (Ḥaidarābād n. d.), iii. 277; al-Maḳḳarī, *Nafḥ al-Ṭīb* (Cairo 1302), i. 383; Ibn Bashkuwāl, *al-Ṣila*, p. 248, N°. 567; Ibn Farḥūn, *al-Dībādj* (Fās 1316), p. 140; al-Fatḥ b. IBN FARAḤ AL-**ISHBĪLĪ**, whose full name was SHIHĀB AL-DĪN ABU 'L-'ABBĀS AḤMAD B. FARAḤ B. AḤMAD B. MUḤAMMAD AL-LAKHMĪ AL-ISHBĪLĪ AL-SHĀFI'Ī, born in 625 (began 10th December 1227) at Sevilla (Ishbīliya), was taken prisoner in 646 (began 26th April 1248) by the Franks (al-Ifrandj) i. e. the Spaniards under Ferdinand III the Saint, of Castile (1217—1252) at the conquest of the Spanish capital of the Almohads [q. v.], Seville, but escaped and afterwards went, in the sixth decade of the century (650 sqq. = 1252 sqq.), to Egypt; after hearing the most celebrated teachers of Cairo, he studied under those of Damascus, where he settled and gave lectures in the Umaiyad mosque, as a great authority on Tradition, while he declined the professorship offered him in the school of Tradition, Dār al-Ḥadīth al-Nūriya. Among those who heard him were al-Dimyāṭī (cf. al-Kutubī, *Fawāt al-Wafayāt*, ii. 17), al-Yūnīnī [q. v.], al-Muḥallī, al-Nābulusī, Abū Muḥammad b. al-Walīd, al-Birzālī [q. v.], and notably the great authority on history and tradition al-Dhahabī [q. v.]. He died in the *turba* of Umm al-Ṣāliḥ of diarrhoea (*bi 'l-ishāl*) on the 9th Djumādā II 699 = 19th February 1300. Nur al-Suyūṭī, *Ṭabaḳāt al-Mufassirīn* (ed. Meursinge), Nº. 88, (wrongly) makes our Ibn Faraḥ the son of another, the well-known author of the eschatological *Tadhkira bi Aḥwāl al-Mawtā wa Umūr al-Ākhira* and of the great Ḳur'ān-commentary, *Djāmi' Aḥkām al-Ḳur'ān*, Muḥammad b. Aḥmad b. Abī Bakr b. Faraḥ (al-Maḳḳarī, i. 600, wrongly b. Faradj) al-Anṣārī al-Mālikī al-Ḳurṭubī, died 9th Shawwāl 671 = 29th April 1273.

Ibn Faraḥ al-Ishbīlī's most celebrated work is the scholastic didactic poem on 28 technical expressions of the science of Tradition in 20 (Ḥādjdjī Khalīfa, vi. 190, wrongly gives 30) *Ṭawīl* verses with the rhyme-letter (*rawī*) *l* (hence *Lāmiya*) in the form of a love-poem, so that it was described correctly by al-Ṣafadī in al-Maḳḳarī, i. 819, as a *Ḳaṣīda ghazalīya fī Alḳāb al-Ḥadīth* (a love-poem on technical expressions of Tradition) (Brockelmann's quotation, i. 372, al-Maḳḳarī, i. 819, i. 819). It is usually called *Manẓūmat Ibn Faraḥ* or *Gharāmī Ṣaḥīḥ* after the two opening words of the first verse: *Gharāmī ṣaḥīḥun wa 'l-Radjā fīka mu'ḍalu — wa-Ḥuznī wa-Dam'ī mursalun musalsalu* "My longing is real, but my desire which is set on thee is difficult to gratify; my misery unceasing, my tears uninterrupted.".

The text of the *Ḳaṣīda* was first printed by Krehl in al-Maḳḳarī's *Analectes*, i. 819 sq. (from al-Ṣafadī) and again in *Madjmū' al-Mutūn*, Cairo 1313, p. 51 sq., and in al-Subkī's *Ṭabaḳāt al-Shāfi'īya al-kubrā*, v. 12 sq. (Cairo 1324 = 1906-7), where only 18 verses are given. The commentary of 'Izz al-Dīn Abū 'Abd Allāh Muḥammad b. Aḥmad b. Djamā'a al-Kinānī, died 819 = 1416, *Zawāl al-Taraḥ fī Sharḥ Manẓūmat Ibn Faraḥ*, is published by Fr. Risch, Leiden 1885 (there is another Ms. not yet used, in the British Museum, *Cat. Cod. Orient.*, ii. Nº. 169, iii.); in the notes there is also published almost the entire commentary of Shams al-Dīn Abū 'Abd Allāh b. 'Abd al-Hādī al-Maḳdisī, died 744 = 1343 (s. al-Dhahabī, *Ṭab. al-Ḥuffāẓ*, ed. Wüstenfeld, xxi. Nº. 12) from the Mss. Leiden, *Cat. Cod. Or.*, iv., Nº. 1749, and Gotha, Nº. 578 (s. Pertsch, v. 20). We may also mention that Berlin, *Verz.*, Nº 1055, *Ta'līḳ 'alā Manẓūmat Ibn Faraḥ*, gloss on Ibn Faraḥ's poem of the year 894 = 1489, is not a gloss on 'Izz al-Dīn's commentary, as Brockelmann says, but belongs to the poem itself; Cairo i.², 250, contains the commentary of Muḥammad b. Ibrāhīm b. Khalīl al-Tatā'ī (Bonnet, *Dictionnaire*, p. 154 and 899) al-Mālikī, died 937 = 1530-1, *al-Kawākib al-nayyira fī Ḥall al-Ishāra al-Sunnīya*. The principal *nisba* of the commentator Yaḥyā b. 'Abd al-Raḥmān al-Iṣfahānī, i. e. al-Ḳarāfī, by which alone he is often quoted, is not given by Brockelmann [Paris 4267, i. 4257, i. (*Cat.* de Slane)]. Muḥammad b. al-Amīr al-Kabīr in Brockelmann is rather Muḥammad (b. Muḥammad) al-Amīr al-Kabīr, according to Berlin, *Verz.*, Nº. 1056.

Besides Ibn Faraḥ's didactic poem there is also a commentary by him on al-Nawawī's [q. v.] 40 Traditions, *Sharḥ al-arba'īn Ḥadīthan al-Nawawīya*, Berlin, Nº. 1488—9.

Bibliography: Given in text.

IBN FARḤŪN, BURHĀN AL-DĪN IBRĀHĪM B. 'ALĪ B. MUḤAMMAD B. ABU 'L-ḲĀSIM B. MUḤAMMAD B. FARḤŪN AL-YA'MARĪ, a Mālikī jurist and historian, descendant of a family belonging to Uiyān, a village near Jaen in Spain, was born in Medina, where he died, heavily in debt, on the 10th Dhu 'l-Ḥidjdja 799 = 4th Sept. 1397, as the result of paralysis of his left side.

In addition to his father, his teachers were his father's brother, Abū Muḥammad Sharaf al-Dīn al-Asnawī, Djamāl al-Dīn al-Damanhūrī Muḥammad b. 'Arafa, and the latter's son, whose teaching Ibn Farḥūn received on his pilgrimage in 792 = 1390, and others. He often visited Cairo and in 792 (1390) Jerusalem and Damascus. In Rabī' II, 793 = March 1391 he became ḳāḍī of Medina. As a devout Muslim he frequently recited the Ḳur'ān and often repeated the Ḳur'ānic prayers (*wird*); he also reintroduced the Mālikī rite into Medina. He is the author of the following works: 1. *Tabṣirat al-Ḥukkām fī Uṣūl al-Aḳḍiya wa Manāhidj al-Aḥkām*, a treatise on legal practice according to the Mālikī school (pr. Cairo 1301, 1302; Būlāḳ 1300); 2. *al-Dībādj al-mudhahhab fī Ma'rifat A'yān 'Ulamā' al-Madhhab*, a collection of about 630 biographies of Mālikī jurists compiled from about 20 works detailed at the end and finished in Sha'bān 761 = June 1360 (according to Codera, in 857 = 1453 the text was revised cf. also Houtsma, *Catal. d'une Coll. de manuscr.*, etc., Leiden 1889, Nº. 204; pr. Fās 1316, Cairo 1329). This work is often quoted as *Ṭabaḳāt 'Ulamā' al-Gharb* oder *Ṭabaḳāt al-Mālikīya*; 3. *Durar* (var. *Nubdhat*) *al-Ghawwāṣ fī Muḥāḍarat al-Khawāṣṣ*, a collection of riddles on various points of Mālikī law (Khed. Libr., *Fihr.*, iii. 187); 4. *Tashīl al-muhimmāt fī Sharḥ Djāmi' al-Ummahāt*, a commentary on the legal handbook of Ibn al-Ḥādjib (Brit. Mus., *Cat.*, Nº. 872, iz.).

Bibliography: Aḥmad Bābā, *Nail al-Ibtihādj* (Fās 1317), p. 5; do., *Kifāyat al-Muḥtādj* (Ms. of the Madrasa in Algiers), fº. 53 vº; Wüstenfeld, *Die Geschichtschreiber der Araber*, p. 191, Nº. 448; Pons Boigues, *Ensayo bio-bibliográfico*, p. 348, Nº. 298; Fagnan, *Les Tabaqât malékites* in *Homenaje á D. IBN AL-FĀRIḌ. [See ʿOMAR B. AL-FĀRIḌ.]

IBN FĀRIS, ABU 'L-ḤUSAIN AḤMAD B. FĀRIS B. ZAKARIYĀ B. MUḤAMMAD B. ḤABĪB, philologist and grammarian of the school of Kūfa, died at al-Raiy in Ṣafar 395 = Nov.–Dec. 1004. The date and place of his birth are unknown but it is supposed that he was born in a village named Karsaf in the district of al-Zahrā. He studied in Ḳazwīn, Hamadhān, Baghdād, and on the occasion of his pilgrimage, in Mecca. Among his teachers we may specially mention his father, who was a philologist and Shāfiʿī jurist, Abū Bakr Aḥmad b. al-Ḥasan al-Khaṭīb, Abu 'l-Ḥasan ʿAlī b. Ibrāhīm al-Ḳaṭṭān, Abū ʿAbd Allāh Aḥmad b. Ṭāhir al-Munadjdjim, etc.

After teaching for some time in Hamadhān, where the celebrated Badīʿ al-Zamān al-Hamadhānī was his pupil, the Būyid Fakhr al-Dawla summoned him to al-Raiy as tutor to his son Madjd al-Dawla Abū Ṭālib. Originally an adherent of the Shāfiʿī school, he afterwards went over to the Mālikī. He was so generous that he frequently gave the clothes he was wearing to the poor.

The *Ṣāḥib* Ibn ʿAbbād, who out of modesty called himself his pupil, declared that the works of Ibn Fāris were free from error. Although he himself was of Persian origin, Ibn Fāris defended the Arab grammarians in their controversies with the Shuʿūbīs.

He left the following works: 1. *Kitāb al-Mudjmal fi 'l-Lugha*, an Arabic dictionary arranged after the first radical (Mss. cf. Brockelmann, *l. c.*); 2. *al-Ṣāḥibī fī Fiḳh al-Lugha wa-Sunan al-ʿArab fī Kalāmihā*, treatise on Arabic literature, lexicology and syntax (pr. Cairo 1910); 3. *Kitāb al-Thalātha*, in which the author endeavours to prove that words of 3 like consonants, in which 3 combinations are possible, are synonymous (Derenbourg, *Les mss. arab. de l'Esc.*, Nº. 363, 3); 4. *Awdjaz al-Siyar li-Khair al-Bashar*, a brief biography of the Prophet (8 pp. Bombay n. d.); 5. *Dhamm al-Khaṭaʾ fi 'l-Shiʿr*, a treatise on poetic license (Berlin, *Verz.* Nº. 7181); 6. *Kitāb al-Itbāʿ wa 'l-Muzāwadja*, a collection of words which have similar form and are used in inseparable pairs (ed. by Brünnow in *Orient. Studien, Th. Nöldeke zum 70. Geburtstag gewidmet*, Giessen 1906); 7. *Kitāb al-Nairūz*; Ḥabīb al-Zaiyāt, *Khazāʾin al-Kutub fī Dimashḳ* etc., p. 29, Nº. 9, 5; 8. *Kitāb al-Lāmāt*, *ib.*, p. 33, Nº. 71, 2.

Bibliography: Ibn Khallikān, *Wafayāt* (Cairo 1310), i. 35; al-Suyūṭī, *Ṭabaḳāt al-Mufassirīn*, p. 4, Nº. 6; *do.*, *Bughyat al-Wuʿāt* (Cairo 1326), p. 153; al-Anbārī, *Nuzhat al-Alibbāʾ* (Cairo 1294), p. 392; Ibn Farḥūn, *al-Dībādj* (Fās 1316), p. 40; al-Thaʿālibī, *Yatīmat al-Dahr* (Damascus 1304), iii. 214; Yāḳūt, *Irshād al-Arīb*, ii. 6 *sqq.*; biography of Ibn Fāris at the beginning of the edition of his work *al-Ṣāḥibī fī Fiḳh al-Lugha* etc., see above; Flügel, *Die grammatischen Schulen der Araber*, p. 247; Brockelmann, *Gesch. d. arab. Litt.*, i. 130; Huart, *Arab. Lit.*, London 1903, p. 159 *sq.*

(MOH. BEN CHENEB.)

IBN AL-FURĀT, the name of several persons who filled high offices of state.

1. ABU 'L-ḤASAN ʿALĪ B. MUḤAMMAD B. MŪSĀ B. AL-ḤASAN B. AL-FURĀT, born in 241 = 855. ʿAlī belonged to the district of al-Nahrawān and was first of all secretary of State in Baghdād. After the unsuccessful attempt to place Ibn al-Muʿtazz [q. v.] on the throne, ʿAlī was appointed vizier in Rabīʿ I 296 (December 908) by the Caliph al-Muḳtadir and became the real ruler. In Dhu 'l-Ḥidjdja 299 (July 912) he was dismissed on the pretext that he had arranged a raid on the capital with the rapacious Bedouins. To make his former favourite harmless, the Caliph had him imprisoned and confiscated his vast wealth. He managed to regain the Caliph's confidence however and was set free in Dhu 'l-Ḥidjdja 304 (June 917) and restored to office. The wars and extravagances of the vizier brought the finances of the State into disorder and this brought about his fall. In Djumādā I 306 (November 918) he was dismissed for a second time, imprisoned and had all his property confiscated. He succeeded in being pardoned again through the influence of his son al-Muḥassin and in Rabīʿ II 311 (August 923) the Caliph made him vizier for the third time. His avaricious and revengeful nature made him so hated however that al-Muḳtadir had finally to get rid of him. In Rabīʿ I 312 (June 924) ʿAlī and al-Muḥassin were arrested and executed on 13th Rabīʿ II of the same year (July 19th 924).

Bibliography: Hilāl al-Ṣābiʾ, *Kitāb al-Wuzarāʾ* (ed. Amedroz), p. 8 *sqq.*; Ibn Khallikān (ed. Wüstenfeld), Nº. 498 (transl. by de Slane, ii. 355 *sqq.*); Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 360 *sqq.*; ʿArīb (ed. de Goeje), p. 26—37, 61—77, 100, 109—121; Ibn al-Athīr (ed. Tornberg), viii. 11—15, 47 *sq.*, 72 *sqq.*, 81—83, 101—114; Ibn Khaldūn, *ʿIbar*, iii. 359 *sq.*; Weil, *Gesch. d. Chalifen*, ii. 540—556; Müller, *Der Islam im Morgen- und Abendland*, i. 533 *sq.*

2. ABŪ ʿABD ALLĀH (or ABU 'L-KHAṬṬĀB) DJAʿFAR B. MUḤAMMAD, brother of the preceding. After ʿAlī b. al-Furāt had been appointed vizier in 296 (908), he entrusted his brother with the administration of the finances of the eastern and western provinces. According to the usual date Djaʿfar died as early as Shawwāl 297 (June-July 910). His office was then divided between the vizier's two sons, al-Faḍl and al-Muḥassin, so that the former administered the eastern and the latter the western provinces.

Bibliography: Hilāl al-Ṣābiʾ, *Kitāb al-Wuzarāʾ* (ed. Amedroz), p. 204, 237, 256; ʿArīb (ed. de Goeje), p. 29, 34; Weil, *Gesch. d. Chalifen*, ii. 546.

3. ABU 'L-FATḤ AL-FAḌL B. DJAʿFAR B. MUḤAMMAD, son of the preceding, born in Shaʿbān 279 (November 892), also called Ibn Ḥinzāba after his mother Ḥinzāba, a Greek slave. In 320 (932) he was appointed vizier by al-Muḳtadir, but absolute anarchy was then reigning in the capital and, as the new vizier was not able to cope with the situation, he had to call in the aid of Muʾnis, the commander of the body guard. When the latter advanced in the town, the Caliph was persuaded to go out against him. Al-Muḳtadir's troops were defeated and he himself slain. Al-Faḍl thus lost his office. He was appointed collector of taxes for Egypt and Syria under the caliphate of al-Rāḍī; the actual ruler however was not the Caliph but the Amīr al-Umarāʾ Muḥammad b. Rāʾiḳ. In 324 (936) or 325 (937) the latter induced the Caliph to make al-Faḍl vizier; but he was weak

and not fitted for such a post and by the next year we find him begging permission from Ibn Rā'iḳ to retire to Syria to attend to the revenues of that province and of Egypt. Ibn Muḳla succeeded him as vizier. Al-Faḍl died in 327 (939).

Bibliography: Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 374, 383—5; Hilāl al-Ṣābī', *Kitāb al-Wuzarā'* (ed. Amedroz), p. 208, 310, 314 *sq.*; Ibn al-Athīr (ed. Tornberg), viii. 111, 134, 176, 211, 245, 257 *sq.*, 266; Weil, *Gesch. d. Chalifen*, ii. 572, 663, 669.

4. Abu 'l-Faḍl Dja'far b. al-Faḍl b. Dja'far b. Muḥammad, son of the preceding, born in Dhu 'l-Ḥidjdja 308 (April 921). Dja'far, who was also called Ibn Ḥinzāba, held the office of vizier to the Ikhshīdids in Egypt. The real ruler however was the Abyssinian Kāfūr, under whose protection Dja'far held office and who was soon recognised in name also as king. On Kāfūr's death in 357 (968) the minor Aḥmad b. 'Alī b. al-Ikhshīd became head of the dynasty, while Dja'far continued in office. Although the vizier by no means omitted to practice all kinds of extortion he was unable to satisfy the claims of the Kāfūrids, the Ikhshīdids and the Turkish mercenaries, and had twice to hide while the mutineers plundered his palace and the houses of some of his followers. The real ruler was now Abū Muḥammad al-Ḥasan b. 'Abd Allāh b. Tughdj, the commander of the Syrian troops. In 358 (969) the latter appeared in Egypt, arrested Dja'far and appointed al-Ḥasan b. Djābir al-Riyāḥī vizier. Dja'far was soon released and when Ḥasan returned to Syria, he restored the government of Egypt to his hands. In the same year however the Ikhshīdids were overthrown. Dja'far died in Ṣafar or in Rabī' I 391 (January 1001) or, according to another authority, in Ṣafar 392 (Jan. 1002).

Bibliography: Ibn Khallikān (ed. Wüstenfeld), N°. 132 (transl. de Slane, i. 319 *sqq.*); Yāḳūt, *Irshād al-Arīb* (ed. Margoliouth), ii. 405—412; Ibn al-Athīr (ed. Tornberg), ix. 119, 120; Weil, *Gesch. d. Chalifen*, iii. 9.

(K. V. Zetterstéen.)

IBN AL-FURĀT, Nāṣir al-Dīn Muḥammad b. 'Abd al-Raḥīm b. 'Alī al-Miṣrī, Arab historian, b. 735 (1334), d. 807 (1405), author of a comprehensive chronicle, *Ta'rīkh al-Duwal wa 'l-Mulūk*. He began with the viii[th] century and worked backwards but only reached the fourth century A. H. He gave extracts from his predecessors verbatim which adds a high value to his work. The only manuscript (Vienna, cf. Flügel, *Die arab. . . . . Hss.*, N°. 814) is still unedited, although it has been used by several scholars.

Bibliography: See Brockelmann, *Gesch. d. arab. Litt.*, ii. 50 and Nachträge.

IBN GHĀNIM, 'Izz al-Dīn 'Abd al-Salām b. Aḥmad al-Maḳdisī, author of the well-known *Kashf al-Asrār 'an Ḥikam al-Ṭuyūr wa 'l-Azhār*, which was published in 1821 by Garcin de Tassy under the title *Les oiseaux et les fleurs* (repr. in *Allégories, récits poétiques*, etc., 1876); German transl. by Peiper, *Stimmen aus dem Morgenlande*, Hirschberg 1850. Other works are detailed by Brockelmann, *Geschichte* etc., i. 450 (cf. ii. 703). Biographical details are lacking. The year 678 (1279) is given as the year of his death.

The same name Ibn Ghānim al-Maḳdisī is also given to a Ḥanafī jurist on whom cf. Brockelmann, *op. cit.*, ii. 312.

IBN GHĀNIYA, Yaḥyā b. 'Alī b. Yūsuf al-Massūfī, Governor of Spain under the Almoravids, born in Cordova, according to Ibn al-Khaṭīb, and died in 543 (1148) at Granada. He is best known as Ibn Ghāniya, after his mother, a relative of the great Yūsuf b. Tāshfīn, the real founder of the Almoravid empire.

Ibn Ghāniya, as well as his brother Muḥammad grew up at the Almoravid court of Marrākush, where their father seems to have held a high position. In 520 (1126) 'Alī b. Yūsuf appointed Ibn Ghāniya governor of Western Spain. From 520—538 (1126—1143) he successfully warded off the attacks of the Christians and completely defeated the army of Alfonso the Fighter, King of Aragon in 528 (1133-1134) at Fraga. Beginning about 538 (1143) however, the revolutionary movement of the Andalusian Muslims (Agarenos) against the Almoravid empire, led by chiefs like Abu 'l-Ḳāsim Aḥmad (Abencasi), the Ḳāḍī Ibn Ḥamdīn of Cordova, Abu 'l-Ḥākim b. Ḥassūn of Malaga, al-Mustanṣir b. Hūd (Zafadola) of Saragossa and many others so shattered Almoravid dominion in Spain that it soon fell to pieces.

The governor Ibn Ghāniya, who lived in Seville, performed prodigies of valour and showed great qualities in organising the resistance. He recaptured Cordova in 539 (Jan. 1145) from Ibn Ḥamdīn, who then obtained the support of Alfonso VII of Castile. Ibn Ghāniya had to retire before the latter's army to the citadel of Cordova in 540 (1146). The arrival in Spain of the first Almohad armies forced Alfonso VII to abandon Cordova to Ibn Ghāniya, who however became his vassal. In face of Alfonso VII's increasing demands, Ibn Ghāniya allied himself with the Almohad general Barrāz, governor of Seville, with whom he exchanged Cordova and Carmona for Jaén in 543 = 1148.

The successes of the Almohads were rapid and soon Granada alone remained to the Almoravids, while Ibn Mardanīsh [q. v.], an independent lord, was master of Murcia, Valencia and the whole of Eastern Spain.

One of Ibn Ghāniya's last acts of loyalty to the Almoravid empire was to send to Ceuta the governor al-Ṣaḥrāwī at the Ḳāḍī 'Iyāḍ's request in 543 (1148). He died soon afterwards in Granada on the 10[th] Sha'bān 543 (December 1148), when the ruin of the Almoravids had been completed in Spain.

Ibn Ghāniya seems to have left no children. If we may believe Ibn al-Khaṭīb in the *Iḥāṭa*, he early sent away his wife, lest her company might diminish his warlike ardour. His brother Muḥammad, appointed governor of the Balearic Islands [q. v., i. 617[b]] in 520 A. H., left sons, who with their descendants maintained Almoravid rule there till 580 (1188). It was the grandsons of Muḥammad who attempted an Almoravid restoration in Barbary, where they fought till 633 (1235-1236) against the Almohads.

Bibliography: See the references in F. Codera, *Decadencia y desaparición de los Almoravides en España*, Saragossa, 1899; A. Bel, *Les Benou Ghânya, derniers représentants de l'empire almoravide, et leur lutte contre l'empire almohade*, Paris, 1903. (Alfred Bel.)

IBN AL-HABBĀRĪYA, Niẓām al-Dīn Abū Ya'lā Muḥammad b. Muḥammad, a celebrated Arab poet, a descendant of the 'Abbāsid prince

ʿĪsā b. Mūsā [q. v.]; cf. his genealogy in Wüstenfeld, *Tabellen*, W, 35. His maternal grandfather was a certain Habbār, whence his name the "son of the Habbārī lady". Born at Baghdād about the middle of the vᵗʰ (xᵗʰ) century he received his education at the madrasas, which had just been founded there, presumably at the Niẓāmiya founded by Niẓām al-Mulk in 459 (1067); but he could take no pleasure in theological disputes (cf. Ibn al-Athīr, x. 71, 80). He therefore spent his youth in the taverns of Ḳuṭrabbul, a suburb of Baghdād, in the company of the gay spirits and the *jeunesse dorée* of the capital of his day. He also fell a victim to sexual perversities, as he himself tells frankly in his poems. His great poetic gifts, his keen wit, his skill in the Arabic language, however, preserved him from utter ruin, but poverty forced him to come forward as a panegyrist of the rulers of his time, the Banū Djahīr and Niẓām al-Mulk. His high birth and his fondness for satire unfitted him for this sycophantry and he soon quarrelled with his noble patrons. When, for example, the younger Ibn Djahīr became the Caliph's vizier for the second time in 484 (1091) through the favour of his father-in-law Niẓām al-Mulk, our poet greeted this appointment with a biting satire which was soon on every one's lips. He did not even spare the Caliph and the all-powerful Niẓām al-Mulk, so that it was only through the intercession of the influential Ṣadr al-Dīn Muḥammad al-Khōdjandī, that the incident had no evil consequences for him. In the meanwhile, he had migrated from Baghdād to Iṣfahān, but his new patrons, the unfortunate viziers Tādj al-Mulk and Madjd al-Mulk, met a miserable fate in the troubled times that followed the death of Malikshāh and there was an end to his stay in Iṣfahān. He finally went to Kirmān, where the Saldjūḳ Īrānshāh had been reigning since 490 (1096), a prince in whom al-Habbāriya found a kindred spirit. Nothing is known with certainty of the rest of his life and various dates are given for his death. The correct one is perhaps that given by Sibṭ Ibn al-Djawzī, according to whom he died in 509 (1115).

The *Dīwān* of Ibn al-Habbāriya which, according to Ibn Khallikān, contained four volumes, has unfortunately not survived to us, which is a great loss, for the study of contemporary history also. ʿImād al-Dīn gives rather long extracts in his *Kharīda*. He also wrote 1. a rhymed version of the *Kalīla wa-Dimna* entitled *Natāʾidj al-Fiṭna fī Naẓm Kalīla wa-Dimna* (cf. *Orientalische Studien*, Th. *Nöldeke gewidmet*, i. 42 sqq.); 2. a kind of anthology in 12 chapters entitled *Fulk al-Maʿānī*; cf. Barthold in *Zapiski Vost. Otd. Imp. Arkh. Obsh.*, xviii. 0144 sqq.; 3. *Kitāb al-Ṣādiḥ wa ʾl-Bāghim*, rhymed tales of a didactic nature after the style of *Kalīla wa-Dimna*. This poem is very popular in the East; the author worked on it for 10 years and dedicated it to the Mazyadī Ṣadaḳa b. Manṣūr. Ed. Cairo 1292, Bairūt 1886.

Bibliography: in addition to references in the article, Ibn Khallikān, *Wafayāt*, ed. Wüstenfeld, Nº. 687; *Recueil de textes relatifs à l'histoire des Seldj.*, ii. 65 and s. Index; Brockelmann, *Geschichte der arab. Litt.*, i. 252 sq.; Chauvin, *Bibliographie des ouvrages arabes*, ii. 171 sqq.

IBN ḤABĪB, Abū Marwān ʿAbd al-Malik b. Ḥabīb al-Sulamī, an Arab jurist, born at Ḥiṣn Wāṭ (Huetor Vega, according to Simonet) near Granada. He studied at Elvira and Cordova, then made the pilgrimage to Mecca and at Medina became acquainted with the Mālikī school of law which he introduced into Spain. He died at Cordova 238 (853). He is said to have published over 1000 writings on different subjects, but the only work (with the exception of an unimportant fragment), which has come down to us under his name, is, as Dozy, *Recherches*³, i. 28, has pointed out, a later compilation.

Bibliography: Wüstenfeld, *Die Geschichtschreiber der Araber*, Nº. 56; Pons Boigues, *Ensayo bio-bibliogr.*, p. 29 sqq. (where further references are given); Brockelmann, *Geschichte* etc. I, 149 sq.

IBN ḤABĪB, Muḥammad, an Arab philologist, a pupil of Ḳuṭrub [q. v.], died at Sāmarrā in 245 (859). Of his many works only a treatise on the similarities and differences between Arab tribal names has come down to us and was published by Wüstenfeld (*Ueber die Gleichheit und Verschiedenheit der arabischen Stammesnamen*, Göttingen 1850).

Bibliography: *Fihrist*, p. 106; Flügel, *Die grammatischen Schulen der Araber*, p. 67; Wüstenfeld, *Die Geschichtschreiber der Araber*, Nº. 59; Brockelmann, *Geschichte der arab. Litt.*, i. 106.

IBN ḤABĪB, Badr al-Dīn Abū Muḥammad al-Ḥasan b. ʿOmar al-Dimashḳī al-Ḥalabī, an Arab historian and scholar, born at Damascus in 710 (1310). He studied at Ḥalab, where his father filled the office of *muḥtasib* and also taught tradition. In 733 (1332) he made the pilgrimage and again in 739 (1338). During these journeys he stayed in various towns of Egypt and Syria. We afterwards find him now at Ṭarābulus, now back in Damascus, then in Ḥalab, where he died in 779 (1377). Of his works, which are detailed by Wüstenfeld and Brockelmann, we may here mention his history of the Mamlūk Sulṭāns of Egypt from 648—777 (1250—1375), *Durrat al-Aslāk fī Mulk al-Atrāk*, of which extracts have been published by Weyers and Meursinge in *Orientalia*, ii. 196 sq. Of quite another character is his work in rhymed prose, intermingled with verse, called *Nasīm al-Ṣabā*, and repeatedly printed in the East, e. g. Alexandria, 1289; Constantinople, 1302; Cairo, 1307.

Bibliography: Wüstenfeld, *Geschichtschreiber*, Nº. 440; Brockelmann, *Geschichte* etc., ii. 36 sq. (where further references are given).

IBN ḤADJAR AL-ʿASḲALĀNĪ, whose full name was Aḥmad b. ʿAlī b. Muḥammad b. Muḥammad b. ʿAlī b. Aḥmad, Shihāb al-Dīn Abu ʾl-Faḍl al-Kinānī al-ʿAsḳalānī al-Miṣrī al-Khāzinī, a famous authority on tradition, faḳīh and historian, of the Shāfiʿī school. He was born on the 12ᵗʰ Shaʿbān 773 (18ᵗʰ February 1372) in Old Cairo; his father Nūr al-Dīn, whom he lost along with his mother at a very early age, was a notable scholar and was entitled to deliver fatwās and impart instruction. The son grew up under the protection of one of his guardians, Zakī al-Dīn al-Kharrūbī, a prominent merchant. Even by his ninth year he knew the Ḳurʾān by heart and soon mastered the elementary works on Fiḳh and grammar. He then studied for a considerable period with the most noted scholars of his day, for example, Ḥadīth and Fiḳh with al-Bulḳīnī [q. v.],

Ibn al-Mulaḳḳin (d. 804), ʿIzz al-Dīn Ibn Djamāʿa [see IBN DJAMĀʿA, 4], the various readings (*ḳirāʾāt*) of the Ḳurʾān with al-Tanūkhī, Arabic language and lexicography with Muḥibb al-Dīn Ibn Hishām (d. 799) and al-Fīrūzābādī [q. v.]. From 793 (beginning Dec. 1390) he devoted himself by preference to the study of Ḥadīth. For this purpose he undertook several journeys in Egypt, Syria Ḥidjāz and Yemen, which brought him into contact with philologists and literary men. He studied Ḥadīth for ten successive years with Zain al-Dīn al-ʿIrāḳī (d. 806). The majority of his teachers granted him authority to deliver fatwās and impart instruction.

After several times declining to fill a judicial office he finally yielded to the entreaties of his friend, the Ḳāḍī ʾl-Ḳuḍāt Djamāl al-Dīn al-Bulḳīnī, to act as his deputy. In Muḥarram 827 (Dec. 1423) he was appointed Chief Ḳāḍī. He held this office for about 21 years in all, being repeatedly dismissed and restored to office. At the same time he held professorships in various (al-Sakhāwī, mentions 10) mosques and madrasas, lecturing on Ḳurʾān exegesis, Ḥadīth and Fiḳh. The lectures of the "authority on Ḥadīth of his day" (*ḥāfiẓ ʿaṣrihi*) were eagerly attended even by specialists. He was also mufti of the Dār al-ʿAdl, rector-warden of the Baibarsiya, khaṭīb first in the Azhar and then in the Ḳubba al-Maḥmūdiya.

Ibn Ḥadjar, who was also esteemed as a writer both of prose and poetry, displayed a considerable literary activity; his works, several of which are very important for the study of Islām, were much sought after even in his lifetime, notably his commentary, *Fatḥ al-Bārī fī Sharḥ al-Bukhārī* (Būlāḳ 1300-1), which was sold for 300 dīnārs. Of his writings, the number of which is estimated at over 150, we may here mention: *al-Iṣāba fī Tamyīz al-Ṣaḥāba* (ed. Sprenger etc., Calcutta 1856-73, and Cairo 1323—5); *Tahdhīb al-Tahdhīb* (ed. Haidarābād 1325—27); *Taʿdjīl al-Manfaʿa bi-Zawāʾid Ridjāl al-Aʾimma al-arbaʿa* (ibid. 1324); *al-Ḳawl al-musaddad fi ʾl-Dhabb ʿan al-Musnad li ʾl-Imām Aḥmad* (ibid. 1319); *Bulūgh al-Marām min Adillat al-Aḥkām fī ʿIlm al-Ḥadīth* (Cairo 1330); *Nukhbat al-Fikar fī Muṣṭalaḥ Ahl al-Athar* and *Nuzhat al-Naẓar fī Tawḍīḥ Nukhbat al-Fikar* (ed. Lees etc., *Bibl. Ind.*, New Ser., Nº. 37, Calcutta 1862); *al-Durar al-kāmina fī Aʿyān al-Miʾa al-thāmina*; *Inbāʾ al-Ghumr bi-Abnāʾ al-ʿUmr*; *Rafʿ al-Iṣr ʿan Ḳuḍāt Miṣr* (MSS. of these three works in Brockelmann; select biographies from the latter are published by R. Guest in the appendix to *The Governors and Judges of Egypt*, Gibb Mem., Vol. xix.); *Tawālī al-Taʾnīs fī Maʿālī Ibn Idrīs* and *Dīwān* (printed together Būlāḳ 1301); *Ghibṭat al-Nāẓir fī Tardjamat al-Shaikh ʿAbd al-Ḳādir*, ed. E. D. Ross, Calcutta 1903. — Further information on these works is given in Brockelmann, *op. cit.*, where several other writings are mentioned; cf. also Landberg, *Cat. de Mss. arabes* . . . , Nº. 31, 32, 53, 97, 88, 98, 106, 228, 279, 319; Houtsma, *Cat. d'une Coll.* . . . , Nº. 763, 764 (?), 783 II, 1026 (?); Vollers, *Die Islam* . . . . *Hss.* (*Leipzig*), s. Ind., and the list in the *Tardjama* of the *Tahdhīb*.

Ibn Ḥadjar died towards the end of Dhu ʾl-Ḥidjdja 852 (Febr. 1449). His pupil al-Sakhāwī wrote a very full biography of him entitled *al-Djawāhir wa ʾl-Durar fī Tardjamat Shaikh al-Islām Ibn Ḥadjar*.

Bibliography: al-Sakhāwī, *al-Ḍawʾ al-lāmiʿ*, Ms. Leiden (*Cat.*², ii. 117 sq.), p. 389 sqq.; do., *Dhail ʿalā Rafʿ al-Iṣr*, Ms. Leiden (*Cat.*², ii. 190 sq.), f. 29ᵃ—33ᵇ; Quatremère, *Notice sur Ahmed-Ebn-Hadjar-Askalani* in *Hist. des Sultans Mamlouks*, i. 2, p. 209—219; *Tardjama* at the end of *Tahdhīb al-Tahdhīb*, xii. (Haidarābād 1327); Ibn Iyās, *Badāʾiʿ al-Zuhūr*, Būlāḳ 1311, ii. 7, 9 *infra*, 18, 19, 20, 28, 29, 32 *sq.*; Brockelmann, *Gesch. d. arab. Litt.*, ii. 67 *sqq.* and the references there given.

(C. VAN ARENDONK.)

IBN ḤADJAR AL-HAITAMĪ, whose full name was AḤMAD B. MUḤAMMAD B. MUḤAMMAD B. ʿALĪ IBN ḤADJAR, SHIHĀB AL-DĪN, ABU ʾL-ʿABBĀS, AL-HAITAMĪ AL-SAʿDĪ (after the Banū Saʿd in al-Sharḳiya, where his family was originally settled), a famous Arab jurist of the Shāfiʿī school, was born at Maḥallat Abi ʾl-Haitam in al-Gharbiya [q. v.] towards the end of the year (some say Radjab) 909 (1504). After, while still a child, he lost his father, the latter's shaikhs Shams al-Dīn Ibn Abi ʾl-Ḥamāʾil (died 932), a noted mystic, and Shams al-Dīn Muḥammad al-Shanāwī, a pupil of the latter, undertook his maintenance and education. Al-Shanāwī placed him in the Maḳām of Saiyid Aḥmad al-Badawī; on the completion of his elementary education he let his ward prosecute his studies from 924 onwards in the Azhar mosque. In spite of his youth, he studied here under the scholars of the day, such as Zakariyā al-Anṣārī [q. v.], ʿAbd al-Ḥaḳḳ al-Sunbāṭī (d. 931), Shihāb al-Dīn Aḥmad al-Ramlī (d. 958), Nāṣir al-Dīn al-Ṭablāwī (d. 966), Abu ʾl-Ḥasan al-Bakrī (d. 952), Shihāb al-Dīn Ibn al-Nadjdjār al-Ḥanbalī (d. 949). Distinguishing himself in theological and legal studies he received, when barely 20 years of age, authority to deliver fatwās and impart instruction. After marrying at al-Shanāwī's suggestion in 932 the latter's niece, he made the pilgrimage in 933 to Mecca, where he also spent the following year. The start which he made there as a legal writer, he followed up on his return to Egypt, till in 937 he undertook the pilgrimage with his family and again made a stay in Mecca. After a third pilgrimage in 940 he settled permanently in the holy city where he devoted himself to authorship and teaching and was appealed to for fatwās from far and near. That his authority there was not entirely undisputed is evident from a statement by al-Fākihī (*Chron. d. Stadt Mekka*, ed. Wüstenfeld, iii. 56 *sqq.*). He conducted a series of vigorous polemics with the Shāfiʿī mufti of Zabīd, Ibn Ziyād (cf. Brockelmann, *op. cit.*, ii. 404) (Snouck Hurgronje, *Islam und Phonograph*, p. 4 *sqq.* = *Tijdschr. van het Bataviaasch Genootschap*, xlii. 396 *sqq.*). He died on the 23ʳᵈ Radjab 974 (3 Febr. 1567) in Mecca and was buried on the Maʿlāt.

Ibn Ḥadjar's commentary on the *Minhādj al-Ṭālibīn* of al-Nawawī [q. v.], *Tuḥfat al-Muḥtādj li-Sharḥ al-Minhādj*, was with the *Nihāya* of al-Ramlī [q. v.] the authoritative textbook of the Shāfiʿī madhhab. After the Ḥadjariyūn (chiefly in Ḥaḍramawt, Yemen and Ḥidjāz) and the Ramliyūn (in Egypt and Syria) had at first disputed fiercely with one another, the opinion finally prevailed that Ibn Ḥadjar as well as al-Ramlī had to be considered the indispensable transmitter of the correct Shāfiʿī point of view (Snouck Hurgronje, *l. c.*, and in *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, liii. 142 *sq.*). Among his writings we may further mention *al-Fatāwā al-*

kubrā al-fiḳhīya (Cairo 1308), in which are inserted several lengthy treatises with separate titles, e. g. his two polemics against Ibn Ziyād; *al-Fatāwā al-ḥadīthīya* (Cairo, 1307); *al-Ṣawā'iḳ al-muḥriḳa fi 'l-Radd 'alā Ahl al-Bida' wal-Zandaḳa* (Cairo 1308), a polemic against the Shī'a, discussed by Goldziher, *Sitzungsber. d. Kais. Akad. d. Wiss. zu Wien*, phil.-hist. Cl., lxxviii. 453 *sqq.*; on the margin of the latter: *Kit. Taṭhīr al-Djanān wal-Lisān 'an al-Khuṭūr wal-Tafawwuh bi-Thalb Saiyidinā Mu'āwiya b. Abī Sufyān*. Besides the editions given by Brockelmann, *l. c.*, we may mention: *al-Zawādjir 'an Iḳtirāf al-Kabā'ir* with marginal editions of *Kaff al-Ra'ā' 'an Muḥarramāt al-Lahw wal-Samā'* and *al-I'lām bi-Ḳawāṭi' al-Islām* (Cairo 1325) and *al-Minaḥ al-Makkīya fī Sharḥ al-Hamzīya* (ib. 1307 in two ed., and 1322); *Riyāḍ al-Riḍwān fī Ma'āthir al-Mu'min al-'Ali Āṣaf khān*, cf. *An Arabic Hist. of Gujurat*, ed. E. D. Ross, London, 1910, p. 333 *sqq.* The MSS. of these and other works are given by Brockelmann, *l. c.*; cf. also Houtsma, *Cat. d'une collection de manuscr.*..., N°. 50, 234, 499, 741, 1090, 1117, 1163₂. Ḥabīb al-Zaiyāt, *Khazā'in al-Kutub fī Dimashḳ* etc., p. 53, N°. 95, 96; 59, N°. 126; 60, N°. 134; 72, N°. 24; 73, N°. 30—33; 75, N°. 68; Vollers, *Die Islam.*.... *Hss.* (*Leipzig*), s. Ind. Further works are given in the biographical articles mentioned below.

Bibliography: Besides the references in the article, the biographical details in the preface to the *al-Fatāwā al-kubrā* (I, 3—5); biographical articles in *al-Nūr al-sāfir*, Cod. 1742 Leyden (*Cat.*², II, 123), f. ۲۳—۲۸, and *al-Bāḳ al-bāṣir 'alā ba'ḍ Wafayāt A'yān Ahl al-Ḳarn al-'āshir*, ib., f. ۲۰۰—۲۰۳; *Manāḳib*, app. to *Tuḥfat al-Muḥtādj*, Cairo 1306; Brockelmann, *Gesch. d. arab. Litt.*, ii. 387 *sqq.*, cf. i. 162, 266, 364, 394, 395, 396; ii. 156, 157.

(C. van Arendonk.)

IBN al-ḤADJDJĀDJ Abū 'Abd Allāh al-Ḥusain b. Aḥmad b. Muḥammad b. Dja'far, poet of the Būyid period. He belonged to a family which was engaged in the public service, and was himself trained by Abū Isḥāḳ Ibrāhīm al-Ṣābi' in secretarial work. He found however that he could earn more by verse, and became an encomiast of the most important among his contemporaries, especially 'Izz al-Dawla Bakhtiyār, who appointed him to the office of *muḥtasib* or censor in Baghdād; a most unsuitable appointment, since this poet specialized in obscenity, and indeed against one of the headings in the Paris abridgment of his *Dīwān* "encouragement to fornication" a reader has written the question "Is this the business of the censor?" After a time he was deprived of this office and vainly endeavoured to recover it. In his poems he mentions various estates which he had acquired or inherited, and several odes deal with a dispute between himself and a Kurd for the possession of one of them.

Among the eminent men with whom he came in contact were the vizier Muhallabī, who desired him to satirize Mutanabbī; Sābūr b. Ardashīr; Ibn Baḳīya; 'Aḍud al-Dawla and Bahā' al-dawla; Ibn 'Abbād and Ibn al-'Amīd. He earned 1000 dīnārs by an encomium on "the ruler of Egypt" who feared his satire; and much of his wealth appears to have been acquired by blackmail of this sort. Ibn al-Ḥadjdjādj died 391 (1001).

His *Dīwān* when complete filled many volumes; a volume preserved in the British Museum contains rhymes in *dāl* and part of those in *rā*. A selection of the less obscene poems was made by his contemporary and friend the Sharīf al-Raḍī, called *al-Naẓīf min al-sakhīf*; a selection by no means free from obscenity was made in 510 by Hibat Allāh al-Iṣṭurlābī, in 141 sections; this is preserved in the Paris MS. 5913, with prefatory note by the grammarian Ibn al-Khashshāb. A considerable collection of his verses is also given by Tha'ālibī in the *Yatīma* ii. 211—270. Other selections are mentioned by Brockelmann i. 82.

The subject with which the poems chiefly deal is the vice explained by Mez, *Ibn al-Ḥādjdjādj Sittenbild*, p. xxvii; the society in which the poet moved is that which is known from the *Yatīma*, especially vol. ii.; the Sharīf al-Raḍī is said to have incurred infamy by his lament over Ibn al-Ḥadjdjādj (*Dīwān*, p. 862—864), who however had earned it by his attacks on the Companions, which the Sharīf as an 'Alawid approved.

Bibliography: MSS. cited above. *Mir'āt al-Zamān* of Sibṭ Ibn al-Djawzī (MS).

(D. S. Margoliouth.)

IBN al-ḤĀDJIB, Djamāl al-Dīn Abū 'Amr 'Othmān b. 'Omar b. Abī Bakr b. Yūnus, an Arab grammarian, son of a Kurdish chamberlain of the Emīr 'Izz al-Dīn Mūsak al-Ṣalāḥī, born in the village of Esnā in Upper-Egypt in the closing days of the year 570 = 1175, studied the Ḳur'ān and the sciences connected with it, Mālikī law and its sources, grammar, and belles lettres, in Cairo. His chief teachers were the Imām al-Shāṭibī, the jurist Abū Manṣūr al-Abyārī, etc., He made a journey to Damascus and after spending a long time there teaching publicly in the Mālikī zāwiya of the great Umaiyad mosque he went to Cairo and afterwards moved to Alexandria, where he died on the 26th Shawwāl 646 = 11 Febr. 1249.

Although he also wrote works on law and prosody, it is as a grammarian that he is specially celebrated and in this field he differs in many points from his predecessors. As a jurist he was the first to combine the doctrines of the Mālikīs of Egypt with those of the Maghribī Mālikīs. We owe to him the following works, of which those in prose are so clear in their style that they require no commentary: 1. *al-Kāfiya*, a short manual of Arabic syntax (*naḥw*; Rome 1592; Cawnpore 1888, 1891; Kazan 1889; Tashkent 1311, 1312; Constantinople 1305; Cairo repeatedly; commentary Constantinople 1310); 2. *al-Shāfiya*, short treatise on Arabic accidence (*ṣarf*; pr. 1805; Constantinople 1850; Cawnpore 1885; extracts publ. with notes by F. Buhl, *Sproglige og historiske Bidrag til den arab. Gramm. med udv. Tekststykker af Ibn al-Ḥâǵibs aš-Šâfija*, Leipzig 1878); 3. *al-Maḳṣad al-djalīl fī 'Ilm al-Khalīl*, a didactic poem in the *Basīṭ* metre on prosody (Leiden, *Cat.*², N°. 273; Berlin, *Verz.*, N°. 7126; Bodl., *Cat.*, I, *MSS. Heir.*, N°. 36, ii., *MSS. Arab.*, N°. 1267, ii.; publ. with transl. by Freytag in his *Darstell. der arab. Verskunst*, Bonn 1830, p. 334—371); 4. *al-Amālī*, discourses on the Ḳur'ān, on al-Mufaṣṣal etc. (Berlin, N°. 6613; Wien, Flügel, *Die arab.*.... *Hss.*, N°. 388; Paris, Bibl. Nat., N°. 4392, iii.—vi.; Khed. Libr., *Fihr.*, iv. 24); 5. *al-Ḳaṣīda al-muwashshaḥa bi 'l-Asmā' al-mu'annatha*, on the feminine nouns of masculine form, publ. by Haffner

and Cheikho, *Dix anciens traités de philol. arabe*, Beyrouth 1908, p. 157); 6. *Risāla fi 'l-Uḵẖr*, a short treatise on the use of the word *uḵẖr* with the adjectives *awwal* and *āḵẖir* (Berlin, N⁰. 6804); 7. *Muntahā 'l-Su'āl wa 'l-Amal fī 'Ilmai al-Uṣūl wa 'l-Djadal*, a handbook of the sources of Mālikī law (Mss. cf. Brockelmann, *op. cit.*); 8. *Muḵẖtaṣar al-Muntahā*, known as *al-Muḵẖtaṣar al-Uṣūlī*, a synopsis of the preceding work (pr. Būlāḳ 1316—9, with 'Aḍud al-Dīn al-Īdjī's commentary and the glosses of al-Taftazānī and al-Djurdjānī on it and superglosse by al-Ḥasan al-Harawī to al-Djurdjānī's *Ḥāshiye*); 9. *Muḵẖtaṣar fi 'l-Furū'* or *Djāmi' al-Ummahāt* or simply *al-Muḵẖtaṣar al-far'ī*, compendium of Mālikī law, annotated (*Tanḳīḥ*) and afterwards imitated Sīdī Ḵẖalīl (India Office, Loth, *Cat.*, N⁰. 298; Brit. Mus., *Cat. Cod. Or.*, ii. N⁰. 226; Ḵẖod. Libr., Cairo, *Fihr.*, iii. 159; Algiers, Fagnan, *Cat.*, N⁰. 1074—1076).

Bibliography: Ibn Ḵẖallikān, *Wafayāt* (Cairo 1310), i. 314; al-Suyūṭī, *Ḥusn al-Muḥāḍara* (Cairo 1321), i. 125; do., *Bughyat al-Wu'āt* (Cairo 1326), p. 323; Ibn Farḥūn, *al-Dībādj* (Fās 1316), p. 372; Ibn Ḵẖaldūn, *Prolég.* (transl. de Slane), iii. 20 *sq.*; Buhl, *op. cit.*, p. 27—29; Brockelmann, *Gesch. d. arab. BEN CHENEB.)

IBN AL-HAITHAM, whose full name was ABŪ 'ALĪ AL-ḤASAN B. AL-ḤASAN (or AL-ḤUSAIN) B. AL-HAITHAM, in mediaeval European sources usually called ALHAZEN, was one of the most important mathematicians and physicists of the Arabs, learned also in medicine and the other sciences of the ancients notably in the philosophy of Aristotle. He was born about the year 354 (965) in Baṣra, wherefore he is sometimes called Abū 'Alī al-Baṣrī, moved when fairly old to Egypt, where he was for some years in the service of the Fāṭimid al-Ḥākim, to whom he had offered to regulate the course of the Nile, but soon had to give up this undertaking; on al-Ḥākim's death he earned his living by copying mathematical and other books. He died in Cairo towards the end of the year 430 = 1039 or soon after as the authorities note. — Ibn Abī Uṣaibi'a quotes about 200 mathematical, astronomical, physical, philosophical, and medical works and treatises by Ibn al-Haitham, for which we may refer the reader to the sources quoted below, particularly (besides Ibn Abī Uṣaibi'a) F. Woepcke and E. Wiedemann. His chief work on physics is his *Optics*, *Kitāb al-Manāẓir*, published in a Latin translation in 1572 in Basle by F. Risner, together with his treatise on twilight, entitled *Opticae thesaurus Alhazeni Arabis libri septem nunc primum editi. Eiusdem liber de crepusculis et nubium ascensionibus*, etc., a Fred. Risnero. The latter treatise was translated into Latin by Gerhard of Cremona; this is probably true also of the *Optics* but not certain. The *Optics* of Ibn al-Haitham had a great influence in the middle ages on the study of optics in Europe from Roger Bacon to Kepler. There still survives also a large Arabic commentary on the *Optics* by Kamāl al-Dīn Abu 'l-Ḥasan al-Fārisī (died c. 1320); on this and Ibn al-Haitham's *Optics* cf. the works of E. Wiedemann mentioned below.

Of treatises by Ibn al-Haitham some published in Arabic and some accessible only in translations, we have to mention the following in addition to those mentioned in the authorities quoted below: *Über die Beschaffenheit der Schatten (fī Kaifīyat al-Aẓlāl)*, published by E. Wiedemann in an abbreviated form in a German translation in the *Beiträge z. Gesch. d. Naturwissensch.*, xiii. (*Sitzungsber. der phys.-mediz. Sozietät in Erlangen*, Vol. 39 (1907), p. 226 *sqq.*); *Über parabolische Hohlspiegel (fi 'l-Marāyā al-muḥriḳa bi 'l-ḳuṭū')*, publ. in a German transl. by J. L. Heiberg and E. Wiedemann, in the *Biblioth. Mathem.*, 3rd Ser., Vol. x. (1910), p. 201—237; *Über sphärische Hohlspiegel (fi 'l-Marāyā al-muḥriḳa bi 'l-Dawā'ir)*, transl. by E. Wiedemann, *ibid.*, p. 293—307; *Über die Ausmessung des Paraboloides (fī Misāḥat al-Mudjassam al-mukāfī)*, transl. with commentary by H. Suter in the *Biblioth. Mathem.*, 3rd Ser., Vol. xii. (1912), p. 289—332; Extracts from the treatises *fi 'l-Makān (Über den Ort (oder Raum))*, *fī Mas'ala 'adadīya (über ein Zahlenproblem)*, *fī Shakl Banī Mūsā (über einen Satz der Banū Mūsā)*, *fī Uṣūl al-Misāḥa (über die Elemente der Ausmessung)*, published in German translation by E. Wiedemann, in *Beiträge z. Gesch. d. Naturwissensch.*, xvii. (*Sitzungsber. der phys.-mediz. Sozietät in Erlangen*, Vol. xli. (1909), p. 1—25).

Rosenthal*, Leipzig 1906); do., *Zu Ibn al-Haithams Optik* (Reprint from the *Archiv für die Gesch. d. Naturwissensch. u. d. Technik*, Vol. iii., 1910); Woepcke, *L'algèbre d'Omar Alkhayyāmī*, etc., Paris 1851, p. 73—76; Steinschneider, *Notice sur un ouvrage astronomique inédit d'Ibn Haitham* in the *Bollettino di bibliogr. delle scienze mat. e fis.*, xiv. (1881), p. 721 *sqq.*, and xvi. (1883), p. 505 *sqq.*; Brockelmann, *Gesch. d. arab. Litt.*, i. 469; Suter, *Abhandlgn. z. Gesch. d. mathem. Wissensch.*, x. 91—95; xiv. 169—170. (H. SUTER.)

IBN ḤAIYĀN b. ḴẖALAF, ABŪ MARWĀN ḤAIYĀN AL-ḲURṬUBĪ, usually called after his grandfather Ibn Ḥaiyān, one of the earliest and best historians of Muslim Spain. Almost nothing is known of his biography except the year of his birth 377 (987—988) and his death 469 (1076). He was a very prolific writer: the list of his works contains no less than 50 titles, which include poems and theological treatises. His history *al-Matīn* is said to have comprised not less than 60 volumes, but of all his writings only the historical work entitled *al-Muḳtabis fī Ta'rīḵẖ al-Andalus* has survived; there is one volume in Oxford (Cod. Bodl. in Nicoll, ii. n⁰. 137) and a second at Constantine; there are transcriptions of both in Madrid.

Bibliography: The bibliography on Ibn Ḥaiyān is given in Pons Boigues, *Ensayo bio-bibliogr.*, p. 152 *sqq.* Cf. also Brockelmann, *Geschichte etc.*, i. 338.

IBN ḤAMDĪS, ABŪ MUḤAMMED 'ABD AL-DJABBĀR B. ABĪ BAKR, an Arab poet, born about 447 (1055) in Syracuse in Sicily and distinguished at an early age as a poet. When the Normans captured Sicily in 471 (1078), he retired to Spain and spent some time at the court of the 'Abbādid al-Mu'tamid [q. v.] in Seville. He followed the

latter in his imprisonment in 484 (1091) and lived at al-Mahdiya after his death (488 = 1095). He spent the last years of his life at Bougie where he died in 527 (1132); according to other accounts, he died on the island of Majorca. He left a *Dīwān* of which Amari has published specimens. Cf. C. C. Moncada, *Il Dīwān del poeta Abū Muḥammad 'Abd al-Gabbār Ibn Ḥamdīs il siciliano pubblicato*, Palermo 1883, and *Il Canzoniere di Ibn Ḥamdīs*, publ. by C. Schiaparelli, Roma 1897. According to Ḥādjdjī Khalīfa, ii. 196, he also wrote a history of Algeciras.

Bibliography: Amari, *Biblioteca Arabo-Sicula*, s. Index; Pons Boigues, *Ensayo Bio-bibliografico*, p. 186 *sqq.*; Brockelmann, *Geschichte* etc., i. 269 *sq.*

IBN ḤAMDŪN, BAHĀ' AL-DĪN ABU 'L-MA'ĀLĪ MUḤAMMAD B. AL-ḤASAN, an Arab philologist, born in 495 (1101) at Baghdād. He held several offices at the court of the Caliph, so that he received the title *Kāfī 'l-Kufāt*. But his frankness aroused the enmity of the Caliph al-Mustandjid who threw him into prison in 562 (1167). Soon afterwards he died in prison. He was the author of a large anthology of philological and historical matter entitled *al-Tadhkira*. Cf. Amedroz, *Tales of official Life from the "Tadhkira" of Ibn Ḥamdūn*, etc. in *Journ. Roy. As. Soc.*, 1908, p. 409 *sqq.*

Bibliography: Brockelmann, *Geschichte* etc., i. 280 *sq.* (with further references).

IBN ḤAMMĀD, ABŪ 'ABD ALLĀH MUḤAMMAD B. 'ALĪ, an Arab historian, author of a history of the Fāṭimids. Neither the date of his birth nor death is known; we only know that he flourished after the rise of the Almohad dynasty and before Ibn Khaldūn, who quotes a passage from him about the Banū Khazrūn of Tripolis (*Kitāb al-'Ibar*, vii. 43). The text is still unpublished in a manuscript of the Bibl. Nat. of Paris (nº. 1888) and in another of the Bibl. Nat. of Algiers (nº. 1988, imperfect). Two fragments, one on 'Ubaid Allāh and one on Abū Yazīd al-Mukhallad were translated by Cherbonneau (*Journ. Asiat.*, 1862, ii. 470 *sq.*; 1860, i. 190 *sqq.*).

(RENÉ BASSET.)

IBN HĀNI', ABU 'L-ḲĀSIM (also ABU 'L-ḤASAN) MUḤAMMAD B. HĀNI' B. MUḤAMMAD B. SA'DŪN AL-AZDĪ, usually called IBN HĀNI' AL-ANDALUSĪ to distinguish him from Ibn Hāni' al-Ḥakamī [see ABŪ NUWĀS], an Arab poet of Spain. His father Hāni' was a native of a village near al-Mahdiya in Tunisia, who had moved to Elvira in Spain or, according to others, to Cordova. Ibn Hāni' was born in one of these two towns. He studied in Cordova and then proceeded to Elvira and Seville. In the latter city his frivolous way of living and too free speech brought upon him the wrath of the people who accused him of agreeing with the Greek philosophers and of heresy, so that he was finally banished from Seville at the age of 27 by his patron, who was afraid of being suspected of agreeing with him. He then went to Africa to Djawhar, a freedman and general of the Fāṭimid al-Manṣūr. When he received only 200 dīnārs from the latter for a ḳaṣīda addressed to him, he went to al-Masīla (Msila) in Algiers where his compatriots Dja'far b. 'Alī b. Falāḥ b. Abī Marwān and Yaḥyā b. 'Alī b. Ḥamdūn al-Andalusī were ruling. Treated with great respect by them he composed some notable poems in their honour. The Fāṭimid Caliph al-Mu'izz Abū Tamīm Ma'add b. Ismā'īl, son of al-Manṣūr, summoned the poet to him and attached him to his court, overwhelming him with tokens of esteem. When al-Mu'izz went to Egypt in 361 (972) to take up his residence in Cairo, Ibn Hāni' left him and returned to the Maghrib to bring back his family, but was murdered in Barḳa in Cyrenaica on his road on Wednesday 24 Radjab 362 = 30th April 973 at the age of 36. Accounts of his murder differ. When al-Mu'izz in Egypt heard of the poet's death, he lamented: "He was a man whom we hoped to rival the poets of the East, but this was not granted to us".

In spite of the gross exaggerations in some of his panegyrics, which made him suspected of infidelity among the orthodox, Ibn Hāni' enjoyed as great esteem among the Arabs of the West as his contemporary al-Mutanabbī did in the East. Abu 'l-'Alā' al-Ma'arrī, who esteemed the latter highly used to say of Ibn Hāni': "he is like a mill, grinding corn, so little sense is there in his verse".

His *Dīwān*, arranged in alphabetical order, was published at Būlāḳ in 1274 and at Beyrouth in 1886, 1326. It contains panegyrics of al-Mu'izz, Dja'far b. Ghalbūn, Abu 'l-Faradj Muḥammad b. 'Omar al-Shaibānī, Dja'far b. 'Alī b. Ghalbūn, Ṭāhir and Ḥusain b. al-Manṣūr, Yaḥyā b. 'Alī, Ibrāhīm b. Djawhar b. Kāfūr, satires against al-Wahrānī, two elegies, one on the mother of Dja'far and Yaḥyā b. Yaḥyā b. 'Alī, the other on the son of Ibrāhīm b. Dja'far b. Alī and several impromptu pieces.

(MOH. BEN CHENEB.)

IBN ḤAWḲAL, ABU 'L-ḲĀSIM (MUḤAMMAD), an important Arab traveller and geographer. Very little is known of his life. He tells of himself that he left Baghdād in Ramaḍān 331 (May 943) with the intention of becoming acquainted with other lands and peoples, and making money by commerce. He travelled through the whole Muslim world from east to west, at the same time studying eagerly the works of his predecessors al-Djaihānī, Ibn Khordādhbih and Ḳudāma. According to Dozy, he was a spy in the service of the Fāṭimids. On his travels he met al-Iṣṭakhrī [q. v.] probably about 340. At the latter's request he made improvements in some of this geographer's maps and revised his work. He afterwards however decided upon rewriting it and completed the new version under his own name with the title *al-Masālik wa 'l-Mamālik* not be-

fore 367 (977); it was published by de Goeje in Vol. ii. of the *Bibl. Geogr. Arab.* On earlier editions of separate portions and part translations see the *Praefationes* to *op. cit.* and vol. i.

Bibliography: P. J. Uylenbroek, *De Ibn Haukalo Geographo*, etc., Lugd. Bat. 1822, p. 5—17; De Goeje, *Die Iṣṭakhrī-Balkhī Frage* in *Zeitschr. d. Dtsch. Morg. Gesellsch.*, xxv (1871), 42 *sqq.*; do. *Bibl. Geogr. Arab.*, iv. *Praef.*, p. iv. *sq.*; Dozy, *Hist. des Musulmans d'Espagne*, iii 17, 181. (C. VAN ARENDONK.)

IBN ḤAZM, whose full name was ABŪ MUḤAMMAD ʿALĪ B. AḤMED B. SAʿĪD B. Ḥ., a versatile Spanish Arab scholar, a notable theologian, historian and distinguished poet, born on the last day of Ramaḍān 384 (7th Nov. 994) at Cordova. His family belonged to the village of Manta Lishām (var. M-t-Ḥlīdjām, according to the *Irshād al-Arīb*, v. 88 *infra*, ½ *farsakh* from Huelva at the mouth of the Odiel) in the district of Niebla; his great-grandfather had been a convert from Christianity to Islām. His father, who had risen to the rank of a vizier of the major-domo al-Manṣūr and his son al-Muẓaffar, assumed a genealogy which led back to a Persian client of Yazīd b. Abī Sufyān. As the son of a high official Ibn Ḥazm naturally received a good education; the atmosphere of the court in which he spent his youth did not prevent his active mind striving to develop in all directions. As his teacher in various branches of knowledge he mentions (*Ṭawḳ*, p. 110, 3, 118, 13 *sq.*) ʿAbd al-Raḥmān b. Abī Yazīd al-Azdī (left Spain during the civil war, see Ibn Bashkuwāl, Nº. 753). Before 400 he studied under Aḥmad Ibn al-Djasūr (died 401, Ibn Bashkuwāl, Nº. 37, cf. *Ṭawḳ*, p. 136, 10; 144, 3) and in the midst of the political turmoils we find him a student of Ḥadīth in Cordova (*Ṭawḳ*, p. 127, 4 *sq.*).

The revolution which overthrew the ʿĀmirids (cf. Dozy, *Hist. des Musulmans d'Espagne*, iii. 271 *sqq.*) considerably affected the position of father and son. Especially after Hishām II was replaced on the throne (Dhu 'l-Ḥidjdja 400 = July 1010), both had to suffer many mortifications. Ibn Ḥazm's father died towards the end of Dhu 'l-Ḳaʿda 402. In Muḥarram 404 he left Cordova, which had been sorely tried by the civil war; the beautiful palace of his family at Balāṭ Mughīth had been destroyed by the Berbers (*Ṭawḳ*, p. 104, cf. 87 *infra sq.*). He next chose Almeria for his home; there he seems to have been able to live in comparative quiet till ʿAlī b. Ḥammūd in alliance with Khairān, ruler of Almeria, overthrew the Umaiyad Sulaimān (Muḥarram 407). Khairān induced to suspect him of intriguing in favour of the Umaiyads, imprisoned him for some months with his friend Muḥammad b. Isḥāḳ and then banished them. The two friends went to Ḥiṣn al-Ḳaṣr, whose ruler received them kindly. On learning that ʿAbd al-Raḥmān IV al-Murtaḍā had been appointed Caliph in Valencia, they left their host after a few months and travelled by sea to this town, where Ibn Ḥazm met other friends (*Ṭawḳ*, p. 110 *sq.*). In the army of al-Murtaḍā, whose vizier he was, he fought before Granada; he was captured by the enemy but was released after a while (*Cat. Cod. Arab.*, i. 273). After an absence of six years he returned in Shawwāl 409 to Cordova, where al-Ḳāsim b. Ḥammūd was now Caliph (*Ṭawḳ*, p. 104, 10, cf. 112, 1). After the latter's expulsion, the intellectual ʿAbd al-Raḥmān V al-Mustaẓhir was chosen Caliph (Ramaḍān 414 = Dec. 1023); the latter chose his friend Ibn Ḥazm as vizier. They only enjoyed the new state of affairs for a brief period, for ʿAbd al-Raḥmān was murdered seven weeks later (Dhu 'l-Ḳaʿda 414 = Jan. 1024) and Ibn Ḥazm found himself once more within prison walls. How long he was confined cannot be definitely ascertained; it is certain however that he was living in Jātiva about 418 (1027). According to al-Ḥumaidī (in Yāḳūt), he filled the office of vizier again under Hishām al-Muʿtadd. Only scanty notices of his later life are available. But he kept clear of politics in order to devote himself entirely to sciences, authorship, and the propagation and defence of his doctrines.

One of his earliest works is that which was made known by Dozy (*Ṭawḳ al-Ḥamāma fi 'l-Ulfa wa 'l-Ullāf*, ed. by D. K. Pétrof, Leiden 1914, cf. the review by Goldziher in *Zeitschr. d. Deutsch. Morg. Gesellsch.*, lxix. 192 *sqq.*), which he wrote in Jātiva (p. 4, 2) about 418 (*Ṭawḳ*, p. 79 *sq.*), before the death of Khairān in 419; an attack of Abu 'l-Djaish [so to be read] Mudjāhid on Khairān would suggest after their estrangement in Rabīʿ II 417, cf. Ibn al-Athīr, ed. Tornberg, ix. 195; a second *terminus ad quem* is given *Ṭawḳ*, p. 42, 7: Ḥakam b. Mundhir died about 420 according to Ibn Bashkuwāl nº. 332). In this treatise on love and its different phases in which he illustrates his views on psychology by short stories from his own experiences and those of his contemporaries and by his own poems, Ibn Ḥazm shows himself a keen observer, a brilliant stylist and charming poet. He affords us not only a glimpse into his own character, but also throws an interesting light on a little known side of the life of his time. — Probably about the same time he wrote the treatise called *Risāla fī Faḍl al-Andalus*, dedicated to his friend Abū Bakr Muḥammad b. Isḥāḳ (according to al-Ḍabbī, nº. 59), which is given in al-Maḳḳarī, ed. Dozy etc., ii. 109, 15—121 (ed. Būlāḳ, ii. 767, 3 *sqq.*). This *Risāla*, composed at the instigation of the lord of Ḳalʿat al-Bunt (al-Maḳḳarī, ii. 110, cf. Ibn al-Abbār, *al-Takmila*, nº. 432), gives an interesting survey of the most important early literature of the Spanish Muslims. — Of his historical works there still survive *Nuḳaṭ al-ʿArūs fī Tawārīkh al-Khulafā* (ed. with Spanish translation by C. F. Seybold in *Revista del Centro de Estudios históricos de Granada y su Reino*, i. 160 *sqq.*, 237 *sqq.*, Granada 1911) and the *Djamharat al-Ansāb* (*Ansāb al-ʿArab*) written about 450 (cf. Codera, *Misión histórica en la Argelia y Túnez*, Madrid 1892, p. 24 *sqq.*, 83) (Ms. Tunis, Masdjid al-Zaitūn, nº. 5014, and copy of this Ms. in Madrid, Real Acad. de la Hist., Codera, *o. c.*, p. 165; Paris, Bibl. Nat., Blochet, *Cat. de la Coll. . . . Schefer*, nº. 5829, containing the biography of Muḥammad, Berlin, *Verz.*, nº. 9310), a work highly esteemed and often quoted by Ibn Khaldūn (*ʿIbar*, ed. 1284, VI, 8, 80 *sq.*, 97, etc.), on the genealogy of the Arab and Berber families in Maghrib and Spain, which Codera used as a source for his articles on the Ḥammūdids, Tudjībids (these two articles also in his *Estudios críticos de Historia árabe española*, Zaragoza 1903, p. 301 *sqq.*), Umaiyads in *op. cit.*, p. 29 *sqq.*, 41 *sqq.*, cf. 147 *sqq.*, 75 *sqq.*, et passim.

But it was particularly as a traditionist and

theologians that Ibn Ḥazm displayed great literary activity. At first an ardent follower of the Shāfiʿī school he afterwards went over to the Ẓāhirī [cf. ẒĀHIRĪS] of which he became a devoted advocate. This change had apparently been completed by the time he wrote the above mentioned *Risāla* (cf. al-Maḳḳarī, ii. 120, 3 *sqq.*). Possibly the instruction of his teacher Abu 'l-Khiyār (so to be read *Ṭawḳ*, p. 98, 10) i. e. Masʿūd b. Sulaimān b. Muflit, who was a Ẓāhirī (Ibn Bashkuwāl, nº. 1238, al-Ḍabbī, nº. 1361), was not without influence upon him. [For Ẓāhirī contemporaries cf. Ibn Bashkuwāl, nº. 1105, 1196]. He defended with vigour his position that the details of legal deduction not resting on tradition and revelation must be rejected in the treatise *Ibṭāl al-Ḳiyās wa 'l-Raʾy wa 'l-Istiḥsān wa 'l-Taḳlīd wa 'l-Taʿlīl* (Ms. Gotha, Pertsch, *Verz.*, nº. 640), which Goldziher (*Die Ẓâhiriten*, Leipzig 1884) first thoroughly studied. From the title Ibn Ḥazm evidently discussed similar subjects (cf. *Faṣl*, iii. 76) in the *Kit. al-Iḥkām fī (li-) Uṣūl al-Aḥkām* (Ms. Khed. Libr., *Fihr.* [ed. 1305], ii. 236). A small work by him on *Masāʾil Uṣūl al-Fiḳh* was printed, according to the *Fihris Maktabat al-Manār* (1332), with notes by Ibn al-Amīr al-Ṣaghānī and al-Ḳāsimī in Egypt. He published a Ẓāhirī system of *Fiḳh* in his *Kit. al-Muḥallā bi 'l-Āthār fī Sharḥ al-Mudjallā bi 'l-Ikhtiṣār* (*Ikhtiyār*), which is presumably contained in its entirety in the many volumes of this work in the Khed. Libr. (*Fihr.*, iii. 297 *sq.*); incomplete in Leiden, Landberg, *Cat.*, nº. 646, and Constantinople Aya Ṣofya, nº. 1259, 1260. Similar in content was his *Īṣāl ilā Fahm al-Khiṣāl* (*Faṣl*, i. 114, 7 *sqq.*) which exists in a *Mukhtaṣar* of his son Abū Rāfiʿ in the Khed. Libr. (*Fihr.*, iii. 297, 23 *sq.*)

Ibn Ḥazm was original in his application of Ẓāhirī principles to dogmatics. Here also only the primary meaning of the written word and established tradition was to be decisive. From this point of view he sharply criticised religious groups in Islām in his most celebrated work, the *Kit. al-Faṣl fi 'l-Milal wa 'l-Ahwāʾ wa 'l-Niḥal* (pr. Cairo 1317—21) and particularly attacked the Ashʿarīs [see AL-ASHʿARĪ], notably their views on the divine attributes. As regards anthropomorphic expressions in the Ḳurʾān, however, Ibn Ḥazm found himself forced to bring these into conformity with a spiritual interpretation. An appreciation of Ibn Ḥazm's views on dogmatics and philosophy in their mutual relations has still to be made. Goldziher has touched on the main points; cf. also the excerpts in Horten (see below). On the influence of Ibn Ḥazm's principles on the domain of ethics see Goldziher, *o. c.*, p. 162 *sq.* and on I. Ḥ. as champion of the monotheistic reaction against the cult of saints, Ṣūfī doctrines, and astrology, see Schreiner, *Beitr.* In the work just named, which was first more fully made known by Goldziher, Ibn Ḥazm also criticises non-Islāmic creeds, such as those of the Jews and Christians, and endeavours to find contradictions and incompatibilities in their writings to justify the accusation of falsification of texts. (Cf. Goldziher, *Jeschurun*, *Zeitschr. für die Wiss. des Judenthums*, viii., 1872, p. 76 *sqq.*, and *Zeitschr. d. Deutsch. Morg. Gesellsch.*, xxxii. 1878, p. 363 *sqq.*; Schreiner, *ibid.*, xlii. 612 *sqq.*). As I. Friedlaender, following Goldziher, has shown in more detail [*Zur Komposition von Ibn Ḥazm's Milal wa 'n-Niḥal* in *Orient. Stud. Th. Nöldeke gewidmet*, i. 267 *sqq.*), the logical arrangement of this work (the author repeatedly styles it *Dīwān*, e. g. i. 107, 11; iv. 178, 10, v. 79, 18) is to some extent destroyed by the incorporation in it of works originally separate. The mss. of this work, the references in which are to very different dates, show, according to Friedlaender, two recensions. The incorporated parts are: *a*) i. 116—ii. 91 of the published text, apparently identical with *Kit. Iẓhār Tabdīl al-Yahūd wa 'l-Naṣārā li 'l-Tawrāt wa 'l-Indjīl wa Bayān Tanāḳuḍ mā bi-Aidīhim min dhālika mimmā lā yaḥtamilu 'l-Taʾwīl*; *b*) iv. 178—227, containing the treatise *al-Naṣāʾiḥ al-mundjiya min al-Faḍāʾiḥ al-mukhziya wa 'l-Ḳabāʾiḥ al-murdiya min Aḳwāl Ahl al-Bidaʿ wa 'l-Firaḳ al-arbaʿ al-Muʿtazila wa 'l-Murdjiʾa wa 'l-Khawāridj wa 'l-Shīʿa*; from it Friedlaender has translated the chapter on the Shīʿa (iv. 178—188) with a general survey of heterodox views (ii. 111—117) and two passages regarding Shīʿite doctrines, making use of manuscript material and adding illuminating notes (*The Heterodoxies of the Shiites*, New Haven 1909, from *Journ. of the Amer. Orient. Soc.*, xxviii. and xxix.; *ibid.* on Mss. [cf. also *Zeitschr. d. Deutsch. d. Morgenl. Gesellsch.*, lxvi. 166] and recensions); *c*) perhaps also iv. 87—178, a work on *al-Imāma wa 'l-Mufāḍala*, with the title of which Fr. compares *Kit. al-Imāma wa 'l-Siyāsa fī Ḳisam Siyar al-Khulafāʾ wa-Marātibihā wa 'l-Wādjib minhā* (so Ibn Ḥaiyān in Yāḳūt); Ibn Ḥazm's treatise *Fi 'l-Mufāḍala baina 'l-Ṣaḥāba* may be identical with this, Ms. Damascus, Ḥabīb al-Zaiyāt, *Khazāʾin al-Kutub fī Dimashḳ* etc., p. 82, 4. — A fragment of his *al-Nubdha al-kāfiya fī Uṣūl Aḥkām al-Dīn* is contained in Ms. Berl., Nº. 5376.

In the domain of logic Ibn Ḥazm wrote a *Kitāb al-Taḳrīb fī Ḥudūd al-Manṭiḳ*, which has not survived; something would be known of its contents if the statements in *Faṣl*, i. 4, 10, iii. 99, v. 20, 1, v. 70 *infra*, refer to the same work under a slightly different title. It might be presumed that the same work is meant by a treatise on *ʿIlm al-Kalām*, the only one (and first?) of his own which he mentions in his *Risāla* on literary history, but out of modesty he does not give the title. His work on this science in which his teacher (Ibn Khallikān, al-Dhahabī) was Muḥammad b. al-Ḥasan al-Madhḥidjī (Ibn al-Abbār, *al-Takmila*, Nº. 411), whom he praises as a philosophic author, found but little approval and he was held to be at fault because he contradicted Aristotle, whom on the whole he held in high esteem however (*Die Ẓâhiriten*, p. 157), and departed entirely from the usual treatment of the subject. In this connection it should be noted that he laid great emphasis on the perception of the senses.

Ibn Ḥazm devoted to Ḳurʾānic studies and tradition his *Kit. al-Nāsikh wa 'l-Mansūkh* (pr. Cairo, on the margin of editions of the *Tafsīr al-Djalālain*, 1297, 1308) and other works which have probably not survived. — Among his polemical writings there is still to be mentioned a satirical ḳaṣīda (cf. Abū Bakr b. Khair, *Fihr.*, ed. Codera and Ribera, i. 409 *sq.*) preserved in al-Subkī, *Ṭabaḳāt al-Shāfiʿiya*, ii. 184—9, the reply to a poetical attack on the part of the Byzantine Emperor Nikephoros II Phokas (cf. al-Subkī, *o. c.*, ii. 178 *sqq.* and Flügel, *Die Arab. ... Hss. ... der Hofbibl. zu Wien*, i. 449 *sqq.*) — The fruit of his mature years and of much bitter experience was his ethical

tractate *Kit. al-Akhlāḳ wa 'l-Siyar fī Mudāwāt al-Nufūs* (pr. Cairo n. d.), an exhortation to pious life, which holds up Muḥammad's example as the moral ideal (cf. Goldziher, *Vorlesungen*, p. 30). This tractate has been discussed and translated into Spanish by Miguel Asín (*Los Caracteres y la conducta. Tratado de moral práctica por Abenhazam de Córdoba*, Madrid 1916).

A controversialist by nature, as he was (cf. *Ṭawḳ*, p. 43, 6), Ibn Ḥazm challenged Jews, Christians, and Muslims of different schools. He was a doughty opponent: "whoever resisted him bounced off him as from a stone" (Ibn Ḥaiyān). He overwhelmed with scorn and contempt men whom the majority of Muslims held in the highest reverence such as al-Ashʿarī, Abū Ḥanīfa, Mālik. According to a proverbial saying, Ibn Ḥazm's pen was like al-Ḥadjdjādj's sword in sharpness. Yet he always endeavoured to do his opponents justice; it was against his nature to make intentionally baseless charges against them. In his ethical treatise he ascribes his vehemence to the influence of an illness. He only succeeded to a modest extent in gaining a hearing for his views. For a time he found a supporter in Aḥmad b. Rashīḳ (al-Ḍabbī, Nº. 400), Mudjāhid's wālī in Majorca, who was interested alike in theology and literature; Ibn Ḥazm found protection with him when Cordovan and other theologians decried him as an opponent of the Mālikī school (Dozy, *Notices*, p. 100 *sq.*). Under this patronage he succeeded in winning adherents on the island in the 430's A. H. (cf. Ibn al-Abbār, *al-Takmila*, Nº. 1467, Nº. 2027; Ibn Bashkuwāl, Nº. 903). He disputed before Ibn Rashīḳ (died soon after 440) with the celebrated theologian Abu 'l-Walīd Sulaimān al-Bādjī, who had returned from the East about 440. This same opponent summoned by a Majorcan faḳīh afterwards forced Ibn Ḥazm to leave the island (Ibn al-Abbār, *l. c.*, Nº. 445; cf. Codera, *Estudios críticos* etc., p. 264—9).

His charge of heresy against the great orthodox authorities brought upon him the wrath of the theologians, some of whom probably also envied him his learning. They warned their hearers against the errors of his doctrine and made him suspected by the princes, who soon no longer tolerated him in their lands. His strong sympathy (*ʿaṣabīya*, Ibn Ḥaiyān) for the Umaiyads was a further reason why he appeared dangerous. This constant baiting forced him to retire to his family estate in Manta Līshām. His writings were publicly burned in Seville; their author pilloried the foolishness of this proceeding in sarcastic epigrams. In his retirement he continued to study and write. According to a statement by his son Abū Rāfiʿ the number of his writings was 400 in 80,000 folios, but the "majority did not cross the threshold of his district" (Ibn Ḥaiyān). A small circle of pupils who dared to brave the anathema of the theologians sought instruction from him here. Among them was the historian al-Ḥumaidī. Ibn Ḥazm died in his village on the 28th Shaʿbān 456 (15th August 1064). The Almohad al-Manṣūr is said to have remarked on one occasion at his tomb: "All scholars have to apply to Ibn Ḥazm when in difficulty" (al-Maḳḳarī, ii. 160, 11).

Of his sons there are mentioned Abū Rāfiʿ al-Faḍl (died 479) as a learned author (Ibn Bashkuwāl, Nº. 994), Abū Usāma Yaʿḳūb (*ib.*, Nº. 1407) and Abū Sulaimān al-Muṣʿab (Ibn al-Abbār, *al-Takmila*, Nº. 1097) as transmitters of their father's learning.

Ibn Ḥazm's teachings were particularly attacked in writings after his death. When the ḳāḍī Ibn al-ʿArabī [q. v.] returned from the east towards the turn of the fifth century (al-Dhahabī, *Tadhk.*, ii. 90 *sqq.*), he found the heresy widespread in the Maghrib. To combat it he wrote *Kit. al-Ḳawāṣim wa 'l-ʿAwāṣim*, which al-Dhahabī, *Tadhk.*, iii. 323 *sqq.*, quotes, and other treatises. About the same time Muḥammad b. Haidara (al-Dhahabī, *l. c.*, iv. 52) and ʿAbd Allāh b. Ṭalḥa (Ibn al-Abbār, *l. c.*, Nº. 1330, al-Maḳḳarī, i. 905, 4) came to his assistance. About a century later, the Mālikī theologians ʿAbd al-Ḥaḳḳ b. ʿAbd Allāh (Ibn al-Abbār, *l. c.*, Nº. 1812) and Ibn Zarḳūn (*ib.*, Nº. 967) came forward to refute I. Ḥ., the latter with a *Kit. al-Muʿallā* directed against the *Kit. al-Muḥallā*. On the other hand, a pupil of Ibn Zarḳūn, Ibn al-Rūmiya, the botanist, came forward as a fanatical adherent of Ibn Ḥazm and the celebrated mystic Ibn ʿArabī [q. v.] transmitted his works and wrote a synopsis of the *Kitāb al-Muḥallā*, likewise entitled *al-Muʿallā*.

Bibliography: in addition to the works already mentioned: Yāḳūt, *Irshād al-Arīb* (Gibb Mem., vi. 5), v. 86 *sqq.*; Ibn Khallikān, ed. Wüstenfeld, Nº. 459; Ibn al-Ḳifṭī, *Taʾrīkh al-Ḥukamāʾ*, ed. Lippert, p. 232 *sq.*; Ibn Bashkuwāl, *al-Ṣila*, Nº. 888 and Nº. 40; al-Ḍabbī, *Bughyat al-Multamis*, Nº. 1204 and 412; ʿAbd al-Wāḥid al-Marrākushī, *al-Muʿdjib* (ed. (C. VAN ARENDONK.)

IBN ḤIBBĀN, MUḤAMMAD B. AḤMAD AL-BUSTĪ, Arab author and authority on Tradition, born at Bust in Sidjistān, after extended travels in pursuit of knowledge, filled a judicial office in Samarḳand, but was driven from it as a heretic, because he had defined the prophethood as a combination of ʿIlm and ʿAmal (cf. Goldziher on *Muʿammar al-Nafs*, p. 57). After staying in Nasā and in 334 = 945 in Nīshābūr, he settled in Samarḳand as a teacher of Tradition and died there at the age of 80 on the 22nd Shawwāl 354 = 21st October 965. His chief work is the collection of Tradition famous for its artificial arrangement entitled *Kitāb al-Taḳāsīm wa 'l-Anwāʿ*, see *Kashf al-Kurūb al-mukhfāt ʿan ...*

nīya, i. 250 (*Dībādja* in Berlin, Ahlwardt, *Verz.*, Nº. 1268), revised by ʿAlī b. Balabān al-Fārisī (died 739 = 1338, according to al-Suyūṭī, *Bughyat al-Wuʿāt*, p. 331), with glosses by Ibn Ḥadjar in the Brit. Mus., see *Cat. Cod. Ar.*, Nº. 1570 (cf. Goldziher, *Muh. Stud.*, ii. 269, Note 5). Traditionists are the subject of his two works, *Kitāb al-Thiḳāt*, rearranged by Ibn Ḥadjar al-Haitamī, Ms. in Cairo, see *Fihrist*, i. 230-231, and *Mashāhīr ʿUlamāʾ al-Amṣār*, Ms. in Leipzig, see Vollers, *Die Islam.* . . . *Hdss.*, Nº. 688. Finally he wrote an adab-book of an edifying character entitled *Rawḍat al-ʿUḳalāʾ wa-Nuzhat al-Fuḍalāʾ* (Ms. in Hamburg, see Brockelmann, *Verz.*, Nº. 96), pr. Cairo 1328; in it he quotes 11 other works.

Bibliography: al-Subkī, *Ṭabaḳāt al-Shāfiʿīya al-kubrā*, ii. 141; Wüstenfeld, *Geschichtschreiber der Araber*, Nº. 130; do., *Schafiʿiten*, Nº. 152. (C. Brockelmann.)

IBN ḤIDJDJA, Abu ʾl-Maḥāsin Taḳī al-Dīn Abū Bakr b. ʿAlī b. ʿAbd Allāh al-Ḥamawī al-Ḳādirī al-Ḥanafī al-Azrārī (the button-maker, so called after the trade he had followed in his youth), an Arab author, one of the most celebrated poets and stylists of the Mamlūk period, born 767 (1366) in Ḥamāt. While returning to Cairo in 791 (1390) after travelling for study, he witnessed the great conflagration in Damascus at the siege by al-Ẓāhir Barḳūḳ and was moved by it to his first rhetorical effort, an epistle to Ibn Makānis (see Ahlwardt, *Verzeichnis der arab. Hdss. zu Berlin*, Nº. 8784). He reached the zenith of his creative ability in his office as Munshī in the Dīwān of Cairo which he owed to his patron al-Bārizī, the private secretary to the Sulṭān al-Muʾaiyad Shaikh (815—824 = 1412—1421). After the latter's death in 830 (1427) he returned to his native town and died there on the 15th Shaʿbān 837 = 28th March 1434. Of his poems, which he collected under the title *al-Thamarāt al-shahīya fi ʾl-Fawākih al-Ḥamawīya wa ʾl-Zawāʾid al-Miṣrīya*, the best known is his *Badīʿīya* entitled *Khizānat al-Adab wa-Ghāyat al-Arab*; on it he wrote in 826 (1423) the commentary *Taḳdīm Abī Bakr* (cf. Mehren, *Rhet.*, p. 12), pr. Calcutta 1230 (as an appendix to the *Dīwān* of al-Mutanabbī), Būlāḳ 1273, 1291, Cairo 1301. His collection of letters and firmans from the Mamlūk chancery, *Ḳahwat al-Inshāʾ*, which exists in numerous manuscripts, will probably be found useful for historical purposes. His anthology, *Thamarāt* (*Thamrāt*) *al-Awrāḳ*, with *Dhail*, pr. Būlāḳ on the margin of the *Muḥāḍarāt al-Udabāʾ* of al-Rāghib al-Iṣfahānī, Cairo 1300, and with a second appendix by Ibrāhīm b. al-Aḥdab on the margin of al-Ibshīhī's *al-Mustaṭraf*, Cairo, 1320-1321, was also highly esteemed. Finally he published new editions and synopses of older works, such as *al-Ṣādiḥ wa ʾl-Bāghim* of Ibn al-Habbārīya; al-Shirwānī gives a synopsis of this version in *Nafḥat al-Yaman* (Cairo 1326), p. 150—161.

Bibliography: al-Noʿmānī, *al-Rawḍ al-bāsim* (cod. Wetzst. ii. 289), fol. 80r; *Muntakhab min Taʾrīkh Ḳuṭb al-Dīn al-Nahrawālī* (cod. Leid. Ar. 2010), fol. 85r; Brockelmann, *Geschichte der arab. Litteratur*, ii. 15 *sqq.* (C. Brockelmann.)

IBN HISHĀM, ʿAbd al-Malik b. Hishām b. Aiyūb al-Ḥimyarī al-Baṣrī, an Arab grammarian, born in Baṣra, died in Fusṭāṭ in Egypt on the 13th Rabīʿ II 218 = 8th May 834, according to others in 213 a. h., wrote, besides his version of Ibn Isḥāḳ's [q. v.] biography of the Prophet, a collection of biblical and South Arabian legends, entitled, *Kitāb al-Tīdjān*, s. Ahlwardt, *Verzeichnis der arab. Hdss. zu Berlin*, Nº. 9735; Rieu, *Supplement to the Catalogue of Arab. Mss. in the Brit. Mus.*, Nº. 578-579; Tunis, Nº. 4953a; Stambul, ʿĀṣim, Nº. 691; al-Zaiyāt, *Khazāʾin al-Kutub fī Dimashḳ*, p. 72, Nº. 12; *Manuscrits de la collection Landberg*, Nº. 717.

Bibliography: Ibn Khallikān, ed. Wüstenfeld, Nº. 390 (ed. Cairo 1299, i. 365); al-Suyūṭī, *Bughyat al-Wuʿāt*, p. 315; Wüstenfeld, *Geschichtschreiber der Araber*, Nº. 48; M. Lidzbarski, *De propheticis quae dicuntur legendis arabicis*, Lipsiae 1893, p. 5 *sqq.*; do. in *Zeitschr. f. Assyriologie*, viii. 271 *sqq.* (C. Brockelmann.)

IBN HISHĀM, Djamāl al-Dīn Abū Muḥammad ʿAbd Allāh b. Yūsuf b. Aḥmad b. ʿAbd Allāh b. Hishām al-Anṣārī al-Miṣrī, was born in Dhu ʾl-Ḳaʿda 708 = April-May 1309 in Cairo, where he died in the night of Thursday-Friday, 5th Dhu ʾl-Ḳaʿda 761 = 17-18 September 1360. A pupil of the Spanish grammarian Abū Ḥaiyān for the study of the *Dīwān* of Zuhair b. Abī Sulmā, he also studied with Shihāb al-Dīn ʿAbd al-Laṭīf b. al-Muraḥḥal, al-Fākihānī, etc.

As a Shāfiʿī doctor, he became professor of Ḳurʾānic exegesis at the Ḳubbat al-Manṣūrīya in Cairo; but five years before his death he went over to the Ḥanbalī school to obtain the post of professor at the Ḥanbalī madrasa in Cairo and for this purpose learned by heart the *Mukhtaṣar* of al-Khiraḳī in less than four months.

Ibn Khaldūn sums him up in these words: "Ibn Hishām was profoundly learned in grammar and possessed perfect knowledge of it. He followed in the path of those of the grammarians of Mōṣul who accepted Ibn Djinnī's views and followed this scholar's method of teaching. The knowledge displayed by Ibn Hishām is truly remarkable and shows that he had a perfect mastery of his subject and that he was very clever".

Ibn Hishām has left the following works:

1º. *Ḳaṭr al-Nadā wa-Ball al-Ṣadā*, a short treatise on syntax, several times published; 2º. Commentary on the preceding, publ. at Tunis in 1281, Būlāḳ 1253, 1282, Cairo 1274, transl. into French by Goguyer, *La pluie de rosée, étanchement de la soif*, Leyden 1887; 3º. *Shudhūr al-Dhahab fī Maʿrifat Kalām al-ʿArab*, a short treatise on grammar, less extensive than the preceding; 4º. Commentary on the preceding, publ. at Būlāḳ in 1282, Cairo 1253, 1305; 5º. *al-Iʿrāb ʿan Ḳawāʿid al-Iʿrāb*, a succinct treatise on logical analysis, publ. Būlāḳ 1253, at Constantinople in 1298, publ. and transl. into French by de Sacy in his *Anthologie grammaticale*, Paris 1829, pp. 73—92 et 155—223 of the transl.; 6º. *Mughnī ʾl-Labīb ʿan Kutub al-Aʿārīb* (the author had written another at Mecca in 749 = 1348 which was lost on his return to Egypt and on his second sojourn in Mecca in 756 = 1355 he wrote this one), a complete treatise on syntax divided into two parts or eight chapters containing a detailed exposition of the particles and the rules for the construction of sentences publ. Teherān 1274, Cairo 1305, 1307; 7º. *Mūḳid al-Adhhān wa-Mūḳiẓ al-Wasnān*, the solution of several difficult points in grammar, Paris Bibl. Nat., Nº. 4115, ii.; 4162, i.; Berlin, *Verz.*,

Nº. 6748-6749; Khed. Libr., *Fihr.*, vii. 69, 104, 172, 598; 8º. *Alghāz*, a collection of grammatical puzzles prepared for the library of Sulṭān al-Malik al-Kāmil, publ. at Cairo in 1304; 9º. *al-Kawākib al-durriya fī Sharḥ Shawāhid 'Ulūm al-'arabiya*, a commentary of "vers témoins" quoted by Ibn Djinnī in his *Kit. al-Luma'*, Berlin, Nº. 7652; 10º. *al-Djāmi' al-ṣaghīr fi 'l-Naḥw*, a treatise on grammar, Paris, Bibl. Nat., Nº. 4159; 11º. *Risāla fī 'isti'māl lughat^an wa-faḍl^an wa-ilā 'l-khilāf^in wa-aiḍ^an wa 'l-Kalām 'alā halumma djarr^an*, a grammatical study of the words *lughat^an* etc., Berlin, *Verz.*, Nº. 6886, Leiden, *Cat.*, I², Nº. 221, under the title *Masā'il fi 'l-Naḥw wa-Adjwibatuhā*; Khed. Libr., *Fihr.*, iv. 33, 59, vii. 564; publ. in al-Suyūṭī, *Kit. al-Ashbāh wa 'l-Naẓā'ir*, Ḥaidarābād 1317, iii. 203-222; 12º. a short study on the use of the accusative in 9 passages of the Ḳur'ān, Berlin, Nº. 6884; probably = Derenbourg, *Mss. arab. de l'Esc.*, Nº. 86, 6; 13º. *Mawḳiṭat 'l-'urūḍ al-Sharṭ 'alā 'l-Sharṭ*, Leiden, *Cat.*, I², Nº. 217, 218; pr. in al-Suyūṭī, *op. cit.*, iv. 34—42; 14º. *Fawḥ al-Shadhā fī Mas'alat kadhā*, a supplement to the treatise on the same question, *Kitāb al-Shadhā fī Aḥkām kadhā*, by his teacher Abū Ḥaiyān, publ. in al-Suyūṭī, *op. cit.*, iv. 120—131; 15º. *Sharḥ al-Ḳaṣīda al-lughziya fi 'l-Masā'il al-naḥwiya*, commentary on a poem containing grammat. puzzles, Leiden, Nº. 222, pr. in al-Suyūṭī, *op. cit.* ii. 302—323; 16º. *Awḍaḥ al-Masālik ilā Alfiyat Ibn Mālik*, wrongly known as *al-Tawḍīḥ*, a version in prose corrected and augmented of the *Alfiya* of Ibn Mālik, publ. at Cairo in 1304, 1316, at Calcutta in 1832; 19º. *Sharḥ Bānat Su'ād*, comment. on Ka'b b. Zuhair's poem in honour of the Prophet, edit. by Guidi, Leipzig 1871; at Cairo 1304, 1307; 20º. *Shudhūr al-Malaḥ wa-Mawārid al-Minaḥ*, a treatise on the salvation of the soul, Berlin, Nº. 2097; 21º. *Mukhtaṣar al-Intiṣāf min al-Kashshāf*, an abridgment of *al-Intiṣāf min al-Kashshāf* which Ibn al-Munaiyir wrote to combat the Mu'tazili doctrines expressed in the *Kashshāf* of al-Zamakhsharī, Berlin, Nº. 791. — Further grammatical contributions of Ibn Hishām are printed in al-Suyūṭī, *op. cit.*, ii. 202, 209—301; iv. 2—34, 43—55, 100—120.

Nachträge p. 706; Huart, *A Hist. of Arab. Lit.*, p. 387 *sq.* (MOH. BEN CHENEB.)

IBN HUBAIRA, 1. ABU 'L-MUTHANNĀ 'OMAR B. HUBAIRA AL-FAZĀRĪ, governor of the 'Irāḳ. Ibn Hubaira was a native of Ḳinnasrīn and is mentioned in the reign of Sulaimān b. 'Abd al-Malik as one of the leaders in the war against the Byzantines. In the summer 96-97 (715) the fleet was equipped and in the autumn he attacked Byzantine territory with it, while Maslama b. 'Abd al-Malik conducted the operations on land. Ibn Hubaira spent the winter in Asia Minor and the following summer hostilities were resumed. At the end of 97 (August 716) the Arabs began to besiege Constantinople; after the siege had lasted for a year, they had to abandon it and return home. In 100 (718-719) 'Omar II granted him the governorship of Mesopotamia. After a successful expedition against the Byzantines in Armenia in 102 (720-721) he was appointed governor of al-'Irāḳ and Khorāsān by Yazīd II. In the constant feuds between northern and southern Arabs, on account of his lineage he always took the side of the former, while the latter were in consequence neglected. In Shawwāl 105 (March 724), soon after the accession of the Caliph Hishām b. 'Abd al-Malik, Ibn Hubaira was dismissed and Khālid b. 'Abd Allāh al-Ḳasrī appointed his successor. According to another statement, this did not happen till the following year. His son Yazīd is also called Ibn Hubaira.

2. ABŪ KHĀLID YAZĪD B. 'OMAR, son of the preceding, born in 87 (705-706). Yazīd was appointed governor of Ḳinnasrīn by the Caliph al-Walīd II. In the beginning of 128 (autumn 745) Marwān II appointed him governor of the 'Irāḳ and sent him with an army against the Khāridjīs. In Ramaḍān 129 (May—June 747) Yazīd entered Kūfa. He next captured Wāsiṭ and took 'Abd Allāh b. 'Omar b. 'Abd al-'Azīz [q. v.] prisoner who had been forced to make peace with the Khāridjī chief al-Ḍaḥḥāk b. Ḳais al-Shaibānī [q. v.] and had remained in the town as Khāridjī governor. The whole of the 'Irāḳ was then subdued. Like the other enemies of the Umaiyad caliphate the Khāridjīs also made an alliance with the 'Alid rebel 'Abd Allāh b. Mu'āwiya [q. v.]; the latter was defeated by Yazīd's general 'Āmir b. Ḍubāra and the Khāridjīs could no longer hold out in the 'Irāḳ. The 'Abbāsids then appeared in the field. When their general Ḳaḥṭaba b. Shabīb advanced against Kūfa, Yazīd hastened to meet him but was defeated in Muḥarram 132 (August 749) and had to take to flight. Ḳaḥṭaba lost his life — how it is not known — and his son Ḥasan undertook the supreme command, while Yazīd fell back on Wāsiṭ, where he was besieged by Ḥasan. In the same year the 'Abbāsid dynasty was formally recognised. Abū Dja'far, brother of the Caliph Abu 'l-'Abbās went to Wāsiṭ to the assistance of Ḥasan b. Ḳaḥṭaba and after a siege of several months Yazīd had to surrender. Although the 'Abbāsids had expressly promised to pardon him, he was soon afterwards put to death. According to Ibn Khallikān Yazīd's execution took place in Dhu 'l-Ḳa'da 132 (June 750); according to another account, however, he did not enter into negotiations with the besiegers till he had received news of the death of the Caliph Marwān II [q. v.]. According to this, Yazīd could not have been put to death before the early months of the next year (= autumn 750).

IBN HUBAIRA, the name of two viziers:

1. 'Awn al-Dīn Abu 'l-Muẓaffar Yaḥyā b. Muḥammad b. Hubaira al-Shaibānī, born in 499 (1096-1097) or, according to another statement, in 497 (1103-1104). He was a native of Dūr Banī Awḳar, a place five parasangs from Baghdād, and studied in the latter city. After filling several offices he was installed in 542 (1147-1148) as chief of the *Dīwān al-Zimām* and in Rabī' II 544 (August 1149) the Caliph al-Muḳtafī appointed him vizier. After the death of the Saldjūḳ Sulṭān Mas'ūd b. Muḥammad in Radjab 547 (Oct. 1152) the governor of Baghdād, Mas'ūd al-Bilālī, seized the town of al-Ḥilla, but was soon defeated by Ibn Hubaira and had to flee to Takrīt, whereupon not only al-Ḥilla, but also Kūfa and Wāsiṭ fell into the vizier's hands. When Sulṭān Muḥammad b. Maḥmūd sent an army against Wāsiṭ, the Caliph himself hurried to his vizier's assistance and the Sulṭān's troops had to retire. In 548 (1153-1154) al-Muḳtafī besieged Takrīt but had to abandon the enterprise. In the following year the Caliph and then the vizier made a renewed attempt to take the town but without success. Nevertheless, Mas'ūd al-Bilālī was twice defeated in the open field, by the Caliph near Ba'ḳūbā and by Ibn Hubaira near Wāsiṭ. After this victory the latter received the honorary title of "Sulṭān of the 'Irāḳ". When al-Muḳtafī in the year 555 (1160) died and al-Mustandjid succeeded him, Ibn Hubaira was confirmed in his office. He died on the 13th Djumādā I 560 (28th March 1165). He was also celebrated as a scholar.

(K. V. Zettersteen.)

IBN HUBAL, Muhadhdhib al-Dīn Abu 'l-Ḥasan 'Alī b. Aḥmad, a physician, born in Baghdād 515 (1122), studied grammar and fiḳh at the Niẓāmiya but later turned to medicine. He became court physician to the Shāh-i Arman at Khilāṭ and there amassed great riches; he next entered the service of Badr al-Dīn Lu'lu' at Mārdīn and finally went to al-Mawṣil. When he was 75 years old, he unfortunately became blind but lived till 610 (1213). His chief work is entitled *al-Mukhtār fi 'l-Ṭibb*, from which de Koning has published two chapters in *Traité sur le calcul dans les reins et dans la vessie*, p. 180 *sqq.* Ibn Hubal, who was also a poet, left a son, Shams al-Dīn Abu 'l-'Abbās Aḥmad, who was likewise a physician and practised in Asia Minor at the court of the Saldjūḳ Kaiḳāwūs (q. v.), where he died.

IBN 'IDHĀRĪ (Ibn 'Adhārī), Abū 'Abd Allāh Muḥammad al-Marrākushī, Arab historian of the Maghrib and Spain, about whom we have no information further than that he flourished about the end of the viith (xiiith) century, with which his chronicle concludes. The latter is of special interest as it contains portions of lost works. It is called *al-Bayān al-mughrib fī Akhbār al-Maghrib* and is not preserved in its entirety. Ibn 'Idhārī also wrote a history of the East, which we only know by name. Dozy published the text of *al-Bayān al-Mughrib: Histoire de l'Afrique et de l'Espagne* (Leyden 1848—1851, 2 vols.); a fragment is given in the *Crestomatia arábigo-española* of Simonet and Lerchundi (Granada, 1881), N°. lxi. The entire work is translated by Fagnan, Algiers 1901—1914, 2 vols.; a fragment on the invasion of the Normans by Dozy, *Recherches*, 3rd ed., ii. 288-289. Cf. also Dozy, *Corrections sur le texte du Bayano 'l-Mogrib*, Leyden 1883, p. 1—91.

Bibliography: Dozy, Preface to his edition, i. 77—107; Wüstenfeld, *Die Geschichtschreiber der Araber*, N°. 373, p. 151; Pons Boigues, *Ensayo bio-bibliográfico*, p. 414 *sq.*
(René Basset.)

IBN ISFANDIYĀR, Muḥammad b. al-Ḥasan, a Persian historian, of whom we only know what little he tells us in the beginning of his chronicle of his native land of Ṭabaristān, returned in 606 (1210) from Baghdād to 'Irāḳ 'Adjamī after hearing of the murder of his patron Rustam b. Ardashīr, governor of Ṭabaristān. In deep grief he spent two months in Raiy collecting material for his work and studying in the libraries. He then spent five years in the town of Khwārizm, where he found by accident in a bookseller's shop certain new documents, including the letter of Tansar, Ardashīr Bābakān's minister, to Djasnaf, king of Ṭabaristān (*Journ. Asiat.*, 9th Ser., Vol. iii., 1894, p. 185 and 502). His chronicle begins with this letter, then follows after a brief description of his native land and its remarkable features, the history of Ṭabaristān under the dynasties of Wadjangīr and Bāwand [v. Bāwand], under the sway of the Ghaznawids and Saldjūḳs and under the second native Bāwend dynasty, with which the work closes. An abridged English translation by E. Browne appeared in 1905 in the *Gibb Memorial Series*, Vol. ii.

(Cl. Huart.)

IBN ISḤĀḲ, Abū 'Abd Allāh Muḥammad, an Arab author and authority on Tradition, was the grandson of Yasār, who was captured in the year 12 = 633 in the church at 'Ain al-Tamr in the 'Irāḳ and brought to Medina, where he became a client of the tribe of 'Abd Allāh b. Kais. Muḥammad also grew up there; he devoted his attention to the collection of stories and legends of the life of the Prophet and thus soon

came into conflict with the representatives of religious and legal tradition which dominated public opinion in the town, notably with Mālik b. Anas who decried him as being a Shīʿī and as being the inventor of many legends and poems transmitted by him. He therefore left his native land and went first of all to Egypt and then to the ʿIrāḳ. The Caliph al-Manṣūr induced him to come to Baghdād, where he died in 150 = 767, or 151 or even 152. He seems to have gathered the materials for the Prophet's biography in two volumes, the *Kitāb al-Mubtadaʾ* (*Fihrist*, p. 92) or *Mubtadaʾ al-Khalḳ* (Ibn ʿAdī in Ibn Hishām (ed. Wüstenfeld), II, p. VIII, l. 23) or *Kitāb al-Mabdaʾ wa-Ḳiṣaṣ al-Anbiyāʾ* (al-Ḥalabī, *al-Sīra*, ii. 235), the history of the Prophet to the Hidjra, and the *Kitāb al-Maghāzī*. His *Kitāb al-Khulafāʾ* seems early to have taken a second place before this, his chief work. Karabacek believed he had found a leaf of the original text of the biography of the Prophet in a papyrus of the Rainer collection (see *Führer durch die Sammlung*, nº. 665); on the other hand, the alleged *Kitāb al-Maghāzī* of Ibn Isḥāḳ in the library of the Köprülü Madrasa in Stambul (*Defter*, Nº. 1140) has been shown to be a copy of Ibn Hishām's recension (see Horovitz in *Mitt. des Sem. für Orient. Sprachen*, x. Westas. Stud., p. 14). Al-Māwardī, however, seems still to have had access to the original. He quotes from the *Maghāzī* in his *al-Aḥkām al-Sulṭāniyya* (ed. Enger), p. 65, 11 *sqq.*, 65-6, 67-8, 68, stories which are given in an abridged form in Ibn Hishām, p. 677, 501, 445, 841. His work is preserved in comprehensive extracts in Ṭabarī, but independently only in the version of Ibn Hishām [q. v.], who knew the book through a pupil of Ibn Isḥāḳ, the Kāḍī Ziyād b. ʿAbd Allāh al-Bakkāʾī. He combined the two independent parts with occasional considerable abridgments into the *Kitāb Sīrat Rasūl Allāh*. The book received its present form in the fourth century A. H. from al-Wazīr al-Maghribī [q. v.]. A commentary was written on it by al-Suhailī (died 508 = 1114) and another, very superficial, by the Moroccan Abū Dharr Muṣʿab b. Muḥammad b. Masʿūd (died 604 = 1207 in Fās).

(C. BROCKELMANN.)

IBN IYĀS (in the popular dialect pronounced "Ayās"), MUḤAMMAD B. AḤMAD, is the most important Arab chronicler of the period of the decline of the Mamlūks. Born in 852 (1448) he seems to have been nearly 80 when he died, for his history comes down to the year 928. His family was of Turkish origin. His paternal grandfather, Iyās al-Fakhrī, a Turkish slave, called "min Djumādā" after his owner, was sold to Sulṭān Ẓāhir Barḳūḳ [q. v.], enrolled among his Mamlūks and reached the rank of second Dawādār. His great grandfather (his father's maternal grandfather) had risen further in the official scale. Azdamir al-Khāzindār, sold into Egypt as a slave, ultimately filled the very highest offices in Cairo under Sulṭān Ḥasan and Sulṭān Ashraf Shaʿbān and governed successively Tripolis, Aleppo and Damascus. Ibn Iyās' father belonged in Cairo to the Awlād al-Nās, a kind of military reserve, who were bound to give military service at the Sulṭān's command. In return they received a fief or a sum of 1000 dīnārs or a yearly allowance (1000 dirhams under Ḳāʾit Bey) [see Ibn Iyās, ed. Būlāḳ, ii. 195 et passim]. Aḥmad Ibn Iyās was a prominent man, related both by birth and marriage to many emirs and high officials. Of his 25 children only three boys and three girls survived him: one of them is our author; another was master of ordnance (*zardkhāsh*).

Ibn Iyās' chief work, the only one which can claim lasting importance is a detailed chronicle of Egypt entitled *Badāʾiʿ al-Zuhūr fī Waḳāʾiʿ al-Duhūr*. He treats briefly of the early history of Egypt to the end of the Aiyūbid period, and even the account of the Mamlūk period down to Ḳāʾit Bey is rather cursory. It is only from the accession of this ruler that he relates events in detail, along with biographies of the high officials and monthly lists of obituaries. A close study of this work reveals a problem. The chronicle seems to be extant in two versions. The shorter is clearly the author's diary; for the events of the year 921 for example were, according to the text, already completely noted on the 1st Muḥarram 922. Further evidence is that the shorter version is written in the vernacular, while the fuller text of the longer version in the London Ms. appears finished and polished (cf. Vollers' comprehensive article in the *Revue d'Égypte*, iii. 551). The description of the years 922—928 is moreover much fuller than the preceding parts and might, if Ibn Iyās is really the author, belong to the larger recension. It is remarkable that the reign of Sulṭān Ghūrī, the years 906—912 (Paris Ms.) and 913—921 (Petrograd Ms.), is not found in other copies (hence not printed in the Cairo edition). This circumstance brought Vollers in his article above mentioned to conclude that this portion of the chronicle is not by Ibn Iyās. But it is just this part that is certainly from his pen; this is proved by the fact that he writes as an eye-witness. For example, he mentions that he was present at

a procession himself, or that he was personally affected by events (*e. g.* robbery by Mamlūks). Further evidence is the accurate account of his family affairs on his father's death as well as the occasional mention of his brother. Ibn Iyās' chronicle is an account of the doings of the rulers of the time, at the same time mentioning other events. He cannot be denied a certain critical ability, although his verdict is often too severe. Yet he was conscious that the utterly corrupt financial administration and the neglect, so often censured by him, of artillery brought about the decline of the empire, although he unjustly gives the whole blame for the wretched financial situation to Sulṭān Ghūrī. The great value of this chronicle consists also in the fact that in part it is the only Arabic source for the beginning of the x[th] century.

Of less importance are his other works: 1. *Nashk al-Azhār fī ʿAdjāʾib al-Aḳṭār*, a cosmography with special reference to Egypt much used and often quoted by European scholars of the xix[th] century. 2. *Marādj al-Zuhūr fī Waḳāʾiʿ al-Duhūr*, a popular history, dealing with the patriarchs and prophets, of little value, and perhaps not by our author. 3. *Nuzhat al-Umam fi 'l-ʿAdjāʾib wa 'l-Ḥikam*, also a work on history, little known, only extant in one Ms. in Constantinople.

Bibliography: See Brockelmann, *Geschichte d. arab. Lit.*, ii. 295, and Vollers' article. Ibn Iyās' chronicle was printed in Cairo (1301—1306) and in the state press of Cairo—Būlāḳ 1311-1312. (M. SOBERNHEIM.)

IBN AL-ĶĀḌĪ, ABU 'L-ʿABBĀS AḤMAD B. MUḤAMMAD B. MUḤAMMAD B. AḤMAD B. ʿALĪ B. ʿABD AL-RAḤMĀN B. ABI 'L-ʿĀFIYA AL-MIKNĀSĪ, known as IBN AL-ĶĀḌĪ, a descendant of Mūsā b. Abi 'l-ʿĀfiya al-Miknāsī, belonging to the great tribe of Zenāta of Morocco, born in 960 (1552-1553). Jurisconsult, man of letters, historian, poet and above all mathematician, he studied with his father, Abu 'l-ʿAbbās al-Mandjūr, al-Ḳaṣṣār, Abū Zakariyā Yaḥyā al-Sarrādj, Ibn Mudjbir al-Masāʾī, Abū ʿAbd Allāh Muḥammad b. Djallāl, Aḥmad Bābā, Abū Muḥammad ʿAbd al-Wahhāb al-Sedjilmāsī, mufti of Marrākesh, etc. He was on intimate terms with the Ṣūfī Abu 'l-Maḥāsin al-Fāsī and attended his conferences. He went to the east for the first time to make the pilgrimage to Mecca and heard the lectures of Ibrāhīm al-ʿAlḳamī, Sālim al-Sanhūrī, Yūsuf b. Fodjla al-Zarḳānī, Yaḥyā al-Ḥaṭṭāb, Badr al-Dīn al-Ḳarāfī, etc. On returning a second time to the east in 991, he was captured by Christian corsairs on Thursday 14[th] Shaʿbān 994 = 31[st] July 1585 and his ransom of 20,000 ounces was paid by Sulṭān Abu 'l-ʿAbbās al-Manṣūr al-Saʿdī on the 17[th] Radjab 995 = 23[rd] June 1587, i. e. after 11 months' captivity during which he had to suffer, as he tells us himself, all kinds of privations and ill treatment. After occupying the post of Ḳāḍī at Salā (Salé) he was recalled and settled at Fās, where he devoted himself to teaching in the mosque al-Andalus. Among his pupils may be mentioned Abu 'l-ʿAbbās Aḥmad b. Yūsuf al-Fāsī, and notably the author of *Nafḥ al-Ṭīb*, Abu 'l-ʿAbbās Aḥmad al-Maḳḳarī, who pronounced his funeral prayers. He died at Fās on the 6[th] Shaʿbān 1025 = 19[th] August 1616 and was buried near the Bāb al-Djīsa.

Of the 13 works enumerated by his biographers, we only know the following: 1°. *Djadhwat al-Iḳtibās fī man ḥalla min al-Aʿlām Madīnat Fās*, biographical dictionary of famous men and scholars who lived in Fās, publ. at Fās in 1309; 2°. *Durrat al-Ḥidjāl fī Asmāʾ al-Ridjāl*, a biographical dictionary completing the *Wafayāt al-Aʿyān* of Ibn Khallikān and stopping at the beginning of the 11[th] (xvii[th]) century, Bibl. Univers. of Algiers, n°. 2022; 3°. *Luḳṭ al-Farāʾid min Lufāẓat al-Fawāʾid*, complement to the *Ṭabaḳāt* of Ibn Ḳunfudh in which each century is divided into ten classes each containing 10 very succinct biographies (in the writer's library); 4°. *Al-Muntaḳā 'l-maḳṣūr ʿalā Maʾāthir* (var. *Maḥāsin*) *al-Khalīfa Abi 'l-ʿAbbās al-Manṣūr*, a panegyrical history of Sulṭān al-Manṣūr, a source of *Nuzhat al-Ḥādī* of al-Wafrānī and *al-Istiḳṣā* of al-Salāwī.

Bibliography: biographical notice at the beginning of *Djadhwat al-Iḳtibās*, Fās 1309; al-Ḳādirī, *Nashr al-Mathānī*, Fās 1310, i. 128; al-Wafrānī, *Ṣafwat*, Fās n. d., p. 77; al-Kattānī, *Salwat al-Anfās*, Fās 1316, iii. 153; Moh. Ben Cheneb, *Et. s. les pers. ment. dans l'Idjâza de Si'h Abd el-Qâdir el-Fâsî*, Paris 1907, n°. 307; Huart, *A Hist. of Arab. Lit.*, p. 390.

(MOH. BEN CHENEB.)

IBN ĶĀḌĪ SHUHBA, TAḲĪ AL-DĪN ABŪ BEKR AḤMAD B. MUḤAMMAD B. ʿOMAR AL-ASADĪ AL-DIMASHḲĪ, an Arab biographer, born in 779 (1377), died 851 (1448). He successively filled various offices, as Mudarris, Ḳāḍī, chief Ḳāḍī, etc. and devoted particular attention to the *Chronicle* of al-Dhahabī (q. v.), which he continued and of which he prepared a synopsis. Another work of his is the *Ṭabaḳāt al-Shāfiʿīya*.

His son ABU 'L-FAḌL MUḤAMMAD, died 874 (1469), wrote not only a biography of his father but also several other less important works which are detailed by Brockelmann, *Gesch. d. arab. Litt.*, ii. 30.

Bibliography: See Brockelmann, *o. c.*, ii. 51.

IBN ĶĀḌĪ SIMĀWNA, BADR AL-DĪN MAḤMŪD B. ISRĀʾĪL, a Turkish jurist and mystic, born at Simaw, a town in the Sandjaḳ of Kutahiya, where his father was Ḳāḍī. According to an uncorroborated statement, he was a descendant of the Saldjūḳ Sulṭāns; we have more authority for the statement that he studied in Cairo, was the teacher of Faradj afterwards Mamlūk Sulṭān; and later went to Armenia, where he entered a Ṣūfī order, whose shaikh was Ḥusain Akhlāṭī. He is said to have disputed about this time in Tiflis before Tīmūr, with other jurists, and came in Tīmūr's train to his native land again. During the wars of succession after the death of Bāyazīd he attached himself to Mūsā, who had proclaimed himself sulṭān in European Turkey, and the latter made him ḳāḍīʿasker. Mūsā however lost his life in 816 (1413) in battle with his brother Muḥammad I. Ibn Ḳāḍī Simāwna was pardoned but had to settle in Iznik. A short time afterwards, a religious movement began in Asia Minor, the leader of which was a certain Börklüdje Muṣṭafā, whom his followers used to call Dede Sulṭān. A detailed account of him is given by Ducas, ed. Bonn, p. 111 *sqq*. The accounts of the movement are not quite clear but it seems to have aimed at the abrogation of Muslim law and the introduction of a limited communism, so that Jews and Christians also took part in it. One of the leaders is said to have been a Jew, although his name, transmitted in

different forms, Turlāḳ Kamāl (Torlaḳ Hūr or Hū) does not sound at all Jewish. Bōrüklüdje Muṣṭafā was, according to some, Ibn Ḳāḍī Simāwna's ketkhodā when he was ḳāḍī'asker; in any case, he seems to have been one of his pupils. When the movement started, however, Ibn Ḳāḍī Simāwna was no longer in Asia Minor, but in European Turkey, either because he had connections there and was seeking a career in it, or because he feared to be drawn into the movement on account of the relations between him and Muṣṭafā and therefore retired to Europe. The statement in Ḳuṭb al-Dīn, *Die Chroniken der Stadt Mekka*, ed. Wüstenfeld, iii. 255, that he had himself claimed the sultanate is improbable. In any case, Sulṭān Muḥammad sent troops against Muṣṭafā and Ṭorlaḳ, who were both taken prisoner and executed. Ibn Ḳāḍī Simāwna was thereupon also arrested and executed under a fatwā of Ḥaidar Harawī at Seres in 818 (1415).

Ibn Ḳāḍī Simāwna composed several legal and mystic works, whose titles are given by Brockelmann. The mystical writings *Masarrat al-Ḳulūb*, *al-Wāridāt* (extant in Leiden, with commentary, cf. *Cat.*, v. 23), are not yet investigated.

IBN ḲAIS AL-RUḲAIYĀT, 'UBAID ALLĀH, a notable poet of the Umaiyad period. By descent he was a Ḳurashī although he did not belong to one of the most distinguished families of this tribe. His life is bound up with the wars waged about the caliphate between Ibn al-Zubair in Mecca and the Umaiyads in Damascus. The poet who had lost several relatives in the battle of the Ḥarra [q. v.] was a passionate champion of the Zubairids; but he seems to have had sufficient political insight to regret profoundly the struggle in which he found himself involved. That the Ḳuraish were predestined to rule the Arabs with a firm hand was clear to him; and he made no secret of the fact that such political convulsions were bound to undermine the power of the Ḳuraish. Our poet was particularly attached to Muṣ'ab, the Zubairid governor of the 'Irāḳ. When the latter was defeated and fell at Maskin, the fate of his brother 'Abd Allāh, the Meccan anticaliph, was also decided. Ibn Ḳais al-Ruḳaiyāt now remained in concealment for a considerable time; the story of his disappearance and his reappearance among the Umaiyads in Syria has been romantically adorned. Just as previously Ibn Ḳais had been more attached to Muṣ'ab than to his brother in Mecca, so now he seems to have found less favour and kindly welcome with 'Abd al-Malik, the ruler in Damascus, than with 'Abd al-'Azīz, the governor who ruled Egypt in his brother's name. The Umaiyad Caliph had, it is true, little reason to love the poet, in however moving a way the latter might now beg for grace.

Of his poems a selection made by al-Sukkarī in the third century A.H. has come down to us. From this we receive a direct impression of the events which convulsed the world of Islām at this time as revealed in the descriptions and impressions of one concerned in them. The political poems of the *Dīwān* may be considered as political pamphlets of the time. It also contains numerous trifling and sensual poems usually quite conventional love poems. Our poet indeed owes his name al-Ruḳaiyāt to a lady he addresses, named Ruḳaiya. Even the earliest critics compared Ibn Ḳais al-Ruḳaiyāt with 'Umar Ibn Abī Rabī'a. The latter towers above him — not only as a poet of love but also as a man — but the former may be credited with greater versatility. The *madīḥ*, the praise of high and noble patrons, is a favourite form of poem of his and in its composition he shows much skill. But he wanders all over the well trod paths of post-classic Arabic archaicising poetry, although here and there he makes concessions to contemporary styles. At least he does not fall into the errors of other singers of this epoch by seeking after unintelligible ancient expressions. A freshness and directness of style cannot be denied to some descriptions in his *Dīwān*, for example the short but charming description of Ḥulwān (*Dīwān*, iii. 6 *sqq.*) and some amorous trifles.

Akademie der Wissensch. in Wien, philos.-histor. Classe*, vol. cxliv., 1902). Thereon Th. Nöldeke, *Wiener Zeitschrift f. d. Kunde des Morgenlandes*, xvii., 1903, p. 78 *sqq.*

(N. RHODOKANAKIS.)

IBN AL-ḲAISARĀNĪ, under this name are known:

1. ABU 'L-FAḌL MUḤAMMAD B. ṬĀHIR AL-MAḲDISĪ, an Arab philologist, born 448 (1056), died 507 (1113). De Jong has published an edition of one of his writings under the title *Homonyma inter nomina relativa* (Lugd. Bat. 1865). The Arabic title is given in Brockelmann, *Gesch. d. arab. Litt.*, i. 355, where further references are given. There has also been printed his *Kit. al-Djam' baina Kitābai Abī Naṣr al-Kalābādhī wa-Abī Bakr al-Iṣbahānī fī Ridjāl al-Bukhārī wa-Muslim*, Ḥaidarābād 1323.

2. ABŪ 'ABD ALLĀH MUḤAMMAD B. NAṢR, SHARAF AL-DĪN, an Arab poet, born 478 (1085) at 'Akkā, d. 548 (1153) at Damascus. On him cf. Ibn Khallikān, ed. Wüstenfeld, N°. 688.

IBN ḲAIYIM AL-DJAWZĪYA, i. e. the son of the director of the Madrasa al-Djawzīya at Damascus, whose real name was SHAMS AL-DĪN MUḤAMMAD B. ABĪ BAKR, a Ḥanbalī theologian and disciple of the celebrated Ibn Taimīya, 691—751 (1292—1350). "He was in every respect a faithful disciple of his teacher and he adopted the latter's literary mode. Even during the lifetime of Ibn Taimīya he was persecuted and, as he condemned the pilgrimage to Hebron, he was thrown into prison. Like his teacher he combats the philosophers, the Christians, and the Jews, he holds up the doctrine of the eternity of rewards and of the finiteness of the punishments of hell" (Schreiner in *Zeitschr. der Deutsch. Morgenl. Gesells.*, liii. 56). Of his numerous writings (cf. the list in Brockelmann, *Gesch. der arab. Litt.*, ii. 106) are printed amongst others: *Kitāb al-Fawā'id al-mushawwiḳa ilā 'Ulūm al-Ḳur'ān wa-'Ilm al-Bayān*, Cairo 1318, 1327; *Kitāb al-Rūḥ*, Ḥaidarābād 1318, 1324; *Akhbār al-Nisā'*, Cairo 1307, 1310; *Shifā' al-'Alīl fī 'l-Ḳaḍā' wa 'l-Ḳadr* etc., Cairo 1323; de Vlieger, *Kitāb al-Qadr*, *Matériaux pour servir à l'étude de la doctrine de la prédestination dans la théologie musulmane*; *al-Ṭuruḳ al-ḥikamīya fi 'l-Siyāsa al-shar'īya*, Cairo

1317; *Miftāḥ Dār al-Sa'āda wa-Manshūr Wilāyat al-'Ilm wa 'l-Irāda*, Cairo 1323; *Zād al-Ma'ād fī Hadyi Khair al-'Ibād*, Cairo 1324; *Ḥādī 'l-Arwāḥ ilā Bilād al-Afrāḥ*, ibid. 1326; *Ighāthat al-Lahfān fī Ḥukm Ṭalāḳ al-Ghaḍbān*, ibid. 1318; *Aḳsām al-Ḳur'ān*, Mecca 1321; *al-Djawāb al-kāfī liman sa'ala 'an al-Dawā' al-shāfī*, Cairo 1322; *Madāridj al-Sālikīn fī Manāzil al-Sā'irīn*, 3 vol. Cairo 1333. In the *Fihrist Maktabat al-Mawṣil*, 1332, are further mentioned: *Hidāyat al-Ḥayārā min al-Yahūd wa 'l-Naṣārā* (cf. Goldziher in *Jeschurun, Zeitschr. f. d. Wiss. d. Judenth.*, ix. (1873), 18 *sqq.*); *al-Ḳaṣīda al-Nūnīya*; *Ḥukm Tārik al-Ṣalāt*, *Masā'il Ibn Taimīya allatī djama'ahā Ibn Ḳaiyim*.

Bibliography: given in the text of the article.

IBN ḲALĀḲIS, ABU 'L-FUTŪḤ NAṢR ALLĀH B. 'ABD ALLĀH, an Arab poet, born in Alexandria in 532 (1138). He spent the years 563—565 (1168-1169) in Sicily where a certain Ḳā'id Abu 'l-Ḳāsim Ibn al-Ḥadjar was his patron; to him he dedicated a work entitled *al-Zahr al-bāsim fī Awṣāf Abi 'l-Ḳāsim*; he then went to Yemen and died at 'Aidhāb in 567 (1171). His not very extensive *Dīwān* was published in Cairo in 1323 by Khalīl Maṭrān; this edition is very incomplete in comparison to the ms. Paris Bibl. Nat., N°. 3139.

Bibliography: Ibn Khallikān, *Wafayāt* (ed. Wüstenfeld), N°. 772; Brockelmann, *Gesch. d. arab. Litt.*, i. 261.

IBN AL-ḲALĀNISĪ, ABU YA'LĀ ḤAMZA B. ASAD AL-TAMĪMĪ, an Arab historian, belonged to a prominent family in Damascus and died there in 555 (1160). He continued the chronicle of Hilāl al-Ṣābi', which stops in the year 448, down to 555 and gave his work the simple title *Dhail*. The work was frequently copied by later authors and has been published by H. F. Amedroz (1908) from the Oxford Ms., which is defective at the beginning, and starts in the year 363. Cf. the editor's preface.

IBN AL-KALBĪ. [See AL-KALBĪ.]

IBN KAMĀL. [See KAMĀLPASHAZĀDE.]

IBN ḲASĪ, AḤMAD, shaikh of the Ṣūfīs, set up in Spain about 1140 as a Mahdī and took possession of Mertola and other places (1144). He was then delivered up by his followers to the Almohads and pardoned by 'Abd al-Mu'min. He lived for a time at the court of these rulers till one of his former followers murdered him. He was also an author and wrote a book called *Khal' al-Na'lain fi 'l-Taṣawwuf*. Cf. Ḥādjdjī Khalīfa, iii. 171; *Cat. Wien* (Flügel), iii. 401.

Bibliography: 'Abd al-Wāḥid al-Marrākushī (ed. Dozy), p. 150; Ibn Khaldūn, *Muḳaddima* (ed. Quatremère), i. 327.

IBN ḲĀSIM, ABŪ 'ABD ALLĀH 'ABD AL-RAḤMĀN B. AL-ḲĀSIM AL-'UTAḲĪ, was the Imām Mālik's most prominent pupil. He studied under him for 20 years and after Mālik's death was regarded as the greatest Mālikī teacher. Through him Mālikī teaching was disseminated in the Maghrib, where it is still predominant. He died in Cairo in 191 (806).

One of the chief works of the Mālikīs, the so-called *Mudawwana* is usually ascribed to Ibn al-Ḳāsim. It was originally put together by Asad b. al-Furāt and consists of the answers of Ibn al-Ḳāsim to Asad's questions on the doctrine of Mālik b. Anas. Saḥnūn Abū Sa'īd al-Tanūkhī (died 240 = 854), the ḳāḍī of Ḳairawān, copied the work. When he went to see Ibn al-Ḳāsim in 188 = 804, the latter gave him many emendations and after his death Saḥnūn arranged the whole book. In Ibn al-Ḳāsim's *Mudawwana* we therefore have an account of the doctrines of Mālik b. Anas in Saḥnūn's recension. The work was printed in 20 vol. at Cairo in 1323 (1905). Various Mālikī scholars have written commentaries on the *Mudawwana*.

Bibliography: Ibn Khallikān, *Wafayāt al-A'yān* (ed. Wüstenfeld), N°. 322; Ibn Khallikān's *Biographical Dictionary*, translated by M. G. de Slane, Paris 1843, ii. 86 *sqq.*; Ibn al-Nādjī, biography of Asad Ibn al-Furāt in *Ma'ālim al-Īmān* (Tunis 1320, ii. 2—17) ed. and transl. by O. Houdas and R. Basset, *Mission de Tunisie*, 2nd part, p. 104—143; M. B. Vincent, *Études sur la loi musulmane (Rite de Malek)*, Paris 1842, p. 38 *sqq.*; C. Brockelmann, *Geschichte der arab. Litteratur*, i. 176 *sq.*

(TH. W. JUYNBOLL.)

IBN AL-ḲĀSIM AL-GHAZZĪ, SHAMS AL-DĪN ABŪ 'ABD ALLĀH MUḤAMMAD, a Shāfi'ī scholar, who wrote glosses on the celebrated *'Aḳā'id* of al-Nasafī (Ḥādjdjī Khalīfa, iv. 222), which are no longer extant, and a commentary, still very popular, on the little manual of Muslim law by Abū Shudjā', which has been often printed in the east and also publ. and transl. by L. W. C. van den Berg (*Fatḥ al-Ḳarīb, Commentaire sur le précis de jurisprudence musulmane d'Abou Chodjâ' par Ibn Qâsim al-Ghazzî*, Leide 1894); cf. E. Sachau, *Muhammedanisches Recht nach schafiitischer Lehre*, Berlin 1897. He died in 918 (1512).

(TH. W. JUYNBOLL.)

IBN KATHĪR 1. 'ABD ALLĀH, ABŪ BAKR, ABŪ MA'BAD (corrupted to Abū Sa'īd), one of the seven canonical Ḳur'ān readers, born in 45 (665) in Mecca, belonged to a Persian family which had migrated to South Arabia, was a client of 'Amr b. 'Alḳama al-Kinānī and from his trade of druggist was called al-Dārī or al-'Aṭṭār; he filled the office of Ḳāḍī 'l-Djamā'a in Mecca and died there in 120 = 738. His manner of reading the Ḳur'ān was transmitted by the two readers Ḳanbal i. e. Muḥammad b. 'Abd al-Raḥmān al-Makhzūmī (died 291 = 904) and al-Bazzī i. e. Aḥmad b. Muḥammad al-Fārisī (died 270 = 883) and is known to us from the anonymous description in a Berlin Ms. (s. Ahlwardt, *Verzeichn.*, N°. 632).

Bibliography: Ibn al-Nadīm, *Fihrist*, p. 28; Ibn Khallikān, ed. Wüstenfeld, N°. 326 (ed. Būlāḳ, 1299, i. 314); al-Nawawī, *Biographical Dictionary*, p. 363; Abu 'l-Maḥāsin, *Annales*, i. 314, 317.

2. ISMĀ'ĪL B. 'OMAR 'IMĀD AL-DĪN ABU 'L-FIDĀ' B. AL-KHAṬĪB AL-ḲURASHĪ AL-BOṢRAWĪ AL-SHĀFI'Ī, Arab historian, born in 701 (1301) at Damascus, taught there as professor of Tradition and shared the persecution of his teacher, the celebrated Ḥanbalī Ibn Taimīya; he died in Sha'bān 774 = Febr. 1373. His chief work is the universal history, *al-Bidāya wa 'l-Nihāya*, from the creation to his own time, based to the year 738 = 1337 on al-Birzālī's chronicle. Of the Mss. of this work detailed by Brockelmann in his *Gesch. d. ar. Lit.*, ii. 49, there may be added Berlin, Ahlwardt, *Verz.*, N°. 9449 (against Ahlwardt's erroneous description see Kern in the *Mittil. des Seminars für oriental.*

Sprachen, vol. xi., Westas. St., p. 287) and Houtsma, *Cat. d'une Coll.* etc., Nº. 30, 31, 2nd ed. 1889, Nº. 175: 2 vols., years 96—242, 278—465 (defective in Vienna). He also wrote a commentary on the Ḳur'ān and some works on Tradition.

Bibliography: Ibn Ḥadjar al-'Asḳalānī, *al-Durar al-kāmina* (Cod. Vienna, Nº. 1172), i. 212r; al-Nu'aimī, *al-Rawḍ al-'āṭir* (Cod. Berlin, Nº. 9886), i. 60r; al-Dhahabī (al-Suyūṭī), *Liber classium virorum*, etc., ed. Wüstenfeld, xxii. Nº. 3; Weyers, *Orientalia*, ii. 433; Wüstenfeld, *Geschichtschreiber*, p. 434.

(C. Brockelmann.)

IBN KHĀḲĀN, the name of three viziers:

1. Abu 'l-Ḥasan 'Ubaid Allāh b. Yaḥyā b. Khāḳān. Appointed secretary of state in 236 (850-851), 'Ubaid Allāh was raised to the vizierate by al-Mutawakkil and held this office till the latter's assassination in 247 (861). Towards the end of the year 245 (860) he brought about the fall of Nadjāḥ b. Salama, the minister of finance; the latter was tortured to death and his property confiscated. Along with al-Fatḥ b. Khāḳān [q. v.] 'Ubaid Allāh was the declared favourite of al-Mutawakkil and they used their influence to favour his son al-Mu'tazz at the expense of his brother al-Muntaṣir b. al-Mutawakkil. After the accession of al-Mu'tamid in the year 256 (870) 'Ubaid Allāh, in spite of vigorous protests was again appointed vizier and remained in this office till his death in Dhu 'l-Ḳa'da 263 (July 877).

Bibliography: Ṭabarī, iii. see Index; Ibn al-Athīr (ed. Tornberg), vii. passim; Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 326 sq., 343; Weil, *Gesch. der Chalifen*, ii. 367 sq., 374, 424.

2. Abū 'Alī Muḥammad b. 'Ubaid Allāh b. Yaḥyā, son of the preceding. After the fall of Ibn al-Furāt in 299 (912) Muḥammad, who had filled several offices since the death of his father, was appointed vizier through the influence of a harem lady but proved so incapable that the caliph al-Muḳtadir wished to replace him in the following year by Ibn Abi 'l-Baghl, governor of Fārs. He succeeded in saving himself by harem intrigues and Ibn Abi 'l-Baghl, who had already arrived in the capital to take over the office, returned to his governorship. Towards the end of the year, however, the Caliph had to look round for a more suitable vizier and summoned 'Alī b. 'Īsā b. al-Djarrāḥ [q. v.] to Baghdād. After the latter had entered into office in the beginning of 301 (913), Muḥammad was arrested with his two sons, 'Abd Allāh and 'Abd al-Wāḥid. In Djumādā II 301 (Jan. 914) he recovered his freedom again. He died in 312 (924-925).

Bibliography: Hilāl al-Ṣābi', *Kitāb al-Wuzarā'* (ed. Amedroz), p. 261—280; 'Arīb (ed. de Goeje), p. 37—43, 46, 122; Ibn al-Athīr (ed. Tornberg), viii. 47 sqq., 73, 110 sq.; Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 361—364; Weil, *Gesch. der Chalifen*, ii. 547 sq.

3. Abu 'l-Ḳāsim 'Abd Allāh ('Ubaid Allāh) b. Muḥammad b. 'Ubaid Allāh b. Yaḥyā, son of the preceding. In 312 (924) 'Abd Allāh succeeded Ibn al-Furāt when the latter was finally dismissed. When he was intriguing against the high chamberlain Naṣr al-Ḳushūrī, the latter got wind of it and soon brought about 'Abd Allāh's fall. Besides he was an invalid and had to trust the business of his office to others for a period. At the same time a famine broke out in the capital and as usual the discontent of the people found vent against the vizier. Naṣr finally succeeded in overthrowing him and after 'Abd Allāh had held the vizierate for about a year and a half, he was dismissed and imprisoned in Ramaḍān 313 (Nov. 925). His property was confiscated; after some time al-Muḳtadir released him and he died in 314 (926-927).

Bibliography: 'Arīb (ed. de Goeje), p. 37 sqq., 120—126; Ibn al-Athīr (ed. Tornberg), viii. 110 sqq., 122 sq.; Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 366; Weil, *Gesch. d. Chalifen*, ii. 556.

[K. V. Zetterstéen.]

IBN KHĀLAWAIH (Khālūya), Abū 'Abd Allāh al-Ḥusain b. Aḥmad b. Ḥamdān al-Hamadhānī, a notable Arab grammarian and lexicographer. The year of his birth is not mentioned; he was a native of Hamadhān and came in 314 to Baghdād, where he studied the Ḳur'ān with Ibn Mudjāhid (d. 324) and Abū Sa'īd al-Sīrāfī (d. 368), grammar and *Adab* with Ibn Duraid [q. v.], Niftawaih (d. 323), Ibn al-Anbārī [q. v.], Abū 'Omar al-Zāhid (d. 345), and *ḥadīth* with Muḥammad b. Makhlad al-'Aṭṭār (d. 331) and others. He afterwards went to Syria and settled in Ḥalab; according to al-Dhahabī he also lived in Maiyāfāriḳīn and Ḥimṣ. He took up an eclectic standpoint in relation to the grammatical schools of Kūfa and Baṣra. He won a high reputation as a teacher. He was in high favour with the Ḥamdānid Saif al-Dawla, whose sons he taught; as a poet he was also appreciated; and he often disputed vigorously with al-Mutanabbī [q. v.]. The grammarian Ibn Durustawaih (d. 347) argued against him in his *Kit. al-Radd 'alā Ibn Khālawaih fi 'l-Kaff wa 'l-Bad'* (*Fihrist* p. 63, 4). Ibn Khālawaih died in 370 (980) in Ḥalab.

Of his works (detailed in Flügel, *l. c.*) there are preserved: a) *Kitāb Laisa*, the first half of which was published by H. Derenbourg in *Hebraica*, x. 88—105, *Amer. Journ. of Sem. Lang. and Lit.*, xiv. (1898), 81—93, xv. (1898-9), 32—41, 215—223, xvii. (1901), 36—51; also, hardly completed, printed at Cairo in 1327 (ed. Aḥmad b. al-Amīn al-Shinḳīṭī); b) *Kit. (Ḥāshiya fī) I'rāb thalāthīn Sūrat al-Mufaṣṣal* (Mss. in Brockelmann); c) *Sharḥ Maḳṣūrat Ibn Duraid*, Ms. Paris Bibl. Nat., Nº. 4231, (s. and in Brockelmann, *o. c.*, i. 111); d) his recension of the *Dīwān* of Abū Firās [q. v.] with an introduction; e) Refutation of some grammatical explanations of Tha'lab in al-Suyūṭī, *al-Ashbāh wa 'l-Naẓā'ir* (Ḥaidarābād 1317), iv. 137—140. — The *Kit. al-Shadjar* ascribed to him is, as S. Nagelberg shows in the preface to his edition (*Kitāb al-Šaǵar*, Diss. Zürich, Kirchhain 1909), the work of Abū Zaid [q. v.] on which his lectures were based. This is probably also the case with the *Kit. al-Ashjār* mentioned among his works, which is probably his edition of the work of his teacher Abū 'Omar al-Zāhid (Berl. *Verz.*, Nº. 7014).

Bibliography: *Fihrist*, p. 84 and 35 sq.; Ibn Khallikān, ed. Wüstenfeld, nº. 193, and nº. 49, p. 65 *supra* (ed. de Slane, i. 456 sqq. and 105); al-Dhahabī, (Cod. Warner 654, iii. (*Cat.* ii. 120 sq.), p. 29 *infra* sq.; al-Suyūṭī, *Bughyat al-Wu'āt* (Cairo 1326) p. 231 sq.; Flügel, *Die gramm. Schulen d. Araber, Abhandl. d. Dtsch.*

Morg. Ges., ii. 230 *sqq.*; Brockelmann, *Gesch. d. arab. Litt.*, i. 125; and the literature given there.
(C. VAN ARENDONK.)

IBN KHALDŪN, 'ABD AL-RAḤMĀN and YAḤYĀ, two Arab historians, descendants of a Sevilla family, who migrated to Tunis about the middle of the vii[th] (xiii[th]) century and belonged to the Arab tribe of Kinda. Their ancestor Khālid, known as Khaldūn (whence the name Ibn Khaldūn for all members of the family) migrated from the Yemen to Spain in the iii[rd] (ix[th] century).

There his descendants filled various important administrative offices, some in Carmona and some in Seville. The fall of the Spanish Almohad kingdom and continued conquests of the Christians caused the Khaldūn family to migrate to Ceuta and the great grandfather of the two brothers 'Abd al-Raḥmān and Yaḥyā, al-Ḥasan, finally settled in Bona on the invitation of the Ḥafṣid Abū Zakariyā. The Ḥafṣid Emirs and Ra'īs showered favours on al-Ḥasan and his son Abū Bakr Muḥammad. The latter, who bore the title *'Āmil al-Ashghāl* "chief accountant", was strangled in prison. His son Muḥammad attained various important offices at the Ḥafṣid court. The latter's son, also called Muḥammad, declined all offices of state, although he remained in Tunis, in order to devote himself entirely to study and pious meditations; he died of the plague in 750 (1349) and left 5 sons of whom the eldest, Muḥammad, played no part either in literature or politics, while the two younger brothers, 'Abd al-Raḥmān and Yaḥyā, obtained renown as politicians and historians.

1. 'ABD AL-RAḤMĀN (ABŪ ZAID) surnamed WALĪ AL-DĪN, born in Tunis on the 1[st] Ramaḍān 732 (27[th] May 1332), died at Cairo on the 25[th] Ramaḍān 808 (19[th] March 1406), after learning the Ḳur'ān by heart, enjoyed the instruction of his father and the most prominent teachers of Tunis and devoted himself ardently to grammar, language, law and tradition and also to poetry. When the Marīnid Abu 'l-Ḥasan took Tunis in 748 (1347) 'Abd al-Raḥmān heard the lectures of the Maghribī scholars in the retinue of this prince and perfected his knowledge of logic, philosophy, dogmatic theology, canon law and other branches of Arab learning. The connections he made at this time with the scholars and high officials of the Marīnid court, later helped him to high offices at the court of Fās. When barely 21 he was appointed writer of the 'alāma of the king of Tunis, but left the office soon afterwards, when trouble broke out in the city, and fled to Biskra to Ibn Muznī, lord of Zāb. After the Marīnid Abū 'Inān had seized Tlemcen, and the whole country east as far as Bougie, 'Abd al-Raḥmān entered his service and took part in a campaign under a Marīnid general. Invited by the sulṭān at the request of scholars to Fās (755 = 1354) he went there, became secretary to Abū 'Inān and continued his studies under the best teachers of his time. In 757 (1356) he fell into disgrace and was twice imprisoned, the second time till the death of Abū 'Inān in 759 (1358). The new sulṭān Abū Sālim, appointed him secretary again (760 = 1359) and later chief ḳāḍī. After Abū Sālim's violent death he was again disgraced under the notorious vizier 'Omar b. 'Abd Allāh, but received permission to go to Granada (763-764 = 1361-1362), where he stayed at the court of the Banū 'l-Aḥmar and formed a friendship with the famous vizier Ibn al-Khaṭīb. Two years later, when this friendship had cooled down, he went to Bougie on the invitation of the ruler there, the Ḥafṣid Abū 'Abd Allāh, who appointed him his chamberlain (*ḥādjib*); at the same time he held the office of *khaṭīb* and a teaching post (766 = 1364). When in the following year Bougie fell to the ruler of Constantine 'Abd al-Raḥmān retired to Biskra. Soon afterwards he entered into communication with Abū Ḥammū II (q. v.), the 'Abdalwādid king of Tlemcen, sent him, as he tells us himself, his brother Yaḥyā as chamberlain and procured for him the support of various Arab tribes and the alliance with Abū Isḥāḳ, king of Tunis, and his son and successor Khālid. He then went himself to Tlemcen, but soon afterwards left the unfortunate Abū Ḥammū II in the lurch, when he was driven from his capital by the Marīnid sulṭān 'Abd al-'Azīz and offered his services to the latter. From his safe refuge in Biskra he continued to support 'Abd al-'Azīz against Abū Ḥammū while the Maghrib was tormented with wars and rebellions. He did not go to Fās till 774 (1372) and from there in 776 (1374) to Granada, but the sulṭān of Granada, at the instigation of the Marīnids, soon had him taken to Hunain, the harbour of Tlemcen. In Tlemcen he again found a friendly reception from Abū Ḥammū. He now resolved to shun the friendship of princes and retired to the Ḳal'a Ibn Salāma (Taughzūt) where he began his history and lived till 780 (1378). He then went to Tunis to consult several books which he required for his work. In 784 (1382) he set out on the pilgrimage to Mecca, but broke his journey in Alexandria and in Cairo where he lectured in the Djāmi' al-Azhar and later in the Ṣamḥiya and in 786 = 1384 was appointed Mālikī chief ḳāḍī by sulṭān al-Ẓāhir Barḳūḳ. Soon afterwards he lost his whole family and all his property by shipwreck and then devoted himself to pious works and completed his pilgrimage in 789 (1387). From 801 (1399) he was again chief ḳāḍī in Cairo with a short interruption and in 803 (1401) he accompanied the sulṭān al-Nāṣir to Damascus with the other ḳāḍīs on his campaign against Tīmūr. Returning to Cairo he again filled the office of ḳāḍī and held it till his death with several interruptions.

From these biographical notes we see that 'Abd al-Raḥmān perhaps showed a great and statesmanlike ability in the administration of important offices but that he never hesitated to leave one of his masters in the lurch and to enter the service of another, often the enemy of the former. We have further seen that he played a great part in the politics of North Africa and Spain and had very special opportunities of giving a considered judgment on what happened. His *Kitāb al-'Ibar* (Cairo 1284, in 7 vols.), in spite of the unequal value of the separate parts, is an important work for the history of his time. Although certain parts of this comprehensive history leave much to be desired in the presentation of facts and documentary value, others contain, in spite of some stylistic defects, very important documents for the study of history. His *History of the Berbers* will always remain a valuable guide for everything that refers to the life of the Arab and Berber tribes of the Maghrib and the mediaeval history of this country; it is the fruit of 50 years' (2[nd] half of the xiv[th] century) direct observation and industrious study of books and chronicles as well as diplomatic and of-

cial documents of his time. His *Muḳaddima* which deals "with all branches of Arab sciences and culture, remains, as regards the depth of thought, clearness of exposition and correctness of judgment undoubtedly the most important work of the age, which seems to be surpassed by no other work of a Muslim author".

Bibliography: for the biography of 'Abd al-Raḥmān cf. Autobiography, ed. and completed by de Slane (*Journ. As.*, 1844; printed in *Hist. des Berbères*, vol. i., and in the translation of the *Muḳaddima*, vol. i., Paris 1863); Müller, *Islam*, ii. 487, 607 *sq.*, 666—670; Brockelmann, *Gesch. der arab. Litt.*, ii. 242—245, and the literature given there.

2. YAḤYĀ, ABŪ ZAKARIYĀ, born in Tunis about 734 (1333), died at Tlemcen in Ramaḍān 780 (Nov.-Dec. 1378), like his brother and probably with him, devoted industriously to study in his native town and was intimate with all the important scholars of his time in the Ḥafṣid capital. To judge from his book, on which see below, he seems to have had a special preference for poetry and belles lettres. We know very little of his personality; the references are scattered in various sources, e.g. 'Abd al-Raḥmān's autobiography and that portion of the *Kitāb al-'Ibar* which deals with the history of the Berbers. This last book gives a detailed account of the murder of Yaḥyā in Tlemcen; Yaḥyā himself also gives a few details of his career in his *Bughyat al-Ruwwād*.

Yaḥyā's political life did not begin till 757 (1356), when he was with his brother (who was soon afterwards imprisoned) at the court of Abū Sālim, sulṭān of Fās, and the latter sent two Ḥafṣid emirs, his prisoners, from Tlemcen back to Bougie. He accompanied these two princes in place of his brother and acted as chamberlain to one of them, the emir Abū 'Abd Allāh. As the latter, in spite of a long siege could not regain Bougie, he sent Yaḥyā to Abū Ḥammū II, king of Tlemcen, to ask for his assistance (764 = 1362). Yaḥyā found a kindly reception in Tlemcen and his request was granted. After the Mawlid festival, which he attended there and commemorated in a poem, he went back to his master to bring him to the 'Abdalwādid court on the 8th Djumādā II (26th March 1363). Both returned to Bougie with a column of troops sent by Abū Ḥammū.

In 767 (1365-1366) the Ḥafṣid emir of Constantine, after taking Bougie, imprisoned Yaḥyā in Bona and confiscated his property; he escaped soon afterwards and went to Biskra to Ibn Muzni and his brother. It was probably at this time that he made the pilgrimage to the tomb of 'Oḳba, which he describes in his *Bughyat al-Ruwwād*. From Biskra he returned to Tlemcen at Abū Ḥammū's request, arrived there in Radjab 769 (Feb. 1368) and was appointed *Kātib al-Inshā'*. When he learned that Tlemcen was threatened by the Marīnids, he forgot the kindnesses shown him by Abū Ḥammū and left him (772 = 1371) to enter the service of the Marīnid sulṭān 'Abd al-'Azīz and afterwards of his successor Muḥammad al-Sa'īd. It was only after the capture of Fās al-Djadīd by Sulṭān Abu 'l-'Abbās in 775 (1373) that Yaḥyā returned to Tlemcen, where Abū Ḥammū again welcomed him and gave him his former secretarial office. He soon won the king's confidence again but thereby aroused the jealousy of the other court officials, notably Abū Ḥammū's eldest son and probable successor Abū Tāshfīn II. The latter with a few hired assassins fell upon Yaḥyā, as he was leaving the palace one night in Ramaḍān 780 (1378), and murdered him. When Abū Ḥammū learned that his son had been the instigator of the crime, he had not the courage to take steps against the murderers.

Although Yaḥyā's political career was shorter and less brilliant than that of his brother, yet it gave him the opportunity to write a historical work of great learning, the *Bughyat al-Ruwwād fī Dhikr al-Mulūk min Banī 'Abd al-Wād*. It was much used by Brosselard and Bargès in their history of Tlemcen and I have published the Arabic text with translation under the title *Histoire des Benî 'Abd al-Wâd, rois de Tlemcen* (2 vols., Algiers 1904—1913). His history of the kingdom of Tlemcen is particularly important for a knowledge of the long and in a way brilliant reign of Abū Ḥammū II, whose secretary and trusted adviser the writer was. In this capacity he was no doubt able to consult political documents and even quotes some in full in his book. Although the book neither covers so wide a field as his brother 'Abd al-Raḥmān's work nor shows such a lofty point of view or critical spirit, it is far superior in literary value. Yaḥyā reveals in it not only literary but also poetical skill, his elegant style is often lyrical and his narrative is adorned with quotations from the best old Arab writers. He gives us not only a sketch of the political history of the central Maghribī kingdom, he has also preserved for us in his work poems by contemporary court poets and gives information about scholars of his time and about the poetical meetings at the court of Tlemcen, all information hardly to be found elsewhere and affording a rather accurate glimpse into the intellectual life of the 'Abdalwādid capital in the xivth century. (ALFRED BEL.)

IBN KHALLIKĀN, AḤMAD B. MUḤAMMAD B. IBRĀHĪM, SHAMS AL-DĪN ABU 'L-'ABBĀS AL-BARMAKĪ AL-IRBILĪ AL-SHĀFI'Ī, an Arab author, born on the 11th Rabī' II 608 = 23rd Sept. 1211 at Arbela, studied from 626 under al-Djawālīḳī and Ibn Shaddād in Ḥalab and afterwards in Damascus. In 636 = 1238 he went to Cairo and became deputy of the chief ḳāḍī Yūsuf b. al-Ḥasan al-Sindjārī. In 659 = 1261 he went as chief ḳāḍī to Damascus, but lost his office, the tenure of which after five years was limited to the Shāfi'īs and after ten years abolished. After serving 7 years in Cairo as professor at the al-Fakhriya madrasa, he received his former office again but lost it for the second time in Muḥarram 680 = May 1281 and died on Saturday 26th Radjab 681 = 21st Oct. 1282 as professor at the Madrasa al-Amīniya. He began his chief work *Wafayāt al-A'yān wa-Anbā' Abnā' al-Zamān* in Cairo in 654 = 1256 but had to stop it during his work in Damascus and completed it on 13th Djumādā II 672 = 4th Jan. 1274. His autograph Ms. is in the Brit. Mus. (see *Catalogue*, N°. 1505, *Suppl.*, N°. 607; cf. Cureton, *Journ. Roy. As. Soc.*, vi., 1841, p. 225; Wüstenfeld, *Gött. Gel. Anz.*, 1841, p. 286. For us, as the majority of his predecessors are lost (cf. Wüstenfeld, *Ueber die Quellen des Werkes Ibn Challikani Vitae illustrium hominum*, Gött. 1837), it is one of the most important aids to the study of biography and literary history, s. *Ibn Challikani Vitae illustrium virorum nunc primum arab.* ed. F. Wüstenfeld, Gött. 1835—1843; *Vies des hommes*

illustres de l'Islamisme en Arabe, par Ibn Khallikān, publ. par M. G. de Slane, Paris 1838—1842 (only up to N⁰. 678), pr. Būlāḳ 1275, 1299, Cairo 1310, lith. Teheran 1284. Turk. transl. Stambul 1280. Ibn Khallikān's *Biographical Dictionary*, transl. from the Arabic, by M. G. de Slane, 4 vols., Paris, London 1843—1871.

His brother MUḤAMMAD BAHĀ' AL-DĪN, d. as ḳāḍī of Ba'albak in 683 = 1284, is probably the author of *al-Ta'rīkh al-akbar fī Ṭabaḳāt al-'Ulamā' wa-Akhbārihim*, s. *Bibl. Bodleianae Codd. Mss. Orient. Catalogus*, a J. Uri conf., Pars i. N⁰. 747; Wüstenfeld, *op. cit.*, N⁰. 359.

Bibliography: Birzālī (according to Ibn Khallikān's own statements) in Ulughkhānī, *An Arabic History of Gujarat*, ed. Ross, p. 184; Subkī, *Ṭabaḳāt al-Shāfi'iyya al-kubrā*, v. 14; Suyūṭī, *Ḥusn al-Muḥāḍara*, i. 320; Quatremère, *Mamlouks*, i. 2, 180 sq.; do. in the *Journ. IBN AL-KHAṢĪB. [See AL-KHAṢĪB.]

IBN AL-KHAṬĪB, DHU 'L-WIZĀRATAIN (holder of the two viziriates, *wizārat al-ḳalam*, vizier of the pen, secretary of state, and *wizārat al-saif*, vizierate of the sword, generalissimo = Grand Vizier, Prime Minister, cf. Dozy, *Supplement*) LISĀN AL-DĪN (*laḳab*) ABŪ 'ABD ALLĀH MUḤAMMAD B. 'ABD ALLĀH B. SA'ĪD B. 'ABD ALLĀH B. SA'ĪD B. 'ALĪ B. AḤMED AL-SALMĀNĪ (from the clan of the Yemeni Murād, Salmān, with an allusion to the name of Salmān al-Fārisī [q. v.]) a member of a family, which had migrated from Syria to Spain, Cordova, Toledo, Loja, Granada, and which had formerly been called Banū Wazīr, but Banū 'l-Khaṭīb after the elder Sa'īd al-Khaṭīb. Our Muḥammad is therefore usually only called Lisān al-Dīn b. al-Khaṭīb or Ibn al-Khaṭīb al-Salmānī; he was born on the 25ᵗʰ Radjab 713 = 15ᵗʰ Nov. 1313 probably in Loja (Arab. Lōsha, the ancient Ilipula Laus) below Granada on the Genil (Shindjīl = Singilis) on the western edge of the Vega (al-Mardj), but spent his youth in Granada, whither his father had moved as a court official of the Naṣrids and where he pursued various studies under able teachers with such success that he became the greatest and the last important author, poet and statesman of Granada, if not of the whole of Arab Spain. After the martyr death of his father in the battle of Tarifa (Ṭarīf) on the 7ᵗʰ Djumādā I 741 = 29ᵗʰ Oct. 1340, he entered the service of and studied under the learned vizier Abu 'l-Ḥasan 'Alī b. al-Djaiyāb, but the latter died of the great plague (the Black Death, *al-ṭā'ūn*) on the 23ʳᵈ Shawwāl 749 = 14ᵗʰ Jan. 1349 (cf. his biography in al-Maḳḳarī, Cairo 1302, iii. 222—240, iv. 55). Appointed his successor by Sulṭān Abu 'l-Ḥadjdjādj Yūsuf I (1333—1354), he continued in office after Yūsuf's murder under his son and successor Muḥammad V (1354 = 1359), after his dethronement in 1360 was a prisoner in Granada and then went with him into exile in Morocco (Ibn al-Khaṭīb lived in retirement in Salā) till 1362, when he returned to Granada as vizier when Muḥammad V was restored by the Marīnids (—1391), and lived in peace. To escape dangerous plots of his enemies he fled in 1371 from Gibraltar to Ceuta and Tlemcen to Sulṭān 'Abd al-'Azīz Abū 'l-Sa'īd (1366—1372) (of whom A. Müller, *Der Islam*, ii. 669 sqq., wrongly makes two persons, 'Abd al-'Azīz and Abū Sa'īd!). He was condemned as a heretic in Granada and his extradition demanded, but 'Abd al-'Azīz and his son and successor Muḥammad III al-Sa'īd (1372—1374) declined to deliver him up, while the pretender Abu 'l-'Abbās al-Mustanṣir set about it. While the case was being conducted in Fās by his pupil and successor as vizier of Granada, Abū 'Abd Allāh (Brockelmann, ii. 259, 'Ubaid Allāh) Muḥammad b. Zamrak (al-Maḳḳarī iv. 274—322), Ibn al-Khaṭīb was strangled in the night by assassins hired by Sulaimān b. Dā'ūd, the deputy of the vizier Muḥammad b. 'Uthmān in revenge for a private feud, who broke into his prison, an outrage at which the people were very indignant in the morning.

Of the 60 or so writings of Ibn al-Khaṭīb, chiefly historical, geographical, poetical, belle-lettristic, mystical, philosophical or medicinal in subject, about a third have survived on which see Pons Boigues, *Ensayo-bio-bibliográfico*, N⁰. 294 p. 334—347; Brockelmann, *Gesch. der arab. Litt.*, ii. 260—263, and their sources. The most important work for us is the extensive "history of Granada", *al-Iḥāṭa fī Ta'rīkh Gharnāṭa*, which however consists mainly of biographies of scholars, a critical edition of which from the scattered manuscripts and extracts with a translation is a desideratum. The edition of an abbreviation, Cairo 1319, 2 vols. (the 3ʳᵈ not yet published) is quite insufficient and very deficient as regards the Spanish names; on manuscripts cf. also *Cat. Cod. Arab. Bibl. Acad. Lugd. Bat.*, ii.² (1907), N⁰. 1001 sq. (p. 103 sq.). The historical works *al-Ḥulal al-marḳūma* and *al-Lamḥa al-badriyya fi 'l-Dawla al-Naṣriyya*, of which Casiri has given extracts in *Bibliotheca*, ii. 177—246 and 246—319, also deserve a critical edition and translation (the printed edition Tunis 1315, given by Brockelmann, ii. 710, is unknown to the writer; there is perhaps some confusion with the following). *Raḳm al-Ḥulal fī Naẓm al-Duwal* was printed at Tunis in 1316. *Khaṭrat al-Ṭaif fī Riḥlat al-Shitā' wa 'l-Saif* is said by Derenbourg (and Casiri, i. 136ᵇ) and Brockelmann, p. 262, to be a description of a journey to Africa, while the edition by M. J. Müller, *Beiträge*, i. 14—41, shows that it is a "journey by the prince Abu 'l-Ḥadjdjādj into the eastern provinces of Granada". (*al-Maḳāla*) *Muḳni'at al-Sā'il 'an al-Maraḍ al-Hā'il*, on the plague (*ṭā'ūn*), the Black Death of 749 = 1348-49, has been edited and translated in 1863 in the *Sitzungsber. der Bayr. Akad. der Wissenschaften* (in Casiri, Pons Boigues, and Brockelmann, called *Manfa'at al-Sā'il*). The *Mi'yār al-Ikhtiyār fī Dhikr al-Ma'āhid wa 'l-Diyār*, already completely published by M. J. Müller in *Beiträge*, i. 45—100, was again published in Fās 1325. Of the great collection of diplomatic documents in the ornate style, *Raiḥānat al-Kuttāb wa-Nudj'at al-Muntāb*, Mariano Gaspar Remiro in his periodical *Rev. del Centro de Estudios Histór. de Granada y su Reino* has given numerous texts and translations since 1912. *Mufākharat* (*Mufāḍalat*) *Mālaḳa wa-Salā* was edited by M. J. Müller, *Beiträge*, i. 1—13. Ḥabīb al-Zaiyāt's Catalogue of Damaskus mentions on p. 53 a *Rawḍat al-Ta'rīf bi 'l-Ḥubb al-Sharīf li-Lisān al-Dīn al-Khaṭīb*. Munich, N⁰. 421, contains a *Ḳaṣīda* by him. Munich, N⁰. 991 sqq., contain several copies by M. J. Müller. The mediocre edition of *al-Ḥulal al-mawshiya fī Dhikr al-Akhbār al-Mar-*

Fahrasiya, printed at Tunis in 1329, is wrongly ascribed to our author, cf. my remarks *Rev. del Centro etc.*, iv. 137 *sq.*; 14 very inaccurate pages on the biography of Ibn al-Khaṭīb, according to al-Makkarī and Ibn Khaldūn, are prefixed.

(C. F. SEYBOLD.)

IBN KHORDĀDHBEH, ABU 'L-ḲĀSIM 'UBAID ALLĀH B. 'ABD ALLĀH, an important geographer of Persian descent who was apparently born in the early years of the iii^rd^ century A. H. (c. 820). His grandfather had been a convert to Islām; his father had filled the high office of governor of Ṭabaristān. Little too is known of his own career; he held the important office of controller of the post and intelligence service (*Ṣāḥib al-Barīd wa 'l-Khabar*) in al-Djabal (Media); when and how he got this office cannot be ascertained. The Caliph al-Mu'tamid made an intimate friend of him; al-Mas'ūdī gives a discourse pronounced by him at court on musical instruments, song, rhythm, and dance. He owed his musical knowledge to Isḥāḳ al-Mawṣilī [q. v.] who had been a great friend of his father's. Of his works, some of which were of a learned character (e. g. on the genealogies of the Persians), some belonged to the domain of *Adab* (on game, music, wine, culinaria, boon companions), there has only survived the *Kit. al-Masālik wa 'l-Mamālik*, composed at the request of an 'Abbāsid prince, for which he was able to collect materials in the archives. It forms an important source for historical topography and was often used by later geographical writers (Ibn al-Faḳīh Ibn Ḥawḳal, al-Muḳaddasī, al-Djaihānī). This work first edited and translated by Barbier de Meynard (*Journ. Asiat.*, 1865) and again by de Goeje (*Bibl. Geogr. Arab.*, vi.) who used further mss., is, as the latter shows, not extant in a complete version. The investigations of de Goeje led to the conclusion that Ibn Khordādhbeh wrote his book about 232 (846-7) and then gradually increased it by additions so that a second edition appeared, which was not however completed before 272 (885-6).

According to Ḥādjdjī Khalīfa, Ibn Khordādhbeh died towards 300 (912-3).

Bibliography: de Goeje, *Bibl. Geogr. Arab.*, vi., *Preface*, and the references given there.

(C. VAN ARENDONK.)

IBN AL-ḲIFṬĪ, ABU 'L-ḤASAN 'ALĪ B. YŪSUF AL-ḲIFṬĪ, called DJAMĀL AL-DĪN, was born in 568 (1172) in Ḳifṭ [q. v.] in Upper Egypt, came early to Cairo where he was instructed in the most varied branches of Arab-Muslim learning, and continued his studies in Jerusalem, to which his father was summoned to an important office in 583 (1187). After spending about 15 years there he went to Aleppo, where he devoted himself entirely for ten years to his literary studies, until in 610 (1213) he was entrusted with the administration of finance, an office which he held till 628 (1230) except for a break in 613—616. After spending five years in private literary activity, he was appointed vizier by al-Malik al-'Azīz in 633 (1236) and held this high office till his death in 646 (1248). His official position gave him an opportunity of helping other scholars, in addition to his own literary activity. For example, he gave great assistance to Yāḳūt [q. v.] when he fled before the Mongols, for which the latter repeatedly shows his gratitude.

Of his numerous works, among which historical writings predominate, (a history of Cairo; a history of Yemen; a history of the Maghrib; a history of the Saldjūḳs etc.) only one has come down to us and that only in extracts. The original was probably called *Kitāb Ikhbār al-'Ulamā' bi-Akhbār al-Ḥukamā'*, while al-Zawzanī's synopsis is called *al-Muntakhabāt al-multaḳaṭāt min Kitāb Ta'rīkh al-Ḥukamā'*, usually quoted briefly as the *Ta'rīkh al-Ḥukamā'*. The work which was edited by J. Lippert (see Bibliography; also printed at Cairo in 1326), contains 414 biographies of physicians, astronomers, and philosophers from the earliest times to the days of the author and is of great value because it "forms an inexhaustible mine of information regarding the knowledge possessed by the Arabs of Greek literature and even gives information about Greek antiquity, which is no longer preserved in classical sources".

Bibliography: *Ibn al-Ḳifṭī's Ta'rīkh al-Ḥukamā'*, edited by Prof. Dr. Julius Lippert, Leipzig 1903, on materials collected by Aug. Müller (further sources given in the Introduction); Yāḳūt, *Irshād*, ed. Margoliouth, v. 477 *sqq.*

(E. MITTWOCH.)

IBN KILLIS, Fāṭimid vizier, ABU 'L-FARADJ YA'ḲŪB B. YŪSUF, called Ibn Killis, was a Baghdād Jew, an excellent business man, whose ability raised him to the highest civil post in the Fāṭimid empire. Born in 318 (930-1), he came early in life with his father to Syria and in 331 (942-3) to Egypt, where he began to play a part at Kāfūr's [q. v.] court and by his financial ability won an influential position in politics. He remained a Jew till 356 (967), when he adopted Islām, as he saw a chance of becoming vizier. Thanks to his intellectual ability and power of hard work, he soon became an authority on Muslim sciences. His increasing influence aroused the jealousy of the vizier Ibn al-Furāt, whose intrigues caused him to flee to the Maghrib. He returned to Egypt with Djawhar or Mu'izz. The Fāṭimid government could find no more capable and expert administrator of the country's economic policy and thus it happens that the great prosperity of the Nile valley under the Fāṭimids is associated with his name. The results of his budgets show, according to the sources, figures quite unknown before. But at the same time the country flourished, and the gratitude shown him, notably by 'Azīz, was well deserved. In Ramaḍān 368 (April 979) he was given the honorific title, al-Wazīr al-Adjall. Many pleasing features of Ibn Killis' character are described, although he is also said to have worked against his enemies with poison and other means. He was able to please the taste of the time in poetry and literature, in benevolence and in the splendour of his ménage, in external piety and learning; he wrote amongst other works a fiḳh book on the Fāṭimī rite (*Khiṭaṭ*, ii. 6). In any case, he was a financial genius and organiser of the first order. The internal administration of the Fāṭimid empire is said to have been created by him. In 373 (983-4) he fell for a time into disgrace, but was soon restored to his old office and died at the end of 380 (991), deeply regretted by the Caliph 'Azīz and all Egypt.

Bibliography: Isolated data in all the sources for the history of Kāfūr and the early Egyptian Fāṭimids [q. v.]. Longer notices, based on al-Musabbiḥī and al-Ṣairafī, in al-Maḳrīzī,

Khiṭaṭ, ii. 5; Ibn Khallikān (transl. de Slane), iv. 359; Ibn Taghrībirdī (ed. Popper), ii. 45.

(C. H. BECKER.)

IBN ḲOZMĀN, also called ABŪ BAKR B. ḲOZMĀN (Ibn Khaldūn, i. 524; al-Maḳḳarī, Index; al-Muḥibbī, *Khulāṣat al-Athar*, i. 108, is of course to be read b. Ḳozmān al-Maghribī or al-Ḳorṭubī in place of Abū Bakr Ḳozmān al-Mghrsānī), in Ibn Khāḳān, *Ḳalāʾid al-ʿIḳyān*, p. 187, and in Ibn Bassām with the title *al-Wazīr al-Kātib*, as well as in the unique copy of his *Dīwān* published in facsimile by Günzberg he is called *al-Wazīr al-Adjall* Abū Bakr Muḥammad b. ʿAbd al-Malik b. Ḳozmān, in Ibn al-Abbār, *Tuḥfat al-Ḳādim* (Casiri, i. 96ᵇ), and in Ibn al-Khaṭīb, *Iḥāṭa* (Casiri, ii. 77ᵇ), more accurately Abū Bakr b. ʿĪsā b. ʿAbd al-Malik b. Ḳozmān, died in 555 = 1160 (Tunis MS. of the *Iḥāṭa* more accurately the last night of 555 = 30 Dec. 1160). The quotation *Catalogus Lugduno-Batav.*, ii. 208, "*Ḳhaṣāʾiṣ fī ʿamal ṣināʿat al-munāsaba bil-Mutawakkil*" (cf. Ibn Khāḳān) shows that in his early youth he had been in the service of the last Afṭasid of Badajoz, al-Mutawakkil, who was overthrown by the Almoravids in 488 = 1094-5. From his home and usual abode, Cordova, he set out on constant journeys through Spain, chiefly to Seville and Granada where he met the learned poetess Nuzhūn (al-Maḳḳarī, ii. 636). The unfounded objection to the title *Wazīr*, raised by Rosen, *Notices sommaires*, p. 242, n. 2, and supported by Brockelmann, *Geschichte*, i. 272, n. 2, was refuted by Dozy in a letter to Rosen in 1881 (publ. in Günzberg's preface). Ibn Ḳozmān wrote popular *muwashshaḥa's* (q. v. and M. Hartmann, *Muwashshaḥ*, Index) but has also become the most important representative of another kind of popular poetry, which is based not on quantity but on accent, and occurring in various metres, the *zadjal* (q. v. and Dozy, *Supplément*), which had previously been used for short improvisations but was raised by him to the higher level of long ḳaṣīda-like pieces. Günzberg's (died 28ᵗʰ Dec. 1910) facsimile published in 1896 was not followed by any of his promised researches on the poet and his works. Codera has published some notes on the name Ḳozmān, which he thought to be Arabic rather than identical with the West Gothic Guzman, in his *Discursos leídos ante la Real Academia Española*, 1910: *Importancia de las fuentes árabes para conocer el origen del vocabulario en las lenguas y dialectos españoles desde el siglo VIII al XII*, p. 15, 43. We may specially note Julián Ribera y Tarragó's study in *Discursos leídos ante la Real Academia Española*, 1912, particularly on our *Dīwān* "*Cancionero de Abencuzmán*", in which he champions in his new thesis, a view in contradiction to that generally held by Arabic and Romance scholars (p. 50): "La clave misteriosa que explica el mecanismo de las formas poéticas de los varios sistemas líricos del mundo civilizado en la Edad Media está en la lírica andaluza, a que pertenece el Cancionero de Abencuzmán". On p. 25, n. 2, a joint study with Menéndez Pidal on the Spanish dialect of the Spanish words and phrases found in the 149 surviving poems is promised. Arabic and Romance scholars are all the more interested in the further detailed study of Ibn Ḳozmān's exceedingly important *zadjal* poems. A scholarly edition, translation and annotation of the *Dīwān* or *Cancionero* must be undertaken as soon as possible; the biographies of the poet in Ibn Bassām, Ibn al-Abbār and Ibn al-Khaṭīb must also be edited from the scattered manuscripts.

Bibliography: See above; cf. also Bustānī's *Encyclopédie arabe* (*Dāʾirat al-Maʿārif*), i. (1876), 648ᵇ, which follows Ibn Khāḳān except for the closing remark: date of birth and death are not mentioned, cf. also Semy-Bey in *Ḳāmūs al-Aʿlām*, p. 657ᵃ; Codera, *Decadencia y desaparición de los Almoravides en España*, p. 134.

(C. F. SEYBOLD.)

IBN ḲUTAIBA, ABŪ ʿABD ALLĀH MUḤAMMAD B. MUSLIM (often also called AL-ḲUTAIBĪ or AL-ḲUTABĪ) AL-KŪFĪ (from his birthplace) AL-MARWAZĪ (from his father's) AL-DĪNAWARĪ, an Arab author, born in 213 = 828 at Kūfa, was for a time ḳāḍī of Dīnawar in the province of Djibāl, then lived as a teacher in Baghdād and died there in Radjab 276 = Nov. 889 (according to others 270 or 271). In literary tradition he is regarded as the representative of the so-called mixed or eclectic Baghdād grammatical school. As a matter of fact however his activities, like those of his contemporaries, Abū Ḥanīfa al-Dīnawarī and al-Djāḥiẓ, covered the whole learning of his period. He sought to make available the lexical and poetical material which had been collected especially by the Kūfa grammarians, as well as historical information, for the requirements of the man of the world, particularly the *kuttāb*, who were then beginning to gain influence in the administration. But he also took part in the theological disputes of his time, and defended the Ḳurʾān and Tradition against the attacks of philosophic scepticism; but he himself fell under the suspicion of heresy and had to write a book against the Mushabbiha to defend himself against the reproach of belonging to them. His two most important philological works are *Kitāb Adab al-Kātib*, ed. M. Grünert, Leiden 1900, Cairo 1300, and the *K. Maʿānī ʾl-Shiʿr* in 12 books, probably the same as *Abyāt al-Maʿānī*, Aya Sofya, Nº. 4050. In *Adab*, p. 71, 11 he quotes his *Gharīb al-Ḥadīth*, Vol. i. and iii., Damascus, Ḥabīb al-Zaiyāt, *Khazāʾin al-Kutub* etc., p. 60, Nº. 54—55, the counterpart *Gharīb al-Ḳurʾān*, ib., p. 62, Nº. 33 (to the end of Sūra 26). His third work is the *Kitāb ʿUyūn al-Akhbār*, a model of the scholastic *adab* in 10 books, often imitated later, 1—4 ed. by C. Brockelmann, Berlin 1900, Strassburg 1903—1908. According to *ʿUyūn*, p. 12, 11 the following are supplementary to it: 1. *Kitāb al-Sharāb*, ed. A. Guy in *al-Muḳtabas*, ii (Damascus 1325 = 1907), p. 234—248, 387—392, 529—535; 2. *Kitāb al-Maʿārif*, *Handbuch der Geschichte*, ed. F. Wüstenfeld, Göttingen 1850, Cairo 1300; 3. *Kitāb al-Shiʿr*, *Liber Poesis et Poetarum*, ed. M. J. de Goeje, Lugd. Bat. 1904; 4. *Kitāb Taʿwīl al-Ruʾyā*, lost. Of his smaller philological works the *Kitāb al-Rahl wal-Manzil* still exists, ed. by Cheikho in *Dix anciens Traités de Philologie arabe*, Beyrouth 1908, p. 123—140. His two chief theological works are the *Kitāb Taʾwīl Mukhtalif al-Ḥadīth*, Cairo 1326 (cf. Goldziher, *Muh. Stud.*, ii. 136; Houtsma, *De Strijd* etc., p. 13), and *Kitāb Mushkil al-Ḳurʾān*, Hs. in Leiden, s. *Catalogus Codd. MSS. Ar.*, Nº. 1650, in Stambul, Köprülü Defteri, Nº. 211. Theological also is his *Kitāb al-Masāʾil wal-Djawābāt* on questions of Tradition, Hs. in Gotha, s. Pertsch, *Verz. der ar. Hdss. der herz. Bibl.* Nº. 636. The pseudohistorical *Kitāb al-Imāma wal-Siyāsa*, Cairo 1322 and 1327, is

ascribed to Ibn Ḳutaiba but, according to de Goeje, *Riv. Stud. Or.*, i. 415—421, was probably written in his life-time by a Maghribi or an Egyptian.

Men*, p. 771; Sam'ānī, *Kitāb al-Ansāb*, p. 443; Dhahabī in Grünert, *v. c.*, p. vii., n. 1; Suyūṭī, *Bughyat al-Wu'āt*, p. 291; Flügel, *Die gramm. Schulen*, p. 187—192; Wüstenfeld, *Geschichtschreiber*, N°. 73; Brockelmann, *Gesch. d. arab. Litt.*, i. 120 *sqq.*

(C. BROCKELMANN.)

IBN AL-ḲŪṬIYA, ABŪ BAKR MUḤAMMAD B. 'OMAR B. 'ABD AL-'AZĪZ B. IBRĀHĪM B. 'ĪSĀ B. MUZĀḤIM, usually known as Ibn al-Ḳūṭiya "the son of the Gothic woman" because his ancestor 'Īsā, a freedman of 'Omar b. 'Abd al-'Azīz, had married a Spanish princess named Sāra, a daughter of the Gothic king Oppas (Olemundo, according to Ibn Ḳūṭiya) and grand-daughter of Witiza. The latter had gone to Damascus to make a complaint to the Caliph Hishām b. 'Abd al-Malik against her uncle Ardabast. 'Īsā was sent with his wife to Spain and his descendants lived in Seville. Ibn Ḳūṭiya himself was born in Cordova and studied in Seville, the home of his family, under Muḥammad b. 'Abd Allāh b. al-Ḳūn, Ḥasan b. 'Abd Allāh al-Zubairī, Sa'īd b. Djābir etc. He then went to his native town and completed his studies under Ṭāhir b. 'Abd al-'Azīz, Muḥammad b. 'Abd al-Wahhāb b. Mughīth, Muḥammad b. 'Omar b. Lubāba, Ḳāsim b. Aṣbagh, Muḥammad b. 'Abd al-Malik b. Aiman etc. Among his pupils were the Ḳāḍī Abu 'l-Ḥazm Khalaf b. 'Īsā al-Washḳī and the historian Ibn al-Faraḍī. He was introduced to the Caliph al-Ḥakam II by Abū 'Alī al-Ḳālī, the author of the *Amālī*, as the greatest scholar of the land and put over the *shurṭa* of Cordova after holding for a time the office of ḳāḍī. He was a philologist, a grammarian, a historian and even a poet, but was reputed not to know much about Ḥadīth and law. Nevertheless people came to him for his advice on passages in Ḥadīth and legal points which offered special philological difficulties. He died at a great age in Cordova on Wednesday 23rd Rabī' I 367 = Nov. 6th 977.

He is the author of the following works: 1. *Ta'rīkh Fatḥ* (var. *Iftitāḥ*) *al-Andalus*, a history of Spain from the Muslim conquest to the reign of the Caliph 'Abd al-Raḥmān III, published by the Academy of Madrid in 1868; by Houdas in *Recueil de textes* etc., t. i., Paris 1889, p. 219—280, from the Ms. in Paris, de Slane, *Cat.*, n°. 1867 (from the same ms.: Cherbonneau, *Histoire du règne d'Elhakam fils de Hichâm*, *Journal As.*, 1853, i. 458 *sqq.*); 2°. *Kitāb al-Af'āl*, a catalogue of verbs of three and four radicals, ed. by Guidi, Leiden 1894: *Il libro dei verbi*.

Bibliography: Ibn Khallikān, *Wafayāt*, Cairo 1310, i. 512; Ibn al-Faraḍī, *Ta'rīkh 'Ulamā' al-Andalus*, p. 370, n°. 1316; al-Ḍabbī, *Bughyat al-Multamis*, p. 102, n°. 223; al-Tha'ālibī, *Yatīmat al-Dahr*, Damascus 1304, i. 411; al-Fatḥ b. Khāḳān, *Maṭmaḥ al-Anfus*, Constantinople 1302, p. 58; al-Suyūṭī, *Bughyat al-Wu'āt*, Cairo 1326, p. 84; Dozy, Ibn Adhārī, *al-Bayān 'l-Moghrib*, Introd., p. 28; Wüstenfeld, *Die Geschichtschreiber d. Araber*, p. 46, n°. 141; Pons Boigues, *Ensayo bio-bibliográfico*, 83, n°. 45; Brockelmann, *Geschichte d. ar. Litt.*, i. 150 *sq.*; Huart, *A Hist. of Arab. Litt.*, p. 188; Moh. Ibn Cheneb, *Ét. sur les pers. ment. dans l'Idjâza du Cheikh 'Abd al-Qâdir al-Fâsî*, p. 259, n°. 231.

(MOH. BEN CHENEB.)

IBN ḲUTLUBOGHA, ZAIN AL-MILLA WA 'L-DĪN ABU 'L-FAḌL AL-ḲĀSIM B. 'ABD ALLĀH, an Arab biographer and traditionist, a pupil of Ibn Ḥadjar [q. v.], b. 802 (1399), d. 879 (1474). Of his works detailed by Brockelmann, *Geschichte*, II. 82, Flügel has edited the biographies of the Ḥanafīs in the *Abhandl. f. d. Kunde der Morgenl.*, Vol. II.

IBN MĀDJA, ABŪ 'ABD ALLĀH MUḤAMMAD B. YAZĪD AL-ḲAZWĪNĪ, compiled one of the six canonical collections of traditions (*Sunan*, Dihli, 1282, 1289). He was born in 209 (824), travelled in 'Irāḳ, Arabia, Syria, and Egypt to collect traditions and died in 273 (886). According to Ibn Khallikān, he also wrote a commentary on the Ḳur'ān and a chronicle (*Ta'rīkh*).

Bibliography: Ibn Khallikān, *Wafayāt*, ed. Wüstenfeld, N°. 625; Brockelmann, *Gesch. der arab. Litt.*, I, 163.

IBN MAIMŪN, ABŪ 'IMRĀN MŪSĀ B. MAIMŪN B. 'ABD ALLĀH AL-ḲURṬUBĪ (AL-ANDALUSĪ) AL-ISRĀ'ĪLĪ is the Arabic name of Maimonides famed alike in Jewish theology, medicine, and philosophy. His Hebrew name was Rabbi Mōsheh ben Maimon and from the initial letters of this name he is shortly known as RaMBaM. In Arabic he had the honorary title al-Ra'īs (al-Umma or al-Milla), chief of the (Jewish) nation" the equivalent of the Hebrew Nāgīd. He is also called Mōsheh has-Z^emān, the "Moses of his time".

He was born at Cordova on March 30, 1135 where his father was a *daiyān* or judge in the ecclesiastical court. From him the boy received his education in Rabbinical studies and he was also taught Arab sciences by Muslim scholars. When he was 13, Cordova fell into the hands of the Almohades [q. v.] and Christians and Jews were not tolerated in the town; they were given the choice of migrating or adopting Islām. Maimonides left the town with his father (on his alleged conversion to Islām see below); the family led a nomadic life for a long time, even in Fez where they settled, their stay was not permanent. In 1165 they sailed for Palestine, reached 'Akkā, thence went to Jerusalem and finally settled down in Fusṭāṭ. Soon afterwards the father of Maimonides died, and he met with many other misfortunes. As he was unwilling to make a livelihood by a Rabbinical career, he decided to practise medicine. He soon made such a name that he won the particular confidence of Ṣalāḥ al-Dīn's vizier, al-Ḳāḍī al-Fāḍil al-Baisānī, who gave him his protection for the rest of his life. Ṣalāḥ al-Dīn and later his son made him court physician. He was so much sought after elsewhere as a doctor that it is difficult to see where he found the time for his manysided literary activity.

Ibn Maimūn died on Dec. 13th 1204. In accordance with his desire, his body was taken to Tiberias in Palestine. His tomb is still shown and visited there. All his works except one were written in Arabic and in so far as they were concerned with philosophy and medicine they were read and studied not only by his co-religionists but also by Muslim scholars and through the medium of Latin translations exercised a profound influence on the scholasticism of the Christian west (Albertus Magnus, Duns Scotus). His chief work on philosophy is

the *Dalālat al-Ḥā'irīn* "Guidance for those who are confused" (Hebr.: *Mōreh Nebhūkhīm*, Latin: *Doctor Perplexorum*), "by which those who have been confused between Reason and Revelation are to be brought back to a comforting harmony". No contradiction between the revealed scriptures and the principles of metaphysics as laid down by Aristotle and following him al-Fārābī [q. v.] and Ibn Sīnā [q. v.] can or may exist. All the anthromorphism of the Bible is interpreted in this light. We may here call attention to the concise synopsis of the teachings of Muslim theology and philosophy in this book.

The *Dalāla* soon found enthusiastic admirers but also bitter opponents, to whom it seemed too freethinking, and they used to call it *Ḍalāla*, temptation, by a slight variation in the name. It has been edited and translated by Salomon Munk as the *Guide des Égarés* (3 vol., Paris 1856—1866). Among his other philosophical works we shall only mention the *Maḳāla fī Ṣinā'at al-Manṭiḳ* (Hebr. *Millōth ha-Higgāyōn*).

His medical works in which he chiefly quotes Rāzī, Ibn Sīnā [q. v.], Ibn Wāfid, and Ibn Zuhr [q. v.], deal with haemorrhoids (*fi 'l-bawāsīr*), asthma (*fi 'l-rabw*), etc. His medical aphorisms, known as *Fuṣūl Mūsā*, are modelled on the Aphorisms of Hippocrates on which he wrote a commentary. He also wrote a treatise on the computation of the Jewish calendar.

Here we can only touch upon his thorough and fruitful work in the field of Jewish literature; we may mention three works, his commentary (*Sharḥ*) on the *Mishnāh* (later known as *Sirādj* "lamp"), his *Kitāb al-Sharā'i'* (Hebr. *Sepher ham-Miṣwōth*) in which he discussed all the orders and prohibitions of Jewish canon law, and particularly his *Mishnēh Thōrāh* (also called *Yad ha-ḥ*ᵉ*zāḳā*), a masterpiece of systematisation, in which he arranged for the first time all the vast material of Talmudic tradition — similar to the corresponding Muslim works — according to subject matter, and discusses it.

Ibn al-Ḳifṭī and Ibn Abī Uṣaibi'a say that Maimonides adopted Islām in Spain to avoid persecution and professed Islām in public but in secret practised Judaism. At a later date a certain Abu 'l-'Arab b. Ma'īsha is said to have accused him in Egypt of having recanted from Islām and gone back to Judaism. His powerful patron al-Ḳāḍī al-Fāḍil however declared that a forced conversion to Islām was not a conversion at all and so saved his life. Ibn al-Ḳifṭī's and Ibn Abī Uṣaibi'a's accounts — the latter however, as his *wa-ḳīla* shows, gives it under reserve — have no claim to historical accuracy. Quite apart from the fact that the biographical notices of Ibn Maimūn contain much else that is inaccurate, although according to Muslim law a recantation of Islām to save one's life is judged less severely than a voluntary one, on the other hand a compulsory convert to Islām is a full Muslim and his later secession would meet with the death sentence. The most convincing argument is the following. In the bitter struggle which arose round Ibn Maimūn's *Dalālat al-Ḥā'irīn* in which his enemies did not spare their insults and reproaches, not even his most bitter antagonist made this accusation against him. This would certainly have been the case if his conversion to Islām — which could not have remained concealed — had been a fact.

Review*, xiii., 1901, p. 539—541; Berliner, *Zur Ehrenrettung des Maimonides* in *Isr. Monatsschr., wissensch. Beilage z. Jüd. Presse*, 11 July 1901 (cf. further references there). (E. MITTWOCH.)

IBN MAKHLAD, the name of two viziers:

1. AL-ḤASAN B. MAKHLAD B. AL-DJARRĀḤ of Dair Ḳunnā, administrator of the domains from 243 (857-8) onwards. After the death of 'Ubaid Allāh b. Yaḥyā in Dhu 'l-Ḳa'da 263 (July 877) [see IBN KHĀḲĀN, 1.] al-Ḥasan was appointed vizier by al-Mu'tamid. At the same time he was secretary to the latter's brother al-Muwaffaḳ but after about a month he fled to Baghdād on the arrival of Mūsā b. Boghā in Sāmarrā, the capital of that time. Sulaimān b. Wahb then took over the vizierate and his son 'Ubaid Allāh the secretaryship. In Dhu 'l-Ḳa'da of the following year (July 878) Sulaimān was dismissed and his house plundered, whereupon Ḥasan was made vizier a second time on the 27th of the same month (31st July). In Dhu 'l-Ḥidjdja (August 878) Sulaimān regained his freedom; Ḥasan fled and his property was confiscated.

Bibliography: Ṭabarī, iii., see Index; Ibn al-Athīr (ed. Tornberg), vii., particularly 54, 215, 219; Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 343 *sq.*; Weil, *Gesch. der Chalifen*, ii. 367, 406 *sq.*, 424.

2. ABU 'L-ḲĀSIM SULAIMĀN B. AL-ḤASAN, son of the preceding, secretary of state from 301—311 (913—923). After the dismissal of Ibn Muḳla [q. v.] in Djumādā I 318 (June 930) Sulaimān was made vizier by the Caliph al-Muḳtadir. The experienced 'Alī b. 'Īsā [s. IBN AL-DJARRĀḤ, 2] supported him by word and deed; Sulaimān was not fit for his difficult position and as there was a want of money and his attitude did not make him popular, he was dismissed on the 24th Radjab 319 (12th August 931). In 324 (935-6) al-Rāḍī dismissed the vizier Abū Dja'far Muḥammad al-Karkhī and appointed Sulaimān his successor; but as the disorder increased the Caliph had to turn to Ibn Rā'iḳ [q. v.] and Sulaimān was dismissed for a second time. At the end of 328 (Oct. 940) he regained his office and after the death of al-Rāḍī in Rabī' I 329 (Dec. 940) he was recognised as vizier by his successor al-Muttaḳī. He administered his office in name only however, and was only able to hold it for four months after the accession of al-Muttaḳī.

Bibliography: 'Arīb, ed. de Goeje, p. 42, 113, 150 *sqq.*; Ibn al-Athīr (ed. Tornberg), Index; Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 372, 382 *sqq.*; Weil, *Gesch. der Chalifen*, ii. 566, 628 *sqq.*

(K. V. ZETTERSTÉEN.)

IBN MĀKŪLĀ, ABU 'L-ḲĀSIM HIBAT ALLĀH B. 'ALĪ B. DJA'FAR AL-'IDJLĪ, called IBN MĀKŪLĀ, vizier to the Būyid Djalāl al-Dawla, born in 365 (975-6). Djalāl al-Dawla appointed him vizier in 423 (1032) but soon afterwards dismissed him. His successor Abū Sa'd Muḥammad b. al-Ḥusain b. 'Abd al-Raḥīm only held the office a few days; as he was attacked and ill-treated by the Turkish mercenaries in the capital, he had to go into hiding. Ibn Mākūlā received the office again. In 424 (1033) Djalāl al-Dawla had to flee to al-Karkh; the vizier followed him and was soon afterwards again replaced by Abū Sa'd. Next year Djalāl al-Dawla dismissed the latter, and Ibn Mākūlā resumed the office although only for a few days. In 426 (1034-1035) the same thing occurred again. Abū Sa'd who was again made vizier, set out against Fāris b. Muḥammad [q. v.] and Ibn Mākūlā again became vizier. On this occasion he held the office for two months and eight days. He was then driven out by the troops and Abū Sa'd became vizier. After a year or two Ibn Mākūlā was handed over to the 'Uḳailid Ḳarwāsh b. al-Muḳallad, who imprisoned him in Hīt. Here he died in 430 (1038-1039) after being in prison for two years and five months.

Bibliography: Ibn al-Athīr (ed. Tornberg), ix. 288, 293 sq., 298, 302, 317.

(K. V. ZETTERSTÉEN.)

IBN MĀLIK, DJAMĀL AL-DĪN ABŪ 'ABD ALLĀH MUḤAMMAD B. 'ABD ALLĀH B. MUḤAMMAD B. 'ABD ALLĀH B. MĀLIK, better known as IBN MĀLIK, was born, contrary to the assertion of Brockelmann and those who follow him, in Spain, at Jaen in 600 = 1203-4; some say that he was born a year or two later. He studied in his native town with Abu 'l-Muẓaffar (and Abu 'l-Ḥasan) Thābit b. Khiyār surnamed Ibn al-Ṭailasān, Abū Razīn b. Thābit b. Muḥammad b. Yūsuf b. Khiyār al-Kulā'ī of Niebla, Abu 'l-'Abbās Aḥmad b. Nawwār, Abū 'Abd Allāh Muḥammad b. Mālik al-Murshānī, etc. He then went to the east and studied under the grammarians Ibn al-Ḥādjib, Ibn Ya'īsh, Abū 'Alī al-Shalūbīn. At Damascus he studied *ḥadīth* under Mukram, Abu 'l-Ḥasan b. al-Sakhāwī, etc. Among his pupils we may mention his son Badr al-Dīn Muḥammad who commented on several of his father's grammatical works, the chief ḳāḍī Badr al-Dīn Ibn Djamā'a, the poets Bahā' al-Dīn b. al-Naḥḥās al-Ḥalabī, the jurist Abū Zakariyā al-Nawawī, the Shaikh Abu 'l-Ḥusain al-Yūnīnī, etc. After completing his studies he began to teach grammar in Aleppo, became imām of the al-'Ādiliya at Aleppo, later taught at Ḥamāt, and finally at Damascus where he died on the 12th Sha'bān 672 = 21 Febr. 1274. He was a Mālikī but on going to the east became a Shāfi'ī. Ibn Mālik was considered a great philologist, whose reputation almost overshadowed that of Sībawaihi. On examining his works and the appreciations of them by his friends and criticisms by his enemies, one can say that he rendered a real service to the study of grammar by coordinating and simplifying the rules, although he may very occasionally be reproached with a want of that clearness and simplicity, which is necessary in didactic works.

He wrote the following works: 1. *Kit. Tashīl al-Fawā'id wa-Takmīl al-Maḳāṣid*, a manual of grammar the conciseness of which verges on obscurity, publ. at Fās in 1323; 2. *al-Kāfiya al-Shāfiya*, treatise on grammar in 2757 or 3000 *radjaz* verses, Krafft, *Die arab. . . . Hss. der . . . Ak.* zu *Wien*, N°. 31; Algiers Fagnan, *Cat.*, N°. 67. 1; Algiers Grand Mosque, N°. 14, iii (fragm.); 3. *Kit. al-Khulāṣa al-alfiyya* also called shortly *Kit. al-Alfiyya*, a résumé in 1000 *radjaz* verses of the preceding, publ. at Beyrouth in 1888, Cairo 1306, 1307, etc., Lahore 1888; de Sacy has published an edition with French commentary (*Alfiyya ou la quintessence de la gr. ar.*, Paris—London 1833) and has translated 8 chapters in his *Anthologie gramm.*, Paris 1829, pp. 134—144, and 315—347 of the transl.; L. Pinto, *L'Alfiyya trad. en fr. avec le texte en regard et des notes explic. dans les deux langues*, Constantine 1887; A. IBN MANẒŪR, DJAMĀL AL-DĪN ABŪ 'L-FAḌL MUḤAMMAD B. MUKARRAM AL-KHAZRADJĪ AL-IFRĪḲĪ, Arab philologist, born in 630 (1232), died in 711 (1311). He is the author of the celebrated Arabic dictionary *Lisān al-'Arab*, ed. Būlāḳ 1299—1308, 20 vol.

Bibliography: Brockelmann, *Gesch. d. arab. Litt.* ii. 21.

IBN MARDANĪSH, ABŪ 'ABD ALLĀH MUḤAMMAD B. AḤMAD (the latter usually omitted; correct in Ibn Khaldūn, iv. 166; the nephew of 'Abd Allāh b. Muḥammad b. Sa'd, who fell in the battle of Albacete in 540 = 1146, cf. *Zeitschrift d. Deutsch. Morgenl. Ges.*, lxiii. 1909, p. 352) b. SA'D B. MUḤAMMAD B. AḤMAD B. MARDANĪSH AL-DJUDHĀMĪ (according to others, al-Todjībī) was born 518 = 1124-5 at Banushkala = Banishkola = Peñiscola between Tortosa and Castellon de la Plana; died on 29[th] Radjab 567 = 27[th] March 1172. In spite of the *nisba*, he was apparently of Spanish descent as his great-great-great grandfather after whom he is usually called for short, was called Martinus or Martinez "the son of Martin", so that Mardanīsh seems to be a corruption of Mardinash, (for Arabic *d* from *t* cf. Emerita = Mārida, Mérida) in spite of Codera's doubt about Dozy's derivation; it is much more difficult to agree with his suggestion of the Byzantine Mardonius. The popular etymology from *merda*, Arabic *'adhira*, "excrement" in Ibn Khallikān, *Biographical Dictionary*, iv. 473, is of course a mere play on words. On the collapse of Almoravid rule the unusually capable tyrant Ibn Mardanīsh made himself master of Valencia and Murcia in 540 = 1146 and by further conquests (Guadix, Jaen a vassal principality of his father-in-law Ibn Hamoshk = Hamochico, Ubeda, Baeza, Almeria etc.) he became king of the whole of South-eastern Spain. As Rey Lobo or Lope, often in coalition with the Christian rulers of Castile, Aragon, and Barcelona, he was able to resist the advance of the Almohad 'Abd al-Mu'min (died 1163) and his son Yūsuf (died 1189), till the treachery of his father-in-law in the last years of his life. He died in 1172 during the siege of his capital Murcia; his sons then surrendered and secured lucrative positions for themselves, while the whole of Muslim southern Spain became Almohad.

(C. F. SEYBOLD.)

IBN MĀSAWAIH, or IBN MĀSŪYA (MESUA in Latin translations of the middle ages), ABŪ ZAKARIYĀ' YUḤANNĀ (YAḤYĀ), a christian physician, whose father was a druggist at Djundīshāpūr. In the reign of Hārūn al-Rashīd he was engaged in translation work and studied medicine under Gabriel b. Bakhtīshū' [q. v. i. 602[a] *supra*], the Caliph's court physician. In the reign of al-Ma'mūn he himself was appointed to this office and held it till his death in 243 (857). Among his pupils was Ḥunain b. Isḥāḳ [q. v.] for whom he wrote his *al-Nawādir al-ṭibbīya*. A Latin translation, ascribed to John of Damascus, appeared at Basle in 1579, as a supplement to the *Aphorismi Maimonidis*, p. 528—542. He also wrote a number of treatises, the titles of which Leclerc gives from Ibn Abī Uṣaibi'a. In the Library at Bankipore, there is a copy of his *Kitāb al-Mushadjdjar*.

Bibliography: *Fihrist*, p. 295; Ibn Abī Uṣaibi'a, i. 175 sqq.; Ibn al-Ḳifṭī, *Ta'rīkh al-Ḥukamā'*, ed. Lippert, p. 380 sqq.; Brockelmann, *Geschichte der arab. Litt.*, i. 232; Steinschneider, *Die arab. Übersetzungen aus dem Griechischen* etc., in *Virchows Archiv*, vol. 124; *Catal. Bankipore*, iv. N[o]. 1.

IBN MAS'ŪD, 'ABD ALLĀH, B. GHĀFIL B. ḤABĪB B. SHAMKH B. FĀ'R B. MAKHZŪM B. ṢĀHILA B. KĀHIL B. AL-ḤĀRITH B. TAMĪM B. SA'D B. HUDHAIL, a Companion of the Prophet. Like many of Muḥammad's first adherents he belonged to the lowest stratum of Meccan society. As a young man he herded cattle for 'Oḳba b. Abī Mu'aiṭ; Sa'd b. Abī Waḳḳāṣ at a later date in a polemic calls him a Hudhailī slave (Ṭabarī, i. 2812). He is usually described as a client (*ḥalīf*) of the Banū Zuhra; his father is also so described. Nothing more is known of the latter; 'Abd Allāh's brother 'Otba and his mother Umm 'Abd bint 'Abd Wudd b. Sawā' belong to the older Ṣaḥāba so that he is called by al-Nawawī (ed. Wüstenfeld, p. 370) Ṣaḥābī b. Ṣaḥābīya. His conversion is given as a miracle. When Muḥammad and Abū Bakr were fleeing before the heathens (on what occasion is not stated), they met 'Abd Allāh who was herding sheep. Their request for some milk was refused out of conscientiousness. Muḥammad then took a ewe lamb and stroked its udder which swelled and yielded an abundant flow of milk; he then made it resume its former size.

'Abd Allāh is regarded rightly as one of the first converts; he was fond of calling himself the "sixth of six" (Muslims); according to other traditions, he was converted before Muḥammad entered the house of Arḳam, or even before 'Omar. He is said to have been the first to recite the Ḳur'ān openly in Mecca, although his friends found him unfit for the task, as he did not have his clan with him for protection; he was therefore badly received. Of course he went to Abyssinia, according to some traditions twice.

In Medina he lived behind the great mosque; he used to be so often seen entering Muḥammad's house with his mother that strangers thought they were members of the family. But 'Abd Allāh was only the faithful servant "of the slippers, the cushion, and the dung hill". He imitated his master in externals; but was often mocked for his thin legs. He wore his red hair, which he did not dye, very long; this peculiarity as well as his white garments and his constant use of scent are probably to be attributed to religious views. He laid great value on the *ṣalāt* and fasted relatively little to preserve his strength for the divine service.

He took part in all the *maghāzī*; at Badr he cut off the head of the severely wounded Abū Djahl and carried it in triumph to his master. He

was also one of those to whom Paradise was promised by the Prophet. When Abū Bakr during the Ridda thought it necessary to make Medina capable of defence, 'Abd Allāh was one of the men chosen to guard the weak points of the town. He was also present at the battle of the Yarmūk.

He was naturally as little fitted to rule as any other representative of the pious of Medina. 'Omar sent him to Kūfa as administrator of the public treasury and as a teacher of religion. He was much consulted on account of his knowledge of the Ḳur'ān and Sunna; he is said to be the authority for 848 traditions; it was a peculiar feature of his that in giving information about the Prophet, he trembled, the sweat even broke out on his forehead and he used to express himself with great caution, lest he should say anything incorrect. His authority is relied upon for a mild interpretation of the interdiction of wine (Goldziher, *Vorlesungen*, p. 65, and *'Uyūn al-Akhbār*, ed. Brockelmann, p. 373 sq.).

The accounts of his end are contradictory. It is said that 'Omar deprived him of his office in Kūfa. When the news came, the people wished however to keep him. He then said: "Leave me: if there must be offences (*fitan*), I will not be the instigator of them" (cf. Matthew, xviii. 7). He is said to have returned to Medina and to have died there in 32 or 33 A. H. over 60 and to have been buried by night on the Baḳī' al-Gharḳad.

When 'Othmān visited him on his deathbed and solicitously asked how he was and what were his desires he is said to have given answers which are typical of ancient piety. He appointed al-Zubair his executor and expressed a desire to be buried in a *ḥulla* with 200 dirhams.

According to others, however, he died in Kūfa and was not dismissed from office in 26 along with Sa'd b. Abī Waḳḳāṣ by 'Othmān.

'Abd Allāh is best known as a traditionist and authority on the Ḳur'ān. His traditions are collected in *Musnad Aḥmad*, i. 374—466.

(A. J. WENSINCK.)

IBN MISKAWAIH (properly MISKAWAIH), ABŪ 'ALĪ AḤMAD B. MUḤAMMAD B. YA'ḲŪB, philosopher and historian; Yāḳūt simply calls him Miskawaih, without *Ibn*, and says that he was a Magian converted to Islām, which can hardly be correct in view of the name of his father and grandfather and his mistake is probably due to his wrongly giving the name Miskawaih to the philosopher instead of his grandfather. The latter may really have been a converted Magian. Little is known of his career. We know that he was secretary and librarian to the vizier al-Muhallabī [q. v.] and afterwards enjoyed the favours of the vizier Ibn al-'Amīd [q. v.] and his son Abu 'l-Fatḥ in the reigns of the Būyids 'Aḍud al-Dawla and Ṣamṣām al-Dawla, and held an influential position in al-Raiy. At first he seems to have been much occupied with philosophy, medicine, and alchemy; his history called *Tadjārib al-Umam* (a complete edition in a photographic reproduction is appearing in the *Gibb Memorial Series*, vii., under the editorship of L. Caetani; de Goeje edited a portion in 1871, *Fragmenta Historicorum Arabicorum*, ii.), comes down to 369 (979-980), although Ibn Miskawaih lived till 421 (1030). He carried on a literary correspondence with Abū Ḥaiyān [q. v.] and al-Hamadhānī [q. v.]. Ibn al-Ḳifṭī (see *Ḳifṭī*) gives the titles of his writings on medicine. But he was mainly concerned with ethics and wrote several works on this subject, of which we may here mention the *Tahdhīb al-Akhlāḳ wa-Taṭhīr al-A'rāḳ*, ed. Constantinople 1298, 1299, Cairo 1307, and a collection of ethical aphorisms by Persian, Indian, Arab and Greek sages, the first part of which is based on the Persian *Djāwīdān Khirad* ("eternal Reason"). A Persian lithographed edition was produced in 1240 by Maniḳdjī; as early as 1640 Elichman published from the Greek section the *Tabula Cebetis*, new edition by Basset *Le tableau de Cébès, vers. arabe d'Ibn Miskawaih* etc., Algiers 1898. Leclerc also mentions a Spanish translation of Lozano 1793. On the Persian *Djāwīdān Khirad* cf. Ethé in the *Grundriss der iran. Philologie*, ii. 346, and Inostrantzev in *Zapiski Vost. Otd. Imp. Arch. Obshč.*, xviii, 180 sq., and in *Sasanidskie Etiudi*, p. 22 sqq. A general appreciation of Ibn Miskawaih's philosophical works, in de Boer, *History of Philosophy in Islam*, p. 128 sqq.

Bibliography: (in addition to references in the article): Ibn al-Ḳifṭī, *Ta'rīkh al-Ḥukamā'*, ed. Lippert, p. 331; Yāḳūt, *Irshād*, ed. Margoliouth, ii. 89 sqq.; Amedroz, *Note on the Historian* in Caetani's edition, i. p. xvii. sqq.; Brockelmann, *Gesch. d. arab. Litt.*, i. 342.

IBN AL-MUḲAFFA', ABŪ 'AMR (afterwards ABŪ MUḤAMMAD), the "son of the cripple", an Arab author of Persian origin, whose real name was Rōzbih son of Dādōye; his father, a native of Djūr (Fīrūzābād, so correct *Fihrist*, i. 118) in Fārs, who was entrusted with the collection of taxes in 'Irāḳ and Fārs under the governorship of al-Ḥadjdjādj b. Yūsuf, was accused of extortion in the exercise of his duty; he was put to the torture and his hand remained maimed, whence his surname. His son, entering the service of 'Īsā b. 'Alī, paternal uncle of the Caliphs Abu 'l-'Abbās al-Saffāḥ and al-Manṣūr, abjured Mazdaism, and became a convert to Islām. He was entrusted with the drawing up of the act of amnesty accorded by the second of these Caliphs to his uncle 'Abd Allāh, but was accused of having cleverly turned the language in a way not entirely pleasing to his sovereign; the latter vowed vengeance and sent secret orders to Sofyān b. Mu'āwiya al-Muhallabī, governor of Baṣra, to put the culprit to death; his limbs were cut off one by one and thrown into a blazing furnace. Ibn al-Muḳaffa''s orthodoxy was suspected and the suspicion that he continued to practise Mazdaism in secret contributed to his fall. This event took place about 139 = 757.

Ibn al-Muḳaffa' translated from Pehlevi into Arabic the book of *Kalīla wa-Dimna*, brought from India by the physician Burzōye in the reign of Khosraw I Anōshak-Rawān (cf. the article KALĪLAH), and the *Khwadāi-nāma* (Book of Lords), a collection of biographies of Persian kings, under the title *Siyar Mulūk al-'Adjam*, which was one of the sources of the *Shāh-nāma* of Firdawsī (many fragments in Ibn Ḳutaiba, *'Uyūn al-Akhbār*). He wrote in Arabic *al-Durra al-Yatīma fī Ṭā'at al-Mulūk*, "on the obedience due to kings" (pr. Cairo s. d. [1895], 1326, and 1331); *al-Adab*

al-ṣaghīr (transl. by O. Rescher, Stuttgart 1915) on morals, and other short treatises published at the same time as the *Durra*, *al-Adab al-kabīr* was published by Aḥmad Zakī-Pasha (Cairo 1330 = 1912).

Bibliography: *Fihrist*, i. 118; Ibn Khallikān, N°. 186, transl. de Slane, i. 431; *Khiṭaṭ al-Adab*, iii. 459; Muḥammad Kurd 'Alī, *Rasā'il al-Bulaghā'*, 2nd ed. (Cairo, 1331 = 1913), p. 6 *sq.*; S. de Sacy, *Calila et Dimna* (1816), p. 10 *sqq.*; Brockelmann, *Geschichte der arab. Litteratur*, i. 151; Th. Nöldeke, *Burzōe's Einleitung* (Strassburg 1912); Cl. Huart, *Littérature arabe*, p. 211, and *Journal Asiatique*, 10th ser., t. xvii (1911), p. 554. (Cl. Huart.)

IBN al-MUKAFFA', Abu 'l-Bashar, the Arab name of Severus, Monophysite bishop of Ushmūnain, a contemporary of the Copt patriarch Philotheos (979—1003). Nothing is known of his life except that he was authorised by the Fāṭimid Caliph al-Mu'izz to dispute with the ḳāḍīs on religious questions (Huart, *Hist. des Arabes*, i. 344). He wrote a history of the dignitaries who had occupied the patriarchal see of Alexandria, which forms the basis of Abbé Renaudot's *Historia Patriarcharum Alexandrinorum Jacobitarum* (Paris 1713). The municipal library of Hamburg possesses the most ancient Ms. (1266) which only contains however, although in a more complete form than the usual text, the first part from St. Mark to Michael I (61—767), published in the original text by Chr. F. Seybold (vol. iii. of the *Veröffentlichungen aus der Hamburger Stadtbibliothek*, 1913; Brockelmann, *Katal. d. orient. Hss. der Stadtbibl. zu Hamburg*, vol. i. p. xiii. and 160 *sqq.*; A. v. Gutschmid, *Kleine Schriften*, ii. 511). Seybold had already published an edition of the text in the *Corpus Script. Christian. Orientalium* (*Script. arabici*, iii. Series, Vol. ix. fasc. 1 et 2, Paris and Leipzig, 1904—1910), as had Evetts in the *Patrologia Orientalis* (Vol. i., fasc. 2, 4, *History of the Patriarchs of the Coptic Church of Alexandria*). The Ms. Paris Bibl. Nat., *Cat.*, N°. 303, gives the order of the patriarchs from the 49th, Mark II (799—819) to Sanuthios (1032—1046). His "History of the four first Councils" has been published in Arabic, Ethiopic, and French by L. Leroy and S. Grébaut in Vol. vi. of the *Patrologia Orientalis* of R. Graffin and F. Nau. It is an apologia for the Monophysite doctrine. There are other works by him in Ms. in Paris and the Vatican.

Bibliography: Brockelmann, *Gesch. der christl. Litteraturen des Orients* (Leipzig, 1907), p. 71; G. Graf, *Die christlich-arabische Literatur*, Freiburg in Breisgau, 1905, p. 42—46; Baumstark, *Die christl. Literaturen des Orients* (Sammlung Göschen 1911), ii. 11, 24, 31—32, 55. (Cl. Huart.)

IBN MUḲLA, Abū 'Alī Muḥammad b. 'Alī b. al-Ḥasan b. Muḳla, an 'Abbāsid vizier, born in Baghdād in 272 (886). He was first of all collector of taxes in a district of Fārs, but in the middle of Rabī' I 316 (May 928) he was appointed vizier by al-Muḳtadir. After two years of beneficial activity, he was dismissed on Djumādā I 318 (June 930) because he was on intimate terms with Mu'nis, the chief of the Praetorians, whom the Caliph hated, and his enemy the chief of police, Muḥammad b. Yāḳūt, had him arrested and burned his house. After a considerable sum had been extorted from him, he was banished to Fārs. In Dhu 'l-Ḥidjdja 320 (Dec. 932) the Caliph al-Ḳāhir restored him to office. But Ibn Muḳla soon began to intrigue against Ibn Yāḳūt and when he also planned the deposition of the Caliph, the plot was betrayed. Ibn Muḳla had to save himself by flight and the vizierate was given to his secretary Muḥammad b. al Ḳāsim. After his fall he conducted a vigorous campaign for the deposition of al-Ḳāhir and wandered about the country in disguise, stirring up hatred of the Caliph. When al-Rāḍī ascended the throne in Djumādā I 322 (April 934), Ibn Muḳla was appointed by him vizier; the real ruler however was the commander-in-chief of the army, Muḥammad b. Yāḳūt. Although Ibn Muḳla did succeed by his intrigues in overthrowing the powerful favourite of the Caliph in the following year, as a result of an unfortunate campaign against Mōṣul, where the Ḥamdānid Ḥasan b. Abi 'l-Haidjā' 'Abd Allāh had set himself up as an usurper, he was at the same time preparing his own fall. In the middle of Djumādā I 324 (April 936) he was attacked and taken prisoner by al-Muẓaffar b. Yāḳūt, Muḥammad's brother. The Caliph was forced to approve and the vizier was dismissed, but received his freedom on payment of 1 000 000 dīnārs. After a few years, he was appointed vizier, in name at least, for the fourth time [see ibn al-Furāt, 3]. But when he began to intrigue against the powerful 'Amīr al-Umarā' Muḥammad b. Rā'iḳ, the latter learned of it and had him seized in Shawwāl 326 (Aug. 936) and frightfully mutilated. According to the usual statement, Ibn Muḳla died in prison on Shawwāl 10th 328 (19th July 940). He was also known as a scholar and as one of the founders of Arab calligraphy.

Bibliography: Hilāl al-Ṣābi', *Kitāb al-Wuzarā'* (ed. Amedroz), *passim*; Ibn Khallikān (ed. Wüstenfeld), N°. 708 (transl. by de Slane, iii. 266 *sqq.*); Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. IBN al-MUNDHIR, Abū Bakr, chief of the stables and chief veterinary surgeon to Sulṭān al-Nāṣir b. Ḳalā'ūn, died 741 (1340) author of the *Kāmil al-Ṣinā'atain al-Baiṭara wa'l-Zarṭaḳa* (or *Kashf al-Wail fī Ma'rifat Amrāḍ al-Khail*), which is called *al-Nāṣirī* in honour of the Sulṭān and is usually quoted by this name. M. Perron has translated it with a full introduction in a volume entitled: *Le Nâcérî. La perfection des deux arts ou traité complet d'hippologie et d'hippiatrie arabes, trad. de l'arabe d'Abou Bekr Ibn Bedr*. The first volume appeared in 1852, it is introductory and contains a wealth of information about the Arab horse, al-Nāṣir's particular services to horse breeding in Egypt, and a collection of passages from poems; the second volume (1859) is the translation of the hippology, and the third (1860) of the hippiatry. J. v. Hammer-Purgstall in his treatise *Das Pferd bei den Arabern* criticises the introduction in a very high-handed fashion, but did not live to deal with the others; but it may well be doubted if this critic possessed the scientific, particularly veterinary, knowledge to enable him to surpass Perron's meritorious work. The book

is a valuable corpus of information and the first collection of widely scattered references to the horse and must form the starting point of any further work on the subject.

IBN al-MUSLIMA, the *kunya* of Aḥmad b. 'Omar (died in 415 = 1024) which was transmitted to his descendants. Another name for the family is Āl al-Raḳīl. This family, the members of which held the office of Ra'is was held in great honour in Baghdād. The grandson of the above mentioned Aḥmad, Abu 'l-Ḳāsim 'Alī b. al-Ḥasan, is better known in history as Ra'īs al-Ru'asā'. He acted for a time (437—450 = 1045—1058) as vizier of the Caliph al-Ḳā'im bi-Amr Allāh and it was he who induced the latter to make an alliance with Toghrulbeg in order to counteract the machinations of the Fāṭimids. This policy saved the 'Abbāsid caliphate but was fatal for its originator, for when Toghrulbeg, who came to Baghdād in 447 (1055), had to undertake a campaign against Mōṣul in 450 = 1058, al-Basāsīrī [q. v. i. 669ᵃ] seized the opportunity to have the *khuṭba* pronounced in Baghdād in name of the Fāṭimid Caliph. Ibn al-Muslima had the misfortune to fall into his hands and was executed in the cruellest fashion in 450 = 1058, as al-Basāsīrī particularly hated him. His son Abu 'l-Fatḥ al-Muẓaffar was vizier for a short time in 476 = 1083. The latter's great-grandson, 'Aḍud al-Dīn Muḥammad b. 'Abd Allāh b. Hibat Allāh b. al-Muẓaffar, held the same office under al-Mustaḍī' for 566 to 573 (1171—8). The Caliph was at last forced to dismiss him by the Turk Kaimāz, on which occasion the Turks plundered his dwelling thoroughly; it was not till Ḳaimāz had to leave Baghdād (570 = 1174) that 'Aḍud al-Dīn was restored to office. He fell a few years later at the hands of a Bāṭinī when about to undertake the pilgrimage to Mecca. Like other members of the family ('Imād al-Dīn devotes a special chapter to him in his *Kharīda*) he was a man of great erudition and is celebrated in several of Sibṭ Ibn al-Ta'āwīdhī's panegyrics.

IBN al-MU'TAZZ 'Abd Allāh, Abu 'l-'Abbās, poet and prince, son of the Khalīfa al-Mu'tazz, was born of a slave mother in the year 247 (861). From his youth he devoted himself to literary pursuits, studying the Arabic language and literature under al-Mubarrad, Tha'lab, and other eminent masters with great zeal and success, and composing works in prose and (especially) poetry which attracted ever wider attention. At the court of his cousin, the Khalīfa al-Mu'taḍid (279—289 = 892—902), he stood in high esteem, and was closely associated with the principal scholars, poets, and literary leaders of Baghdād. He had held himself remote from the intrigues of the 'Abbāsid court, which during his lifetime had been passing through the worst period of its history; but when, on the death of al-Muktafī, the dissatisfaction with al-Muktadir, whom he had named as his successor, culminated in an uprising, Ibn al-Mu'tazz was drawn into the conspiracy, and on the 20ᵗʰ of Rabī' I 296 (17ᵗʰ Dec. 908) was proclaimed khalīfa under the name al-Murtaḍā. His party remained in power for only one day, however; and he, having concealed himself in a private house, was discovered after a few days and put to death (2 Rabī' II = 29 Dec.).

Ibn al-Mu'tazz was one of the most important poets of the 'Abbāsid period. To his native talent, which included originality of a high order, he added sound learning and good taste. He did not imitate the ancient Arab poets, but could bear comparison with them in elegance of manner and purity of diction. His style, moreover, is remarkably simple and direct. His poems covered the whole range of subjects then generally recognized as belonging to the province of poetry (*Dīwān*, Cairo, 1891, 2 vols.). They are prevailingly poems of high life, however, reflecting all its luxury and some of its affectation. A field which he cultivated especially was that of songs praising wine and celebrating drinking customs (*Kitāb fuṣūl al-tamāthīl fī tabāshīr al-surūr*, an anthology in which his own verses held the principal place; see Goldziher, *Abhandl. zur arab. Philol.*, i. 166 *sqq.*, also *Kitāb al-djawāriḥ*). His *Ṭabaḳāt al-shu'arā' al-muḥdathīn*, classifying and estimating the "modern" poets, is preserved only in part. A pioneer work of considerable importance was his *Kitāb al-badī'*, a treatise on poetics. For his other works, see Ibn Khallikān; *Fihrist*, p. 116; Brockelmann, *Gesch. d. arab. Litt.*, i. 80 *sq.*; and *Orient. Stud. ... Th. Nöldeke ... gewidmet*, i. 168.

Bibliography: *Aghānī* (1. ed.), ix. 140 *sqq.*; Ibn Khallikān (ed. Wüstenfeld), nᵒ. 348 (Trans. de Slane, ii. 41 *sqq.*); *Fawāt al-Wafayāt* (1283), i. 308 *sqq.*; Ṭabarī, iii. 2281 *sqq.*; 'Arīb, p. 25 *sqq.*; Otto Loth, *Über Leben und Werke des 'Abdallah ibn al-Mu'tazz*, Leipzig, 1882; his panegyric on al-Mu'taḍid (= *Dīwān*, i, 126—145) has been edited with translation and commentary by C. Lang (*Mu'taḍid als Prinz und Regent* in *Zeitschr. d. Deutsch. Morg. Gesellsch.*, xl. 563 *sqq.*). (C. C. Torrey.)

IBN MU'ṬĪ, Zain al-Dīn Abu 'l-Ḥusain Yaḥyā b. ['Abd al-]Mu'ṭī b. 'Abd al-Nūr al-Zawāwī al-Maghribī, known as Ibn Mu'ṭī, was born in 564 (1168-9). He studied grammar and law in Algiers with Abū Mūsā al-Djazūlī and then went to the east. He spent a very long time in Damascus, where he studied under the traditionist Ibn 'Asākir and then taught grammar there. To earn a livelihood he also acted as a *shāhid*. When the Aiyūbid al-Malik al-Kāmil visited the Syrian capital, he invited him to follow him to Egypt and appointed him professor of literature at the 'Amr mosque in Cairo. Here he died on Monday the 30ᵗʰ Dhu 'l-Ḳa'da 628 = 29ᵗʰ Sept. 1231. Ibn Mu'ṭī was a Mālikī in the Maghrib, a Shāfi'ī in Damascus, and a Ḥanafī in Cairo. He seems to have been the first to compose a poem of 1000 verses (*Alfiya*) as a grammatical textbook.

Of his works only the following are preserved: 1. *al-Durra al-Alfīya fī 'Ilm al-'Arabīya* or simply *Alfīyat Ibn Mu'ṭī*, a grammar in 1021 verses (*radjaz* and *sarī' muzdawidj*), completed in 595 (1198-1199) in Damascus, according to Ḥādjdjī Khalīfa, according to others, in Cairo, ed. with notes by Zetterstéen, *Die Alfīye des Ibn Mu'ṭī*, Leipzig 1900. 2. *Kitāb al-Fuṣūl al-khamsūn*, a short grammar in prose, Berlin, *Verz.* Nᵒ. 6556; Bodleiana, *Cat.*, ii. 247. iii. 3. *al-Badī' fī Ṣinā'at al-Shi'r*, poetics in verses, Fleischer, *Die Refaiya*, Nᵒ. 246.

Bibliography: al-Suyūṭī, *Bughyat al-Wu'āt*,

Cairo 1326, p. 416; Ibn Khallikān, *Wafayāt*, Cairo 1310, ii. 235; Abu 'l-Fidā', *Ta'rīkh*, Constantinople 1286, iii. 159; Ibn Ḥamdūn, comment. on the *Shawāhid* of the *Alfiya* of Ibn Mālik (2 mss.); Sabbān-Dahmūnī, comment. on the *Alfiya* of Ibn Mālik, Cairo 1305, i. 20; Ibn al-Ḥādjdj, *Ḥāshiya* on the comment. of al-Makkūdī on the *Alfiya* of Ibn Mālik, Cairo, 1315, i. 19; al-Daladjī, *al-Falāka wa 'l-Maflūkūn*, Cairo 1322, p. 93; Brockelmann, *Gesch. d. ar. Litt.*, i. 302 *sq.*

(MOH. BEN CHENEB.)

IBN NUBĀTA, the name of two Arabic authors.

1. 'ABD AL-RAḤĪM B. MUḤAMMAD B. ISMĀ'ĪL AL-ḤUDHĀḲĪ AL-FĀRIḲĪ, born in 335 = 946 in Maiyāfāriḳīn, lived at the court of Saif al-Dawla in Ḥalab as a preacher and died in 374 = 984 in his native town. His sermons (*khuṭab*), mainly short, in rhymed prose and elegant in style, deal with questions of religion and ethics in a threefold arrangement, often with reference to contemporary events; they were collected with some sermons of his son Abū Ṭāhir Muḥammad (390 = 999) and of his grandson Abu 'l-Faradj Ṭāhir (about 420 = 1029) about 629 = 1225 and printed in Cairo, 1286, 1292, 1302, 1304, 1309, Bairūt 1311.

2. His descendant MUḤAMMAD B. MUḤAMMAD B. MUḤAMMAD B. AL-ḤASAN, DJAMĀL AL-DĪN or SHIHĀB AL-DĪN, ABŪ BAKR AL-ḲURASHĪ AL-UMAWĪ, born in Rabī' I. 686 = April 1287 at Maiyāfāriḳīn, lived in Damascus after 716 = 1316, from there often visited the learned Aiyūbid prince Abu 'l-Fidā' in Ḥamāh, migrated in Rabī' I 761 = Jan.-Febr. 1360 as secretary to Sulṭān al-Nāṣir Ḥasan to Cairo and died there in Ṣafar 768 = October 1366. As a poet he cultivated besides the panegyrical ḳaṣīda chiefly short poems, which Ibn Djuzaiy in Ibn Baṭṭūṭa (ed. Paris), i. 41, 11 thought very highly of. His *Dīwān* of which there are several recensions (cf. Rieu, *Suppl. to the Cat. of the Arab. Mss. in the Brit. Mus.*, Nº. 1086) was printed at Alexandria n. d., Cairo, 1323 = 1905. His other poetical and rhetorical works are given by Brockelmann, *Geschichte* etc., ii. 11, where Nº. 13 should be deleted and *Zahr al-Manthūr* added, on letter writing, Brit. Mus. Or. 5656, see *Descriptive List*, etc., p. 64.

Bibliography: al-Subkī, *Ṭabaḳāt al-Shāfi'iya*, vi. 31; al-Suyūṭī, *Ḥusn al-Muḥāḍara*, i. 329; *Orientalia*, ii. 419; Wüstenfeld, *Geschichtschreiber*, p. 430; M. Hartmann, *Muwashshaḥ*, p. 42.

(C. BROCKELMANN.)

IBN NUDJAIM, ZAIN AL-'ĀBIDĪN B. IBRĀHĪM B. NUDJAIM AL-MIṢRĪ, was one of the distinguished scholars of the Ḥanafī school in the 10th (xvith century), whose writings on Islamic law are well known and popular in the east. He died in 970 (1562). Of his works we may mention the principal ones: 1. *Al-Ashbāh wa 'l-Naẓā'ir al-fiḳhiya 'alā Madhhab al-Ḥanafiya*, printed at Calcutta in 1826; 2. *al-Baḥr al-rā'iḳ*, a commentary on al-Nasafī's well known *fiḳh* book *Kanz al-Daḳā'iḳ*, printed at Cairo in 1311 (1893) 8 vols.; 3. *Al-Fatāwī al-Zainiya fi Fiḳh al-Ḥanafiya*, a collection of *fatwā's* collected after his death by his son Aḥmad (cf. W. Pertsch, *Die Arabischen Hss. zu Gotha*, ii. p. 351 *sqq.*). See also C. Brockelmann, *Geschichte der arab. Litteratur*, ii. 310 *sq.*

(TH. W. JUYNBOLL.)

IBN RĀ'IḲ, ABŪ BAKR MUḤAMMAD, AMĪR AL-UMARĀ'. In 317 (929-930) Ibn Rā'iḳ was appointed prefect of police in Baghdād along with his brother Ibrāhīm. Both were dismissed in the following year but Muḥammad b. Rā'iḳ received his office back in 319 (931-2), while Ibrāhīm was appointed at the same time high chamberlain. After the murder of al-Muḳtadir in 320 (932) the two brothers fled with others to al-Madā'in and thence to Wāsiṭ, and after al-Rāḍī became Caliph in 322 (934) he appointed Muḥammad b. Rā'iḳ governor of Wāsiṭ and Baṣra. Towards the end of 324 (Nov. 936) the latter was summoned to Baghdād and given the highest military and civil authority with the title *Amīr al-Umarā'*. In order to overthrow the powerful general Bedjkem [q. v.] in Wāsiṭ he entered into negotiations with Abū 'Abd Allāh al-Barīdī [v. AL-BARĪDĪ] and promised him the governorship of Wāsiṭ after the fall of Bedjkem. But al-Barīdī was defeated; Bedjkem entered Baghdād in Dhu 'l-Ḳa'da 326 (Sept. 938) and was appointed Amīr al-Umarā', while Ibn Rā'iḳ had to go into hiding and al-Barīdī was given the governorship of Wāsiṭ. After Bedjkem accompanied by the Caliph had set out against the Ḥamdānids, Ibn Rā'iḳ appeared in the capital, but promised to withdraw, if he received the governorship of Ḥarrān, al-Ruhā, and Ḳinnasrīn along with the districts on the upper Euphrates and the frontier fortresses, which was granted him. As he invaded Syria the Ikhshīd Muḥammad b. Ṭughdj sent an army against him in 328 (939). The details are variously given; in any case, after some time peace was made according to which the Ikhshīd retained Egypt and Ibn Rā'iḳ had to be content with Syria as far as al-Ramla. Quarrels soon broke out between the Turks and Dailamis in Baghdād; the latter won the upper hand and the Dailami captain Kūrtegīn was appointed Amīr al-Umarā'. To get rid of him, al-Muttaḳī appealed to Ibn Rā'iḳ. In Ramaḍān 329 (June 941) the latter set out from Damascus. He met Kūrtegīn at 'Ukbarā and after several days fighting entered Baghdād. When Kūrtegīn appeared with his troops in Baghdād he was defeated and captured whereupon the Caliph again gave Ibn Rā'iḳ the rank of Amīr al-Umarā'. In the meanwhile al-Barīdī had seized Wāsiṭ. In Muḥarram of the next year (Oct. 941) Ibn Rā'iḳ set out against him but a peaceful arrangement was come to and al-Barīdī promised to pay an annual tribute for Wāsiṭ. Soon afterwards the Turks deserted Ibn Rā'iḳ and when trouble broke out in Baghdād on account of famine and scarcity, al-Barīdī sent his brother Abu 'l-Ḥusain with an army against the capital. The Caliph and the Amīr al-Umarā' had to take refuge with the Ḥamdānids of Mōṣul and in Radjab 330 (March—April 942) Ibn Rā'iḳ was slain.

(K. V. ZETTERSTÉEN.)

IBN RASHĪD, the name of the Wahhābī rulers (*Shaikh al-Mashā'ikh*) of Djabal Shammar in Nadjd. The founder of the dynasty was:

1. 'Abd Allāh b. 'Alī al-Rashīd of the Dja'far clan of the Shammar tribe of al-'Abde, 1250—1263 (1835—1847). In 1835 he seized the town of Ḥā'il and deposed Shaikh Ṣāliḥ of the Ibn 'Alī family, which had previously ruled the Djabal Shammar

under the suzerainty of the Wahhābī princes of Dar'īya [q. v.] and Riyāḍ. He was recognized by Faiṣal, Amīr of Riyāḍ, who according to tradition owed his throne to him, and with the help of his brother 'Obaid succeeded in maintaining and extending his rule. In 1838 at the same time as Faiṣal, Amīr of Riyāḍ, was expelled and replaced by Khālid [cf. IBN SA'ŪD under viii and ix.] the Djabal Shammar was also occupied by Khūrshīd Pasha and 'Abd Allāh banished. After the departure of the Egyptians in 1841, 'Abd Allāh regained his kingdom. On his death he was succeeded by his son.

II. Ṭalāl b. 'Abd Allāh, 1263—1283 (1847—1867); he subdued the oases of al-Djōf (Dawmat), Khaibar, Taimā and a portion of al-Ḳaṣīm and was able to keep the predatory Bedouins in check. By these and other clever measures he brought peace and prosperity into the land ruled by him. His dependence on Riyāḍ, which had become loose even in 'Abd Allāh's reign, became limited to occasional military service; payment of tribute was replaced by more or less regular presents of horses. Ṭalāl was also on good terms with Egypt, the Porte and Persia; Palgrave (1862-1863) and Guarmani (1864) were able to travel in his country in his reign; he committed suicide according to Huber in Ṣafar 1283 (June—July 1866), according to Euting on the 17 Dhu 'l-Ḳa'da 1284 = 11th March 1868.

III. Mit'ab, 1283—1285 (1867—1869), Ṭalāl's brother, who succeeded him, was treacherously murdered before he had reigned two full years on the 2nd Rabī' II 1285 = 4th January 1869 (Huber; according to Euting, 2nd Rabī' II 1285 = 23rd July 1868) by his nephews Bandar and Badr, Ṭalāl's sons.

IV. Bandar, the usurper, 1286-1289 (1869-1872) was in his turn disposed of along with his brothers and nephews by his uncle Muḥammad.

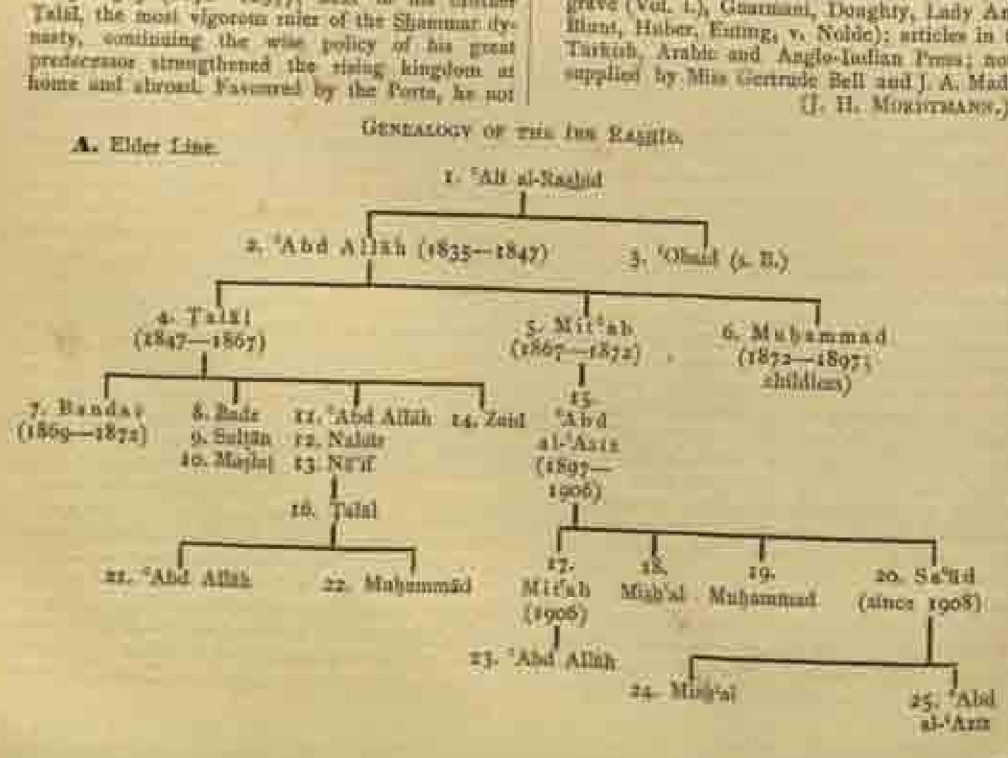
V. Muḥammad b. 'Abd Allāh b. Rashīd, 1289—1315 (1872—1897), next to his brother Ṭalāl, the most vigorous ruler of the Shammar dynasty, continuing the wise policy of his great predecessor strengthened the rising kingdom at home and abroad. Favoured by the Porte, he not only made himself independent of the Amīrs of Riyāḍ but in 1891 he occupied Riyāḍ and combined the two rival kingdoms under his own sway. During his reign European travellers repeatedly visited the Djabal Shammar (Doughty, Mr. and Lady Anne Blunt, Huber, Euting, and v. Nolde); he died in the middle of December 1897 without issue and left the kingdom to his nephew,

VI. 'Abd al-'Azīz b. Mit'ab 1315—1324 (1897—1906). The latter came into conflict with the powerful Shaikh Mubārak of Kuwait, the protector of the princes of Riyāḍ dispossessed by Muḥammad b. 'Abd Allāh and a fierce battle took place at al-Ṭarfīya in 1318 (1901), in which 'Abd al-Raḥmān b. Faiṣal and the Muntafiḳ Shaikh Sa'dūn fought on the side of Mubārak. In February 1902 'Abd al-'Azīz b. 'Abd al-Raḥmān of the dynasty of Ibn Sa'ūd took the town of Riyāḍ and maintained himself there against the attacks of 'Abd al-'Azīz of Djabal Shammar. The latter was finally forced to call in the help of the Turks (1322); he fell in a night battle with his enemy on the 18th Ṣafar 1324 (13th April 1906). His son and successor

VII. Mit'ab b. 'Abd al-'Azīz was murdered in Dhu 'l-Ḳa'da 1324 (Dec. 1906—Jan. 1907; according to another account in Sha'bān 12th by

VIII. Sulṭān b. Ḥamūd, a grandson of 'Obaid, young brother of 'Abd Allāh (I above); after reigning a few months, Sulṭān was disposed of in the beginning of 1326 (Feb. 1908) by his brother

IX. Sa'ūd b. Ḥamūd who was in his turn speedily made away with by Ḥamūd Ibn Subhān, who placed the sole surviving son of 'Abd al-'Azīz (VI),

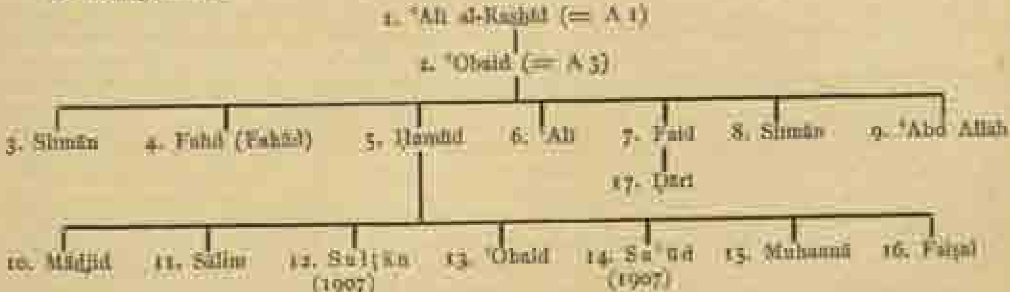


X. Sa'ūd, on the throne on the 17th Sha'bān 1326 (14th Sept. 1908); and since then Sa'ūd has been reigning with full recognition in the Djabal Shammar.

Bibliography: the travellers mentioned in the article IBN SA'ŪD (particularly, Wallin, Palgrave (Vol. i.), Guarmani, Doughty, Lady Anne Blunt, Huber, Euting, v. Nolde); articles in the Turkish, Arabic and Anglo-Indian Press; notes supplied by Miss Gertrude Bell and J. A. Madik.

(J. H. MORDTMANN.)

GENEALOGY OF THE IBN RASHID.



A. Elder Line.

Notes:

1. cf. Huber, *Journal* etc., p. 151. — On Nūra, sister of ʿAbd Allāh (2) and ʿObaid (3), cf. *Zeitschr. d. Deutsch. Morgenl. Ges.*, v. 19; Zehme, p. 240; Doughty, ii. 25. "Jabar" [Djabar], whom Blunt, i. 196, calls brother of ʿAbd Allāh and ʿObaid, is, according to Doughty, ii. 16, descendant of Ibn ʿAlī expelled by ʿAbd Allāh. — 4. Guarmani, p. 96: in 1864 aged 40 years and father of 9 sons; according to Palgrave, i. 128 and 204, on the death of his father — 1844 or 1845 — aged 20 or 25. — 5. Huber, *Journal*, p. 150: in 1869 aged 35. — 6. Doughty, i. 593: in 1877 "fully forty years old"; Blunt, i. 271: in 1879 aged 45, with which Euting, i. 175, agrees; v. Nolde, p. 83, however makes him 53 in 1892. — 7 cf. Guarmani, p. 87, 195; Blunt, i. 195: in 1872 aged 20; Huber, *Journal*, p. 151: aged 30; cf. Euting, i. 170. A son of his is mentioned by Doughty, ii. 26, and Blunt, ii. 270; according to Miss Bell, he left no children. — 8. Palgrave, i. 135: in 1862 aged 12 (wrongly taken for 7); Huber, *Journal*, p. 151: in 1872 aged 25. — 11. Palgrave, i. 135: in 1862 aged 5-6; Huber, *Journal*, p. 150: in 1876 aged 18. — 13. Blunt, i. 271: born in 1861; Huber: died at the age of 20 in 1298 (1881—2), cf. also Blunt, i. 200, Euting, i. 169. — 14. dead in 1871, according to Huber, *Journal*, p. 150. — Huber gives the complete list of Ṭalāl's sons, 7—14; with the exception of 13 and 14 they were all put to death by their uncle Muḥammad on his accession. — 15. aged 16-17 in 1883, cf. Euting, i. 170 and 176; Huber, *Journal*, p. 150. — 16—19, according to Miss Bell, put to death in 1907, by Sulṭān b. Ḥamūd. — 20. aged 11 in 1908, according to Douglas Carruthers.

B. Younger Line.

Notes:

2. Palgrave, i. 128: in 1844 or 1845 not aged less than 50, cf. Euting, i. 168; Huber, *Journal*, p. 150: died on 17 Dhu 'l-Ḳaʿda 1286 (18. Febr. 1870), according to Blunt, i. 194, 196, ii. 270, in 1871; cf. Doughty, ii. 27 *sq.* — The sons of ʿObaid (3—9) cf. Huber, *l. c.* — 3. dead apparently before 1877 (Huber). — 4. Huber: in 1883 aged 38, mad; often mentioned in Doughty and Euting. — 5. mentioned by Palgrave, i. 64 *sqq.*, Doughty, Blunt, Huber, Euting; had, according to v. Nolde, p. 50, 8 sons (cf. Doughty, ii. 18, and Euting, i. 185). — 6. Huber: already dead in 1883. — 7. Doughty, ii. 29: aged 17 in 1877; Huber (1883) puts him at 28. — 8. Huber: died in 1882; mentioned by Doughty, ii. 29. — 9. Huber: in 1883 aged 21; cf. Doughty, *l. c.* — The sons of Ḥamūd (10—15) cf. Huber, *Journal*, p. 151. — 10. Doughty, i. 615: in 1877 "a boy of fifteen years", cf. Blunt, i. 229; often mentioned in Doughty, Blunt, Huber, Euting. — 11. Huber, *Journal*, p. 149. — 13. cf. Huber, *ib.*, p. 166. — 16. In Doughty as "infant", lives at present (1914) in Riyāḍ in exile, as does 17 (Ḍārī); Faiṣal and his cousin are the only surviving descendants of ʿObaid b. ʿAlī al-Rashīd (Miss Bell).

IBN RASHĪḲ, Abū ʿAlī al-Ḥasan b. Rashīḳ al-Azdī, whose father was perhaps of Greek origin but a client of the Azd, was born at al-Muḥammadiya (al-Masīla) in Algiers about 385 (995) or 390 (1000). He studied first in his native town where he learned his father's trade of a jeweller, but went to Ḳairawān in 406 (1015-6) and was appointed court-poet by the Fāṭimid Caliph al-Muʿizz. This appointment earned him the enmity of his contemporary Abū ʿAbd Allāh Muḥammad b. Abī Saʿīd b. Aḥmad, known as Ibn Sharaf al-Ḳairawānī, who was also a poet and man of letters. This quarrel which resulted in the publication of several of their works finally induced Ibn Sharaf to migrate to Sicily. When Ḳairawān was plundered in 449 (1057) of the Arabs, al-Muʿizz fled, accompanied by his favourite poet, to al-Mahdiya, where he died in 453 (1061). Ibn Rashīḳ went in the same year to Mazara in Sicily, where he died in the night of Friday/Saturday 1st Dhu 'l-Ḳaʿda 456 (15th/16th Oct. 1064), according to others in 463 (1070-1071).

Ibn Rashīḳ was a historian, poet, and philologist and among his teachers were the man of letters Abū Muḥammad ʿAbd al-Karīm b. Ibrāhīm al-Nahshalī, the grammarian Abū ʿAbd Allāh Muḥammad b. Djaʿfar al-Ḳazzāz, etc. He is the author of: 1. *al-ʿUmda fī Ṣināʿat al-Shiʿr wa-Naḳdihī*, a treatise on poetics, commended by Ibn Khaldūn (*al-Muḳaddima*, transl. de Slane, iii. 380) as the best work on the subject; publ. in Tunis about 1885 (only the 1st vol.), Cairo 1325. 2. *Ḳurāḍat al-Dhahab fī Naḳd Ashʿār al-ʿArab*, Letter to Abu 'l-Ḥasan ʿAlī b. Abi 'l-Ḳāsim al-Lawātī, on poetic plagiarisms, Paris, Bibl. Nat., N°. 3317, vii. 3. A fragment of his *Dīwān*, see Derenbourg, *Les Mss. arab. de l'Esc.*, N°. 467.

Litt.*, i. 307.

(MOH. BEN CHENEB.)

IBN AL-RĀWANDĪ. [See AL-RĀWANDĪ.]

IBN ROSTA, ABŪ 'ALĪ AḤMAD B. 'OMAR, an Arab-Persian scholar of the second half of the iiird (ixth—xth) century. Almost nothing is known of his life. He lived in Iṣfahān, where several persons were known as scholars under the name Ibn Rosta. In 290 (903) he visited Medina on the occasion of the pilgrimage. About the same time he wrote his *Kitāb al-A'lāḳ al-Nafīsa*; of this only the seventh part (ed. by de Goeje, *Bibl. Geogr. Arab.*, vii. 1, Leiden 1892) has survived; in it after an introduction on the celestial sphere and the terrestrial globe he proceeds to describe lands and cities. He took his material for the most part from older or contemporary works. Various extracts had previously been published by Chwolson with Russian translation.

Bibliography: de Goeje, *Praefatio* to his edition; Brockelmann, *Gesch. d. arab. Litt.*, i. 227.

(C. VAN ARENDONK.)

IBN RŪḤ, ABU 'L-ḲĀSIM AL-ḤUSAIN B. RŪḤ B. BAḤR AL-BAṢRĪ AL-NAWBAKHTĪ, third *nā'ib* of the expected Imām (*ṣāḥib al-amr*) of the Shī'ī sect of the Ithnā'ashariya [q. v.] during the short absence (*al-ghaiba al-ṣughrā*) 264—334 (878—945). In his capacity of *nā'ib* (synonyms, *bāb*, *wakīl*, *safīr* 'an al-nāḥiya al-muḳaddasa) he had to issue bulls (*tawḳī'*) in the name of the "absent" Imām, which had legal authority among the Shī'a. He resided in Baghdād, in the *Dār al-Nīyāba*. He seems to have been appointed by the previous *nā'ib*, Abū Dja'far al-'Umarī, before 305 (917). He won so many adherents at the Caliph's court that the vizier Ḥāmid had him imprisoned. Released in 317 (929) he became implicated in the Ḳarmaṭian schemes and laid a curse upon al-Shalmaghānī. He died in 326 (937) or 329 (940) after designating Abu 'l-Ḥasan al-Sāmarrī as *nā'ib*. The parents of the great Shī'ī theologian Ibn Bābawaih [q. v.] claimed that they owed his birth to the prayers of Ibn Rūḥ.

Bibliography: Ṭabarsī, *Iḥtidjādj*, lith. Teherān, *in loc.*, gives the text of his principal bulls; cf. Ibn Abī 'l-Ṭai', in al-Ṣafadī, *Wāfī*, Ms. Bodl. (Uri, *Cat.*, i., *Cod. Arab.*, p. 151, N°. 665), f. 70; Ibn Khallikān, trans. de Slane, i. 430, N. 20 (after al-Dhahabī, *Ta'rīkh al-Islām*, Ms. Paris, Bibl. Nat., de Slane, *Cat.*, N°. 1581); Ibn al-Athīr, ed. Tornberg, viii. 217, 218; 'Arīb, p. 141; al-Ḥillī, *Khulāṣat al-Aḳwāl*, Ms. Paris N°. 2108, f. 417ᵛ; al-Khwānsārī, *Rawḍāt al-Djannāt*, lith. Ṭeherān 1307, p. 578; *Madjālis al-Mu'minīn*, lith. Ṭeherān 1299, p. 189.

(L. MASSIGNON.)

IBN AL-RŪMĪ, 'ALĪ B. AL-'ABBĀS B. DJURAIDJ (GEORGIOS), an Arab poet, born at Baghdād in 221 (836), as the name Ibn al-Rūmī suggests and the name of his grandfather proves, belonged to the land of the Byzantines. He was distinguished for his poetic gifts, but made many enemies by his lampoons, including the vizier of al-Mu'taḍid, al-Ḳāsim b. 'Ubaid Allāh, grandson of Sulaimān b. Wahb [q. v.], who is said to have got rid of him by poisoning him in 283 (896). The date is not quite certain, for the years 284 and 276 are also given. He left a fairly extensive *Dīwān*, which was collected and arranged by al-Ṣūlī.

Bibliography: Ibn Khallikān, *Wafayāt*, ed. Wüstenfeld, N°. 474; Brockelmann, *Gesch. der arab. Litt.*, i. 79 *sq.*

IBN RUSHD, ABU 'L-WALĪD MUḤAMMAD B. AḤMAD B. MUḤAMMAD B. RUSHD, celebrated in mediaeval Europe as AVERROES, the greatest Arab philosopher of Spain, was born at Cordova in 520 = 1126. His grandfather had been ḳāḍī of Cordova and had left important works, while his father also held the office of ḳāḍī. He studied law and medicine in his native town; one of his teachers was Abū Dja'far Hārūn of Truxillo. He lived in 548 = 1153 in Marrākush, whither Ibn Ṭufail [q. v.] had probably induced him to go. The latter introduced him to the Almohad Abū Ya'ḳūb Yūsuf who became his patron. An account of this interview is preserved (see *Hist. des Almohades de Merrakechi*, transl. by Fagnan). The Caliph asked Ibn Rushd what was the view of the philosophers on heaven (the universe), whether it was an eternal substance or had a beginning. "I was so overcome with terror" says Ibn Rushd "that I could not answer". The Caliph put him at his ease and began to discuss the question himself by expounding the views of various scholars with an intimacy and learning rare among princes. The Caliph then dismissed him with rich presents.

It was Ibn Ṭufail who advised Ibn Rushd to comment on Aristotle and told him that the commander of the faithful often lamented the obscure language of the Greek philosophers or rather of the available translations and that he (Ibn Rushd) ought to undertake to explain them.

In 565 = 1169 he became ḳāḍī of Seville and two years later ḳāḍī of Cordova. In spite of the burden of work of this office he composed his most important works in this period. In 578 = 1182, Ibn Yūsuf summoned him to Marrākush as his physician to replace the aged Ibn Ṭufail, but soon afterwards sent him back to Cordova with the rank of chief ḳāḍī.

At the beginning of the reign of Ya'ḳūb al-Manṣūr, Yūsuf's successor, Ibn Rushd was still in favour with the Caliph, but he fell into disgrace as the result of the opposition of the theologians to his writings and after being accused of various heresies and tried, he was banished to Lucena near Cordova. At the same time, the Caliph ordered the books of the philosophers to be burnt except those on medicine, arithmetic and elementary astronomy (about 1195). Duncan Macdonald observes that these orders of the Almohad ruler who had hitherto encouraged philosophical studies, probably were a concession to the Spanish Muslims, who were much more orthodox than the Berbers. At the time the Caliph was actually waging a religious war against the Christians in Spain. On returning to Marrākush he raised the ban and recalled Ibn Rushd to his court (D. Macdonald, *Development of Muslim Theology*, New York 1903, p. 255).

Ibn Rushd did not long enjoy the restoration of his fortunes for he died soon after his return to Marrākush (9th Ṣafar 595 = 10th Dec. 1198) and was buried near the town outside the gate of Tāgazūt.

A great part of the Arabic original of Averroes'

works is lost. There have survived in Arabic his *Tahâfut al-Tahâfut*, the "Collapse of the Collapse", an answer to Ghazâlî's celebrated *Tahâfut al-Falâsifa*, "Collapse", or perhaps "Collapse of the philosophers" (cf. Miguel Asín y Palacios, *Sur le Sens du mot "Tehâfot" dans les œuvres d'al-Ghazali et d'Averroès* in *Revue Africaine*, 1906, N°. 261, 262, particulary p. 202), also the medium commentaries on the *Poetics* and *Rhetoric* of Aristotle (ed. and transl. by Lasinio); the exposition of fragments of Alexander of Aphrodisias on the *Metaphysics* (s. J. Freudenthal and S. Fraenkel, *op. cit.*); the large commentary on the *Metaphysics* in Leiden (*Cat. Cod. orient.*, N°. MMDCCCXXI); small commentaries in Madrid *Kitâb al-Djawâmi'* (Guillén Robles, *Catálogo* . . . *Bibl. Nacion.*, N°. 37; cf. H. Derenbourg, *Notes sur les mss. arab. de Madrid*, N°. 37, in *Homenaje á D. Franc. Codera*, p. 577 *sq.*) referring to Aristotles' treatises *De Physica*, *De Coelo et Mundo*, *De Generatione et Corruptione*, *De Meteorologia*, *De Anima*, and certain metaphysical questions; cf. also H. Derenbourg, *Le commentaire arabe d'Averroès sur quelques petits écrits physiques d'Aristote* in *Arch. für Gesch. der Philos.*, XVIII. (1905), p. 250, and lastly two interesting treatises on the relations between religion and philosophy (discussed by Léon Gauthier and by Miguel Asín). One of these writings is entitled *Kitâb Faṣl al-Maḳâl* and vigorously champions the agreement between religion and philosophy, the other is called *Kitâb Kashf al-Manâhidj*, etc. Both works are edited and translated into German by M. J. Müller (see *Bibl.*) and printed at Cairo under the joint title *Kitâb Falsafat Ibn Rushd* (1313, 1328). There also exists in Arabic in Hebrew characters an abstract of the *Logica*, the medium commentaries on *De Generatione et Corruptione*, *De Meteoris*, *De Anima*, a paraphrase of the *Parva Naturalia* (Paris, Bibl. Nat., N°. 303, 317), the commentaries on *De Coelo*, *De Generatione* and *De Meteoris* (Bodleiana, Uri, *Cat.*, *codd. hebr.*, p. 86) (Renan, *Averroès*, 3e ed., p. 83).

The celebrated commentaries of Averroes on Aristotle are of three kinds or rather one in three editions, a large, medium and small edition. This threefold arrangement corresponds to the three stages of instruction in the Muslim universities, the small commentaries, are for the first, the medium for the second and the large for the third year. The exposition of the *'aḳâ'id* is similarly arranged.

We possess in Hebrew and Latin translation the three commentaries of Averroes on the *Second Analytics*, the *Physics* and on the treatises of the *Universe*, the *Soul* and the *Metaphysics*; the large commentaries on the other works of Aristotle are lacking and no commentary on the *Zoology* has survived.

Ibn Rushd also a wrote a commentary on Plato's *Republic*, and criticisms on al-Fârâbî's logic and his interpretation of Aristotle as well as discussions on certain theories of Avicenna and glosses on the *'Aḳîda* of the Mahdî Ibn Tûmart. He also wrote several legal (*Kit. Bidâyat al-Mudjtahid wa-Nihâyat al-Muḳtaṣid*, Cairo 1329), and astronomical and medical works. His work on the "whole art of medicine", *al-Kulliyât* (codd. Granada, s. Dozy, *Zeitschr. der Deutsch. Morgenl. Ges.*, XXXVI. 1882, p. 343; Petersburg, Dorn, *Cat.*, N°. 132, and probably Madrid, Robles, *Catál.*, N°. 132, cf. H. Derenbourg, *Notes* etc. N°. 132, *Homenaje*, p. 587 *sq.*), corrupted in the Latin translations to *Colliget*, enjoyed a certain renown in the middle ages, but cannot be compared with the *Canon* of Avicenna.

The philosophy of Averroes cannot be considered original (cf. Renan, *Averroès* [3], p. 88). It is rather the philosophy of the Hellenising school of the *Falâsifa* [cf. FAILASÛF, ii. 39b] which had already been taught in the east by al-Kindî, al-Fârâbî, and Avicenna and in the west by Ibn Bâdjdja. On some points, however, he contests the views of his great predecessors but these points are only subsidiary and on the whole his philosophy runs on the same lines.

He owes his fame mainly to his acute analysis and his gift of annotation, qualities which we can hardly appreciate accurately at the present day on account of the differences in our mode of thought, our methods and scientific resources, but they were all the more appreciated by the scholars of the middle ages, notably in Jewish and Christian circles. His commentaries aroused great admiration, even among theologians who saw in his system a danger to faith.

The school of philosophers had already been vigorously attacked by the theologians in the Muslim east. The *Tahâfut* of al-Ghazâlî directed mainly against al-Fârâbî and Avicenna is the most important memorial of this struggle in the east. In the west the school was first attacked by the Muslim theologians of Spain, and later by the Christian theologians also after the commentaries of Averroes had been made known to them in translations. In the 13th century Ibn Rushd was condemned by the bishops of Paris, Oxford and Canterbury for reasons similar to those that had earned his condemnation by the orthodox Muslims of Spain.

The main doctrines of Ibn Rushd's system, that brought the charge of heresy upon him, concern the question of the eternity of the world, the nature of God's apprehension, and His foreknowledge, the universality of the soul and of the intellect, and the resurrection. Averroes may easily appear heretical on these doctrines; he does not deny dogma, but expounds it in such a way as to bring it into conformity with philosophy.

Thus in the doctrine of the eternity of the world he does not deny the creation but only gives a rather different explanation from the theological one. For him there is no creation *ex nihilo* once and for all, but rather a creation renewed from moment to moment whereby the world is maintained and changes. In other words: a creative power is perpetually at work on the world, maintaining and moving it. The constellations in particular exist only through motion, and they receive this motion from the moving force which is acting on them from all eternity. The world is eternal but in consequence of a creative and moving cause: God is eternal and without cause.

In the chapter on the apprehension of God Ibn Rushd repeats the principle of the philosophers that "the first principle only apprehends his own being". According to that school this presupposition is necessary in order that the first principle may retain his unity, for if he recognised multiplicity of being, he would himself become multiple. Interpreted strictly according to this principle, primal being must live entirely within himself and have knowledge of his own existence only

and foreknowledge would thus be impossible. The theologians endeavoured to force the philosophers to this conclusion.

But Ibn Rushd's system has more elasticity. He grants that God in His own essence knows all the things of the world. But His knowledge is neither to be called particular or universal and is therefore not like man's knowledge, but rather of a higher kind of which we can form no conception. [Cf. FALSAFA, ii. 50a]. God's knowledge cannot be the same as that of man's, for God would then have 'sharers' in His knowledge and He would no longer be the one God. Moreover God's knowledge is not like man's knowledge derived from things, nor is it produced by them. On the contrary, it is the cause of all things. Therefore the assertion of the theologians that the system of Averroes denies fore-knowledge is incorrect.

Concerning his teaching regarding the soul, Ibn Rushd has been reproached with teaching that the individual souls after death pass into the universal soul, and thereby denying the personal immortality of the soul of man. But this is not at all correct. The soul must be distinguished from the intellect in Averroes' system as well as in the systems of other philosophers. The intellect is quite abstract and immaterial and only exists in reality when it is associated with the universal or active intellect. What we call intellect in the individual is strictly a faculty for grasping the ideas that come from the active intellect, a faculty to which the name 'passive' intellect is given and which is not permanent by itself. It must realise itself and become the 'acquired' intellect (*intellectus adeptus*). Then it is bound up with the active intellect, in which the eternal ideas rest, and merged into it this faculty becomes itself eternal.

It is not the same with the soul. This with the philosophers is the driving force which effects the life and growth of organic bodies. It is a kind of energy which gives life to matter not free from the qualities of matter like the intellect, but on the contrary closely associated with it. It perhaps may even consist of a kind of half or very fine matter. These souls are the form of bodies, and are therefore independent of the body, but continue to exist after the death of the body and can remain individual.

The latter according to Averroes is a bare possibility. He does not believe that a convincing proof of the immortality of the soul so conceived can be established by purely philosophical means. The task of solving the question is left to revelation. (See *Tahāfut al-Tahāfut*, p. 137).

The theologians have further charged Averroes with denying the resurrection of the body. Here also his teaching is rather an exposition than a denial of the dogma. The body which we shall have in the next world is according to him not the same as our earthly body, for what has passed away is not reborn in its identity, it can at best appear again as something similar. Averroes moreover remarks that the future life will be of a higher kind than earthly life; bodies there will therefore be more perfect than in this world. For the rest, he disapproves of the myths and representations which are made of the life in the next world.

As this philosopher was more attacked by orthodoxy than his predecessors, he made more definite pronouncements than they on the relations between philosophical research and religion. He expounds his views on this subject in the above mentioned works *Faṣl al-Maḳāl* and *Kashf al-Manāhidj*. His first principle is that philosophy must agree with religion. This is an axiom of the whole of Arab scholasticism. There are in a way two truths or so to speak two revelations, the philosophic truth and the religious truth, both of which must agree. The philosophers are prophets of their class, prophets who appeal by preference to scholars. Their teaching may not contradict the teaching of the prophets in the proper sense, who appeal particularly to the people. It must rather give the same truth in a higher, less material form.

In religion a distinction must be made between the literal sense and its exposition. If for example a passage is found in the Ḳur'ān which appears to contradict the results of philosophy, we must believe that this passage really has another than the apparent sense and seek the true meaning. It is the duty of the multitude to keep to the literal meaning; to seek the correct interpretation is the task of the learned. Myths and allegories must be understood by the people as revelation presents them; the philosopher, however, has the right to seek out the deeper and purer meaning concealed in them. Finally the learned should make it a practice not to communicate their results to the masses.

Averroes has expounded how religion must be taught according to the intellectual standard of the hearer. He distinguished three classes of men according to their mental endowments: the first and most numerous comprises those who believe as a result of preaching the divine word and are susceptible almost only to oratorical effect. The second class includes those whose beliefs are based on reasoning but only on such as proceeds from *a priori* premisses assumed quite uncritically. The third and smallest class finally consists of those whose beliefs are based on proofs which rest on a chain of established premisses. This method of coordinating religious instruction to the mental endowment of the hearer is evidence of a keen psychological insight but it may run the risk of not appearing sincere and it was natural that it should arouse the distrust of professional theologians.

Finally we do not think that Averroes was an infidel, who was trying to protect himself from the attacks of the orthodox with more or less skilful interpretations; we are inclined to think that in general agreement with the attitude of many scholars in the east he was a syncretist, who honestly believed that one and the same truth could be presented under very different aspects and who was able by his great philosophical ingenuity to reconcile doctrines which must have appeared directly contradictory to less elastic minds.

The commentaries of Averroes were translated in the xiiith and xivth century into Hebrew by Jacob ben Abba Mari Anatoli of Naples (1232), Judah b. Salomon Cohen of Toledo (1247), by Moses b. Tibbon of Lunel (1260), Samuel b. Tibbon, Shem Ṭob b. Joseph b. Falaquera and Kalonymus b. Kalonymus (1314). Levi b. Gerson of Bagnols (Gersonides) wrote a commentary on Averroes just as the latter had commented on Aristotle. In the Christian west, Michael Scott and Hermann, both connected with the House of Hohenstaufen,

began in 1230 and 1240 a Latin translation of the Arabic text of Averroes.

Towards the end of the xvth century Niphus and Zimara made some improvements in the old translations. New translations based on the Hebrew text were later made by Jacob Mantino of Tortosa, Abraham de Balmes and Giovanni Francesco Burana of Verona. The two best Latin editions of Averroes are those of Niphus (1495—1497) and of the Juntas (1553).

(CARRA DE VAUX.)

IBN al-SÂ'ÂTÎ (the son of the clockmaker), FAKHR AL-DÎN RIḌWÂN (or RUḌWÂN) B. MUḤAMMAD B. 'ALÎ B. RUSTAM AL-KHURÂSÂNÎ was born in Damascus whither his father had migrated from Khorâsân. The latter was a skilful clockmaker who made the clock at the gate of the great mosque of Damascus, at the request of the Zangid al-Malik al-'Âdil Nûr al-Dîn Maḥmûd (d. in Shawwâl 569 = 1174); he was also learned in astronomy. Ibn al-Sâ'âtî was a physician but had also an extensive knowledge of literature, logic and other branches of philosophy, as well as in clockmaking. He was first of all vizier to al-Malik al-Fâ'iz b. al-Malik al-'Âdil Muḥammad b. Aiyûb (a nephew of Saladin) and afterwards vizier and physician to his brother al-Malik al-Mu'aẓẓam b. al-Malik al-'Âdil (d. 624 = 1227). He died in Damascus c. 1230. There still exists a manuscript of a work by him in Gotha on the construction of clocks (the Arabic title is lacking) written in Muḥarram of the year 600 (1203), in which he is mainly concerned with his father's clock which he repaired and perfected.

His brother BAHÂ' AL-DÎN ABU 'L-ḤASAN 'ALÎ likewise called IBN AL-SÂ'ÂTÎ, was a well known poet who died as early as 604 (1207) at Cairo; on him cf. Ibn Khallikân, ed. Wüstenfeld, nº. 489.

The Ḥanafî jurist MUẒAFFAR AL-DÎN AḤMAD B. 'ALÎ AL-BAGHDÂDÎ, died in 694 (1295), is known by the same name; he was the author of a much used compendium of fiḳh, which bears the title *Madjma' al-Baḥrain wa-Multaḳa 'l-Naiyirain*, because it is a compilation from the *Mukhtaṣar* of al-Ḳudûrî [q. v.] and the *Manẓûma* of al-Nasafî. On him cf. Ibn Ḳuṭlûbogha's *Ṭabaḳât al-Ḥanafiya*, ed. Flügel, p. 4, and Brockelmann, *o. c.*, i. 382 sq.

Bibliography: Ibn Abî Uṣaibi'a (ed. Müller), ii. 183; Suter, *Abhandlgn. z. Gesch. d. mathem. Wissensch.*, x. 136, xii. 174. On clocks and clockmaking among the Arabs cf. E. Wiedemann, *Beiträge zur Gesch. d. Naturwissensch.*, iii. v. vi and x. in *Sitzungsberichte der phys.-medic. Sozietät in Erlangen*, Vol. 37 (1905), 38 (1906).

(H. SUTER.)

IBN SAB'ÎN, ABÛ MUḤAMMAD 'ABD AL-ḤAḲḲ B. IBRÂHÎM AL-ISHBÎLÎ, Arab philosopher and founder of a Ṣûfî brotherhood, a native of Murcia, is best known in Europe by his reply to some philosophical questions put by Frederick II to the scholars of Ceuta, where Ibn Sab'în then lived. Cf. A. F. Mehren, *Correspondance du philosophe soufi Ibn Sab'în Abd oul-Haqq avec l'empereur Frédéric II de Hohenstaufen* in *Journ. Asiat.*, Ser. vii. Vol. 14, p. 341 sqq. cf. *ibid.*, Ser. v. Vol. i., p. 240 sqq. Ibn Sab'în died at Mecca in 668 (1269).

Bibliography: Brockelmann, *Gesch. der arab. Litt.*, i. 465 sq.

IBN SA'D, ABÛ 'ABD ALLÂH MUḤAMMAD B. SA'D B. MANÎ' AL-BAṢRÎ AL-ZUHRÎ, a client of the Banû Hâshim known as *Kâtib al-Wâḳidî* (secretary to al-Wâḳidî). He studied tradition under Hushaim, Sufyân b. 'Uyaina, Ibn 'Ulaiya, al-Walîd b. Muslim, and notably with Muḥammad b. 'Umar al-Wâḳidî [q. v.]. Abû Bakr b. Abi 'l-Dunyâ and other traditioners derived tradition from him. His great work, the *Kitâb al-Ṭabaḳât* i. e. the book of the classes, is famous and gives the history of the Prophet, the Companions and Successors down to his own time. Besides the large, Ibn Khallikân and Ḥâdjdjî Khalîfa mention his smaller book of classes. When the author of the *Fihrist* speaks of a *Kitâb Akhbâr al-Nabî* of Ibn Sa'd, this is probably not a separate work but the first part of the book of classes, which deals with the *Sîra* of the Prophet. The whole work is being published under the title: *Ibn Saad, Biographien Muhammeds, seiner Gefährten und der späteren Träger des Islams bis zum Jahre 230 der Flucht*, im Verein mit C. Brockelmann, J. Horovitz, J. Lippert, B. Meissner, E. Mitt-

wuch, P. Schwally und K. Zettersteen, herausgegeben von Ed. Sachau, Leiden 1904 *sqq*.

Bibliography: *Fihrist*, p. 99; Dhahabī, *Tadhkira*, Tab. viii. N°. 14 (= Bd. ii. 13); Ibn Khallikān, N°. 656; Wüstenfeld, *Geschichtschreiber*, N°. 53; Brockelmann, *Gesch. d. arab. Litt.*, i. 136-7; Loth, *Das Classenbuch des Ibn Sa'd*, Habilitationsschrift, Leipzig 1869; cf. Wüstenfeld, *Zeitschr. d. Deutsch. Morgenl. Ges.*, iv. (1850), p. 187, and Loth, *ibid.*, xxiii. (1869), p. 593; Sachau, *Einleitung zu Ibn Saad*, Vol. iii. 1. (E. MITTWOCH.)

IBN ṢADAḲA, the name of three viziers:

1. DJALĀL AL-DĪN 'AMĪD AL-DAWLA ABŪ 'ALĪ AL-ḤASAN B. 'ALĪ, al-Mustarshid's vizier. In 513 (1119-20), he was appointed vizier, but in Djumādā I 516 (July-August 1122) the Caliph dismissed him. His house was plundered and his nephew Abu 'l-Riḍā fled to Mōṣul. The office was then given to 'Alī b. Ṭirād al-Zainabī and in Sha'bān (Oct.-Nov.) of the same year, to Aḥmad b. Niẓām al-Mulk. When the latter demanded that Ibn Ṣadaḳa should leave the capital, he went to Ḥadīthat 'Āna to the Amīr Sulaimān b. Muhārish, but in the following year he was restored to the office of vizier. When the Saldjūk Ṭoghrul b. Muḥammad was persuaded by Dubais b. Ṣadaḳa [q. v.] to march on Baghdād to subdue the whole of 'Irāḳ, the Caliph set out to meet him in Ṣafar 519 (March 1125). Ṭoghrul and Dubais encamped at Djalūlā', the Caliph and the vizier at al-Daskara, N. E. of Baghdād. Ṭoghrul and Dubais then resolved to reach Baghdād by a circuitous route. The latter was sent ahead with 200 horsemen and occupied the ford of the Diyālā near al-Nahrawān; but as Ṭoghrul was delayed partly by an attack of fever and partly by inundations which made his advance difficult, the Caliph succeeded in anticipating him and took Dubais by surprise. When the latter wished to come to terms with al-Mustarshid, the Caliph was willing to make peace but was dissuaded by the vizier, and Ṭoghrul and Dubais continued their journey on Khorāsān to seek help from the Saldjūk Sulṭān Sandjar. Djalāl al-Dīn Ibn Ṣadaḳa died on Radjab 1st 522 (July 1st 1128).

Bibliography: Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 409—411; Ibn al-Athīr (ed. Tornberg), x. see Index; Weil, *Gesch. d. Chalifen*, iii. 224.

2. DJALĀL AL-DĪN ABU 'L-RIḌĀ MUḤAMMAD, nephew of the preceding, al-Rāshid's vizier. Ibn Ṣadaḳa was appointed vizier after the accession of al-Rāshid in 529 (1135). In the following year, when the Caliph had several high officials arrested, he sought protection with the governor of Mōṣul, Zankī b. Aḳ Sonḳor, and was able to hold his office till the deposition of al-Rāshid in Dhu 'l-Ḳa'da 530 (August 1136). He afterwards filled several high offices. He died in 556 (1160-1).

Bibliography: Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 416; Ibn al-Athīr (ed. Tornberg), x. 423; xi. 23.

3. MU'TAMAN AL-DAWLA ABU 'L-KĀSIM 'ALĪ, al-Muḳtafī's vizier. He is said to have been a very pious but uneducated man, who knew little of the duties of a vizier, although he belonged to a famous family.

Bibliography: Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Derenbourg), p. 419. (K. V. ZETTERSTÉEN.)

IBN SA'ĪD, ABU 'L-ḤASAN 'ALĪ B. MŪSĀ AL-MAGHRIBĪ, an Arab philologist, was born in 610 = 1214 (according to others, 605 = 1208) at Kal'at Yaḥṣub (Alcalá la Real) near Granada and studied at Seville. With his father he made the pilgrimage to Mecca but when they arrived in Alexandria in 639 (1241-2) his father died there in 640 (1243). He himself remained in Alexandria but travelled in 648 (1250) to Baghdād and from there with Kamāl al-Dīn [q. v.] to Ḥalab, thence to Damascus, Mōṣul, Baghdād, Baṣra, and Mecca. He then went to Tunis and entered the service of Abū 'Abd Allāh al-Mustanṣir. In 666 (1267) he went again to the East and reached Armenia via Alexandria and Ḥalab, then returned to Tunis and died on returning to Damascus in 673 (1274). According to another statement, he did not die till 685 (1286) in Tunis. He wrote a history of the Maghrib entitled *al-Mughrib fī Ḥulā 'l-Maghrib*, cf. K. Vollers, *Fragmente aus dem Mughrib des Ibn Sa'īd*, *Semitist. Studien*, Heft 1; Ibn Sa'īd, *Kitāb al-Mughrib* . . . . ., *Buch IV*, *Gesch. der Ikhshīden* . . ., *Textausg. etc.* by K. L. Tallqvist, Leiden, 1899. He wrote various other works, the titles of which are detailed by Brockelmann and Pons Boigues.

Bibliography: Brockelmann, *Geschichte*, etc. i. 336 *sq.*; Pons Boigues, *Ensayo bio-bibliográfico*, p. 306 *sqq.* Cf. also the bibliographical references here and in Brockelmann.

IBN SAIYID AL-NĀS, FATḤ AL-DĪN ABU 'L-FATḤ MUḤAMMAD B. ABĪ BAKR MUḤAMMAD AL-YA'MARĪ AL-ANDALUSĪ, an Arab biographer, born in Cairo in 661 = 1263 (according to others, in 671 = 1273), studied there and in Damascus and became a teacher of Ḥadīth in the Ẓāhiriya at Cairo. He composed a full biography of the Prophet entitled *'Uyūn al-Athar fī Funūn al-Maghāzī, al-Shamā'il wa 'l-Siyar* (somewhat differently given in Brockelmann, see below). He also wrote a number of ḳaṣīdas in praise of the Prophet, entitled *Bushrā 'l-Labīb fī Dhikrā 'l-Ḥabīb*. One of these is published by Kosegarten (Stralsund 1815) and Basset (Louvain 1880).

Ibn Saiyid al-Nās died in 734 (1334).

Bibliography: cf. the references in Brockelmann, *Geschichte etc.*, ii. 71 *sq.*, and Pons Boigues, *Ensayo bio-bibliográfico*, p. 320 *sq.*

IBN SARĀYĀ. [See AL-ḤILLĪ.]

IBN AL-SARRĀDJ, MUḤAMMAD B. 'ALĪ B. 'ABD AL-RAḤMĀN AL-ḲURASHĪ AL-DIMASHḲĪ, Arab mystic, compiled about 714 (1314) a collection of edifying anecdotes entitled *Tuḥfat al-Arwāḥ wa-Miftāḥ al-Arbāḥ*, which formed a part of his lost work *Tashwīḳ al-Arwāḥ wal-Ḳulūb ilā Dhikr 'Allām al-Ghuyūb* (s. Ahlwardt, *Verzeichnis der ar. Hdss. von Berlin*, N°. 8794).

(C. BROCKELMANN.)

IBN SA'ŪD, the name of the Wahhābī dynasty of Dar'īya [q. v.] and Riyāḍ. Muḥammad b. Sa'ūd, the founder of this dynasty was a member of the Muḳrin clan of the tribe of Masālīkh of the Wald 'Alī, who are considered to belong to the great 'Anaza group of Arabs. His father Sa'ūd ruled over Dar'īya and died in the fourth decade of the xiith century A. H., i. e. between 1727 and 1737; according to the genealogy of the Ibn Sa'ūd, he left 3 sons besides Muḥammad: Thunaiyān, Mashārī and Farḥān. The sovereignty of the Wahhābīs of Dar'īya and later of Riyāḍ has remained in the line of Muḥammad b. Sa'ūd to this day; the collateral lines

of the Thunaiyān and Ibn Mushārī produced two usurpers (see vii. and x. below) but attained little prominence in the history of the dynasty; Farḥān and his descendants only figure in the genealogical lists.

The history of the Wahhābī kingdom of Dar'īya-Riyāḍ may be divided into three periods: the first runs from the foundation to the conquest of the land by the Egyptians in 1820 (Dar'īya as capital). The second covers the period from the restoration by Turkī and Faiṣal to the conquest by the Ibn Rashīd of Ḥā'il, 1820—1896 (Riyāḍ capital); the third began with the reconquest of Riyāḍ in 1902.

I. Muḥammad b. Sa'ūd, 1735 (?)—1766. About 1740 Muḥammad b. 'Abd al-Wahhāb, the founder of the Wahhābī doctrine, was driven from 'Aiyena where he had been active and found shelter with Muḥammad b. Sa'ūd, a friend of his. The two combined to spread the new doctrine with preaching and the sword. The fighting with the surrounding towns and tribal districts began in 1159 (begins 24th Jan. 1746) and soon led to the intervention of some powerful neighbours, like the Banī Khālid of Laḥsā and the Makrami of Nadjrān, who were however unable to check the progress of the Wahhābīs. The Wahhābī pilgrims were regarded as sectarians by the Sharīfs of Mecca and excluded from visiting the holy places. The reports of the Sharīfs on this matter in 1162 (begins 23th Dec. 1749) brought the first news of the new sect to Constantinople. Muḥammad b. Sa'ūd died in 1179 (1765—6) after reigning about 30 years.

II. 'Abd al-'Azīz b. Muḥammad b. Sa'ūd, 1179—1218 (1766—1803). The first decades of his reign were passed in constant fighting with the neighbouring towns and tribes, the Banī Khālid, the Makrami, and the Muntafiḳ. In 1795 the Wahhābīs stormed Laḥsā and Ḳaṭīf and thus established themselves on the coast of the Persian Gulf; the repeated attempts of the Turkish governors of Baṣra and Baghdād and their allies the Muntafiḳ to oust them from there (1797 the Muntafiḳ Shaikh Thuwainī's campaign; 1798 Kiaya 'Alī Pasha's campaign) ended unsuccessfully and led in 1799 to a six years' truce between 'Abd al-'Azīz and the Pasha of Baghdād. The Sharīf Surūr of Mecca had in 1186 (1772-3) granted the Wahhābīs the right of entry to the holy places on payment of a tax; his successor Ghālib (from 1202) withdrew this concession and undertook unsuccessful campaigns in 1790, 1795, and 1798 to check the advance of the Wahhābīs into the Ḥidjāz; he had to make peace with them in 1798 and allow them to make the pilgrimage, and they in return pledged themselves not to make further raids into the Sharīfs' sphere of influence.

The peaceful relations with Baghdād and the Sharīfs were of short duration. To revenge an attack by the Shī'ī Khazā'il on a Wahhābī caravan, Sa'ūd, son of 'Abd al-'Azīz, fell upon Karbalā on the 18th Dhu 'l-Ḥidjdja 1216 (21st April 1802), plundered and laid waste the Shī'ī sanctuaries there, and massacred most of the inhabitants. In 1214 and 1215 (April 1800 and 1801) Sa'ūd had made the pilgrimage; about the same time the tribes of 'Asīr and Tihāma as well as the Banī Ḥarb, who had hitherto been subject to the Sharīf Ghālib joined the Wahhābīs, which led to open hostilities. On the 23th Shawwāl 1217 (18th Febr. 1803) the Wahhābīs stormed Ṭā'if and on the 8th Muḥarram 1218 (30th April 1803) Sa'ūd made his triumphal entry into Mecca. After Sa'ūd's return the Sharīf Ghālib drove out the Wahhābī garrison in Mecca (22nd Rabī' I 1218 = 11th July 1803) but was forced to make further concessions to the Wahhābīs.

About 1800 the Wahhābīs began to extend their power along the coast of the Persian Gulf where in the course of the next few years they subjected Baḥrain and the coast tribes, namely the Djawāsimī tribes of Ra's al-Khaima.

On the 18th Radjab 1218 (4th Nov. 1803) 'Abd al-'Azīz was stabbed by a Shī'ī from 'Amādīya in the mosque of Dar'īya.

III. Sa'ūd b. 'Abd al-'Azīz, 1218—1229 (1803—1814). After several smaller enterprises against Baghdād and 'Omān, Sa'ūd resolved to put an end to the rule of the Sharīf Ghālib and occupied Medina in 1220 (1805) and Mecca in Dhu 'l-Ḳa'da of the same year (January 1806). To save the remnants of his power Ghālib submitted absolutely to the Wahhābīs, who now introduced their teaching into the Ḥidjāz. The pilgrim caravans equipped by the Turkish government were forbidden admission to the sacred territory, the *khuṭba* in the name of the Sulṭān abolished, and Sa'ūd demanded in a formal letter that not only the governor of Damascus, but the Sulṭān himself should adopt the Wahhābī creed. To the emphatic refusal of the Pasha of Damascus, Sa'ūd replied by plundering Ḥawrān in July 1810. Sa'ūd organised the piracy of the coast tribes on the Persian Gulf on a great scale so that the Indian Government was forced in 1809 to equip an expedition which stormed Ra's al-Khaima on Nov. 13 of this year and destroyed the pirate fleet.

The Porte unable to defend its own territory from the attacks of the Wahhābīs finally commissioned Muḥammad 'Alī, Pasha of Egypt, to reconquer the Ḥidjāz.

The first campaign of the Egyptian forces under Ṭūsūn Pasha began with the reconquest of Yanbu' al-Baḥr and Yanbu' al-Nakhl at the end of Oct. or beginning of Nov. 1811: on his advance on Medina Ṭūsūn Pasha however was defeated on the 7th Dhu 'l-Ḳa'da 1226 = 23rd Nov. 1811 in the narrow pass of Djedeida by 'Abd Allāh and Faiṣal, Sa'ūd's sons, and had to retire to Yanbu'. It was not till the late autumn of 1812 that he resumed operations, this time with more success; Medina capitulated in November, Mecca at the end of January 1813 and Ṭā'if was stormed a few days later; on the other hand the Wahhābīs succeeded in checking the further advance of the Egyptians at Taraba (summer 1813). At the end of August Muḥammad 'Alī himself landed in Djidda and Sa'ūd sought in vain to negotiate peace with him. A second attempt of Ṭūsūn Pasha against Taraba (at the end of 1813) was as unsuccessful as the first and the operation of the Egyptians came to an end till the beginning of 1815. In the meanwhile Sa'ūd died on the 8th Djumādā I 1229 = 27th April 1814 in Dar'īya at the age of 68.

IV. 'Abd Allāh b. Sa'ūd (1229—1233 = 27th April 1814—9th Sept. 1818). In the beginning of 1815 Muḥammad 'Alī resumed his march against Taraba, defeated the Wahhābīs at Taraba on the 13th January and took the town; he next advanced against 'Asīr and returned via Ḳunfuda to Mecca. Ṭūsūn Pasha entered Nadjd via Ḥanākīya in March

and seized the fortified town of al-Rass where ʿAbd Allāh b. Saʿūd met him. A longish truce followed and peace negotiations which lasted till 1816. In Sept. 1816 Ibrāhīm Pas̲h̲a, son of Muḥammad ʿAlī, took over the supreme command in Arabia and lead his army amid great privations and fierce fighting for eighteen months up to the gates of Darʿīya (defeat of ʿAbd Allāh at Māwīya on 2nd May 1817, capture of al-Rass in the 21st Oct. 1817 after a three months' siege, storming of Dorama in March 1818). The siege of the capital defended by ʿAbd Allāh and his relatives lasted from the beginning of April to the beginning of Sept. 1818; after the town had fallen on the 6th Sept. ʿAbd Allāh held out a few days longer in the Ḳaṣr Darʿīya and surrendered on the 9th Sept. to the victor who sent him to Cairo with his family and the descendants of Muḥammad b. ʿAbd al-Wahhāb. Muḥammad ʿAlī sent ʿAbd Allāh with his secretary and k̲h̲azandār to Constantinople, where they were all beheaded on the 17th Dec. 1818.

V. After Ibrāhīm Pas̲h̲a had left Nad̲j̲d in the first half of 1819, Mus̲h̲ārī b. Saʿūd, a brother of the executed ʿAbd Allāh, succeeded in establishing himself in Darʿīya; after a short time he was captured by Ḥusain Bey whom Muḥammad ʿAlī sent against him and deported to Egypt but died on the way; the *Chronicle* of Rās̲h̲id al-Ḥanbalī allots the years 1233—5 (1818—1820) to his reign.

VI. Turkī b. ʿAbd Allāh b. Muḥammad b. Saʿūd, 1235—1249 (1820—1834). He had fled to Sedair during the Egyptian invasion and endeavoured to establish himself in Riyāḍ after the death of Mus̲h̲ārī b. Saʿūd (V), but was driven out by the Egyptians. In 1822, however, he succeeded in surprising the weak Egyptian garrison of Riyāḍ, and after fighting with varying success against the governors of the Ḥid̲j̲āz, he finally agreed to pay tribute to Muḥammad ʿAlī. In 1830 he seized the district of Laḥsā which had been occupied by the Turks in 1813 and subdued Baḥrain. Riyāḍ became capital of the new Wahhābī kingdom in place of the destroyed Darʿīya. He was murdered in 1249 (1834) by

VII. Mus̲h̲ārī b. ʿAbd al-Raḥmān b. Mus̲h̲ārī b. Ḥasan b. Mus̲h̲ārī b. Saʿūd, but the latter was attacked in Hufhūf 40 days later and slain by Faiṣal, the son of VI.

VIII. Faiṣal b. Turkī, first reign 1249—1255 (1834—8). In 1837 K̲h̲ālid, a son of Saʿūd (III), rose against him with Egyptian help, took Darʿīya, and defeated Faiṣal at Riyāḍ. K̲h̲ūrs̲h̲īd Pas̲h̲a, the commander of the Egyptian troops, defeated Faiṣal a second time on the 25th Ramaḍān 1254 (10th Dec. 1838) at al-Delem, took him prisoner, and deported him to Egypt.

IX. K̲h̲ālid b. Saʿūd, 1255—7 (1839—1841). After the withdrawal of the Egyptian troops in 1840, he was driven out of Riyāḍ by ʿAbd Allāh b. T̲h̲unaiyān in Dec. 1841 and retired to Djidda, where he died in 1861.

X. ʿAbd Allāh b. T̲h̲unaiyān b. Ibrāhīm b. T̲h̲unaiyān b. Saʿūd, 1257—9 (beginning of 1842 to beg. 1843). After reigning barely a year he was besieged at Riyāḍ by Faiṣal (VIII) who had regained his liberty in 1841, and taken prisoner. He died in confinement.

XI. Faiṣal b. Turkī, second reign 1259—1282 (beg. 1843—beg. Dec. 1865). By a wise and peaceful policy he was able to establish the rule of his dynasty in Nad̲j̲d; in his time began the rise of the Ibn Ras̲h̲īd [q. v.] of Djabal S̲h̲ammar, who were his allies. He was on good terms with Egypt and the Sulṭān. In his reign Palgrave visited the country in 1862-3, and Pelly in 1865. He died of cholera on 13th Rad̲j̲ab 1282 (2nd Dec. 1865).

XII. ʿAbd Allāh b. Faiṣal b. Turkī, first reign 1282—7 (beg. Dec. 1865—beg. 1871). He was dethroned by his brothers in 1287.

XIII. Saʿūd b. Faiṣal b. Turkī, 1287—1291 (1871—4); at the beginning of his reign the Turks, summoned by the banished ʿAbd Allāh, occupied Laḥsā as well as Ḳaṭīf and held them in spite of Saʿūd's repeated attempts to regain them.

XIV. ʿAbd Allāh b. Faiṣal b. Turkī, second reign, 1291—1301 (1874—1884). After Saʿūd's death he regained his throne and held it against his brother Muḥammad and Saʿūd's sons, who disputed it with him. In 1883 he was involved in war with Muḥammad b. Ras̲h̲īd of Ḥāʾil and was banished by his nephews, the sons of Saʿūd, in the beginning of 1884. As a result,

XV. Muḥammad b. Saʿūd came to the throne; his rule was of short duration; he was succeeded by his uncle

XVI. ʿAbd al-Raḥmān b. Faiṣal, ?—1886?; he was dethroned by Muḥammad b. Ras̲h̲īd, who placed on the throne

XVII. ʿAbd Allāh b. Faiṣal (for the third time, 1887?—1888?). The latter died probably in 1888 and Riyāḍ then became a dependency of Ḥāʾil in spite of ʿAbd al-Raḥmān's repeated attempts to regain the vacant throne. In 1881 Muḥammad b. Ras̲h̲īd conquered Riyāḍ and in 1892 appointed

XVIII. Muḥammad, the third son of Faiṣal, Amīr of Riyāḍ. After the death of Muḥammad (date unknown) Riyāḍ seems to have been governed by Ibn Ras̲h̲īd's officials.

XIX. ʿAbd al-ʿAzīz b. ʿAbd al-Raḥmān b. Faiṣal, since the beginning of 1902. With the help of S̲h̲aik̲h̲ Mubārak of Kuwait, with whom his father had found a refuge, he regained Riyāḍ in March 1902 by a coup d'état and successfully held it against the Ibn Ras̲h̲īd of Ḥāʾil, who finally called in the Turks to help them. Nevertheless, he succeeded owing to the anarchy prevailing in Ḥāʾil and with the help of the people, who were attached to the house of Saʿūd, in regaining the supremacy of the kingdom of Riyāḍ.

(J. H. MORDTMANN.)

GENEALOGY OF THE IBN SA'ŪD.

A. (Older Line).

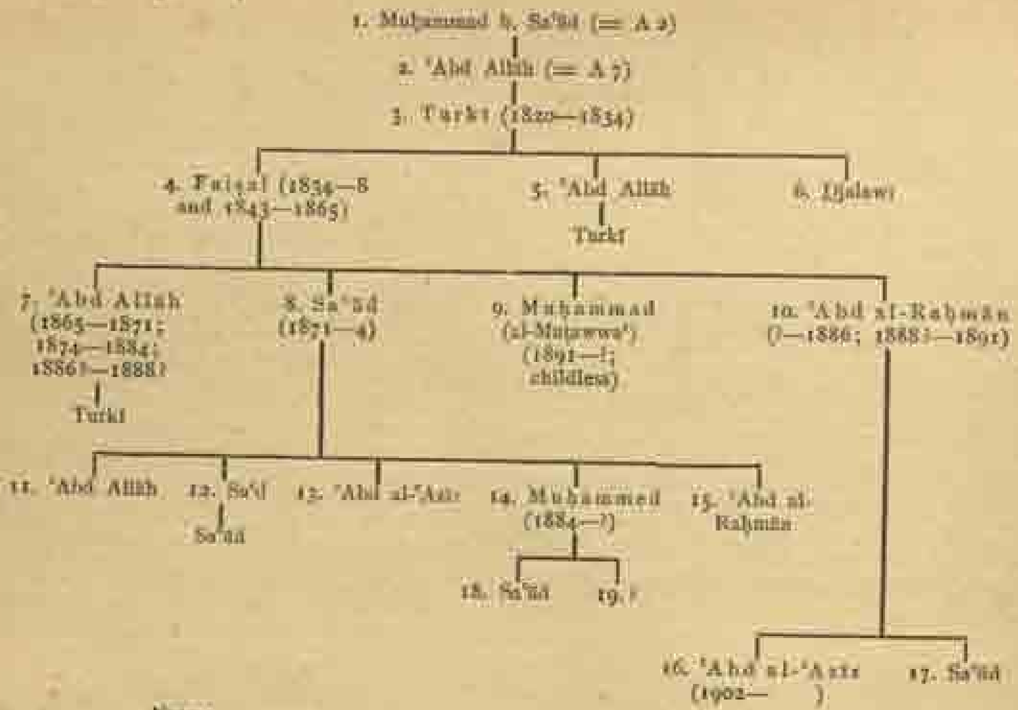
1. Sa'ūd b. Muḥammad b. Muḳrin (d. about 1735)

2. Muḥammad (1735—1766) 3. Farḥān 4. Thunaiyān 5. Meshāri

6. 'Abd al-'Azīz (1766—1803) 7. 'Abd Allāh (see below B.)

8. Sa'ūd (1803—1814) 9. 'Abd Allāh 10. 'Abd al-Raḥmān 11. 'Omar

Sa'ūd (son of 9)



12. 'Abd Allāh (reg. 1814—8) 13. Faiṣal 14. Nāṣir 15. Hadhlūl 16. Sa'd 17. Khālid (1839—1841) 18. 'Abd al-Raḥmān 19. 'Omar 20. Ibrāhīm 21. Meshāri (1819—1820) 22. Turkī 23. Fahd (Fuhaid?) 24. Ḥasan

25. Sa'd 26. Naṣr 27. Muhammed [28. Khālid]

Notes:

6. ('Abd al-'Azīz) was 82 at his death in 1803 (Mengin, ii. 467) cf. Scott-Waring, p. 177 of the French transl.).
8. (Sa'ūd) 68 at his death (Mengin, ii. 20), Rousseau and Burckhardt say 45—50.
9. ('Abd Allāh) in 1815 brought about the truce of al-Rass (Mengin, ii. 41 *sqq.*); his son Sa'ūd was killed in 1818 after the capture of Dar'īya (ib. p. 131; Shānīzāde, ii. 383).
10. ('Abd al-Raḥmān) deported to Egypt in 1818.
11. ('Omar) deported to Cairo with his sons in 1818 or 1820.
12. Mengin gives a portrait of 'Abd Allāh.
13. (Faiṣal) fell at the siege of Dar'īya in 1818 (Mengin, ii. 129).
14. (Nāṣir) fell on a raid against Muscat (Burckhardt, ii. 122).
16. (Sa'd), 17. Khālid, 23. (Fahd), 24. (Ḥasan) deported to Cairo in 1818.
22. (Turkī) led a raid in to 'Irāḳ and Syria (Burckhardt, ii. 122).
25. (Sa'd) defended a fort of Dar'īya in 1818 and was deported to Cairo with his brothers Naṣr and Muḥammad in 1818 (Mengin, ii. 130, 133, 158).
28. (Khālid) is only mentioned by Aiyūb Ṣabri, p. 266, probably a confusion with 17.

B. (Younger Line).

Notes:

2. ('Abd Allāh) mentioned in Mengin, ii. 482 (a. 1778) and Corancez, p. 46 (a. 1803).
3. (Turkī), according to Blunt, ii. 269, had two other brothers, Ibrāhīm and Muḥammad.
5. ('Abd Allāh) cf. Blunt, ii. 266.
6. (Djalawī) still living in 1877, s. Doughty, ii. 428; he had five sons: Fahd, Muḥammad, Sa'ūd, Musā'id, 'Abd al-Muḥsin.
9. (Muḥammad), according to Nolde, p. 89, not 40 till 1892; doubtful if correct, cf. Palgrave, i. 169 sq.; Doughty, ii. 430, and Huber, *Journal*, p. 162.
10. ('Abd al-Raḥmān), according to Palgrave (ii. 75), in 1863 aged 10—12; Blunt, ii. 267.

IBN SHADDĀD, BAHĀ' AL-DĪN ABU 'L-MAḤĀSIN YŪSUF B. RĀFI', an Arab biographer, born at Mōṣul in 539 (1145), studied there and in Baghdād and became a professor in his native town in 569 (1173). In 583 (1188) he made the pilgrimage and on his return journey went to Damascus, where he entered the service of Ṣalāḥ al-Dīn who made him Ḳāḍi 'l-'Askar of Jerusalem. After Ṣalāḥ al-Dīn's death he went to Ḥalab in 591 (1195) and was made a ḳāḍī. He had a very influential and lucrative position at Ḥalab under al-Ẓāhir and al-'Azīz and he used it to found and amply endow madrasas. He spent the last years of his life as a private individual till his death in 632 (1234). His chief work is the biography of Saladin ed. by A. Schultens, 1732—1755; oriental ed. Cairo 1317. English version by Conder, *The life of Saladin by Bohā al-dīn compared with the original Arabic and annotated*, London 1897. Cf. also *Recueil des Historiens des Croisades, Hist. Orient.*, vol. iii.

Bibliography: Ibn Khallikān, *Wafayāt*, ed. Wüstenfeld, N⁰. 852 (very full); Brockelmann, *Gesch. d. arab. Litt.*, i. 316.

IBN SHADDĀD, 'IZZ AL-DĪN ABŪ 'ABD ALLĀH MUḤAMMAD B. 'ALĪ B. IBRĀHĪM, an Arab historian, often confused with the preceding, d. 684 (1285). He is the author of an important work on Syria and al-Djazīra entitled *al-A'lāḳ al-khaṭīra fī Dhikr Umarā' al-Shā'm wa 'l-Djazīra*, on which cf. Sobernheim, *Ibn Shaddāds Darstellung der Geschichte Ba'albeks im Mittelalter* in the *Centenario della nascita di M. Amari*, ii. 152 sqq.

Bibliography: Brockelmann, *Geschichte*, i. 482; *Cat. Leid.*², II, 5 sq.

IBN SHĀKIR. [See AL-KUTUBĪ.]

IBN SĪDA, ABU 'L-ḤASAN 'ALĪ B. ISMĀ'ĪL (or AḤMAD or MUḤAMMAD) B. SĪDA, philologist, man of letters, and logician, born at Murcia in Spain and died in Denia aged about 60 on Sunday, 4 days before the end of Rabī' II 458 = 25th March 1066.

Ibn Sīda was blind and studied with his father, also blind, who was a not unimportant philologist, Abū 'l-'Alā' Ṣā'id al-Baghdādī, Abū 'Omar Aḥmad b. Muḥammad al-Ṭalamankī, Ṣāliḥ b. al-Ḥasan al-Baghdādī and others. He attached himself to the court of the Emīr Abu 'l-Djaish Mudjāhid b. 'Abd Allāh al-'Āmirī and on his death to his successor, the Emīr al-Muwaffaḳ. As he had previously avoided the latter on account of a certain disdain he now sent him a long poem of apology.

We possess only three works by him 1. *Kitāb al-Mukhaṣṣaṣ*, a large dictionary, in which the words are arranged in groups according to definite classes, printed in 17 vols. Būlāḳ 1316—1321. 2. *Kit. al-Muḥkam wa 'l-Muḥīṭ al-A'ẓam*, like-

wise a large and excellent dictionary in which the words are alphabetically arrayed in the order of the first radical, but in this order: *ʿain, ḥā, hā, khā, ghain, ḳāf, kāf, djīm, shīn, ḍād, ṣād, sīn, zāy, ṭā, dāl, tā, ẓā, dhāl, thā, rā, lām, nūn, fā, bā, mīm, hamza, yā, wāw*, Brit. Mus., *Suppl.*, Nº 854; Khed. Libr., *Fihr.*, IV, 184 (incomplete copy). 3. *Kit. Sharḥ Mushkil al-Mutanabbī*, commentary on difficult verses in the *Dīwān* of al-Mutanabbī, Khed. Libr., *Fihr.*, iv. 273.

Bibliography: Ibn Khallikān, *Wafayāt*, Cairo 1310, i. 342; al-Suyūṭī, *Bughyat al-Wuʿāt*, Cairo 1326, p. 327; Yāḳūt, *Irshād al-Arīb*, v. 84; al-Ṣafadī, *Nakt al-Himyān fī Nukat al-ʿUmyān*, Cairo 1329, p. 204; al-Ḍabbī, *Bughyat al-Multamis*, p. 405, Nº. 1205; Ṣāʿid al-Andalusī, *Kitāb Ṭabaḳāt al-Umam*, Beirūt 1912, p. 77; Ibn Bashkuwāl, *Kitāb al-Ṣila*, p. 410, Nº. 889; Brockelmann, *Gesch. d. ar. Litt.*, i. 308 *sq.*, vgl. ii. 697. (MOH. BEN CHENEB.)

IBN AL-SIKKĪT, ABŪ YŪSUF YAʿḲŪB B. ISḤĀḲ, known by the name of IBN AL-SIKKĪT, a celebrated philologist and grammarian, belonged to Dawraḳ, a village in al-Ahwāz (Khūzistān), but was apparently born in Baghdād. After studying with his father who was an excellent lexicologist, Abū ʿAmr Isḥāḳ b. Murār al-Shaibānī, al-Farrāʾ, al-Aṣmaʿī, Abū ʿUbaida, and others, he went to the Beduins of whom it was then thought that they had best preserved the Arabic language. Returning to Baghdād he settled as a teacher in the Bridge quarter. He then became a tutor in the family of Ibn Ṭāhir in Sāmarrā, till the Caliph al-Mutawakkil entrusted him with the education of his sons al-Muʿtazz and al-Muʾaiyad. His adherence to the cause of the ʿAlids, which he did not conceal from the Caliph, led him to a cruel death. According to some, he was trampled to death by Turkish soldiers, according to others, his tongue was torn out. He died on Radjab 5 244 = Oct. 17, 858 aged 58; others say he died in 243, 245 or 246.

We possess the following works by him: 1. *Kitāb Iṣlāḥ al-Manṭiḳ*, a philological work publ. in Cairo n. d. 2. *Kitāb al-Alfāẓ*, ed. Cheikho, Beirut 1897, with the commentary of al-Khaṭīb al-Tibrīzī, *Kanz al-Ḥuffāẓ*, 1895—1898; 3. commentary on the *Dīwān* of Khansāʾ, used by Cheikho in his edition (Beirut 1896); 4. a commentary on the *Dīwān* of ʿUrwa b. al-Ward in *Madjmūʿ mushtamil ʿalā khamsa Dawāwīn*, etc., Cairo 1293 (cf. Nöldeke, *Die Gedichte des ʿUrwa ibn Alward*, Göttingen 1863); 5. *Kitāb al-Ḳalb wa ʾl-Ibdāl*, ed. by Haffner, *Texte zur arab. Lexikographie*, Leipzig 1905 (p. 3—65); 6. Commentary (?) on the *Dīwān* of Ṭufail al-Ghanawī, see F. Krenkow in *Journ. Roy. As. Soc.*, 1907; 7. *Kitāb al-Aḍdād*, ed. Haffner, Beirut 1914; 8. commentary on the *Dīwān* of Ḳais b. al-Khaṭīm, ed. Th. Kowalski, Leipzig 1914.

Bibliography: *Fihrist*, i. 72; Ibn Khallikān, *Wafayāt*, Cairo 1310, ii. 309; Abu ʾl-Fidāʾ, *Taʾrīkh*, ed. Constantinople 1286, ii. 43; al-Suyūṭī, *Bughyat al-Wuʿāt*, Cairo 1326, p. 418; al-Anbārī, *Nuzhat al-Alibbāʾ*, Cairo 1294, p. 238; de Sacy, *Anthol. Gramm.*, p. 137; Cheikho, in the introduction to his edition; Moh. Ben Cheneb *Etude sur les pers. ment. dans l'Idjāza du Cheikh ʿAbd al-Ḳādir al-Fāsī*, Nº. 237; Brockelmann, *Gesch. d. arab. Litt.*, i. 117 *sq.*; Huart, *A Hist. of Arabic Lit.*, p. 152.

(MOH. BEN CHENEB.)

IBN SĪNĀ, ABŪ ʿALĪ AL-ḤUSAIN IBN ʿABD ALLĀH (Lat. AVICENNA from Hebr. AVEN SINA), was for centuries and still is in parts of the Muslim east considered the prince of all learning *al-Shaikh al-Raʾīs*. His biography, given by Ibn Abī Uṣaibiʿa (ed. A. Müller, ii. 2 *sqq.*) was compiled by his pupil Abū ʿUbaid al-Djūzdjānī from his own notes. According to it he was born in 370 = 980 at Afshana near Bukhārā. His father had moved from Balkh to Bukhārā, was appointed governor of the citadel of Kharmaitha, and had married in Afshana. After the birth of two sons he resumed his residence in Bukhārā, where the latter received their education. Up to his tenth year Ibn Sīnā had a tutor in Ḳurʾān and Adab. He was introduced to secular learning by Ismāʿīlite propagandists who had been received in his father's house, but their speculations on the soul and the intelligence made no great impression on him at first. After studying fiḳh he was taught logic, geometry, and astronomy by Abū ʿAbd Allāh al-Nātilī. The student who developed early both physically and mentally soon overtook his teacher and studied by himself physics, metaphysics and medicine. His practice of medicine soon enabled him to understand it better but metaphysics only became clear to him after studying one of al-Fārābī's works. This decided his philosophical development, al-Fārābī's metaphysical and logical speculations which originated in the Neo-Platonic commentaries and paraphrases of Aristotelian works, determined the direction of his thought. He was then 16 or 17 years of age.

At the same time the marvellous boy had the good fortune to cure the sulṭān of Bukhārā, Nūḥ b. Manṣūr, and as a result received admission to his library. Endowed with a marvellous memory and rapid power of assimilating knowledge, in a short time he gained here all the knowledge that enabled him to systematise all the learning of his time. He began to write at the age of 21; his style as a rule is clear and comprehensive.

After the death of his father — he was now 22 — Ibn Sīnā lead an unsettled life, full of work and enjoyment but also of disappointments. When at rest at the courts of Djurdjān, Raiy, Hamadhān and Iṣfahān, he wrote his great works, of which we may specially mention the philosophical encyclopaedia, *Kitāb al-Shifāʾ* (Teheran, 1313), and his chief book on medicine, *al-Ḳānūn fi ʾl-Ṭibb* (Teheran 1284, Būlāḳ 1294); on his travels he wrote synopses of his larger works and treatises of various kinds. Sometimes his activities were scientific, sometimes political, the latter with slight success. He is important as the universal encyclopaedist, who fixed the system of learning for centuries following.

Our philosopher spent the last years of his life under the protection of ʿAlāʾ al-Dawla in Iṣfahān. On the latter's campaign against Hamadhān in 428 = 1037, Ibn Sīnā fell ill on the way and died in Hamadhān where his grave is still shown. His works were much read, annotated and translated into western languages. He lives in the popular tradition of the east as a magician, a kind of 'Pied Piper'.

Ibn Sīnā's doctrines which still possess great authority in theological, philosophical, and medical circles of the east in spite of their partial refutation by al-Ghazālī, cannot be fully expounded here but only briefly indicated and characterised.

In logic and epistemology he closely follows al-Fārābī. This is true also of the question of universals which is in a way of metaphysical importance. The universal is said to exist in the mind of God and the angels (spirits of the spheres) independent of the existence of the many particulars. It emanates from the divine spirit communicated by multiple intermediation on the one side to the particular things and on the other to human intelligence in which plurality is raised to a concept of unity and universality. More Neo-Platonic than Aristotelian is the view that the concept is primarily a gift of the super-human spirit rather than a product of the abstractive faculty of the human reason.

Although he expounds it fully, Ibn Sīnā only considers logic an introductory science. Philosophy proper is either theoretical or practical: the former is divided into physics, mathematics, and metaphysics, with their applications, the latter into ethics, economics and politics. Ibn Sīnā paid little attention to the practical parts of philosophical science. The series, physics, mathematics, metaphysics, marks a gradual advance from the material to the abstract. It is true that metaphysics is generally defined as the science of all being, so that immaterial being is the problem and not the direct object of this science, but this problematic becomes the main point in philosophical expositions.

Ibn Sīnā's physics on the whole is based on Aristotelian tradition, although there are also Neo-platonic influences here: particularly for example in the doctrine that earthly happenings are influenced by the stars, not through their warmth but through the intermediary of light. Neo-Platonic also are the speculations on the intelligence, in which results his otherwise finely developed psychology.

Ibn Sīnā had most influence through his medicine, in the west down to the XVIIth century, in the east still now. He is the Arab Galen. How far he incorporated observations of his own into this science, has still to be investigated. In theory at least he gives experience a large place and discusses the conditions, under which the healing effect of a medicine shows itself.

Ibn Sīnā's paraphrase of Aristotelian metaphysics (leaving aside his little known mathematics) besides neo-Platonic elements contains an attempt at reconciliation with Muslim theology. The dualism mind and matter (actuality and potentiality), God and world, is more marked in him than in al-Fārābī, and the doctrine of the immortality of the individual souls is more clearly laid down. Matter is defined by him as possible being or merely passive possibility and creation is said to consist in granting actual existence to this possible being. Only in the Deity are being and existence one, but in all that is not the Deity, existence is an attribute of being. In theological terminology, the granting of real existence is called creation, but it is an eternal creation. God, the absolutely necessary and uniform being, is also a necessary cause, which must work from all eternity, whose effect, the world, is therefore eternal. In itself this is possible (contingent), from the point of view of its divine cause it is necessary. Ibn Sīnā distinguishes the contingency of this at once possible and necessary being from the contingency of all earthly happenings, that exist for a time, the sublunar world is the world of the merely possible.

The metaphysical doctrine of the soul in particular induced our philosopher to mystic reflections, some in poetical form. Great danger forced him once to escape his enemies in Ṣūfī guise. It may therefore have been in hours of depression, that there was a necessity for him to use the language of mysticism. It is therefore an occasional mysticism which crowns the building of his system but does not carry or support it.

Bibliography: Ibn Sīnā's bibliography and the older literature is given in C. Brockelmann, *Geschichte der arab. Litteratur*, i. 452 *sqq.*; also printed are: *Mabḥath 'an al-Ḳuwa al-nafsāniya*, ed. van Dyck, Cairo, 1325; *Manṭiḳ al-Mashriḳiyīn wa 'l-Ḳaṣīda al-muzdawidja fi 'l-Manṭiḳ*, Cairo 1910; *Kit. al-Nadjāt*; *Tis' Rasā'il fi 'l-Ḥikma wa 'l-Ṭabī'iyāt*, Constantinople 1298; *Kitāb al-Siyāsa* in *Traités inédits d'anciens philosophes arabes*, publ. par L. (T. J. DE BOER.)

IBN SĪRĪN, MUḤAMMAD, was a contemporary of Ḥasan al-Baṣrī [q. v.]. His father is said to have been a tinker of Djardjarāyā, who was carried off as a slave by Khālid b. al-Walīd from 'Ain al-Tamr. His mother Ṣafiya was a client of Abū Bakr. Muḥammad belonged to the second generation of transmitters of tradition; his authorities were Abū Huraira [q. v.], 'Abd Allāh b. 'Omar [q. v.], Anas b. Mālik [q. v.], etc. He settled in Baṣra, was noted for his ascetic piety like his sister Ḥafṣa (cf. Ibn Sa'd, *Ṭabaḳāt*, viii. 355 *sqq.*), and was considered an authority on the interpretation of dreams. Treatises on the latter subject were therefore frequently written by later authors under his name, for example the *Muntakhab al-Kalām fī Tafsīr al-Aḥlām*, Cairo 1868, and on the margin of

Ta'bīr of 'Abd al-Ghanī al-Nābulusī [q. v.], Vol. I.; the *Kitāb Ta'bīr al-Ru'yā*, mentioned as early as *Fihrist*, p. 316, Cairo 1281, Lakhnau 1874, Bombay 1879, and the *Kitāb al-Djawāmi'*, Cairo 1892. Cf. also Hirschfeld in *Verhandl. des XIII. internat. Orient. Kongresses*, Hamburg, p. 397; Steinschneider in *Zeitschr. der Deutsch. Morgenl. Gesellsch.*, xvii. 243 *sqq.*; Fischer, ib., lxviii. 304, Note 2 and the reference there given. Ibn Sīrīn died 110 (728).

Bibliography: Ibn Ḳutaiba, *Ma'ārif*, p. 226; Nawawī, ed. Wüstenfeld, p. 106; *Ṭabaḳāt al-Ḥuffāẓ*, iii. 9; Ibn Sa'd, *Ṭabaḳāt*, vii. i. 140—150; Ibn Khallikān, *Wafayāt*, ed. Wüstenfeld, N°. 576; Brockelmann, *Geschichte etc.*, i. 66.

IBN SURAIDJ, Abu 'l-'Abbās Aḥmad b. 'Umar b. Suraidj, was, according to the Arab biographers, one of the greatest Shāfi'ī teachers of the third century. Many celebrated Shāfi'īs were his pupils, and he attained such repute that he was considered by many to be superior to all other Shāfi'ī students, even al-Muzanī. He was ḳāḍī in Shīrāz and wrote treatises refuting the Ẓāhirīs, etc. The number of his works is placed at 400, but none of them now exists. Only a few of the titles of his works are known. He died at the age of 57 in Baghdād in 306 = 918.

Bibliography: Ibn Khallikān, *Wafayāt al-A'yān* (ed. Wüstenfeld, N°. 20; Ibn Khallikān's *Biographical Dictionary translated* by M. G. de Slane, Paris 1842, i. 46 *sqq.*; Abu 'l-Maḥāsin (ed. Juynboll), ii. 203; F. Wüstenfeld, *Der Imâm al-Schâfi'i und seine Anhänger*, Göttingen 1891, N°. 75; *Fihrist*, p. 213.

(Th. W. Juynboll.)

IBN SURAIDJ, 'Ubaid Allāh Abū Yaḥyā, a Meccan singer and composer of the older Umaiyad period, was the son of a Turkish slave in Mecca and a client of the Banū Nawfal b. 'Abd Manāf, or of the Banū 'l-Ḥārith b. 'Abd al-Muṭṭalib. He began his career as a musician in the caliphate of 'Othmān. He is said to have been the first to introduce the Persian lute into Mecca and to have learned its use from the Persian workmen imported by Ibn al-Zubair to rebuild the Ka'ba. When at the height of his fame he was on intimate terms with 'Omar b. Abī Rabī'a [q. v.] whose love poems he set to music; but he also enjoyed a great reputation as a composer of elegies. But as his art could only be transmitted orally, it was soon forgotten after his death: in the time of the singer Ibrāhīm his tunes were only known to a few old people. He died in the reign of Hishām (105—125 = 724—743).

Bibliography: Abu 'l-Faradj al-Iṣbahānī *Kitāb al-Aghānī*, i. 97—129.

(C. Brockelmann.)

IBN al-TA'ĀWĪDHĪ. [See al-Ta'āwīdhī.]

IBN TAGHRIBERDI. [See Abu 'l-Maḥāsin.]

IBN TAIMĪYA, Taḳī al-Dīn Abu 'l-'Abbās Aḥmad b. 'Abd al-Ḥalīm b. 'Abd al-Salām b. 'Abd Allāh b. Muḥammad b. Taimīya al-Ḥarrānī al-Ḥanbalī, Arab theologian and jurist, was born on Monday 10th Rabī' I 661 = 22 January 1263 at Ḥarrān, near Damascus. Fleeing from the exactions of the Mongols, his father had taken refuge at Damascus with all his family, in the middle of the year 667 = 1268. In the capital of Syria, the young Aḥmad devoted himself to the study of Muslim sciences and followed his father's lectures and those of Zain al-Dīn Aḥmad b. 'Abd al-Dā'im al-Maḳdisī, Nadjm al-Dīn b. 'Asākir, Zainab bint Makkī, etc.

He was not yet 20 when he completed his studies, and at the death of his father in 681 = 1282, he succeeded him as professor of Ḥanbalī law. Each Friday he expounded the Ḳur'ān *ex cathedra*. Well versed in the Ḳur'ānic sciences, Ḥadīth, law, theology etc., he defended the sound tradition of the earlier Muslims by arguments which, although taken from the Ḳur'ān and Ḥadīth, had hitherto been unknown; but the freedom of his polemics made him many enemies among the scholars of the other orthodox schools. In 691 = 1292 he made the pilgrimage to Mecca. In Rabī' I 699 (1299) or 698 at Cairo he gave to a question sent from Ḥamā on the attributes of God, a "response" which displeased the Shāfi'ī doctors, aroused public opinion against him, and cost him his post of professor. Nevertheless he was appointed the same year to preach the Holy War against the Mongols and for this purpose went next year to Cairo. He was present in this capacity at the victory of Shaḳḥab, near Damascus, won over the Mongols. After having in 704 = 1305 fought against the people of Djabal Kasrawān in Syria, including Ismā'īlīs, Nuṣairī's, Ḥākimīs, who believed in the infallibility of 'Alī b. Abī Ṭālib and considered the Companions unbelievers, neither prayed nor fasted, ate pork etc. (Mar'ī, *Kawākib*, p. 165). He went in 705 = 1306-7 to Cairo along with the Shāfi'ī ḳāḍī, where, after five sittings of the council of judges and notables in the Sulṭān's audience-hall who had accused him of anthropomorphism he was condemned to be interned with his two brothers in the dungeon (*djubb*) of the mountain citadel; he remained there a year and a half. In Shawwāl 707 (1308), he was examined regarding a work which he had written against the Ittiḥādīya [v. ittiḥād] but the evidence he gave disarmed his enemies at once. Sent with the post back to Damascus, he was forced to return after one stage of the journey and for political reasons was imprisoned in the ḳāḍī's prison for a year and a half, which he spent in teaching the principles of Islām to those under confinement. But after a few days of liberty he was shut up in the fortress (*burdj*) of Alexandria for eight months. He then returned to Cairo where, although he refused Sulṭān al-Nāṣir a *fatwā* allowing him to revenge himself on his enemies, he obtained the post of professor in the school founded by this prince.

In Dhu 'l-Ḳa'da 712 = Febr. 1313, he was authorised to accompany the army departing for Syria, and after going through Jerusalem, he re-entered Damascus after an absence of seven years and seven weeks. He then resumed his duties as professor, but in Djumādā II 718 = August 1318, he was forbidden by royal edict to give *fatwā's* on the oath of repudiation (to swear to repudiate a wife for example if something is done or not done), a question on which he had allowed himself several concessions not admitted by the jurists of the other three orthodox schools (Ibn al-Wardī, *Ta'rīkh*, ii. 267) who hold that he who takes such an oath, although he is bound to fulfil his contract, is liable to an arbitrary punishment.

Refusing to obey this order he was condemned to imprisonment in the citadel of Damascus in Radjab 720 = August 1320. After 5 months and 18 days he was set at liberty by order of the sulṭān. He resumed his old habits till his enemies learned of his

fatwā regarding the visitation of tombs of saints and prophets, which he had issued in 710 = 1310, and in Sha'bān 726 = July 1326 he was by the Sulṭān's order interned in the citadel of Damascus. He was allotted a room, in which attended by his brother he devoted himself to writing a commentary on the Ḳur'ān, pamphlets against his detractors and entire volumes on the questions which had resulted in his imprisonment. But when these works came to the knowledge of his enemies, he was deprived of his books, paper and ink. This was a terrible blow to him, and although he sought relief in prayer and the recitation of the Ḳur'ān, he fell ill and died in twenty days in the night of Sunday-Monday 20th Dhu 'l-Ḳa'da 728 = 26-27 Sept. 1328. The people of Damascus who held him in great honour, gave him a splendid funeral and it was estimated that 200,000 men and 15,000 women attended his obsequies at the Ṣūfī cemetery. Ibn al-Wardī composed his funeral elegy.

Although belonging to the Ḥanbalī school, Ibn Taimiya did not follow all its opinions blindly but considered himself a *mudjtahid fi 'l-madhhab* [s. MUDJTAHID]. His biographer Mar'ī in *Kawākib* (p. 184 *sqq.*) gives a certain number of points on which Ibn Taimiya rejected the *taḳlīd* [q. v.] and even the *idjmā'* (consensus) [q. v.]. In the majority of his works he claims to follow the letter of the Ḳur'ān and the Ḥadīth but he does not think it wrong to employ *ḳiyās*, reasoning by analogy (notably *Madjmū'at al-Rasā'il al-kubrā*, i. 207) in his polemics; indeed he devoted a whole *risāla* (*op. cit.*, ii. 217) to this method of reasoning.

A bitter enemy of innovations (*bida'*), he attacked the cult of saints and pilgrimages to tombs: did not the Prophet say: "One should only journey to three mosques: the sacred mosque of Mecca, that of Jerusalem, and mine" (*op. cit.*, ii. 93). Even a journey solely undertaken to visit the tomb of the Prophet is an act of disobedience (*ma'ṣiya*) (Ibn Ḥadjar al-Haitamī, *Fatāwī*, p. 87). On the other hand he considered a visit paid to the tomb of a Muslim, an illicit act, following the opinion of al-Sha'bī and Ibrāhīm al-Nakha'ī, only if it necessitated a journey and if it had to take place on a fixed day. With these restrictions he considered it a traditional duty (Ṣafī al-Dīn al-Ḥanafī, *al-Ḳawl al-djalī*, p. 119 *sqq.*).

An inveterate anthropomorphist Ibn Taimiya interpreted literally all the passages in the Ḳur'ān and tradition referring to the Deity. He was so imbued with this belief that, according to Ibn Baṭṭūṭa, he said one day from the pulpit in the mosque of Damascus: "God comes down from heaven to earth, just as I am coming down now", and he came down one of the steps of the pulpit staircase. (cf. especially *Madjm. al-Ras. al-kubrā*, i. 387 *sq.*).

Both by word and pen he combatted all the Muslim sects, Khāridjī, Murdjī, Rāfiḍī, Ḳadarī, Mu'tazilī, Djahmī, Karrāmī, Ash'arī, etc. (*Kit. al-Furḳān*, passim, in the *Madjmū'a* quoted, i. p. 2). al-Ash'arī's dogmatics, he said, is only a fusion of the opinions of the Djahmīs, Nadjdjārīs, Ḍirārīs, etc. He particularly objected to the explanation given of predestination (*ḳadar*), the divine attributes (*asmā'*) and judgments (*aḥkām*), execution of the threat (*infādh al-wa'īd*), etc. (*op. cit.*, i. 77, 445 *sqq.*).

In many cases he disagreed with the opinion of the principal jurists. For example: 1. He rejected the practice of *taḥlīl* by which a woman definitively divorced by triple repudiation (*ṭalāḳ*) could be married again by her husband after having contracted a intermediate marriage with a man who had agreed to repudiate her immediately afterwards (*muḥallil*, he who makes permissible). 2. Repudiation pronounced during a menstrual period is void. 3. The taxes which are not prescribed by divine order are admissible and if one pays them he is freed from *zakāt*. 4. To hold an opinion contrary to *idjmā'* is neither infidelity nor impiety.

He also attacked the reputation of men whose authority is recognised in Islām: 'Omar b. al-Khaṭṭāb made many mistakes, he said in the pulpit of the mosque of al-Djabal in al-Ṣāliḥiya. 'Alī b. Abī Ṭālib made three hundred mistakes, was another of his statements. He also violently attacked al-Ghazālī, Muḥyī 'l-Dīn Ibn 'Arabī, 'Omar b. al-Fāriḍ and the Ṣūfīs in general. As to the first, he attacked the philosophical views laid down in his *Munḳidh min al-Ḍalāl* and even in his *Iḥyā'*, which contains a large number of apocryphal ḥadīths. "The Ṣūfīs and the *Mutakallimūn* are from the same valley" (*min wādin wāḥid*), he declared. Greek philosophy and its Muslim representatives, notably Ibn Sīnā and Ibn Sab'īn, were attacked in the great vigour by Ibn Taimiya. "Does not philosophy lead to unbelief? Is it not for a great part the cause of the different schisms which have been produced in the bosom of Islām.

Islām being sent to replace Judaism and Christianity it naturally incited Ibn Taimiya to attack these both religions. After accusing the Jews and Christians of changing the meaning of a certain number of words in their sacred books (see his works, Nrs 35, 40, 43 and 45 below), he wrote pamphlets against the maintenance or building of synagogues and particularly of churches (cf. Nr. 46).

Muslim scholars are not agreed on the orthodoxy of Ibn Taimiya. Among those who consider him at the very least an heretic we may mention: Ibn Baṭṭūṭa, Ibn Ḥadjar al-Haitamī, Taḳī al-Dīn al-Subkī and his son 'Abd al-Wahhāb, 'Izz al-Dīn Ibn Djamā'a, Abū Ḥaiyān al-Ẓāhirī al-Andalusī, etc. However, those who praise are perhaps more numerous than his detractors: his disciple Ibn Ḳaiyim al-Djawziya, al-Dhahabī, Ibn Ḳudāma, al-Ṣarṣarī al-Ṣūfī, Ibn al-Wardī, Ibrāhīm al-Kurānī, 'Alī al-Ḳārī al-Harawī, Maḥmūd al-Ālūsī, etc. This divergence of opinion on Ibn Taimiya exists to this day: Yūsuf al-Nabhānī does not spare him in his *Shawāhid al-Ḥaḳḳ fi 'l-Istighātha bi-Saiyid al-Khalḳ* (Cairo 1323), which was refuted by Abu 'l-Ma'ālī al-Shāfi'ī al-Salāmī in his *Ghāyat al-Amānī fi 'l-Radd 'ala 'l-Nabhānī* (Cairo 1325).

We know that the founder of the Wahhābīs was connected with the Ḥanbalī scholars of Damascus and it is natural he made use of their works and particularly of Ibn Taimiya's teaching and that of his pupil Ibn Ḳaiyim al-Djawziya [q. v.]. The principles of the new doctrine are those for which the great Ḥanbalī theologian struggled all his life. (Cf. WAHHĀBĪS.)

Of the 500 works said to have been written by Ibn Taimiya only the following survive: 1°. *Kitāb al-Furḳān bain al-Ḥaḳḳ wal-Bāṭil*; 2°. *Ma'ārij al-Wuṣūl*, a refutation of the philosophers and of the Karmaṭians, who say that the Prophets in certain circumstances may lie, etc.; 3°. *al-Tabyān fī*

Nuzūl al-Ḳur'ān; 4°. *al-Waṣiya fi 'l-Dīn wa 'l-Dunyā*, called *al-Waṣiya al-ṣughrā*; 5°. *Ris. fi 'l-Nīya fi 'l-ʿIbādāt*; 6°. *Ris. fi 'l-ʿArsh hal huwa kurī am lā*; 7°. *al-Waṣiya al-kubrā*; 8°. *al-Irāda wa 'l-Amr*; 9°. *al-ʿAḳīda al-wāsiṭīya*; 10°. *al-Munāẓara fi 'l-ʿAḳīda al-wāsiṭīya*; 11°. *al-ʿAḳīda al-Ḥamawīya al-kubrā*; 12°. *Ris. fi 'l-Istighātha*; 13°. *al-Iklīl fi 'l-Mutashābih wa 'l-Ta'wīl*; 14°. *Ris. al-Ḥalāl*; 15°. *Ris. fi Ziyārat Bait al-Maḳdis*; 16°. *Ris. fi Marātib al-Irāda*; 17°. *Ris. fi 'l-Ḳaḍā' wa 'l-Ḳadar*; 18°. *Ris. fi 'l-Iḥtidjādj bi 'l-Ḳadar*, 19°. *Ris. fi Daradjāt al-Yaḳīn*; 20°. *Kit. Bayān al-Hudā min al-Ḍalāl fi Amr al-Hilāl*; 21°. *Ris. fi Sunnat al-Djumuʿa*; 22°. *Tafsīr al-Muʿawwidhatain*, 23°. *Ris. fi 'l-ʿUḳūd al-muḥarrama*; 24°. *Ris. fi Maʿna 'l-Ḳiyās*; 25°. *Ris. fi 'l-Samāʿ wa 'l-Raḳṣ*; 26°. *Ris. fi 'l-Kalām ʿala 'l-Fiṭra*, 27°. *Ris. fi 'l-Adjwiba ʿan Aḥādīth al-Ḳuṣṣāṣ*; 28°. *Ris. fi Rafʿ al-Ḥanafī Yadaihi fi 'l-Ṣalāt*; 29°. *Kit. Manāsik al-Ḥadjdj*; — these short treatises have been collected in a collection entitled *Madjmūʿat al-Rasā'il al-kubrā* (Cairo 1322); 30°. *al-Furḳān bain Awliyā' al-Raḥmān wa-Awliyā' al-Shaiṭān*, Cairo 1310, 1322; 31°. *al-Wāsiṭa bain al-Khalḳ wa 'l-Ḥaḳḳ*, Cairo 1318; 32°. *Rafʿ al-Malām ʿan al-A'immat al-aʿlām*, Cairo 1318; 33°. *Kit. al-Tawassul wa 'l-Wasīla*, Cairo 1327; 34°. *Kit. Djawāb Ahl al-ʿIlm wa 'l-Īmān bi-Taḥḳīḳ mā akhbara bihi Rasūl al-Raḥmān min anna ḳul huwa Allāh aḥad taʿdil thulth al-Ḳur'ān*, Cairo 1322 (vgl. *Revue Afric.*, 1906, S. 267); 35°. *al-Djawāb al-ṣaḥīḥ liman baddala Dīn al-Masīḥ*, an answer to the epistle of Paul, Bishop of Sidon and Antioch, in which he combats Christianity and exalts Islām, Cairo 1322 (cf. P. de Jong, *Een Arab. Handschrift behelzende eene bestrijding van het Christendom* in *Verslagen en Mededeel. der Kon. Akad. van Wetenschappen*, afd. Letterkunde, 2nd Ser., vii. 1878, p. 218-9; 232-3; *Revue Afric.*, 1906, p. 283) 36°. *al-Risāla al-Baʿlabakkīya*, Cairo 1328; 37°. *al-Djawāmiʿ fi 'l-Siyāsa al-ilāhīya wa 'l-Āyāt al-nabawīya*, Bombay 1306; 38°. *Tafsīr Sūrat al-Nūr*, publ. on the margin of *Djāmiʿ al-Bayān fi Tafsīr al-Ḳur'ān*, lith. Dihli 1296; 39°. *Kit. al-Ṣārim al-maslūl ʿalā Shātim al-Rasūl*, Ḥaidarābād 1322; 40°. *Takhdjīl Ahl al-Indjīl*, refutation of Christianity, Bodl. Libr., *Cat.*, ii. 45; Maracci made use of it in the *Prodromus* of his *Refutatio Alcorani*; 41°. *al-Masʾala al-Nuṣairīya*, *fatwā* against the Nuṣairī inhabitants of the mountains of Syria, transl. Guyard, *Journ. As.*, Ser. 6, 1871, xviii. 158; Salisbury, *Journ. Amer. Or. Soc.*, ii 1851, 257; Cairo 1323; 42°. *al-ʿAḳīda al-Tadmurīya*, Berlin, N°. 1995); 43°. *Ikhtiṣār al-Ṣirāṭ al-mustaḳīm wa-Mukhālafat Aṣḥāb al-Djaḥīm*, against Jews and Christians, Berlin, N°. 2084; 44°. *Djawāb ʿan law*, a study on the particle *law* "if", publ. in al-Suyūṭī, *al-Ashbāh wa 'l-Naẓā'ir*, Ḥaidarābād 1317, iii. 310); 45°. *Kitāb al-Radd ala 'l-Naṣārā*, Brit. Mus., *Cat.*, N°. 865, i.; 46°. *Masʾalat al-Kanā'is*, Paris Bibl. Nat., N°. 2962, ii.; 47°. *al-Kalām ʿalā Ḥaḳīḳat al-Islām wa 'l-Īmān*, Berlin, N°. 2080; 48°. *al-Ḳaʿīdat al-Marrākushīya*, Berlin, N°. 2809; 49°. *Masʾalat al-ʿUlūw*, on the question of "height" in speaking of God, Berlin, N°. 2311; Gotha, N°. 83, iii.; München, N°. 885, v.; 50°. *Naḳḍ Taʾsīs al-Djahmīya*, Leiden, N°. 2021; 51°. *Ris. fi Sudjūd al-Ḳur'ān*, Berlin, N°. 3570; 52°. *Ris. fi Sudjūd al-Sahw*, Berlin, N°. 3573; 53°. *Ris. fi Awḳāt al-Nahy wa 'l-Nizāʿ fi Dhawāt al-Asbāb wa-ghairihā*, Berlin, N°. 3574; 54°. *Kit. fi Uṣūl al-Fiḳh*, Berlin, N°. 4592; 55°. *Kit. al-Farḳ al-mubīn bain al-Ṭalāḳ wa 'l-Yamīn*, Leiden, N°. 1834; 56°. *Masʾalat al-Ḥalf bi 'l-Ṭalāḳ*, Khed. Libr., *Fihr.*, vii. 565; 57°. *Fatāwī*, Berlin, N°. 4817-4818; 58°. *Kit. al-Siyāsa al-sharʿīya fi Iṣlāḥ al-Rāʿī wa 'l-Raʿīya*, Paris, Bibl. Nat., *Cat.*, N°. 2443-2444; 59°. *Djawāmiʿ al-Kalim al-ṭaiyib fi 'l-Adʿiya wa 'l-Adhkār*, Khed. Libr., *Fihr.*, vii. 228; Aya Sofya, N°. 583; 60°. *Ris. al-ʿUbūdīya*; 61°. *Ris. Tanawwuʿ al-ʿIbādāt*; 62°. *Ris. Ziyārat al-Ḳubūr wa 'l-Istindjād bi 'l-Maḳbūr*; 63°. *Ris. al-Maẓālim al-mushtaraka*; 64°. *al-Ḥisba fi 'l-Islām* (N°s 59—63 with N°s 2, 31, 32, 41, have been publ. at Cairo in 1323 in *Madjmūʿat al-Rasā'il*, pp. 1—222, et 1—92.

IBN AL-ṬIKṬAḲĀ, DJALĀL AL-DĪN (and ṢAFĪ AL-DĪN) ABŪ DJAʿFAR MUḤAMMAD B. TĀDJ AL-DĪN ABU 'L-ḤASAN ʿALĪ, was the descendant, in the twentieth generation, from the Caliph ʿAlī, through al-Ḥasan and Ibrāhīm Ṭabāṭabā, of the family of Ramaḍān, settled at al-Ḥilla. His father, representative of the ʿAlids at Kūfa and at Baghdād, was assassinated in 680 = 1281 at the instigation of ʿAṭāʾ Malik al-Djuwainī, minister of Abaḳa. Born about 660 (1262), Ibn al-Ṭiḳṭaḳā succeeded his father in the office of representative of the ʿAlids in al-Ḥilla and the sacred towns of the Shīʿīs (Nadjaf and Kerbelā), married a Persian woman from Khorāsān, visited Marāgha in 696 (1297) and in 701 (1301) made a journey to Mōṣul which was interrupted by the bad weather and gave him the opportunity to write the *Kitāb al-Fakhrī*. The date of his death is not known. His work is dedicated to the governor of Mōṣul for the Mongol Sulṭān Ghāzān, Fakhr al-Dīn ʿĪsā, hence the title al-Fakhrī. It is divided into two parts, of which the first is a political treatise, the second a résumé of the history of Muslim dynasties, which has the special feature that each notice of

a sovereign is followed by an account of his ministers. This second part is generally taken literally from Ibn al-Athīr's *Kāmil al-Tawārīkh* but also contains fragments of lost works such as the medium history and the Annals of al-Mas'ūdī; the history of the ministers comes from al-Ṣūlī and from Hilāl al-Ṣābi'. Although clearly Shī'ī in tendency, this book is not biassed (E. Amar). The first edition of the text from the MS. of the Bibl. Nat. Paris, nº. 2441, then the only one known, has been published by W. Ahlwardt (Gotha 1860); some fragments of it had been given by Jourdain, *Fundgruben des Orients*, v. 28—40; de Sacy, *Chrestomathie*², i. 1—¶¶; 1—92; Henzius, *Fragmenta arabica*, Petropoli, 1828, p. 1—104, and Freytag, *Chrestomathia arabica*, Bonn 1834, p. 84—96 (the dates given p. iv. are inexact) and with a French translation by Cherbonneau, *Journ. As.*, 1846, i. 297—359, ii. 316—338; 1847, i. 134—147; the second edition which makes use of a second copy discovered in the same collection (nº. 2442), is due to Hartwig Derenbourg (*Bibliothèque de l'École des Hautes-Études, sciences philologiques et historiques*, 1895). This work has been translated into French by M. Émile Amar (*Archives Marocaines*, t. xvi., 1910). The word *ṭiḳṭaḳā* seems to be onomatopeic (tictac) applied to fluent and verbose speech (*Tādj al-'Arūs*, vi. 424, quoted by H. Derenbourg, p. 4). (CL. HUART.)

IBN ṬUFAIL, a celebrated philosopher of the Maghrib, whose full name was ABŪ BAKR MUḤAMMAD B. 'ABD AL-MALIK B. MUḤAMMAD B. MUḤAMMAD B. ṬUFAIL AL-ḲAISĪ. He belonged to the prominent Arab tribe of Ḳais; he was also called al-Andalusī (the Spaniard), al-Ḳurṭubī (the Cordovan or al-Ishbīlī (the Sevillan). The Christian scholastics call him Abubacer, a corruption of Abu Bakr.

Ibn Ṭufail was probably born in the first decade of xiith century A. D. in Wādī Āsh, the modern Guadix, 40 miles n. w. of Granada. We know nothing of his family or his education. That he was a pupil of Ibn Bādjdja [q. v.] as is frequently stated, is incorrect, for in the introduction to his romance he says that he was not acquainted with this philosopher. He first of all practised as a physician in Granada and then became secretary to the governor of the province. In 549 (1154) he became secretary to the governor of Ceuta and Tangier, a son of 'Abd al-Mu'min, the founder of the Almohad dynasty. Finally he received the appointment of court physician to the Almohad Sulṭān Abū Ya'ḳūb Yūsuf (558—558 = 1163—1184). It has also been thought that he was the latter's wizier; but it is doubtful if he really held this title, as only one text gives him it, as L. Gauthier points out. Al-Biṭrūdjī [q. v.], who was his pupil, simply calls him ḳāḍī (L. Gauthier, *Ibn Thofail*, p. 6). In any case Ibn Ṭufail always had great influence with this prince, which he used to attract scholars to the court. For example he introduced the young Averroes to the sulṭān. The historian 'Abd al-Wāḥid al-Marrākushī (*al-Mu'djib*, ed. Dozy, p. 174 sq.; transl. by Fagnan, p. 201—210) gives a description of this meeting from Averroes' own account. On this occasion the commander of the faithful showed a remarkable intimacy in philosophical matters. It was also Ibn Ṭufail who, at the instigation of the prince, advised Averroes to annotate the works of Aristotle. This is stated by Abū Bakr Bundūd, a pupil of Ibn Ṭufail, who says further: "The commander of the faithful was exceedingly attached to him (Ibn Ṭufail). I am told that he remained whole days and nights in the palace with him without coming out".

In 578 our philosopher on account of his advanced age was succeeded by Ibn Rushd as court physician to the Caliph. But he continued to retain Abū Ya'ḳūb's favour and, after the latter's death in 580, retained the friendship of his son, Abū Yūsuf Ya'ḳūb. He died in 581 (1185—6) the Caliph himself attending his obsequies.

Ibn Ṭufail is the author of the celebrated philosophical novel *Ḥaiy b. Yaḳẓān*, one of the most remarkable books of the middle ages, of which we shall have more to say below. Little else from his pen is known. He also wrote two treatises on medicine and corresponded with Averroes about the latter's medical work *al-Kullīyāt*. According to the astronomer al-Biṭrūdjī and Ibn Rushd in his medium commentary on Aristotle's *Metaphysics* (Bk. xii), he is said to have had original astronomical ideas. Al-Biṭrūdjī attempted to refute Ptolemy's theory of epicycles and eccentric circles and says in his preface that he is following the ideas of Ibn Ṭufail.

The philosophical romance *Ḥaiy b. Yaḳẓān*, which was published by Pococke under the title *Philosophus autodidactus*, has also the sub-title *Asrār al-Ḥikma al-ishrāḳīya* "the secrets of illuminative philosophy". This philosophy is really that of the Neo-Platonic scholasticism in its most mystic form. Ibn Ṭufail expounds it in a progressive fashion with great skill by taking the case of a well endowed man with an inclination for speculation who is placed alone on an island from childhood and here discovers philosophy from his sheer force of reason and step by step constructs the whole Muslim Neo-Platonic system for himself. This man as the symbol of reason bears the name *Ḥaiy* "the living", *Ibn Yaḳẓān* "son of the wakeful one" i. e. God; at the end of the story Salāmān and Asāl appear who also have symbolic meaning.

The names Ḥaiy, Salāmān and Absāl or Asāl were not new in philosophic literature. Avicenna had already written a mystic allegory entitled *Ḥaiy b. Yaḳẓān* and this work, which was well-known in the middle ages, was also imitated by Ibn 'Ezra; al-Djūzdjānī, who has given us a list of Avicenna's writings, also ascribes to him a little work on the story of Salāmān and Absāl. We possess a version of this story by Naṣīr al-Dīn al-Ṭūsī, and the celebrated Persian poet Djāmī took it as the subject of one of his best known works. In these Salāmān and Absāl play different rôles but they are always symbolical and represent the human reason struggling with the world of objects. In Djāmī's poem, Salāmān is a young prince and Absāl his nurse who becomes his lover. In Naṣīr al-Dīn al-Ṭūsī's form of the myth Absāl is again a woman, and in another version Salāmān and Absāl are brothers. In Ibn Ṭufail's work they are a king and his vizier. One of the versions is said to have been translated from the Greek by Ḥunain b. Isḥāḳ [q. v.] and it is in fact very probable that this whole cycle of stories has a Alexandrine origin.

The following is a synopsis of Ibn Ṭufail's romance. The book begins with an introduction which gives an interesting survey of the history of

Muslim philosophy. In it Ibn Ṭufail praises his predecessors, notably Ibn Sīnā (Avicenna), Ibn Bādjdja, and al-Ghazālī and gives as the purpose of philosophy, according to the interpretation of the mystic scholastics, the acquisition of union with God, i. e. reaching a state of happiness and clear vision where truth is no longer obtained by a process of deduction, but is recognised intuitively. Now follows the story of the novel: a boy is born without a father on a lonely island or put on the sea by a princess in a neighbouring island and carried by the current to it. The possibility of spontaneous generation by the fermentation of the earth with moderate heat is fully discussed. A gazelle feeds the boy and becomes his first teacher. When the latter grows up a little he notices that he is naked and unarmed unlike the animals he meets. He covers himself with leaves and arms himself with a stick and thus recognises the importance of his hands. He now becomes a hunter and his arts make further progress, for example he replaces the scanty covering of leaves by an eagle's skin. In the meanwhile the gazelle which had brought him up becomes old and ill; this troubles him and he seeks the cause of the evil. For this purpose he studies himself and thus becomes conscious of his senses. Thinking that the evil is in the breast, he has the idea of making an opening in the side of the animal with a sharp stone. By this experiment he becomes acquainted with the heart and lungs; but also he gets his first notion of an invisible thing that has escaped and constitutes individuality more than body. When the body of the gazelle begins to decay Haiy learns from the ravens how to bury it.

By chance he discovers fire by dead trees catching fire through the rubbing of the branches; he brings the fire to his dwelling and keeps it going. This discovery induces him to reflect on this visible fire and the animal warmth which he has noticed in living creatures; as a result he dissects other animals. His skill makes further progress; he clothes himself in skins, learns to spin wool and flax and make needles; swallows show him how to build a house, and he teaches birds of prey to hunt for him and learns to use eggs of birds and the horns of cattle etc. This part of the novel forms a very interesting and ingeniously arranged encyclopaedia.

His knowledge develops more and more and becomes philosophy. After Haiy has studied all plants and minerals and their properties and the use of limbs in animals he classifies them into kinds and species. He divides the bodies into light and heavy. He comes back again to the spirit of life, the seat of which he has traced in the heart and conceives the idea of an animal and vegetative soul. Bodies seem to him to be forms out of which come qualities. He now seeks for the elementary substances and recognises the four elements. While examining earth he grasps the idea of matter and conceives of bodies as matter of different extent. Observing that water becomes steam, he discovers the transition of one form from another and recognises that every new creation must have a cause which produces it. He thus gets the idea of a producer of forms in general. This he seeks first in nature but as all elements are subject to change and destruction, he directs his attention to the heavenly bodies.

Haiy has now reached the age of 28, that is the end of the fourth septenary. Henceforth he begins to reflect on heaven: he asks if it is infinite, which he thinks absurd; he imagines it as spherical, observes the necessity of special spheres for the moon and the planets and imagines the celestial world as a kind of vast animal. He understands the necessity for the producer of everything not being a body, the motive power of the world not being included in it, if it is eternal: continuing to develop the conception of God, he deduces his qualities from the consideration of the beings of nature. God seems to him to have free will, to be wise, knowing, merciful, etc. Coming then to his own soul he decides that it is incorruptible, from which he concludes that he ought to find his happiness in the contemplation of the perfect being. This happiness will be attained by imitating the celestial qualities, that is to say by practising ascetic morals. Haiy then devotes himself to a life of contemplation, which he leads till the end of his seventh septenary.

Then Asāl a devout follower of the revealed religion arrives from a neighbouring island; after the two men have begun to understand one another revealed religion proves to be at bottom the same as the philosophical belief attained by Haiy. Asāl recognises in the doctrine which the hermit teaches him a transcendent interpretation of his religion and of revealed religions in general. He persuades Haiy to follow him to a neighbouring island, where a king named Salāmān reigns whose friend and vizier Asāl is, in order to expound to him his philosophy. But it is not understood and, after several vain efforts, Asāl and Haiy return together to the desert island to devote themselves to pure contemplation while people continue to live by images and symbols.

This curious myth thus lays down very clearly the position of mystical philosophy with regard to religion (cf. also the article IBN RUSHD on this question). The novel of Ibn Ṭufail was much enjoyed by Muslims and translated into various languages. In 1349 the Jew Moses of Narbonne translated it into Hebrew with a commentary. Leibniz praised it knowing it in Pococke's edition.

(B. CARRA DE VAUX.)

IBN TŪMART, a celebrated Muslim reformer in Morocco, known as the Mahdī of the Almohads. His real name was, according to Ibn Khaldūn, *Amghār* which in Berber means "chief". Ibn Tūmart in this language means "son of 'Omar the little". This was his father's name who was also called 'Abd Allāh. The names

of his ancestors also are Berber. The date of his birth is unknown but it must have been between 470 (1077-78) and 480 (1087-88). He was born at Igîlî-en-Warghen, a village of Sûs. His family belonged to the Isarghîn, a branch of the Hargha, one of the most important tribes of the Atlas. Ibn Khaldûn tells us that it was distinguished for piety and that Ibn Tûmart was very fond of learning and industriously visited mosques where he burned so many candles that he was called *Asafû* (firebrand). What can have driven him to the east? Probably only the desire for knowledge, for it can hardly be assumed that he had already conceived the plan which he afterwards carried out, which rather owes its origin to the doctrines he learned there.

The Almoravid dynasty which ruled in the Maghrib and part of Spain had then begun to decline. Moral decay had followed in the footsteps of conquest and the shallowness of intellectual life is shown by the studies which were prosecuted. The doctrine of Mâlik b. Anas, one of the narrowest in Islâm, was the prevailing one. Study was confined to the handbooks of the *furû'* which had taken the place of the Ḳur'ân and Ḥadîth. In the east al-Ghazâlî had taken up a vigorous attitude against this in the first book (*Kitâb al-'Ilm*) of his *Iḥyâ' 'Ulûm al-Dîn*. This book therefore attracted the hatred of such *faḳîh's* as the Ḳâḍî 'Iyâḍ [q. v.] and even of the Ash'arîs like al-Ṭorṭûshî who tolerated no independent minds in their school. Al-Ghazâlî's works were therefore burned by order of the Almoravid Emîrs. The current anthropomorphism (*tadjsîm*) was also in vogue; the allegorical expressions in the Ḳur'ân were taken literally and God was given a corporeal form.

Ibn Tûmart began his travels in Spain and it was there that his views began to be affected by the writings of Ibn Ḥazm [q. v.]. He then went to the east but the chronology of his travels is not certain. If, contrary to al-Marrâkushî's statement, he attended on his first visit to Alexandria the lectures of Abû Bakr al-Ṭorṭûshî, who in spite of his Ash'arî tenets was an opponent of al-Ghazâlî, they must have made a lasting impression on him. He then made the pilgrimage to Mecca and studied in Baghdâd and perhaps in Damascus also. He there absorbed al-Ghazâlî's ideas and later writers represent this influence symbolically as if Ibn Tûmart had resolved at al-Ghazâlî's instigation to reform the beliefs of his country. In reality the two never met.

These years of study and travel had utterly transformed the Maghribî ṭâlib. He had formed his plan, if not in detail at least in its main outlines. On the ship on which he returned he preached to the sailors and passengers, who began to recite the Ḳur'ân at his admonition and to offer prayers; it was afterwards related that a miracle related by al-Marrâkushî confirmed this report. He continued his preaching in which he championed Ash'arî doctrines in Tripolis and al-Mahdiya, where the reigning Sulṭân, Yaḥyâ b. Tamîm, showed him great honour when he had heard him defend his case, and then in Monastir and finally in Bougie. He there set up as an inexorable critic of morals, literally following the ancient commandment: "He of you who sees anything blameworthy shall alter it with the hand (i. e. by force); if he cannot do this, he shall do it with the tongue (i. e. by preaching); if he cannot do this he shall do it at heart, this is the least that religion demands". The Ḥammâdid ruler was enraged at this encroachment on his authority and the people also rose against the reformer; the latter fled to the Banû Urîagel, a Berber tribe of the neighbourhood, who took him under their protection. Here it was (contrary to the view of the *Rauḍ al-Ḳirṭâs*, in which Tilimsân is given as the place of meeting) that he met the man who was to continue his work, 'Abd al-Mu'min [q. v.], a poor ṭâlib of Tâdjera, north of Nadroma who like himself was going to the east to study. The legend which credits Ibn Tûmart with secret knowledge acquired in the east relates that he recognised in this young man by certain signs the person he sought, just as al-Ghazâlî had recognised himself as the future reformer. We only know that he had a conversation with 'Abd al-Mu'min, in which he questioned him very closely and that he finally persuaded him to abandon his journey to the east and follow him. He then came back to the Maghrib via Wansharîs (Wânsherîsh) and Tlemcen, from which he was banished by the governor, then to Fâs and Miknâsa where the people returned his admonitions with blows; finally he arrived in Marrâkush where more than ever he became an inexorable reformer of doctrines and morals. The women of the Lamtûna went unveiled as those of the Tuareg and Kabyle still do. Ibn Tûmart insulted them on this account and even threw Sûra, the sister of the Almoravid Emîr 'Alî, from her horse; the latter more patient and tolerant than the reformer did not inflict on him the chastisement he merited but contented himself with summoning a meeting in which Ibn Tûmart had to dispute with Almoravid jurists. They disputed on such questions as the following: "Are the ways to knowledge limited or not in number? The principles of true and false are four in number: knowledge, ignorance, doubt, and supposition". It was not difficult for Ibn Tûmart to win although there was a clever Spaniard among them, who was no less intolerant than he, called Mâlik b. Wuhaib, who is said to have to no purpose advised 'Alî to put him to death. The Emîr spared him however and Ibn Tûmart fled to Aghmât where he had other disputations, and thence to Agbalu, where he began his apostolate in a methodical fashion. He first appeared as merely a reformer of customs so far as these were contrary to the Ḳur'ân or Tradition; after he had won a certain influence over his circle, he proceeded to expound his own doctrines; he vigorously attacked the dynasty, who followed "lying doctrines", and declared every one an infidel who differed from him. This meant preaching a holy war, not only against heathens and polytheists but also against other Muslims. He chose ten companions, including 'Abd al-Mu'min and after he had paved the way by describing the characteristics of the Mahdî, he had himself recognised as such and fabricated a genealogy, in which he traced his origin from 'Alî b. Abî Ṭâlib. His doctrine was already no longer purely Ash'arî but was mixed with Shî'î ideas. The historians report all kinds of cunning tricks by which he endeavoured to justify his claims. He collected around himself the tribe of the Hargha and a great part of the Maṣmûda, who had always been hostile to the Lamtûna, indeed Yûsuf b. Tâshifîn had founded Marrâkush for the purpose

of keeping them in check, Ibn Tūmart had prepared for them various treatises in the Berber language, which he spoke remarkably well; one of these, the *Tawḥīd*, is preserved in an Arabic translation, published at Algiers in 1903. The ignorance of Arabic was such that, in order to teach the *Fātiḥa* to the barbarous Maṣmūda, he called individuals of them by a word or a sentence from this Sūra: the first was called *al-Ḥamdu lillāhi* (Praise be to God), the second *Rabbi* (the Lord) on the third *al-ʿĀlamīna* (of the Worlds). He told them to give their names in the order in which he placed them till he succeeded in getting them to repeat the first Sūra of the Ḳurʾān. He regularly organised his followers and divided them into different categories; the first consisted of the ten, who had first recognised him; they were the *Djamāʿa* (community). The second consisted of 50 devoted followers. He called them all "believers" *Muʾminūn*, or "Unitarians" (*Muwaḥḥidūn*, whence the name "Almohads"). His authority was however not recognised everywhere, at least not among the people of Tīnmal (or Tinmelal); he penetrated into the town by stratagem, massacred 15,000 men and made the women slaves, dividing the houses and estates among his followers, and also built a fortress. Either voluntarily or as a result of pressure, the neighbouring tribes became converted and in 517 A. H. he sent an army commanded by ʿAbd al-Muʾmin against the Almoravids. He suffered a fearful defeat and found himself besieged in Tīnmal. Some of his followers thought of surrendering, but Ibn Tūmart with the aid of ʿAbd Allāh al-Wānsharīsī whom he had brought from Wānsharīs had recourse to some trickery and after his prestige was restored, he had those he was not certain of put to death. According to Ibn al-Athīr, 70 000 men were thus put to death, a number which is obviously exaggerated. The Almohad cause gained in strength in proportion as the Almoravid power became daily weaker in Spain and Africa. When in 524 = 1130 (according to others 522 = 1128) the Mahdī died, ʿAbd al-Muʾmin whom he had destined as his successor, was ready to take up the struggle again. Ibn Tūmart's grave still exists in Tinmal, but his name and history is utterly forgotten. According to the *Rawḍ al-Ḳirṭās*, Ibn Tūmart was a fine looking man, of a light dull brown colour, with separated eye brows, an eagle nose, deep eyes, a scanty beard, and a black mole on the hand. He was a clever and able man, burdened by few scruples and did not shrink from bloodshed. He knew the traditions of the Prophet by heart, was learned in religious questions and a perfect master of the art of disputation.

IBN WAḤSHIYA, Abū Bakr Aḥmad (or Muḥammad) b. ʿAlī al-Kaldānī or al-Nabaṭī is known from numerous writings on alchemy and other secret sciences detailed in the *Fihrist*. His date is not given in the *Fihrist*, but lies in the second half of the second century A. H. (about the year 800). As a Nabataean he hated the Arabs and sought by his writings to show that the ancestors of the Nabataeans had possessed a high culture. Many of his writings, notably the celebrated "Nabataean agriculture" were alleged to be translations from ancient Babylonian sources. The correctness of this assertion defended by Chwolsohn (see *Über die Überreste der altbabylonischen Litteratur in arab. Übersetzungen* in *Mémoires prés. par l'Acad. Impér.*, p. viii.) was convincingly refuted by von Gutschmid and Nöldeke in *Zeitschr. der Deutsch. Morgenl. Gesellsch.*, xv. 1 *sqq.*, and xxix. 445 *sqq.* A similar forgery is his work on old alphabets, which was first made known by v. Hammer, see: *Ancient alphabets and hieroglyphic characters explained, with an account of the Egyptian priests, their classes, initiation and sacrifices in the Arabic language by A. b. Abu Bekr b. Wahshih*, London 1806; cf. de Sacy in his edition of ʿAbd al-Laṭīf's [q. v.] work, p. 558 *sqq.*

Bibliography: *Fihrist*, particularly p. 311 *sq.*, 358; Chwolsohn, *Die Ssabier*, i. 710, 823, ii. 605 *sq.*; Brockelmann, *Geschichte*, etc., i. 242 *sq.*; Goldziher, *Muh. Studien*, i. 158; and the works quoted in the article.

1. **IBN AL-WARDĪ**, Zain al-Dīn Abū Ḥafṣ ʿOmar b. al-Muẓaffar b. ʿOmar b. Abi 'l-Fawāris Muḥammad al-Wardī al-Ḳurashī al-Bakrī, al-Shāfiʿī, philologist, jurisconsult, littérateur, and poet, born at Maʿarrat al-Nuʿmān in 689 = 1290 and died of the plague at Aleppo on Dhu 'l-Ḥidjdja 27, 749 = March 19, 1349.

He studied in his native town, at Ḥamā, Damascus, and Aleppo and while still young acted for a short time as deputy for the Ḳāḍī Muḥammad b. al-Naḳīb (d. 745 = 1343). It seems that as a result of a dream he abandoned this office to devote himself to scientific work.

He left the following works: 1°. *Dīwān*, contains poetry, *maḳāmāt*, epistles, discourses, poems, a letter on the plague, etc., publ. at Constantinople in 1300 (in *Madjmūʿat al-Djawāʾib*); 2°. *Lāmiyat* or *Waṣiyyat* or *Naṣīḥat al-Ikhwān wa-Murshidat al-Khullān*, moral poem in 77 *ramal* verses, pr. at Cairo 1301 (with comm. of Masʿūd b. Ḥasan al-Ḳanāwī), in C. J. David, *Tamām al-Akhlāḳ* etc., Mōṣul 1863, and al-Sharwānī, *Nafḥat al-Yaman*; French translations: *a. Lamiat El Ouardi*, poème arabe par Amor (sic) b. El Ouardi, trad. d'Isaac Cattan, in *Revue Tunisienne, de l'Inst. de Carthage*, Tunis 1900; *b. La Moallaka de Zohair suivie de la Lamiyya d'Ibn al-Wardi*, etc., texte publ. avec voyelles, comment. ar. et trad. litt. par A. Raux, Algiers 1905; 3°. *Taḥrīr al-Khaṣāṣa fī*

Taisīr al-Khulāṣa, version in prose of the *Alfīya* of Ibn Mālik, Khed. Libr., *Fihr.*, iv. 96; 4°. *al-Tuḥfa al-Wardīya fī Mushkilāt al-I'rāb*, poem in 153 *radjaz* verses on grammatical difficulties, ed. by R. Abicht, Breslau 1891 (Dissert.); 5°. Comment. on the preceding, Berlin, *Verz.*, n°. 6703-6704; 6°. *al-Bahdja al-Wardīya*, versification (5000 *radjaz* verses) of *al-Ḥāwī al-ṣaghīr*, manual of Shāfi'ī law by al-Ḳazwīnī, publ. at Cairo (Catal. of al-Ḥalabī, 1330); 7°. *Tatimmat al-Mukhtaṣar fī Akhbār al-Bashar*, synopsis of the chronicle of Abu 'l-Fidā continued to 749, publ. at Cairo in 1285; 8°. *al-Masā'il al-mulakhkhaṣa fi 'l-Masā'il al-mulaḳḳaba*, poem in 71 *radjaz* verses on questions of succession, Berlin, n°. 4173; Khed. Libr., *Fihr.*, iii. 316; 9°. *al-Shihāb al-thāḳib wa 'l-Adhāb al-wāṣib*, a mystic work, Constantinople, Aya Sofya, n°. 1043; 10°. *al-Alfīya al-Wardīya*, *radjaz* poem, on the interpretation of dreams, publ. several times at Cairo, p. ex. 1326.

Bibliography: Ibn Shākir, *Fawāt al-Wafayāt*, Būlāḳ 1299, ii. 116; al-Subkī, *Ṭabaḳāt al-Shāfi'īya*, Cairo 1324, vi. 243; al-Suyūṭī, *Bughyat al-Wu'āt*, Cairo 1326, p. 365; Ibn Iyās, *Badā'i' al-Zuhūr fī Waḳā'i' al-Duhūr*, Būlāḳ 1311, i. 198; Ibn al-Āthīr, *Djalā' al-'Ainain fī Muḥākamat al-Aḥmadain*, Būlāḳ 1298, p. 24; Wüstenfeld, *Die Geschichtschreiber der Araber*, p. 175, N°. 412; Brockelmann, *Gesch. d. ar. II. **IBN AL-WARDĪ**, SIRĀDJ AL-DĪN ABŪ ḤAFṢ 'OMAR, Shāfi'ī savant died in Dhu 'l-Ka'da 861 (sept.-oct. 1457). He was author of *Kharīdat al-'Adjā'ib wa-Farīdat al-Gharā'ib*, a kind of geography and natural history of no scientific value. It seems that, in spite of the authorities quoted in the preface (al-Mas'ūdī, al-Ṭūsī, Ibn al-Athīr, al-Marrākushī), the *Kharīda* is only a plagiarism from *Djāmi' al-Funūn wa-Salwat al-Maḥzūn* of Nadjm al-Dīn Aḥmad b. Ḥamdān b. Shabīb al-Ḥarrānī al-Ḥanbalī who lived in Egypt about 732 (1332). Several orientalists have translated fragments or given extracts with translation: De Guignes, Hylander, Tornberg, Mehren, etc. The *Kharīda* was publ. at Cairo in 1276, 1280, 1289, 1292, 1300, 1302, 1303, 1309.

Bibliography: Ibn Iyās, *Badā'i' al-Zuhūr fī Waḳā'i' al-Duhūr*, Būlāḳ 1311, ii. 60; Brockelmann, *Gesch. d. arab. Litt.*, ii. 131 sq. (MOH. BEN CHENEB.)

IBN WĀṢIL, DJAMĀL AL-DĪN ABŪ 'ABD ALLĀH MUḤAMMAD B. SĀLIM, an Arab historian, born in 604 (1207), was at first a teacher in Ḥamāt, was summoned to Cairo in 659 (1261) and sent to Sicily by Baibars on a mission to King Manfred. He spent a considerable time there and composed outlines of logic called *al-Emperūrīya* which is however known in the east as *Nukhbat al-Fikar fi 'l-Manṭiḳ*. On his return he became chief ḳāḍī and professor at Ḥamāt where he died in 697 (1298). He is the author of a history of Aiyūbids called *Mufarridj al-Kurūb fī Akhbār Banī Aiyūb* and a history of the world entitled *al-Ta'rīkh* (Vol. I, from the creation to the death of Ḥasan, in the British Mus., see a *Descr. List of Arabic MS. acquired since* 1894, p. 33, Or. 6657).

Bibliography: Brockelmann, *Gesch. d. arab. Litt.*, i. 322 sq., and the works given there; Schack, *Poesie und Kunst der Araber in Spanien und Sicilien*, ii. 134.

IBN YA'ĪSH, whose full name was MUWAFFAḲ AL-DĪN ABU 'L-BAḲĀ' YA'ĪSH B. 'ALĪ B. YA'ĪSH AL-ḤALABĪ, also known as IBN AL-ṢĀNI', an Arab grammarian, born at Ḥalab on the 3rd Ramaḍān 553 (28 sept. 1158). After studying grammar and Ḥadīth in his native town and in Damascus, he intended to go to Baghdād to study under the grammarian Abu 'l-Barakāt Ibn al-Anbārī [see AL-ANBĀRĪ, n°. 1]. When in al-Mawṣil he heard of the death of this scholar, he remained some time there to study Ḥadīth. He then returned to Ḥalab where he devoted himself to teaching. According to Ibn Khallikān [q. v.], who heard him in 626-7, he was considered an authority in the field of Adab. Besides a *Ḥāshiya* on Ibn Djinnī's commentary on the *Taṣrīf* of al-Māzinī he wrote a very full commentary on al-Zamakhsharī's *al-Mufaṣṣal* to whom he often opposed his own views; the latter work was edited by G. Jahn (Leipzig 1882—1886).

Ibn Ya'īsh died on 25th Djumādā I 643 (18th Oct. 1245) at Ḥalab and was buried there in the Maḳām Ibrāhīm.

Bibliography: Ibn Khallikān, ed. Wüstenfeld, N°. 843; al-Suyūṭī, *Bughyat al-Wu'āt*, p. 419; Ḥādjdjī Khalīfa, ed. Flügel, ii. 304, vi. 39; Brockelmann, *Gesch. d. arab. Litt.*, i. 297 sq. (C. VAN ARENDONK.)

IBN YAMĪN, AMĪR FAKHR AL-DĪN MAḤMŪD B. AMĪR YAMĪN AL-DĪN MUḤAMMAD, a Persian poet, was born in Faryūmad, Khurāsān. His father, an eminent scholar of his time, came to Khurāsān during the reign of Sulṭān Muḥammad Khudā Banda (703—716 = 1304—1316) and was fortunate enough to secure the high opinion of the famous wazīr Khwādja 'Alā' al-Dīn Muḥammad. Ibn Yamīn was a disciple of Shaikh Ḥasan. He spent his life as a panegyrist to the Sarbadārs of Khurāsān (737—783 = 1337—1381) and died in 745 (1344).

Among his compositions his *Ḳiṭ'a* are well-known. They have been printed in Calcutta and also translated into German by Schlechta-Wssehrd under the title of "*Ibn Jemins Bruchstücke*", Vienna, 1852 Stuttgart 1879.

Bibliography: Dawlatshāh, p. 275; *Ātash-kada*, p. 16; *Hafṭ Iḳlīm*, N°. 770; Sprenger, *Cat. Libr. of the King of Oudh*, p. 433 sq.; Ethé, *Cat. India Office Libr.*, N°. 1230-31; Rieu, *Cat. Pers. Mss. Br. Mus.*, p. 825b, 871a and *Suppl.*, N°. 261 II and 107. (M. HIDAYET HOSAIN.)

IBN YŪNUS, whose full name was ABU 'L-ḤASAN 'ALĪ B. 'ABD AL-RAḤMĀN B. AḤMAD B. YŪNUS AL-ṢADAFĪ AL-MIṢRĪ, was according to al-Battānī and Abu 'l-Wafā', probably the greatest Arab astronomer. His father, Abū Sa'īd 'Abd al-Raḥmān b. Aḥmad also called Ibn Yūnus, was a notable historian and traditionist, and died in Cairo in 347 (958-9). The year of our astronomer's birth is not known but he died in Cairo on the 3rd Shawwāl 399 (May 31, 1009); he is said to have been skilled in other branches of learning than astronomy and astrology and to have also been a good poet. Ibn Khallikān quotes several stories from contemporary authors of his peculiarities which were chiefly manifested in his dress. His principal work is the Ḥākimī Tables (*al-Zīdj al-kabīr al-Ḥākimī*) begun about 380 (990) by order of the Fāṭimid al-'Azīz and completed under his son al-Ḥākim shortly before the author's

death. They are unfortunately no longer completely preserved. There are portions in Leiden, Oxford, Paris, the Escurial, Berlin and Cairo. Caussin has published and translated a few chapters from these tables in the *Notices et extraits des manuscrits de la Bibliothèque nationale*, Vol. vii. p. 16—240, which contain observations of eclipses and conjunctions of planets by older astronomers and by Ibn Yūnus himself. The latter's principal object was to test and improve the observations of his predecessors and their statements on astronomical constants, in which the excellently equipped observatory on the Muḳaṭṭam rendered him valuable service. In spherical trigonometry he was the first to propound the prosthaphaerical formula

$$\cos\varphi \cos\delta = \tfrac{1}{2}\{\cos(\varphi+\delta)+\cos(\varphi-\delta)\}$$

which before the invention of logarithms was of great value to astronomers as it transformed the complicated multiplication of trigonometrical functions expressed in sexagesimal fractions into an addition. He also showed great skill in the solution of several difficult exercises in spherical astronomy with the help of orthogonal projection of the celestial sphere on the horizon and the plane of the meridian.

Bibliography: Ibn al-Ḳifṭī (ed. Lippert), p. 230; Ibn Khallikān (Cairo, 1310), i. 375; transl. M. Guckin de Slane, ii. 365; v. Braunmühl, *Vorlesgn. über Gesch. d. Trigonom.*, i. 61—63; Delambre, *Hist. de l'astron. du moyen-âge*, Paris 1819, p. 76 *sq.*; Suter, *Abhandlgn. z. Gesch. d. math. Wissensch.*, x. (1900), 77—79. (H. SUTER.)

IBN ẒAFAR, ḤUDJDJAT AL-DĪN ABŪ 'ABD ALLĀH MUḤAMMAD B. ABĪ MUḤAMMAD AL-ṢAḲALĪ, an Arab scholar, born in Sicily but brought up in Mecca (according to Suyūṭī also born there), later returned to Sicily and died in 565 (1169) at Ḥamāt. On the model of *Kalīla wa-Dimna* he composed the collection of tales called *Sulwān al-Muṭā' fī 'Udwān al-Atbā'* and dedicated to the ruler of Sicily, Abū 'Abd Allāh Muḥammad b. Abī 'l-Ḳāsim (pr. Cairo 1278, Tunis 1279, Beirut 1300); Turk. transl. by Ḳara Khalīlzāde in Berlin (Pertsch, n°. 445) and Vienna (Flügel, n°. 382), pr. Constantinople 1285; Italian by Amari, Florence 1851, 1882; English from the Italian, London 1852. The author prepared two versions of the book, most mss., editions and translations contain the second of the year 554 (1159). Another less known work *Anbā' Nudjabā' al-Abnā'* deals with celebrated children (pr. Cairo 1322) and also exists in a second abbreviated edition.

For his further literary activity, see the authorities mentioned below.

IBN ZAIDŪN, ABU 'L-WALĪD AḤMAD B. 'ABD ALLĀH B. AḤMAD B. GHĀLIB B. ZAIDŪN, one of the most celebrated poets of Muslim Spain and minister to the Arab Emīrs of Seville. He belonged to a famous family of the Arab tribe of Makhzūm and was born at Cordova in 394 = 1003. Left early an orphan, he was given the best teachers by his guardians and soon distinguished himself among his fellow pupils. At the age of twenty he already composed poems which made him famous.

Our poet became involved in the politics of his country through the civil wars of the Omayyad pretenders and the attempts of the Cordovans to expel from their city its Berber rulers. His origin, the position of his family, and particularly his ambition induced him to take a part. After the retreat of the Berbers he was therefore to be found in the retinue of Abu 'l-Ḥazm Ibn Djahwar, the chief of the Cordovan oligarchy.

A violent love for the poetess Wallāda, of a princely family, brought him into conflict with a powerful rival, Ibn 'Abdūs, the minister of Abu 'l-Ḥazm Ibn Djahwar. Ibn Zaidūn wrote threatening poems against his rival and held him up to ridicule in a letter that has become famous. The latter denounced him as having secretly worked for a restoration of the Omayyads and he was thrown into prison. From here he wrote tender poems to Wallāda and pressing appeals, in which he defended himself, to his friends. One of the latter, Abu 'l-Walīd, the son of Abu 'l-Ḥazm, succeeded in getting him out of prison. But Wallāda had finally abandoned him for Ibn 'Abdūs.

After an involuntary exile in which he unceasingly poured reproaches upon his lady friend, Ibn Zaidūn returned to Cordova on the death of Abu 'l-Ḥazm Ibn Djahwar and threw in his lot with the latter's son and successor Abu 'l-Walīd. He served him as ambassador at several Muslim courts in the neighbourhood of Cordova. But his ambition was his downfall. For some unknown reason he was disgraced a second time, had to flee from Cordova, and lived in Denia, Badajoz, and Seville successively.

His fame as a poet, his literary abilities, and his knowledge of Muslim conditions in Spain, which he had acquired during his work as an ambassador, gained him a reception at the court of the Emīr of Seville, al-Mu'taḍid. At first he was only secretary to this ruler but later became his first minister. After the death of al-Mu'taḍid, his son and successor, al-Mu'tamid, retained the poet in the same office and made use of him for the conquest of Cordova which now became the capital.

But Ibn Zaidūn's popularity aroused the envy of several people at the court, particularly the poet Ibn 'Ammār [q. v.], al-Mu'tamid's favourite. A riot directed against the Jews in Seville gave the plotters an opportunity of getting Ibn Zaidūn sent there, to restore order. The poet set off to the great disappointment of the Cordovans who were very proud of their fellow-citizen; his family followed him soon after. But the aged Ibn Zaidūn was seized by a fever and quickly carried off. He died on Radjab 15 463 (April 17-18 1071) and was interred in Seville. The news of his death caused great grief in Cordova and the whole town went into mourning.

Ibn Zaidūn was not only an excellent poet, but he was also a distinguished letter-writer and it is as such that he is particularly famous in the history of Arabic literature. His letters are not all published. The best known are:

1. The letter to Ibn 'Abdūs. It is valuable for

Arabic philology in as much as it contains many allusions to facts, which are only known through it and through the commentary, which Ibn Nubāta (d. 768 = 1364) wrote on it under the title *Sarḥ al-'Uyūn fī Sharḥ Risālat Ibn Zaidūn* (Būlāḳ 1278, Alexandria 1290, Cairo 1305). This letter was published by Reiske with a Latin translation (Leipzig 1755). 2. The about equally important letter to Ibn Djahwar was published also with a Latin translation by Besthorn (Copenhagen 1889).

Extracts from Ibn Zaidūn's poems were given by Weijers (Leiden 1831), de Sacy (*Journ. As.*, XII, 508 *sqq.*), al-Maḳḳarī, *Analectes*; manuscript extracts and the biography of Ibn Zaidūn by Ibn Bassām (Ms. Bibl. Nat. Paris, n°. 3322) and 'Imād al-Dīn al-Isfahānī (ibid. n°. 3330).

On the bibliography cf. Brockelmann, *Gesch. d. arab. Litteratur*, I. 274 *sq.* (A. Cour.)

IBN ZUHR, the patronymic of a family of Muslim scholars who flourished in Spain from the beginning of the xth to the beginning of the xiiith century A. D. They had migrated from Arabia and traced their descent from 'Adnān [q. v.]. Their descendants gradually became scattered over the whole of the Iberian peninsula from Xativa (Djafa Shāṭiba) in southeastern Spain where they first settled.

1. The ancestor of the Spanish line was called Zuhr. His biographer, Ibn al-Abbār, gives him the name al-Iyādī, because he traced his descent from Iyād, son of Ma'add, son of 'Adnān, who was regarded as one of the founders of the Arab race. According to Ibn Khallikān, Zuhr al-Iyādī had a son named Marwān, the father of Abū Bakr Muḥammad, who was the first to take a prominent place among his contemporaries. He was a jurist, celebrated for his learning and piety, eloquence and liberality, and died at the age of 86 at Talavera (Ṭalbīra) in 422 = 1030-1031.

2. Abū Marwān 'Abd al-Malik b. Muḥammad b. Marwān b. Zuhr, son of the preceding, was a celebrated physician, who practised in Ḳairawān and later for a long time in Cairo. Returning to Spain he settled in Denia (Dāniya) where the ruler Mudjāhid heaped honours upon him and took him to his court. From there his reputation spread through all Spain and he is said not only to have been a clever physician but also a learned jurist. Ibn Abī Uṣaibi'a reports that he moved from Denia to Seville, where he died leaving a considerable fortune. On the other hand Ibn Khallikān assures us on reliable authority, that he died in Denia which he had never left.

3. Abu 'l-'Alā' Zuhr b. Abī Marwān 'Abd al-Malik b. Muḥammad b. Marwān, son of the preceding, is usually called Abu 'l-'Alā', which since the middle ages has been corrupted into the variants Aboali, Abuleli and Ebilule, and in combination with Zuhr the forms Abulelizor and Albuleizor. Abu 'l-'Alā' adopted a medical career and received an excellent technical training from his father and Abu 'l-'Ainā' al-Miṣrī. The accuracy of his diagnosis was marvellous. Among his pupils we may note the poet Abū 'Āmir b. Yannaḳ. The study of belles lettres and Tradition took him to Cordova where he enjoyed the instruction of the most celebrated teachers and soon won a considerable reputation, which attracted for him the attention of al-Mu'tamid, the last 'Abbādid ruler of Seville. The latter took him to his court, overwhelmed him with honours, and restored to him his grandfather's estate which had been confiscated. After al-Mu'tamid had been dethroned by the Almoravid Yūsuf b. Tāshfīn in 484 = 1091 Abu 'l-'Alā' found an opportunity to show his gratitude to his former patron. But he soon went over to Yūsuf b. Tāshfīn, who gave him the rank of vizier, so that in Latin translations of the middle ages his name is often prefixed by the Spanish form Alguazir. According to Ibn al-Abbār, Abu 'l-'Alā' died in Cordova. His body was taken to Seville and interred there in 525 = 1130-1131. Wüstenfeld maintains, on the authority of Ibn Abī Uṣaibi'a, that he died in Seville.

4. Abū Marwān 'Abd al-Malik b. Abi 'l-'Alā' Zuhr, son of the preceding, usually called Abū Marwān b. Zuhr, corrupted by mediaeval copyists to Abhomeron Avenzoar or simply Avenzoar, was born in Seville. The date of his birth is not given by the biographers, but a few equations place it approximately between 484 = 1091 and 487 = 1094. After receiving an excellent education in literature, law and theology, his father taught him medicine. He soon became equal in knowledge to his teacher and distinguished himself by his original experiments in therapeutics. Like his father he was at first in the service of the Almoravids and later of the Almohads. Averroes [v. Ibn Rushd] was on intimate terms with him and considered him the greatest physician since Galen, but was not his pupil as many insist. On a journey through North Africa Avenzoar suffered many indignities from 'Alī b. Yūsuf, the governor of Marrākush, for some unknown reason. The latter even had the doctor imprisoned and he makes some bitter allusions to the event in his works. On the death of 'Alī b. Yūsuf b. Tāshfīn and the overthrow of the Almoravids by the Almohads, Avenzoar went over to 'Abd al-Mu'min and had no cause to repent of his action. He was given rich presents and like his father before him received the rank of vizier. Among his works may be mentioned the *Kitāb al-Iḳtiṣād fī Iṣlāḥ al-Anfus wa 'l-Adjsād*, which he composed by order of and on lines laid down by the Emir Ibrāhīm b. Yūsuf, and especially his chief work, the *Kitāb al-Taisīr fi 'l-Mudāwāt wa 'l-Tadbīr*, which he wrote at the instigation of Averroes. Avenzoar exercised a considerable influence on European medicine, which lasted till the end of the xviith century, owing to the translations of his books into Hebrew and Latin. From the theoretical point of view, like Galen, he championed the theory of humours, but in practice considered experience the most reliable guide. In him we find not only original views on established facts, but new contributions to knowledge also such as the description of the mediastinal tumours and the abscess on the pericardium, diseases which had not been previously mentioned. He was the first Arab physician to recommend tracheotomy. Artificial feeding either through the gullet or through the rectum was not unknown to him and he explains its working with much skill. The erroneous view taken by several writers that Avenzoar was a Jew has been challenged by Steinschneider (*Arch. für pathol. Anatomie* (Berlin 1873, p. 115) and Wüstenfeld (*Gesch. der arab. Aerzte* etc., p. 89) and finally clearly refuted by G. Colin (*Avenzoar, sa vie et ses oeuvres*, p. 34 *sqq.*). After a meritorious career devoted to work and good deeds, Avenzoar died, like his father, of a malignant tumour at Seville in

557 = 1161-2. He left a son and a daughter and was buried outside the Victory Gate.

5. ABŪ BAKR MUḤAMMAD B. ʿABD AL-MALIK B. ZUHR, son of the preceding, known as al-Ḥafīd, the "grandson", born in 504 = 1110-11, died in 595 = 1198-9, was likewise a distinguished physician but more of a practical man than a writer of medical works, although a treatise on diseases of the eye is attributed to him. Almost unknown in Christian Europe, he had a very high reputation among the Muslims of Spain and Africa, although this was due less to his activity as a doctor than to his deep learning in all branches of Arab literature and to his poems of great delicacy of sentiment. The Almohad Caliph Yaʿḳūb b. Yūsuf al-Manṣūr summoned him to Africa to his court, appointed him his physician, gave him rich gifts and showed him great honour but thus aroused the jealousy of the vizier Abū Zaid ʿAbd al-Raḥmān b. Yūdjān. The latter had the physician and his niece who was very skilled in gynecology and midwifery treacherously poisoned during their stay in Morocco. The Caliph preached his funeral sermon and he was buried in the garden of the Emirs. He left a son and a daughter.

6. ABŪ MUḤAMMAD ʿABD ALLĀH B. AL-ḤAFĪD, son of the preceding, born in 577 = 1181-2 at Seville, was an excellent physician, trained in the school of his father. The Almohad caliphs al-Manṣūr and al-Nāṣir successively took him to their court and heaped honours upon him. Like his father he was also murdered by poisoning and died in 602 = 1205-6, being only 25, on a journey to Marrākush at Ribāṭ al-Fatḥ (Rabat). His body which was buried there was later exhumed, taken to Seville and buried there outside the Victory Gate along with the remains of his ancestors. He left two sons Abū Marwān ʿAbd al-Malik and Abu ʾl-ʿAlāʾ Muḥammad, both of whom lived in Seville; the younger was also a physician and had a sound knowledge of the works of Galen.

IBRĀHĪM, the Biblical Abraham, was, according to the Ḳurʾān (Sūra vi. 74), the son of Āzar, which name is apparently to be derived from Eliezar, the name of his servant (cf. S. Fraenkel in *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, lvi. 72). The Biblical names of Abraham's ancestors: Tāriḫ b. Nāḥūr b. Sārūgh b. Arghū b. Fāligh b. ʿĀbir b. Shāliḫ b. Ḳaināṇ b. Arfakhshad b. Sām b. Nūḥ are found in al-Thaʿlabī, p. 44, and Ibn al-Athīr, i. 67, and this genealogy agrees perfectly with *Genesis* xi. 10—21 and *Chronicles*, i. 12—27. Ḳaināṇ alone seems to have been inserted from *Genesis* v. 12. Born in 1263 after the Deluge or 3337 after the creation (al-Thaʿlabī, *l. c.*) — a combination of the dates given in *Genesis* v. 3—10 and xi. 10—25 however gives the birth of Abraham 292 years after Noah or 1918 after the creation — he at once undertook his mission of preaching a holy war against King Namrūd. His mother ʿUshā' had to take refuge in a cave at Kūthā where he first saw the light of the world (al-Thaʿlabī, *l. c.*; Ṭabarī, i. 256; Zamakhsharī, i. 172; Baiḍāwī, i. 133; Ibn al-Athīr, i. 96; Yāḳūt, s. v. Kūthā; al-Bakrī, p. 485; al-Muḳaddasī, p. 86; *Bābā bathrā*, 91a; Maimonides, *Dalālat al-Ḥāʾirīn*, chap. 29). For bad dreams had induced Namrūd to have pregnant women watched and their newborn sons killed. The slayers visited Ibrāhīm's mother to examine her before the pains of childbirth had come upon her. They examined her body on the right and the child hid on the left; they sought it on the left and it fled to the right so that they had to depart after doing nothing (al-Kisāʾī, p. 115—120). The story in the *Sefer Hayyāshār* (section *Noaḥ*) that Teraḥ was ordered to hand over Abraham to be executed and in his place delivered up the son of a handmaid has its origin in Muslim tradition. While still quite a child (*Talmud Nedārīm*, 32) an experience gave him the knowledge of Allāh which is mentioned in the Ḳurʾān vi. 75—79. When he had left the cave and was coming to his father's house, night fell upon him and he saw a star. He said: "That is my Lord"! But when it set, he said: "I do not love those that set"! He saw the moon rise and said: "That is my Lord!" As it also disappeared, he said: "Verily, if my Lord does not guide me, I shall become one of those that go astray!" When he saw the sun rise, he said: "That is my Lord, he is the greatest!" When it also set, he said: "O my people, I am free from your idolatry See, I turn my face to the creator of Heaven and Earth!" etc. We also find these stories in the Hebrew book, *Shebeṭ Mūsar* (Smyrna 1720), p. 109—111, and *Sefer Hayyāshār* (*Noaḥ*). Of the various legends (in al-Thaʿlabī, p. 45—47, and al-Kisāʾī, p. 125—140) which describe Ibrāhīm's wars with Namrūd and which also found a way into later Rabbinical literature (Jellinek, *Bēth Hammidr.*, i. 25—34; *Sefer Hayyāshār* [*Noaḥ*]; *Sefer Eliyyāhū zūṭā*, ch. 25, and *Pirḳē de R. El.*, ch. 32) the following may find a place here, which are based on Ḳurʾān xxi. 59—67, as well as on *Genesis Rabbā*, section 38. One day his fellow tribesmen left the town to offer sacrifices to their Gods. Ibrāhīm pretended to be unwell and remained in the town. Armed with an axe he went to the temple of the gods where tables were laid with food. He said: "Why do ye not eat?" and struck off the hand of one, the foot of another and the head of a third. He put the axe into the hand of the biggest and placed various dishes before him. When the people of the town saw this on their return, they accused Ibrāhīm of the deed. He answered: "Verily, the biggest of them has done this; ask them, if they can speak". They said: "You surely know that they cannot speak". He said: "Do you, disregarding Allāh, worship what can neither help nor harm you? Fie upon you and your worship of idols!" Thrown into a limekiln as a punishment he left it unharmed after being three or

seven days in it (al-Tha'labī and al-Kisā'ī, *l. c.*). Namrūd was completely defeated and Ibrāhīm with his followers set out for Palestine being now called *Khalīl Allāh*, "the friend of God" (al-Kisā'ī and al-Tha'labī following *Jesaias*, xli. 8, *Shabbāth* 137, *Menāḥōth* 53). In Egypt his beautiful wife Sāra was taken before Fir'awn (*Genesis*, xii. 10—20, al-Tha'labī, p. 44, Ṭabarī, i. 225, Ibn al-Athīr, i. 72). She said he was her brother so that he might not be slain on her account. She was not telling a lie, as he was her brother in the faith. When Fir'awn tried to touch her, his hand was paralysed and restored again when he had sent her back. In Saba' in Palestine he dug a well of fresh clear water. Being molested by the inhabitants he had to go away whereupon the water dried up (*Genesis*, xxi. 25—30, al-Tha'labī and Ibn al-Athīr, *l. c.*). The people hurried after him to beg him to return. But he refused and gave them seven goats (*Genesis* xxi. 30) with instruction to place them at the well; the water would flow then again. When a menstruating woman had drunk from the well, the water entirely disappeared. In his 120th year he circumcised himself (al-Tha'labī, p. 59). He died at the age of 175 and was buried in the family tomb at Khabrūn [cf. the article AL-KHALĪL]. On the day of the Resurrection, he will take his place at the left hand of Allāh and guide the pious into Paradise (al-Tha'labī, p. 60; cf. *Genesis R.*, Par. 48).

Bibliography: al-Tha'labī, *Ḳiṣaṣ al-Anbiyā'*, Cairo 1312, p. 43—47, 59 *sq.*; al-Kisā'ī, *Ḳiṣaṣ al-Anbiyā'*, p. 128—145, 153; Ṭabarī, *Annales*, i. 220—225; Ibn al-Athīr, i. 67—98; Grünbaum, *Beiträge*, p. 122—130; Eisenberg, *Abraham in der arab. Legende*, 1912; Weil, *Leben Abrahams*, Berlin 1913 [contains a fragment from al-Kisā'ī, which seems to be of very late origin and differs in many respects from the original.]

(J. EISENBERG.)

Sprenger (*Leben und Lehre des Moḥammad*, ii. 276 *sqq.*) was the first to point out that the figure of Ibrāhīm in the Ḳur'ān has a history before he finally develops into the founder of the Ka'ba. This thesis was further expounded by Snouck Hurgronje as follows (*Het Mekkaansche Feest*, p. 20 *sqq.*). In the older revelations (Sūra li. 24 *sqq.*; xv. 5 *sqq.*, xxxvii. 81 *sqq.*, vi. 74 *sqq.*, xix. 42 *sqq.*, xxi. 52 *sqq.*, xxix. 15 *sqq.*) he is an apostle of God, who has to admonish his people, like other prophets. Ismā'īl is not yet connected with him. At the same time it is emphasised that Allāh had not yet sent an admonisher to the Arabs (xxxii. 2, xxxiv. 43; xxxvi. 5); Ibrāhīm never appears as the founder of the Ka'ba and the first Muslim.

In the Medina Sūras on the other hand, Ibrāhīm is called *Ḥanīf* [q. v.] *Muslim*, the founder of the "religion of Ibrāhīm", whose palladium, the Ka'ba, he founded along with Ismā'īl (ii. 118 *sqq.*, iii. 60, 84 etc.). This alteration is explained as follows. Muḥammad had appealed to the Jews in Mecca; in Medina it was soon shown that they seceded from him. Muḥammad was therefore forced to find other support; he therefore ingeniously created the new rôle of the patriarch; he could now be independent of contemporary Judaism by appealing to the Judaism of Ibrāhīm, which was also the precursor of Islām. When Mecca again became prominent in his ideas, Ibrāhīm at the same time became the founder of the sanctuary there.

(A. J. WENSINCK.)

IBRĀHĪM B. 'ABD ALLĀH, son of the great-grandson of 'Alī, 'Abd Allāh b. al-Ḥasan [q. v.] was brought up with his brother Muḥammad [q. v.] in the expectation of one day becoming Caliph. They therefore considered the 'Abbāsids as usurpers and with all the more justice as before the fall of the Omayyads, Abū Dja'far is said to have paid homage to Muḥammad as Caliph. The brothers were therefore no little danger to him and as Caliph he sent officers to search for them, so that they were forced to wander from place to place with many dangerous adventures in order to remain concealed. Muḥammad finally went to Medina and Ibrāhīm to Baṣra to advertise their cause. Although the project was by no means ripe, Muḥammad found himself forced to appear openly as a rebel in Ramaḍān 145 (Nov. 762), which, in spite of his misgivings forced his brother to do the same in Baṣra. His situation was at first not unfavourable. Sentiment in the 'Irāḳ was strongly 'Alid and Abū Dja'far, who was staying in the unruly town of Kūfa, had sent the most of his troops to Medina or elsewhere. Ibrāhīm seized the state treasury and equipped armies, which captured al-Ahwāz, Fārs and Wāsiṭ for him. But soon there arrived the depressing news that his brother in Medina had fallen on Ramaḍān 14 = 6 Dec. 762, which resulted in the Caliph now being able to send his general 'Īsā b. Mūsā from Medina to the 'Irāḳ. Ibrāhīm, who had left Baṣra to attack Kūfa, met 'Īsā at Bākhamrā south of Kūfa on the 15th Dhu 'l-Ḳa'da (14 Febr. 763). Ibrāhīm's troops were at first victorious, but then the battle turned and he himself fell, struck by an arrow. His head was cut off and sent to the Caliph. Ibrāhīm, who was 48 years old, was better fitted for the dangers of an adventurous wandering life than for the task of conducting a revolution. Like many of his family he was personally brave, but his character was weak, he had a dreamy and somewhat sensual nature and above all had inherited the fatal faculty of the 'Alids for rejecting good advice and following an unreflecting and ruinous course.

(FR. BUHL.)

IBRĀHĪM B. ADHAM B. MANṢŪR B. YAZĪD B. DJĀBIR (ABŪ ISḤĀḲ) AL-TAMĪMĪ AL-'IDJLĪ, the famous ascetic, was a native of Balkh. The dates given for his death, which is said to have occurred while he was taking part in a naval expedition against the Greeks (*Ḥilyat al-Awliyā'*, Leiden MS., i. 188), range between 160 and 166 (776—783). Some verses composed on this occasion by the poet Muḥammad b. Kunāsa of Kūfa (died 207 = 822), whose mother was the sister of Ibrāhīm b. Adham, praise his asceticism, the nobility of his character, and his personal courage and refer to "the Western tomb", *al-djadath al-gharbī*, in which he was buried (*Aghānī*, xii. 113, 7 *sqq.*). According to one account, he was buried at Sūkīn, a fortress in Rūm (Yāḳūt, edited by Wüstenfeld, iii. 196, 11). The fact that after his conversion to Ṣūfism he migrated to Syria, where he worked and lived by his labour until his death, is established by many anecdotes related in the

Ḥilyat al-Awliyāʾ. He is reported to have said to ʿAbd Allāh b. Mubārak, who asked him why he had left Khorāsān: "I find no joy in life except in Syria, where I flee with my religion from peak to peak and from hill to hill, and those who see me think I am a madman or a camel-driver".

The Ṣūfī legend of Ibrāhīm b. Adham is evidently modelled upon the story of Buddha (see Goldziher, *A Buddhismus hatása az Iszlámra*, summarised by T. Duka in *Journ. Roy. Asiat. Soc.*, 1904, p. 132 *sqq.*). Here Ibrāhīm appears as a prince of Balkh who, while hunting, was warned by an unseen voice that he was not created for the purpose of chasing hares or foxes; whereupon he dismounted, clad himself in the woollen garment of one of his father's shepherds, to whom he gave his horse and all that he had with him, and "abandoned the path of worldly pomp for the path of asceticism and piety" (for other accounts of his conversion, see Goldziher, *loc. cit.*, and *Fawāt al-Wafayāt*, Būlāḳ, 1283 A. H., i. 5, 10 *sqq.*). The anecdotes and sayings of Ibrāhīm, as recorded by his earliest biographers, show that he was essentially an ascetic and quietist of a practical type; we look in vain for any traces of the speculative mysticism which developed in the following century. Like many of the ancient Ṣūfīs, he took every precaution that his food should be 'lawful' in the religious sense of the word. He did not carry the doctrine of *tawakkul* to the point of refusing to earn his livelihood; on the contrary, he supported himself by gardening, reaping, grinding wheat, etc. While he approved of begging, in so far as it incites men to give alms and thereby increases their chance of salvation, he condemned it as a means of livelihood. He said: "There are two kinds of begging. A man may beg at people's doors, or he may say, 'I frequent the mosque and pray and fast and worship God and accept whatever is given me'. This is the worse of the two kinds. Such a person is an importunate beggar". A trait far more characteristic of Indian and Syrian than of Moslem asceticism appears in the story that one of the three occasions on which Ibrāhīm felt joy was when he looked at the fur garment that he was wearing, and could not distinguish the fur from the lice, because there were so many of the latter (al-Ḳushairī, *Risāla*, Cairo, 1318 A. H., p. 83, l. 25 *sqq.*). As examples of his mystical sayings the following may be quoted: "Poverty is a treasure which God keeps in heaven and does not bestow except on those whom He loves"; "this is the sign of him that knows God, that his chief care is goodness and devotion, and his words are mostly words of praise and glorification". In answer to Abū Yazīd al-Djuhanī, who declared that Paradise is the utmost that devotees hope to obtain from God hereafter, Ibrāhīm said: "By God, I deem that the greatest matter, as they consider it, is that God should not withdraw from them His gracious countenance". Although such ideas mark the transition from asceticism to mysticism, we cannot regard Ibrāhīm b. Adham as one who had crossed the border-line. The keynotes of his religion are renunciation of the world and self-mortification, and in these he finds the fullest peace and joy, not in the ecstasy of contemplation or the enthusiasm of self-abandonment. (NICHOLSON.)

[An Arabic romance of Ibrāhīm b. Adham, translated from the Turkish of Darwīsh Ḥasan al-Rūmī and abridged by Aḥmad b. Yūsuf Sinān al-Ḳarāmānī al-Dimashḳī (d. 1019 = 1611) is preserved in Berlin (cf. Brockelmann, *Gesch. d. arab. Litt.*, ii. 301; survey of contents in Ahlwardt's *Verz.*), and a manuscript having the title *Sīrat al-Sulṭān Ibrāhīm b. Adham taʾlīf al-Darwīsh Ḥasan al-Rūmī*, is mentioned by Ḥabīb al-Zaiyāt, *Khazāʾin al-Kutub fī Dimashḳ wa-Ḍawāḥīhā*, p. 39, Nº. 130, 2. A versified *Ḳiṣṣa Walī Allāh Adham* is contained in Ms. Gotha, Pertsch, *Die arab. Hss.*, nº. 2752. A romance of Ibrāhīm has been versified in Hindustānī by Abu 'l-Ḥasan (Ḥusain) Muḥammad, under the title *Gulzār-i Ibrāhīm* (Mīrat 1865, lith. Lucknow 1869, Cawnpore 1877; cf. J. F. Blumhardt, *Cat. of Hindustani printed Books Brit. Mus.*, p. 226; Garcin de Tassy, *Hist. de la Litt. hindouie et hindoustanie*², i. 101). There exists also a Malay romance of which the following summary is given by Dr. J. J. de Hollander, *Handleiding bij de Beoefening der Maleische Taal- en Letterkunde*, 6th ed. Breda, 1893, p. 348: "After a prosperous reign of some years, Sulṭān Ibrāhīm, prince of ʿIrāḳ, decides to perform the pilgrimage to Mecca and charges the most trustworthy of his viziers with the government in his absence. Having arrived in Kūfa, Ibrāhīm becomes acquainted with Siti Ṣāliḥa, the daughter of Sharīf Ḥasan. He marries her, but soon leaves her in order to continue his journey to Mecca. Twenty years later, his son Muḥammad Ṭāhir, who was born from this marriage, betakes himself to Mecca to visit his father, who had been uninterruptedly engaged in devotion in the holy mosque. Sulṭān Ibrāhīm, being determined to renounce the world for ever, gives his son his seal-ring, by which he may vindicate his right to the throne of ʿIrāḳ, and bids him go to that country. The son obeys and is acknowledged by the vizier as the legitimate ruler. He does not desire, however, to take the reins of government and abdicates in favour of the vizier, on whom he bestows all the treasures left by his father." The Malay romance exists in two recensions, a shorter (ed. with Dutch transl. by P. P. Roorda van Eysinga, *Levensschets van Sulthan Ibrahiem, vorst van Irakh*, Batavia 1822; ed. of text with notes by D. Lenting, *Geschiedenis van Sulthan Ibrahiem, zoon van Adhum, vorst van Irakh*, Breda, 1846; new ed. by A. Regensburg, Batavia, 1890, in Latin transcr., ibid. 1901) and a longer one, the latter is said to have been translated from the Arabic of a certain Hadramī shaikh, named Abū Bakr (cf. Ph. S. van Ronkel, *Catalogus der Maleische Handschriften van het Bataviaasch Genootschap*, pp. 120—122, Nº. 117—122 = *Verhandelingen van het Bataviaasch Genootschap van Kunsten en Wetenschappen*, vol. 57). Stories of Ibrāhīm b. Adham, in part agreeing with the published text, are also found in the *Bustān al-Salāṭīn* (composed in Atjeh 1040 = 1630-1), Book iv. Ch. i. (cf. H. N. van der Tuuk in *Bijdragen tot de Taal-, Land- en Volkenkunde van Ned.-Indië*, Ser. iii., i. 424 *sq.*, Nº. 15; do., *Maleisch Leesboek*, The Hague, 1868, p. 40—8; van Ronkel, *o. c.* Nº. 55) and in the Javanese works *Lasmu (?) Sulṭān* (Br. Mus., cf. G. Niemann, *Inleiding tot de kennis van den Islam*, p. 479) and *Nawawī*, cf. J. H. G. Gunning, Diss. Leiden 1881, xxi. *sq.*; A. C. Vreede, *Catal. van de Javaansche . . . Handschr. der Leidsche Univ.-Bibl.*, p. 303, Nº. 221. Poetic adaptations in Javanese have been made by P. P. Roorda van Eysinga (Am-

sterdam 1843) and C. F. Winter (Batavia 1882, 1908), the latter from prose by F. L. Winter (Semarang 1881); cf. Vreede, *o. c.*, p. 216 *sq.* There are also versions of the story in Sunda (pr. Batavia, 1859 and 1888; cf. H. H. Juynboll, *Catal. van de Maleische en Sundaneesche Handschr. der Leidsche Univ.-Bibl.*, p. 320 *sqq.*, N°. 381-2; *Suppl.*, p. 34 *sq.*, N°. 63), and in Buginese (transl. from the Malay; cf. B. F. Matthes, *Kort verslag aangaande ... Makassaarsche en Boegineesche Handschr.*, p. 32, N°. 95).

(NICHOLSON.)

IBRĀHĪM b. AL-AGHLAB (184—196 = 800—812), **founder of the semi-independent dynasty of the Aghlabids**, was the son of al-Aghlab b. Sālim b. ʿIḳāl al-Tamīmī, a native of Marw al-Rūdh who had governed Ifrīḳiya after the departure of Ibn al-Ashʿath in 148 A. H. and had been killed two years later in the revolt of al-Ḥasan b. Ḥarb. In 179 (795) Ibrāhīm received the governorship of the Zāb. When the mistakes of the governor Ibn Muḳātil had roused the people against him, who finally (183 = 799) expelled him, Ibrāhīm came to his assistance, and after the restoration of order, cleverly made himself so indispensable to Hārūn al-Rashīd, that the Caliph, on Harthama's advice, left him in possession of Ifrīḳiya on payment of a tribute of 40,000 dinars while Egypt was freed from the subvention of 100,000 dinars which she paid annually to Ifrīḳiya. This change took place on the 12[th] Djumādā II 184 (July 9, 800). Following Spain and the Maghrib, Ifrīḳiya in turn separated from the ʿAbbāsid empire. Egypt was soon to follow. The new prince began by building a new capital to replace Ḳairawān: this was al-ʿAbbāsiya [q. v.]. A year later he received ambassadors from Charlemagne (801), who brought from Africa a number of relics: this was presumably not the only object of their journey and it may be supposed that Charlemagne was seeking an ally against the Omaiyads in Spain. In 186 (802) Ibrāhīm suppressed a rising of Ḥamdīs al-Kalbī in Tūnis; in 189 (805) another broke out in Tripoli, the inhabitants of which drove out the Aghlabid governor Sufyān b. al-Maḍā'. Hardly had this been terminated by an amnesty 194 (809) when a more serious rising took place in the very centre of Ifrīḳiya. ʿImrān b. Mudjālid al-Rabīʿ (Dhahabī has Makhlīd instead of Mudjālid, v. Fagnan, Ibn al-Athīr, *Annales*, p. 158, note 1, p. 173) and Ḳuraish b. al-Tūnisī were at its head. Ibrāhīm was besieged for a whole year in al-ʿAbbāsiya. Money sent by the Caliph bought off the rebels and ʿImrān retired to the Zāb, where he lived till the death of Ibrāhīm without being disturbed. Tripoli was again the scene of a revolt in 196 (811) in the course of which it was pillaged by the Khāridjī Hawwāra. The ruler sent his son ʿAbd Allāh at the head of an army and after an initial success the latter was forced to fight against the Khāridjīs from Tāhert (Tagdemt) led by their Rustamid imām ʿAbd al-Wahhāb b. ʿAbd al-Raḥmān [q. v.]. The town was besieged by them, and the assault had begun when the news came that Ibrāhīm had died on the 21[st] Shawwāl 196 (5[th] July 812) at al-Ḳairawān. ʿAbd Allāh, eager to seize his heritage, made peace with ʿAbd al-Wahhāb by abandoning to him the whole of Tripolitania, except Tripoli, as well as the districts of Ḳastīliya and Djerba.

(RENÉ BASSET.)

IBRĀHĪM, ABŪ ISḤĀḲ b. AḤMAD, **ninth ruler of the Aghlabid dynasty**. Although he had solemnly sworn to his dying brother Muḥammad Abu 'l-Gharānīḳ to recognise his nephew Abū ʿIḳāl, he seized the throne on the death of his brother on the 6[th] Djumādā I 261 (= 16[th] February 875) with the acquiescence of the people of al-Ḳairawān. He was famous for two very different reasons: his taste for building and his ferocious cruelty. He built the Ḳaṣr al-Baḥr at al-Raḳḳāda and placed along the coast a number of towers (*maḥāris*) to signal nocturnal attacks, which has led other buildings to be wrongly attributed to him. He waged wars notably against al-ʿAbbās, who rebelling against his father Aḥmad, the first Ṭūlūnid of Egypt, marched against Ifrīḳiya in 266 = 879-880. After defeating the Aghlabid troops under Muḥammad b. Ḳurhub at the Wādī Wardāsa, he was held up at first by the siege of Labda and later by that of Tripoli. The Abāḍīs [q. v.] of the Djebel Nafūsa, led by their chief Ilyās b. Manṣūr came to the help of the town and destroyed the army of al-ʿAbbās who fled to Egypt (267 = 880-1). A rising of the Berbers of Ifrīḳiya cost the life of Mu-

ḥammad b. Ḳurhub (Dhu 'l-Ḥidjdja 268 = June-July 882) and was only suppressed by Ibrāhīm's son Abu 'l-'Abbās. The latter having completely defeated the Nefūsa was sent to Sicily where Syracuse had been taken in 878. Ibrāhīm followed later and in Radjab 289 = July—August 902 by order of the 'Abbāsid Caliph, seized Taormina, then crossing the strait began to besiege Cosenza. He died of dysentery during the siege on the 19th Dhu 'l-Ka'da 289 = 23rd October 902. His body was taken to Kairawān where he was buried on the 1st Muḥarram 290 = 5th December 902. All the historians unanimously accuse him of cruelty and quote numerous examples e. g. the massacre of the mawlās, the inhabitants of al-Raḳḳāda and of Tūnis, the murder of his physicians, ministers, pages, his son Abu 'l-Aghlab, and his eight brothers, on account of imaginary fears. He created a bodyguard of negroes whom alone he trusted and who were the instruments of his cruelties.

IBRĀHĪM B. AḤMAD, the youngest son of Aḥmad I, was born on the 12th Shawwāl 1024 (4th November 1615) and succeeded his brother Murād IV (died 16th Shawwāl 1049 = 8th Febr. 1640) on the throne as 19th Ottoman sulṭān. His brothers, 'Othmān II and Murād IV reigning before him, had kept him in strict seclusion, and he grew up in awe of their machinations and in continual fear of a violent death, being on the whole of a delicate constitution; all this contrived to render him absolutely incapable of governing a great empire. During the first years of his reign he therefore left the government in the hands of the able vizier Ḳara Muṣṭafā. By the treaty of Szön (15th March 1642) the latter renewed the peace with Austria; he reconquered the fortress of Azow, and among some minor disturbances he suppressed the dangerous insurrection of Naṣūḥ-pashazāde (1642). At the same time he kept a watchful eye on the financial system of the country, and he greatly improved it by reforming the currency, by limitation of the expenses of the State, and by a strict collection of the taxes. After four years he fell a victim to court intrigue, and was beheaded on 21st Dhu 'l-Ḳa'da 1053 (31st January 1644). The Sulṭān, who indulged in the delights of harem-life as none of his predecessors or successors ever did, was now absolutely under the sway of his odalisks and favourites, particularly the notorious *Djindji Khodja* Ḥusain, an ignorant *softa* from Zafranbolu, who cured Ibrāhīm from his fits of faintness by his magic charms and thereby won unlimited control over him. The State revenues were dissipated to humour the foolish whims of Ibrāhīm and his court; offices and ranks were given by favour and for gifts i. e. in proportion to the bribes given. The result was an uninterrupted series of changes of grand viziers and ministers.

Such was the wretched state of affairs when on the 28th Sept. 1644 Maltese corsairs seized a convoy of pilgrims near Karpathos; among them was the Sulṭān's *Kyzlar Aghasi* Sünbül with his riches and his retinue, bound for Cairo whither he had been banished. The Sulṭān resolved to be revenged, and as his favourite, the *silihdār* Yūsuf, had already been inciting him against Venice, the Sulṭān undertook an expedition against the Republic. Without a declaration of war a strong Turkish army was landed in Crete in June 1645 and took Canea. In the following year Rhethymo fell, while the siege of the strong fortress of Candia continued to drag on. In the meanwhile the Turks were repeatedly defeated in Dalmatia. All this roused the Sulṭān's wrath to such an extent, that he resolved to massacre all Christians, at least all Franks residing in his empire. This plan failed on account of the opposition of the Shaikh al-Islām. This war, which was to last for 25 years, weakened the country to utter exhaustion; nevertheless it did not allow the Sulṭān to interfere with his dissolute conduct. The immense sums spent for the foolish luxury of the Serai rose disproportionately; in order to provide the necessary money, new heavy taxes were imposed on the people. At last the public rage broke forth openly; at the head of the insurrection were the Janissaries assisted by the 'ulamā and the Shaikh al-Islām. The Grand Vizier Hezārpāre Aḥmad Pasha fell the first victim of the infuriated mob. Next came the Sulṭān Ibrāhīm who was dethroned on the 18th Radjab 1058 (8th August 1648) and confined in the Čīnili köshk, where he was strangled a few days later by the executioner. When Ibrāhīm ascended the throne, he was the only living male offspring of the house of 'Othmān: on his death he left four sons and thus became the founder of the dynasty again, the only thing history places to his credit.

IBRĀHĪM B. KHĀLID. [See ABŪ THAWR.]

IBRĀHĪM B. AL-MAHDĪ, an 'Abbāsid, born at the end of 162 = July 779. His father was the Caliph Muḥammad al-Mahdī, his mother a negress named Shikla. When the Caliph al-Ma'mūn, who was then in Marw, appointed the 'Alid 'Alī al-Riḍā successor on the end of Ramaḍān = 24th March 817, disturbances broke out among the

followers of the ʿAbbāsids. At the end of Dhu 'l-Ḥidjdja = July 817 they proclaimed al-Maʾmūn's uncle, Ibrāhīm, Caliph under the name al-Mubārak ("the blessed") and on the 5th Muḥarram 202 = 24th July 817 he publicly appeared in the mosque as ruler. His reign did not last long however. The troops soon rebelled because he could not pay them. After order had been restored in the army, Ḥīra and Kūfa fell into his hands, but on the 26th Radjab = 7th February 818 his generals Saʿīd b. Sādjūr and ʿĪsā b. Muḥammad were defeated at Wāsiṭ by the governor Ḥasan b. Sahl and had to retire to Baghdād. ʿĪsā soon went over openly to the enemy and the other generals began secretly to work for al-Maʾmūn. When the latter came back from Khorāsān, Ibrāhīm could no longer hold out, but had to abandon his claims in the middle of Dhu 'l-Ḥidjdja 203 = June 819 and on the 15th Ṣafar 204 = 11th August 819 al-Maʾmūn entered Baghdād. Ibrāhīm henceforth lived in retirement. He was arrested in 210 = 825-826 but pardoned in a few days. He died in Ramaḍān 224 = July 839 at Surra-man-raʾā. He had not the gifts of a ruler; but he was a man of refined tastes who was especially interested in music and singing.

IBRĀHĪM b. Masʿūd, twelfth Ghaznawid. [See Ghaznawids, ii. 156b *sq*.]

IBRĀHĪM b. Muḥammad b. ʿAlī b. ʿAbd Allāh b. al-ʿAbbās, brother of the two first ʿAbbāsid Sulṭāns, al-Saffāḥ and al-Manṣūr, born in 82 = 701-702. His father who, according to the usual statement, died in Dhu 'l-Ḳaʿda 125 = August 743, was the founder of the secret ʿAbbāsid propaganda and shortly before his death made over to his son Ibrāhīm his right to the ʿAbbāsid Imāmate. In the following year the latter sent Bukair b. Māhān [q. v.] to Marw where he informed the Khorāsānians of Muḥammad's death and proclaimed Ibrāhīm his successor. After Bukair's death in 127 = 744-745 Abū Salama al-Khallāl [q. v.] was appointed plenipotentiary of the ʿAbbāsids. Like his father, Ibrāhīm himself lived in al-Ḥumaima, a place south of the Dead Sea, while Kūfa was the centre from which the invisible threads of the energetic propaganda ran. Khorāsān was a particularly fertile soil for the activities of the ʿAbbāsid emissaries, and in 128 = 745-746 Abū Muslim was appointed leader of the secret agitation there. In the following summer the long prepared rebellion broke out and on the 1st Shawwāl 129 = 15th June 747 the first ʿAbbāsid service was held in Sīkadhandj. In the same year the Caliph Marwān II had Ibrāhīm captured and brought to Ḥarrān, his then residence, and the latter soon afterwards died there. According to some, Ibrāhīm was put to death by order of Marwān.

IBRĀHĪM BEY, one of the most prominent of the last Mamlūk amīrs of Egypt. He was brought to Egypt as a Circassian slave and passed into the possession of Muḥammad Abu 'l-Dhahab, the favourite Mamlūk of ʿAlī Bey [q. v.]. He manumitted him and married him to his sister (cf. al-Djabartī's statement under the 4th Rabīʿ II 1216). In 1182 (1767-8) he was appointed one of the 24 Beys, in 1186 as Amīr al-Ḥadjdj he led the Egyptian pilgrim caravan to Mecca. On his return the dispute between Muḥammad Abu 'l-Dhahab and ʿAlī Bey had already been decided in favour of the latter. During the few years of his brother-in-law's rule his prestige must have increased considerably. In 1187 he was Defterdār, in 1189 he remained in Cairo as Shaikh al-Balad while Muḥammad undertook his expedition to Syria and when the latter died at ʿAkkā, Ibrāhīm as his nearest relative inherited his great wealth and influence. With Murād Bey, another Amīr of Muḥammad's house, whom the troops had chosen as their leader, he shared the rule over Egypt so that he took over the civil rule as Shaikh al-Balad i. e. Lord Mayor of Cairo, while Murād took control of the army. The predominating position of these two is clear from the number of their Mamlūks. According to Volney, who was in Egypt in 1783, Ibrāhīm Bey had 600 Mamlūks, Murād Bey 400, the other Beys between 50 and 200. That this division of power lasted was mainly due to Ibrāhīm Bey's complaisance and love of peace. He probably dealt warily with the impulsive Murād Bey so that serious differences only arose between them in 1198-9. Their joint rule lasted till the French expedition to Egypt in 1213 (1798), although it was twice interrupted when Ismāʿīl Bey, the most influential amīr of the house of ʿAlī Bey, came into power. In 1191 he was only able to hold out for six months; in 1201 (1786) he was again made Shaikh al-Balad by the Turkish Kapudan (Ḳapṭān) Pasha (Admiral) Ḥasan. The object of the latter's expedition to Egypt was to strengthen the power of the Porte, the influence of which had sunk to a minimum since the days of Ibrāhīm Katkhudā and particularly under ʿAlī Bey. Although Ibrāhīm and Murād in whom Ḥasan Pasha saw the chief culprits, had to leave Cairo they did not dare openly to challenge the authority of the Porte's envoy, the latter however had to leave the rule of Egypt in the hands of the Mamlūks. Even after the departure of Ḥasan Bey, which was hastened by political complications with Russia, Ismāʿīl was able to retain his post of Shaikh al-Balad. Not till a pestilence had carried him and other amīrs off in 1206, could Ibrāhīm and Murād return to Cairo. They received an amnesty from the Porte and henceforth again shared the government of the country.

During the French advance of 1213 (1798) Ibrāhīm awaited the result of the fighting at the Pyramids on the east bank of the Nile at Shubra and Būlāḳ. He ordered the ships at Būlāḳ to be burned to make it difficult for the French to cross the Nile. After the battles of Khānkā and Ṣāliḥiyya

he succeeded in escaping with his train to Syria. He stayed at Ghazza and retired to the north-east when Bonaparte sent an expedition to Palestine.

Ibrāhīm returned to Egypt with the army of the Grand Vizier Yūsuf Pasha. When during the battle of Heliopolis Naṣūḥ Pasha, whom the Porte had designated governor of Egypt, entered Cairo in Febr. 1800, Ibrāhīm Bey was with him. He left the town with the Turkish troops when the French were able to hold it. He declined any rapprochement with the French, while Murād Bey made peace with them and received the governorship of Upper Egypt. He died soon afterwards of the plague in April 1801.

After the final evacuation of the town by the French in June 1801, Ibrāhīm Bey was again appointed Shaikh al-Balad by the Grand Vizier but soon afterwards on the 20th Oct. 1801 he was thrown into prison with the rest of the Mamlūk emirs by order of the Porte, who thought it a favourable opportunity to dispose of the Mamlūks. The English forced the imprisoned Mamlūks to be handed over to them. Ibrāhīm Bey thus succeeded in reaching Upper Egypt. From there in the next few years he repeatedly negotiated with the Turkish governor of Egypt, Khusrew Pasha. When the latter was driven from Egypt and the Albanian chief Ṭāhir, who had been appointed ḳā'immaḳām, was murdered, Muḥammad 'Alī summoned Ibrāhīm Bey to Cairo in April 1803 and gave him the office of Shaikh al-Balad to prevent Aḥmad Pasha, the governor designate of Djidda, who was passing through Egypt at the time, establishing himself there. The influence of the aged Ibrāhīm Bey was certainly not very great and he must have seen that he was only a tool in the hands of Muḥammad 'Alī. In any case, he developed a great distrust of Muḥammad 'Alī; he probably saw through the latter's policy of making use of the Mamlūks when it suited himself, while he took care not to allow them to become too powerful and continually sowed feuds among them. The coup de main which Muḥammad 'Alī attempted on 13th March 1804 against Ibrāhīm and 'Othmān al-Bardīsī, Murād's successor, failed in as much as both escaped imprisonment by flight. Ibrāhīm never again returned to Cairo. During the massacre of the Mamlūks on the 18-19th August 1805 he was at Ṭurā with his son Marzūḳ and inflicted heavy losses on Muḥammad 'Alī's troops there. His attempt to unite the Mamlūks in a common struggle with Muḥammad 'Alī failed owing to the dissensions among them and Muḥammad's skill in always winning to his side several of the most influential Mamlūks by flattery and gifts of honorary offices. Ibrāhīm declined an attempt at reconciliation made by Muḥammad 'Alī in 1809, saying that too much blood had flowed between them. Owing to Ibrāhīm's efforts the Mamlūks in 1810 were a power against which Muḥammad 'Alī did not dare to take open action. But by stratagem he succeeded in bringing most of the Mamlūks to Cairo. Here honours were heaped upon them and thus they were secured. They thus fell into the trap prepared by Muḥammad 'Alī and were massacred in the citadel on March 1st 1811. Ibrāhīm Bey with a few others had not trusted Muḥammad 'Alī's assurances. He remained on the southern frontier of Egypt and thus was saved. He spent the last years of his life at Dongola with the remnants of the Mamlūks "in the land of slaves, where they sowed millet and lived on it and clothed themselves in robes such as slave dealers wore there, till finally in Rabī' I 1231 the news of his death reached Cairo" (Djabartī). His widow who in 1811 had been allowed to seek and bury her son Marzūḳ's body, received permission from Muḥammad 'Alī to bring Ibrāhīm's body to Cairo. It arrived there in Ramaḍān 1232.

Bibliography: The chief authority is Djabartī's Chronicle *'Adjā'ib al-Āthār fi 'l-Tarādjim wa 'l-Akhbār* (Būlāḳ 1297, often reprinted, translated as *Merveilles Biographiques et Historiques*, 9 vols., Cairo 1888—1896), from 1190 there is frequent mention of Ibrāhīm Bey. The life comes after the events of the year 1231; C. F. Volney, *Voyage en Syrie et en Égypte pendant les années 1783, 1784 et 1785*, Paris 1786 etc., Chapt. vi.—ix.; *Histoire scientifique et militaire de l'Expédition française en Égypte*, 10 vols., Paris 1830—36; A. A. Paton, *A History of Egypt Revolution from the Period of the Mamelukes to the death of Mohammed Ali*, 2 vols., London 1863, 1870. The article "Ibrāhīm Bey" by P. (P. Kahle.)

IBRĀHĪM ḤAKKĪ PASHA is the grandson of a Georgian who adopted Islām and the son of Meḥmed Remzī, who at the time of his death was president of the Constantinople city council (*Shehr Emāneti Medjlisi*). Ibrāhīm Ḥakkī Pasha was born on the 22nd Shawwāl 1279 = 12th April 1863 in the Beshik-Ṭash quarter of Constantinople. From 1877 to 1882 he attended the school of administration (*Mülkiye Mektebi*) in Constantinople and took particular advantage of the lectures of Meḥmed Murād Bey (History), Portuḳāl Mīkā'īl Efendi (Finance) and Ohānnes Efendi (economics). Passing out of the school with brilliant success he became a translator in the Yildiz palace of Sulṭān 'Abd al-Ḥamīd from 1883 to 1894. Through his literary and scholarly activities he obtained the professorship of history at the age of 23 in the Constantinople school of Law (*Ḥuḳūḳ Mektebi*) to which soon afterwards in 1888 the chair of constitutional law (*ḥuḳūḳ-i esāsiye*) was added. Ibrāhīm Ḥakkī's professorship of history lapsed in 1891. In place of it he was given in 1892 the chair of administrative law in addition to that of constitutional law, and in 1893 that of international law in the school of Law also. Being a brilliant orator and a comparatively bold critic he was able to attach students to himself — and what was more important — also to interest even non-Turks and non-Muslims in the welfare of the Ottoman empire. On Sept. 12 1894, Ibrāhīm Ḥakkī was appointed legal adviser (*ḥuḳūḳ müshāwiri*) to the Sublime Porte. The Grand Vizier Meḥmed Sa'īd Pasha in 1901 or 1902 wished to appoint him undersecretary of the Ministry of Foreign Affairs, but the Sulṭān did not approve. Ḥakkī Bey distinguished himself in the office of legal adviser which he held till 1908, and acted as member or president of over 30 commissions which discussed the conclusion of treaties or disputed questions of law. Being a linguist he was twice sent on mission to Europe by 'Abd al-Ḥamīd and twice to America. When the Turkish constitution was re-established in 1908 Ibrāhīm Ḥakkī at once plunged into the political arena, championed extremely modern views, and

took the bold step, during the short time he held the portfolio of Minister of Education in 1908, of confirming in office only a hundred of the five hundred officials in the central offices. Soon afterwards he held the Ministry of the Interior for a short time. His great zeal horrified the backward officials so that he soon had to retire from these offices. He still continued to hold his legal chairs till in 1909 he was appointed ambassador to Rome. Having already for a long time been the candidate of the Committee of Union and Progress on Jan. 12 (Schulthess, Jan. 10) 1910 he was given the rank of vizier and then promoted Grand Vizier. Ibrāhīm Ḥaḳḳī proved himself in the field of politics a distinguished orator, a man of striking, well-marked convictions which, however, lacked the elasticity usual and perhaps necessary in the east. In alliance with the Young Turks he held the office of Grand Vizier for 21 months and was a rigorous opponent of the Albanian and other separatist claims. As a result of Italy's declaration of war against the Porte, Ibrāhīm Ḥaḳḳī's cabinet resigned on Sept. 29 1911.

The greatest political success of his vizierate was the successful operations of the Ottoman Chief of Staff, Aḥmed 'Izzet Pasha, against the rebels in the Yemen and in the conclusion of a peace with the leader of the Yemenī Zaidīs, Imām Yaḥyā, which was based on religious, legal, and in part financial independence. This treaty was also Aḥmed 'Izzet Pasha's work.

Ibrāhīm Ḥaḳḳī Pasha's literary works deal mainly with jurisprudence and to a secondary degree with history. His first book was an "Introduction to International Law" (*Medkhal-i Ḥuḳūḳ-i Düwel*) and was soon followed by an "History of International Law" (*Tārīkh-i Ḥuḳūḳ-i beine 'l-Düwel*, Istanbul, 1303 = 1885-6). Both are concise, unexceptionable and reliable compendiums for university teaching. In conjunction with Meḥmed 'Azmī he published about the same time a "Brief History of Islām" (*Mukhtaṣar Islām Tārīkhi*) which was intended for the lower classes of intermediate schools (*Rushdīye*); (6th edition Istanbul 1321 = 1903-4). Likewise with Meḥmed 'Azmī he prepared a "Brief Ottoman History" and then from his own pen a "Small Ottoman History" for elementary schools (Istanbul 1301 = 1890). Soon afterwards he published his most important historical work a "General History" in three volumes from the earliest times to the xvith century (*Tārīkh-i 'umūmī*, Istanbul, 1305 and 1306 = 1887-8 and 1888-9). There is nothing original in any of these works.

Ibrāhīm Ḥaḳḳī's most valuable work is his Administrative Law (*Ḥuḳūḳ-i Idāre*, 1st ed. Istanbul 1308 = 1890-91; 2nd 1312 = 1894-95) in two volumes octavo. The work deals for the first time with a many branched and complicated subject in a masterly fashion. It still far surpasses all similar compilations. He has also prepared a number of unpublished works, which his activities devoted for twenty years to education and politics have not yet allowed him to publish.

Bibliography: Schulthess' *Europäischer Geschichtskalender*, N. S., 26th year, 1910 (München 1911), 27th year 1911 (München 1912); Aḥmed Iḥsān, *Nevsāl-i Thervet-i Fünūn*, Istanbul 1311 = 1893-1894), p. 47—59, 60; Ismā'īl Ṣubḥī ve-Maḥmūd Fu'ād, *Sālnāme-i Thervet-i Fünūn*, Istanbul 1327 = 1911-12 and 1328 = 1912-13; Sa'īd Pasha, *Khāṭirāt*, ii. 2 (Der-i Se'ādet 1328 = 1911), p. 23 sq.; much personal information from Ibrāhīm Ḥaḳḳī Pasha.

(K. Süssheim.)

IBRĀHĪM KHĀN the ancestor of the Ibrāhīm Khānzāde family, was the son of the Princess Ismākhān, a daughter of Selīm II, by her first marriage with the famous Grand Vizier Meḥemmed Ṣokolli Pasha who was murdered on the 10th Sha'bān 987 (11th Oct. 1579). Tradition relates that he was consoled by his father at his birth, so that he was the first who broke the laws of the house of 'Osmān, according to which all sons of the Princesses, were to be put to death at birth (*Ḥadīḳat al-Djewāmi'*, ii. 38; cp. article DAMĀD), likewise contrary to the rule Aḥmad I appointed him to the post of governor general in different provinces, as a reward, it is said, for the fact that he had presented the Sulṭān with the property on which the palace of his father Meḥemmed Ṣokolli Pasha stood, for the building of the great Mosque on the Atmeidān (Hammer-Bernhauer, *Relazione* etc., p. 181). Ibrāhīm died some time after 1031 (1621-1622) and his descendants, the Ibrāhīm Khānzāde, formed like the Ewrenoszāde and the Ṭurkhānzāde, one of the historic families of the Empire, although they never filled important positions in the State. 'Alī Beg, a grandson of Ibrāhīm Khān, is one of the few mentioned repeatedly by the chroniclers (Rāshid, *Ta'rīkh*, ii. 220 sq.; Knolles-Rycaut, *The Turkish History*, p. 263; v. Hammer, *Geschichte d. Osm. Reiches*, ix. 563, No. 2696; de la Motraye, *Voyages*, i. 326). About the decline of the 17th century, the legend arose that the Ibrāhīm Khānzāde would succeed to the throne, in case the Osmān dynasty should die out, and that for this reason the Sulṭāns were bound to respect the life of all members of this family (de la Motraye, *op. cit.*, i. 261 sq.; von den Driesch, *Historische Nachricht*, etc., p. 137; Kantemir, *Ottoman History*, p. 107; Lüdeke, *Beschreibung des Türk. Reiches*, i. 202, ii. 63). They had their residence in the suburb of Eiyūb on the Golden Horn, and are still the *mutewellī* (administrators) of the *Ewḳāf* of their ancestor Meḥemmed Ṣokolli Pasha (Djewdet, *Ta'rīkh*, vi. 198).

Bibliography: besides the works quoted in the text see *Sidjill-i 'Osmānī*, i. 99; White, *Three Years in Constantinople*, ii. 307.

(J. H. Mordtmann.)

IBRĀHĪM LODĪ, The last king of India of the house of Lodī (s. SIKANDAR LODĪ), came to the throne in 1510, and reigned at Agra for about 16 years when he was overthrown and slain by Bābur at Pānīpat in April 1526. He was violent and tyrannical, and alienated his nobles who called in Bābur to help them. He fell, however, fighting bravely, along with thousands of his Afghāns. Like Harold, he had trouble with his own family, before being called upon to encounter a foreign foe. His father's brother, 'Alā' al-Dīn, attempted to dispossess him, first from Gudjarāt, and afterwards from Kābul where he got help from Bābur. But Ibrāhīm defeated his uncle who gained nothing by joining the Mughals.

Erskine and Pavet de Courteille; Elphinstone's *History*; *Tārīkh Dā'ūdī* by 'Abdallah of which there is an account, with extracts, in Elliot, *Hist.*, Vol. iv. 434. Ni'mat Allāh, *Hist. of the Afghans*, Dorn's translation, p. 70.

(H. Beveridge.)

IBRĀHĪM AL-MAWṢILĪ, IBRĀHĪM B. MĀHĀN B. BAHMAN, also known as al-Nadīm al-Mawṣilī, one of the most celebrated musicians of Arab history, a man of Persian origin, was born at Kūfa in 125 (742) and died at Baghdād in 188 (804). He studied music under Persian masters, and attained an extraordinary degree of skill both in singing and in the use of the lute. He stood in high favour at the ʿAbbāsid court, under al-Mahdī, al-Hādī, and (especially) al-Rashīd. His son Isḥāḳ, a very learned and accomplished man, followed in his footsteps, being a musician and composer of fully equal ability, and a prominent figure in Baghdād under al-Rashīd, al-Maʾmūn, and al-Muʿtaṣim. Marvellous tales were told of Ibrāhīm's proficiency, e. g. *Aghānī* V, 41, 1—15. Two anecdotes concerning him which became very widely popular are the story of the singing-girls whose house he entered in a basket (*Aghānī* v. 41 *sq.*; al-Ghuzūlī, *Maṭāliʿ al-budūr*, i. 245 *sq.*; Ibn Badrūn, ed. Dozy, p. 272 *sq.*; and the *1001 Nights* [in the two latter cases, told of Isḥāḳ]); and the story of his visit from the Devil, who taught him a wonderful melody (*Aghānī*, v. 36 *sq.*; al-Ghuzūlī, i. 241 *sq.*; and the *1001 Nights* [told of Isḥāḳ]).

Bibliography: Ibn Khallikān, nº. 9 (Trans. de Slane, i. 20 *sq.*); *Aghānī* (1. ed.), v. 2—49, 52—131; *Fihrist*, p. 140—142; Barbier de Meynard, *Ibrahim, fils de Mehdi*, in *Journal Asiatique* 1869, p. 201—342; von Kremer, *Culturgeschichte des Orients*, ii. 71 *sqq.*; Ahlwardt, *Abu Nowas*, p. 13 *sq.*; Brockelmann, *Gesch. d. arab. Litteratur*, i. 78. (C. C. TORREY.)

IBRĀHĪM MUTEFERRIḲA (i. e. court-steward), the first Turkish printer, was born about 1674 in Kolozsvár (Hungary) of Calvinistic parents and, at the age of 18, was taken prisoner by Turkish troops, making a raid into Hungary. He was brought to Constantinople and sold as a slave. He then turned Musalman and occupied himself with theological studies. In 1715, the Porte entrusted him with a political mission to Prince Eugen (von Hammer, *Geschichte des Osmanischen Reiches*, vii. 193 *sq.*); Ibrāhīm was next attached to the staff of Francis Rakoczy of Transylvania, the leader of the Hungarian malcontents, who lived as a refugee in Turkey from 1718—1735; at the same time, Ibrāhīm also fulfilled the duties of a dragoman of the Porte. Early in 1717 he was sent as ambassador to Poland (von Hammer, *op. cit.*, vii. 480—520) and took part in the war against Austria as secretary to the artillery corps (*top ʿarabadjīlarī*). In the following years we see him interested and entangled in the political intrigues of his time, and specially connected with the French ambassador and the adventurer Bonneval. (Vandal, *Une Ambassade française en Orient sous Louis XV*, p. 181; von Hammer, *op. cit.*, vii. 520 *sq.*, viii. 43; Pertsch, *Verzeichn. d. türk. Handschr. Berlin*, p. 256). At the end of Radjab 1156 (Sept. 1743) the Porte entrusted him with the investiture of Aḥmed Khān Usmai as Khān of the Raitaks in Dāghistān (Ṣubḥī, *Taʾrīkh*, f. 221 *vo.*). He died in 1157 (1744). But his chief fame does not lie in his political activity; far more important is the part he played as founder of Islamic typography. With the help of the enlightened Grand Vizier Dāmād Ibrāhīm Pasha, and encouraged by Saʿīd Muḥammad, who had accompanied his father, Yirmi Sekiz Čelebi Muḥammad, in 1721 on his embassy to the court of Louis XV, Ibrāhīm established the first printing office in Constantinople, after having received the authorisation for this by an imperial firman in the middle of Dhu ʾl-Ḳaʿda 1139 (beginning of July 1727). The maiden work of this printing office was the dictionary of Wānḳūlī published in two folio volumes on the 1st Redjeb 1141 (31st January 1729). In October 1734 the work in the office was dropped, but resumed after an interval of six years, and then stopped altogether in 1155 (1742), the office having in all printed 17 books, the incunabula of Islamic typography. (see exact list in v. Hammer, *op. cit.*, vii. 583 *sq.*).

Bibliography: J. de Karmaon in the *Revue Historique publiée par l'Institut d'Histoire Ottomane*, Nº. 3, 173—183, with the additions given by B. A. Mystakides, *ibid.*, Nº. 5 and 7; *Sidjill-i ʿOthmānī*, i. 127; the firman of the year 1139, in the preface of the first print of Wānḳūlī; the epitaph of Ibrāhīm, with the chronogram of the year of his death, has been published in the newspaper *Ṣabāḥ* Nº. 8505 of the 14th Djumādā II 1331. (J. H. MORDTMANN.)

IBRĀHĪM PASHA, the eldest son of Muḥammad ʿAlī, a great general and viceroy of Egypt. He is often described as Muḥammad ʿAlī's adopted son. Amina, a relative of his foster-father, the governor (*Čorbadji*) of Kavalla in Macedonia, was certainly a divorced woman when Muḥammad ʿAlī married her in 1787 and it cannot be denied that Muḥammad ʿAlī had a certain preference for his son Ṭūsūn, who died on the 28th September 1816. There was certainly also a rivalry between Ibrāhīm and Ṭūsūn (cf. Mengin, ii. 81 *sq.*). The year of his birth is decisive, however, and this is usually given as 1789, but occasionally also as 1786. In the older authorities like Djabartī and Mengin we find no hint that he was not Muḥammad ʿAlī's real son. Djabartī in 1228 (1813) describes him as a young man of not yet twenty, which certainly does not fit in. On this question cf. Gouin, p. 151 *sq.*; Clot Bey, i. p. lxxxiii; Murray, p. 41 *sq.*

Ibrāhīm played an important part in the history of Egypt in the time of Muḥammad ʿAlī (cf. the article KHEDIVE). He has been called the mailed arm of his father and as a matter of fact the successes of his father's policy would have been impossible without his military achievements.

When his position in Egypt had been somewhat secured, Muḥammad ʿAlī in 1805 sent for his two sons Ibrāhīm and Ṭūsūn, and in 1809 for his wife and the younger children, Ismāʿīl and two daughters. In 1806 Ibrāhīm was sent with the Kapudan Pasha to Constantinople as a hostage for the tribute promised by his father; after the departure of the English fleet from Alexandria in 1807 the Porte sent him back. In 1810 Ibrāhīm became *defterdār*. After the great massacre of the Mamlūks in 1811 he was sent by his father to Upper Egypt to collect the taxes. He drove the remnants of the Mamlūks out of the country, subdued the Beduins, and restored order and security in the country. In his efforts to collect money he must often have used very ruthless measures. Djabartī gives a terrible account of his procedure at the end of his survey of the events of 1228 (1813). He remained in charge of the administration of Upper Egypt till the beginning of 1816. In the meanwhile he had been given the

title of Pas̲h̲a by the Porte in recognition of the services of his father (Mengin, ii. 48).

In 1816 his father sent him to Arabia to make a final reckoning with the Wahhābīs, against whom his brother Ṭūsūn had been fighting successfully from 1811 to 1813 and, from 1813 to 1815, Muḥammad ʿAlī himself also. After three years of heavy fighting the goal was achieved, Derʿiya [q. v.], the capital of the Wahhābīs, was destroyed and ʿAbd Allāh b. al-Saʿūd with his relatives sent as prisoners to Egypt (cf. above p. 416a). In December 1819 Ibrāhīm made his triumphal entry into Cairo. Soon afterwards the Sulṭān appointed him governor of Djidda. In the meanwhile, Muḥammad ʿAlī had entrusted his third son Ismāʿīl with the conquest of the Sūdān. The discovery of the ancient goldfields and the capture of slaves, who were to form the basis of Muḥammad ʿAlī's new army, were the two objects of this expedition. Ibrāhīm Pas̲h̲a was sent thither with reinforcements to support his brother. He seems to have gone there with very adventurous plans (Vaulabelle, ii. 231), but a severe attack of dysentery forced him to return hurriedly to Cairo in the beginning of 1822.

In the years following Ibrāhīm Pas̲h̲a took part in training the new troops (*niẓām djedīd*), who were entrusted to the French Colonel Sèves. Ibrāhīm was an industrious pupil of the European instructor and the latter under the name of Sulaimān Pas̲h̲a became his main support in his later campaigns.

When Muḥammad ʿAlī was appointed to conquer the Morea by a firmān of the Sulṭān, dated 16th January 1824, he sent his son Ibrāhīm Pas̲h̲a there with an excellent army trained on the European model and ample supplies of war material at the end of July 1824. The capture of Navarino and his entry into Tripolitsa practically brought the Peninsula under his sway. February to April 1826 were devoted to the siege and capture of Missolonghi. After the intervention of the Great Powers had been declined by the Porte and Muḥammad ʿAlī, the naval battle of Navarino took place in October 1827, in which the greater part of the Egyptian-Turkish fleet was destroyed by the allied fleets of England, France, and Russia and finally Muḥammad ʿAlī was forced by the English Admiral Codrington, who appeared before Alexandria, to recall his son and the Egyptian troops. He arrived in Alexandria on the 10th October 1828.

In 1831 Ibrāhīm Pas̲h̲a was entrusted by the father with the conduct of the Syrian campaign. On Nov. 1 he arrived with his troops in Palestine. After a six months' siege he obtained the surrender of ʿAkkā on the 27th May 1832, after previously gaining victories over the Pas̲h̲as of Tripolis and Aleppo on the plain of Zerʿā south of Ḥomṣ. Ibrāhīm's march, that followed, through Syria and Asia Minor was made possible by his victories over the advance guard of the Turkish army under Muḥammad Pas̲h̲a of Aleppo at Ḥomṣ on the 8/9th July, over the main Turkish army under Ḥusain Pas̲h̲a in the pass of Bailān at Alexandretta (29th July), and over the Turkish army under Rashīd Pas̲h̲a at Ḳonia (21st December). These victories showed the superiority of the Egyptian army, Ibrāhīm's skill as a leader, and the cleverness of his policy of uniting the various groups in Syria under one banner by the cry of "liberation from the Turkish yoke" and in winning to his side the influential Amīr Bas̲h̲īr of the Lebanon. Ibrāhīm Pas̲h̲a advanced as far as Kutahiya. There on May 1833, not without pressure from the European powers, a treaty was signed between the Porte and Muḥammad ʿAlī by which Syria and ʿAdana were ceded to the latter. Ibrāhīm received from the Sulṭān the title of *muḥaṣṣil* of ʿAdana. His father appointed him to administer the new territory: a difficult task in view of the varied nature of the population of the country. Although the latter were agreed in their disinclination for Turkish rule, the strict *régime* introduced by Ibrāhīm did not suit them either. Risings everywhere were the result and Ibrāhīm was partially successful in suppressing them by the general confiscation of arms. The recruiting of the population for military service resulted in the emigration of great numbers to Asia Minor and Mesopotamia, and the commandeering of beasts of burden for military purposes resulted in the decline of agriculture and trade. Although there was quiet generally in the land, the discontent was very great.

When the war was begun again by Turkey in 1839, Ibrāhīm on the 24th June won a decisive victory over the Turkish army under Ḥāfiẓ Pas̲h̲a at Nizib west of Biredjik and the Turkish fleet under Fevzī Pas̲h̲a went over to Muḥammad ʿAlī. The intervention of the powers, whose negotiations led to the Treaty of London on the 15th July 1840 (the so-called Quadruple Alliance), altered the situation of things. Hoping for support from the French, Muḥammad ʿAlī declined the demand that he should evacuate Syria as far as ʿAkkā and confine himself to the hereditary pashalik of Egypt. No support was given him and the coasts of Syria and Egypt were blockaded by the allied fleets. Ibrāhīm was in a difficult position between their landing army and the hostile people of the Lebanon who were stirred up against him. After the capture of ʿAkkā by the English Admiral Napier and the latter's negotiations with Muḥammad ʿAlī in Alexandria, the latter was forced to agree to the evacuation of Syria on 22nd Nov. 1840. On the 29th Dec. Ibrāhīm left Damascus with his troops and returned to Egypt via G̲h̲azza, sending a portion of the army home via ʿAḳaba under Sulaimān Pas̲h̲a.

In the years that followed Ibrāhīm Pas̲h̲a was mainly concerned with the administration of Egypt. His interest in and knowledge of agriculture is praised. He was several times in Europe, sometimes visiting watering places to improve his health. He was well received in Europe. At the beginning of 1848 he was in Malta when his father's condition made it necessary for him to return. In June 1848 he became practically ruler of the country. In September he was formally granted the pashalik of the country by the Sulṭān in Constantinople and on the 19th Nov. 1848 he died in his sixtieth year. He was buried in the family mausoleum near the Imām al-S̲h̲āfiʿī. Of his sons he was survived by Aḥmad (born 1825), Ismāʿīl (afterwards Khedive born 1827), and Muṣṭafā (born 1832).

A portrait of Ibrāhīm Pas̲h̲a is given in Cadalvène and Barrault, *Histoire*, etc.; descriptions of his personality in Clot Bey, i. p. xxxiii *sqq.*; Paton, ii. 55.

IBRĀHĪM PASHA, the celebrated Grand Vizier and favourite of Solimān the Magnificent, was born towards the end of the xvth century of Christian parents in Parga in Epirus. Kidnapped in his early youth and brought as a slave to the Imperial Serai during Selim I.'s reign, he was afterwards attached to the retinue of the heir apparent Solimān as long as this latter resided as Governor General of Ṣarūkhān in Magnesia. His social and musical abilities soon won him the young Crown Prince's special favour, and on his accession to the throne in September 1520 Solimān made him his *khāṣṣ oda bashi* (master of the inner chamber) and *ir doghandjilar aghasi* (high court falconer). On the 13th Shaʿbān 929 (27th June 1523) the Sulṭān made him Grand Vizier, at the same time granting him the governorship of Roumelia. During the thirteen years that Ibrāhīm filled these high offices he enjoyed more than any other ever did before or after him the Sulṭān's entire confidence. The Sulṭān actually shared his monarchical powers with him and gave him the insignia of the sulṭanate. He granted him the *ṭabl khāne* (military music) and the tuġh of the Imperial bodyguard, as well as the title *seraskar sulṭān* (sulṭān commander-in-chief). Ibrāhīm's wedding (18th Radjab 930 = 23rd May 1524), which the Sulṭān himself attended, was celebrated with such pomp and splendour that it has become famous in the annals of Ottoman history. Shortly afterwards, owing to the troubles caused by the insurrection of Khāʾin Aḥmad Pasha, Ibrāhīm went to Egypt (October 1524—September 1525) to re-establish order and to re-organise the administration of the country. In 1526 he conducted Solimān's first campaign against the Magyars. (Battle of Mohacs 28th August, capitulation of Ofen-Pest 10th Sept. 1526). Three years later, he undertook a second expedition against Hungary together with the Sulṭān. Ibrāhīm captured Ofen which had been reoccupied by king Ferdinand, and led his army up to Vienna. (Siege of Vienna 27th Sept. till 15th October 1529). In 1532, Ibrāhīm invaded Hungary for the third time, but he did not advance further than Güns, and had to be content with pillaging the country. The armistice concluded with Ferdinand in the spring of the following year was chiefly due to Ibrāhīm's influence. The decision of the dispute between the king and John Zapolya regarding the Hungarian possessions was placed in the hands of the Sulṭān, who again entrusted the Venetian Luigi Gritti, Ibrāhīm's favourite, with the delimitation of the frontiers. In his Persian expedition 1533-1534 Ibrāhīm was not less successful. After occupying the most important frontier fortresses he entered Tabrīz on the 13th July 1534 and took Baghdād on the 31st December of the same year. He returned to Constantinople in January 1536 and there contracted in February the first French capitulation with the ambassador of Francis I. Ibrāhīm had now reached the zenith of his power and splendour when he was suddenly executed, without apparent reason, by the Sulṭān's orders in the Imperial Serai, where he was spending the evening (22nd Ramaḍān 942 = 15th March 1536). His body was disposed of with equal secrecy and buried in the vicinity of the Oḳmaidān near the Arsenal, where his alleged grave was in later days shown in the Darwīsh monastery Djawi. It was said that Ibrāhīm in his ambition coveted the throne for himself and that decisive proofs were in the hands of the Sulṭān; the fact is that the Sulṭān had done everything to nourish and encourage such thoughts in his confidant; and it seems that Ibrāhīm's attitude fully justified current rumours. A series of legends and sayings soon gathered around the figure of the *maḳbūl* and *maḳtūl* Ibrāhīm Pasha, some of which are still current among the common people. A number of mosques, *ʿimāret*'s [q. v.], bridges, and aqueducts in the capital and in the provinces, chiefly in Roumelia, likewise perpetuate his name and preserve his fame to the present day. His splendid Serai near the Atmeidān was later occupied by the Imperial pages, and his gardens along the Golden Horn remained for centuries famous among the sights of the town.

(J. H. MORDTMANN.)

IBRĀHĪM PASHA (DAMAD), the favourite of Murād III and three times Grand Vizier under his successor Muḥammad III. He was of Slavonic origin, born in the neighbourhood of Ragusa; brought up in the Serai he was appointed silāḥdār (armour-bearer of the Sulṭān) in 982 (1574-1575); from Dhu 'l-Ka'da 987—Djumādā II 989 (End of Dec. 1579—July 1581) he was Aghā of the Janissaries and then Beylerbey of Roumelia; he was sent to Egypt in 990, where he remained for a year and a half as Governor General. In the beginning of 1585 he conducted the campaign against the Druzes of the Lebanon, and thence he returned to Constantinople in September of the same year. His wedding with the Princess 'Ā'isha, daughter of Murād III, was celebrated there in Djumādā II 994 (end of May 1586). At the end of Radjab 995 (end of June 1587) he was made Ḳapudan Pasha, and held this office for about a year. Shortly after the accession of Muḥammad III he was appointed ḳā'immaḳām (deputy) of the Grand Vizier on the 17th Sha'bān 1003 (16th April 1595) and a year later on the 5th Sha'bān 1004 (4th April 1596) Grand Vizier. He accompanied the Sulṭān on his march against Eger (Erlau, Turk. Egri), was dismissed on the day after the battle of Keresztes, on the 27th October, but restored to office for a second time after six weeks, at the end of Rabī' II 1005 (middle of Dec. 1596). The whims of the Sulṭān prevented him completing a year in office; he was dismissed on the 23rd Rabī' I 1006 (3rd Nov. 1597), but recalled to his functions for a third time on the 9th Djumādā II 1007 (7th Jan. 1599) and entrusted with the continuation of the war against Hungary. In two expeditions 1008-1009 (1599-1600) he succeeded in stopping the advance of the Austrian army. In Rabī' II 1009 (end of October 1600) he captured the stronghold of Nagy Kanisa, and as a reward the Sulṭān granted him the grand vizierate for life. Ibrāhīm then returned to Belgrade, where he died on the 9th Muḥarram 1010 (10th July 1601).

Bibliography: The Chronicles of Selānikī, Pečewī, Ḥādjdjī Khalīfa (Fedhleke and Taḳwīm al-Tewārīkh), Na'īmā; biographies in the Ḥadīḳat al-Wuzarā, p. 45 sqq., in the Ta'rīkh of 'Alī, ii. 41 sqq., and Sidjill-i 'Othmānī, i. 97; also: v. MORDTMANN.)

IBRĀHĪM PASHA (ḲARA), Grand Vizier under Muḥammad IV, born in 1030 (1620-21) at Khundawerk near Bāiburd, began his career as a levend, then became ič aghā (page) of the outlawed Firārī Muṣṭafā Pasha (v. Hammer, Osm. Gesch., vi. 26), and afterwards served several Pashas including Ḳara Muṣṭafā as ketkhudā (steward or agent), till on the 2nd Rabī' II 1081 (8th August 1671) he received the office of küčük mīrākhōr and a few weeks later that of büyük mīrākhōr (under and chief marshall). From the 17th Ramaḍān 1088 till the 12th Rabī' I 1090 (13th Nov. 1677—23rd April 1679) he was ḳapudan pasha and at the same time administered for a period the grand vizierate as ḳā'immaḳām and again after Djumādā II 1094 (June 1683) during Ḳara Muṣṭafā's campaign against Vienna. After the execution of the latter on the 6th Muḥarram 1095 (25th Dec. 1683) he was appointed Grand Vizier, deposed on the 22nd Muḥarram 1097 (19th Dec. 1685), banished to Rhodes on the 18th March 1686, and was strangled there a few months later in Sha'bān 1097 (June-July 1686).

IBRĀHĪM PASHA. [See ČENDERELI.]

IBRĀHĪM PASHA (DAMAD), favourite of Aḥmad III, and his Grand Vizier for many years. He was the son of a certain 'Alī Aghā and was born about 1678 in Mūshkara near Urgüb, in the district of Nigde. At the age of 22 he came to the capital, where he obtained a position as ḥelwādjī (confectioner) in the Ancient Serai. His remarkable intelligence and his ability in writing must have attracted notice, for soon afterwards he was appointed clerk of the imperial harem, and it was in this office that he had an opportunity of becoming acquainted with Prince Aḥmad, afterwards Sulṭān. After Aḥmad's accession to the throne in 1115 (1703) Ibrāhīm occupied for six years the post of secretary of the chief eunuch and, although the Sulṭān was willing to grant him the rank of a vizier, Ibrāhīm contented himself with very modest offices as muḥāsebedji (accountant) and defterdār (treasurer) in the provinces. In 1128 (1715) he accompanied Damad 'Alī Pasha on his campaign against Hungary, and after the defeat at Peterwardein (15th August 1715) he was entrusted with the difficult task of informing the Sulṭān of the fatal course of the war. As a result of this mission he again came into personal contact with the Sulṭān who appointed him Master of the Horse and the following year, on the 16th Shawwāl 1128 (3rd October 1716) deputy Grand Vizier. After his marriage with the 13 year old Princess Fāṭima, daughter of the Sulṭān (6th Rabī' I 1129 = 18th February 1717), he was definitively appointed Grand Vizier (8th Djumādā II 1130 = 9th May 1718). The next 12 years during which Ibrāhīm held this post, form one of the most brilliant periods in the history of Turkey. Both Aḥmad III and his prime minister were men of high culture and refined taste and emulated one another in the patronage of art and learning. Numerous kiosks were built on the Bosphorus and in the Valley of the Sweet Waters (Kāghid-Khāne), which was transformed into a sort of Versailles. Religious and secular ceremonies were celebrated with extraordinary pomp and were increased in number. At the same time public institutions,

libraries, e. g. the Serai library and the library of Ibrāhīm Pasha, were founded. The art of printing was also introduced in this era by Ibrāhīm Mutefarrika [q. v.]. In his foreign policy, the Grand Vizier's object was to maintain friendly relations with the European Powers. After entering upon office he put an end to the conflicts with Austria by the treaty of Passarowitz (1718). A treaty with Peter the Great (1724) regulated the question of the boundary provinces of Persia; by virtue of this the Turkish forces occupied in the following years all the most important cities: Hamadhān, Gendje, Eriwān, Tebriz, etc., definitive possession of which was assured to Turkey by the treaty of Hamadhān (3rd Oct. 1727). In 1730 however Ṭahmāsḳuli Khān invaded the newly acquired province, which resulted in a declaration of war by the Porte, though the Sulṭān agreed to this much against his will. This was the cause of a serious insurrection (September 1730), as the people were discontented with Ibrāhīm Pasha's government, and resulted in the fall of both Sulṭān Aḥmad and his favourite vizier. Aḥmad would not deliver Ibrāhīm alive into the hands of the infuriated mob and had him strangled in the Serai on the 30th Sept. 1730; on the following day he himself was forced to abdicate.

A portrait of Ibrāhīm is found in the work of von den Driesch, p. 171. (J. H. MORDTMANN.)

AL-IBSHĪHĪ (AL-ABSHAIHĪ or perhaps AL-ABSHĪHĪ) BAHĀ' AL-DĪN ABU 'L-FATḤ MUḤAMMAD B. AḤMAD (SHIHĀB AL-DĪN ABU 'L-ABBĀS) B. MANṢŪR B. AḤMAD B. 'ĪSĀ AL-MAḤALLĪ AL-SHĀFI'Ī, an Arabic scholar of Egypt, born in 790 (1388) in the province of al-Gharbīya in the place ابشيه (Abshīyah: cf. Yāḳūt, *Mu'djam*, ed. Wüstenfeld, i. 92; de Sacy, *Relation de l'Égypte par Abd-Allatif*, p. 631, N°. 7; Ibn Duḳmāḳ, *al-Intiṣār*, Cairo 1310, v. 82 *infra*). Here, after learning the Ḳur'ān by heart by his tenth year, he also received instruction in Fiḳh and Grammar. In 814 = 1412 he made the pilgrimage to Mecca. He often came to Cairo and heard the lectures of Djalāl al-Dīn al-Bulḳīnī. He became *khaṭīb* of his native place in succession to his father. For the rest he devoted himself to literary activity, showing a particular preference for *adab*. According to al-Sakhāwī, his grammatical knowledge was not thorough nor his language free from errors. He is the author of the Adab work *al-Mustaṭraf fī kull Fann mustaẓraf* (pr. Būlāḳ 1272, Cairo 1275 [lith.], 1279, 1304, 1305, 1306, 1308), which G. Rat translated into French (*Al-Mostaṭraf, Recueil de morceaux choisis . . . . par le Sheïh Shihâb-ad-dîn Aḥmad al-Abshîhî* etc., Paris—Toulon, 1899—1902). According to al-Sakhāwī, he also composed a paraenetic work in two volumes, *Aṭwāḳ al-Azhār 'alā Ṣudūr al-Anhār*, and began a book on epistolography (*fī ṣanā'at al-tarassul wa 'l-kitāba*). He may be also the author of the *Tadhkirat al-'Ārifīn wa-Tabṣirat al-Mustabṣirīn*, Hs. Damascus, Ḥabīb al-Zaiyāt, *Khazā'in al-Kutub fī Dimashḳ* etc., p. 80, N°. 24.

Ibn Fahd and al-Biḳā'ī met al-Ibshīhī in 838 in al-Maḥalla and heard his lectures. He died after 850 (1446).

The same *nisba* was borne by Shihāb al-Dīn Aḥmad b. Muḥammad b. 'Alī b. Aḥmad b. Mūsā, a Shāfi'ī teacher in Cairo, d. [8]92 (al-Sakhāwī, *o. c.*, Hs. Warn. 369a, p. 318 *sq.*), Shihāb al-Dīn Aḥmad al-Miṣrī (*ibid.*, p. 661) and Bahā' al-Dīn Muḥammad b. Shihāb al-Dīn Aḥmad b. Muḥammad . . . al-Ma'zāwī al-Kalīlī al-Mālikī, known as Ibn al-Ḥidjāzī, born 21st Ramaḍān 834, d. 898 in Cairo (al-Sakhāwī, *o. c.*, Hs. Warn. 369a, p. 582).

(C. VAN ARENDONK.)

IBTIDĀ' (inf. viiith form of *bd'* "to begin"), "beginning", "inchoative". Technical term of Arabic grammar denoting the use of a word as subject (*mubtada'*) of a nominal sentence. "The *mubtada'* is any noun (or its equivalent) with which a beginning is made in order that a statement may be built upon it; the *mubtada'* and what is built upon it are both in the nominative case; and there can be no *ibtidā'* unless something built upon it follows" (Sībawaihi, i. 239 . . .). Thus e. g. in *Muḥammadun rasūlu 'llāhi*, a beginning is made with *Muḥammadun*, which is nominative by *ibtidā'*, and *rasūlu 'llāhi* is "built upon it" to complete the sense. The distinctive feature of the nominal sentence is that the relation of its subject and predicate is one of logical necessity, and is unexpressed by any finite verb. In general the subject precedes the predicate, and hence any sentence in which the subject comes first is regarded as nominal; cf. *Zaidun māta*, where *Zaidun* is *mubtada'*, while in the sentence *māta Zaidun Zaidun* is *fā'il* or agent (see esp. Wright, *o. c.*, ii. 251 A. B.). The precedence of the subject is however not universal, and cases are quoted in which inversion (*taḳdīm*) occurs, usually for emphasis or other special reason.

In Prosody, *ibtidā'* is a name for the first foot of the second hemistich of a line. [Cf. MUBTADA', MUSNAD.]

IČ-IL (T.) "interior" the name of a province in Asia Minor, which at present forms an independent sandjaḳ of the wilāyet of 'Adana [q. v.] with Selefke as its chief town; 47 villages belong directly to it and also the nāḥiya of Aṭāeli with 63 villages and Bolidjala with 6 villages. This sandjaḳ comprises four ḳaḍā, viz. Ermenek [q. v.], Mūt, Gulnar (Kilindria, Celendaris) and Anamūr (q. v., capital Čorakī. The population consists of

45,000 Turks, 15,500 Kurds, 14,000 Greeks, 12,000 gipsies, and 8780 of various origins. The hills are covered with woods (221,518 hectares). The products are wood for building purposes and cereals. The Kurd nomads in the hills prepare butter and cheese, which they sell in the villages. Industry is carpet weaving. The district is covered with Roman remains. It is the ancient Tracheotis (Cilicia Petraea). The principal rivers are the Lamas-ṣu (Lamus) and the Gök-ṣu [q. v.]. The source of the Ṭalli-ṣu near the sea is probably indentical with the Νοῦς of the Greeks.

The origin of the name Ič-ili may be traced to the Saldjūḳs for considered from their capital Konia this district really seems to be in the interior of the mountains. It has also been suggested that the name is a corruption of Cilicia.

IČ-OGHLAN (T.), "servant of the interior" (*i. e.* of the palace) was the name given in Turkey to the pages in the Sulṭān's service. They were Christian children who had either been taken in war or given as tribute in Europe; Asia was free from this levy. The most beautiful and best developed were chosen and those who seemed to be best endowed and to possess the best character. Their names, ages, and country of origin were noted and then they were converted to Islām and circumcised. They received a strict training for fourteen years under the supervision of eunuchs. They were divided into four chambers. The first comprised 400 pages, who received a daily pay of four to five aspers, learned to read and write and were instructed in religion and good behaviour. After six years they entered the second chamber, where the same education was continued and they also received a military training, which included riding and fencing. The third chamber contained 200 pages, who learned to sew, embroider, and make arrows, also to play musical instruments, and perform the duties of a chamberlain. The fourth chamber consisted of only forty picked pupils who received a daily pay of nine to ten aspers; they were dressed in satin, brocade, and cloth of gold and acted as chamberlains, as keepers of the wardrobes, major-domos, first barber, first manicurist, secretaries, and inspectors. The highest offices in the empire were open to the latter class and their occupants were chosen from them. From the end of the xviith century therefore the tribute of boys was abolished, as the Turks were ready to pay to get their own children into the corps, so that they might attain the highest offices in the state. The Galata Serai (cf. i. 875ᵃ), in which the Lycée Impérial now is, was formerly the training house of the *Ič-Oghlan*; there was another in the Imperial Palace at Adrianople but it was abolished by Sulṭān Ibrāhīm (1049—1058 = 1639—1648).

(CL. HUART.)

ʿĪD, festival. The word is derived by the Arab lexicographers from the root $\sqrt{}$ ʿWD and explained as "the (periodically) returning". But it is really one of those Aramaic loanwords, which are particularly numerous in the domain of religion; cf. for example the Syriac *ʿēdā* "festival, holiday".

The Muslim year has two canonical festivals, the *ʿīd al-aḍḥā* [q. v.] or "sacrificial festival" on the 10th Dhu 'l-Ḥidjdja and the *ʿīd al-fiṭr* "festival of breaking the fast" on the 1st Shawwāl. The special legal regulations for these are dealt with in the following articles. Common to both festivals is the *ṣalāt al-ʿīd(ain)* festival of public prayer of the whole community, which is considered sunna. In many ways it has preserved older forms of the *ṣalāt* than the daily or even the Friday *ṣalāt* (although in other points it has come to resemble the latter) and in its general style much resembles the *ṣalāt* for drought and eclipses. It consists only of two *rakʿa* [q. v.] and contains several *takbīr* [q. v.] more than the ordinary *ṣalāt*. After it a *khuṭba* [q. v.] in two parts is held. It has no *adhān* [q. v.] and no *iḳāma* [q. v.]; as in the oldest times the only summons to it is the words *al-ṣalāt djāmiʿatan*. It should be celebrated in the open air on the *muṣallā* [q. v.], which is still often done, though mosques are frequently now preferred. The time for its performance is between sunset and the moment when the sun has reached its zenith.

At both festivals, which last three or four days in practice, the Muslim puts on new or at least his best clothes; people visit, congratulate, and bestow presents on one another. The cemeteries are visited, and people stay in them for hours, sometimes the whole night in tents. These more popular practices are more usual at the *ʿīd al-fiṭr* than at the *ʿīd al-aḍḥā*; the festival of breaking the fast is much more joyfully celebrated because the hardships of Ramaḍān are over, so that at the present day the "minor festival" has in practice become of much greater importance than the "major festival".

ʿĪD AL-AḌḤĀ (also called *ʿīd al-ḳurbān* or *ʿīd al-naḥr*) "sacrificial feast" or *ʿīd al-kabīr*, "the major festival", in India *baḳar ʿīd* (*baḳra ʿīd*) in Turkey *büyük-bairam* or *ḳurbān-bairam* (cf. BAIRAM). It is celebrated on the 10th Dhu 'l-Ḥidjdja, the day on which the pilgrims sacrifice in the valley of Minā (cf. ḤADJDJ), the *aiyām al-tashrīḳ*. The old Arab custom of sacrificing on this day in Minā was adopted by Islām not only for pilgrims but also for all Muslims as sunna. (It is

only a necessary duty [*wādjib*] by reason of a vow [*nadhr*]).

This *sunna* (*sunna muʾakkada ʿala ʾl-kifāya*) is obligatory on every free Muslim who can afford to buy a sacrificial victim. Sheep (one for each person) or camels or cattle (one for one to ten persons) are sacrificed. The animals must be of a fixed age and be free from certain physical defects (one eyed, lameness etc.). The period of the sacrifice begins with the *ṣalāt al-ʿīd* and ends with sunset on the 3rd of the three *aiyām al-tashrīḳ*. The following practices are recommended to the sacrificers: 1. the *tasmiya* i. e. the saying of the *Basmala* [q. v.]; 2. the *ṣalāt ʿala ʾl-nabī*, the blessing on the Prophet; 3. the turning towards the *ḳibla*; 4 the threefold *takbīr* before and after the *tasmiya*; 5. a request for the kindly acceptance of the sacrifice. If the latter is offered on account of a vow, the sacrificer must eat none of it but must give it all for pious purposes. If the sacrifice, as is usually the case, is made voluntarily, the sacrificer enjoys a portion (a third) of the animal and gives the rest away.

On the public prayer and the usages at the festival on this holiday see ʿĪD.

Bibliography: In addition to the works mentioned at the art. ʿĪD the Fiḳh books in the chapter on *Uḍḥiya*. (E. MITTWOCH.)

ʿĪD AL-FIṬR, "festival of the breaking the fast" or *al-ʿīd al-ṣaghīr* "the minor festival", Turkish *küčük-bairam* or *sheker-bairam* (cf. BAIRAM), is the festival celebrated on the 1st Shawwāl and the following days. If the Muslim has not paid the *zakāt al-fiṭr* [cf. ZAKĀT] before the end of the period of fasting, he is legally bound to do this on the 1st Shawwāl at latest and is recommended to do it before the public prayer *Ṣalāt* which is celebrated on this day [cf. ʿĪD].

As this festival marks the end of the difficulties of the period of fasting, although called the "minor", it is celebrated with much more festivity and rejoicing than the "major festival"; cf. ʿĪD.

AL-ʿIḌĀDA (A.) is the line of vision (diopter) marked on the reverse of the astrolabe, turning round the axis or pivot, with the aid of which various observations can be made, particularly the taking of the altitude of a star (see above i. p. 501a). (H. SUTER.)

IḌĀFA (A.) (infin. iv.th form of ḍyf "to draw near"); the adjoining of one thing to another; annexation. Technical term of Arabic grammar commonly named the "genitive relation", or the "construct state"; the relation of two words of which the former is determined or particularised by the latter. The former (*al-muḍāf*, "the annexed") is said to be in the construct state, and the latter (*al-muḍāf ilaihi*, "that to which the annexation is made") is in the genitive case. Their relation expresses the genitive of possession, quality, material, cause or effect, part or whole, or object or agent, and its distinctive features are: 1) that its two members together form one idea, and cannot be separated in writing; hence any adjective or its equivalent qualifying the *muḍāf* must follow the *muḍāf ilaihi*, as *bintu ʾl-maliki al-ḥasanatu*, "the beautiful daughter of the king"; 2) that both the *muḍāf* and the *muḍāf ilaihi* are definite in sense, or both are indefinite; in either case the former is regarded as sufficiently defined by the latter, and is regularly written without the article and without *tanwīn* (cf. with above example *bintu malikin*, "a king's daughter"). An exception to this is seen when the *muḍāf* is an adjective which qualifies a definite noun, and which must therefore have the article: this is *iḍāfa ghairu ḥaḳīḳiya* or "improper annexation". In the strict Arabic interpretation the fact that the *muḍāf ilaihi* is in the genitive is due to the government of a preposition expressed or implied e. g. *baitu Zaidin* ("Zaid's house") = *al-baitu ʾlladhī li-Zaidin* ("the house which belongs to Zaid").

Bibliography: Sībawaihi, *Kitāb* (ed. Derenbourg), II, 64., sqq.: al-Zamakhsharī, *Mufaṣṣal* (ed. Broch 2), p. 36—44; Ibn Yaʿīsh (ed. Jahn), p. 303—356; Muḥammad Aʿlā, *Dictionary of Technical Terms* (ed. Sprenger), p. 888—893; Lane, *Arabic-English Lexicon*, p. 1814; Wright, *Arabic Grammar*3, II, 198 A, 234 B. (ROBERT STEVENSON.)

ʿIDDA (A.) is the prescribed period of waiting, during which widows and divorced women cannot contract a new marriage after the dissolution of the previous one. The *ʿidda* prescribed for widows is legally 4 months and 10 days (cf. Kurʾān ii. 234). Among the ancient Arabs a longer period of mourning was prescribed. Then it was the custom for a widow after the death of her husband to withdraw to a small tent, where she spent a whole year during which she was not allowed to cleanse herself. See J. Wellhausen, *Die Ehe bei den Arabern* (*Nachrichten von der Kgl. Gesellsch. der Wissensch. zu Göttingen* 1893, p. 454 sqq.). *ʿIdda* after divorce was unknown to the ancient Arabs. Whoever married a divorced woman who was pregnant, was considered the father of the child born after the marriage even though the previous husband was really the father. In Islām, however, the actual father was considered the father of the child and no woman was allowed to remarry within a definite period (*ʿidda*) after the dissolution of the first marriage. If she bore a child during this period only the previous husband could be considered its father. This *ʿidda* after divorce lasts, according to Muslim law, for three menstrual periods (*ḳurūʾ*) or for non-menstruating women three months; if a divorced woman is pregnant she must not contract a new marriage in any circumstance for 40 days after the birth of the child (cf. Kurʾān ii. 228; lxv., 4). An *ʿidda* is also prescribed for slave women, but in place of an *ʿidda* of four months and 10 days, it only lasts two months and 5 days, and in place of an *ʿidda* of three *ḳurūʾ*, one of two *ḳurūʾ* and in place of an *ʿidda* of three months, one of one and a half months. (TH. W. JUYNBOLL.)

IDDIGHĀM (according to the Baṣra school of grammarians) or IDGHĀM (according to the Kūfa school), technical term used in Arabic grammar to denote the close association in pronunciation of two consecutive homogeneous consonants. This may take place without complete assimilation, but in most cases the one consonant "enters into" and is assimilated to the other, which is then written and spoken as if doubled. The following is a summary of the rules as given by al-Zamakhsharī.

1. In general *iddighām* may occur when both

letters are vocalised (as *radda* from *radada*), or when the first is silent and the second vocalised (as *aḳultaka* for *aḳul laka*), but not when the first is vocalised and the second silent (as *fararta*, *ḍalilta*, etc.). This applies equally to pairs of identical letters, as exemplified above, and to letters which are phonetically related. Thus in the guttural group change may take place from *h* to *ḥ* (as *idhabbihādhihi* for *idhhab bihādhihi*); from *h* to *ḥ* (as *lammā ra'ahhāla* for *lammā ra'āhu ḥāla*), from *'ain* to *ḥ* (as *irfaḥḥālim*^{an} for *irfa' ḥālim*^{an}); from *gh* to *kh*, etc., and parallel changes are seen among the dentals, sibilants, and labials (as *niddjib*^{an} from *nid djib*^{an}, *'amtar* from *'anbar*, etc.). There also occur cases of interchange between dentals and sibilants (as *aṣḥābushshire*^{an} for *aṣḥābut shire*^{an}). The usual tendency is for the weaker letter to coalesce in the stronger, though exceptions are to be found (as *kalakkulla* for *kalaka kulla*). The letter *Alif* is not subject to *Iddighām*, and *Hamza* only in the nominal form *fa''āl*— (e. g. *sa''āl*^{un}, *ra''ās*^{un}). Generally *r*, *sh*, *ḍ*, *f*, and *m* are not assimilated to any letter but themselves.

2. The verbal forms V. and VI. are frequently influenced. With verbs initial dental the prosthetic often assimilates, as *iṭṭayyara* (with additional prosthetic *alif*) for *taṭayyara*. In the form VIII the inserted *t* becomes *ṭ* after *ṣ*, *ḍ*, *ṭ*, or *ẓ* (e. g. *iṭṭalaba* for *itṭalaba*; *iḍḍaraba* and *iṣṭaraba* for *iḍtaraba*), and *d* before *d*, *dh*, or *z* (*izdāna* for *iztāna*). Mention may also be made of verbs initial or medial dental such as *iththa'ara* and *itta'ara* for *ithta'ara*, and more rarely, *ḍṭamala* (with loss of *alif*) for *iḍṭamala*.

3. The *l* of the definite article is always assimilated to the first letter of nominal forms beginning with any of the so-called "solar letters" *t*, *th*, *d*, *dh*, *r*, *z*, *s*, *sh*, *ṣ*, *ḍ*, *ṭ*, *ẓ*, *l*, and *n* (as *arrasūlu* for *al-rasūlu* etc.).

(ROBERT STEVENSON.)

IDHADJ. [See MĀL AMĪR.]

IDHN (A.) i. e. permission. Special regulations on *idhn* are given in the Muslim law books in the chapter on the law of slaves. According to law, slaves as a rule are not considered capable of making valid transactions. If however a master wishes to use the services of his slave in the management of a business, he can empower him to perform the necessary legal transactions. A slave who possesses such authority is called *ma'dhūn lahu* in the law books i. e. one who has been given an *idhn*. Contracts made by the slave so empowered are valid and binding as long as he does not overstep the limits of the powers granted him and he guarantees his pledges to the creditors with the goods his master has entrusted to him to carry on the business with.

(TH. W. JUYNBOLL.)

IDJĀB (A.) i. e. offer (in contracts), really the solemn declaration that the offer is irrevocable (cf. the Arabic expression *ḳad wadjaba al-bai'* i. e. the contract of sale is binding and irrevocable). In all legal transactions the observation of the prescribed legal form is most necessary and the mutual declarations, known in the *fiḳh* books as *īdjāb* and *ḳabūl* (i. e. offer and acceptance) are as a rule indispensable. Nevertheless in detailed books on law the question is discussed how far contracts are legal without such an *īdjāb* or *ḳabūl*. For example, in cases where it is the local custom for parties to exchange goods at their value without further formalities, can a valid transfer of the property take place without *īdjāb* and *ḳabūl*? Many scholars reply in the affirmative, but others hold such an "exchange" without the legally prescribed declarations to be only valid in cases of things of very little value.

(TH. W. JUYNBOLL.)

IDJĀZA (A.) Permission, a technical term in the science of Tradition, the permission granted to any one by a competent "carrier" of a text or even a whole book — whether it is the latter's own or an older text which he is able to trace back by a reliable chain of transmitters to the original transmitter or to the author — to transmit further the work, and to quote the transmittor as an authority. The *idjāza* does not require immediate contact between the person receiving the permission and him who grants it. And there is a difference of opinion as to what formula has to accompany a text which has been acquired by means of *idjāza*. Even the 'Abbāsid Caliphs al-Nāṣir and al-Musta'ṣim gave a number of *idjāzat* for *ḥadīth*'s which they had themselves received; the former gave authority to individuals to exercise this function in his name (Suyūṭī, *Ta'rīkh al-Khulafā'*, Cairo 1305, p. 181, 186). In time the acquisition of the *idjāza* from important persons became a favourite hobby. Fathers collected *idjāzat* for their sons from all possible shaikhs (Abu 'l-Maḥāsin, ii. 2, ed. Popper, p. 194). The celebrated Nadjm al-Dīn al-Ghazzī (died 1061 = 1651) while going round the Ka'ba (*ṭawāf*) at Mecca on his pilgrimage, was besieged for *idjāzat* (Muḥibbī, *Khulāṣat al-Athar*, iv. 199). Princes sought *idjāza* from scholars (e. g. in Ufrānī, *Nuzhat al-Ḥādī*, ed. Houdas, p. 131); the Ottoman sultān 'Abd al-Ḥamīd I and his grand vizier Raghib Pasha sought and obtained the *idjāza* for Tradition from the author of the *Tādj al-'Arūs* (cf. ii. 970 of this work). People take advantage of the presence of travelling scholars to obtain from them the *idjāza* for their works: this is recognised as an honour to the scholars themselves ('Abd Allāh al-Makkī (1250 = 1834) *Riḥlat Sālār*, p. 70, 76, 90). On the other hand, as early as the 7th century A. H. the *idjāza* system had developed to such unrestrained limits that a man before dying would declare that he gave all Muslims living at that time the *idjāza* for the traditions he knew (Dhahabī, *Tadhkirat al-Ḥuffāẓ*, iii. 363; Ibn al-Abbār, *Takmila*, p. 614). Cf. such general grantings of *idjāza* in the viii^{th} century in Suyūṭī, *Bughyat al-Wu'āt*, p. 14). Out of modest beginnings (a specimen in Kern, *Zeitschrift d. Deutsch. Morgenl. Gesellsch.*, lv. 74) there soon developed a high sounding rhetorical *idjāza* style with extravagant epithets (*idjāza ṭannāna*, Suyūṭī, *op. cit.*,

p. 246, 2 from below). Even in the 19th century the poetic form was used (cf. examples in the works given below). The traveller Ibn Djubair gave a politicus the *idjāza* in both prose and verse (*nathr^an wa-naẓm^an*, ed. Wright—de Goeje, p. 201. 15). See *idjāza* poems also in Ṣafī al-Dīn al-Ḥillī (*Dīwān*, p. 481—483, for his own poems); *Tādj al-ʿArūs*, s. v. *Djz*, v. 369; *Ḥadīḳat al-Afrāḥ*, p. 76.

In the modern language *idjāzat-nāmah* is used to denote "diplomas of authorisation".

(I. GOLDZIHER.)

AL-**ĪDJĪ**, ʿAḌUD AL-DĪN ʿABD AL-RAḤMĀN B. AḤMAD, theologian and philosopher, author of various handbooks which were often annotated by later authors. His principal work is *al-Mawāḳif fī ʿIlm al-Kalām*, a philosophical and theological treatise which has become known in Europe also; Th. Soerensen has published the last two chapters of it and the appendix with al-Djurdjānī's commentary under the title *Statio V^ta et VI^ta et Appendix libri Mevakif auctore ʿAdhad-ed-Dîn el-Îgî cum Comm. Gorgânii*, Leipzig 1848; complete edition Constantinople 1839. He also wrote a brief catechism known as *al-ʿAḳāʾid al-ʿAḍudiyya*, which has several times been annotated and has been printed at Constantinople 1827, St. Petersburg 1313. Other works are given by Brockelmann, *Gesch.* etc., ii. 208 *sqq.* Very little is known of al-Īdjī's life. We only know that he was a native of Īdj, a fortress in Fārs, held the office of ḳāḍī and mudarris at Shīrāz (see Ḥāfiẓ, *Dīwān*, ed. Rosenzweig, iii. 243) and died in the year 756 = 1355.

Bibliography: given in the article.

ʿ**IDJL**, a North Arabian tribe, an important branch of the Bakr b. Wāʾil (q. v.). Their ancestor ʿIdjl b. Ludjaim was notorious for his stupidity and the expression "more stupid than ʿIdjl" was proverbial (cf. Goldziher, *Muh. Stud.*, i. 48, n. 3). During the heathen period they formed a portion of the so-called Lahāzimgroup, which included the Dhuhl and Yaghkur. Some of them professed Christianity. Abū Nadjm, the radjaz poet, belonged to the ʿIdjl.

They lived in al-Yamāma (al-Khiḍrima, al-Khaḍārim, also called Djaww al-Khiḍrima) and in the country between Kūfa and Baṣra. The following villages belonged to them: Dhawāt, Dhu 'l-Arāka (in Yamāma), waters: al-Buḳaiʿ, al-Ruwaiḍa, Sīḳ (between Kūfa and Baṣra), Shuhrum (in the Bādiya of Kūfa), Ẓabya (in Yamāma, jointly with the B. Suḥaim), Zumm and ʿAin al-Kaiyāra (two days journey from Wāsiṭ). A section of the ʿIdjl is said to have allied themselves closely in Baḥrain with Persian immigrants from Iṣṭakhr and to have been later incorporated in them.

Historical. In the battles between the Bakr b. Wāʾil and the Tamīm at Nibādj and Ṭaiṣal the ʿIdjl with other tribes of the Lahāzim group were on the side of the Bakr. In another battle they fought with the Lahāzim, all under the leadership of an ʿIdjlī, against the Tamīm (cf. ḤANẒALA B. MALIK, p. 262^a). At al-Kharba the ʿIdjl were attacked by their relatives, the Dhuhl, because they had given shelter to Ḥārith b. Ẓālim, who slew Khālid b. Djaʿfar; Ḥārith b. Ẓālim who did not wish to be the cause of hostilities left the ʿIdjl and went to the Taghlib. Together with the Dhuhl (under Ḥārith b. Waʿla) they fought under the leadership of Muḥallim b. Ḥanẓala against Kais b. Masʿūd, chief of the Shaibān, by whom they had been insulted on a visit. Of other battles of the ʿIdjl we may mention that of Musallaḥa (Musallaha) against the Kais b. ʿĀṣim and Tamīm, who together made a raid on the ʿIdjl, that of Irāb and one with the Mishḳar. At the battle of Dhū Ḳār, the ʿIdjl under Ḥanẓala b. Thaʿlaba took a prominent part (see BAKR B. WĀʾIL, i. 605^b); they formed the advanced guard of the Bakr and bravely resisted the Persian attacks. Ḥanẓala slew the Persian leader Djalābazīn, and another of their group the leader of a Persian body of cavalry named Hāmarz. In the battle of Ullais (12 = 634) between Khālid b. al-Walīd and the Persians, along with other Christian Arabs on the side of the latter there were also ʿIdjl under Abū 'l-Aswad al-ʿIdjlī. When in 22 = 644 Kalʿat Namair near Nahāwand was taken by the Muslims, in addition to Ḥanīfa, there were many ʿIdjl among the latter. In Mesopotamia we still find ʿIdjl in the third century 250, e. g. during the rising of the ʿAlid Yaḥyā b. ʿOmar at Kūfa, in whose following were ʿIdjlī cavalry under the leadership of al-Haidam b. al-ʿAlī.

AL-ʿ**IDJLĪ**, ABŪ MANṢŪR, called AL-KISF (the piece) and AL-KHANNĀḲ (the strangler) lived at the beginning of the ii^nd = viii^th century and was executed by Yūsuf b. ʿOmar, governor of al-ʿIrāḳ in 120—126 = 738—744. His nickname al-Kisf owes its origin to the fact that he applied to himself the words of Ḳurʾān, lii. 44 "If they (the unbelievers) saw a piece fall down from heaven, they would say it was a thick cloud", because he alleged he had been in heaven, God had touched him with his hand and let him down to earth with a divine mission. According to some statements he is said at first to have recognised the ʿAlid Abū Djaʿfar al-Bāḳir Muḥammad b. ʿAlī as imām. His mission was to proclaim the abrogation of Muḥammadan law and to interpret Muḥammadan beliefs allegorically; to spread this doctrine it was thought permissible to slay their opponents and take their wives and property. This explains the nickname al-Khannāḳ, for he and his followers, who

were called Manṣūriya after him, used to strangle their victims. Friedländer has aptly compared them to the Indian Thugs. On these and similar aberrations in Islām see Djāḥiẓ, *Kitāb al-Ḥayawān*, ed. Cairo, ii. 96 *sqq.*, and the discussion of this passage in Van Vloten, *Worgers in Iraq* in the *Feestbundel Veth*, p. 57 *sqq.*

IDJMĀ' (literally "agreeing upon") is one of the four *uṣūl* from which the Muslim faith is derived and is defined as the agreement of the *mudjtahid*'s of the people (i. e. those who have a right, in virtue of knowledge, to form a judgment of their own; see *idjtihād*), after the death of Muḥammad, in any age, on any matter of the faith. As this agreement is not fixed by council or synod but is reached instinctively and automatically, its existence on any point is perceived only on looking back and seeing that such an agreement has actually been attained; it is then consciously accepted and called an *idjmā'*. Thus the agreement gradually fixed points which had been in dispute, and each point, when thus fixed, became an essential part of the faith, and disbelief in it an act of unbelief (*kufr*); cf., however, Goldziher, *Über idjmā'* in *Nachr. K. Ges. d. Wiss. Göttingen*, Phil.-hist. Kl., 1916, p. 81 *sqq.* Each agreement, that is, became a *ḥudjdja* for its own and all succeeding periods. It could be expressed in speech (*idjmā' al-ḳawl*) or in action (*idjmā' al-fi'l*) or by silence regarded as assent (*idjmā' al-sukūt wa 'l-taḳrīr*); cf. the similar classification as to the *sunna* of the Prophet. It is especially excluded that it means the agreement of the masses (*al-'awāmm*), and in al-Shāfi'ī's earlier view, before he went to Egypt, a statement by a single Companion was binding on the following generations. But later he gave up this opinion and it has now been generally abandoned.

A general principle of agreement was held in different forms from an early period. The legal system of Mālik b. Anas was built largely on the agreement of al-Madīna, the city of the Prophet; this agreement was local. The agreement of the two camp-cities (*amṣār*) of Kūfa and al-Baṣra, with their masses of veterans of the early wars, had great weight. For later generations the agreement of the Companions was naturally decisive. But it was al-Shāfi'ī who developed this general principle into a definite *aṣl*, and ranged it with the other three. Further, from deciding points left uncertain by the other *uṣūl* it has come to be regarded as stamping with assurance points decided by another *aṣl*. This is in virtue of a divine protection against error (*'iṣma*) which inheres in the Muslim people. In Shāfi'ite books of *fiḳh* the statement is normal: — "such and such a passage (Ḳur'ān or Sunna), before the Agreement (*ḳabl al-idjmā'*), is the basis for such and such a rule." At present the Wahhābites (following the vanished Ẓāhirites) reject the universality of this principle and limit agreement to that of the Companions. And such specific sects as the Shī'a and the Ibāḍites are, of course, quite outside of the *idjmā'* of the Sunnites.

The statement of the principle, which is given formally by the canonists, is as above. But the real working has been even wider. The local tradition from Muḥammad runs: "My people will never agree in an error", — and there are also Ḳur'ānic texts, iv. 115, denouncing those who follow other than the way of the believers (*ghaira sabīli 'l-mu'minīn*), and ii. 137: "We have made you a normal people" (*ummatan wasaṭan*, cf. Baiḍāwī). In consequence there is in the thought and working of the people as a whole a power to create doctrine and law, and not simply to stamp with approval that which has otherwise been reached. By means of *idjmā'* what was at first an innovation (*bid'a*, the opposite of *sunna*), and as such heretical, has been accepted and has overridden the earlier *sunna*. Thus the cult of saints has become practically part of the *sunna* of Islām and, strangest of all, in the doctrine of the infallibility and sinlessness (*'iṣma*) of Muḥammad, the *idjmā'* has overcome clear statements of the Ḳur'ān. In this, *idjmā'* has not simply fixed unsettled points, but has changed settled doctrines, of the greatest importance. It is thus regarded by many, at present, both within and without Islām, as a powerful instrument of reform; the Muslim people, they assert, can make Islām whatever they, as a whole, please. Yet as to this there is grave divergence of opinion. Goldziher, *Vorlesungen*, p. 56, viewing the matter historically, sees great possibilities in the future; Snouck Hurgronje (*Politique musulmane de la Hollande*, p. 42, 60), looking at *fiḳh* as a crystallised system, sees in *idjmā'* no hope.

Gesetzes*, p. 46—49. (D. B. MACDONALD.)

IDJTIHĀD means the exerting of one's self to the utmost degree to attain an object and is used technically for so exerting one's self to form an opinion (*ẓann*) in a case (*ḳaḍiyya*) or as to a rule (*ḥukm*) of law (*Dict. of techn. terms*, p. 198; *Lisān*, iv. 109, ll. 19 *sqq.*). This is done by applying analogy (*ḳiyās*) to the Ḳur'ān and the sunna. Thus in the earliest usage *idjtihād* was formally equated with *ḳiyās*, as by al-Shāfi'ī in his *Risāla* (ed. Cairo, 1312, p. 127, 7 *sqq.*, *Bāb al-Idjmā'*). In his section on *idjtihād* he quotes first as a proof, Ḳur. ii. 145, and demonstrates that it involves that each must follow his own judgment as to the direction of the *ḳibla*. It was therefore for Shāfi'ī practically the same as *ra'y*, "opinion" and the *mudjtahid* was one who by his own exertions formed his own opinion, being thus exactly opposed to the *muḳallid*, "imitator", who, as Subkī in his *Djam' al-Djawāmi'* says, "takes the saying of another without knowledge of its basis (*dalīl*)". For thus applying himself he would, according to a tradition from the Prophet, receive a reward even though his decision were wrong, while, if it was right, he received a double reward (Goldziher in *Zeitschr. d. deutsch. Morgenl. Ges.*, liii. 649). The duty and right of *idjtihād* thus did not involve inerrancy. Its result was always *ẓann*, fallible opinion. Only the con-

tinued *idjtihād* of the whole Muslim people led to *idjmā'*, Agreement, and was inerrant. On the controversy as to the possibility of error in *mudjtahids* see Taftāzānī on the *'Aḳā'id* of Nasafī, ed. Cairo, 1321, p. 145 *sqq.* But this broad *idjtihād* soon passed into the special *idjtihād* of those who had a peculiar right to form judgments and whose judgments should be followed by others. At this point, and from the nature of the case, a difference entered between theology (*kalām*) and law (*fiḳh*). Even to the present day many theologians assert that *taḳlīd* does not furnish a saving faith; see, for example, the *Kifāyat al-'awāmm* of Fuḍālī, *passim*, and the translation in D. B. Macdonald's *Development of Muslim Theology*, pp. 315—351. But all canon lawyers for centuries have admittedly been *muḳallids* of one degree or another. When later Islām looked back to the founding of the four legal schools (*madhāhib*), it assigned to the founders and to some of their contemporaries an *idjtihād* of the first rank. These had possessed a right to work out all questions from the very foundation, using Ḳur'ān, *sunna*, *ḳiyās*, *istiḥsān*, *istiṣlāḥ*, *istiṣḥāb* etc., and were *mudjtahid*'s absolutely (*muṭlaḳ*). Later came those who played the same part within the school (*fi 'l-madhhab*), determining the *furū'* as the masters had settled the broad principles (*uṣūl*) of *fiḳh* and had laid down fundamental texts (*nuṣūṣ*). If the view so stated was found implicitly in a *naṣṣ* of the founder of the *madhhab*, it was called a *wadjh*. Still later and inferior were those who had a right only by their knowledge of previous decisions to answer specific questions submitted to them; these were called *mudjtahidūn bi'l-fatwā*, "by legal opinion." All *mudjtahid*'s had been in a sense *muftī*'s, givers of *fatwā*'s; but these were *muftī*'s only. Such was the formal and generally accepted position. But from time to time individuals appeared who, moved either by ambition or by objection to fixed positions, returned to the earliest meaning of *idjtihād* and claimed for themselves the right to form their own opinion from first principles. One of these was Ibn Taimiya (d. 728), a Ḥanbalite (Goldziher, *Die Ẓāhiriten*, p. 188 *sqq.*). Another was Suyūṭī (d. 911), in whom the claim to *idjtihād* unites with one to be the *mudjaddid*, or renewer of religion, in his century. At every time there must exist at least one *mudjtahid*, was his contention (Goldziher, *Characteristik ... as-Sujūṭī*'s, p. 19 *sqq.*), just as in every century there must come a *mudjaddid*. Another, but a very heretical one, was the Emperor Akbar (Goldziher, *Vorlesungen*, p. 311). In Shī'ite Islām there are still absolute *mudjtahid*'s. This is because they are regarded as the spokesmen of the Hidden Imām. Their position is thus quite different from that of the *'ulamā'* among Sunnites. They freely criticise and even control the actions of the Shāh, who is merely a *locum tenens* and preserver of order during the absence of the Hidden Imām, the ruler *de iure divino*. But the Sunnite *'ulamā'* are regarded universally as the subservient creatures of the government (Goldziher, *Vorlesungen*, p. 225—228, 233, 285).

IDJTIMĀ' [See IDJTIHĀD.]

IḌMĀR, infinitive of the IVth form of the root *ḍmr*, to conceal; technical term of Arabic grammar denoting the use of a *ḍamīr* (see the art. ḌAMĪR). *Iḍmār* (ellipsis or suppression) of a verb or phrase is not uncommon: cf. the frequent omission of the verb of "Saying" before quotations of speech (*e. g.* Ḳur'ān ii, 119, 121, 127 etc.), and such expressions as *saḳyan wa-ra'yan*, meaning in full *saḳāka 'llāhu saḳyan wa-ra'āka 'llāhu ra'yan*, "God give you abundant water and pasture!"

In Prosody *iḍmār* means the quiescence of the second syllable of a foot; it applies to the *Kāmil* metre, in which the foot *mutafā'ilun* may be shortened to *mutfā'ilun*.

Flügel), p. 29; Wright, *Arabic Grammar*, i. 33 *sq.*, 100 *sq.* et *passim*; Freytag, *Darst. der arab. Verskunst*, pp. 81, 355-6. (ROBERT STEVENSON.)

IDRĪS, the name of a man, who is twice mentioned in the Ḳur'ān. Sūra xix. 57 *sq.*: "Mention Idrīs in the book. Verily he was an upright man, a prophet and we raised him to a high place". And Sūra xxi. 85, mentions him along with Ismā'īl and Dhu 'l-Kifl as one of the patient (*ṣābirīn*) ones. These passages are not calculated to give any explanation of this character. Even the name was for long a puzzle to orientalists till Nöldeke pointed out that it probably concealed the name Andreas (*Zeitschr. für Assyr.*, xvii. 84 *sq.*). That this Andreas who was raised to a high place, is Alexander's cook who obtained immortality has been suggested probably rightly by R. Hartmann (ibid. xxiv. 314). The post-Ḳur'ānic Muslim writers unanimously insist that Idrīs is the Biblical Enoch who also obtained immortality or, as Jewish literature says, was taken alive into Paradise.

The information given by these Arab writers regarding Idrīs is mainly derived from Apocryphal and later Jewish sources. The Biblical Enoch has three striking features which are repeated in the Muslim legends from Jewish models (Genesis v. 23 *sq.*): 1. he is a pious man; 2. he lives 365 years on earth which suggests a solar hero; 3. God takes him to himself. The name Enoch, the consonants of which suggest the meaning "initiated" has probably also affected the formation of this legend.

As to the last point, Idrīs appears also in Muslim literature as 'initiated' in sciences and arts. He was the first to use pens (*ḳalam*), to sew garments and wear them; previously people had been content with skins. He is therefore the patron saint of tailors, one of the seven patrons in the guild system. He was also the first astronomer and chronologist and was skilled in medicine (*ṭibb*).

As a pious man he was the first to mount horse to fight "on the way of God" against the wicked descendants of Cain. As a prophet he received revelations through Gabriel. Thirty books (*ṣaḥīfa*) were revealed to him in this way. For his activity as a prophet and king see partic-

larly Ibn al-Ḳifṭī (ed. Lippert), p. 1 sqq. He received the name Idrīs because he was thoroughly versed in former revelations as the result of industrious study. Baiḍāwī's philological conscience, however, does not allow of such an etymology from the Arabic; it might perhaps be possible in the cognate languages. His ascetic piety aroused the admiration of the angels. The angel of death asked Allāh for permission to visit him. He came to him in mortal form and invited him to sup with him. But Idrīs declined; the same thing happened on the two following nights. On the third day Idrīs asked him who he was. When he heard his answer, Idrīs asked him to receive his spirit. He therefore remained an hour without his *rūḥ*; he then received it back. He next asked to be allowed to be taken into heaven to see it and Paradise. When he reached Paradise he would not come out again. He held fast to a tree and appealed to two texts of the Ḳurʾān: "Every soul shall taste death", for he had already tasted death; and "no one shall drive them out". He therefore would not leave. God then allowed him to remain. He is to return from thence. He and Jesus live in heaven; al-Khaḍir and Ilyās are immortal on earth.

In this version the character of Idrīs as solar hero is seen from the fact that his soul is taken from him at sunset. In another version there are also several traits which point to a solar myth. When one day on a journey he found the heat of the sun unpleasant, he asked God to alleviate it in favour of "him who has every day to travel five hundred years in this heat" (i. e. the sun angel). He begged the latter to postpone his death. The angel took him with him to the place where the sun rises and transmitted Idrīs' request to the angel of death. The latter could not grant his request. The angel of the sun however was allowed to tell him the day of his death. The angel of death opened his dīwān but could not find the date in it. He explained this to mean that Idrīs must die at sunrise. The angel of the sun actually found him dead then.

Nevertheless Idrīs is immortal; expressed in the language of myth this means: the sun dies every day and is revived every day, and is thus immortal. Another recollection of the solar character of Idrīs is preserved in the explanation of the high place of Sūra xix. 57 as the heart of the spheres i. e. the sphere of the sun.

Idrīs is also identified with Ilyās and al-Khaḍir. The Greeks are said to know him under the name Hermes, or as Bar Hebraeus says (*Hist. Dynast.*, ed. Pocock, p. 9) Hermes Trismegistos. For further information see Ibn al-Ḳifṭī, *l. c.* In agreement with passages of the apocalypse of Enoch Muslim legends also tell that he went through Hell.

On the relation of the Ḥarrānīs to Idrīs-Hermes see Chwolsohn, *Die Ssabier und der Ssabismus*, Index, s. v.

IDRĪS I, b. ʿAbd Allāh, son of ʿAbd Allāh b. al-Ḥasan [q. v.], an ʿAlid, founder of the Idrīsid dynasty in the Maghrib, took part in the ʿAlid rising against the ʿAbbāsid Mūsā al-Hādī [q. v.] and after defeat and death of his nephew al-Ḥusain b. ʿAlī b. al-Ḥasan at Fakhkh [q. v.] near Mecca on the 3rd Dhu 'l-Ḥidjdja 169 = 11th June 786, where he had himself fought, remained some time concealed, but later succeeded in reaching Egypt accompanied by a faithful freedman al-Rāshid, and with the assistance of the postmaster there, al-Wāḍiḥ, in secret a Shīʿī, escaped to the Maghrib, where he was received by Isḥāḳ b. Muḥammad, chief of the Berber tribe of the Awraba. At the instigation of this chief, Idrīs was on the 4th Ramaḍān 172 recognised as sovereign by the Awraba and later by the Zenāta, Zawāgha, Lemāya, Lawāta, Ghomāra and Sadrāta, who inhabited the north of the modern Morocco, but this recognition of a ʿAlid by the Berbers, who only shortly before had been Khāridjīs was based more on political than religious motives. Idrīs, who only took the title of Imām, is even said by al-Bakrī to have adopted the Muʿtazilī teachings of Isḥāḳ b. Muḥammad. In the district of Tāmesnā he attacked Jewish, Christian, and heathen tribes, whom he seems to have defeated rather easily, and in a campaign eastwards (about 173 or 174 = 789-790) also brought under his sway the town of Tlemcen (Agadir) and its practically independent prince, Muḥammad b. Khazar b. Ṣūlāt, who recognised Idrīs as the rightful Imām. In Tlemcen where he spent some time, he founded a mosque (Ṣafar 174), the pulpit of which, with his name inscribed on it, still existed in Ibn Khaldūn's time. Soon after his return to the capital Walīlī (the ancient Volubilis) he was poisoned at the instigation of the Caliph Hārūn al-Rashīd, apparently by a certain Sulaimān al-Shammākh (1st Rabīʿ II. 177 = 16th July 793). The details given by some historians of this murder and the means used (a piece of watermelon, a grape, a toothpick, or tooth-powder) as well as of the prosecution of the murderer by al-Rāshid are only romantic additions.

(René Basset.)

IDRĪS II, son and successor of Idrīs I [q. v.]. The latter at his death left no children but one of his concubines named Kanza was pregnant by him. His freedman al-Rāshid persuaded the Berbers to wait till the child was born and in case it should be a son, to proclaim him imām and successor to his father. This expectation was fulfilled. Kanza gave birth to a son on the 1st Djumādā II 177 (793), who was recognised as Idrīs I's successor and entrusted to al-Rāshid's care. The attachment of this man to the family of Idrīs brought upon him the persecution of Ibrāhīm b. al-Aghlab, the almost independent governor of Ifrīkiya. He was murdered in the same way as his master, but replaced by a Berber named Bahlūl. When the latter was won over by Ibrāhīm, he had to entrust the regency to Abū Khālid Yazīd b. Ilyās. To prevent further intrigues the Berbers summoned the eleven year old Idrīs to the throne and took the oath of fealty to him in the mosque of Ulīlī. But Ibrāhīm continued his intrigues while Idrīs alienated the Berbers by his too openly displayed preference for Arabs and by choosing an Arab wizier. When fifteen years of age he had Isḥāḳ b. Muḥammad put to death in spite of the great services he had rendered his father, under the pretext that he was negotiating with Ibrāhīm b. al-Aghlab, and by this stern, not to say unjust, measure thwarted any attempt at a rising. About the same time 192 (808) he built his new capital Fās [q. v., p. 76b sq.] and at the age of eighteen again had the oath of fealty sworn to him, while Ibrāhīm b. al-Aghlab, being busy putting down risings, was unable to interfere with him. At the same time Idrīs changed his policy and became more friendly to the Berbers. After a campaign against the Maṣmūda, whose towns he captured, he marched against Tlemcen (Agadir) which had made itself independent, and put the government of the town in the hands of his cousin, Muḥammad b. Sulaimān b. ʿAbd Allāh. After several engagements with the Khāridjī Berbers, the details of which are not known, he died at Fās in Rabīʿ I 213 (May 20—June 18, 828) at the age of 36, according to the Khalīfa of poisoning; according to al-Bakrī, he was choked by a grape seed. He owes his fame mainly to the foundation of Fās, which has kept his memory so green to the present day in Marocco that the beggars there still seek alms in his name. However little we may know of the details of the careers of him and his father, it is clear that he was the less important of the two.

(René Basset.)

AL-IDRĪSĪ (formerly usually written Edrisi) Abū ʿAbd Allāh Muḥammad b. Muḥammad b. ʿAbd Allāh b. Idrīs al-Ḥammūdī (see above Ḥammūdids) al-Ḥasanī, usually al-Sharīf al-Idrīsī (as a descendant of the Prophet), was born at Ceuta in 493 (1100), died in 560 (1166) (cf. especially Khed. Libr., *Fihrist al-Kutub al-ʿArabiya*, v. 166), studied in Cordova, thence called al-Ḳurṭubī (*Bibliotheca Arabo-Sicula*, p. 610 and the Italian version, ii. 487); while the *kunya* and *nisba* Ibn al-Tha(y)rī given by Ibn Rashīḳ in the *Kharīda* of ʿImād al-Dīn is still unexplained, after various travels spent a long time at the court of Roger II, the Norman king of Sicily in Palermo (and is therefore also called al-Ṣaḳalī, the "Sicilian"), where shortly before Roger's death (548 = 1154) he completed the description of the great silver plate map of the world, the celebrated "book of Roger", the *Kitāb Rudjār* or *al-Kitāb al-Rudjārī*, or *Nuzhat al-Mushtāḳ fi 'khtirāḳ al-Āfāḳ*, the text of which (and 71 maps) is only partly published, but the whole was translated (very incorrectly) into French by Amédée Jaubert (1836—40). For William I (1154—66) he wrote a still larger geographical work, *Rawḍ al-Uns wa-Nuzhat al-Nafs* or *Kitāb al-Mamālik wal-Masālik*, which however is only available in the extract preserved in the Ḥakīm Oghlū ʿAlī Pasha Library in Stambul (N°. 688) (first noticed a decade ago by J. Horovitz in searching the Stambul libraries for historical manuscripts), while the superficial synopsis of the Book of Roger, entitled *Nuzhat al-Mushtāḳ fī Dhikr al-Amṣār wal-Aḳṭār wal-Buldān wal-Djuzur wal-Madāʾin wal-Āfāḳ* was printed in Rome as early as 1592 and translated by the Maronites Gabriel Sionita and Joannes Hesronita inaccurately into Latin in 1619 as *Geographia Nubiensis* (from the false reading in Clime 3, part 4, at the beginning, dealing with the sources of the Nile: *arḍinā* "our land" for *arḍihā* "their land"). An edition and annotated translation of this the most important geographical work of the Middle Ages with the important maps from the manuscripts at present known, Paris (2), Oxford (2), Stambul (only Aya Sofya, as the other all too summary statements of catalogues only refer to the Roman edition of 1592 or to Jaubert!), Petrograd, and Cairo is one of the most urgent tasks for Arabic scholarship. I am already meditating an edition of the smaller unique in Stambul, as I have photographs of it.

IDRĪSIDS. We have dealt above with the reigns of Idrīs I and Idrīs II. The decadence of the dynasty began with the death of the latter. He left eleven sons of whom the eldest, Muḥammad, succeeded him. But at the instigation of his grandmother Kanza, he divided his heritage into fiefs, which he allotted to eight of his brothers, some of whom must have been still children. He doubtless reserved a kind of suzerainty for himself but this did not prevent the rivalries and quarrels which broke up the empire. The statements of the historians on this division do not agree perfectly. This is the most probable table: al-Ḳāsim obtained Tangier, Ceuta, Ḥadjar al-Nasr, Tetuan; ʿOmar, Tīgīsās and Targha; Dāʾūd, the land of the Hawwāra, Tasūl, and Tāza and the land of the Ghayātha; Yaḥyā: Baṣra, Aṣīla and al-ʿArāʾish (Larache); ʿAbd Allāh: Aghmāt and the land of the Nafīs and Sūs; ʿĪsā: Shāla (Chella), Salā (Salé), Azammūr and the land of the Tāmasnā; Aḥmad: Miknāsa (Mequinez) and Tādlā; Ḥamza: Ulīlī and its dependencies. At the same time, Tlemcen (Agadir) remained in the hands of Muḥammad b. Sulaimān, cousin of Idrīs II. Civil wars began at once, the possessions of ʿĪsā and al-Ḳāsim, who had revolted against their brother Muḥammad, passed to ʿOmar. The imām of Fās died in Rabīʿ II 221 (836); he was succeeded by his son ʿAlī, who was replaced in Radjab 234 (848) by his brother Yaḥyā. The latter founded the celebrated mosque of al-Karawīyīn in 245 (859) [cf. FĀS, p. 73, 78]. His son Yaḥyā II succeeded him, but his great debauchery cost him his power and his life. His father-in-law and cousin, ʿAlī b. ʿOmar, took advantage of the disturbances that broke out on the death of Yaḥyā to seize Fās and reconstitute in part the empire of Idrīs II. But he was overthrown in a rebellion of Berber Ṣufrīs and the power passed to one of his cousins, Yaḥyā III b. al-Ḳāsim, called al-Miḳdām. A revolution replaced him by Yaḥyā IV b. Idrīs b. ʿOmar in 292 (905). Civil war was complicated by dangers abroad. In Ifrīḳiya and the central Maghrib the impotent Aghlabid dynasty had been driven out by the Fāṭimids. Spain, flourishing under the Omaiyads, threatened the Maghrib, and in the country itself, the chief of the Miknāsa, Mūsā b. Abī 'l-ʿĀfiya, a mortal enemy of the Idrīsids, established his independence in the valley of the Mulūya. The power of the latter at Fās was destroyed by the Fāṭimid general Maṣāla [cf. FĀṬIMIDS, p. 89], cousin of Mūsā b. Abī 'l-ʿĀfiya in 310 (922). The princes of this family had to seek refuge in the Rīf and among the Ghomāra [q. v.]. Their fortunes seemed to revive under al-Ḥasan b. Muḥammad b. al-Ḳāsim, called al-Ḥadjdjām, the "bloodletter" from the wounds he caused. He recaptured Fās, defeated Mūsā b. Abī 'l-ʿĀfiya in 314 (926) and regained a part of the territories of his ancestor. But the Omaiyads gained a footing in the Maghrib by the occupation of Melila. Al-Ḥasan was treacherously handed over to Mūsā by the governor of the Ḳairawān quarter in Fās; then died while attempting to escape. The last Idrīsids only held two small states comprising a part of the Rīf and the land of the Ghomāra, from Tangier to Ceuta [q. v.], where they were pursued by the hatred of Mūsā b. Abī 'l-ʿĀfiya. In establishing themselves at Ceuta the Spanish Omaiyads dealt a terrible blow at the greatly reduced dominion of the Idrīsids in 319 (931). The latter reappeared a little later, but it was as governors for the Caliph of Cordova. A semblance of power was left them around Ḥadjar al-Nasr [q. v.]. But the final ruin of the Idrīsids, tossed between the Fāṭimids and Omaiyads, was consummated in 363 (974). On Muḥarram 1, 364 (Sept 21, 974) [cf. AL-ḤAKAM II], the Omaiyad general, Ghālib, made a triumphal entry into Cordova, bringing in his train the last Idrīsids. Their rule had lasted two centuries. At a later date a branch of this family succeeded in forming a state at Malaga which lasted a little over twenty years (cf. ḤAMMŪDIDS). In Morocco itself, a certain number of families of Sharīfs claim descent from the Idrīsids. It is not impossible that some of them are, but as a rule these claims are dubious.

(RENÉ BASSET.)

IFLĀḲ, the Turkish name for Wallachia. In 1391, the Voivod Mircea became tributary to the Turks, but the land remained independent.

The Boyars retained the right to choose their ruler, who was thereupon confirmed by the Porte. This state of affairs remained practically unchanged till the treaty of Adrianople in 1829, although alterations were made more than once in the terms, when a voivod refused tribute or Austria or Russia interfered in the affairs of the principalities. For example, as early as the xvth century, the notorious Wlad Drakul, whom the Turks always call Kazykly (the impaler) Voivoda, rebelled against the Turks, had the Turkish ambassador, Hamza Pasha, impaled according to his custom, and ravaged Bulgaria. This provoked a campaign by Sulṭân Muḥammad II, through which Drakul was forced to flee to Hungary and Radul was installed as voivod (1462). After his death in 1477 the cruel tyrant returned, but he was very soon murdered in 1479. Towards the end of the xvith century the Voivod Michael succeeded for a brief period — he was murdered in 1601 — in bringing Transylvania and Moldavia under his sway. In the period following, the custom came into operation whereby the Voivods in order to obtain confirmation had to pay large sums to the Porte, to raise which the unfortunate inhabitants had of course to be bled. This was especially the case, when, from 1716 onwards, Greek Fanariot families (see FANAR) supplied the princes of Wallachia as well as of Moldavia. It is true that from time to time the Porte issued orders fixing the tribute and the obligatory presents at a definite sum and abolishing the payments in kind, corn, sheep and wood, but the abuses continued to exist, nor were they improved when at the beginning of the xixth century at Russia's instigation an arrangement was made that the princes should be appointed for seven years and only be deposed with the approval of the Russian ambassador. At the peace of Adrianople this arrangement was abolished; the rulers were henceforth to be appointed for life and in addition to their annual tribute had to pay a lump sum in commutation of the tribute in kind. The Turks had also to evacuate the towns on the left bank of the Danube (Braila, Giurgiu and Turnu Magurele) and Muhammadans were forbidden to reside permanently in the principalities. When in 1858 Cuza was elected prince of both Wallachia and Moldavia and the union of the two was proclaimed and confirmed by the Porte, the bond between Turkey and Wallachia was broken, although it was not till the treaty of Berlin in 1878 that Rumania was recognised as an entirely independent kingdom.

IFREN, a Berber tribe, which played an important part in Northern Africa during the first three centuries of the Hidjra. The Ifren whom the Berber genealogists trace back to Ifri b. Islîten b. Masrâ b. Zâkiyâ b. Ursîk b. Adîdât b. Djânâ were the most powerful of the Zenâta tribes at the time of the Arab conquest. Their various sections were scattered through the south of Ifrîkiya (Banû Wargû, Marandjîsa) and on the edge of the high Algerian plateaus in the regions of Tîhart and Tlemcen. After having adopted Islâm, the Ifren eagerly embraced Abâḍî [q. v.] doctrines and played a great part in the Berber risings of the iith century A. D. One of their chiefs, Abû Kurra, founded a Berber kingdom around Tlemcen. Defeated at first by the Arab generals, he resumed the offensive in 767. At the head of 40,000 men in 771 he joined the Khâridjî forces who were blockading 'Omar b. Ḥafṣ, governor of Ifrîkiya, in Tobna. He consented to depart for 40,000 dinârs but nevertheless took part with his troops in the siege and capture of al-Ḳairawân in 772.

In the century following the Banû Ifren returned to orthodoxy. Some of them, however, continued to be Khâridjîs, for example the Banû Wargû from whom arose in the time of the Fâṭimids Abû Yazîd [q. v.] "the man with the ass". This rising resulted in the ruin of the Banû Wargû who, severely punished by the Fâṭimids, henceforth led a seminomadic life.

The Ifren of the central Maghrib remained masters of Tlemcen and the adjoing plains but had to recognise the supremacy of the Idrîsids in the ixth century A. D. In the century following they sided with the Omaiyads of Spain against the Fâṭimids and took advantage of this struggle to extend their own dominion. Their chief, Ya'lâ b. Muḥammad, received from the Caliph al-Nâṣir the government of the whole of the western part of the central Maghrib and made his authority felt as far as Oran, which he took and utterly destroyed in 343 (954-955). In 338 (949-950) he had built himself a capital, Ifgân [Fekkân] in the southeast of Mascara and peopled it with natives of the surrounding country. But Ya'lâ's power was of short duration. He fell in 347 (958) in a battle with Fâṭimid troops, whose general Djawhar [q. v.] sacked Ifgân.

The confederation of the Ifren was then broken up. Some sections went to Spain where one of their chiefs, Abû Nûr, succeeded in 405 (1014-1015) in seizing the town of Ronda. The others after first taking refuge on the edge of the Sahara, tried to reinstate themselves in the central Maghrib by combining with the Maghrâwa against the Ṣanhâdja. Defeated and scattered once again by Bulukkîn b. Zîrî in 970, they then tried their fortune in the extreme Maghrib. Yaddû b. Ya'lâ after first of all showing a vigorous attachment to the Omaiyad cause tried to form a principality for himself at their expense. He twice took Fâs from Zîrî b. 'Aṭiya the governor of the Maghrib, but could not hold it. One of his relatives, Hammâma, revived the fortunes of the Ifren. He conquered the land of Tâdlâ and maintained himself there in spite of the attacks of the Maghrâwa of Fâs. His brother and successor, Abu 'l-Kamâl Tamîm, led the Ifren in a holy war against the Berghwâṭa. He destroyed the power of these heretics and installed himself in Shâla. He also took Fâs from the Maghrâwa but was driven out again in 429 (1037-1038). He died at Shâla in 446 (1054-1055). The kingdom, which he had founded, did not long survive him. It was destroyed by the Almoravids, who massacred the Ifren in all the conquered localities. The remnants of the tribe having sought refuge in Tlemcen were exterminated after the capture of the town by Yûsuf b. Tâshfîn.

Bibliography: Ibn Khaldûn, *Histoire des Berbères*, transl. de Slane, iii. 186 *sqq.*; Fournel, *Les Berbers*, passim. (G. YVER.)

IFRÎKIYA (according to Fleischer, *Kleinere Schriften*, i. 239, more exact than the spelling Ifrîkiya used hitherto), the name given by the Arabs to the eastern part of Barbary, the name Maghrib being reserved for the western part. Ifrîkiya is simply a corruption of the Latin Africa, which name the Romans gave first of all to the province organised by them after the destruction of Carthage and which was then extended to Bar-

bary and finally to the whole continent of Africa. Nevertheless the name has been given various fanciful etymologies. "Some", writes al-Bakrī, "say that the name means the "queen of heaven"; others derive it from Ifrīḳos b. Abraha al-Rā'ish, who led an army into the Berber country and built the town of Ifrīḳiya (cf. al-Mas'ūdī, ed. Paris, iii. 224). According to others, the country took the name from Afrīk, son of Ibrāhīm and Ḳaṭūrā, the second wife of the patriarch, or from Fāriḳ b. Miṣraim. According to Ibn Khaldūn, Ifrīḳiya is derived from Ifrīḳos b. Ḳais b. Ṣaifī, one of the kings of Yemen. According to al-Maḳrīzī (in Ibn Abī Dīnār) Afrīḳush b. Abraha b. Dhi 'l-Ḳarnain, having conquered the west built a town there which he called Afrīḳa. But al-Shabbābī (quoted by Ibn Abī Dīnār) connects Ifrīḳiya with *faraḳ* "clear" because "in Africa there are no clouds in the sky". Leo Africanus and Ibn Abī Dīnār derive Ifrīḳiya from *faraḳa* "to divide" because it is separated from Europe by the Mediterranean and from Asia by the Nile, or also because it lies between east and west.

The boundaries of Ifrīḳiya, according to al-Bakrī, were Barḳa on the east and Tangier on the west. From north to south it extended from the shores of the Mediterranean to the "sands which mark the beginning of the country of the negroes". Ifrīḳiya would thus have comprised, in addition to the Africa proper of the Romans, Tripolitania, Numidia and even Mauretania. Earlier and later geographers give narrower limits. Al-Iṣṭakhrī, for example (ivth century A. H.) places Ifrīḳiya between Barḳa and Tāhart (*Bibl. Geogr. Arab.*, ed. de Goeje, i. 36 and 45). For Abu 'l-Fidā', Ifrīḳiya begins at the eastern extremity of the land of Bougie [q. v.] which, according to him, forms part of al-Maghrib al-Awsaṭ and terminates at Barḳa. In a general way, however, one may regard the western border of Ifrīḳiya as corresponding to the meridian of Bougie. In the south, al-Idrīsī and later, Leo Africanus, clearly distinguish al-Ifrīḳiya from Bilād al-Djarīd (the Numidia of Leo). In the Sahara, according to Ibn Khaldūn, the Muzāb separates the desert of al-Ifrīḳiya from that of the Maghrib. It appears moreover that besides this general sense, the term Ifrīḳiya was often used in a narrower sense. Ibn Khaldūn often applies it to the central and northern part of Tunisia and opposes Ifrīḳiya to Tripolitania, al-Djarīd and the province of Constantine. (Cf. especially the passages in this author referring to the Hilālī invasion). Abu 'l-Fidā' places Bougie, Bône and and Gafsa outside al-Ifrīḳiya. The limits of the country would thus be those assigned by Marmol to the province of Tunis "which is called Africa", that is to say, on the west the province of Constantine, on the east that of Tripoli, on the south the mountains of the Atlas with the province of the Zāb and a part of Numidia and of eastern Libya, on the north the Mediterranean from the mouth of the Megerade (Medjerda) towards Bicerta to Capés (Gabis). Finally, in the xviith century, Ibn Abī Dīnār tells us that "scholars understand by al-Ifrīḳiya the land of al-Ḳairawān".

At the beginning of the Hidjra, al-Ifrīḳiya was still in the power of the Byzantines (Rūm). It was peopled by Berber tribes (Hawwāra, Lawāta, Awragha, Nefūsa, Ifren, Nefzāwa, etc.) and descendants of foreign immigrants into Africa, who were called Afāriḳ by the Arab writers. It included a large number of towns and villages and was covered with flourishing fields. The weakness of the Byzantine authorities and the richness of the country attracted the attention of the Arabs, whose incursions began immediately after the conquest of Egypt. The first Muslim expeditions, of which however we only possess incomplete and contradictory accounts, were simply raids. The invaders evacuated the country after having pillaged it and did not try to capture the strongholds held by the Byzantines. The conquest proper did not begin till after the foundation of al-Ḳairawān by 'Oḳba b. Nāfi' in 50 (670). Arab dominion in the country however remained very precarious to the end of the viith century. The Greeks held the most important towns; on the other hand, the revolts of the Berbers forced Zuhair b. Ḳais, the successor to 'Oḳba, to evacuate al-Ifrīḳiya on two different occasions. It was only under the governorship of Ḥassān b. al-Nu'mān that the Berbers were forced to submit and the Byzantines lost Carthage and the principal towns in the country.

Placed at first under the governor of Egypt, al-Ifrīḳiya was next made an independent governorship under Mūsā b. Nuṣair, who was directly under the Caliph in Damascus in 86 (705). The conquests of this general extended the boundaries of the province to the Straits of Gibraltar. But from the middle of the viiith century the Khāridjī revolts considerably diminished the Arab territory. Al-Ifrīḳiya properly so called was ravaged by the Ibāḍī Berbers of the east (Hawwāra, Wafardjūma) and by Zenāta of the central Maghrib. It even was lost by the 'Abbāsid caliphs for a time. Al-Manṣūr however succeeded in establishing 'Abbāsid rule in Ifrīḳiya again from 144 (761) onwards, while independent Berber principalities were set up in the Maghrib. However, the Aghlabid [q. v.] dynasty (ixth century A. D.) only nominally recognised the suzerainty of the Caliph. The overthrow of the Aghlabids by the Fāṭimids caused al-Ifrīḳiya to pass into the power of the Shī'is, who gave it a new capital, al-Mahdiya, and when they established themselves in Egypt made it a vice-royalty under the Zīrids. The foundation of the Ḥammādid kingdom was however not long in depriving the Zīrids of the western part of al-Ifrīḳiya. On the other hand the Hilālī invasion, a result of the repudiation of Fāṭimid authority by the Zīrid al-Mu'izz in 440 (1048-9) [cf. FĀṬIMIDS, p. 90a], exposed the country to the most terrible disasters. Al-Ifrīḳiya, previously very flourishing and covered with vineyards and farms, was ravaged by nomads and almost entirely ruined. Some Arab tribes, notably the Riyāḥ and the Djusham, installed themselves in the country and perpetuated there their habits of disorder and brigandage. Finally, at the beginning of next century, the Normans of Sicily occupied the principal points on the coast. As a result of the Almohad conquest, al-Ifrīḳiya became one of the provinces in the vast empire founded by 'Abd al-Mu'min [q. v.], but she soon recovered her independence under the Ḥafṣid [q. v.] dynasty. The rule of these princes was at first extended over Tunisia, Tripolitania, the province of Constantine, Bougie and the Zāb, but from the end of the xvth century it was reduced to Tunisia in the strict sense of the word. Henceforth the history of al-Ifrīḳiya is merged in that of this country.

(G. YVER.)

'IFRĪT, according to the usual explanations, is one who overcomes his antagonist and rolls him in the dust (*'afar*); who successfully carries matters through (*mubāligh*); who is, therefore, powerful in a hostile sense, evil, crafty (Zamakhsharī and Baiḍāwī on Ḳur. xxvii. 39; *Lisān*, vi. 263, l. 1 *sqq.*, l. 14 *sqq.*; De Sacy, *Ḥarīrī*², p. 355). The classical and only Ḳur'ānic occurrence is in Ḳur'ān xxvii. 39, "an *'ifrīt* of the *djinn*." Hence it has come to be used peculiarly of the *djinn*; but in the first instance it was plainly a general epithet, and thus the Ḳur'ānic passage might be translated, "a powerful *djinnī*". So, too, "an *'ifrīt* of the djinn" occurs in two traditions from Muḥammad in Damīrī's *Ḥayawān* (ed. Cairo, 1313, i. 179, l. 15 *sqq.*, ii. 104, l. 22 *sqq.*, under *djinn* and *'ifrīt*). But soon the word became identified with the *djinn* and especially with the more satanic and malignant element among them. So Rāghib, in his *Mufradāt* (p. 393) speaks of its application to human beings as metaphorical, and even Ṭabarī, *Tafsīr*, xix. 93, seems to limit the word to the *djinn*. But it was not understood as meaning a specific class of these as e. g. *ghūl* (q. v.); contrast the classification (*aṣnāf*) in *Ākām al-Mardjān*, p. 17 *sqq.*; and in the *Fihrist* (p. 309, l. 21) *'afārīt* is used as a general name for both *djinn* and *shaiṭān*'s. Even the distinctive meaning of hostility seems often to have been lost. In *The 1001 Nights* (Galland MS. of xivth cent. A. D.; Story of Second Shaikh, Night vii.) it is said of a benevolent Muslima, *ṣirat 'ifrīta djinnīya*, "she turned into an *'ifrīta*, a *djinnīya*". In Egypt the word has come to mean also the ghost of a murdered man, or of one who has died a violent death. (Lane, *Modern Egyptians*, chap. x.; Willmore, *Spoken Arabic of Egypt*², p. 371 *sqq.*; "Niya Salima", *Harems et Musulmanes d'Égypte*, chap. xiv.; St. John, *Two years residence in a Levantine family*, chap. xx.). It also survives in the original sense of a strong man of violence, e. g. the *ḥārat al-'ifrīt* in Cairo which is explained as the one-time abode of a *ḥarāmī*. But the most normal modern usage is of a powerful, evil, clever *djinnī*.

IGHARGHAR, the valley of a river of the Quaternian epoch in the Sahara, which has now disappeared and is reduced to a subterranean sheet of water. The Igharghar, according to Duveyrier, rises near Arakām-n-Akar, in the massif of the Haggar at a height of about 6000 feet. It ends near the oasis of Gūg, in the south of Tuggūrt, after a course of about 800 miles (900, if one includes the Wādī Ghir, which is its continuation). Its basin extends from the crests of Tademayt in the west to the oasis of Ghāt in the east and from the Haggar to the Shott Melghir, i. e. from the 23rd to the 34th degree of North Latitude.

The Igharghar flows at first from S. to N., passing near Idelès, sometimes in a fairly narrow valley, where springs burst up in the middle of its bed, sometimes also broadening out into a plain with banks indefinitely marked 5 to 8 miles broad. After running along the massif of the Muydir to the west and the Tassili plateau in the east, it describes a curve to the east and reaches the foot of the Ḥammāda of Tinghert. In this part of its course it receives a certain number of wādīs, the valleys of which present the same characteristics. The principal are those of the Igharghāren, the Wādī Assud-Kifaf which drains all the southern part of the Tassili of the Adjjer, the Wādī Issawān, of which the confluence however is still to be found, and lastly the Wādī Ahanat, which comes from the sands of Edeyen.

The Igharghar then traverses the plateau of Tinghert where it cuts for itself "a well marked channel" (Foureau) and receives lower down a large number of streams from the eastern side of this plateau, which rejoin it after having disappeared in the sands of the Erg. In the region of sandhills the bed of the Igharghar becomes quite invisible. It probably passes in the vicinity of the Ḳaṣr Twīl (see 'ARBĀ) without however mixing with it. Foureau's observations permit us to suppose that it formerly ran much farther east. On leaving the Erg, it can hardly be more easily recognised, except at certain points, for example at the ravine of Shegga near Tuggūrt. However the continuity of the subterranean sheet of water is attested in this region by the existence of a number of wells.

(G. YVER.)

IḤRĀM (A.), infinitive ivth from the root *ḥ-r-m*, which has the meaning of "warding off" (*man'*), as the *Lisān*, xv. 9 says: "to declare a thing *ḥarām*" or "to make *ḥarām*". (The opposite is *iḥlāl* "to declare permitted"). The word *iḥrām* has however become a technical term for "sacral state"; one who is in this state is called *muḥrim*. For example, a person fasting may be called *muḥrim*. The word *iḥrām*, however, is only used for two states: the sacred state in which one per-

forms the *ʿumra* and *ḥadjdj*, and the state of consecration during the *ṣalāt*. Thirdly the word can be used of the dress in which the *ḥadjdj* and *ʿumra* are made.

1. **The iḥrām in the major or minor pilgrimage.** The law declares it meritorious for the pilgrim to assume the *iḥrām* at the very beginning of his journey to Mecca. But as this is very inconvenient, it is usually only done when the pilgrim approaches the sacred territory (*ḥaram*, q. v.). Pilgrims who make the journey by steamer often however assume the *iḥrām* as soon as they arrive in Djudda. The law has prescribed several stations (*mawāḳīt*, plur. of *mīḳāt*) where this is usually done namely: Dhu ʾl-Ḥulaifa for the pilgrims from al-Medina; al-Djuḥfa for those from Syria and Egypt; Ḳarn al-Manāzil for those from Nadjd, Yalamlam for those from Yemen; Dhāt ʿIrḳ for those from ʿIrāḳ. Any one who assumes the *iḥrām* too late has later to sacrifice an animal in atonement. These *mawāḳīt* are also called *muhall* i. e. the place where the *ihlāl* begins. The latter means "loud calling" i. e. the calling of *tabbaika* (q. v.). *Ihlāl* is thus used in the same sense as *iḥrām* and one says for example, *ahalla bi ʾl-ḥadjdj* in the sense of *aḥrama bi ʾl-ḥadjdj* i. e., to assume the *iḥrām* for the *ḥadjdj*. The law further ordains that people who live within the area bounded by these villages shall assume the *iḥrām* in their dwellings (*Tanbīh*, ed. A. W. T. Juynboll, p. 72), when it is a question of performing the *ḥadjdj*. For an *ʿumra* they must go to one of the boundary places of the *ḥill* (q. v.); usually Tanʿīm is chosen for this purpose, and is thus erroneously also called al-ʿUmra by modern travellers.

As one can only enter a state of consecration after casting off all that is ritually impure, one must first of all perform the ceremonies necessary for this. The *ghusl* is usually performed; the pilgrim dyes his nails and perfumes himself, all of these ceremonies which were connected with exorcism. Frequently also the pilgrim has himself shaved, his beard trimmed and his nails cut (Burton, *A Pilgrimage* (London 1857), ii. 133, 377; al-Batanūnī, *al-Riḥla al-Ḥidjāzīya*[2], p. 172). On the significance of shaving, see below.

A particular dress has to be worn in which no seams are allowed. This dress consists of two pieces: a sheet that reaches from the navel to the knees (*izār*) and another thrown round the body, which partly covers the left shoulder, back, and breast and is knotted on the right side. This latter is called *ridāʾ* and from the manner in which it is knotted *witāḥ*. Both garments are ordained by law to be white, but red stripes are also found (see the illustration in Burton, ii. facing p. 58). On this dress we may remark that it is probably the old Semitic sacred dress. The upper garment of the High Priest in the Old Testament was according to Josephus (*Antiq.*, iii. 7, 4) also made without a seam. The Jewish priests wear the ephod around the hips and the Meʿīl around the shoulders. In Islām itself there are analogies at the *ṣalāt* and the burial service. The old Arabs also, when consulting an oracle, as well as the later ascetics wore two garments (Goldziher in *Wiener Zeitschrift für die Kunde des Morgenlandes*, xvi. 138, 328; Wellhausen, *Reste*[2], p. 122). White is also the sacred colour in many religions: at first the mourning colour (cf. Wilken, *Verspreide Geschriften*, ed. van Ossenbruggen, iii. 416—422). It was next adopted as a sign of a consecrated state: the ephod of the priests as well as the robes of ascetics are white.

The *iḥrām* dress is thus very old and does not owe its origin to Islām. The wearing of shoes is also forbidden. The most that may be allowed is sandals. This custom is also an old Semitic one. Among the Jews mourners as well as the officiating priests went barefooted. In the consecrated state also it is forbidden to cover the head; perhaps this is also an old mourning custom (cf. Ezekiel, xxiv. 17).

Women need not wear any particular dress. But they usually wrap themselves in a long robe which reaches from the head to the feet, while the face, which really ought to be uncovered, is concealed by a kind of mask (cf. the picture in Burton, *l. c.*, ii. 58).

A *ṣalāt* of two *rakʿa*'s is offered and the *nīya* (q. v.) is pronounced. The latter can be done in three ways. The *iḥrām* can be assumed:

a. either for the *ḥadjdj* or for the *ʿumra*. This method is called *ifrād* (separation).

b. for the *ʿumra*, although the *ḥadjdj* is to be made at the same time. This is called *tamattuʿ* (*bi ʾl-ʿumra ila ʾl-ḥadjdj*), i. e. the utilisation of the *ʿumra* for the *ḥadjdj*.

c. for both *ʿumra* and *ḥadjdj*. This is called *ḳirān* i. e. combination. On the origin and estimation of these three kinds of *nīya* a good deal has been written in Muslim literature. The four schools of law (*madhāhib*, q. v.) have different views on the order of importance of the various *nīya*'s, as regards the merit acquired by them. The kind called *tamattuʿ* owes its name to an expression in the Ḳurʾān (Sūra ii. 192[b]), which later became a technical term. According to Snouck Hurgronje's suggestion (*Het Mekkaansche Feest*, p. 86 *sqq.*), the restrictions which were imposed by the *iḥrām* became too severe for Muḥammad, so that during his stay in Mecca before the *ḥadjdj* he conducted himself in a secular fashion. As his followers looked askance at him for this, the revelation in Sūra ii. 192[b] is said to have been given: "Any one who avails himself of the *ʿumra* until the *ḥadjdj* (shall offer) as many animals as is convenient for him; any one who is not in a position to do this shall fast for three days during the *ḥadjdj* and seven days after his return". What therefore appeared to the Prophet and his contemporaries as an omission which could be atoned for by a punishment, was considered by later generations as a thing permitted. Pilgrims who arrive in Mecca long before the *ḥadjdj* secure themselves by the *tamattuʿ* from a painful abstinence. As soon as they have performed the *ʿumra*, they put off the *iḥrām* and only assume it again when the time of the *ḥadjdj* approaches. But the *tamattuʿ* is forbidden to those who have sacrificed animals with them (Sūra ii. 192). Originally the *ʿumra* took place in the month of *Radjab* and, according to some traditions, an *ʿumra* during the *ḥadjdj* period was an unheard of thing in pre-Islāmic times.

When one has formulated the *nīya*, the *tabbaika* calling begins, which is to be repeated as often as possible and only ceases after the shaving on the 10[th] Dhu ʾl-Ḥidjdja.

The state of consecration imposes certain pledges of abstinence: sexual intercourse, care for one's

toilet, the shedding of blood, hunting and the uprooting of plants are forbidden. With regard to this the following remark may be made. In other cases in other Semitic religions a state of consecration excludes sexual intercourse, at least in the monotheistic ones. The neglect of the body is a well known feature of a sanctified condition among the Semitic peoples. The old Arab mourning women who were in a sanctified state of mourning are described as being dirty and having dishevelled hair (*sha'ith*; al-Khansā', *Dīwān*, ed. Cheikho, Beirut 1896, p. 28, v. 4).

During mourning the Jews are forbidden to bathe or clip their nails. It is reported of the pre-Islamic pilgrims and of Muḥammad that when in the state of *iḥrām* they smeared something on their hair to make its filthy condition more endurable (Bukhārī, *Ṣaḥīḥ*, *Kit. al-Ḥadjdj*, Bāb 126; Muslim, with Nawawī's comm., Cairo 1283, iii. 295; cf. *Lisān*, iv. 391). In a tradition given by Ibn Mādja (*Bāb mā yūdjib al-Ḥadjdj*) Muḥammad in answer to the question: "What is the *ḥādjdj* (pilgrim)?" said: "He whose hair is dishevelled and whose mouth smells (*al-sha'ith al-tafil*)". The idea underlying all these customs, including the shaving at the beginning of the period of consecration is perhaps that everything that grows on the body during the period of consecration is devoted to the object of the sanctified condition. At the end of the period in most cases an offering of hair may have been made. The endeavour to make oneself unrecognisable may also have played a part.

The *muḥrim* is not ordered to fast. But there are numerous traditions which answer this question, some in the negative and some in the affirmative. It may be that in ancient times this ascetic custom was associated with the others.

When one arrives in Mecca from his *mīḳāt*, he performs the *ṭawāf* and *sa'y* [q. v.], sometimes also drinks water from Zemzem and has his hair cut, if the *iḥrām* was only assumed for an *'umra*. But if it was assumed for a *ḥadjdj*, the shaving and hair cutting is not performed till the 9th Dhu 'l-Ḥidjdja in Minā, after the ceremonies of the *ḥadjdj* proper are over. The pilgrim can now assume his ordinary dress again. But it is usual to put on new clothes (Burckhardt, *Travels*, London 1829, ii. 60). The law however prescribes another *ṭawāf* in Mecca and many pilgrims only put on their ordinary dress after this ceremony. Finally on leaving the holy city a farewell *'umra* has to be performed. For this purpose the pilgrim goes to Tan'īm, performs a *ṣalāt* of two *rak'a*'s, returns to Mecca to perform the *ṭawāf* and *sa'y* there. He then definitely puts off the *iḥrām*.

2. The consecrated state during the *ṣalāt*. This state also can only be entered when one is ritually pure and dressed in a prescribed fashion and has taken one's stand behind a *sutra* [q. v.]. This state is announced by the *takbīr* [q. v.] which is also called *takbīr al-iḥrām*. The ceremonies of the *ṣalāt* proper begin then and can only take place during this consecrated state. One has to avoid everything which might destroy the latter, that is: every superfluous act and every superfluous word. The jurists specially mention greeting, sneezing, coughing, laughing, all that is connected with sexual life or the process of digestion. These are all actions which were originally ascribed to demoniac or animistic influences. We frequently find the idea that angels are present during the *iḥrām* (cf. the commentaries on Sūra xvii. 80).

The consecrated state is ended by the two *taslīma*'s, that is the formulae of greeting pronounced while turning the head first to right and then to left. According to some jurists, the object of the first is to leave the consecrated state as well as to greet those present; the latter is only a greeting for those present. Who these are is a question which is answered in various ways: according to some, it is the angels who are summoned by the *takbīrat al-iḥrām* and are now dismissed by the *taslīmat al-taḥlīl* (the formula by which one returns to the secular state).

The transition from the sanctified to the secular state is dreaded for demoniacal influences. These are averted by the so-called *ḳunūt* (cf. Goldziher in *Orient. Studien Theod. Nöldeke gewidmet*, i. 323 *sq.*).

IḤYĀ' (A.) "bringing waste land into cultivation". The Muslim *Fiḳh*-books in the section on legal transactions have a chapter on *iḥyā' al-mawāt*, literally, making the dead (soil) alive. Land which is not being used is called *mawāt*. Every Muslim who cultivates neglected land for himself becomes the proprietor if it does not belong to another Muslim. According to most *faḳīh*'s express permission from the authorities is not necessary. The *imām* Abū Ḥanīfa however considers it illegal to cultivate a *mawāt* without permission from the authorities.

IḲĀB (A.), punishment, retaliation; especially the punishment from God which will fall upon the sinner after death (often used in the Ḳur'ān in this sense). Cf. 'ADHĀB and: Sprenger, *A Dictionary of the Technical Terms*, p. 947.

(Th. W. Juynboll.)

IḲĀMA (A.) is the second call to the *ṣalāt* which is pronounced by the *mu'adhdhin* in the mosque before each of the five prescribed daily *ṣalāt*'s as well as before the *ṣalāt* at the Friday service. This second call gives the moment at which the *ṣalāt* begins. The formulae of the *iḳāma* are the same as those of the *adhān* [q. v.]. According

to the Ḥanafīs, they are repeated as often as in the *adhān*; according to the other *Fiḳh* schools, they are pronounced only once with the exception of the words "God is great", which are repeated twice at the beginning as well as at the end of the *iḳāma*. Moreover after the formula "come unto blessedness", twice in succession there are repeated the words "*ḳad ḳāmat al-ṣalāt*" (now begins the *ṣalāt*). In the lawbooks the calling of the *iḳāma* is recommended as *sunna* also to every believer who is performing the *ṣalāt* alone.

According to E. Mittwoch (*Zur Entstehungsgeschichte des islamischen Gebets und Kultus*, *Abh. d. kgl. preuss. Akad. d. Wissensch.*, 1913, phil.-hist. Kl., N. 2, p. 24) the calling of the *iḳāma* was borrowed by the Muslims originally from the benedictions in Jewish prayer. According to C. H. Becker (*Zur Geschichte des islamischen Kultus*, *Der Islam*, iii. 389) on the other hand, this Muslim custom developed out of the original *adhān* in the mosque, which was modelled on the Christian mass (see however al-Maḳrīzī, *Khiṭaṭ*, ii. 271, l. 14—15).

Iḳāma denotes the action of the *mu'adhdhin* (the calling of the prescribed formulae) by which he causes the *ṣalāt* to begin. On this linguistic usage see C. Brockelmann, *Iḳāmat aṣ-Ṣalāt* (*Festschr. E. Sachau*, 1915, p. 314—320) and J. Weiss in *Der Islam*, vii. (1916), 131—136; cf. the expressions: *aḳāma 'l-ṣalāt* and *uḳīmat al-ṣalāt* (Gloss. to Shīrāzī, *Tanbīh*, ed. A. W. T. Juynboll, s. v.; Bukhārī, *ṣaḥīḥ*, *Adhān*, N⁰. 23-24). In the *Fiḳh*-books however *iḳāma* is also explained as the call which is intended to summon the believers to rise for the *ṣalāt*. See Bādjūrī (Būlāḳ 1307), i. 167, l. 12.

Bibliography: In addition to the collections on tradition and the *Fiḳh*-books see also: Dimiashḳī, *Raḥmat al-Umma fi 'khtilāf al-A'imma* (Būlāḳ 1300), p. 14 *sqq*.

(TH. W. JUYNBOLL.)

IKHLĀṢ (A.), to keep (or make) clear and pellucid, to keep free from admixture. In connection with the Ḳur'ānic use of the expression *ikhlāṣ al-dīn li-'llāh* (cf. iv. 145, vii. 28, x. 23, xxxix. 14, 16, etc.), i. e. to honour and serve Allāh exclusively, *ikhlāṣ* by itself received the meaning (cf. Ḳur'ān, ii. 133) of "absolute devotion to Allāh" and became used in opposition to *ishrāk*, *shirk*, "associating divine beings with Allāh". Sūra cxii. which emphasises the unity and uniqueness of God and denies that he has any associates was called *Sūrat al-Ikhlāṣ* (also *Sūrat al-Tawḥīd*); this Sūra is frequently recited in the *ṣalāt*.

With the development of the conception of *shirk*, which covers "every kind of worship of God which is not an aim in itself" and also the cherishing of interested motives in religious practice (cf. Goldziher, *Vorlesungen*, p. 26), the development of *ikhlāṣ* is somewhat parallel. According to al-Ghazālī, *ikhlāṣ*, apart from the above technical sense, properly means only that one's action should be dictated by a single motive, so that for example it can be ascribed to one who gives alms only with the intention of being seen to do so. In the language of religious ethics as developed especially by the Ṣūfīs, *ikhlāṣ* particularly refers to the effort to come nearer to God and means the keeping free of this ideal from all subsidiary thoughts. In this sense it is often opposed to *riyā'*, the wish to be seen. *Ikhlāṣ* demands unselfishness with regard to one's own religious practice and the abolition of the selfish element which mars devotion to God. At the highest stage of *ikhlāṣ* even the consciousness of *ikhlāṣ* itself must disappear and all thought of divine reward in this world or the next be put aside. Cf. al-Ḳashānī, *al-Kamāl fi 'Ilm al-Taṣawwuf*, Cairo 1318, p. 111—4; al-Harawī, *Manāzil al-Sā'irīn*, Cairo 1326, p. 16 *sq*.; al-Ghazālī, *Iḥyā'*, Cairo 1282, iv. 323—332; ed. with comm. of al-Murtaḍā, Cairo 1311, x. 42 *sqq*.; transl. by H. Bauer, *Islamische Ethik*, I. *Über Intention, reine Absicht u. Wahrhaftigkeit* etc., Halle a. S. 1916, p. 45 *sqq*.; R. Hartmann, *al-Kuschairîs Darstellung des Ṣûfîtums* (*Türk. Bibl.*, Vol. xviii.), p. 15 *sqq*., 59, 60. (C. VAN ARENDONK.)

IKHMĪM. [See AKHMĪM.]

IKHSHIDIDS, an Egyptian dynasty. On the general place in history of the dynasty see above ii. p. 8ᵇ. The name of the dynasty is derived from the old Persian princely title *Ikhshīd* which the Caliph al-Rāḍī was induced to grant to the founder Muḥammad b. Ṭughdj in 326 = 937. It was the title of the old rulers of Farghāna (see ii. p. 62ᵃ) from which the dynasty claimed descent. Ikhshīd is said to mean "king of kings", although others interpret it as "servant" (cf. Ibn Sa'īd, ed. Tallqvist, Arab. text, p. 23 *sq*.; transl. p. 41), presumably in the same sense as 'Abd Allāh was used as an honorific of the Caliphs. Al-Ikhshīd's father and grandfather were already in the service of the Caliph; he himself worked his way slowly upwards and seems to have had a supporter in the vizier al-Faḍl b. Dja'far of the celebrated family of the Banū 'l-Furāt [s. IBN AL-FURĀT, 3]. After he had arranged the disorganised affairs of Egypt (323 = 935), he had to defend his new position against the powerful Amīr Muḥammad b. Rā'iḳ [s. IBN RĀ'IḲ] who penetrated up to the gates of Egypt but then granted the Ikhshīd the country as far as Ramla on payment of tribute. Five years later new difficulties arose, and the undecisive battle of al-Ladjdjūn was fought, after which the contending Amīrs made an alliance by marriage. The Ikhshīd paid a yearly tribute of 140,000 dīnārs. After the death of Ibn Rā'iḳ a new enemy to the Ikhshīd arose in the Ḥamdānids, and being now at the height of his power he took part in the contest for the position of Amīr al-Umarā'. In Muḥarram 333 (Sept. 944) he met the Caliph al-Muttaḳī at al-Raḳḳa, just on this side of the Euphrates, and thought for a time of sharing the fortune of the Caliph in the struggle against the Turk Tūzūn, who was ruling in Baghdād. But he ultimately returned to Egypt and began the struggle with the Ḥamdānid Saif al-Dawla, which ended in a treaty by the terms of which Damascus remained in possession of the Ikhshīd on payment of tribute. He died at the end of 334 (July 946). Two sons nominally succeeded him but they were only *rois fainéants*. The real power lay in the hands of an Abyssinian eunuch named Kāfūr, who on the death of the second son was formally granted the government of Egypt and successfully defended Egypt and Syria henceforth from the attacks of the Ḥamdānids. On Kāfūr's death a grandson of the Ikhshīd was appointed governor, but the dynasty had completely lost its hold on the country and Egypt with Syria fell into the hands of the Fāṭimids who were advancing from North Africa.

The following table gives the names and order of the Ikhshīdids:

323 Muḥammad b. Ṭughdj al-Ikhshīdid 935
335 Abu 'l-Ḳāsim Unūdjūr b. al-Ikhshīd 946
340 Abu 'l-Ḥasan 'Alī b. al-Ikhshīd . . 960
355 Kāfūr, ruler in name also, . . . 966
357–8 Abu 'l-Fawāris Aḥmad b. 'Alī . . 968–9.

The name Unūdjūr is transmitted in various forms. The Ikhshīd and Kāfūr were certainly important personalities. The Ikhshīd is described as strong physically, but as cowardly and particularly avaricious and greedy. No man's property was secure in his reign. More pleasing human traits are also credited to him however. Kāfūr was probably the more important. In spite of his repulsive features, by his intellectual endowments he carved a career for himself, unique even in those days, from black slave to wielder of the dynastic power. At the height of his power he never forgot his humble origin. More features of his character that are pleasing than those that are displeasing have been handed down to us. Both princes cultivated the literary taste of their times. Al-Mutanabbī sang both their praises, but afterwards lampooned them. Under the Ikhshīd began the struggle between the two dynasties of Caliphs ('Abbāsids and Fāṭimids) for the nominal suzerainty over the various governors who had set up dynasties. These soldiers of fortune played them off one against the other. The Ikhshīd seems to have seriously considered recognising the Fāṭimids, but he remained faithful to the 'Abbāsids as their prestige was still too great.

Bibliography: Ibn Sa'īd, *Kitāb al-Mughrib*, ed. Tallqvist, where the other literature (al-Maḳrīzī, al-Ḥalabī, Ibn al-Athīr, Ibn Khallikān, Ibn Khaldūn, Abu 'l-Maḥāsin, al-Suyūṭī, Wüstenfeld, *Statthalter*, iv. etc.) is utilised. The only new addition is al-Kindī, ed. Guest.

(C. H. BECKER.)

IKHTILĀDJ (A.), trembling of the limbs; whence *'ilm al-ikhtilādj*, the alleged science of prophesying from the involuntary twitchings of the limbs, also called palmology. The oldest work on the subject is probably Μελάμποδος ἱερογραμματέως περὶ παλμῶν μαντικὴ πρὸς Πτολεμαῖον βασιλέα (J. G. F. Franzius, *Scriptores physiognomoniae veteres*, Altenburgi 1780, p. 451 *sqq.*). The Arabs however usually ascribe the origin of this science to the Indian Ṭumṭum. Who he was has not yet been explained. A suggestion is given by Hauber, *Ṭumṭum* (*Ṭimṭim*) = Δίδυμος = *Didymus*, in *Zeitschr. der Deutsch. Morgenl. Gesells.*, lxiii. 457 *sqq.*

Bibliography: Fleischer, *Über das vorbedeutende Gliederzucken bei den Morgenländern* in *Verhandl. der Kön. Sächs. Gesells. der Wissensch.*, Phil. Hist. Klasse, 1849, p. 244 *sqq.* (= *Kleinere Schriften*, iii. 199 *sqq.*); M. Gaster, *Das türkische Zuckungsbuch in Rumänien* in *Zeitschr. für Rom. Philologie*, iv, 65 *sqq.*; H. IKHTILĀF (A.), difference of opinion; in contrast to *idjmā'* [q. v.], the difference of views among the authorities on Muslim law and dogmatics on details of legal practice and doctrine which do not affect great principles, particularly among the former, as it appears in the diversities between the *Madhāhib* [q. v.] and also in those within each one of them. In opposition to contrary views urging unity of practice, and in face of the reality of the existence of this difference of opinions, the conviction has arisen in Muslim orthodoxy that they are of equal value and this view finds expression in an authoritative form in the saying attributed originally to various Caliphs and latterly to the Prophet himself "difference of opinion in the Muslim community is a sign of (divine) favour". The registering of these differences has produced a great literature in Islām since the foundation of the study of Fiḳh and this has been most comprehensively recorded by Fr. Kern.

(I. GOLDZIHER.)

IKHWĀN AL-ṢAFĀ'. We have evidence in the second half of the iv.th (x.th) century (373 = 983) of the existence of a religious and political association with ultra-Shī'ī, perhaps to be more accurately described as Ismā'īlī views and tendencies. The members of the association, the head quarters of which were in Baṣra, called themselves the "Pure and Faithful", as their chief aim was to further the salvation of their immortal souls by mutual assistance and by every means, especially purifying knowledge (γνῶσις). Nothing is known of their political activities, but a collection of treatises arranged in encyclopaedic fashion dealing with the objects of their society, survives as the outcome of their attempts to work out theories of edification. The period of the collection and editing of their *Rasā'il* (52 in number: the Bombay edition as stated in the table of contents at the beginning and the concluding note in the first *Risāla* consists of 52 treatises, but in the last treatises in part iv. only 51 are mentioned) is usually given as the middle of the iv.th (x.th) century and among the collaborators are mentioned Abū Sulaimān Muḥammad b. Mushīr al-Busti, called al-Muḳaddasī, Abu 'l-Ḥasan 'Alī b. Hārūn al-Zandjānī, Muḥammad b. Naḥradjūrī, al-'Awfī and Zaid b. Rifā'a. Further details cannot be ascertained, mainly because the Pure loved to express themselves in very confusing language. Quotations in the *Rasā'il*, as far as they have been identified, are mainly taken from the literature of the viii.th and ix.th centuries A. D. The philosophical position is that of the older eclectic translators and collectors of Greek, Persian, and Indian wisdom. Hermes and Pythagoras, Socrates, and Plato are often quoted and thought more highly of than Aristotle. The latter appears as the "logician" and also as the author of the Plotinic "Theology" and the "Book of the Apple". Of the knowledge of a relatively purer and more complete Aristotelianism, which begins with al-Kindī, the treatises of the "pure ones" show no trace. It is characteristic of their mental attitude that al-Kindī is not quoted, at least not by name, although his renegade pupil, the fantastic astrologer Abū Ma'shar (died 272 = 885), is. It is not impossible, however, that they had literary connections with al-Kindī and his school. According to the mediaeval Latin translation of the 13th *Risāla*, this treatise was composed by a "Mahumet discipulus Al-quindi". Cf. T. J. de Boer, *Zu Kindi und*

einer Schule in *Archiv f. Gesch. d. Philos.*, viii (1894), p. 177 *sq.*

The contents of the *Rasā'il* are of a pronouncedly eclectic nature. The central point is the doctrine of the heavenly origin and the return of the soul to God. The world is derived from God by the way of emanation, like the word from the speaker or the light from the sun. In successive stages there comes forth from the divine unity a second, the intelligence, from this a third, the soul, and then a fourth, primitive matter, a fifth, nature, a sixth, bodies or spatial matter, a seventh, the world of the spheres, an eighth, the elements of the sublunar world, a ninth, the products of the world: minerals, plants, and animals. In this cosmic process the corporeal first appears as the basis of individuation, and all evil and imperfection. The individual souls are only part of the world soul, to which they return purified after the death of the body, just as the universal soul will return to God on the Last Day. By the 'pure ones' death is called the minor and the return of the world-soul to the creator the major resurrection.

The religions of all times and peoples agree with this wisdom according to the 'pure ones'. The object of all philosophy as well as of every religion is to make the soul become like God as far as is humanly possible. To carry out this spiritualistic interpretation of religious doctrine the Ḳur'ān is interpreted allegorically. The same allegorical interpretation is applied to tales of western origin, such as the book of *Kalīla wa-Dimna*. As Goldziher has shown, the story of the ring-dove, in which it is told how the animals by being faithful friends to one another (*Ikhwān al-Ṣafā'*) escape the snares of the hunter, determined the choice of the name for the association.

The whole of the 51 treatises, written in a paraenetic tone, prolix and with many repetitions, superficially at least looks like an encyclopaedia of the sciences. The first part comprises in 14 treatises mathematics and logic as propaedeutics, the second in 17 treatises natural sciences including psychology, the 10 *Rasā'il* of the third part deal with metaphysics, and lastly the 11 *Rasā'il* of the last part discuss mysticism, astrology and magic. In an essay in the fourth part (No. 45 of the whole series) the nature and organisation of the association is also discussed.

(T. J. DE BOER.)

AL-IKLĪL (A.), the crown; the name of several constellations, namely:

1. *al-Iklīl*, is the name given to the stars β, δ, π, forming a blunt wedge close together on the brow of the Scorpion. These stars mark the seventeenth station of the moon.

2. *al-Iklīl al-shamālī*, Greek στέφανος, Latin *Corona*, the northern crown, a constellation of eight stars which follows the staff of Bootes and is also called *al-Fakka*, the "breach", and *Ḳaṣ'at al-Masākīn*, the "alms bowl", Pers. *Kāsa-i Darwīshān*, the "beggar's bowl" and *Kāsa shikasta*, the "broken bowl", because the ring of stars is broken at one spot. *Al-Fakka* is also the name of the principal star α of the Crown.

3. *al-Iklīl al-djanūbī*, Gr. στέφανος νότιος, the southern Crown, a constellation of 13 small stars near α β on the ankle-joint of Sagittarius. It is also called *al-Ḳubba* the "Cupola" or *Udḥīy al-Na'ām*, the "ostrich's nest", because it is south of the two ostriches, the twentieth station of the moon.

Bibliography: al-Ḳazwīnī, *'Adjā'ib al-Makhlūḳāt*, ed. Wüstenfeld, i. 32, 37, 41, 48; L. Ideler, *Untersuchungen über den Ursprung der Sternnamen*, S. 55, 176, 281. (J. RUSKA.)

IḲLĪM, the Greek word κλίμα, inclination. Eratosthenes (d. 195 B. C.) divided the *orbis terrarum notus* into seven longitudinal zones, of which the limits were arbitrarily fixed. Hipparchus (c. 150 B. C.) made the zones equal in latitude. The division into seven climates of equal width was taken over by the Arabs, though sometimes the countries to the S. of the Equator were reckoned as eighth, and those in the extreme N. a ninth. Al-Idrīsī [q. v.] has arranged his book on geography according to climates. The determining factor in defining the limits of the climate is the length of the longest day within it. In Abu 'l-Fidā the inhabited world lies practically between 10° and 50° N. Latitude, and the length of the longest day increases by half-an-hour in each climate from the S. to the N. The following table shows the S. and N. limits of the seven climates, the length in hours of the longest day at the S. limit of each and the breadth and length of each in degrees.

Climate	I	II	III	IV	V	VI	VII
S. Limit	12° 40′	20° 27′	27° 30′	33° 37½′	38° 54′	43° 22½′	47° 12′
N. Limit	20° 27′	27° 30′	33° 37½′	38° 54′	43° 22½′	47° 12′	50° 20′
Longest Day .	12¾	13¼	13¾	14¼	14¾	15¼	15¾
Breadth	7° 47′	7° 3′	6° 7½′	5° 17′	4° 28½′	3° 49½′	3° 8′
Length	172° 27′	164° 26′	154° 30′	144° 17′	135° 22′	126° 27′	119° 23′

The length of the longest day at the N. limit of the seventh climate, that is, at 50° 20′ N., is 16¼ hours. Inhabited lands, however, lie both to the N. and S. of these climates. The climates also diminish in length as they ascend northwards. Thus, according to al-Bīrūnī [q. v.], the length of the first climate from E. to W. is 172° 27′, or, taking 1° = 18⅔ parasangs nearly, about 3252 parasangs. On the older basis of 22⅔ parasangs to a degree it would be 3832 parasangs. The length of the seventh zone is 119° 23′ or about 2235 parasangs (on the other computation 2651 parasangs). These measurements are adopted by Abu 'l-Fidā.

The term *climate* (*keshwar*) was also used by the Persians to denote one of the seven parts of

kingdoms into which they divided the world, and which had no dependence on latitude. Persia was placed in the centre and Arabia, Africa, the Romans, the Turks, China and India grouped round it. A similar seven fold partition of the earth is found in al-Masʿūdī (chapter viii.). Climate then came to be used locally for "country", *e. g.* "Syria, ʿIrāḳ, etc. Abu 'l-Fidā calls this the popular climate as contrasted with the "real" or astronomical climate, which depends on the latitude.

Iḳlīm al-Ruʾya is another name for the *Falak al-Burūdj*.

Quatremère (*Notices et Extraits*, etc., xvi. 92 *sqq.*, xix. 112 *sqq.*); al-Hamdānī's *Geographie der arab. Halbinsel*, ed. D. H. Müller, p. 1—44.

(T. H. Weir).

IḲRĀR (A.), Confession. If the accused in the case before the *ḳāḍī* confesses that the prosecutor is right, no further proof is needed according to Muslim law. The judge can at once give his verdict. An *iḳrār* however can only be considered valid when it is made by a person of age in full possession of his faculties and without any pressure before the ḳāḍī. Measures to extort a confession are absolutely forbidden. Even an *iḳrār* made by some one perhaps from fear of a flogging is invalid. If the case concerns the law of property, the one who acknowledges the demand must be capable of independent action (*rashīd*). If the justice of an accusation is once recognised in a case, a later repudiation of the *iḳrār* is invalid, except when the accused has confessed a crime which is liable to be punished as a *ḥaḳḳ Allāh* (see ʿADHĀB, i. p. 132).

Recognition of children who are not born in wedlock is of no value according to Muslim law. If, however, the paternity of a legitimate child is uncertain and the husband expressly acknowledges his paternity, then no further proof is required. The paternity of the child is then established by the *iḳrār*. The declaration however must be neither contrary to the actual circumstances nor the law.

In other cases also a person's genealogy can be established beyond all doubt by *iḳrār* without further proof in certain circumstances, for example, if a male Muslim who has attained his majority declares that any one is his father, brother or uncle. If however relationship is claimed with some one still living, the latter must confirm the *iḳrār*, if he is not incapable of doing so on account of youth or mental deficiency. If the *iḳrār* refers to more distant degrees of relationship (e. g. brother or uncle), the men through whom the alleged relationship has arisen (e. g. father grandfather) must be already dead.

(TH. W. JUYNBOLL.)

AL-IKSĪR [s. ELIXIR.]

IḲṬĀʿ (A.) in Muslim countries means: 1. the act of bestowing land which is not private property in return for taxes or tithes; 2. the act of giving the produce of land in place of or as a guarantee of payment on the part of the state treasury. *Iḳṭāʿ* may consist of: 1. the granting of a whole province as a fief to a governor (e. g. the granting of Egypt to Ibn Ṭūlūn by the Caliph on payment of tribute), as well as the granting of a few fields in return for tithe (*ʿushr*) or taxes (*kharādj*) or rent (*kharādj-udjra*) or a poll tax afterwards converted into *kharādj* (*kharādj-djizya*); 2. the allotment of the revenue from a piece of ground as salary or pension. The conception of *iḳṭāʿ* was then extended and used to mean the farming of taxes and customs duties and tolls on rivers and canals. *Iḳṭāʿ* later came to be used to designate especially a military fief. Al-Māwardī has given a theoretical account of the prescriptions of the *iḳṭāʿ* in Ch. xvii. of his "Constitutional Law" (*al-Aḥkām al-sulṭānīya*, ed. Enger, Bonn 1853, p. 330—343). He distinguishes at the outset between the granting of the property and the yield from it and investigates under what conditions land may be capable of *iḳṭāʿ*.

I. There are three kinds of land.

A. Mawāt (uncultivated land). *a.* Waste land without trace of cultivation or an owner. The *muḳṭaʿ* (the person to whom the land is granted under certain conditions) promises to cultivate it (cf. the Roman *emphyteusis*) and for three years he pays nothing. (He then pays a rent which is fixed by public auction [*muzāyada*]; but lands were probably often allotted at a definite rent which was not considered capable of being increased, cf. Becker, *Die Entstehung von ʿUšr- und Ḫarāǵ-Land*, s. *Bibliography*). If he does not cultivate it, it may be taken from him at the close of three years unless he can give satisfactory reasons for his neglect. Otherwise he is granted the land on a long lease with the right to dispose of it, so that it is in a way his property, in return for a pledge to pay a certain sum. *b.* If the land was previously cultivated, the same regulations hold, if it was cultivated in the *Djāhilīya* (i. e. the period before Muḥammad). If it was cultivated within the Muslim period, the practice varies.

B. If it is a case of cultivated land in private possession, it can only be given to some one if it is in an enemy country but has already been promised as *iḳṭāʿ*, before it is conquered. The *muḳṭaʿ* receives by *iḳṭāʿ* a preferential claim, after the conquest of it, if it is granted at all, if for example the owners migrate. Conquered land that is not private property, for example the private domains of the former ruler or lands belonging to inhabitants who have left the country, is in part reserved for the *bait al-māl* (treasury) and can only be leased for rent (*kharādj udjra*) but never become private property. The unreserved parts become *kharādj* lands (i. e. liable to land tax); they either belong to the *faiʾ* (booty) [q. v.] and are immobilised, in which case they can only be rented and not become the private property of the *muḳṭaʿ* or they remain in the private ownership (of an unbeliever); then it is not possible to grant them and the *kharādj* due from them takes the place of the poll tax *djizya* [q. v. i. 1051 *sq.*]. Lands which fall to the state, because the owner has no heirs are administered like foundations. Many legal authorities hold the opinion that the government is free to dispose of them: in this case they may

be assigned, according to some, only on rent, according to others, as private property.

III). *Iḳṭāʿ* of the produce only takes place as a substitute and guarantee for the payments which the treasury has to make to subjects; the sum which the government has to pay to the persons concerned must therefore be fixed if instead of money a grant of produce is to be made. There is a distinction between:

a. Iḳṭāʿ of the tithe (*ʿushr*). The revenues from tithes (*ʿushr*) are intended for the *zakāt* (alms for the poor). They therefore cannot be bestowed because the claims on the *zakāt* in the individual cases are only defined when payment is made and the *ʿushr* is only paid at the end of the year so that the two dates do not coincide.

b. Iḳṭāʿ of the *kharādj*. The yield of the *kharādj* for the reasons just mentioned cannot be granted to any one in substitution for the claim to *zakāt*. For the same reason, officials holding special offices but receiving no fixed salary or appointed for an indefinite period cannot receive the yield of the *kharādj* as *iḳṭāʿ*. On the other hand the *iḳṭāʿ* of the *kharādj* is readily given to members of the army in place of their definite pay because the settlement is easy in this case.

On the kinds of *kharādj* (*kharādj djizya* and *kharādj udjra*) see the articles DJIZYA and KHARĀDJ. The *kharādj udjra* can be granted for a number of years in compensation for a definite payment.

If the *muḳṭaʿ* remains in active service till the end of the period he naturally retains the revenue: if he dies it goes back to the state. His heirs receive a pension from other funds: if he breaks down in health his usufruct of the revenue is settled by local practice, according as his pay is continued or a pension is given from other sources on account of ill health. There is no *iḳṭāʿ* with rights for life and the right of transmitting to heirs, as the financial sovereignty of the state would thus be injured by losing the right of disposal. An *iḳṭāʿ* for life without the right of bequest is only possible when, according to local practice, in cases of retiring on account of ill health, it continues to be paid undiminished. These are in the main al-Māwardī's theories. On the special regulations for the granting of mines etc., see al-Māwardī at the end of the chapter quoted. He does not discuss the *iḳṭāʿ* of land to Muslims as *ʿushr* land. We know that this kind of *iḳṭāʿ* was usual in Muslim countries. Becker in particular has explained the practice (*Steuerpacht*, etc., p. 81 *sqq.*, see *Bibliography*; in this book the eastern and western systems of granting fiefs are compared). Al-Māwardī points out that *iḳṭāʿ* of *kharādj* was especially suitable for members of the army: and in reality the military fiefs did develop out of it. Soldiers and amīrs were given the rents either as a guarantee of their pay or as part of it. When the rent came in with increasing irregularity, they were gradually given the estates themselves. This state of affairs lasted about 130 years from the time of the Būyids [q. v.] to the reign of Sulṭān Malik Shāh (465—485 = 1072—1092) under the administration of his vizier Niẓām al-Mulk (see Becker, *Steuerpacht*, p. 89). The latter distributed the estates as fiefs to the troops and allotted them as revenue and income. The Saldjūks introduced an innovation inasmuch as they made the fiefs hereditary in return for military service. This is best explained by the fact that as an invading tribe of nomads it was their interest at first to have as many of their own people as possible in their army. They thought that in this way they could secure for themselves a particularly true and devoted army (al-Maḳrīzī, *Khiṭaṭ*, ii. 216 quotes a statement on this point by a *djundī* (mercenary) of the army of the Saldjūk Atābeg, the almost independent prince Nūr al-Dīn of Aleppo 541—569 = 1146—1173): "The fief belongs to us, it is our property, we pass it on to our children from father to son and in return for it we are willing to run the risk of death"). The system of hereditary fiefs in return for military service is also found among the Mongols. It was different in the Mamlūk period (see Becker, art. EGYPT, ii. p. 14[b] *sq.*]: the whole country under his rule, apart from private property, endowments, fallow or desert land, is the feudal property of the Sulṭān. It was divided into 24 parts from the time of Sulṭān Ḳalāʾūn (678—689 = 1279—1290) (*ḳīrāṭ*). Four parts were for the Sulṭān, out of which he granted fiefs to his guards, officers and soldiers, 10 parts were for the amīrs, 10 for the mercenaries (*djundī*) but the amīrs also held a part of the fiefs for the mercenaries. The land was redistributed from time to time after a survey (at least once in 30 years) but frequently more often, if abuses prevailed, so that for example the highest amīrs got hold of very large estates and introduced a latifundian system or the smaller amīrs did not pass on the fiefs to the mercenaries. New surveys were also ordered by sulṭāns to give fiefs to their mamlūks. Sulṭān Lādjīn (696—698 = 1296—1298) for example took 14 *ḳīrāṭ* of the land for fiefs reserved for his guards. In the survey of Sulṭān al-Nāṣir Muḥammad of the year 715 (1315) 10 *ḳīrāṭ* were for the Sulṭān, 14 for the amīrs and their mercenaries. Another abuse first appeared in the first Mamlūk dynasty in the reign of the extravagant Sulṭān al-Kāmil Shaʿbān: the mercenaries exchanged or sold their estates to private individuals and in return paid considerable sums to the treasury. This practice was even sanctioned by the institution of a special office (*Dīwān al-Badal*). (See for further details, Sobernheim, *Matériaux pour un Corpus Inscr. Arab.*, ii. n°. 44). This abuse was however of short duration only; it is described by the chroniclers as a wicked, illegal, and arbitrary act. When Sulṭān Selīm I in 922 (1516) conquered Syria and Egypt, he had these lands resurveyed and divided as crown estates and fiefs according to the Ottoman principles. As elsewhere throughout the Ottoman empire the principle of inheritance was gradually introduced. Muḥammad ʿAlī was the first gradually to deprive the Mamlūks and the small vassals of their fiefs and to introduce a system of direct payment into the army. The Turkish Sulṭāns (see the article TURKEY) claimed a part of the conquered territory as their property and granted the yield of the taxes of whole districts (*liwāʾs*) to their grandees for life (MALIKĀNE-I MĪRĪYE, q. v.). The governor who was granted a fief in this way, received the ground tax and other dues, while he in return placed a certain number of soldiers at the Sulṭān's disposal according to the size of his estate: later he only paid a definite tribute to the Porte. It thus came about that the great pashas were often almost independent of the Sublime Porte. There arose for example small dynasties

in Syria at Ḥimṣ, Baʿalbek, in Lebanon and Nābulus. The smaller fiefs were called, according to their size, *zaʿāmet* (from *zaʿīm*, the leader of an army) and *tīmār*; the number of soldiers to be provided varied with the size of their booty. They were hereditary and were divided according to certain principles among the sons or heirs of the holder of the fief in return for military service. It may be said that almost the whole empire consisted of military fiefs. This circumstance which in course of time by its decentralising tendency brought about a weakening of the empire was gradually abolished by the reforms (*tanẓīmāt*) of Sulṭān ʿAbd al-Madjīd, which Sulṭān Maḥmūd II had gradually prepared the way for (1223—1255 = 1808—1839). The situation was definitely settled by the land legislation of 1856. General military service for Muslims had already been introduced in 1839. Certain hereditary fiefs granted to grandees of the empire, which every new Sulṭān has to confirm, still exist.

(M. SOBERNHEIM.)

IḲTIBĀS means to take a *ḳabas*, a live coal or a light, from another's fire (Ḳur. xx. 10; xxvii. 7; lvii. 13); hence to seek knowledge (*ʿilm*) and, as a technical term in rhetoric, to quote specific words from the Ḳurʾān or the traditions but without indicating them as quoted. If the source is indicated and the quotation is put into verse the figure is called *ʿaḳd*, "binding", and if it is verse, not Ḳurʾān or tradition, that is quoted, and in verse, the figure is *taḍmīn*, "inserting". In *iḳtibās* the original application of the words may be preserved or may be changed. As to the lawfulness of this there has been much dispute. The Mālikites generally pronounced it unlawful; but others allowed it under conditions, e. g. in preaching and prayer and praise (following the usage of Muḥammad), but not in verse, where it was disliked (*makrūh*). Yet others permitted such quotation, even in verse, if done in a right spirit. But it is altogether abominable to twist words referring to Allāh so as to make them refer to a creature; or to use any Ḳurʾānic words in light jesting. But, as a matter of fact, such quoting and alluding has been quite common, even in the most unseemly contexts as in *kutub al-bāh*, just as the doubt whether the *basmala* should be prefixed to poetry (Ibn Rashīḳ, *ʿUmda*, ed. Cairo, 1325, ii. 250) has had no practical consequences. The *Fihrist* (p. 104, 12) notes a *Kitāb al-Muḳtabas* by Madāʾinī (d. A. H. 215 or 225) and another by Marzubānī (p. 133, 15) but it is uncertain whether their *iḳtibās* was this technicality. In the *Asās al-iḳtibās* of Ikhtiyār al-Dīn (d. A. H. 928; Brockelmann, ii. p. 103) it is extended to cover proverbs, verses and even short *ḥikāyāt*.

(D. B. MACDONALD.)

AL-IḲWĀʾ (A.), a technical term in metre, meaning an error in prosody, which consists in the vowel of the vocalised, rhyme-forming, terminal consonant (*rawī*) being a *ḍamma* in one verse of a poem and a *kasra* in another, irrespective of whether the majority of the verses of the poem end in one or other of these vowels or not. According to al-Khalīl b. Aḥmad, *al-iḳwāʾ* means the presence of an unusual vowel with the rhyme-forming consonant, so that the verses end partly in *i* and partly in *ā* or *ū*. Other prosodists on the other hand call the insertion of verses with the terminal vowels *ū* or *ī* in a poem rhyming in *ā*, *iṣrāf* or *iṣfāf*.

(MOH. BEN CHENEB.)

ILĀH is undoubtedly the same as אֱלוֹהַּ and has the same problem of ultimate derivation (*Encyclopædia Biblica*, iii. coll. 3323 *sqq.*; Brown-Driver-Briggs, *Hebrew Lexicon*, p. 42 *sqq.*; Fleischer, *Kleinere Schr.*, i. 154 *sqq.*). Here only the Arabic side is considered. The pre-Muslim Meccans regarded *Allāh* as a proper name (*ism 'alam*) and this view is practically universal in Islām; for the arguments of the few who held that it was a descriptive noun (*ṣifa*) see Rāzī, *Mafātīḥ*, ed. Cairo, 1307, i. 83, 11 *sqq.* But, according to Rāzī (*loc. cit.*), al-Khalīl, Sībawaihi and the most of the formulators of the Muslim fundamentals (*al-uṣūliyūn*) held also that it had no derivation, was *murtadjal*. This Rāzī supports with various *a priori* arguments. Others, according to Rāzī, held that *Allāh* was of Syriac or Hebrew origin; others, of the school of al-Kūfa, that it was from *al-ilāh*; and others, of the school of al-Baṣra, that it was from *lāhā*, the infinitive of LĀH, "to be high", or "to be veiled". Of course, as to *al-ilāh*, "the Deity", Rāzī had no doubt that it had a derivation, although its usage had come to be practically as a proper name and equal to *Allāh*. Later Islām has decided that, while *Allāh* is a proper name, it is also derived (*mashtaḳḳ*, *manḳūl*) and most probably from *al-ilāh*, in some one or other of its meanings. *Al-ilāh*, then, would mean i. "the god already mentioned", the article being *li-'ahd*, ii. "the Deity", iii. it was softened to *Allāh* by frequency of usage and in that form came to be a proper name. But *ilāh*, "a god", still survived in the construct and undefined, as also *ālihat*, "gods", in the plural. Apparently *al-ilāh* does not occur in the Ḳur'ān as a form; but there are cases where *Allāh* has the same meaning. So in Ḳur. vi. 3, *wa-huwa 'llāhu fi 'l-samawāti*, "and he is the deity in the heavens" (cf. Zamakhsharī, *Kashshāf*, ed. Lees, p. 394); and in Ḳur. xxviii. 70, *huwa 'llāhu lā ilāha illā huwa*, "he is the deity than whom there is no deity" (cf. *Kashshāf*, p. 1064). Then later *al-ilāh* came back in the two senses noted above and was used and is still used by theological writers much as is our "the Deity". Eight derivations have been suggested for *ilāh* (Rāzī, i. 84—86; Baiḍāwī, ed. Fleischer, i. 4) but they practically reduce to the following: 1. *Aliha*, "worship", but, as Zamakhsharī points out (*Kashshāf*, p. 8), this with the v[th] and x[th] stems are derived from the noun. 2. *Aliha*, "be perplexed, confounded" — for the mind is confounded in the experience of knowing Allāh; *waliha* has the same meaning. 3. *Aliha ilā*, "turn to for protection, or to seek peace, or in longing", again *waliha* has the same meaning. For Allāh the school of al-Baṣra preferred the derivation from *lāha* in either of its two meanings, "to be veiled" or "to be lofty". Zamakhsharī mentions only 1 and 2, the latter being his choice; in 2 and 3 *waliha* may easily be more original; for the interchange cf. *Mufaṣṣal*, ed. Broch, p. 172, l. 20.

(D. B. MACDONALD.)

ILĀT, Arabic plural of the Turkish word *il* "people" (cf. Thomsen, *Inscriptions de l'Orkhon*, p. 15 and 135, N. 2) is the name given in the Persian administration to the tribes that have remained nomadic in the empire (syn. *ūlūs*); they are for the most part of Turcoman origin; liable to military service in case of war, they form the only cavalry in Irān (Muḥammad Ḥasan Khān, *Maṭla' al-Shams*, p. 29 *sqq.*), except for the regiment of Cossacks. They are also called *ḳara-ḳādir* (black tents) from the colour of their hair tents. Their hereditary chief is called *īlkhānī* "chief of the people"; he enjoys absolute authority and rules his clan in a way absolutely independent of the royal authority. They have teachers of the Ḳur'ān and of Persian poetry; this is all the education the nomads receive. When the course of the seasons requires the movement of the tribe, they strike their tents, their chief holds a review (*sān*); while the men on foot stand with a large stick in their hands and surrounded by their hunting dogs, the women and children sit on asses, males, and horses, their domestic chattels being loaded on camels. The nomads pay various revenues to the state: a tax for pasturage (*ḥaḳḳ-i čarā*), a certain number of camels and asses to be sent annually to the court, in addition to the usual presents; each tribe furnishes a regiment of infantry (*fawdj*) and a reserve squadron of irregular cavalry (*suwār-i radīf*).

The reforms at present planned by the Persian government aim at increasing gradually the number of tribes who have adopted a settled life, and forcing those who remain nomadic to make their migrations without damaging the interests of the settled tribes on their route. For Fārs, a council of the tribes is to be created on which the *īl-khānī*'s will be present in person or represented by delegates, in addition to representations of the great families and prominent personages of the region. This organisation will be later extended to the whole of Persia.

Les tribus du Fars* dans *Revue du Monde musulman*, xxii. 85 *sqq.*; do., *Essai sur l'administration de la Perse*, Paris, 1913, p. 53; Flandin et Coste, *Voyage en Perse*, i. 219; Curzon, *Persia*, ii. 112, 270. (CL. HUART.)

ILČI (T.) properly *ilči*, from the Uigur *il*, peace, alliance, and the suffix of nouns indicating profession, *-či*, = peace-maker, ambassador, plenipotentiary. The word *il* "peace", which is found in Mongol and Manchu, also occurs in Kutadghu Bilig, 3, 10 and *Kutadghu Bilig*, 154, 10 (Radloff, *Wörterbuch*, i. 826). In Turkey a distinction was formerly made between *büyük ilči*, ambassador, *ilči murakhkhaṣı*, minister plenipotentiary and *orta ilči*, resident minister. At the present day the diplomatic titles, the employment of which was fixed at the treaty of Vienna, are officially the following: for the first, *sefīr-i kebīr*; for the second *sefīr*. The Ottoman Empire has no resident ministers. It maintains embassies at Paris, London, Petrograd, Berlin, Rome, Vienna, and Teheran. The title

büyük ilči was nevertheless retained for ambassadors accredited to the Sublime Porte and that of *orta ilči* for ministers plenipotentiary (*Sālnāme*, 1325, p. 1072, 1078). The reception of these agents by the Sulṭān was formerly the occasion of extraordinary ceremony. Now they are content to follow the ordinary European usages. When Ferdinand of Austria sent Nicolas Jurischitz and Joseph von Lamberg (in 1530) on a mission, fifty *čawush* came to meet them half a league from Constantinople and conducted them to the ambassadors' caravanserai (*ilči-khān*), the ruins of which still exist in Stambul. They shut them in there by the Sulṭān's orders, but took care that they lacked nothing. Three weeks after their arrival they were ceremonially received in audience. The *ṣolak*, the court valets wearing golden headdresses, and 3000 Janissaries stood before the chamber of the *dīwān*, where the Grand Vizier, two other viziers, the Beylerbey of Rumelia, the two *ḳāḍī-'asker*, the three *defterdār*, and the secretary of State (*re'īs efendi*) awaited them; then the Chief Marshall and the High Chancellor introduced them to Sulaimān. The first envoy from the Porte to Vienna was a *čawush*, messenger of state or courier (1533), and the practice was continued of appointing ambassadors to foreign countries from this lower category of officials. In 1616 the judge of Galata, who was a negro, forced the ambassadors to pay capitation (*il caragio*, the word *kharādj* being then popularly used as a synonym of *djizya*, cf. Meninski, *Lexicon*, s. v.); it was necessary to produce the text of the capitulations to have this judgment of the ḳāḍī annulled by the Grand Vizier. In 1076 (1665) the first account of a mission was inserted in the annals of the empire, on the occasion of an embassy sent by Sulṭān Muḥammad IV, which included Ewliyā Efendi and Meninski. Von Hammer at the end of his *Histoire de l'Empire Ottoman*, xvii. 134 *sqq.*, has given a list of embassies sent by the Porte or received by it down to the peace of Ḳainardja.

Persia only has an ambassador in Constantinople (*safīr-i kabīr*). It was represented elsewhere by ministers plenipotentiary, envoys extraordinary (*wazīr-i mukhtār wa-ilči-i makhṣūṣ*) one for England, Germany, and Holland, one for Russia, and one for France and Austria.

Bibliography: Rycaut, *Present State of the Ottoman Empire*, trans. Briot, p. 268 *sq.*; von Hammer, *Histoire de l'Empire Ottoman*, iii. 245, v. 149, 179, xi. 275. (CL. HUART.)

ILDEGIZ, SHAMS AL-DĪN, Atabeg of Adharbaidjān, was originally a slave of the Saldjūḳ vizier al-Sumairimī, murdered in 515 or 516 (1121 or 1122) and afterward of Sulṭān Mas'ūd. The latter appointed him governor of Arrān, whereby he became one of the first amīrs in the kingdom. In this remote province he soon took up a more or less independent position and troubled himself little about his Saldjūḳ overlord. His marriage with the widow of Sulṭān Toghrul I gave him a favourable opportunity to champion the cause of his stepson Arslānshāh and raise him to the Saldjūḳ throne in 556 (1161) while he himself came forward as his Atabeg. Some amīrs, namely Ināndj in Raiy and Zangī in Fārs attempted to put up Muḥammad, a brother of Arslānshāh, against him; but their troops were not a match for those of Ildegiz and the plan soon failed miserably. Ildegiz finally got rid of his troublesome rival Inānḍj by assassinating him with the help of the vizier Sa'd al-Dīn Asa'd al-Asḥall, who as a reward was made vizier to Pahlavān, son of Ildegiz. Ildegiz, who had several times to wage difficult wars with the Georgians (cf. the additions to Ibn al-Ḳalānisī, ed. Amedroz, p. 361 *sq.*), thus became the virtual ruler of the Saldjūḳ empire, and firmly established the rule of his family in Adharbaidjān. According to Ibn al-Athīr, he died in 568 (1172) at Hamadhān in the same month as his wife, Toghrul's widow. If the tomb at Nakhdjuwān described by M. Hartmann (*Deutsche Bauzeitung*, 1899, off-print, p. 21) is that of this princess, her name was Mu'mina Khātūn; but the writer's view that Ildegiz had the tomb erected is contradicted by the date 582. The *laḳab* Shams al-Dīn's proves nothing, because Ildegiz's son Pahlavān [q. v.] also bore it. Cf. Awfī, *Lubāb al-Albāb*, ed. Browne, I, 356 *sqq.* Dawlatshāh, ed. Browne, p. 117, however, says that both Ildegiz and his wife were interred in Hamadhān.

Bibliography: Ibn al-Athīr, ed. Tornberg, xi., see Index; *Ta'rīkh-i Guzīda*, ed. Browne, p. 472; Mīrkhwānd, *Rawḍat al-Ṣafā*, Lucknow, 1891, ii. 201 *sqq.* (= *The History of the Atabaks of Syria and Persia*, ed. Morley, p. 10 *sqq.*).

ILEK-KHĀNS, a Turkish dynasty in Central Asia, iv.th—vi.th (x.th—xii.th) centuries. From this house which ruled the lands north and south of the Thian-Shan came the first Turkish conquerors of Mā warā' al-Nahr in the Muslim period; the first monument of Muslim literature in Turkish, the *Ḳudatḳu-Bilik* or *Ḳutadghu Bilik*, was written about 462 = 1069-1070 for a prince of this dynasty. In Persian histories the dynasty is usually called "family (*āl*) of Afrāsiyāb (q. v., i. 175[b]) sometimes also "Khāns of Turkistān", the name "Īlek princes" or "Īlek-Khāns" was introduced by European numismatists (Tornberg and especially Dorn) from a title peculiar to this dynasty, which, however, is not by any means borne by all its rulers, and which it seems cannot be traced in Muslim literature at an earlier or later period. In the pre-Islamic period the word appears as a princely title among the Eastern Turks; cf. the expression "*ilig khān mshīkhā*" in the Christian text publ. by F. W. K. Müller (*Uigurica*, Berlin, 1908, p. 6). The pronunciation and etymology of the title is uncertain; the historians and the coins have *ilik*, sometimes also *ilik* and *alik*, the Uigur ms. of the *Ḳutadghu-Bilik*, *elik* or *ilik*, the Arabic (both the Cairo ms. and the newly discovered ms. of Namangan in Farghāna) *ilik*; cf. W. Radloff, *Wörterbuch*, i. 816, "if this word were pronounced *ilik*, it could be connected with *ilk*, "the first". Naṣr b. 'Alī (d. 403 = 1012-1013), the conqueror of Mā warā' al-Nahr was the "ilek" or "ilek-khān" *par excellence*; the title was used later also mainly by the kings of Mā warā' al-Nahr (cf. Baihaḳī, ed. Morley, p. 631 infra) but only so long as there were nominally at least the relations of vassal and overlord between them and the Khāns of Kāshghar. The expression "the khān (or the khāns) and the ilek" is frequently used (e. g. Baihaḳī, p. 844 *sq.*); the "ilek" is thus not the "khān", but a prince subordinate to him, just as the *ilik* introduced in the *Ḳutadghu-Bilik* as the personification of justice is not called "khān" but "beg". After the rulers of Samarkand had definitely assumed the title of Khān and founded an independent kingdom, the title *ilek* disappears from their coins. The word *ilek* is mentioned for

the last time about 1130 A. D. as the name or title of the ruler of Balāsāghūn (q. v. i. 615ᵃ).

The historical references to the "family of Afrāsiyāb" are very scanty; the limits of the kingdom as well as of the individual principalities, of which it consisted, are difficult to determine; the dates also are mostly uncertain; even the coins leave much to be settled here. The kingdom was never actually ruled by one man; feuds between individual members of the dynasty were usually settled by force of arms, frequently with foreign assistance. This state of affairs was first taken advantage of by the Ghaznavids (q. v., ii. 154 *sqq.*) and later by the Saldjūḳ sulṭāns for their own purposes: of the latter, Malik Shāh and his son Sandjar exercised a kind of suzerainty over the princes of Samarḳand as well as over those of Kāshghar; after the battle in the year 536 (1141) this suzerainty passed to the heathen Ḳara Khiṭāi (q. v.). The downfall of the dynasty in Mā warā' al-Nahr (c. 609 = 1212—1213) as well as in Kāshghar (about the same time) was brought about by the rebellion of the Muslim population against the Ḳara Khiṭāi and the resultant fighting.

ĪLGHĀZĪ (i. e. champion of the people) is the name of two Saldjūḳ semi-independent rulers of the Ortoḳid dynasty who attained power in northern Mesopotamia.

1. NADJM AL-DĪN ĪLGHĀZĪ I B. ORTOḲ. He was first of all a supporter of his brother-in-law Tutush in his struggle for the throne of the Saldjūḳ empire of Persia. After Tutush's defeat and death (488 = 1095) he withdrew to Jerusalem which he had received as a fief from Tutush jointly with his brother Sukmān. The two brothers had however after a 40 days' siege to surrender Jerusalem to the Egyptians (Sha'bān 489 = July-August 1096). At a later date (from 493 = 1100) Īlghāzī joined the new pretender Sulṭān Muḥammad, who appointed him governor of Baghdād in 494 (1100-1101). He held this important office for four years, ultimately in the service of Sulṭān Barkyaruḳ and his son Sulṭān Malikshāh.

When Sulṭān Muḥammad dismissed him from the governorship of Baghdād in 498 (1105), he fell out with this ruler. Between 498 and 501 (1105 and 1107-1108) Īlghāzī captured the hitherto impregnable fortress of Mārdīn, one of the most important in the whole of the nearer east, and in 501 we find him also lord of Naṣībīn. In 504, 505, 506-7 and 508 (1111, 1112, 1113 and 1115) he refused to perform military service in the war, which the Muslim amīrs of the west were conducting against the Crusaders in Mesopotamia and Syria by Sulṭān Muḥammad's orders. During the last of these campaigns he with two of his nephews even attacked the commander-in-chief of the Muslim armies Aḳsonḳor al-Bursuḳī (q. v., i. 226ᵇ *sq.*) and defeated him (May 1115), but then fled to Syria and together with Tughtegin concluded a truce injurious to the Muslim cause and even agreed to join arms with the Franks. Tughtegīn and Īlghāzī brought 10 000 Muslims to the 2 000 Franks. The Frank-Muslim allies encamped together till August at Apamea and Shaizar in face of the new commander-in-chief, Bursuḳ b. Bursuḳ, sent by Sulṭān Muḥammad to fight the Crusaders, without however it coming to a battle between Bursuḳ and the allies. Shortly after (August or September 1115) Īlghāzī, while on his way back to Mesopotamia, was captured at al-Rastan (between Emesa and Ḥamā; Yāḳūt, ii. 778) by Khīrkhān, one of Sulṭān Muḥammad's generals, but released after some time for fear of Tughtegīn. Īlghāzī managed to get on very well with the Saldjūḳ government after the death of Sulṭān Muḥammad and the accession of his son, Maḥmūd.

Lu'lu', the governor of Aleppo, was murdered towards the end of 510 (1117). Owing to internal disputes the town and district of Aleppo were exposed to the inroads and depredations of the Franks. After Īlghāzī had temporarily occupied Aleppo in 511 (1117), he was appealed to in the following year by its inhabitants as their last hope and recognised as prince of Aleppo (Ibn al-'Adīm Kamāl al-Dīn). Īlghāzī in the second half of 512 (1118) succeeded in definitively gaining possession of Aleppo and thus became a neighbour of the Franks, against whom he at once made energetic preparations. The numerically weaker Franks were outflanked on June 28 1119 by his army of 20 000 men in the valley of Tell 'Afrīn, taken by surprise and for the most part cut to pieces or taken prisoner. Among those who fell was Roger, Prince of Antioch. It was one of the greatest battles which the Muslims had so far won against the Crusaders (the village of Balāṭ, after which the battle is often called, appears in Ibn al-'Adīm as Roger's camp on the night of June 20 1119, eight days before the decisive battle). Antioch now lay defenceless at Īlghāzī's feet; but he neglected to take the city.

The reputation of Īlghāzī's military ability now penetrated far and wide and he received the chief command over the Muslims in the war which Sulṭān Maḥmūd was waging in person against the Christian Georgians. Īlghāzī suffered a very severe reverse (Kamāl al-Dīn, *Ta'rīkh Ḥalab*, 512 = 1121; Ibn al-Athīr *al-Kāmil*, 514 = 1120) which resulted in the loss of Tiflis to the Georgians. In 516 (1122) he was granted Maiyāfāriḳīn by the Sulṭān in addition to his other lands.

Soon afterwards on Ramaḍān 516 = November 3 1122 (Ibn al-Ḳalānisī; Ramaḍān 6, al-Fāriḳī; Ramaḍān 17) Īlghāzī died at the age probably of barely 60 at Maiyāfāriḳīn (Ibn al-Athīr and Abu 'l-Faradj; 'Adjlain on the road from Mārdīn to Maiyāfāriḳīn, according to Ibn al-'Adīm, *Recueil des Historiens des Croisades*, iii. 634; al-Fuḥūl, according to Ibn al-Ḳalānisī; on the way from Aleppo to Maiyāfāriḳīn, according to Michael the Syrian). At his death he was in possession of Maiyāfāriḳīn, Mārdīn, Aleppo and apparently also of Naṣībīn. He was buried at Maiyāfāriḳīn (for further details see the historian of this town, quoted in Amedroz's foot-notes to al-Ḳalānisī). Īlghāzī possessed an influence unequalled at that time over the Turkomans of Mesopotamia. He was a bold and ambitious personality, who claimed a leading position wherever he appeared. He was not a general of great genius; it is said that his drinking habits affected his military decisions. He

struck no coins so far as is known (I. Ghālib Edhem, *Catalogue des Monnaies turcomanes*, Constantinople 1894, p. 82). He married a daughter of Tughtugin, Il-Khātūn, and later during his rule over Aleppo also Farkhunda Khātūn, a daughter of the former Saldjūḳ ruler there, Riḍwān. We know the names of several of his children: the daughters Gulnar, (al-Fāriḳī: Kumār) Khātūn, who married the Arab chief Dubais b. Ṣadaḳa in 513 = 1119-1120; Yumna Khātūn, the wife of the Inālid Il-Aldī, lord of Āmid, who died in 536 = 1141-2; Ayāz, died 508 = 1114-1115, Sulaimān, Timurtāsh and Shihāb al-Dīn Maḥmūd (?); an other daughter Ilghāzī whose name is not known married in 495 = 1101-1102 an unnamed son of Tekish, a brother of the great Sulṭān Malikshāh. Ilghāzī was one of those Muḥammadan amīrs who were the first to check the advance of Crusaders to north and east before the time of Zangī and Saladin. Ilghāzī I was the founder of the Ortoḳid dynasty of Mārdīn which survived till 811 = 1408.

2. ḲUṬB AL-DĪN ILGHĀZĪ II, the son of Nadjm al-Dīn Alpi (probably another form of Alp-Bey) and a sister of the Turkish ruler of Armenia, Sukmān II, succeeded his father in 572 = 1176-1177, Michael the Syrian: July 20 1176) in the rule over Mārdīn, Maiyāfāriḳīn, and Ra's al-ʿAin (in Ibn al-Athīr, xi. 268, however, he appears as early as 569 in possession of Ra's al-ʿAin). We have only scanty information about his reign. He first of all oppressed his two paternal (according to another tradition, maternal) uncles, the rulers of Hānī (also written Hāna, the modern Hēne, north of Āmid) and Dārā, till they recognised his suzerainty as they had done that of his father: the two uncles appeared at Mārdīn and paid homage to Ilghāzī II. Soon afterwards the latter fell ill. On his recovery he subdued the Arabs who had become turbulent and is said — according to a statement which is probably exaggerated — to have killed several thousands of them and to have taken 12 000 camels from them. He proceeded to extend his sway towards the Euphrates in the district of Bīra (the modern Biredjik). His uncle Sukmān II seems to have had great influence over him. Ilghāzī for example joined the alliance which was concluded towards the end of 578 (beginning of spring 1183) by Sukmān II and ʿIzz al-Dīn Masʿūd I of al-Mawṣil (a cousin of Ḳuṭb al-Dīn Ilghāzī) with the intention of checking Saladin's advance into Mesopotamia. The allies, however, found themselves helpless in face of Saladin's successes and, after the death of Sukmān II, we find Ilghāzī's troops in the army of Saladin in Syria (Ṣafar 580 = May-June 1184). Ilghāzī II died soon after at the beginning of Djumādā II 580 = Sept. 9 1184. His principality in addition to the areas mentioned also included Dunaisir. His name is mentioned in an inscription on the minaret of a mosque at Mārdīn dated in the year of his accession, but the credit of building it however is given to his father Alpi. On the coins struck by Ilghāzī (bronze only, which are called dirhams, are known) he calls himself "King of the Amīrs" (Malik al-Umarā) and, like other Ortoḳid rulers of Mārdīn before and after him, Shāh Diyār Bakr, although he did not rule in Āmid, the metropolis of this district. Ilghāzī II left two sons Ḥusām al-Dīn Yoluḳ Arslān, and al-Malik al-Manṣūr Nāṣir al-Dīn Ortoḳ Arslān, who succeeded their father in turn. Niẓām al-Dīn Alpḳush, one of Ilghāzī's slaves, married his widow, while one of his daughters was married to Saladin's son, al-Malik al-Muʿizz, about the end of Djumādā I 578 (Sept.—Oct. 1182) or a little later.

SÜSSHEIM.)

ILHĀM means literally "to cause to swallow or gulp down" (*Lisān*, xvi. 20, especially last two lines). In the Ḳur'ān it occurs only in xci. 8 — a celebrated but difficult passage — *fa-alhamahā fudjūrahā wa-taḳwāhā*, "then he (Allāh) made her (a *nafs*) swallow down her sins and her godly fear". The oldest exegetical tradition (Ṭabarī, *Tafsīr*, xxx. 115 *sq.*) gives two explanations: i. Allāh explained these to the *nafs*; ii. Allāh created these in the *nafs*. The Muʿtazilites chose the first (Zamakhsharī, *Kashshāf*, ed. Lees, p. 1612) but orthodox Islām generally chose the second, the almost certainly correct view. Thus Rāzī (*Mafātīḥ*, ed. Cairo, 1308, viii. 438) and Naisābūrī (margin of Ṭabarī, p. 100) But Baiḍāwī (ed. Fleischer, ii. 405) follows Zamakh-

djurī and Abu 'l-Su'ūd (margin of Rāzī, p. 273) follows Baiḍāwī; cf. Brockelmann, *Geschichte*, ii. 439. But by far the most important use of *ilhām* is in connection with the doctrine of saints. Allāh reveals himself in two ways: to men individually by knowledge cast into their minds, and to men generally by messages sent through the prophets. The first, individual, revelation is *ilhām*; the second, and general, is *waḥy*. Saints, especially, are the recipients of this *ilhām*, because their hearts are purified and prepared for it. It differs from intellectual knowledge (*'ilm 'aḳlī*) in that it cannot be gained by meditation and deduction; but is suddenly communicated while the recipient cannot tell how, whence or why. It is a pure gift from the generosity (*faiḍ*) of Allāh. It differs from *waḥy* only in that the angel messenger who brings *waḥy* may be seen by the prophet and that *waḥy* brings a message to be communicated to mankind, while *ilhām* is for the instruction of the recipient. From *waswās*, or satanic whispering in the heart, it differs in respect of the causer — an angel as opposed to a devil; and in the things to which it incites — good as opposed to evil (Ghazālī, *Iḥyā'*, ed. with comm. of Saiyid Murtaḍā, vii. 244 *sqq.*, 264 *sqq.*; D. B. Macdonald, *Religious Attitude and Life in Islam*, p. 252 *sqq.*, 275 *sqq.*). But while the fact of *ilhām* was universally admitted, even Ṣūfīs raised the question of the certainty of the knowledge given by it. So Hudjwīrī (*Kashf al-maḥdjūb*, transl. Nicholson, p. 271) contends that *ilhām* cannot give assured knowledge (*ma'rifa*) of Allāh; but Ghazālī would probably have said that Hudjwīrī was using *ilhām* in the sense of an idea which one found in his mind, and not of the flashing out of the divine light on the soul which, once experienced, can never be mistaken. Others taught that, while it was sufficient for the recipient, it could not be used to convince others or reckoned as a source of knowledge for men in general. This appears to have been Nasafī's position; see his *'Aḳā'id* with commentaries of Taftāzānī and others, ed. Cairo 1321, p. 40 *sq.* A very curious use is by Ibn Khaldūn in the sense of "instinct" (*Muḳaddima*, ed. Quatremère, ii. 331, transl. de Slane, ii. 384) but this, though a natural development, does not seem to have been taken up by others. Yet Ibn Ḥazm speaks of *ilhām* as a *ṭabī'a* and refers as an illustration to Ḳur. xvi. 70 on the instinct of bees (*Milal*, v. 17).

ILI, a large river in Central Asia. Both the rivers Tekes and the Kunges which join to form it, rise in the northern slopes of the Thian-Shan; after their junction the river is called the Ili and then has a course of about 600 miles till it runs into Lake Balkhash (q. v., i. 624). At some places it is over half a mile broad. The upper course of the Tekes and the lower course of the Ili belong to the Russian empire, the Kunges, the lower course of the Tekes, and the upper course of the Ili to the Chinese empire. The river has several tributaries, of which the most important are the Kash in Chinese territory and the Čarin and Čilik in Russian territory. As usual in Central Asia, the tributaries are of greater importance for irrigation than the main stream. As soon as the river leaves the mountains and flows into the broad plain and no longer receives tributaries, it practically loses all importance for agriculture. The number of canals led from the Ili on Russian territory is extremely small, but there is one called Aḳ-Čaghan as far down as the lower course of the river, about 15 miles from its mouth; agriculture is there pursued by the Kirgiz.

The Ili is first mentioned in the history of the Chinese T'ang dynasty (vii.—ix. century A. D.). One of the main roads from China to Turkestan led even in those days through the Ili valley (E. Chavannes, *Documents sur les Tou-kiue (Turcs) Occidentaux*, St. Petersburg, 1903, p. 11 *sq.*). The oldest Muḥammadan source to mention the river is the *Ḥudūd al-'Ālam* (372 = 982-3); in it and in most later works the name is written Ilā. How and when Islām reached here is not known. In the vii.th (xiii.th) century the Ili valley is described as the boundary of the Muslim world. The lands to the east of it were only won for Islām in the Mongol period. On the Muḥammadan principality which then existed there, the civilisation of the upper Ili valley in the vii.th—viii.th (= xiii.th—xiv.th) centuries, on the decline of this civilisation and its restoration more recently under the rule of the Calmucks and Chinese, on the last Muḥammadan movement and its consequences, and the partition of the country between Russia and China see the article ḲULDJA.

Still more scanty are the historical notices of the other parts of the river valley. The name Kunges first appears in the history of Tīmūr's campaigns (*Ẓafar-Nāma*, Ind. ed., i. 481, where it is written Ḳünges); the Tekes is mentioned about the same time under the name Teke (in mss. also Yaka). The valleys of the two rivers have always been highly esteemed by nomads as pasture ground. The post route which now crosses the Ili at the village of Ilijskij vîselok (the only bridge over the river is here) seems roughly to correspond to the road described by Rubruk in 1253. North of the Ili and south of the mountains (obviously south of the pass of Altin-Imel) there was, according to Rubruk, a town inhabited by Persian speaking Saracens, which he calls Equius (*Recueil des Voyages*, etc., iv. 280 *sq.*; F. Schmidt, *Über Rubruks Reise*, Berlin, 1885, p. 42). From its situation it is the same town which is called at the same time by the Armenian king Hethum Ilanbalekh and is called by the Chinese I-la-ba-li or I-li-ba-li i. e. Ili-Balïḳ "town on the Ili" (E. Bretschneider, *Mediaeval Researches*, etc. i. 169). The same name is used by the Chinese in the xv.th century as that of a district, and it is expressly stated that there are no towns there and that the population consists entirely of nomads (ibid., ii. 242). Below the high road the river breaks through a chain of porphyry rocks where there are Buddhist inscriptions and sculptures of the Calmuck period (xvii.—xviii. centuries); the rocks are therefore called Tamgali-Tas (inscribed stones) by the Kirgiz (N. Pantusow and A. Pozdnejew in *Zapiski Vost. Otd. Arkh. Obshč.*, vi., 273 *sq.*, with two plates). About a hundred miles below Ilijskij vîselok a dried river bed, the Bakanas, runs off from the modern river and reaches the Balkhash in three arms. There are said to be traces here of old canals and ruins of

ancient buildings (L. Berg, in *Izvěstiya Imp. Russkago Geogr. Obshč.*, xl. 590). To what period and people these remains are to be attributed is doubtful, as the literary sources are absolutely silent as far as is known (we may however here add to the article BALKHASH, i. 624b, that the lake is mentioned in the *Zafar-Nāma*, Ind. ed., i. 496, under the name Atrāk Köl). So far no inscriptions have been found there either.

The Ili like all Central Asian rivers is little suited for navigation and has so far not attained any importance in this respect, although several attempts have been made: cf. for example the voyage of L. Berg up the river from Ilijskij vise-lok to Lake Balkhash in 1903 (*op. cit.*, p. 588 *sq.*)

(W. BARTHOLD.)

ILIYĀ' [see AL-ḲUDS.]

IL-KHANS, Mongol dynasty in Persia, vii.th-viii.th (xiii.th-xiv.th) century. On the foundation of the kingdom and the meaning of the title of its rulers see the article HÜLĀGŪ (ii. 332b *sq.*); on the later rulers see the articles ABĀḲA (i. 4), ARGHŪN (i. 430a), GAIKHĀTŪ (ii. 128), BĀIDŪ (i. 591), GHĀZĀN (ii. 149b *sq.*) and ABŪ SA'ĪD (i. 103b *sq.*). With the death of the latter on Rabī' II 736 (Nov. 30 1335), the main branch became extinct in the male line; till 754 = 1353-1354, several princes, mainly from branch lines and even a princess, Sāti-Beg, sister of Abū Sa'īd 739-740) ascended the throne, but were not generally recognised. Some historians also include the Djalāir (i. 1003a) among the Ilkhāns; in reality these were only connected with their predecessors in the female line (Ḥasan the founder of the dynasty was through his mother a grandson of Arghūn).

The kingdom of the Ilkhāns at the time of its foundation included all the lands from the Oxus to the Indian Ocean and from the Indus to the Euphrates, with the addition of a great part of Asia Minor and the Caucasus countries. Later some lands in the east were lost to the Čaghatai (i. 813 *sq.*); on the other hand, the local dynasties, which were at first maintained in South Persia and Asia Minor, were gradually swept away and replaced by governors appointed by the Ilkhāns. The attempts to take Syria from the Egyptian Sulṭān met with no success. In Persia itself, in spite of the inevitable consequences of the Mongol conquest and misgovernment of most rulers, this period was in many ways one of progress. After the conquerors under Ghāzān-Khān had definitively adopted Islām new cities arose under their rule such as the extended Tabrīz and the new foundation Sulṭāniya, and splendid edifices like the mausoleum of Khān Öldjäitü in Sulṭāniya were built. The Mongol rulers naturally had little interest in Muslim theology or Persian belles-lettres; on the other hand, under their patronage the writing of history in Persia developed to an extent unknown before, so that we are much better acquainted with this period than with the events of preceding centuries. Among sciences astronomy, medicine, and mathematics were specially favoured.

(W. BARTHOLD.)

'ILLIYŪN is mentioned in the Ḳur. 83, 18, 19 where it may be a place or a book. It is generally supposed to be a name of the seventh heaven, or of the register of the good deeds of the pious. For the various explanations see Lane's *Lexicon*, p. 2125 and 2147, and the commentaries on the passage. The word is regarded as a regular plural, or as a plural without a singular; but it is no doubt the Hebrew word *'elyōn* (Gen. xiv. 18, etc.).

Bibliography: The Commentaries on the Ḳur'ān.

(T. H. WEIR.)

'ILM is the broadest word in Arabic for "knowledge". In the lexicons it is often equated with *ma'rifa* and *shu'ūr* (Lane, p. 2138c), but there are marked distinctions in usage. The verb governs one or two accusatives as it indicates knowledge of a thing or of a proposition (German *kennen* and *wissen*). But *ma'rifa* is "coming to know by experience or reflection", and implies preceding ignorance. It thus cannot, unmodified, be used of Allāh's knowledge. Yet some contested this on the basis of actual occurrences of the word used of Allāh (*Kifāyat al-'Awāmm*, ed. Cairo 1315, p. 11). *Shu'ūr* is "perception" especially of details, the *shā'ir* is the "perceiver", "feeler", and thence "poet". Another early distinction has already been pointed out by Goldziher in his article on Fiḳh (vol. ii. 101 above). *'Ilm*, in its early usage, was knowledge of definite things (Ḳur'ān, *tafsīr*, *aḥkām*) but *fiḳh* was the independent exercise of the intelligence. So *faḳīh* (*fuḳahā'*), was one who was thus intelligent, but that word has come now to indicate a minor canon lawyer or casuist, while *'ālim* (*'ulamā'*), following a broadening of the meaning of *'ilm* to "science" and of *al-'ulūm* to "the sciences", has come to mean a scholar in a wide sense and especially one using intellectual processes. Against this change of meaning there is a vigorous protest by Ghazālī, in his *Iḥyā'*, Book i., *Bāb* 3, who denounces especially that the praises which have come down of the *'ālim* as to Allāh, should be applied to these dialecticians and canon lawyers. Further, this brought the *'ālim* into sharp distinction on another side from the *'ārif*, who is the mystical knower by immediate experience and vision, almost, but not quite the same as gnostic. For this distinction of *'ilm* and *ma'rifa* in Ṣūfī theology see Ḳushairī's *Risāla*, ed. Cairo, 1290, with comm. of Zakariyā, iv. 60 *sqq.* But when *'ilm* became philosophical it had to submit itself to the system of the scholastic theologians (*mutakallimūn*). They gave it a place in the scheme of Aristotelian predicaments (*al-maḳūlāt*). There it is an *'araḍ* ("accident", in the sense of the older logicians), one of those characterized by life (*mukhtaṣṣ bil-ḥayāt*), coming (along with will, power etc.) in the class of the modalities (*kaifīyāt*) of the *nafs*, the lower or appetitive soul (*Mawāḳif* of Īdjī with comm. of Djurdjānī, ed. Būlāḳ, 1266, pp. 272 *sqq.*; *Dict. of Techn. Terms*, p. 1061, cf. pp. 1055—

1006). It is divided into eternal (*ḳadīm*) and originated (*ḥādith*, *muḥdath*), according as it exists in God or in a creature, and there is no resemblance (*shabah*) between these two. Originated knowledge is of three kinds: intuitional (*badīhī*), necessary (*ḍarūrī*), by the evidence of the senses and by unanimous assertion (*khabar mutawātir*), deductive (*istidlālī*). See the *'Aḳā'id* of Nasafī with the commentary of Taftāzānī and others, ed. Cairo, 1321, pp. 18 *sqq.*, and for a number of short definitions of *'ilm* see the *Ta'rīfāt* of Djurdjānī, *sub voce*. Those scholastic theologians who distinguished between *'ilm* and *ma'rifa* used *'ilm* of compounds and universals and *ma'rifa* of simple things (*basā'iṭ*: see *basīṭ* in Djurdjānī's *Ta'rīfāt*) and particulars (Taftāzānī on Nasafī, p. 40). Another distinction enters in the relation of *'ilm* to *'amal*, "works" in the theological sense. There is *'ilm naẓarī*, such as knowledge of things; when you know them you have done every thing. But opposed to it is *'ilm 'amalī*, knowledge of religious duties (*al-'ibādāt*); your knowledge is not complete until you have acted upon it (Rāghib, *Mufradāt*, p. 348). This is put rather differently in the *Tanwīr* of Kurdī (ed. Cairo, 1306, p. 193). It is the duty of every Muslim to seek knowledge; therefore he who knows and acts on his knowledge has two acts of obedience to his credit; if he neither knows nor acts, he has disobeyed twice; if he knows and does not act, he has obeyed once and disobeyed once. This in the end joins the question as to what is saving faith (*īmān*).

For a descriptive classification of all the arts and sciences which have been reduced to writing (*al-'ulūm al-mudawwana*) see *Dict. of Techn. Terms*, pp. 1—33. Ibn Khaldūn in his *Muḳaddima* (*Faṣl* v. vi.) deals with these more historically and philosophically in their development and their relation to the essential facts of life (De Slane's transl., ii. 319 *sqq.*; Quatremère's text, ii. 272 *sqq.*). But with regard to all sciences there is a fundamental distinction. They are divided into those praiseworthy and those blameworthy (*al-maḥmūda wa 'l-madhmūma*), and among the blameworthy are reckoned those which are not useful for this world or for that to come. The basis is the frequently quoted tradition: "It is of the beauty of a man's Islām that he leaves alone what does not concern him" (*mā lā ya'nīhi*). The religious Muslim should therefore avoid such sciences as are not demonstrably useful for this life or for his eternal salvation (Ghazālī, *Iḥyā'*, Book I, *Bāb* 2; Ibn Khaldūn, *Muḳaddima*, ed. Quatremère, iii. 136; Goldziher, *Muh. Studien*, ii. 157, and review in *Zeitschr. d. Deutsch. Morgenl. Ges.*, lxvii. 532; Hudjwīrī, *Kashf al-Maḥdjūb*, transl. Nicholson, p. 11).

Bibliography is given above.

(D. B. Macdonald.)

ILTUTMISH, Shams al-Dīn, the slave and afterwards son-in-law of Ḳuṭb al-Dīn Aibeg [q. v.], who made him governor of Badā'ūn [q. v.]. After the death of Ḳuṭb al-Dīn Aibeg in 607 (1210), his adopted son Ārām Shāh succeeded to the throne, but some of the nobles conspired against him and invited Iltutmish to come to Dihlī; Ārām Shāh marched from Lāhōr to meet him, but was defeated and apparently put to death. Iltutmish had to contend with rival chiefs before he succeeded in firmly establishing his authority; in 618 he resisted the attempt of the unfortunate Djalāl al-Dīn Mangubertī [q. v.] to set up a kingdom in India; later on by a series of successful campaigns he extended his dominions so as to include Lakhnawti (in 622), Sindh (in 625), and Gwalior (in 630), and his expeditions into Mālwa (in 631—2) brought all India north of the Vindhya Mts. under his sway. He was the first of the Muhammadan princes of India to receive recognition from the Caliph of Baghdād (al-Mustanṣir bi'llāh), and on his coins and in his inscriptions after 626, he styles himself Nāṣir Amīr al-Mu'minīn. He continued the building of the great Ḳuṭb Minār [q. v.], which his predecessor had begun.

Bibliography: The best account of Iltutmish is given by his contemporary, Minhādj-i-Sarādj, *Ṭabaḳāt-i-Nāṣirī*, trans. H. G. Raverty, (Index s. v. Iyaltimish); Elliot-Dowson, *History of India*, (Index s. v. Shamsu-d din Altamsh); E. Thomas, *Chronicles of the Pathan Kings of Dehli*, p. 41 *sq.*; S. Lane-Poole, *Mediaeval India*, p. 70 *sq.*; J. Horovitz, *The inscriptions of Iltutmish* (*Epigraphia Indo-Moslemica*, 1911—2).

ILYĀS, the Biblical prophet Elias, is twice mentioned in the Ḳur'ān. In Sūra vi. 85 he is mentioned with Zakariyā', Yaḥyā, and 'Īsā as one of the *ṣāliḥūn* without further details. In Sūra xxxvii. 123—130 his history is related in the fashion which is stereotyped for all stories of prophets in the Ḳur'ān. That Muḥammad however knew something more of him is clear from the mention of the Ba'l, which is differently interpreted by the commentators, sometimes as lord, sometimes as an idol who has given his name to the town of Baalbek, sometimes as a woman whom the Israelites served. Verse 130 calls him Ilyāsīn which has given rise to much conjecture; it is however clear from the context that this name was only formed by Muḥammad with his usual freedom to get a rhyme in *-īn*. The commentaries on Sūra xxxvii. 123 *sqq.*, as well as the universal historians and the collectors of legends of the prophets give the following about Ilyās. He lived in the reign of king Aḥāb (Laḥdjab in al-Tha'labī) and his wife Izabel (variously written). Aḥāb used to follow Ilyās, but the Israelites were worshippers of the Ba'l. One day, however, Aḥāb cast him off saying that the kings who served gods had as much success as he had. Astonished at this Ilyās prayed God to give him power over the rain. Thereupon a drought arose which lasted three years; Ilyās concealed himself during this period but was provided with food. He cured Alīsa', the son of a widow, who became his disciple. At the end of the three dry years God reproached him with causing the deaths of many innocent persons by his severity. Thereupon Ilyās proposed to the Israelites that they should appeal to their gods for help and, if they did not hear, they should return to God. The gods could not hear their worshippers and at Ilyās' prayer the desired rain fell. The Israelites however were not converted. Enraged at this obduracy, Ilyās begged God to take him up. When he came out with his disciple Alīsa', a fiery horse appeared. Then Ilyās ascended amid the cries of Alīsa'. God transformed him; he became a feathered being of light exalted above all human passions, half angel and half man, of earth and heaven at the same time. This is the version of al-Ṭabarī.

Al-Tha'labī is much more detailed. According to him, Queen Azbīl (Jezebel), the representa-

tive of Lādjab, is the incarnation of all wickedness. Her chancellor however is a pious man, who conceals his faith. As in the Bible, here also, the story of Naboth (Naboth is called Mardakī, obviously an echo of Mordechai) is the cause of Ilyās' exhortation and the king's wrath. Ilyās conceals himself for seven years in ravines. Thereupon Lādjab's most beloved son falls ill. Four hundred priests of Baal set out to slay Ilyās, the alleged cause of his illness. The latter, however, instils them with such respect that they return full of awe. Lādjab then sends 50 soldiers who call out to Ilyās that they have been converted. The latter prays God to consume them with fire, if they are lying. This happens and a second body of soldiers meets the same fate. Finally, Lādjab sends the believing chancellor to the queen with a free conduct and with a treacherous troop. At God's advice Ilyās goes with him to save the chancellor. On the arrival in the palace the child dies, so that the king forgets Ilyās and the latter is able to depart unnoticed. As he wearies of his stay in the mountains he enters the house of the mother of the prophet Jonah who, being then a child, was raised from the dead by Ilyās. He then goes back to the mountains and begs God to give him power over the rain for seven years. He is only granted it for three years during which he himself is fed by the birds. The whole of Israel has now to suffer famine, only one widow is supplied in a miraculous fashion by Ilyās with meal and oil. The rest of the story of Ilyās, the healing of Alīsa', etc. is practically the same as that of al-Ṭabarī. Here also Ilyās is described as half mortal and half heavenly, appearing to men on earth. Al-Tha'labī tells of a man who met Ilyās in Palestine; after talking to him he went away on his camel.

There is another Elias story in the Ḳur'ān, although the name is not mentioned and the person who here takes the place of Elias is not identified by tradition with him, but with al-Khaḍir. In Sūra xviii. 64 *sqq.* it is related how Mūsā and his servant while fishing met a servant of God whom Mūsā wished to follow. The unknown one however replied that Mūsā had not the necessary self-control. While travelling together the servant of God performed several apparently ungrateful and cruel deeds. Mūsā reproached him every time, so that the guide finally separated from him after showing him that each of his supposed wicked deeds was justified. Jewish legend relates a journey of Elias with Joshua ben Levi on which Elias did similar things to those of the unnamed servant of God in the Ḳur'ān. Here also Joshua ben Levi apparently rightly indignant at them is shown by Elias to be wrong in his premature judgment. The similarity between the two stories is so great that it cannot be doubted that the Ḳur'ānic one goes back to the Jewish. The unnamed servant of God in the Ḳur'ān is usually identified with al-Khaḍir. It should be noted, however, that al-Baiḍāwī for example says on Sūra xviii. 64: "it is also said that he is Alīsa' or that he is Ilyās". This confusion of Ilyās and al-Khaḍir is significant and further cases may be mentioned. The reason is that in view of the Biblical story of Elias's being taken up to heaven, the latter like al-Khaḍir is numbered among the immortals. Perhaps al-Khaḍir's name shows this. Al-Khaḍir "the green" is only an epithet of the man who was called B-l-y-ā or, according to another reading, Y-l-y-a, i. e. Ilyās. But elsewhere they are twins, not genealogically, but in their work and common activity. They go together to the fountain of life and drink from it, a trait which was originally only in the Alexander legend, but which again guarantees Ilyās's immortality, as his name shows which is interpreted as *al-Ās*, "the myrtle", the symbol of immortality. Ilyās and al-Khaḍir having survived to the first revelation to Muḥammad are said to have wished to die. But Muḥammad is said to have replied to them: "O Khaḍir, it is your duty to aid my community in the desert and you, O Ilyās, must aid them at sea". Usually however al-Khaḍir-Glaukos is the sea daemon, while Ilyās is the patron on land. The two spend Ramaḍān each year in Jerusalem, observing the fast. They then make the pilgrimage to Mecca, without any one recognising them, unless God grants this favour. Their food is pond-weed (*karafs*) and truffles (*kam'a*). After the pilgrimage they clip one another's hair and separate with eulogies. Any one who repeats these formulae three times at morning and evening is immune against theft, fire, and drowning (*sarḳ*, *ḥarḳ*, *gharḳ*), as well as against higher powers, Satan, snakes, and scorpions. Al-Khaḍir and Ilyās meet every night at Alexander's Dam where they fly in the air. In the Jewish legend he also flies about giving help everywhere. (See also the article AL-KHAḌIR).

Besides al-Khaḍir Muslim legend also knows the immortal Enoch-Idrīs [q. v.]. Ilyās is therefore sometimes also identified with the latter. In various genealogies of Ilyās he is said to be really Idrīs. Usually however his genealogy is traced to Aaron: Aaron-Eleazar-Pinehas. The latter is described as his grandfather. The name of his father has become, perhaps from Tishbī, N-s-b-y, Y-s-y, and finally Yāsīn.

It may further be noted that Ilyās, like al-Khaḍir, is often identified with St. George (see GIRGIS), probably because the latter is also a patron saint.

'IMĀD AL-DAWLA, ABU 'L-ḤASAN 'ALĪ B. BUWAIH, first ruler of the Būyid dynasty. With the help of his two brothers 'Imād al-Dawla in 322 (934) conquered Shīrāz and thus became ruler of Fārs where he reigned till his death. He died in Shīrāz on Djumādā I 16, 338 (Nov. 11, 949) aged 57. According to another statement (Ibn Khallikān, ed. Wüstenfeld, N°. 491), he did not die till 339 [cf. the article BUYIDS.]

(K. V. ZETTERSTÉEN.)

'IMĀD AL-DĪN MUḤAMMAD B. MUḤAMMAD AL-KĀTIB AL-IṢFAHĀNĪ, a celebrated Arab stylist and historian, born at Iṣfahān in 519 (1125) of a prominent family, to which the celebrated Kātib al-Azīz, whose biography is given in Ibn Khallikān, *Wafayāt*, ed. Wüstenfeld, N°. 77, also be-

longed. On him cf. *Recueil des textes relatifs à l'hist. des Seldjoucides*, ii., Préface xix. *sqq.* He spent his youth in his native city and in Kāshān, but also studied in Baghdād particularly fiḳh and made a journey to Mawṣil and other places. When the Saldjūḳ Sulṭān Muḥammad II besieged Baghdād in vain in 551 (1156), he was there and congratulated the Caliph on its deliverance in a *ḳaṣīda*, which gained him the favour of the vizier Ibn Hubaira [q. v.]. The latter appointed him nāʾib in Wāsiṭ; after the vizier's death in 560 (1165) however he lost this office and lived through two difficult years. Finally he applied to the Aiyūbids in Syria, who were acquainted with his family, particularly with the above mentioned al-ʿAzīz, who was an uncle of 'Imād al-Dīn. He found a friendly welcome there and was appointed *kātib* by Sulṭān Nūr al-Dīn and later *mudarris* at a madrasa built in honour of him. He was also sent on a diplomatic mission to the Caliph and finally appointed *mushrif* of the Dīwān. On Nūr al-Dīn's death in 569 (1173), however, his enemies were able to supplant him so that he had to leave his offices and go to Mawṣil. There he fell ill, but recovered and returned to Syria on hearing that Ṣalāḥ al-Dīn was preparing to conquer Syria. He congratulated him at his capture of Ḥimṣ in a poem, won great influence with him and accompanied him on all his campaigns. On Saladin's death in 589 (1193) he retired into private life and devoted himself to literary work till his death in 597 (1201). His chief work is undoubtedly the comprehensive anthology of the Arabic poets of the vith century entitled *Kharīdat al-Ḳaṣr wa-Djarīdat Ahl al-ʿAṣr* (still unpublished). His history of the conquest of Syria is better known: *al-Fatḥ al-ḳussī fi 'l-Fatḥ al-Ḳudsī*; *Conquête de la Syrie et de la Palestine par Ṣalāḥ ed-dîn*, ed. Landberg, Leiden 1888. He also prepared a history of the Saldjūḳs in al-'Irāḳ on a basis of the records compiled by the vizier Anūshirwān and called it *Nuṣrat al-Fatra wa-'Uṣrat al-Fiṭra*; a synopsis by al-Bondārī [q. v.] has been published by Houtsma. Of his memoirs, *al-Barḳ al-Shāmī*, only one volume and a few excerpts have come down to us. 'Imād al-Dīn's prose writings are characterised by an exceedingly ornate and bombastic style.

'IMĀD SHĀHĪ DYNASTY, of Berār [q. v.], was founded by Fatḥ Allāh 'Imād al-Mulk, by birth a Brahmen of Vidjayanagar, who had been captured as a youth in an expedition of Aḥmad Shāh Bahmanī I to Vidjayanagar and educated as a Muslim. He served under 'Abd al-Ḳādir Khānd-jahān, governor of Berār, and in the reign of Muḥammad III Bahmanī succeeded his master. In 1490 Fatḥ Allāh followed the example of Aḥmad Niẓām al-Mulk of Aḥmadnagar and Yūsuf 'Ādil Khān of Bīdjāpūr and declared himself independent, not from disaffection towards Maḥmūd Shāh Bahmanī, but from disinclination to serve the minister, Ḳāsim Barīd, the real ruler of the kingdom, who kept the king in confinement and from whose control Fatḥ Allāh subsequently made a fruitless attempt to release him. Though a native Dakhanī, he was an intimate friend of the foreigner Yūsuf 'Ādil Khān, and his great influence was ever exercised in the interest of peace between the quarrelsome sulṭāns of the Dakhan. Before he declared his independence, Berār had been divided into the two provinces of Gāwīl and Māhūr, of which he retained the former, but before his death he had added Māhūr to his dominions. He died in 1504 and was succeeded by his son 'Alā' al-Dīn, who was far inferior to him in ability and permitted himself to be drawn into quarrels, in which he had no genuine concern, and from which his kingdom suffered severely, with Maḥmūd Shāh Baiḳarah of Gudjarāt and Sulṭān Ḳulī Ḳuṭb Shāh of Golkonda. He was also engaged in disastrous warfare with Aḥmadnagar regarding the possession of Pāthrī, on the Godāwarī. He died in 1529 and was succeeded by his son Daryā, a feeble ruler, during whose long reign the influence of Berār in the politics of the Dakhan was on the wane. He played a subordinate part in most of the quarrels between the other Muhammadan sulṭāns and, having joined the unnatural alliance between the sulṭān of Bīdjāpūr and the rādja of Vidjayanagar against Ḥusain Niẓām Shāh I of Aḥmadnagar, played a part more creditable to his orthodoxy and his political acumen than to his honesty in secretly helping Ḥusain Niẓām Shāh and thus preventing the establishment of Hindu predominance in southern India. For some time before his death Daryā 'Imād Shāh was completely in the hands of his minister, Tufāl Khān, and when he died in 1560, Tufāl Khān placed his young son, Burhān 'Imād Shāh, on the throne but kept him a prisoner and governed Berār with hardly a pretence of subordination. Tufāl Khān was attacked by the sulṭāns of Bīdjāpūr and Aḥmadnagar for having declined to join the confederacy which finally crushed Vidjayanagar at the battle of Tālikota in 1565, but, though defeated and reduced to great straits, succeeded in playing off one of his enemies against the other and in bribing the sulṭān of Bīdjāpūr to retreat. In 1572 Murtaḍā Niẓām Shāh of Aḥmadnagar again invaded Berār, on the pretext, on this occasion, of liberating Burhān 'Imād Shāh from his humiliating position. Murtaḍā captured Narnāla and annexed Berār, and carried off Tufāl Khān and his son, and Burhān 'Imād Shāh and all his family to a fortress in the kingdom of Aḥmadnagar, where they all died in one night. The manner of their death is uncertain, but it was not fortuitous.

Bibliography: Firishta, *Burhān-i Maʾāthir*; *Muntakhab al-Lubāb*, vol. iii.; *Ṭabaḳāt-i Akbarī*; *Historic Landmarks of the Deccan* by Major T. W. Haig. (T. W. Haig.)

IMĀLA (= deflection, Inf. iv. of *māla*, to bend) is a phonetic phenomenon, which, according to al-Zamakhsharī, consist in the *alif* inclining to *kasra*, so that the tone becomes homogeneous (*liyatadjānasa 'l-ṣawt*).... the cause is that a *kasra* or *yāʾ* occurs near the *alif*; or that it is changed from a letter moved by *kasra* or from a *yāʾ*; or that in a certain position it becomes a *yāʾ*. It is a question of the transition from long *ā* to *ī* or *ē* (the *imāla* may be *shadīda* "strong" or *mutawassiṭa* "of medium strength") under the influence of an adjoining *i* sound, a kind of Umlaut, which was noticed even by the old Arab grammarians and interpreters of the Ḳurʾān. The inclining of the short *a* towards *i* is also mentioned occasionally. As is clear from al-Zamakhsharī's definition the *i* sound which causes the *imāla* needs not actually appear; it may merely exist in

the root. Among such words are verbal forms like *ramā* from the root *r-m-y*, by analogy also *ghazā* (in spite of the original *w*), and nouns like *al-fatā* from *f-t-y*; also forms from stems with medial *y* and *w* like *khāfa* from **khawifa*, *ṭība* from **ṭayiba*, *nābun*, but *bābun* (med. *w*). Isolated forms are also found which cannot be explained by these rules: one even speaks of an *imāla* "as a result of frequent usage". The *imāla* is prevented by seven consonants, the emphatic *ṣ*, *ṭ*, *ḍ*, *ẓ*, *kh*, *gh* and *ḳ*, when they immediately precede or follow; if they are farther removed from the *ā*, special rules hold. It is remarkable that these consonants, as the example *ṭība* shows, do not prevent the *imāla* in such forms where the *i* sound is not actually present in form. A special case arises in connection with *r*: the syllable *ra* or *ru* prevents *imāla*, just like the emphatic sounds, *ri* on the other hand often produces *imāla* where the presence of an emphatic sound would otherwise prevent it.

How far the *imāla* is to be regarded as a phenomenon characteristic of "classical" Arabic cannot be settled. The very divergent statements of the older authorities are probably to be interpreted to mean that it was only a dialectical peculiarity of certain tribes. Chr. Sarauw, relying on Sībawaihi, has recently endeavoured with success to show that the kind of *imāla* which is due to the presence of an *i* sound is common among the eastern Arabs and is relatively modern, while the other variety belongs to the Ḥidjāz and represents an original Semitic *ē* sound. In answering the question as to how far the *imāla* spread in ancient times the Arabic names and words preserved in transcription in foreign sources are naturally of great importance.

The modern dialects also show a kind of *imāla*. This must, however, be interpreted differently from the literary *imāla*. In the Syrian dialect of Beirūt, for example, it depends mainly on the surrounding consonants and only exceptionally (for example with *r*) does an *i* sound exercise its influence. This is therefore a spontaneous transition from an *a* to an *e*. The sounds which prevent *imāla* are in this case not only the emphatic and velar but also the laryngal.

There has been considerable discussion as to whether the *imāla* was marked in Arabic script by a final *yā*, a question which cannot be considered to be definitely settled, in spite of Brockelmann's answer in the affirmative in his *Grammatik* and *Grundriss*. In Mss. there is no special sign for *imāla*. In edited texts however it is usual to indicate it by the figure — under the consonant.

IMĀM (from the Arabic *amma*, "to precede, to lead") originally "leader", particularly "caravan leader, any one who guides a column of camels", a synonym of *ḥādī*; whence also a person or thing who serves as a guide or pattern, e. g. to the pupil in the school (*Lisān*, xiv. 291). In the Ḳur'ān, the word is found in the meaning of example, leader, pattern, model, or prototype (ii. 118; xv. 79; xxv. 74; xxxvi. 11). Since the foundation of the Muslim community, the term has been applied to the person who indicates the ritual movements of each *rak'a* to the believers assembled in rows for the canonical service (*ṣalāt*), which those who stand behind the imām copy. Originally the imām was the Prophet himself or in his absence some one authorised by him; after him his successors (*khalīfa*) or their delegates filled the office. The conduct of public worship became thus one of the chief attributes of the ruler and the transference of power to the governors of the provinces was seen in a form visible to all when the Caliph's deputy placed himself at the head of the community assembled for prayer. The jurists of Islām therefore give the name imām to the chief of the Muslim community, the spiritual and secular head of the nation, usually called *khalīfa* in his quality of successor to the Prophet. The imām leads the divine service and consequently decides the fate of the social body of which he is chief. His office is called *al-imāma al-kubrā*, the great imāmate, to distinguish it from *al-imāma al-ṣughrā*, the office of the man who conducts the service. Every Imām must be chosen (this was the rule at least with the first four caliphs and the Khāridjis). The electors require the following qualifications: 1. unblemished character, 2. knowledge of law, 3. the necessary insight and ability to judge. The electors living in the rulers's capital legally enjoy no privilege, but in practice, according to ancient custom they do, for the other towns of the empire and the provinces have only to confirm the choice. Candidates for the dignity of imām must possess the following qualities: 1. unblemished life and character, 2. the necessary knowledge of law to exercise *idjtihād* [q. v.], 3. eloquence, 4. freedom from any defect in hearing or seeing or in the limbs, 5. the necessary judgment to conduct the affairs of state, 6. the necessary courage to conduct a holy war, 7. descent from the tribe of Ḳuraish. His authority is recognised by the taking of the oath of fealty (*bai'a*, q. v.).

The Shī'is further demand that the imām should belong to the family of the Prophet, and thus the choice is limited to the descendants of 'Alī and Fāṭima. According to Shī'i doctrine, 'Alī [q. v. i. 283 *sqq.*] was appointed imām by a divine ordinance (*naṣṣ*) promulgated at Ghadīr Khumm [q. v.]. This rank is hereditary among his descendants so that the only thing to be decided is, which of his descendants is to be recognised as imām, a question which has frequently produced dissensions in the family of the Prophet. Some sects have excluded the descendants of al-Ḥasan [q. v., p. 274] and only recognised the claims of those of al-Ḥusain [q. v., p. 339] to the imāmate, because the latter married a daughter of the last Sāsānid king, Yezdegird III. They also consider the imām sinless and infallible (*ma'ṣūm*, see 'IṢMA). The most complete series of Imāms is that of the Ithnā 'asharīya [q. v.].

The *Zaidīs* assert that the texts quoted in support of the assignment of the imāmate to ʿAlī do not refer to him directly and personally but only according to his distinguishing marks as imām. They therefore say that a mistake could be made in regard to the description of the individual and that the community could legally choose the two shaikhs (Abū Bakr and ʿOmar) but that ʿAlī had a greater right to the imāmate. The former were preferred, although the latter had the greater right. The imām has not the right to appoint his successor; among the Imāmīs however the imām must be known by his predecessor and be regularly designated by him. The *Ghulāt* (extreme school) teach the divinity of the imām (Ibn Khaldūn, *al-Muḳaddima*, ed. Quatremère, i. 355 *sqq.*, transl. de Slane, i. 400 *sqq.*; see ZAIDIYA).

Every *masdjid* [q. v.] has an imām, a principal mosque (*djāmiʿ*) may have several. The imām is sometimes an official of the town as he has also to supervise the morals and order of the quarter in which his mosque is. In the Turkish empire he has also the office of making out certificates (*ʿilm u khabar*) required for the conveyance of property, the determining of civil status etc.

To avoid any confusion in the two meanings of the word imām, the Persians call the acting leader of worship *pīsh-namāz*, "leader of prayer", a literal translation of the Arabic *imām*.

The founders of the four great orthodox schools of law are also called imāms and Abū Ḥanīfa was even known among his scholars as *al-imām al-aʿẓam* "the greatest imām". This name has also been given to a market place near Baghdād, originally called Ruṣāfa, where Abū Ḥanīfa is buried (Cl. Huart, *Hist. de Bagdad*, p. xiv). Finally, imām has become an honorary title of all scholars who have founded schools.

IMĀM AʿẒAM, title of the Khalīfa. [See KHALĪFA.]

IMĀM-BĀRĀ A. H. ("enclosure of the Imāms"), a building in which the Muḥarram festival in India is celebrated, and the *taʿziyas* [q. v.] are kept when they are not being carried in procession; it sometimes serves also as the mausoleum of the founder and his family; the best-known examples are those in Lucknow and Murshidābād.

Bibliography: Mrs. Meer Hassan Ali, *Observations on the Mussulmauns of India* (Oxford, 1917), p. 19; H. G. Keene, *Handbook of Lucknow* (Calcutta 1875), p. 102-103; J. H. T. Walsh, *History of the Murshidabad District* (London 1902), p. 76-77.

IMĀM AL-ḤARAMAIN. [See AL-DJUWAINĪ.]

IMĀM SHĀH, a saint of the Ismāʿīlī Shīʿah sect, whose tomb is venerated at Pīrāna, about 10 m. S. E. of Aḥmadābād [q. v.]; he is said to have come from Persia and to have settled here in the middle of the 15th century, and the Mōmnās (properly Muʾmin) trace their conversion to him; but the majority of his followers are Hindus, who do not differ from other Hindus, except for their special devotion to Imām Shāh and their practice of burying the bones of their dead, after cremation, near the tomb of the saint at Pīrāna. He wrote a book of religious precepts, entitled *Sikshā Patrī*, which is read by all his followers; some of the Muslim Imāmshāhīs read it in preference to the Ḳurʾān. Some Hindus worship him as a god and in their prayers repeat the words "Imām Kēvalah" (the Imām is the One God), but most of his followers do not consider Imām Shāh to have been more than a religious teacher or a saint.

IMĀMA. [See IMĀM.]

IMĀMĪS. [See IMĀM and ITHNĀ ʿASHARĪYA.]

ĪMĀN. The basal idea in the root ʾmn is rest of mind and security from fear (Rāghib, *Mufradāt*, p. 24; *Lisān*, xvi, 160, l. 6 *sqq.*). In consequence the fourth stem can mean both "to render secure" and "to put one's trust in" something or some one. Hence in theology *al-īmān* means 1) the putting of one's trust, the having faith, in Allāh and his prophet and his message, and 2) the content of that message. A consideration of the first of these uses divides roughly into three; cf. the discussion in al-Ghazālī's *Iḥyāʾ*, Book ii. *Faṣl* iv.

I. The Ḳurʾān sometimes distinguishes and sometimes confuses *īmān* and *islām* and is ambiguous as to their relationship to good works. Theological controversy followed, which is mirrored in the traditions, and the technical use of *īmān* in *fiḳh* and *kalām* is, in consequence, very contradictory. A tradition, assertedly from Muḥammad, says that whoever has in his heart the weight of a grain of faith (*īmān*) will come forth from the Fire. But what here is *īmān*? Some taught that it is simply a holding fast in the mind (*ʿaḳd bil-ḳalb*), others added a testifying with the tongue (*shahāda bil-lisān*); others added a third element, works according to the fundamentals of the faith (*ʿamal bil-arkān*). The first has been the position of most Ashʿarites and Māturīdites; the second of the Ḥanafites and the third of the Khāridjites. The Karrāmites held that faith was simply acceptance with the tongue (*taṣdīḳ bil-lisān*), i. e. confession (*iḳrār*), the narrower sense of islām; others, such as the Djahmites, a sect of Djabrites, that it was only knowledge (*maʿrifa*) of Allāh gained by reason (*ʿaḳl*) and of the messages of the prophets gained by revelation. Orthodox Islām has come to the conclusion, which it, as usually, states as having been the position

of the Fathers (*al-salaf*), that faith consists of acceptance in the mind of and firm adherence to a belief (*taṣdīḳ*, *iʿtiḳād*, q. v.), statement with the tongue of this acceptance (*iḳrār*, *ḳawl*) and good works. The second is Islām in the narrower sense. He who has all three will enter the Garden. But in the case of one who possesses *taṣdīḳ* and *islām* and dies with a single mortal sin (*kabīra*) unrepented of, the Muʿtazilites held that he was neither a believer (*muʾmin*) nor an unbeliever (*kāfir*) but a *fāsiḳ*, a "reprobate", and that he would remain eternally in the Fire. In the last point the Khāridjites agreed; but they held also that all sins were mortal. Orthodox Islām applies the same name to such an one but holds that eventually he will enter the Garden; for sinful believers the Fire is Purgatory and not Hell, and good works are not of the essence of belief but are additions. At the opposite extreme were the Murdjiʾites, the "postponers". Historically they arose in early Islām from the difficulty which the pious found in treating as Muslims those who professed to be Muslims but were yet notoriously evil-doers. The Khāridjites said roundly that such were unbelievers; the Murdjiʾites preferred to "postpone" decision until Allāh revealed all secrets. In the meantime they treated as a Muslim him who claimed to be a Muslim. In one form or another and to one degree or another Islām has accepted this position. All who worship towards the Ḳibla are to be accepted as Muslims, with no questions asked. But the later Murdjiʾites developed this into antinomian heresy. It is faith that saves, they taught, and evil works do not hinder the effectiveness of faith, even as obedience in good works cannot save one who is an unbeliever (Van Vloten, *Irdjāʾ*, in *Zeitschr. d. Deutsch. Morg. Gesell.*, xlv. 161 *sqq.*, Goldziher, *Vorlesungen*, index sub *Murdjiʾa*). Lastly, there is the case of one who professes Islām and acts as a Muslim, that is, goes through the ritual and external observance of Islām, but has no internal faith. He is a hypocrite (*munāfiḳ*) and an unbeliever. In this connection it is to be remembered that "obedience" (*ṭāʿa*) and "good works" (*ʿamal ṣāliḥ*) in Islām primarily and ordinarily mean obedience to the ritual law (*al-ʿibādāt*).

II. Does faith increase and decrease? In the Ḳurʾān increase of faith is frequently mentioned and the Fathers (*al-salaf*) held that it increased with acts of obedience and decreased with acts of disobedience. By this, so later Islām taught, they meant that the mental acceptance (*taṣdīḳ*) remained and that the good works were not to be regarded as parts of it as essentially affecting it but as additions to it by which it was increased in amount. Conversely with acts of disobedience its amount diminished but it itself essentially remained. So the Prophet could speak of faith to the amount of a grain, showing that its amount could vary; and al-Ghazālī shows with great psychological truth and beauty how good deeds go to nourish faith. But the question remained as a subject for verbal dialectic. Those who held that faith (*īmān*) meant acceptance (*taṣdīḳ*) and good works (*ʿamal*) taught that it increased and diminished, and those who held that faith was simply *taṣdīḳ* taught that there could be no question of quantity in it.

III. There appears to have been an early disinclination to say, "I am a believer" (*ana muʾmin*) without the qualification, *in shāʾ Allāh*, "if it be the will of Allāh," and still more with the addition *ḥaḳḳan*, "in verity", or "really, or *ʿinda ʾllāhi*", in the sight of Allāh." Examples are quoted in al-Ghazālī's *Iḥyāʾ*, Book ii., *Faṣl* iv., *Masʾala* iii.; cf. the commentary of the Saiyid al-Murtaḍā. Hence the Ashʿarites with the mass of Shāfiʿites, Mālikites and Ḥanbalites insisted on adding *in shāʾ Allāh*, while the Māturīdites and Ḥanafites prohibited it and permitted the addition of *ḥaḳḳan*. They urged that to say "If it be the will of Allāh" implied doubt (*shakk*) and doubt in such a connection meant unbelief (*kufr*). In reply the Ashʿarites argued that the formula was used not to imply doubt of the reality of the absolute acceptance in the mind, but *a*) to guard against a making of one's self out to be pure (*tazkiyat al-nafs*; cf. Ḳur. iv., 52, liii. 33); *b*) out of courtesy (*taʾaddub*) and to gain a blessing (*tabarruk*) by submitting all things to the will of Allāh; *c*) to express a doubt as to the perfectness of the faith in question though not as to its reality or, if works are reckoned a part of faith, a doubt as to whether there will be works; and *d*) to express a doubt as to whether Allāh will permit the believer in question to die in the faith, for all things must be judged by their ends (*khawātīm*). For the Ashʿarite side see al-Ghazālī, reference above, and for the Māturīdite, al-Taftāzānī's commentary on the *ʿAḳāʾid* of al-Nasafī, ed. Cairo 1321, p. 127 *sqq.*

(D. B. Macdonald.)

ʿIMĀRET (A.), "building", "edifice", the name given in Turkey to eating-houses or hostels where schoolchildren and theological students receive their meals, which consist of bread and one or two hot dishes of mutton and vegetables. Similarly, such food along with a small present in money of 3—5 aspers a day per person, sometimes even as much as 10 aspers, is given to the poor. These institutions are maintained by pious foundations. The first of the kind was erected by Sulṭān Orkhān in 1336 in Nicaea (Iznīḳ) and devoted to the good of mankind; at the opening he presided in person, distributed food to the poor and was the first to light the lamps and candles. Murād II did the same thing after a feast which he had given to the ʿulamāʾ of his court in the *ʿimāret*. At the end of the xviiith century the *ʿimārets* of Constantinople fed over 30,000 people every day. There is an *ʿimāret* beside each of the great imperial mosques Aya Ṣofya (kitchen founded in 1155 = 1742 by Maḥmūd I), Bāyazīd, Fātiḥ, Selīmīye, Sulaimānīye, Aḥmedīye, Nūr-i ʿOthmānīye, etc. In Persia, where the word is *ʿimārat*, it means "palace", e. g. *Shams-ʿimāret*, the "Sun-Palace" at Ṭehrān.

IMERETIA. [See kaukasus.]

IMOSHA. [See tuareg.]

ʿIMRĀN, the Biblical ʿAmrām, was the son of

Yiṣhar b. Ḳāhith b. Lāwī, and married Yūkhābid, who bore him Mūsā in his seventieth year. He lived 137 years (Ibn al-Athīr, i. 119, al-Tha'labī, p. 99; al-Kisā'ī, p. 201, and Ṭabarī, i. 443). This account differs from the Biblical in so far as, according to Exodus, 6, 18, Amram was son of Kehat and brother of Yizhar, and reached the age of 137. 'Imrān was appointed grandvizier of Egypt and had to keep watch every night by Fir'awn's bed (al-Kisā'ī, p. 201). One night he saw a bird in Fir'awn's apartments, carrying his wife upon its wings. He was at once enflamed with love for her and had intercourse with her. The bird then took her back home, without the thousand watchers outside the royal palace noticing. Next morning the astrologers announced to the king that the conception of his future enemy had just taken place and also that his star was in the ascendant and brilliant. Fir'awn ordered the midwives of Egypt to seek out and register the pregnant women from house to house. They did not however dare to examine Fir'awn's wife, as they knew that 'Imrān did not leave Fir'awn's side. Mūsā thus escaped certain death (al-Kisā'ī, ibid.). The Talmud likewise describes Amram as the most prominent man in Egypt (Soṭa 12; Baba B. 120; Exodus R. i. 13). The 'Imrān mentioned in the Ḳur'ān (Sūra iii. 31), whose wife dedicated the fruit of her womb to Allāh, is not identical with the Biblical 'Amrām or 'Imrān. Tha'labī (p. 220) expressly mentions this, with the note that there was an interval of 1800 years between the two bearers of this name. The Ḳur'ān also speaks of 'Imrān b. Māthān or b. Sāhim, whose wife Ḥanna, daughter of Fāḳūdh, was the mother of Maryam and the grandmother of Jesus. Our 'Imrān b. Māthān would thus be identical with the Jakob b. Matan of Matthew xv. (cf. MARYAM).

Legenden*, p. 131; Eisenberg, *Moses in der arab. Legende*, Cracow, 1910, p. 16.

(J. EISENBERG.)

'IMRĀN B. ḤIṬṬĀN AL-SADŪSĪ, an Arab poet born in Baṣra, a pious man learned in the Ḳur'ān and Tradition, who is numbered among the second class of the Baṣra Tābi'ūn and transmitted traditions on the authority of 'Ā'isha and of some Companions of the Prophet, but in his old age is said to have been won over by his wife to the Khāridjīs. As he was already too infirm to serve them with the sword, he is reckoned among the *ḳa'ada* (see Brünnow, *Die Charidschiten*, p. 29). He worked for the cause of his party as a preacher and particularly as a poet, for example he celebrated 'Abd al-Raḥmān b. Muldjam, the murderer of 'Alī, in a poem. When al-Ḥadjdjādj became governor in the 'Irāḳ and began to persecute the Khāridjīs, he had to flee to Syria and found a hospitable welcome with Rawḥ b. Zinbā'. When his stay here became known to 'Abd al-Malik, he escaped to the Ḳināna to Zufar b. al-Ḥārith in Ḳarḳīsiyā. There he was also soon betrayed and now went to 'Omān, where admirers of Abū Bilāl Mirdās b. Udaiya received him. When al-Ḥadjdjādj again discovered his whereabouts, he found a final refuge in Rūdh Maisān not far from Kūfa, where he died.

Wright, p. 531—534; *Kitāb al-Aghānī*, xvi¹, 152 ff., ² 146—152; 'Abd al-Ḳādir al-Baghdādī, *Khizānat al-Adab*, ii. 435—441; Wellhausen, *Die religiös-politischen Oppositionsparteien*, p. 36, N. 3.

(C. BROCKELMANN.)

'IMRĀN B. SHĀHĪN played a great rôle in the swamps (Baṭā'iḥ, q. v.) of the lower Euphrates at the beginning of the Būyid rule. A native of al-Djāmida, a village between Wāsiṭ and Baṣra, he had to go into hiding on account of a crime he had committed and henceforth led the life of a a robber, for which the neighbourhood offered excellent opportunities. He then entered into an alliance with Abu 'l-Ḳāsim al-Barīdī [see AL-BARĪDĪ], who found in him to most suitable man to defend the swamps against his enemies. As his robberies however made the road to Baṣra unsafe, the Būyid Mu'izz al-Dawla was more than once forced to send troops against him, but they could do nothing in view of the nature of the country and were usually enticed to some place from which it was impossible for them to return. From sheer necessity Mu'izz al-Dawla appointed him governor of the district, which did not however prevent 'Imrān and his robbers from occasionally renewing their activity again. Repeated attempts by Mu'izz al-Dawla and his successor Bakhtiyār to put an end to this state of affairs by force met with no better success. Till his death in 369 = 979 'Imrān remained master of the swamps and transmitted his power to his son Ḥusain. 'Aḍud al-Dawla had the same experiences with him as his predecessors with his father. Ḥusain however was slain in 372 = 982-3 by his brother Abu 'l-Faradj, and the latter met the same fate in the following year at the hands of the Ḥādjib al-Muẓaffar b. 'Alī [q. v.] who had been leader of the army during his father's rule and now appointed a minor son of Ḥusain named Abu 'l-Ma'ālī as ruler, but soon afterwards put himself in his place by means of a forged appointment from the Būyid Ṣamṣām al-Dawla. Once again, in 412 = 1022, a son of 'Imrān, Abu 'l-Haidjā' Muḥammad, attempted to gain power but met with no success.

Bibliography: Ibn al-Athīr, ed. Tornberg, ix.

AL-**'IMRĀNĪ**, MU'ĪN AL-DĪN AL-HINDĪ, born in Dihlī, studied with the 'ulamā' of his native land and became a renowned scholar. He spent a large part of his life in teaching students at Dihlī. At first Mu'īn al-Dīn much disliked the saints of the Čishtī order and especially Naṣīr al-Dīn Maḥmūd, known as Čirāgh-i-Dihlī, "light of Dihlī" (d. 757 = 1356), who was his contemporary, but the latter's spiritual power and piety induced him to sit at his feet and at last to become his disciple. He was a great favourite of Muḥammad II b. Taghlaḳ (725-752 = 1324-1351) who sent him to Shīrāz to induce al-Ḳāḍī 'Aḍud al-Dīn al-Īdjī (d. 756 = 1355) to come to Dihlī and adorn his court. Our author repaired there but instead of persuading the Ḳāḍī, he was himself persuaded to pass the remainder of his life there.

He is the author of the following works: 1. a commentary on 'Abd Allāh b. Aḥmad al-Nasafī's compendium of Muhammadan law according to the Ḥanafī school *Kanz al-Daḳā'iḳ*; 2. a commentary on Sirādj al-Dīn Yūsuf b. Abī Bakr b. Muḥammad b. 'Alī al-Sakkākī's (d. 626 = 1229) *Miftāḥ al-*

ʿ*Ulūm*; 3. a commentary on Muḥammad b. Muḥammad al-Akhsīkatī's (d. 644 = 1246) *al-Muntakhab fī Uṣūl al-Dīn*, a work on the principles of Muhammadan law according to the Ḥanafī school.

Bibliography: ʿAbd al-Ḥaḳḳ al-Dihlawī, *Akhbār al-Akhyār*, p. 142; Āzād Bilgrāmī, *Subḥat al-MarDjān*, p. 34; Ṣiddīḳ Ḥasan, *Abdjad al-ʿUlūm*, p. 892; Faḳīr Muḥammad, *Ḥadāʾiḳ al-Ḥanafīya*, p. 304. (M. HIDAYET HOSAIN.)

IMRUʾ AL-ḲAIS, an Arab poet of the vi.th century A. D., whose real name was Ḥunduḏj b. Ḥudjr, belonged to the tribe of Kinda which had migrated from the Yaman. His ancestor, Ḥudjr Ākil al-Murār, had founded (about 480) a principality in Nadjd which declined under his successors. On account of his inclination to love affairs, particularly on account of a poem which he dedicated to his beloved Fāṭima bint al-ʿUbaid of the tribe of the Banū ʿUdhra, Imruʾ al-Ḳais was banished by his father Ḥudjr. The latter is even said to have ordered his freedman Rabīʿa to murder his son but Rabīʿa instead slew a young antelope (*djuwdhar*) and brought its eyes to Ḥudjr (Ibn Ḳutaiba, *Kit. al-Shiʿr*, p. 48, lines 7—11). After Ḥudjr had fallen in battle with the rebel Banū Asad, his son deprived of his kingdom began to lead a wandering life (whence his nickname *al-malik al-ḍillīl*, "the wandering king"). Pursued by his enemies, he fled to Samawʾal, the ruler of Taimā, who lived in the citadel of al-Ablaḳ, and practised a Jewish Christian religion.

About 530 the Emperor Justinian summoned him to Constantinople with the intention of using his services against the Persians on the advice of the Ghassānid al-Ḥārith V "the Lame", the phylarch of the Syrian *Limes*. After a longish stay in the capital he was appointed governor of Palestine and of the border tribes there, with the title of phylarch, but while on his way to take up his office he died at Angora (between 530 and 540; cf. Nöldeke, art. MUʿALLAḲĀT in the *Encycl. Brit.*). According to Arab legend, he was poisoned by order of Justinian whom he had insulted by seducing his daughter, by means of a robe of honour which covered his body with sores (whence the name *Dhu ʾl-Ḳurūḥ*, which tradition gives him), although there never was a princess corresponding to this description at the court of Justinian or of his successor Justin II.

He is said to have been the first to submit Arabic verse to fixed rules, and laid down definite laws for the rhymes. He also introduced that kind of *ḳaṣīda*, in which the poet asks two friends to stop and weep, and thus gave new life to the ancient stock of Arabic poetry, which had so far been limited to the *radjaz*. The form however in which his verses have come down to us is not original, although Sir Charles Lyall has pointed out that the use of a rare form of the *basīṭ* metre as well as the agreement between the methods followed by Imruʾ al-Ḳais and ʿAbīd b. al-Abraṣ guarantee the absolute genuineness of the poem. He was a freethinker: when he saw that fate prevented him from avenging the death of his father, he threw the three arrows with which divinations were made, at the head of the idol Dhu ʾl-Khalaṣa in the town of Tabāla.

His name means "the man of Ḳais", although it is not certain, whether Ḳais is a masculine paredros of the goddess Manāt, or the name of her sanctuary (Euting, *Nabatäische Inschriften aus Arabien*, N°. 2; Ph. Berger, *Histoire de l'écriture*, p. 274 *sq.*; *Corpus inscr. semit.*, ii. 198; Dussaud, *Hist. des Arabes avant l'Islam*, p. 125; Wellhausen, *Reste arab. Heidentums*², p. 67).

One of his *ḳaṣīda*'s is preserved in the collection entitled *Muʿallaḳāt* (Lat. trans. by L. Warner [ed. by Lette]; Engl. by Sir W. Jones, London 1782; Swedish by B. M. Bolmeer, Lund 1824; French by de Sacy in *Mém. de l'Acad. des Inscr.*, Vol. i. 411; German by Nöldeke and by Gandz, see *Bibliography*). In the editions of the text of this collection the *Muʿallaḳa* of Imruʾ al-Ḳais is usually accompanied by the commentary of al-Zawzanī (first publ. by Hengstenberg, Bonn 1823); the commentary of al-Naḥḥās has been published in extracts by Lette (Leiden 1748) and completely by E. Frenkel (Halle 1876), the commentary of al-Tabrīzī by Ch. Lyall in *A Commentary on ten ancient Arabic Poems* (Calcutta 1894). The *Dīwān* of Imruʾ al-Ḳais was published by de Slane (*Le Diwan d'Amro'lkaïs*, Paris 1837), by Ahlwardt (*The Divans of the Six Ancient Arab Poets*, London 1870, p. 115 *sqq.*, cf. 196 *sqq.*), in Bombay 1313, and with the commentary of ʿĀṣim b. Aiyūb al-Baṭalyūsī in Cairo 1282; a free German translation was given by Rückert (*Amrilkais, der Dichter und König*, Stuttgart and Tübingen, 1843).

INĀL, AL-MALIK AL-ASHRAF SAIF AL-DĪN AL-ʿALĀʾĪ (so called from his first owner) AL-ẒĀHIRĪ (after Sulṭān al-Malik al-Ẓāhir, Barḳūḳ, q. v.) AL-AdjRŪD (the beardless), Sulṭān of Egypt and Syria, reigned from 857—865 = 1453—1460. Purchased as a slave by Sulṭān Barḳūḳ he entered his Mamlūk corps. His son Sulṭān al-Nāṣir Faradj [q. v.] set him free and enrolled him in the corps of the Djamdār [q. v.]. Under Sulṭān al-Muʾaiyad Shaikh he became *khāṣṣikī* (a member of the body guard) and on the latter's death, amīr of 10 Mamlūks. He rose to higher offices under Sulṭān Barsbey. He first of all became *ṭablkhānā* (officer accompanied by a band), then second *raʾs nauba* (deputy

chief of the watch); in 831 he was appointed governor of Ghazza. Two years later he accompanied Sulṭān Barsbey in the campaign against Āmid (Diyār Bakr) which met with little success. When the Sulṭān wished to place this frontier area under reliable administration, he appointed Īnāl governor of the almost entirely destroyed town of al-Ruhā (Edessa). Īnāl as well as others after him declined to accept this office, but finally the Sulṭān induced him to do so by granting him the fief of an amīr of a 1000 (*taḳdima*, q. v.) together with the salary of a governor. After two years he was summoned to Cairo as amīr of a 1000 (without office, at the disposal of the Sulṭān) and in 840 sent as governor to Ṣafad. When Sulṭān Čaḳmaḳ ascended the throne, he summoned him to Cairo in 843 and appointed him amīr of a 1000 without office and in 846 Great Dawādār. In 848 he became Atābek (commander of the army) and as such was chosen Sulṭān in place of Čaḳmaḳ's son 'Othmān, who was unable to hold his position after his father's death, in a rising of the Mamlūks. Although he was now 73, he was able to maintain himself on the throne by meeting the wishes of the Mamlūks as far as possible and often proving a too indulgent master for them. Sulṭān Īnāl's reign was on the whole beneficial. Although he could not curb the arrogance of the Mamlūks, he succeeded in healing another wound in his kingdom. Amid great difficulties he carried through a reform of the currency. The debased silver money which his predecessors had struck was gradually withdrawn from circulation and new and improved coins issued. In foreign politics also he was fortunate. He was on the best terms with the Prince of the White Sheep, with the prince of Albistān (q. v.) in southern Asia Minor), and particularly with the great conqueror of Constantinople, the Ottoman Sulṭān Muḥammad, to whom he sent a special embassy to offer congratulations on the conquest of Constantinople. Where necessary he was not afraid to fight. He drove out the prince of Karaman who had taken several fortified places in Cilicia from him and forced him to make peace. He was involved in European politics by the relations which had connected Cyprus with Egypt since the reign of Barsbey. In order to deprive the corsairs who ravaged Syrian ports of a base, Barsbey had taken Cyprus in 830 and forced King James to recognise his suzerainty and reinstated him on the payment of tribute. A small Egyptian garrison remained on the island. When one of his successors, John II, died in 862 = 1456, his daughter Charlotte was made queen. His natural son, James, Archbishop of Nicosia, who feared for his safety, fled to Egypt and set up there as a pretender. Both parties endeavoured to gain Īnāl's recognition and after wavering a long time (the ambassador of the Grand Master of the Knights of St. John of Rhodes intervening) he decided in favour of Charlotte. But the Mamlūks inclined to James and forced the Sulṭān to send him to Cyprus with a fleet. With its help James occupied the capital Nicosia without opposition. But when the siege of Cerines dragged on, the Egyptian fleet returned to Egypt, its Admiral apparently having been bribed by the queen, and only left a small garrison in Cyprus with whose help James held out but was unable to deprive Charlotte of her territory (for further developments see KHOSHḲADAM). Īnāl was a mild and kindly ruler, and as far as lay in his power, his subjects were ruled justly and lightly. He died in 865 = 1460. His son Aḥmad, whom he had acknowledged on his death-bed, was a far-seeing ruler who aimed at the good of the community, but he was not able to control the indisciplined Mamlūks, so that he was only able to hold the throne for four months.

(M. SOBERNHEIM.)

'INĀT, a town in Ḥaḍramūt, south east of Tarīm, on the wādī of the same name. The family of Shaikh Abū Bakr, the only Saiyid family in Ḥaḍramūt to bear arms, lives here. It has two *manṣab*'s of whom one is chief of the Banū Thanna [see ḤAḌRAMAWT]. In the eighties of last century there lived in 'Ināt the greatest saint of Ḥaḍramūt, Saiyid Ḥusain b. Sālim, of the family of Shaikh Abū Bakr, to whom people made pilgrimages from the whole country and from more distant lands, such as the Indian Archipelago, on account of the miracles performed by him. 'Ināt is the most important Hawṭa [q. v.] in South Arabia. According to a statement in an Arabic newspaper (*al-Djawā'ib* of Rabī' al-awwal 18 1299 = Febr. 8 1882), the town had 5000 inhabitants, according to van den Berg, however, only 1000. The forms Inan, Ainan, Ainad in Ritter and, more recently, Ā'ināt in Hirsch for 'Ināt are due to a false transcription.

(J. SCHLEIFER.)

'INĀYAT ALLĀH KANBŪ, author of the *Bahār-i Dānish* [q. v.] and of a universal history up to the reign of Shāhdjahān, entitled *Ta'rīkh-i Dilkushā*; he held office in Lāhōr under the Mughal government, but in later life retired from the world and devoted himself to prayer and the study of theology; he died in 1080 (= 1669), or, according to others, in 1082, at the age of 65, and his brother, Muḥammad Ṣāliḥ [q. v.], who died five years after him, was buried by his side. During his life-time, he had erected an imposing octagonal building, with a dome supported by four lofty arches, for his place of burial; the tombs of the two brothers were of red sand-stone, but were destroyed by the Sikhs, who turned the building into a powder magazine; after the conquest of the Pandjāb by the English, it was used first as a private residence, but is now a church.

INDIA (BRITISH). 1. **Ethnology**. According to the census of 1911 the total population of British India was 315,156,396, out of which 66,647,299 persons were returned as Musulmāns. To this total the province of Bengal contributed nearly

24 million, the Pandjāb nearly 11 million, the United Provinces over 6½ million, the Province of Bombay 4 million (more than 2⅘ million of whom were in Sind), Madras 2⁷⁄₁₀ million (953,381 of whom were found in the single district of Malabar), Kashmir nearly 2½ million, and the North-West Frontier Province over 2 million. This Muslim population is unequally distributed among the adherents of other religions in various parts of the country; the largest proportion is found in the North-West Frontier Province where there are 2,030,994 Musulmāns, or 93 per cent, out of a total population of 2,196,933; in the opposite corner of India, in Bengal, 23,989,719, or 53 per cent, are Musulmāns out of a total of 45,483,077, the proportion ranging from 15 per cent in West, to 59 per cent in North, and 68 per cent in East, Bengal; in Kashmir there are 2,398,320 Musulmāns out of a population of 3,158,126, i. e. about 76 per cent of the inhabitants of this state; in the Pandjāb they form more than half the total population. In the United Provinces, one of the chief historic centres of the Maghal empire, there are only 6,658,373 Musulmāns out of a total population of 47,181,044, i. e. about 14 per cent, and in other provinces the proportion is still lower; e. g. in the Mysore state, in spite of the proselytising zeal of Ḥaidar ʿAlī [q. v.] and Tīpū Sulṭān [q. v.], there are only 314,494 Musulmāns, or 5 per cent, out of a population of 5,806,193. In the Ḥaidarābād state, embracing territory that has been under Muhammadan rule since the 14th century, there are only 1,380,990 Musulmāns, or 10 per cent, out of a total of 13,374,676, chiefly Hindus; while, on the other hand, it is noticeable that the Muhammadans are relatively more numerous in North Bihār, which has been from ancient times the home of Hinduism and Brahman domination, than in South Bihār, where there are old Muhammadan centres such as Patna and Monghyr. The proportion sinks so low as 2.7 per cent in Orissa, though this province was under the rule of Afghāns for several centuries.

Within this Muhammadan population of over 66 million there is a great ethnological diversity. One broad distinction may be drawn between the descendants of foreign Muslim immigrants on the one hand and of the indigenous converts on the other. Among the latter, the physical types that are most numerously represented are (1) the Indo-Aryan type, occupying the Pandjāb, Rādjpūtāna and Kashmir, to which belong the Rādjpūt and Djāt Musulmāns, (2) the Aryo-Dravidian type, found in the United Provinces and Bihār, and (3) the Mongolo-Dravidian type, represented by the majority of the Muhammadans of Eastern Bengal. (See *Census of India*, 1901, Vol. I, *Ethnographic Appendices*, p. 50 *sqq.*).

Though by far the larger proportion of the indigenous Muhammadan population owes its origin to the lower Hindu castes or to outcasts, still there are few of the higher castes that have not at one time or another contributed converts to Islām. Brahmans were forcibly converted amid the savageries of conquest, or in periods of intolerance under some zealous Muhammadan government; other Brahmans embraced Islam through the persuasion of Muslim missionaries, or to gain some social or financial advantage.

From the warrior castes Islām has received large accessions from the earliest days of its entrance into India. Rādjpūt Musulmāns are found in large numbers in the Pandjāb and to a less extent in the United Provinces and Rādjpūtāna; in some cases tradition ascribes the conversion of their ancestors to the influence of Muslim saints, e. g. the Rādjpūts of the city of Pānīpat assert that their ancestor was converted by a saint named Abū ʿAlī Ḳalandar who died there in 1324 A. D.; in other cases, the change of faith was determined by political or social motives, e. g. in northern India there are several Rādjpūt families, the ancestor of one branch of which is said to have become a Muhammadan, in order to save the family property from confiscation.

From the lower castes among the Hindus there has been a constant stream of accessions during the whole Muhammadan period (for details, see the publications of the Ethnographic Survey of India), as well as from the aborigines of the country who stood outside the pale of Hinduism. Definite historical evidence of these conversions is for the most part wanting. In the case of the various Mongoloid or Mongolo-Dravidian tribes of Eastern Bengal, there was probably a mass-movement towards Islām on their part; adherence to the new faith raised them out of the despised condition to which the higher Hindu castes consigned them.

The Musulmāns of foreign origin are numerically fewer than the descendants of native converts, but their influence in the history of Muhammadan civilisation in India has been vastly more important; the various conquerors, Arabs, Turks, Paṭhāns and Maghals, brought into the country large bodies of foreign troops, whose services they rewarded by grants of land; when their power was established, their courts attracted into India military adventurers, poets, scholars and theologians, most of whom remained and settled in the country; this movement of immigration went on during the whole period of Muhammadan ascendancy and has not even ceased under British rule. One example may be taken from the 13th century, when the devastations of the Mongols had spread terror through the Muslim kingdoms of Central and Western Asia; refugees made their way into India from ʿIrāḳ, Khurāsān, Dailam, Turkistān, etc., and in the reign of Sulṭān Balban [q. v.] as many as 15 wards of the city of Dihlī are said to have taken their names from such refugees.

Of these foreign immigrants, the first to enter India were the Arabs who invaded Sind under Muhammad b. Ḳāsim in 712; the trade in spices, gems, etc., early attracted Arab merchants to the west coast of Southern India, and the Mapillas [q. v.] are descended from the Hindu women they married. Thus from the earliest period of the Muhammadan occupation to modern times there has been an immigration of Arabs into India; their numbers have been small, but their influence has been profound and wide-spread. There was a Saiyid dynasty in Dihlī from 1413 to 1451, and one in Bengal from 1493 to 1537; a dynasty of Arab origin ruled over the kingdom of Khāndesh from the 14th to the 16th century; in the second decade of the 18th century two Saiyids of Bārha for 7 years enjoyed the position of king-makers and set whomsoever they chose on the throne of Dihlī. As administrators, generals, men of letters, teachers and saints, the Saiyids in India have played an important part in the history of Mu-

hammadan civilisation. Among them there have been several families whose influence has been continuous from generation to generation. The Saiyids of Bārha formed a group of considerable political importance, and various members of it held high and important posts under the Mughal emperors for nearly two centuries, from Akbar's reign onwards; they claimed the privilege of leading the charge in the van of battle. (Blochmann, *Āīn-i-Akbarī*, i. 390 *sqq.*). The Bukhārī Saiyids, who claim descent from Saiyid Djalāl al-Dīn Surkh-pōsh Bukhārī (who is said to have settled in Ūčh [q. v.] in 642 A. H.), and the Gīlānī Saiyids, the descendants of Bandagī Muḥammad Ghawth (himself descended from the Ḳādirī saint Saiyid ʿAbd al-Ḳādir al-Djīlī [q. v.]), who also settled in Ūčh in 887 A. H., have contributed to the annals of Muslim hagiology a large number of saints who filled an important place in the religious life of their country and whose shrines are still venerated, especially in the north and north-west of India.

Numerically, the Arabs form the smallest group of Indian Muhammadans of foreign origin. Another important group, likewise not numerous, is made up of the descendants of the Turkī invaders, to whom the establishment of Muhammadan rule in Indian is really due; Maḥmūd of Ghaznī was a Turk, as also were the generals of Muḥammad Ghōrī, who founded dynasties in Dihlī and elsewhere, and Bābar, the founder of the so-called Mughal empire; the founders of the ʿĀdil Shāhī, Ḳuṭb Shāhī and Barīd Shāhī dynasties were all Turkish officers. These men achieved greatness out of a large number of soldiers of fortune and mercenaries, whose fate was more obscure. Tīmūr settled a number of families of Ḳarlugh Turks in what is now the Hazāra District [q. v.] (forming part of the North-West Frontier Province), on his return from his invasion of India in 1399, and their descendants are found there to the present day. A group of Ḳizilbāsh migrated from Kābul to the Pandjāb as recently as 1842 and their descendants have received grants of land and are permanently settled in the country.

Among the smaller groups of immigrants special mention must be made of the Persians, whose influence on Muhammadan culture in India has been considerable. Saints, religious teachers, poets and men of letters, as well as soldiers and statesmen, have brought into India the refinement and subtlety of the Persian genius. Traders from the Persian Gulf settled in the cities of Gudjarāt as early as the 9th century. The Ghōrīs and their Tādjīk followers belonged to the Iranian race. Reference has already been made to the refugees who fled into India to escape the savage onslaught of the Mongols; political troubles have driven Persians in other periods also to take refuge in India, e. g. in the 18th century some fled from their country when the Afghāns brought the Ṣafawid dynasty to an end in 1722, and others when Nādir Shāh seized the throne in 1736. Naturally, many Persians were attracted to the Shīʿah kingdoms in India, and Persian mercenaries still come as recruits to the Persian regiment of the Nawwāb of Cambay [q. v.].

A small number of Abyssinians or Somālīs, known as Ḥabashī or Sīdī, settled in Western India; mention of them as soldiers and sailors is found as early as the 13th century. The Sīdīs were admirals of the Mughal fleet, and a dynasty of Ḥabashī kings ruled over Bengal from 1486 to 1490; the chiefs of Djandjīra [q. v.] and Sachin [q. v.] are also of Ḥabashī origin.

The largest group of foreign stock is that of the Afghāns or Paṭhāns, who are found in greatest number in the north-west, but also as far east as Bengal and as far south as the Dakhan. The terms Afghān and Paṭhān are used indifferently by the natives of India to designate this large group of the Muhammadan population, but it is a matter of dispute as to whether the original Afghān and Paṭhān stocks were the same, or whether a purely Indian origin must not be assigned to the Paṭhāns [cf. AFGHĀNISTĀN, i. 149b]. There has been a constant stream of immigration from Afghānistān into India, from the end of the 12th century up to modern times. Most of the Muhammadan conquerors of India have entered the country through Afghānistān and have brought in their armies large numbers of Afghān soldiers, who received grants of land as military fiefs and settled in the country. Of the Afghān tribes found in India, the most widely distributed are the Yūsufzai, of whom a body of 1200 accompanied Bābar in his final invasion of India, and settled in the plains of Hindustān and the Pandjāb. Migrations on a large scale into the fertile plains of India have also taken place at various times, e. g. during the period of the Lōdī (1451—1526) and Sūr (1540—1555) Sulṭāns of Dihlī, the Prangī and Sūr tribes from which these dynasties sprang, and their neighbours, the Niyāzī, appear to have migrated almost bodily from Afghānistān into India. The great bulk of the Balōč has similarly migrated across the border into India; there are about ten times as many of them in India as in the whole of Balōčistān [q. v., i. 636 sq.].

2. POLITICAL HISTORY:

A. under Muhammadan rule.

The introduction of Islām into India dates from the invasion of Sind [q. v.] in 712 by Muḥammad b. al-Ḳāsim [q. v.]. This led to a permanent occupation of the valley of the Indus as far north as Multān, but the rest of India was unaffected, and it was not until the close of the 10th century that a fresh invasion began with the raids of Maḥmūd of Ghaznī [q. v.], which extended as far east as Kālindjar in Eastern Bundelkhand and as far south as Sōmnāth; but the province of Lāhōr was the only part of the country permanently occupied by his troops. The conquest of the rest of India dates from the campaigns of Muḥammad Ghōrī [cf. GHŌRIDS, p. 162-3] and his generals (1175—1205); on his return to Ghaznī he committed the charge of the military operations to Ḳuṭb al-Dīn Aibeg [q. v.], who became the first of the Sulṭāns of Dihlī; the conquests of his general, Muḥammad b. Bakhtyār [q. v.], extended his authority over the greater part of Bengal. When Muḥammad Ghōrī died in 1206, the greater part of India north of the Vindhya had been subjugated by his Turkī officers, some of whom now became practically independent sovereigns. But the Sulṭāns of Dihlī claimed a suzerainty, which they were sometimes able to enforce, over the other Muslim states. Thirty-four sovereigns reigned in Dihlī from 1206 to 1526; they fall into five dynasties, 1. the Slave kings, 1206—1290; 2. the Khaldjīs, 1290—1320; 3. the Tughluḳs, 1320—1413; 4. the Saiyids, 1414—

1451, and 5. the Lodīs, 1451—1526. During this period the Muḥammadan conquests were extended farther to the east and the south, in spite of frequent internal conflicts and revolutions, and the disasters caused by the inroads of Mongol hordes, at intervals from 1223 to 1305, and by the invasion of Tīmūr [q. v.] in 1398-1399. Outlying provinces took advantage of the weakness of the suzerain power, and a number of independent kingdoms arose which were ultimately absorbed in the Mughal empire; for an account of these, see the separate articles BENGAL, DJAWNPŪR, GUDJARĀT, MALWA, KHANDESH, BAHMANĪ DYNASTY (and the five dynasties that arose on the ruins of the Bahmanī kingdom, BARĪD SHĀHĪ, ʿĀDIL SHĀHĪ, NIẒĀM SHĀHĪ, ḲUṬB SHĀHĪ and ʿIMĀD SHĀHĪ). The invasion of Bābur [v. BABER] and his defeat of Ibrāhīm Lodī in the battle of Pānīpat [q. v.] in 1526 laid the foundations of the Mughal empire, but his son, Humāyūn [q. v.], was driven from his throne for 15 years, and the Afghān Shēr Shāh [q. v.] established the Sūr dynasty, which ruled in Dihlī from 1540 to 1555. Humāyūn regained his kingdom in 1555 but died the following year. His successor, Akbar [q. v.], was engaged in warfare during the greater part of his long reign (1556—1605) and brought under his authority the Muḥammadan kingdoms of Gudjarāt, Bengal, Kashmīr and part of the Dakhan [q. v.], and after breaking down the opposition of the Rādjpūts reconciled them to his rule by the wise policy he followed of conciliating his Hindu subjects. His son, Djahāngīr [q. v.] (1605—1627), and his grandson, Shāhdjahān [q. v.] (1627—1658), kept intact the Indian dominions of Akbar, and Awrangzīb [q. v.] (1658—1707) brought the Mughal empire to its greatest extent by the conquest of the last of the independent kingdoms of the Dakhan, Bīdjāpūr [q. v.] and subjected the whole of India as far south as Tanjore to his rule; but his intolerant policy towards the Hindus alienated the Rādjpūts, and the last twenty years of his life were spent in a vain attempt to crush the rising power of the Marāṭhās. Under his successors, the Mughal empire rapidly declined; the Marāṭhās encroached upon one district after another, and during the reign of Muḥammad Shāh (1719—1748) a general revolt of the provinces began, which resulted in the independence of the Dakhan from 1723 under the Niẓām of Ḥaidarābād [q. v.], of Awdh (Oudh) under Saʿādat Khān [q. v.] about the same period, of Bengal under Allahwardī Khān [q. v.] in 1740, and of Rohilkhand under the Rohillas [q. v.]. Further, the invasion of Nādir Shāh [q. v.] struck a blow at the very centre of the empire, from which it never recovered; his successor to the throne of Persia, Aḥmad Shāh Durrānī [q. v.], invaded the Pandjāb and occupied Dihlī in 1756-1757, and though he joined with other Muḥammadan forces to overthrow the Marāṭhās in the third battle of Pānīpat [q. v.] in 1761, the ruin of the Mughal empire was complete. Shāh ʿĀlam [q. v.] (1759—1806), in an endeavour to assert his authority in Bengal came in conflict with the English (1760-1761), and having fallen under the power of Shudjāʿ al-Dawla, Nawwāb Wazīr of Oudh [q. v.], shared his defeat in the battle of Baksar (1764). In the following year he granted to the East India Company the Dīwānī or financial administration of Bengal, Bihār and Orissa in consideration of an annual subsidy of 2,600,000 rupees, and under the protection of the British kept his court in Allāhābād until 1771, when he was persuaded to return to Dihlī; after a brief period of prosperity he was blinded by one of his officers in 1788 and became a puppet in the hands of the Marāṭhās, until General Lake's victory over them in 1803 set him free and left him with a nominal sovereignty over the city of Dihlī and the surrounding district, and a monthly pension of 90,000 rupees. (For an account of the short-lived Muḥammadan kingdom of Maisūr, 1761—1799, which was brought to an end by the capture of Seringapatam and the death of Tīpū Sulṭān [q. v.], and of the kingdom of Oudh, which was annexed by the British in 1856, see these articles.) Shāh ʿĀlam's son, Muḥammad Akbar (1806—1837), and his grandson, Bahādur Shāh (1837—1857), retained the empty titles of their ancestors, as pensioners of the East India Company, but Bahādur Shāh's complicity in the Sepoy Mutiny of 1857 led to his banishment to Rangoon, where he died in 1862.

None of the self-governing Native States under Muḥammadan rulers joined in the attempt to drive the English out of India, while the more important of these States, e. g. Ḥaidarābād, Bhopāl and Rāmpūr, rendered substantial and valuable assistance, without which the condition of the English would have been still more precarious than it was. After the government was assumed by the Crown in 1858, the territories of these States were enlarged by grants of land, and other rewards for their loyalty were given to them.

Bibliography: It is not possible to give here a detailed list of the numerous works on the history of the Muḥammadans in India; a bibliography of the original sources may be found in H. M. Elliot, *The History of India as told by its own historians. The Muhammadan Period. Edited and continued by J. Dowson* (London, 1867—1877); H. M. Elliot, *Bibliographical Index to the Historians of Muhammedan India* (Calcutta, 1849); H. Ethé, *Catalogue of Persian Manuscripts in the Library of the India Office* (Oxford, 1903); C. Rieu, *Catalogue of the Persian Manuscripts in the British Museum* (London, 1879—1895). The works of several of these historians have been published in the *Bibliotheca Indica*. A full bibliography is given in vol. iv. of N. Manucci, *Storia do Mogor, or Mogul India, 1653—1708*, translated by William Irvine (London, 1907-1908). For the bibliography of the works of Europeans who visited India during the Muḥammadan period, see E. F. Oaten, *European Travellers in India during the 15th, 16th and 17th centuries* (London, 1909). For separate dynasties and individuals, see the bibliography under the articles concerned. Among general histories, reference may be made to E. Thomas, *Chronicles of the Pathán Kings of Delhi* (London, 1871); A. Müller, *Der Islam im Morgen- und Abendland* (Berlin, 1885—1887); Muḥammad Dhakā Allāh, *Taʾrīkh-i Hindūstān* (Dihlī, 1897-1898); M. Elphinstone, *History of India*, 9th ed. (London, 1905); H. G. Keene, *History of India* (Edinburgh, 1906); S. Lane-Poole, *Mediaeval India under Mohammedan Rule* (London, 1903); S. J. Owen, *The Fall of the Mogul Empire* (London, 1912). Two volumes of the forthcoming *Cambridge History of India* will be devoted to

the history of the Muhammadans. A bibliography of works on *Numismatics* is given in O. Codrington, *Manual of Musalman Numismatics* (London, 1904) and in *Imperial Gazetteer of India*, vol. ii. (Chap. iv.)

B. under the British crown.

(i.) *Native States.* Nearly two-fifths of the total area of British India is administered by native chiefs. Of these Native States (693 in number) a certain number are governed by Muhammadans, under the suzerainty and protection of the British Crown; their rulers and their subjects are free from the control of the laws of British India; the rights of the chiefs as rulers within their own territories are guaranteed by the suzerain power, but they are not permitted to enter into political relations with foreign nations or other States. As a separate article is devoted to each of these States, all that is needed here is to give an enumeration of them, with bare details as to the annual revenue and the population in 1911. The largest of these Muhammadan States is Haidarābād, area 82,698 sqm., pop. 13,374,676, of whom about one-tenth are Musalmāns; the annual revenue is about £ 1,760,000; this is the only Muhammadan State that is in direct political relations with the Government of India; the others communicate either with an Agent to the Governor-General or with one of the Provincial Governments. In the Balūčistān Agency, Kalāt (area 73,278 sqm.) has a population of 359,086, of whom all but 13,180 are Musalmāns, rev. about £ 51,000, and Las Bēla (area 7,132 sqm.), a population of 61,205, of whom all but 1819 are Musalmāns, rev. about £ 15,000. In the Bombay Presidency, Khairpūr (6,050 sqm.), pop. 223,788, of whom 182,827 are Musalmāns, rev. about £ 108,000; Djunāgaṛh (3,284 sqm.), pop. 434,222, of whom 88,130 are Musalmāns, rev. about £ 175,000; Pālanpūr (1,766 sqm.), pop. 226,250, of whom 25,138 are Musalmāns, rev. about £ 48,700; Cambay (350 sqm.), pop. 72,656, of whom 9,715 are Musalmāns, rev. about £ 37,000; Djandjīra (324 sqm.), pop. 88,747, of whom 14,769 are Musalmāns, rev. about £ 40,000; Rādhanpūr (1,150 sqm.), pop. 65,567, of whom 8,520 are Musalmāns, rev. about £ 26,000; Balāsinor (189 sqm.), pop. 40,563, of whom 4,578 are Musalmāns, rev. £ 8,333; Sachin (42 sqm.), pop. 18,903, of whom 2,278 are Musalmāns, rev. about £ 20,000; Savanūr (70 sqm.), pop. 17,909, of whom 5,448 are Musalmāns, rev. £ 6,666; three small States pay tribute to the Mahārādjā Gaikwar of Baroda, — Dābha (12 sqm., rev. £ 266), Pāndra (11 sqm., rev. £ 1,000), and Ranūn (6 sqm., rev. £ 200); these three chiefs are descended from a Rādjpūt, named Harsinhdjī who was in the service of Maḥmūd Bīgara, Sulṭān of Gudjarāt, and became a Musalmān in 1483. In the Central India Agency, Bhōpāl (6,902 sqm.), pop. 730,383, of whom only 81,996 are Musalmāns, rev. about £ 200,000; Djaora (568 sqm.), pop. 75,951, of whom 13,686 are Musalmāns, rev. £ 60,000; Baonī (122 sqm.), pop. 20,121, of whom 2,549 are Musalmāns, rev. £ 6,666; among the 153 minor states connected with this Agency there are a few whose rulers are Muhammadans, e. g. Korwai (111 sqm.), pop. 18,456, of whom 2,309 are Musalmāns, rev. about £ 2,500; Basoda (40 sqm.), which is nominally subordinate to the Mahārādjā of Gwalior, but pays him no tribute, pop. 4,630, of whom 737 are Musalmāns, rev. £ 1,266; Muḥammadgaṛh (29 sqm.), pop. 2,863, of whom 422 are Musalmāns, rev. £ 866; Pathārī (22 sqm.), pop. 3,866, of whom 390 are Musalmāns, rev. £ 600, and a few still smaller ones. In the Madras Presidency, Banganapalle (255 sqm.) is the only Native State with a Muhammadan ruler, pop. 39,355, of whom only 8,054 are Musalmāns, rev. £ 6,400. In the Pandjāb, Bahāwalpūr (15,918 sqm.), pop. 780,641, of whom 654,247 are Musalmāns, rev. £ 182,000; Malēr Kōṭla (167 sqm.), pop. 71,144, of whom 25,042 are Musalmāns, rev. £ 24,000; Lohāru (222 sqm.), pop. 18,597), of whom 2,401 are Musalmāns, rev. £ 4,400; Paṭaudī (52 sqm.), pop. 19,543, of whom 3,338 are Musalmāns, rev. £ 5,400. In the Rādjpūtāna Agency, Tōnk (2,600 sqm.), pop. 303,181, of whom 40,432 are Musalmāns, rev. £ 89,000, is the only State with a Muhammadan ruler. In the United Provinces, the only Muhammadan State is Rāmpūr (892 sqm.), pop. 531,217, of whom 244,604 are Musalmāns, rev. about £ 240,000.

(ii.) *British India.* After the suppression of the Sepoy Mutiny, the Musalmāns (especially in Northern India) found themselves exposed to grave suspicions on the part of the British government. Though large numbers of Hindus had taken part in this insurrection, the ostensible aim of it had been the restoration of the Mughal Empire and had consequently enlisted the sympathies of many Muhammadans. The estates of those who were convicted of complicity with mutineers were confiscated, and thus a number of families of the old Muhammadan aristocracy were ruined. The members of these aristocratic families for the most part held aloof from the service of the British government and sullenly watched the Hindus crowd into those numerous administrative and judicial posts which the Muhammadan aristocracy were by tradition and training peculiarly fitted to fill. Saiyid Aḥmad Khān (q. v.), himself a member of an old Dihlī family, whose maternal grandfather had been wazīr to the Mughal emperor, Akbar Shāh II, laid upon himself the task of reconciling his co-religionists to British rule. He first combated the opinion held by some British officials that the Muhammadans had taken a predominant part in the Mutiny, in his treatise, "*Risālah-i-khair-khwāhān Musalmānān* (*An Account of the loyal Mahomedans of India*)", (Urdu and English, Meerut, 1860), in which he enumerated the various instances of distinguished devotion to the English on the part of Muhammadan soldiers, officials and others. At the same time he sought to reconcile his co-religionists to the rule of a Christian power, by refuting the intolerant opinions of those fanatics who condemned all social intercourse and friendship with non-Muslims. In this connection he published a pamphlet entitled *Aḥkām-i-ṭa'ām-i-ahl-i-kitāb* (Benares, 1868), the purpose of which was to prove by means of quotations from the Ḳur'ān, the Ḥadīth, and the works of theologians and jurists, that it was lawful for Muhammadans to eat with Christians and to mix in familiar social intercourse with them. Muhammadan opinion at this period was much exercised as to the question whether India under British rule was to be regarded as *Dār al-Ḥarb* or as *Dār al-Islām* and whether a *djihād* against the Christian rulers was obligatory on the Musalmāns. A considerable

literature was published on this subject and even the 'Ulamā' of Mecca were asked to deliver a *Fatwā* (v. W. W. Hunter, *The Indian Musalmans* (London, 1871); Syed Ahmad Khān, *Review on Dr. Hunter's Indian Musalmans* (Benares, 1872)). The opinion began to prevail that inasmuch as the British Government left the Muhammadans free to practise the observances of the faith and made no attempt to restrict their religious freedom, they might live under its rule as loyal subjects. But their power and wealth had been steadily declining under British rule, largely through their failure to adjust themselves to the changed conditions of administration. Up to the early part of the nineteenth century they had enjoyed the greater part of state patronage, as collectors of revenue, military and police officers, and judges, but as the old order changed, these posts came to be filled by English and Hindu officials; when in 1837 Persian ceased to be the official language, and English or the provincial vernaculars took its place, a considerable number of subordinate offices passed out of the hands of the Muhammadans, and the abolition of the posts of Ḳāḍī and Ḳāḍī al-Ḳuḍāt closed to a large number of learned men what had previously been an honourable means of livelihood. (Act xii. of 1880 gave power to the Provincial Governments to appoint a Ḳāḍī in any particular locality if the Muhammadans of the place so desired). Though the more far-sighted members of the community recognised that the altered conditions of the country called for a change in the methods of Muhammadan education and urged their co-religionists to study western sciences and learn English, their efforts for some time remained fruitless and met with much opposition.

In 1877 Saiyid Amīr 'Alī founded in Calcutta the National Muhammadan Association, which was afterwards, when branches had been started in other cities of India, styled the Central National Muhammadan Association; in 1882 this Association endeavoured to establish a national conference of Muhammadans, but the project fell through on account of the strong opposition of Saiyid Aḥmad Khān. In 1885 the first meeting of the Indian National Congress was held in Bombay; this is a deliberative assembly, composed of delegates from all parts of India, which meets once a year to discuss questions of politics and administration. While the third meeting was being held in Madras, Saiyid Aḥmad Khān delivered in Lucknow on the 28th December, 1887, the first of a series of political lectures with the object of inducing the Muhammadans to hold aloof from the National Congress and similar political movements. He also endeavoured to organise the Muhammadan opposition by the formation of a society entitled "The United Indian Patriotic Association", to which more than fifty Andjumans in various parts of the country became affiliated; but its activity was short-lived, mainly through lack of funds to continue its propaganda. (*Pamphlets issued by the United Indian Patriotic Association. No 2. Showing the Seditious Character of the Indian National Congress and the opinions held by eminent natives of India who are opposed to the movement.* (Allahabad, 1888)). But though his efforts were successful in persuading the main body of his co-religionists to refuse their support to the National Congress, each yearly gathering continued to be attended by a small number of Muhammadans, especially from the cities of Bombay, Calcutta and Lucknow, and on two occasions the deliberations of the Congress were presided over by a Muhammadan, — the third (Madras, 1887) by the Hon. Mr. Badruddīn Taiyibdjī, (afterwards Judge of the High Court), belonging to a cultivated family of Bohoras in Bombay, and the twelfth (Calcutta, 1896) by Raḥmat Allāh Muḥammad Saiyānī; the latter in his presidential address enumerated and discussed the objections of the Muhammadans to joining the Indian National Congress; they were mainly that the success of the aims of the Congress would imply that a preponderating share in the administration of the country would pass into the hands of Hindus and that the Muhammadans would be reduced to an inferior position; that the movement was disloyal to the British Government; that western methods of government, and especially of selecting officers for administrative appointments on the basis of educational qualifications, etc., were not suited to India and would be detrimental to the Muhammadans, as owing to their backwardness in education they could not readily adapt themselves to such methods. (*Report of the Twelfth Indian National Congress*, p. 16 *sqq.* (Calcutta, 1887)); Sir Saiyid Aḥmad Khān: *The Present State of Indian Politics* (Allahabad, 1888)). The main body of the Muhammadans continued to hold aloof from the Indian National Congress, and from 1886 held on the same dates a separate gathering of their own, entitled the Muhammadan Educational Conference (v. § 3). But after the powerful personality of Sir Saiyid Aḥmad Khān was withdrawn, some of the younger generation came to the conclusion that Muhammadan interests suffered in consequence of their abstention from political life and they founded an organisation entitled the All-India Muslim League, the first meeting of which was held at Dacca in December 1906. In October of the same year a deputation of influential Muhammadans had presented a memorial to the then Viceroy, Lord Minto, and urged that special consideration should be given to the Muhammadans in the proposed enlargement of the Legislative Councils and in the bestowal of posts in the higher branches of the Public Services. This deputation gave the impulse to the formation of the All-India Muslim League, which rapidly extended its organisation by the establishment of Provincial Leagues affiliated to the central body, and holds a general meeting every year in some city with a large Muhammadan population.

In 1907 Nawwāb 'Imād al-Mulk Saiyid Ḥusain Bilgrāmī (formerly Director of Public Instruction in the Haidarābād State) was made a member of the Council of the Secretary of State for India, and was the first Indian to become a member of that body. In 1909 Saiyid Amīr 'Alī (formerly a judge of the High Court, Calcutta) was appointed by the King a Privy Councillor, and as a member of the Judicial Committee of the Privy Council sits in the final court of appeal for Indian cases. In 1910 Saiyid 'Alī Imām was made Legal Member of the Council of the Governor-General of India, being the second Indian to hold such high office. These appointments were made in pursuance of a policy of associating Indians more closely with the direction of affairs of state, — a policy which led to the passing of the Indian Councils Act in 1909. This Act and the regula-

tions and rules under it increased the size of the legislative councils, and arranged for the inclusion of elected members instead of all the members being nominated as before, and gave to these councils greater liberty of discussion and interrogation than they had before enjoyed. While in the Governor-General's legislative council an official majority is maintained, in all the other (i. e. the provincial) legislative councils, there must be a non-official majority. The Muhammadans claimed to be represented as a separate community, and special regulations were framed for securing the election of Muhammadan members, in accordance with the relative importance and numerical strength of the Muhammadans in different provinces. Much dissatisfaction however was expressed in regard to the regulations for the Muhammadan electorate, and the Muhammadans felt that due consideration had not been paid to their claim. The declining fortunes of such independent Muhammadan States as Morocco, Persia and Turkey excited much sympathy in India, and this excitement of feeling was intensified by the successive disasters of the Turks in their wars with Italy and the Balkan States. It was believed that the Christian powers of Europe had banded themselves together to destroy Islām, and the British Government was blamed for not intervening to save Turkey from its enemies. This bitterness of feeling was intensified by the refusal of the Government of India in 1912 to grant powers of affiliation to the proposed Muslim University in Aligarh [q. v.], and by the re-adjustment of the boundaries of the province of Bengal, whereby the large Muhammadan population of Eastern Bengal became again a minority in respect to the Hindus of Bengal, and lost that opportunity of self-development which had been opened to them in 1905 by the formation of the separate province of Eastern Bengal and Assam. The most recent tendency in the political life of the Indian Muhammadans is the abandonment by some of the younger generation of the separatist policy of the older school, and co-operation with the Hindus in political activities; and a Muhammadan, — Nawwāb Saiyid Muḥammad, — was elected as President of the National Congress in 1913. The outbreak of war between Great Britain and Turkey in 1914 evoked a fervid expression of loyalty towards the British Government, in which the Musulmān princes, the Anjumans and other organised bodies, and the leaders of Muhammadan public opinion, all joined.

Bibliography: Materials for the history of this period are chiefly to be found in periodical literature, but many general works on India make special reference to the Muhammadans, e. g. Altāf Ḥusain Ḥālī, *Ḥayāt-i Djāwīd* (Kānpūr, 1901); W. W. Hunter, *The Indian Musalmans* (London, 1871); Ameer Ali, *A Cry from the Indian Mohammedans* in *The Nineteenth Century*, xii. 193 *sqq.* (London, 1882); Sir Richard Temple, *India in 1880* (London, 1881); Sir Alfred C. Lyall, *Asiatic Studies*, First Series, chap. ix. (London, 1907); W. S. Blunt, *India under Ripon* (London, 1909); Sir John Strachey, *India*, chap. xvii., xxii. (3rd ed. London, 1903); E. Piriou, *L'Inde contemporaine et le mouvement national*, chap. v. (Paris, 1905); Valentine Chirol, *Indian Unrest*, chap. ix. (London, 1910); Sir Bampfylde Fuller, *Studies of Indian Life and Sentiment*, chap. vii. (London, 1910); J. Chailley, *L'Inde Britannique* (Paris, 1910); Sir J. D. Rees, *Modern India*, chap. xi. (London, 1910); *Islam and Missions*, chap. x., xv., xix. (New-York, 1911); S. Khuda Bakhsh, *Essays Indian and Islamic*, chap. vii. (London, 1912); S. Mitra, *Anglo-Indian Studies*, chap. xi. (London, 1913).

3. Social Organisation.

The official method adopted under Muhammadan rule for establishing a scale of social precedence was the granting of a *manṣab* (*rank, post*), which varied according to the number of men the *manṣabdār* was supposed to be placed in command of. Though primarily used of the military service, *manṣab* was not a term confined to this reference; all persons in the employment of the government above the position of a common soldier or messenger, whatever the nature of his duties, civil or military, obtained a *manṣab*. Some of the *manṣabdārs* were paid in cash, but the commonest method of payment was by the assignment of the land revenue of a certain number of villages or a tract of country. In the case of persons who were not in the active service of the state, a subsistence allowance was made either in the form of a cash payment (*waẓīfa*) or a grant of land (*milk* or *madad-i ma'āsh*); such grants were made to students, men distinguished for learning or piety, etc. By theory these appointments and grants were personal or for life only (for 'Alā' al-Dīn Khaldjī's arbitrary resumption of all such grants, see Baranī, *Ta'rīkh-i Fīrūz-Shāhī*, p. 283), but there was a tendency for them to become hereditary, and thus the original scheme of a graded scale of payment and official rank, dependent entirely on the good-will of the sovereign, broke down, partly on account of the unworkable character of the institution and partly in consequence of a lack of continuity in the administration. (See *Ā'īn-i Akbarī* (Blochmann), i. 236 *sq.*, 268 *sq.*); Paul Horn, *Das Heer- und Kriegswesen der Grossmoghuls* (Leiden, 1894), p. 11 *sq.*; W. Irvine, *The Army of the Indian Moghuls* (London, 1903), p. 3 *sq.*). A more popular classification of the various sections of Muhammadan society would appear to have owed its origin to the influence of the social system of the Hindus. Just as Hindu tradition gives the number of the higher castes as four, so the Ashrāf (or, noble) sections of Muslim society fall into four classes, (1) Saiyid, (2) Shaikh, (3) Mughal, (4) Paṭhān. (1) The Saiyids claim descent from 'Alī, either through Fāṭima (the Fāṭimī Saiyids) or through some other of his wives (the 'Alawī Saiyids). The Fāṭimī Saiyids have various designations according to the names of the twelve Imāms, e. g. Ḥasanī, Ḥusainī, Djaʿfarī, Mūsawī, Raḍawī, etc.; or according to the birth-place of the ancestor who first came into India, e. g. Bukhārī, Gīlānī, Kirmānī, Gardīzī, etc. The Saiyids in India tend to arrogate to themselves the position of an aristocracy in the Muhammadan community, but economic conditions compel them to follow all kinds of callings, and many of them are employed in humble occupations or gain a scanty livelihood as agriculturists. The well-to-do and educated Saiyids carefully preserve their genealogical trees and as a rule intermarry only with Saiyids or even with Saiyids of their own group. But many persons arrogate to themselves the appellation Saiyid, who have no rightful claim

to this honourable title. Akbar is said to have allowed some converted Brahmans to call themselves Saiyids. A well-known proverb, current throughout northern India, represents a successful man as saying, "Last year I was a weaver; this year I am a Shaikh; next year, if prices rise, I shall be a Saiyid." According to popular superstition, fire cannot harm a true Saiyid, and Saiyid Maḥmūd of Bārha (one of Akbar's generals) is said to have successfully submitted to this test by standing for an hour unharmed in the middle of a fire (Blochmann, *Āʾīn-i Akbarī*, p. 390). (For a modern example of this test being applied, see J. C. Oman, *The Brahmans, Theists and Muslims of India* (London, 1907), p. 323 *sq.*). (2) Shaikh is an honorific which is considered properly to belong to persons who can trace their descent from some member of the tribe of the Ḳuraish. The Shaikhs are further designated Ṣiddīḳī, if claiming descent from Abū Bakr, Fārūḳī, if from ʿUmar, ʿAbbāsī, if from ʿAbbās b. ʿAbd al-Muṭṭalib, etc. But Shaikh is an honorific commonly assumed by Hindu converts, especially from among the lower classes, and as many as 28½ millions (i. e. nearly half the total Muhammad population of India) returned themselves in the Census of 1901 as being Shaikhs. It is of course quite impossible that more than a very small minority of these persons could have had any rightful claim to be of Arab origin. (3) The so-called Mughals in India claim descent from some ancestor who came into the country with the invading army of Bābur or was attracted thither during the reign of one of his descendants, but in cases where this claim can be made out, the family is generally found to be of Turkī origin. (N. Elias, *The Tarikh-i-Rashidi*, Introduction, pp. 88—90, 128). These persons add Beg after their names, as an honorific. As the number of persons, who style themselves Mughal, is small compared with either Shaikhs or Paṭhāns, the number of Muhammadans descended from Hindu converts who lay claim to Mughal descent is not very large, but there is a tendency (especially in the Pandjāb) for men of low social status to assume Mughal as a caste designation. In the Hazāra District the working of the Pandjāb Land Alienation Act (which was introduced in 1904 in the interests of petty landowners and agriculturists, to arrest the transfer of land to money-lenders) has given a great stimulus to this tendency, as increased prosperity prompts the wish to attain to a more dignified status. (H. D. Watson, *Gazetteer of the Hazara District*, p. 34, (London, 1908)). (4) Similarly, tribes of undoubted Hindu origin, and even Saiyids and Mughals, will assume the name of Paṭhān. Tribes dwelling on the border of Afghānistān and exposed to the raids of their turbulent neighbours are said to have invented histories of their Afghān origin, as a protection against ill-treatment; or in cases where this motive was absent but the Paṭhāns were the dominant race, it is common to find men of quite different stock, adopting Paṭhān as a caste-name; this is especially noticeable in the case of Hindu converts of Rādjpūt origin, who call themselves Paṭhān and even assume the title of Khān; thus we find a large and influential clan bearing the mongrel name of Lālkhānī Paṭhān, which claims descent from Lāl Singh, a favourite of the Emperor Akbar, who was given the title of Lāl Khān; his son was the first member of the family to embrace Islām. In Orissa, Paṭhān is used as a generic name for all Muhammadans, just as Turk is the synonym for Musalmān in some of the eastern districts of the Pandjāb.

Such Muhammadans as cannot lay claim to belong to the Ashrāf are styled *Adjlāf* and include the converts of low social status, especially those whose occupation causes them to be formed into functional groups, e. g. the weavers (Djulāhā, a widespread Muhammadan caste), cotton-carders, barbers, tailors, butchers, etc. These castes being descended from converts from Hinduism retain many customs with regard to marriage corresponding to those of the Hindu castes to which they formerly belonged; they also preserve the system of caste government, known as the *pančāyat*, which deals with breaches of the social custom of the caste in respect of trade, religion or morality, and imposes fines and other punishments. (Fazli Rabbee, *The Origin of the Musalmans of Bengal*, (Calcutta, 1895), chap. iv. v.; *Census of India, 1901*, vol. vi. 439 *et seq.*, vol. xvi. 244 *et seq.*)

The spread of western education led to the formation of societies, which introduced into India a form of social organisation previously unknown to the Indian Musalmāns. These societies or Andjumans give to energetic and enterprising men an opportunity of coming forward as leaders of the community, irrespective of their position in the old order of society, and each Andjuman tends to become a centre of social activity, and thus to introduce into the community a new principle of social organisation. The aims of these Andjumans are various, educational, social, political, religious. One of the earliest of them was probably the Muhammadan Literary Society founded in Calcutta by Nawwāb ʿAbd al-Laṭīf in 1863. Later in the same year Saiyid Aḥmad Khān founded the Scientific Society of Ghāzīpūr (transferred in the following year to ʿAlīgarh), with the object of translating scientific and historical works from English into Urdū; a press was established in ʿAlīgarh and a series of translations printed there, but the activities of this Society ceased when the Muhammadan Anglo-Oriental College was founded in 1875. In order to impress upon the Muhammadans the importance of higher education, Saiyid Aḥmad Khān in 1886 originated the Muhammadan Educational Congress (after the second meeting, styled Conference, and finally, the All-India Muhammadan Anglo-Oriental Educational Conference), a yearly gathering held in various cities, chiefly in Northern India; provincial educational conferences were organised later as well as educational associations in several towns. This Conference made its appeal chiefly to such Muhammadans as were interested in the promotion and spread of western learning among their co-religionists, but the Nadwat al-ʿUlamāʾ, established in 1895, was founded with the object of conserving the older learning, in Arabic and Persian, with such modifications and additions as were demanded by modern conditions; it conducts a school in Lucknow, the aim of which is primarily to train religious teachers. The Moslem Institute of Calcutta, started in 1903, is a literary society of the same type as those found in other cities, e. g. the Madras Muhammadan Literary Society etc. Some Andjumans combine educational work with other activities, e. g. the Andjuman Ḥimāyat-i Islām of Lāhōr has among its objects the refutation of objections brought

against Islām by its opponents, the spread of religious education, the care of orphans, the maintenance of preachers etc.; it accordingly has founded a number of schools and a college affiliated to the University of the Pandjāb, established orphanages, and by preaching and other means promotes the defence and the propagation of Islām. In most of the capital cities of India, there is a central body formed to promote Muhammadan interests generally throughout the province, — in Bombay, Lāhōr, Nāgpūr and Patna called Andjuman-i Islāmiya, in Madras Andjuman-i Islām, in Calcutta the Central National Muhammadan Association, in Dacca the Islām Association of Eastern Bengal. In addition to these societies having an extensive sphere of operations, there is hardly a town in India, with any considerable Muhammadan population, that has not got its own local Andjuman, but these Andjumans are too numerous for a list to be given here; many of them are short-lived and depend for their continuance in existence to the zeal of some one individual, and perish with him. In recent years, especially in Northern India, in consequence of the attacks made upon Islām by the Ārya Samādj, societies have been formed of an apologetic and propagandist character, e. g. Andjuman Ḥimāyat Islām (Ādjmīr), Andjuman Tablīgh-i Islām (Ḥaidarābād), Madrasa Ilāhiyāt (Cawnpore), Andjuman Hidāyat al-Islām (Dihlī) etc. The latest type of Muhammadan society to make its appearance is the political, in the form of the All-India Muslim League (v. § 2).

4. Law and Administration.

The system of law most widely accepted among the Sunnis of India was that of the Ḥanafī school, but that of the Shāfiʿī school also found adherents and is accepted by a small number of Muhammadans in the provinces of Bombay and Madras and the Pandjāb to the present day. The Shīʿahs, wherever possible, have put into force the precepts of their own law-books and the decision of their Mudjtahids. But even under Muhammadan rule, the extent to which Muslim law was followed, varied from time to time in different parts of the country. In towns and cities where the learned could make their influence felt and could uphold a standard of orthodoxy, the prescriptions of the *sharʿ* could be more completely enforced; in country districts, however, among the converts from Hinduism earlier institutions survived, in spite of their being in direct contradiction to the ordinances of the written law. Justice was administered by Ḳāḍīs, with the assistance of Muftis as exponents of the laws of Islām, which by theory were independent of the state; but the real power remained in the hand of the sovereign and his officials, who did not hesitate to intervene when, and to whatever extent, they thought fit. Baranī [q. v.] gives an account of an interview (about 1300 A. D.) between ʿAlā al-Dīn Khaldjī and Ḳāḍī Mughīth al-Dīn in which the latter points out the many ways in which his sovereign's methods of administration ran counter to the laws of Islām, but the Sulṭān states that his policy is to consult for the good of the kingdom and the requirements of the situation, without considering whether the orders he gives are in accordance with the *sharʿ* or not (*Taʾrīkh-i Fīrūzshāhī*, p. 266 *sqq.*; Elliot-Dowson, iii. 183). Even the orthodox Awrangzīb could interfere with the legal decision of a ḳāḍī, when it did not fall in with his wishes (*Aḥkām-i ʿĀlamgīrī* v. Jadunath Sarkar, *Anecdotes of Aurangzib*, pp. 141-2). The ḳāḍī dealt with all cases of dispute between Hindus and Muhammadans, and the penal ordinances of the Muslim law were applied to all criminal cases and offences against the state. But the Hindus were left to settle their internal disputes in accordance with their own laws or customs. When in 1765 the grant of the dīwānī of Bengal, Bihār and Orissa was made to the East India Company, Muhammadan law continued to be administered, as before, by Muhammadan judges, but in 1772 English judges were appointed who administered the same law, with the help of Muftis acting as expert advisers in the courts; similarly Pandits sat as assessors to advise in cases tried according to Hindu law. But from time to time the Muhammadan criminal law was modified by the Company's Regulations and the milder provisions of English law substituted, but the Muhammadan element did not entirely disappear until 1862, when the Penal Code and the first Code of Criminal Procedure came into force; in course of time also the laws relating to revenue, land tenures, procedure and evidence have been replaced by the enactments of the English legislature. But questions relating to family relations and status (e. g. marriage, divorce, maintenance and guardianship of minors, succession and inheritance), religious usages and institutions, and dispositions of property by gift, will and *waḳf* [q. v.], are still governed by the Muhammadan law, provided that the Muhammadans themselves wish it to be applied; for in certain parts of India, it has been superseded in many respects or considerably modified by customs adopted from earlier Hindu times, and sanctioned by the legislature and the courts; thus custom takes precedence of Muhammadan law in the Pandjāb, Oudh, the Central Provinces, the Bombay Presidency, and among the Māppillas of Madras. In the Pandjāb, for example, in some districts a widow is not entitled to a share in the property of a deceased husband, but merely to maintenance; following the Hindu practice of adoption, a sonless proprietor may appoint a kinsman to succeed him as heir; in contradistinction to the Muhammadan law of gifts (*hiba*), ancestral immoveable property is ordinarily inalienable, except with the consent of male descendants, or, in the case of a sonless proprietor, of his male collaterals. The Memans [q. v.] of Kačč, who are descended from Hindu converts chiefly of the Lohāna caste, are still governed by Hindu law in questions of inheritance, though a large section of the community wish in future to follow the Sunnī law of the Ḥanafī school to which they belong. Similarly, the Sunnī Bohoras [q. v.] of northern Gudjarāt follow Hindu law in matters of inheritance and succession. The Khodjas [q. v.] in the Bombay Presidency follow Hindu custom in refusing to females any share in their father's estate, and generally appeal to Hindu law or custom in regard to all questions of inheritance and succession; the right of divorce is limited by the necessity of obtaining the consent of the djamāʿat (or, assembly of the community) according to the custom of the sect. The Māppillas [q. v.] in North Malabar follow the Marumakkattāyam (i. e. descent through sister's children) system of inheritance, according to which property descends through the female

line and sons have no claim to a share of their father's property or to maintenance therefrom; they ordinarily follow the custom of holding family property undivided, as the joint property of all the descendants of a common ancestress, in the female line only, each member of the joint family being entitled to maintenance from the property so held; but some Mappillas, while following the Marumakkattāyam system in reference to the joint family property, are governed by Muhammadan law in regard to the self-acquisition of individual members of the family.

Administration.

The early Muhammadan conquest of India was more of the nature of a military occupation than an actual appropriation of the soil of the country. The invaders were comparatively few in number, and were constantly engaged in fighting in order to make their position secure; they were content to receive tribute from the Hindu princes who submitted to the new rule, without interfering in the internal government of their dominions; in the parts of the country under the more immediate rule of the conquerors, the native revenue officers were not displaced and collected the revenue much as before. But as Muhammadan power became consolidated and more Muhammadans settled in the country, the internal management of the provinces came to be taken under the direct control of the imperial power, and the Hindu Rādjas tended to become revenue officials, and both the Rādjas and their former nobles sank to the position of landlords paying revenue to the government. At the same time there was a tendency for the government to enhance the amount of its demand; according to Hindu law the proper share of the king was one-sixth of the produce of the soil, but under Muhammadan rule attempts were made to exact more, and ʿAlāʾ al-Dīn (1296—1316) at one time claimed as much as a half. The chief source of revenue was this share in the produce of the soil, supplemented by the *djizya* [q. v.], which in India was a poll-tax paid by the Hindus; but the latter tax was irregularly levied, and was abolished by Akbar, while Awrangzīb's attempt to re-impose it brought about a rebellion; a number of petty cesses were also imposed, often of a very oppressive character (Elliot-Dowson, iii. 182, 377). According to the Muhammadan system all land assessed for revenue was divided into the *khāliṣa* lands paying revenue direct to the royal treasury, and the *djāgīr* lands, the revenue of which was assigned to individuals, e. g. ministers, courtiers, and especially military commanders, who took the revenues for their own support or that of a military force which they were bound to maintain. The djāgīr was originally only a life-grant and reverted to the State on the death of the grantee, and the djāgīrdār was not allowed to take more than the sum assigned to him, according to the terms of his *sanad*, and if more came into his hands, he had to account for the surplus to the State treasury. But such djāgīrs tended to become hereditary, especially when the central government was weak, and the granting of a new *sanad* to the incoming heir became a matter of form, or no fresh *sanad* was granted at all and the djāgīrdār came to be looked upon as a proprietor of the land and could do much as he pleased. Attempts were made at times to reduce the system of land tenure and assessment to order, the most successful being that connected with the name of Akbar [q. v.], who entrusted his finance minister, Tōdar Mall, with the task of re-organising the revenue system; the object of the new system was to substitute a money-revenue at a fixed rate for a revenue in kind varying with the crop. A fixed standard of measurement, the *bīgha* (q. v.), was adopted, the land was surveyed, and the average yield was computated by ascertaining the actual produce for a number of years; the share of the government was fixed as one-third of the average produce, payable in money (unless the cultivator choose to continue to pay in kind). Tōdar Mall commenced the survey in 1571, but the new assessment was never successfully extended to all parts of the empire, and considerable changes were introduced by later rulers; but Akbar's land-revenue system is the basis of that found in India at the present day. Akbar further organised the administration by dividing his empire into 15 *ṣūba*'s or provinces, sub-divided into *sarkār*'s and these again into *pargana*'s; this arrangement secured a centralization of government and with some slight changes lasted throughout the period of Muhammadan rule.

5. Religion.

a. **Sects.** The majority of the Indian Muslims are Sunnis [q. v.], and owing to the high level of theological learning maintained by the ʿulamāʾ for centuries and the close relations kept up with centres of religious life and thought in other parts of the Muslim world, there has always been a large body of orthodox opinion and practice among the Indian Sunnis, and these have not differed materially from similar manifestations in other Muslim lands. The Shīʿahs [q. v.] have always been in a numerical minority in India; under the rule of the Shīʿah sulṭāns of Bīdjāpūr [q. v.] and Golkonda [q. v.], and later under that of the Kings of Oudh [q. v.], the Nawwābs of Murshidābād

[q. v.] and such of the Nawwābs of Rāmpūr as became Shī'ah, they enjoyed the favour of the ruling power; but under Sunnī rule, they were often exposed to persecution and accordingly practised taḳīya [q. v.], i. e. concealment of their distinctive doctrines. The Shī'ahs in India form less than 10 per cent of the total Muslim population and are mainly of Persian or Turkī descent, with the exception of the converts of Hindu origin, belonging especially to the Ismā'īlī sections of the Bohoras and Khōdjas [q. v.]. Since 1907, the Shī'ahs have held an annual gathering, called the All-India Shī'ah Conference.

The expectation of the coming of the Imām Mahdī [q. v.] has given rise to various religious movements throughout the whole of the Muslim world; such manifestations as found in India will be found described under the separate articles MAHDAWĪ (GHAIRMAHDAWĪ), NUKṬAWĪ, NŪRBAKHSHĪ and ROSHANĪ.

Of the sects that have arisen through the influence of Hinduism, some account is given in § 5 (c) below. Among the modern sectarian developments, the most important are the Wahhābīs [q. v.], the Aḥmadīyah [q. v.], and the Ahl-i Ḳur'ān. The Wahhābī doctrines were introduced into India early in the 19th century by Saiyid Aḥmad [q. v.] and Sharī'at Allāh [v. art. FARĀ'IḌĪ], who initiated entirely independent movements; the Wahhābīs usually denominate themselves either Ahl-i Ḥadīth (people of the tradition), as accepting the Ḥadīth [q. v.] but rejecting the glosses of commentators and the four traditionary schools of legal interpretation, or Muwaḥḥid (Unitarian) as opposing all practices that obscure the recognition of the Unity of God, such as prayers to Muḥammad and the saints, visits to their tombs, etc., or Rafi'-yadain, because of their practice of raising the hands to the ears while praying. The Ahl-i Ḳur'ān, a small sect founded in 1902 by 'Abd Allāh Čakrālawī, go still further than the Wahhābīs in their rejection of all traditionary theology and accept the Ḳur'ān alone as their guide in matters of faith and practice; they have devised a new form of prayer and do not repeat either the Adhān [q. v.] or prayers for the dead. The Nēcharī, the followers of the rationalising theology of Sir Saiyid Aḥmad Khān, cannot rightly be described as a sect, nor are their small numbers as shown in Census Reports indicative of the wide-spread influence of this reformer on the theological opinions of his co-religionists; they are rather representative of a current of thought that is profoundly influencing the attitude of mind towards Islām of the younger generation of Indian Musulmāns. The Nēcharī, like the Ghair-muḳallid, forms no ecclesiastical organisation, but shares in the revolt against taḳlīd [q. v.], (or, the blind acceptance of religious authority), which has been described as "the one movement in the Sunnī Church which contains the greatest promise" (Syed Ameer Ali, *The Spirit of Islam*, London 1896, p. 521-522).

2. Religious orders. Abu 'l-Faḍl (*A'īn-i Akbarī*, i. 203-210, Trans., iii. 354) enumerates 14 religious orders, — all of the Sunnī sect. Those that have exercised the greatest influence over the religious life of India are the Čishtī, the Suhrawardī, the Ḳādirī, the Shaṭṭārī and the Naḳshbandī. The **Čishtī order** (founded by Khwādja Abū Aḥmad Abdāl Čishtī, ob. 966) was introduced into India by Khwādja Mu'īn al-Dīn Čishtī, who was born in Sīstān but came to India and settled in Adjmīr, where he died in 1236 [s. ČISHTĪ]; his tomb attracts to Adjmīr thousands of pilgrims every year and is venerated by Hindus and Musulmāns alike (*Journal of Indian Art*, vol. iii. p. 8). He counts among his successors some of the most famous saints in India: Khwādja Ḳuṭb al-Dīn Bakhtiyār Kākī, who was born in Farghāna, but after a wandering life spent in visiting various eminent saints, passed his last years in intimate friendship with Mu'īn al-Dīn Čishtī and died in the same year as his spiritual teacher and friend; he is buried near the Ḳuṭb Minār at Dihlī; — Shaikh Farīd al-Dīn Shakarganḏj (ob. 1265), whose tomb is at Pākpattan, where an enormous fair is held every year, and the object of every pilgrim, whether Hindu or Muhammadan, is to get through the narrow gate of the shrine on the afternoon or night of the 5th Muḥarram (M. A. Macauliffe, *The Sikh Religion*, vi. 359 sqq.); — he had two illustrious disciples, one Ḳuṭb-i Abdāl Shaikh 'Alī b. Aḥmad Ṣābir (ob. 1291), whose tomb is near Rurkī (his followers are known as Ṣābir Čishtī), and the other, more famous, Niẓām al-Dīn Awliyā' (his real name was Muḥammad b. Aḥmad b. Dāniyāl al-Bukhārī), (born at Badā'ūn in 1238), who was nominated by Farīd al-Dīn as his khalīfa, or successor, when he was only 20 years old, and died in 1325; some of the most distinguished of his contemporaries were numbered among his spiritual pupils, including the poets, Amīr Khusraw and Amīr Ḥasan Dihlawī, the historian, Ḍiyā' al-Dīn Baranī, and a number of others. [For a list of these, see the biography of the saint, entitled *Maṭlūb al-Ṭālibīn* by Muḥammad Bulāḳ]. His tomb in the outskirts of Dihlī is surrounded by the graves of his followers and admirers and is much frequented by pilgrims. His khalīfa was Naṣīr al-Dīn Muḥammad (or Maḥmūd) Čirāgh [s. ČIRĀGH DIHLĪ], who became his pupil at the age of 40 and died in 1356; his tomb at Dihlī is still a place of pilgrimage. The successors of these saints led to a wide extension of the Čishtī order, but it is not possible to mention more than two of the later saints, e. g. Shaikh Salīm Čishtī (ob. 1572), in whose house the emperor Djahāngīr [q. v.] was born; and Khwādja Nūr Muḥammad (ob. 1791), known as Ḳibla-i 'Ālam, who brought about a revival of the Čishtī order in the Pandjāb and Sindh. (For further details see the histories of the Čishtī order, e. g. *Sawāṭi' al-Anwār* by Muḥammad Akram al-Barāsawī, and the works quoted therein, and *Siyar al-'Ārifīn* by Ḥāmid b. Faḍl Allāh Djamālī). The **Suhrawardī order**, which takes its name from Shihāb al-Dīn Suhrawardī (ob. 1234), was introduced into India by Bahā' al-Dīn Zakariyā, who was born at Multān but travelled to Baghdād, where he became the spiritual pupil of Shihāb al-Dīn Suhrawardī; he died at Multān in 1266 and his tomb, said to have been built by the saint himself, is one of the few examples of the architecture of this period in India. One of his disciples was Saiyid Djalāl al-Dīn Surkh-pōsh, the first of this order to come to India from Bukhārā, where he was born in 1199; after many wanderings he settled in Uččh, where he died in 1291; he is the ancestor of generations of saints, some of whom were active and successful propagandists of Islām. His khalīfa was his grandson, Saiyid

Sayyid b. Aḥmad Kabīr, commonly known as Makhdūm-i Djahāniyān (ob. 1384), who is said to have made the pilgrimage to Mecca 36 times and to have performed innumerable miracles. One of Makhdūm-i Djahāniyān's grandsons, Abū Muḥammad 'Abd Allāh, known as Burhān al-Dīn Ḳuṭb-i 'Ālam (ob. 1453) [q. v.], went to Gudjarāt, where his tomb is still a place of pilgrimage at Baṭuwa (*Archaeological Survey of Western India*, vol. vii. p. 60 *sqq.*); his son, Saiyid Muḥammad Shāh 'Ālam (ob. 1475) became still more famous and played an important part in the political and religious life of his time; his tomb at Rasūlābād, near Aḥmadābād, is a beautiful example of the style of architecture characteristic of this district (id., vol. viii. p. 15 *sqq.*). The Ḳādirī order derives its name from 'Abd al-Ḳādir al-Djīlī [q. v.], who is reverenced throughout India as Pīr Dastgīr, Pīrān-i Pīr, etc., his festival being widely celebrated on the 11th of Rabī' al-ākhir. This order was introduced into India by one of his descendants, Saiyid Muḥammad, known as Bandagī Muḥammad Ghawth, who settled in Učh in 1482 and died there in 1517; he was the progenitor of a number of saints and miracle-workers, and his descendants have remained in Učh to the present day (*Gazetteer of the Bahawalpur State*, pp. 164—166, 391 (Lahore 1908)). The Ḳādirī saints are too numerous to enumerate here, but mention must be made of Shaikh Mīr Muḥammad, known as Miyān Mīr, the spiritual preceptor of Dārā Shikōh [q. v.], who wrote a life of the saint, entitled *Sakīnat al-Awliyā'*; he died in Lāhor in 1635 and his tomb is still venerated there. The Shaṭṭārī order gave several great saints to India, e. g. Muḥammad Ghawth, who numbered among his spiritual pupils the emperor Humāyūn; he died in 1562 and was buried at Gwāliyār in a magnificent tomb erected by the emperor Akbar (Saiyid Faḍl Allāh, *Manāḳib Ghawthīya*). His disciple, Wadjīh al-Dīn Gudjarātī (ob. 1589), a man of great learning, is buried at Aḥmadābād (*Archaeological Survey of Western India*, viii. 33), and another saint of the same order, known as Shāh Pīr (ob. 1632) at Mīrath in a tomb built by Nūr Djahān, wife of the emperor Djahāngīr. The introduction of the Naḳshbandī order into India is usually attributed to Shaikh Aḥmad al-Fārūḳī al-Sirhindī (ob. 1625), (for his letters, see Ethé, *Cat. Pers. MSS. India Office*, n°. 1891); this order has not enjoyed the same degree of popularity as those above mentioned, but there has recently been a revival of it in the Pandjāb and Kashmīr (v. *Manāḳib al-Naḳshbandīya*, Ethé, n°. 653). To the wide-spread influence of these orders it is largely due that Ṣūfiism has generally been regarded in India as compatible with orthodoxy. Muḥammad b. Faḍl Allāh, of Burhānpūr (ob. 1620), wrote a commentary on *al-Tuḥfa al-mursala ilā 'l-Nabī*, to prove that the doctrines of the Ṣūfīs were in accord with the teaching of the Ḳur'ān and the Sunna.

In addition to the above so-styled *bā-shar'* orders, the members of which observe the customary ordinances of Islām as to prayer, fasting, etc., there are certain irregular (or *bī-shar'*) orders, peculiar to India, which are looked upon with disfavour by the orthodox; their adherents are almost entirely confined to uneducated persons of the lower classes. Among these are the Madārīs, who are followers of Zinda Shāh Madār, a legendary personage, said by some to have been a converted Jew (born at Aleppo in the 11th cent.), who settled in India and expelled a demon, named Makan Dēo, from the spot (Makanpūr) where his own shrine is now venerated; according to other accounts, he was a disciple of Shaikh Muḥammad Ṭaifūr Shāmī and died in 1436. The faḳīrs of this sect claim to be immune against fire and the bites of snakes and scorpions. The devotion to Shāh Madār is widespread, and pilgrims resort to his shrine from great distances. The Rasūl Shāhīs are followers of a certain Rasūl Shāh, of the Alwar State, who in the 18th cent. is said to have received miraculous powers from a saint in Egypt. They rub ashes on their bodies and faces, and shave the head, moustaches and eyebrows; they look upon the drinking of spirits as a virtue, and the sect is consequently considered to be a disreputable one by orthodox Muslims. In Gudjarāt they wander about begging, without wives or settled homes, but in the Pandjāb they are not celibate, being as a rule well-to-do citizens who are never seen begging, and some are said to be men of literary taste and are popularly credited with a knowledge of alchemy.

c. Saints. The Muslim saints of India may be counted by hundreds. Several of the more important have already been referred to in the account of the religious orders; these are historical personages of whom some record remains, and there are many more like them. But others are historical persons whose identity has become overlaid with a mass of legend, in which the record of history is almost entirely obscured, e. g. Ghāzī Miyān [q. v.], Sakhī Sarwar [q. v.], etc. Others are purely legendary, as Khwādja Khiḍr [q. v.], Bābā Ratan (v. Horovitz, *Journal of the Panjab Historical Society*, ii. n°. 2), Shaikh Saddū, etc. The process of canonization still goes on, and new saints are from time to time added to the calendar, e. g. at Mōrthārī (in Bengal) a Muḥammadan Pīr, named Pāgalī Sāhib (ob. between 1860 and 1870) is credited with miraculous powers and his aid is invoked especially by litigants. Besides the many miracles ascribed to these saints in their life-time, they are still believed to be able to work wonders for those who invoke their aid; miraculous cures especially are said to be wrought at their tombs, and childless women pray to them for offspring, and litigants for success in the law-courts; the beneficent activity of others has a more restricted reference, e. g. Khwādja Khiḍr, Malumiyār and Pīr Badr are the patron saints of boatmen and sailors, Shāh Shāh (of Multān) of persecuted lovers, Shāh Dawla takes microcephalic children under his protection, etc. Many of these saints are known as Pīrs, a title of honour applied not only to the famous historical saints abovementioned but also to living spiritual preceptors, who guide their disciples (*murīd*) in the practices of the devout life, — not only to the saints whose shrines are visited by thousands of pilgrims from distant parts, but also to those obscure individuals whose tombs are to be found by hundreds in the bye-lanes of a town or the outskirts of a village and enjoy only a local reputation. For the religious movement condemnatory of the worship of saints, see the art. KARĀMAT 'ALĪ and WAHHĀBĪ.

Bibliography: Besides the works already mentioned, see 'Abd al-Ḥaḳḳ b. Saif al-Dīn al-Dihlawī, *Akhbār al-Akhyār*; Dārā Shikōh, *Safī-*

nis al-Awliyā; Ghulām ʿAlī Āzād al-Bilgrāmī, *Rawḍat al-Awliyā*; Muḥammad Amīn, *Safīnat al-ʿĀrifīn*; Ḥāmid b. Faḍl Allāh, *Siyar al-ʿĀrifīn*; Abu 'l-Faḍl, *Āʾīn-i Akbarī* (Trans., vol. iii.); Firishta, *Gulshan-i Ibrāhīmī*, Maḳāla 12; Ghulām Sarwar, *Khazīnat al-Aṣfiyā* (Lucknow 1873); Shēr ʿAlī Afsōs, *Arāʾish-i Maḥfil* (Calcutta 1808); R. C. Temple, *The Legends of the Panjāb* (Bombay 1884—1901).

d. Festivals. The chief festivals of the Muslim year are ʿĪd al-Aḍḥā [q. v.], (vulgarly known as *ʿīd-i ḳurbān* or *baḳra-ʿīd* or even *baḳrīd* ("the cow festival")), celebrated on the tenth day of Dhu 'l-Ḥidjdja, and ʿĪd al-Fiṭr [q. v.], at the end of the fast of Ramaḍān. These are the only festivals recognised by the strictly orthodox, but there are several others that are commonly observed throughout India, e. g. *shab-i barāt* ("the night of the decree"), the 14th day of Shaʿbān; God is believed to register on this night the deeds and fortunes of men during the coming year; it is celebrated by the vulgar by letting off fireworks, while the pious spend this night or the eve of the festival in prayer for deceased relatives; *bārah-wafāt*, the 12th day of Rabīʿ al-awwal, in commemoration of the death of Muḥammad, or in some parts, the day of his birth (mawlid al-nabī) is observed on this date; *Ākhir-i chahār-shamba*, the last Wednesday of the month of Ṣafar, the day on which Muḥammad obtained some mitigation of his fatal illness and bathed for the last time. The first ten days of the month of Muḥarram [q. v.] are observed as days of mourning for the death of Ḥusain [q. v.] by Shīʿahs pre-eminently, but the 10th day is observed as a popular festival in most cities with a Muhammadan population, and Hindus also often take an active part in the celebrations; in the Gwāliyar State the Mahārādja provides a *taʿziya* [q. v.], and the expenses of the festival are defrayed from the state revenue (v. J. C. Oman, *The Brahmans, Theists and Muslims of India* (London, 1907), Part iii. chap. i.). In honour of the more famous saints, a celebration, called *ʿurs* [q. v.], is held on the anniversary of his death, when a large concourse of persons visits his tomb; prayers are recited, the Ḳurʾān is read, offerings are made to the guardians of the tomb, and alms are distributed to the poor.

e. Relations with Hinduism. The Muslim conquerors of India for the most part showed little regard for the Hindu religion, but plundered and destroyed Hindu temples in large numbers without compunction. But the Arabs in Sind spared the temples in the towns that submitted to them, and the fact that Awrangzīb found so many temples left for him to destroy bears testimony to the limits that his predecessors put on their iconoclastic zeal. For the most part the Muslims in India have been either hostile or indifferent to Hinduism, and throughout the whole Muhammadan period it is not possible to find another work showing the same scientific interest in the faith or the same profound knowledge of its literature as the *India* of al-Bīrūnī [q. v.], the contemporary of Maḥmūd of Ghazni. More than five centuries elapsed before Akbar's desire to learn the Hindu doctrines caused him to have the *Mahābhārata*, the *Rāmāyana* and the other Hindu scriptures translated into Persian, and his friend, Faiḍī, compiled for his instruction a treatise on the *Vedānta* philosophy. Akbar allowed his Hindu wives to have the ceremonies of their religion performed in the royal palace, and under their influence and that of the Brahmans whose society he cultivated, he adopted several Hindu practices, e. g. he abstained from the eating of beef, and on certain festivals he wore the Brahmanical cord and had his forehead marked like a Hindu sectary. Djahāngīr had none of the religious earnestness of his father, but he kept up the Hindu customs that Akbar had adopted and observed such Hindu festivals as the Diwālī, or feast of lights, and on Siva-rātri, (or Siva's night), would invite Hindu yogis to the palace and eat and drink with them. A more earnest and sympathetic student of Hindu thought was Djahāngīr's grandson, Dārā Shikōh [q. v.], who diligently cultivated the society of Hindu yogis, and as a result of this intercourse (he tells us) came to the conclusion that the divergence between the doctrines of the Hindu pantheists and those of the Muslim Ṣūfīs was merely verbal; with the object of reconciling the two systems, he wrote his *Madjmaʿ al-Baḥrain*; he also translated, or had translated for him, into Persian, several works of Hindu metaphysics, including the *Upanishads* (under the title *Sirr-i Akbar*). The large number of such translations from Sanskrit and Hindi into Persian, that were made from time to time (see, Ethé, *Cat. Pers. MSS. I. O.*, nº. 1928 sqq.; *Grundr. der iran. Philologie*, ii. 352—7), bears evidence to the interest which many Muhammadans took in the beliefs of their Hindu fellow-subjects, and in mysticism especially they found a common basis for religious thought. Muslim saints numbered many Hindus among their disciples, and thousands of Hindus still worship at their tombs; on the other hand Hindu ascetics, though less rarely, numbered some Muhammadans among their spiritual pupils. Instances are not unknown of friendship between saints of the rival creeds, e. g. at Ghōsī (in the Pandjāb) the tombs of two ascetics, Djamālī Sulṭān and Diyāl Bhawan, who lived in close amity during the early part of the 19th cent., stand close to one another and are reverenced by Hindus and Muhammadans alike. (Bhagwant Dās, *Djīvan Caritra Srībhagat Diyāl Bhāvanjī* (Lahore, 1900)). Bāwa Fatḥū (*circ.* 1700), a Muslim saint whose tomb is at Rānītāl (in the Kāngra District), received the gift of prophecy by the blessing of a Hindu saint, Sōḍhī Guru Gulāb Singh. On the other hand Bābā Shāhānā, a Hindu saint whose cult is observed in the Djhang District, is said to have been the *murīd* or spiritual disciple of a Muslim *faḳīr* who changed the original name, Mīhra, of his Hindu follower into Mīr Shāh. With a still more remarkable liberality, some Muslim theologians have admitted into their system the gods of the Hindu pantheon, on the ground that the Ḳurʾān (xiii. 8; xvi. 38) teaches that God has sent a prophet to every nation, to guide it into the truth; thus (to give one instance only, from modern literature,) one of the present guardians of the shrine of Niẓām al-Dīn Awliyā, — himself a descendant of this saint, — maintains that the life and teachings of Rāma, Krishna and Buddha clearly show that they are the prophets

referred to in the Ḳur'ān, though no express mention is made there of India; for it cannot be supposed that God would have made so vast a country an exception to the operation of His general rule. (Ḥasan Niẓāmī, *Hindūstān ke do paighambar Rām o Krishn, ʿalaihimā al-salām*, p. 3 (Lahore, 1325 H.)). The Muhammadan poets of Bengal went still further in their recognition of Hindu theology, e. g. ʿAlāol (*flor.* 17th cent.) sang the praises of Śiva, and Mīrzā Ḥusain ʿAlī composed hymns in honour of the goddess Kālī. (Dinesh Čandra Sen, *History of Bengali Language and Literature*, pp. 626, 795 (Calcutta, 1911)).

Owing to the fact that the Muslims in India have lived for centuries in close contact with Hindus and are themselves to a large extent descended from Hindu converts, it is not surprising that Islām in India presents certain characteristics peculiar to this country. The process of conversion was often incomplete, and the converts, ill-instructed in their new faith, carried with them many of their old beliefs and practices. The sacred sites of the earlier faith continued under a changed name to be frequented by pious persons; this has happened in the case of Buddhist shrines in the Gandhāra country, and to an enormous extent in Kashmīr, where a Muhammadan *ziyārat* frequently marks the site of a Hindu *tīrtha*; it is then often stated to be the tomb of a saint, e. g. the tomb of Bāmadīn Ṣāḥib, a popular place of pilgrimage for Muhammadans in Kashmīr, has been identified with an ancient Hindu temple built by Bhīma Śāhi, the last Hindu king of Kābul (ob. 1026); the saint is now said to have been a Hindu ascetic, and to have borne the name of Bhūma Sādhi, before his conversion to Islām (*Kalhaṇa's Rājataraṅgiṇī*, translated by M. A. Stein, i. 240 (Westminster, 1900); A. Foucher, *Notes sur la géographie ancienne du Gandhâra*, *Bulletin de l'École Française d'Extrême-Orient*, i. 333 *sq.* (Hanoi, 1901)). Such survivals from Hinduism are more marked in villages and country districts, remote from the influence of the ʿulamāʾ; here the Musulmans still continue to worship the tutelary godlings of the village, join in Hindu festivals and employ Brahmans at their marriage ceremonies. (For details see *Transactions of the Third International Congress for the History of Religions*, i. 314 *sqq.*). This close association with Hindus has also led to the formation of some mixed sects, which attempt to bring about a reconciliation between Hindus and Muhammadans; among these are the Pīrzādas, a sect founded by Muhammad Shāh Dūlhā (about the middle of the 17th cent.), whose tomb is at Bahādurpūr (in the Central Provinces); he compiled a book containing a selection of passages from both the Hindu and Muslim scriptures and adopted as a supreme deity the tenth incarnation of Vishṇu, which is to come and is known in the sect as Nishkalanki, "the sinless one". The Ḥusainī Brahmans call themselves followers of the Atharva Vēda, but ask for alms in the name of Ḥusain; they adopt such of the doctrines of Islām as are not contrary to Hindu teachings, and observe Muslim customs, even keeping the fast of Ramaḍān, and have a special devotion to the saint, Muʿīn al-Dīn Čishtī of Adjmīr; the men dress like Musulmans, the women like Hindus. The Kartābhadjās, the members of a sect (founded in Bengal in the 18th cent.), who call their creed the Satya Dharma (*true faith*), include both Hindus and Musulmans, and in this sect a Muhammadan may even become the spiritual guide of a Brahman. The Saṅdjogīs, the Pāṅčpīriyās and the Lālbēgīs are similar sects on the borderland between Hinduism and Islām. A like syncretism shows itself in the teaching of Nānak, the founder of the Sikh religion (see T. P. Hughes, *Dictionary of Islam*, art. *Sikhism*), and would seem to have originated the worship of the Pānč Pīr [q. v.]. Such an approximation is sometimes indicative of the incompleteness of the process of conversion, as in the case of the Malkānās in Agra and the adjoining districts, who are converts to Islām but are reluctant to describe themselves as Musulmans; their names are Hindu and they use the salutation *Rām Rām*; they mostly worship in Hindu temples, but sometimes frequent a mosque, practise circumcision and bury their dead. Such imperfect conversion has rendered possible the recent return to Hinduism of the descendants of such converts. In 1880, about 260 families of Mātia Kanbīs, whose ancestors were converted in the 15th cent. by Imām Shāh [q. v.] of Pīrāna, formed themselves into a separate caste, calling themselves Vaishṇava Mātias, gave up all Muhammadan customs, employed Brahman priests and refused to eat with their Muhammadan brethren, the Pīrāna Mātias. The Ārya Samādj has been very active in the work of re-conversion, and one of the societies affiliated to it, called the Rādjpūt Śuddhi Sabhā, having for its chief object the reconversion of Muhammadan Rādjpūts to Hinduism, claims to have converted to the beliefs of the Ārya Samādj as many as 1052 of such Rādjpūts in the three years, 1907 to 1910. This change has been facilitated by the fact that intermarriage with Hindus has been common (esp. among the Čawhāns in the Eastern Pandjāb) and the tribal bond with Hindu sections of the tribe has always been stronger than any difference of religion.

6. Literature. Muslim India has always preserved a learned tradition and the study of Arabic has been diligently pursued by the ʿulamāʾ, but their literary activity in this language has been largely confined to commentaries, — on the Ḳur'ān and Ḥadīth, on the works of fiḳh, grammar, rhetoric, etc., commonly read by students. Among the commentaries on the Ḳur'ān, mention may be made of Faiḍī's [q. v.] *tour de force* entitled *Sawāṭiʿ al-ilhām*, in which all letters with diacritical points were avoided. ʿAbd al-Ḥakīm al-Siyālkōtī was an industrious commentator, who enjoyed the patronage of the emperor Shāhdjahān. Muḥibb Allāh al-Bihārī (ob. 1707) [q. v.] compiled a treatise on jurisprudence, *al-Musallam*, and another on logic, *Sullam al-ʿUlūm*, which became favourite text-books, and generations of commentators wrote glosses upon them. Another industrious commentator was Baḥr al-ʿUlūm (ob. 1810) [q. v.]. An important contribution to legal literature was *al-Fatāwā al-ʿĀlamgīrī*, a collection of legal opinions by Ḥanafī jurists, compiled by Shaikh Niẓām and others in the reign of the emperor Awrangzēb. The greater part of the historical and mystical literature of Muslim India was written in Persian, but among Arabic writings mention may be made of *Tuḥfat al-Mudjāhidīn*, an account of the Muhammadans of Malabar, by Shaikh Zain al-Dīn (ed. D. Lopes, Lisbon, 1898), and *al-Djawāhir al-Khamsa* by Muḥammad Ghawth [q. v.] (Hi-

biography: Brockelmann, *Gesch. d. arab. Litteratur*, II. 219 *sqq.*, 415 *sqq.*, 503 *sq.*; Ṣiddīḳ Ḥasan, *Ithāf al-Nubalā'*; Catalogues of Libraries in India, e. g. Niẓām's Library (Haiderābād), Rāmpūr Library, Public Library, Bankipur, Asiatic Society of Bengal, Calcutta, etc.). But the chief literary language of the Indian Muhammadans has been Persian [q. v.], which in modern times has been replaced by Urdū [q. v.] as a literary medium. Works written in the above languages have a vogue among educated Muhammadans throughout the whole peninsula, but there is also a considerable literature, consisting mainly of didactic and religious writings, translations, poetry and romances, in many of the provincial vernaculars, e. g. Bengālī, Gudjarātī, Hindī, Pandjābī, Pashtu, Sindhī, Tamil, etc. (v. separate articles).

7. Education. During the Muhammadan period, the condition of learning was apt to vary with the goodwill of the sovereign, but from the earliest period of Muhammadan rule scholars received generous patronage from the state. Muhammad Ghōrī founded *madrasas* in Adjmīr immediately after the conquest and his general, Muhammad b. Bakhtyār did the same in Bengal, and the example thus set by the early conquerors was followed by the majority of their successors, though instances are not unknown of the hostility or indifference of a ruler resulting in a corresponding decay of learning. But private benevolence was not lacking to supplement the generosity of princes; the remains of the vast *madrasa* built by Maḥmūd Gāwān in 1478—1479 are still standing at Bīdar, and that founded by Māham Anagah, the nurse of Akbar, in 1561, in the vicinity of Dihlī. From the outset these *madrasas* were well provided with learned teachers, and the devastations of the Mongols caused many scholars to take refuge in India, where they carried on the traditions that had made Muslim learning so famous in the West. The largest of these *madrasas* were naturally to be found in the chief centres of government, and the students trained in them became teachers in the *maktabs* and mosque-schools that existed in most Muhammadan villages up to modern times. The decay of the Muhammadan rule and the consequent loss of patronage led to a decline in Muslim learning. Warren Hastings attempted to arrest this decline by establishing a Madrasa in Calcutta in 1781; but the older type of education no longer fitted persons for employment in government service, with the disappearance of Persian as the official language and the substitution of English in the higher courts, and the vernacular language of the various provinces, in the lower courts. In 1835 Lord William Bentinck, the then Governor-General of India, established the policy of promoting education in the English language; while this policy was warmly supported by the Hindus, the Muhammadans almost entirely held aloof from the English schools and colleges, preferring a system of learning in harmony with their own faith, and thinking that English education induced a spirit of disbelief in religion. From time to time the Government of India proposed measures for dealing with the backward condition of education among the Muhammadans, and laid down the lines of policy to be pursued in Resolutions of 1871, 1885, 1888, 1894, and 1913, and liberal grants-in-aid have been given to colleges, such as that of Aligarh [q. v.], and other educational establishments, and scholarships granted to Muhammadan students. The total number of Muhammadan pupils under instruction in all classes of educational institutions in 1912 was 1 562 000. Of the various religious communities in India, the Muhammadan on the whole exhibits a greater degree of illiteracy than any other, with the exception of the Animistic tribes; only 60 men, and 4 women, per thousand are able to read and write. This backward condition of the Muhammadans generally is largely due to the low level of education in the parts of the country (e. g. the North-West of India and Eastern Bengal), where they are chiefly to be found. In the ancient centres of Muslim civilisation, their level of education is as high or even higher than that of the Hindus, and the number of Muhammadans attending the Universities is yearly on the increase.

Leitner, *History of Indigenous Education in the Panjab* (Calcutta, 1883); Abdul Karim, *Muhammadan Education in Bengal* (Calcutta, 1900); Syed Mahmood, *A History of English Education in India* (Aligarh, 1895); *Quinquennial Reviews of the Progress of Education in India* (since 1886).

8. Art. Space does not admit of any account being given here of the vast artistic activity of the Muhammadans in India, and reference must therefore be made to the literature on the subject. — Architecture: The architectural monuments of Muhammadan India are chiefly mosques and tombs (in large numbers), and some palaces in the chief cities. The early conquerors made use of materials taken from the Hindu and Djain temples etc. which they had destroyed, and employed Hindu workmen to erect buildings suited to the requirements of Muslim worship. In the great mosques at Adjmīr and Old Dihlī, built at the beginning of the 13th cent., Hindu pillars were re-erected without any alteration, except that dissimilar fragments were sometimes put together; while on the great gateways of the enclosures was lavished a wealth of ornamentation and of stately Arabic inscriptions, which mark out these buildings as among the most richly decorated examples of Muhammadan architecture in India. After this superb beginning followed a rapid development of architectural forms, varying considerably in the several independent kingdoms that arose in the different parts of India occupied by the Muhammadan conquerors. Of these local styles as many as thirteen have been enumerated. They vary from the stern and massive tombs of the early kings of Dihlī and the grand simplicity of the towering mosques of Djawnpūr, to the studied elegance and exquisite detail of ornamentation in the buildings of Aḥmadābād, and the degenerate tawdriness of Lakhnaw. For some account of the architectural monuments in these various localities, the reader is referred to the articles under the name of each, e. g. Bīdjāpūr, Dihlī, Djawnpūr etc.; but space has been found for a separate article on MOGHAL ARCHITECTURE, which was not limited to a single locality. — *Bibliography*: Reports and other publications of the *Archaeological Survey of India*; Gustave Le Bon, *Les Monuments de l'Inde* (Paris, 1893); J. Fergusson, *History of Indian and Eastern Architecture*, ed. J. Burgess (London,

1910); E. B. Havell, *Indian Architecture* (London, 1913); *Imperial Gazetteer of India*, vol. ii. chap. V (with bibliography). — Painting: Few examples of Muhammadan painting in India before the 16th cent. are known, but under the patronage of Akbar and his successors Indian artists produced a vast quantity of pictures, sometimes as separate works of art, but mostly as illustrations of manuscripts; the *mathnawī*'s of Niẓāmī, and romances both in poetry and prose, were frequently illustrated; but the Mughal school of painting excelled particularly in portraiture, and a large number of vivid and realistic portraits of the monarchs and courtiers of this dynasty has been preserved. The influences under which these artists worked were partly connected with the school of painters that enjoyed the patronage of the Tīmūrid princes, — and painters who preserved the tradition of this school were undoubtedly attracted into India, — but to a larger measure with indigenous Hindu art. European paintings and engravings were also sedulously copied and their influence can be traced in many pictures of the Mughal school. The majority of these pictures are unsigned, but some bear the names of the artists, e. g. Mīr Saiyid ʿAlī, ʿAbd al-Ṣamad and other Musulmāns who painted for Akbar, — Manṣūr and Muḥammad Nādir, among the artists patronised by Djahāngīr, etc. — *Bibliography*: E. B. Havell, *Indian Sculpture and Painting*, Part ii. (London, 1908); Vincent A. Smith, *A History of Fine Art in India and Ceylon*, chap. xiv. (Oxford, 1911); F. R. Martin, *The Miniature Painting and Painters of Persia, India and Turkey*, chap. ix. (London, 1912); A. K. Coomaraswamy, *The Arts and Crafts of India and Ceylon* (with bibliography), (London, 1913). — Calligraphy: The art of the calligrapher was held in high honour in India, as in other parts of the Muhammadan world, and many mosques and tombs are decorated with inscriptions that reveal a superb mastery of the Arabic script. The same skill was shown in the copying of manuscripts, both Arabic and Persian, and monarchs and nobles vied with one another in their patronage of expert calligraphists. Some of these were attracted to India from other countries, e. g. ʿAbd al-Ṣamad, known as Shīrīn Ḳalam, from Shīrāz, who was patronised by Humāyūn and Akbar; Mīr Khalīl Allāh, who went from ʿIrāḳ to the court of Ibrāhīm ʿĀdil Shāh II of Bīdjāpūr (987—1035 A. H.); Saiyid ʿAlī Khān, of Tabrīz, known as Djawāhir Raḳam, whom Awrangzīb appointed to teach his sons the art of penmanship. Under the influence of these and other masters in the art, a long series of native calligraphists was trained, who only slowly gave way before the introduction of the printing press. — *Bibliography*: *Epigraphia Indo-Moslemica* (with bibliography) (Calcutta, 1908 *sqq.*); Ghulām Muḥammad Dihlawī, *Tadhkira-i Khwush-nawīsān*, ed. (T. W. ARNOLD.)

INDIES (DUTCH EAST) comprise the Malay Archipelago and the western half of New Guinea as far as Long. 141°, except for the north coast of Borneo, which is English, the Philippines, which belong to the United States, and Portuguese East Timor. These Dutch colonies thus include thousands of islands which run from the largest in the world such as New Guinea and Borneo to archipelagoes of the smallest coral islands. From the geographical point of view they are divided into the Great Sunda Islands (Borneo, Sumatra, Celebes, and Java) with the archipelagoes belonging to them); Little Sunda Islands (Bali, Lombok, Sumbawa, Flores, Sumba, Savu, Rotti, and Timor with the surrounding islands), the Moluccas (Hal-

mahera with Ternate, Tidore, Makian, and Batjan, Sula Islands, Buru, Seram, Ambon, and Banda) and New-Guinea with the adjoining groups of islands such as Misol, Waigeu, Batanta, and Salawati in the west, and Kei, Timor-Laut, and Aru in the south-west. The area is about 35031 geogr. sq. miles. The whole area of the Dutch East Indies is as large as that of Europe without Central and Northern Russia.

The conditions of life in this island world are very much influenced by its position under the equator, between Asia and Australia, and between the Indian and Pacific Oceans, surrounded by warm seas everywhere. The formation and origin of the land is also of special importance. The form and situation of the larger islands is a result of the fold mountains which arise on the edge of the area of depression in the Indian and Pacific Oceans. One such range on the west and south edge of the Archipelago supports the islands of Sumatra, Java, and the Little Sunda Islands; the chain of mountains which crosses Borneo from west to east runs parallel to it. Celebes and the eastern islands as far as New Guinea show similar systems of folding which cross one another, being dependent on these two areas. The relative wealth of the larger islands in precious metals and other ores, which, like gold and silver, attracted foreign nations in quite early times, and like tin, which is now an important source of revenue to the government and to great mining companies, is due to the predominance of these chains of mountains formed of sedimentary and granitic rocks. Other valuable minerals, such as petroleum and anthracite, which are exploited on Sumatra, Java, and Borneo, come from the tertiary strata, which are common in the East Indies.

Of still greater importance is the volcanic nature of this chain of mountains, which is most marked on the series of islands from Sumatra to Timor and through its weathered eruptive products causes the unusually great fertility of those islands. Besides the very numerous volcanoes, the volcanic plateaus in Sumatra and the alluvial plains of volcanic origin (Sumatra and Java) are among the most highly cultivated and thickly populated regions of the East Indies. The island of Celebes and the Moluccas are also very volcanic.

Next to folding of strata and volcanic effects, coral has the greatest share in the formation of mountains in the Archipelago. From the very earliest period of the earth, countless coral reefs have been formed in these tropical seas in the shallows, where there is sufficient oxygen, light and temperature (about 22° cent.) and the process is still going on. The growth of the coral reefs is caused not only by the coral polypi but also by molluscs, chalk algae, diatomeae, and many other organisms. The Indian calciferous ranges formed by these reefs thus very rarely yield pure marble. In the course of time this part of the earth's surface has been subjected to great upheavals and depressions so that the old coral reefs have either been transformed into vast calciferous mountains of varying age or, although they could only be formed in the upper regions of the water, are now found at a great depth. On all the Great Sunda Islands one now finds those limestone mountains which are marked by infertility as are often also the neighbouring plains. The small islands formed of coral rock are also very numerous, which have recently become very important through the cultivation of the cocoa-nut palm. The caves washed out of the calciferous rocks supply the edible swallows' (of the Salanga kind) nests eaten by the Chinese.

Living coral reefs are found on almost all the rocky coasts of the Archipelago and in shallows in the high seas.

The climate of the Indies is a moist tropical one and besides being fertile produces a very exuberant vegetation. It renders possible the cultivation of the most valuable tropical plants such as sugar cane, tobacco, spices, indigo, etc. The most important factor for agriculture in the tropics is the rainfall. Only at isolated places is this less than 76 inches in the year, the minimum for the growth of tropical forests. The usual fall is 160—180 inches. In the north of Central Java as much as 360 inches a year has been recorded.

The situation between Asia and Australia causes a climate affected by the monsoons, the result of which is that, during our summer, dry winds from the east and southeast prevail and, during our winter, winds from the west and northwest with a rainy season predominate; in our spring and autumn changing winds form a transition.

The dry monsoon is strongest in the southeast: Timor and the adjoining islands have six or more months of drought each year, for which the winds from Australia are responsible. In the north and west this dryness of the wind is more or less alleviated by the greater breadth of the sea crossed and the vapours which the heat raises from it. The Moluccas, Celebes, Borneo, Java, and Sumatra thus feel this drought less and are more suitable for intensive agriculture throughout the year. Central and Northern Sumatra lie outside the monsoon area. The characteristic tropical temperature of about 27° Cent. with only slight variations in a day or year of ± 5° prevails only in the plains. In western Java at a height of 1800 feet it is much lower (23°) and shows greater variations and thus we have a subtropical climate. The cultivation of tea, coffee, Chinese and European vegetables is possible here. In other countries the transition varies more rapidly, for example on Borneo. These climatic conditions have favoured the growth of tropical forests, which must originally have covered the Greater Sunda Islands entirely, till man destroyed them, almost entirely on Java, in part on Sumatra, and only to a small extent in Borneo. Even at the beginning of our era mention is made of the products of the Sumatra bush, such as camphor and benzoic. In the last 60 years the great demand in Europe for products like rubber, guttapercha, rotan etc. has resulted in an economic revolution through the increased prosperity of the native population on Sumatra and Borneo.

The flora of the southeast on the other hand is of a prairie and savannah nature. Sandalwood has from ancient times been an important article of export here. The flora and fauna of these islands are predominantly determined by the proximity of Asia in the west and Australia and New Guinea in the east. The connections by land between Asia and the Great Sunda Islands existed for a long time, and Asiatic animals and plants were thus able to spread over them. There were also connections by land with Australia and New Guinea in the east, so that their plants and animals are

now found farther west on the Moluccas, etc. These alone have thus become the home of spices like nutmegs and cloves. Of Asiatic animals the tiger is found on Borneo, Java, and Bali, the elephant on Sumatra, the tapir on Sumatra and Java, monkeys on Sumatra, Borneo, and Java, only one kind on Celebes, and none farther east. Wild cattle are found in the woods of Sumatra, Java, and Borneo and Bali. On the other hand, the Moluccas possess no genuine mammals, but only the Australian marsupials, of which two kinds are found as far westwards as Celebes. One also finds the birds of the east even on this island, such as parrots and cockatoos, only the cassowaries and birds of paradise are not found till farther east. Thus these two opposite worlds have penetrated the archipelago somewhat disproportionately.

Population: The population of the Dutch Indies, numbering at present 44 millions belongs, with the exception of the Papuans of New Guinea and the surrounding region and isolated remnants of an earlier Vedda people, like the Toala in Celebes, to the Malay-Polynesian race which spread from Madagascar to Easter Island and from South Japan to Java. The archipelagoes between Celebes and New Guinea with the eastern Little Sunda Islands are inhabited by a cross between Malays and Papuans which is known as the Alfurs. The Malay type is only found in the interior of Sumatra, Borneo, and Celebes, still comparatively pure. South eastern Asia has been indicated as the original home of the Malays. Linguistically they seem still to have left traces in the south of British India. If one remembers that the Polynesians must also have reached their present abodes by crossing the Malay Archipelago and that even Ptolemy mentions the man-eating Bataks of North Sumatra, it is clear that present conditions must be the results of thousands of years of migrations. In addition to the powerful influence of foreign peoples who arrived in later times and the influence of surrounding peoples, this affords an explanation of the complicated conditions in the varied population of these islands. Two groups are distinguished among the Malays of the Archipelago: an older stratum, the Bataks of Sumatra, the Dayaks of Borneo, and the Toradja of Celebes, and a younger stratum, which was more exposed to admixture in the foreign elements. The type of the latter is the Menangkabau Malays of Central Sumatra and it includes the Atjeh of North Sumatra, the Riaw Malays in the Riaw Archipelago, the Malays of the coasts of Sumatra and Borneo, the Javanese, the Balinese, and the coast peoples of the Moluccas. The Makassars and the Buginese [q. v.] are supposed to be Toradja greatly mixed with foreign elements. The present Minahassa are Toradja who have been educated by Christianity during the last 70 years. The Alfurs include the inland tribes of Halmahera and the neighbourhood, of Buru and Ceram and the adjoining small islands, of Timor, Flores, Sumba, and Sumbawa. The Buginese, who have been seafarers for centuries, have contributed a great deal to the admixture of the coast peoples of the whole Archipelago.

All these peoples are for the most part settled agriculturists; on the great rivers and on the seashore however the Malays prefer to fish and trade (previously they were also pirates). The people of the Archipelago as a rule only work when necessity drives them. They often appear lazy to us on account of their slight wants and the conditions of tropical life. The original Malays, like the Bataks, Dayaks, and Toradja, as well as the Alfurs and Papuans show a state of society broken up into very many small tribes. Each tribe forms a separate social unit, which as a result of war, feuds, or mistrust is only rarely on constant terms of intercourse with its neighbours and thus develops independently. The result is a great variety of languages, manners, and customs.

The patriarchal constitution of these tribes frequently includes a ruling family, freemen, and slaves. In the east among the Papuans and related tribes there appear to be no chiefs. Among the Malays they are chosen from the ruling family, most frequently the eldest son; if necessity arises, a daughter may be chosen. They manage the affairs of the tribe with the elders. The slaves (slavery is now abolished) usually come from prisoners of war or are slaves through debt. They are frequently considered the property of the tribe and then are allotted to the chiefs. They are well treated and often enter the ranks of the freedmen through marriage. They were rarely sold. For human sacrifices prisoners of war were used or men infirm through old age, who were purchased from the coast Malays. Slavery is now the exception even among the most remote tribes.

The density of this older stratum, including the Alfurs and Papuans, is very slight, from 3 to 4 per square mile. As the birth rate is not small, the main causes of the sparsity of population are the terrible devastations wrought by such illnesses as malaria, cholera, smallpox, dysentry and venereal diseases among these tribes, and their low development which makes them unable to take advantage of the not unfavourable conditions for agriculture, making clothes and homes, hunting and fishing, so that they often lead a very mean existence amid the luxurious tropical surroundings. Although each member of the tribe has collected a number of observations from his own experience he has no ability to co-ordinate facts. He has no idea of the nature of diseases and their cure, of the life and growth of man, animals or plants. Although well endowed intellectually, these men only develop (again, as a result of their social isolation) to a certain limited degree. In their little societies each household has to procure everything it requires. There is no division of labour and special ability or achievement gain no important advantages. Their intellectual capacities are not a little affected by their sanitary and economic conditions. Nevertheless, each of these tribes shows great ability in the field of industry or social institutions.

Animism is here also the characteristic religion, which prevails with its disadvantageous accompanying phenomena such as spiritualism, fetish worship, *pemali* or *tabu* restrictions, and belief in omens, among these primitive Malays, Alfurs, and Papuans. It of course assumes very varied forms among the numerous peoples but everywhere it strengthens the above mentioned causes of the sparseness of population. As about two thousand years of Hinduism and Mohammedanism have not withdrawn the higher developed peoples of the Archipelago from the influence of animistic beliefs, its disadvantageous influence on their fur-

this development can hardly be overestimated.

Among these heathen peoples are still parts of the Bataks, Dayaks, and Toradja, and almost all the Alfurs and Papuans.

The above rather detailed sketch of this old Malay population is important, just because we are probably not wrong in thinking that the whole population of the Archipelago at the beginning of our era was so constituted. But then began the overwhelming influence of Hinduism.

During the reign of the Emperor Augustus, pepper, cloves, and nutmegs were sent to Rome via the Red Sea, as Pliny mentions. The trade routes between southern Asia and the archipelago were thus known. Ptolemy in his *Geography* gives a whole series of names which refer to this Archipelago. He knows the name of the harbour of Pansur or Baros, from which the Sumatra camphor was exported and he also knows of the man-eating Bataks of North Sumatra.

We can thus conclude that even then the influence of the Hindu trading peoples must have made itself felt in the Archipelago. We also here find an explanation of the stories of the Buddhist monk Fa-Hien, who landed in Java in 412 A.D. on his return voyage from Ceylon to China, remained five months there, and clearly found a Brahman society there but no Chinese and very few Buddhists. Several kingdoms of Sumatra, Java, and Borneo are mentioned at later dates in the Chinese annals. According to an inscription in the modern Kedu, in Central Java, Çivaism prevailed there in the Çaka year 654 = 732 A.D. Soon afterwards we find the Mahayana there and, as ruins of temples and inscriptions prove, both religions continued peacefully beside one another on the island for several centuries till about the end of the Hindu period in the Archipelago, about 1500 A.D. These ruins have been found on Sumatra, Java, the coast of Borneo, Southern Celebes and the Lesser Sunda Islands, although they are by far the most numerous on Java. Besides these proofs of the earlier influence of Hinduism the modern languages, by their scripts and vocabularies give evidence of its spread at an earlier period. The alphabets used by the modern Javanese, Bataks, South Sumatrans, Balinese, Makassars, and Buginese are derived from Hindu alphabets and there are many Indian words in the languages of these peoples. There are many remnants of Hindu culture in manners and customs also.

Java [q. v.] was certainly the centre of Hindu rule and from this island Hindu influence for the longest period made itself felt in the Archipelago. If one remembers how much higher the civilisation of the Hindus was than that above described of the Malay peoples, one can understand that, during the period of over a thousand years when Hinduism prevailed, a great change must have taken place in the conditions of life in the Archipelago. This was very marked in the political field also; despotic kingdoms arose out of the disconnected patriarchal tribes, such as the Europeans found in Sumatra, Java, the coasts of Borneo, southern Celebes, and in Bali and Lombok, and among the Malays farther east also. At that period also arose the division into castes which is still found on Bali and Lombok and the effects of which can still be traced in Java.

In the economic field, agriculture, shipping, commerce, and industry developed. The introduction of writing must have given a great incentive to progress. What a permanent advance was made by these alterations in the Archipelago is shown by the height of development of these peoples, whose density of population is also much greater (up to 100 per sq. mile).

The influence of Hinduism on religion assumed a very peculiar form. We have discussed above the characteristic features that animism possesses in the Archipelago and what a crippling influence it has had upon the conditions of life of the Malay, Alfur, and Papuan populations. If one remembers how much higher are the ideas and philosophies underlying the Indian religions, one expects that these would have considerably altered the views of the Malays of the Archipelago. But the actual facts are quite different. As already mentioned, their mental attitude is, generally speaking, determined by their animistic ideas and even the most educated peoples, like the Javanese, are still much influenced by the belief in *pamali* and omens. The peculiar social institutions of the Hindus are probably the main cause of this. What we admire as the highest in the religions of India was and is only the property of the highest castes. The masses of the present Hindu peoples have by no means lost their animistic beliefs. It was presumably not the most educated classes in the Brahman and Buddhist kingdoms that undertook as merchants the dangerous journeys to the Indian Archipelago and settled there. It would hardly be possible for these colonists radically to transform the popular beliefs. In the powerful Hindu kingdoms of Java and the other islands of a later date the great religious problems were no doubt studied as in the mother country, but probably only among the priests, and the masses were little affected thereby.

The people of British India also had too little insight into the relations of the phenomena of nature to be able to destroy animistic beliefs to any considerable extent. They were as little able to do so after the introduction of Islām.

Although the religious beliefs were little influenced, the ceremonial and vocabulary of religion were transformed during the Hindu period. Among the above-mentioned peoples which were most subjected to this influence the animistic gods and spirits are given Hindu names, as will be shown below in reference to Java. The manner of worship of this world of spirits also exhibits many Indian forms. What form spiritual conditions in the Hindu kingdoms of the Archipelago took can best be seen in the islands of Bali [q. v.] and Lombok, which are still Hindu.

Islām. When the natives of British India in part became converts to Islām, its influence also spread in the Archipelago through the merchants who visited these islands and settled on them, at least during a monsoon or longer, and often married a native wife, who had first of all to adopt Islām, and thus a considerable influence over her family and tribe was gained. Among the simple peasants of the country the far travelled, experienced strangers enjoyed a certain prestige, which even now contributes a great deal to the spread of Islām in pagan countries. To become one of these men has a great attraction for the heathen and this makes it easy for him to adopt Islām. This was true in a less degree of the Hindu Malays and they therefore were not so affected by Muhammadan influences as the pagan Malays.

We know little that is certain of the beginning of this movement. Unfortunately the Malay and Javanese historians are little trustworthy and thus the accounts by Marco Polo (end of the xiiith century) and of Ibn Baṭṭūṭa [q. v.] (middle of the xivth century) of the Muslim kingdom of Pasei on the north coast of Sumatra form the first reliable material to go upon. Islām spread rapidly along the east coast of Sumatra, for in the second half of the xivth century Indragiri and Djambi are said to have been vassal states of Malacca. In 1377 Palembang was regained by the Hindu Javanese. The interior remained too long pagan and in parts is so still. It was probably due to the power of the Hindu Menangkabau kingdom on the west coast that Islām here met with more continued resistance, which was first broken from Atjeh. Not till the xviith century did the conversion of the south coast of Sumatra begin and that of the interior only in the xviiith century. The people in the mountains of Palembang are still little affected by Islām.

Native traditions give us no exact data for the spread of Islām in the island of Java. But we know from European sources that the great trading centres of the north coast like Djapara, Tuban, Grĕsik, and Surabaya at first formed principalities half or entirely independent of the Hindu kingdom of Majapahit, and that in the first half of the xvith century, in alliance with the prince of Dĕmak, they took the capital Majapahit. It was not till then that the considerable kingdom of Dĕmak was founded and later that of Pajan and finally that of Mataram. By the conquest of these kingdoms the conversion of the whole island to Islām made rapid progress.

Beside these secular states the princes of Giri at Grĕsik long held power which was based on religious prestige.

Soon after the fall of Majapahit a powerful movement in favour of Islām began on western Java of which we have fairly reliable accounts from the Portuguese de Barros, Pinto, and Couto. In the then Hindu kingdom of Padjadjaran Muslim merchants must have been long settled. The first foundation of a Muslim kingdom there was however the result of the efforts of a scholar from Pasei, who is now called Sunan Gunung Djati from his tomb at Tjirĕbon. He left his native town of Pasei in 1521 to study for three years in Mecca. He afterwards arrived in Djapara in Central Java and preached here with such success that he was allowed to marry a sister of the king of Dĕmak. He then went to Bantĕn in West Java, converted the governor here and with the help of Dĕmak gained the political power here also and in 1527 took Sunda Kalapa, the modern Batavia, from the king of Padjadjaran. This kingdom of Padjadjaran still existed in the interior, when he migrated to Tjirĕbon about 1546 and he must have died there about 1570. His grave on Gunung Djati is still highly venerated. He is also one of the eight or nine walī who, according to native tradition, spread Islām over Java. His son Hasanuddin (Ḥasan al-Dīn) was the ancestor of the princes of Bantĕn [q. v.] and lived till about 1570. His son Yusup (Yūsuf) succeeded about 1570 in capturing Pakuwan, the capital of Padjadjaran.

At the present day the native population of Java, numbering 33,000,000, is Muslim. The only exception is formed by Christians (about 10,000) and the two little hill peoples of the Badui in the west and the Tĕnggĕrese in the east who have remained faithful to the pre-Muhammadan tradition. The latter however frequently become converts to Islām.

On the island of Borneo [q. v.] the population of the west coast seems to have been converted from Palembang; on the south coast, on the Barito, probably from Java. The whole Malay population on the coasts and the great rivers is now Muslim and makes many converts among the still pagan Dayak tribes of the interior.

On the island of Celebes [q. v.] there are in the south the Muslim Makassars and the Buginese who were not converted till later. At the beginning of the xviith century their conversion began in Tello and Goa. They are all enthusiastic Muslims and have done much to spread their religion among the distant coast peoples of the east by their trading journeys and colonies. The Lesser Sunda Islands, Sumbawa and West Flores, which were formerly dependent on Goa, have certainly abandoned paganism through its influence.

The Moluccas in the north east of the Archipelago along with the sultanates of Ternate and Tidore adopted Islām very early, as a result of the spread of Islām by Muhammadan traders. This was the centre of the spice trade which attracted foreign traders so much. Under their influence Zainalabidin (Zain al-ʿĀbidīn), prince of Ternate, who ascended the throne in 1486, was converted, and also Prince Tjiliati of Tidore who reigned from 1495. They are called the first sulṭāns of their kingdoms, the second under the name of Djamaluddin.

The Alfur tribes in the interior of the larger islands like Halmaheira, Buru, Ceram, the Kei and Aru Archipelagoes, and Timor have remained heathen. Islām has only made little progress among the coast population of New Guinea.

The number of Muslims in the Archipelago is about 35 millions (in 1905, 35 034 025 of whom 29 605 653 were in Java), but they observe the precepts of their religion in very different ways. As is clear from the dates above given, Islām was introduced here when its system was already fully developed. Its characteristic features among these peoples took shape according to the country, British India, from which merchants or adventurers had contributed most to its spread. In British India Islām had already adapted itself to Hinduism and was thus all the more easily adaptable to the altered Hinduism of Java and Sumatra. The popular legends of the times of the Prophet and his first successors are modelled on those of India. In these tales as in individual customs of the Indonesian Muslims one can observe traces of the influence of the Shīʿa just as on the coasts of Malabar and Coromandel, where, as in the Indian Archipelago, in other respects the Sunnī, orthodox rite is followed, and in legal interpretation the Shāfiʿī school. Here as there, there is also a great love of mysticism, which among the more highly developed assumes a pantheistic form and among the lower classes is mixed with the strongest superstition.

The by no means slight influence of the Arabs was the result, not the cause of the conversion of the Malays in the Archipelago. Intercourse with the sacred cities Mecca and Medina increased steadily from the xviith century and a continually increasing number of young men remained there to

study. These and the Arabs who migrate to India from the poor district of Ḥaḍramawt (q. v.) often protest against the customs and ideas introduced from India.

As in other countries, Islām has here also adapted itself in a high degree to the views of the converts and therefore possesses several curious features. The mosque and its personnel forms even more than in other lands the centre of influence of this religion on the whole life of the people. There are Friday mosques in the more important places in Java, in Atjeh, and Central Sumatra; in the Malay districts of Borneo only in the chief towns, and among the Makassars and Buginese only in the capitals of the many principalities. In the east of the Archipelago they are rare. Smaller mosques in Java, Central Sumatra, and in Atjeh are fairly common. Only a small minority perform the *ṣalāt* here; on the other hand, a considerable assembly takes place during the two official festivals of Islām (see 'ĪD AL-AḌḤĀ and 'ĪD AL-FIṬR). The structure of the East Indian mosque is characterised by a broken roof which consists of two or four small roofs one above the other, crowned by a separate pinnacle. Only a few of the largest mosques have minarets. The *mu'adhdhin* (outside Java frequently called *bilāl*) sings his call to divine worship from this broken roof, but previously it is vigorously announced by the beating of a long wooden drum (*bĕdug* or *tabuh*).

The personnel of a mosque consists of at least four men: an *imām*, a *khaṭīb* (Jav. *kĕtip*), a *bilāl*, and a servant. There may however be as many as forty or even more. In the Dutch Indies these officials are not clergy any more than in other countries. In Java however they often carry out the duties of a ḳāḍī (Jav. *kali*) and perform wedding ceremonies, as they alone have the necessary qualifications. The outer gallery of the mosque (*serambi*) therefore becomes a court house for the settlement of all quarrels that are decided in these countries by religious law. In Java these include questions of marriage, family law and inheritance; the *panghulu* or chief of the mosque for this purpose sits with some qualified members of his staff, often on Thursdays. In 1882 the Dutch government regulated by law the *panghulu* courts and made them courts of justice (*Priesterraden*) with three to eight members.

These courts have in most cases to deal with complaints by women of insufficient attention or bad treatment from their husbands or to give official sanction to a request of a woman for divorce as a result of a previously pronounced conditional *ṭalāḳ* (*ta'līḳ*) [q. v.]. The Muslims of Indonesia have adopted the principle of a conditional *ṭalāḳ* as a corrective against the too great dependence of women according to Muslim law. In Java, Madura, and other islands it is a regular custom for the husband immediately after the marriage ceremony to secure for his wife the dissolution of the marriage by *ta'līḳ* in case he should not fulfil the obligations of a good husband. Only in the matriarchal people of Menangkabau and among the Achinese is this conditional *ṭalāḳ* not the custom, as the women there do not leave their family after marriage and remain more independent.

All that is acquired during marriage is in Java considered the joint property of the couple. On divorce therefore disputes as to its division thus frequently come before the *Priesterraad*. In cases of inheritance law the judges frequently demand 10% of the estate. *Waḳf* property is administered by these judges and quarrels about it settled by them. They appoint guardians for minors. They also appear as *walī*'s at the weddings of women who have not a *walī* available among their blood-relations.

The *zakāt* (Jav. Mal. *djakat*) to the Muhammadans of the Indies means principally the handing over of the tithes of the harvest of rice and similar fruits of the fields. Only in the Sunda countries (West-Java), Atjeh, Palembang, and some other districts of Sumatra do we find a kind of official collector. These however exercise no rights of compulsion regarding the collection. In other countries this religious duty is either entirely neglected or its fulfilment depends entirely on the degree of piety in the individual. Under various pretexts the staff of the mosque is able to get a considerable portion of the yield for themselves. Where the *zakāt* is delivered without an official collection, it is given by the pious to honoured scholars etc. At the time of the Atjeh war a considerable portion of the *zakāt* was expended on the "holy war".

The payment of *zakāt al-fiṭr*, the small poll tax ordered by law to be paid at the conclusion of the fast, is fairly general. It has practically assumed the character of a free-will offering.

The observance of the five daily *ṣalāt*'s varies considerably with place and time. In West-Java and South-east Borneo for example there are districts where almost every one of these services is regularly held. In Central Java and Atjeh they are neglected by the majority and those who observe them faithfully and at the same time refrain from the popular amusements banned by Islām, such as *gamĕlan*, *wayang*, dancing, *tandak* performances etc.) are given special names (*wong putihan*, *sĕbe*, *santri*) and distinguished from the great mass of the people (*wong abangan*, *bangsat*).

The fast of Ramaḍān (*puasa*) is more widely observed. The festivals at the end of it are celebrated as the most important of the year and regarded by Europeans as the Muhammadan New Year.

The *ḥadjdj* is very eagerly performed by the people of the Archipelago; in the last years (about 1913) the number of pilgrims was 20—30 000. These usually leave officially appointed harbours by European steamers for Djidda and return the same way. Of these multitudes, several young men always settle in Mecca for some years to devote themselves to religious studies. They form the Djawa colony there (about 7000 souls in 1914) and at their return home form the link which binds international Muhammadan culture with that of their native land.

The main characteristics in their religion or their conversion are considered by the Muslim natives to be circumcision and abstention from pork or alcohol. Of all religious duties these are the ones most punctiliously observed.

Elementary religious instruction (recitation of the Ḳur'ān and possibly practice in the *ṣalāt*) is given by the village "priests" or by other teachers. In many districts only a small number of boys and a still smaller number of girls receive this instruction.

In the larger centres of population there are scholars, who introduce pupils to a knowledge of Muslim learning in the mosque, in their own houses, or in a special building. The great reputation

of such a *guru* induces many young people from far and near to settle for a considerable time in his neighbourhood. Characteristic however are the institutes on their own ground, which as it were form separate villages, where students from various districts live together to devote themselves to study under the direction of one or more *guru's*. In Java these institutions are called *pĕsantrèn* (i. e. abodes of *santri*). They consist of the houses of the *guru's* with their families, and of *pondok's* or buildings, which are divided into two parts by a passage down the centre. Each of these consists of a row of cells, which serve as sleeping rooms and also as studies for two or more boys. The whole institute with its buildings and estates is often a foundation (*wakf*) by pious people; in Central Java there are frequently villages which were freed by former rulers from taxation, etc., and emancipated from all authority of the usual chiefs and dedicated as *pĕrdikan-desa's* exclusively to places of religious study.

In Atjeh such institutions are called *rangkang*, in Central Java *surau*. Their organisation shows some differences from that of the *pĕsantrèn*. In all these schools the young native Muslims are more or less initiated into the well known mediaeval cycle of Muslim learning: law, religion, and mysticism. The manuals used are the authoritatively accepted texts, which are translated from Arabic into a native language or read in the original itself. Advanced pupils also apply themselves to Kur'ānic exegesis, the sacred traditions, and their explanation, the theory of jurisprudence, etc. The period of study lasts from two to ten or more years, according to the goal aimed at by the *santri*. Those who study for a long time go from one *pĕsantrèn* to another to hear various distinguished scholars. In the country itself the more talented among them can make great progress in learning, but the greatest fortune that can befall the seeker after knowledge is to study in Mecca.

The Muslims of the Dutch Indies revere the international saints of Islām known to them. The main objects of their pilgrimages and vows however are their *walī's*, to whom is ascribed the introduction of their religion in their region. In Java they are the eight or nine *walī's* of the old trading-towns of the north coast, where the foreign Muslim merchants settled who first converted the native population in their neighbourhood. They also believe in patron saints of certain places and of certain spheres of daily life and, in opposition to the convictions of the educated believers, in trees, stones etc. being inhabited by spirits. There are also individuals who are worshipped as *keramat*, wonder-workers. Saiyids and shorfa reap advantages from these beliefs of the credulous multitude. No East Indian Muslim can conduct his affairs without the help of saints. The curing of a dear relative who is ill, the winning of the love of a woman, the blessing of getting children, protection of the harvest against insects, success of a son in a school examination, promotion of a native official to a higher post, appointment of a prince as heir apparent, all these and similar fortunate events are hoped for through the favour of saints and their intervention with Allāh, who is Himself enthroned too high to be directly approached with such requests. These often take the form of a conditional vow (*nadhr*, *kaul*, *niyat*, etc.). When a wish is fulfilled, the tomb of the saint is visited and recitations of the Kur'ān held, or a sacrificial animal is killed there, or a feast given or something else done which is known to be specially pleasing to the saints or some particular saint. The simple villager often promises something which he himself esteems very highly but which must be repulsive to the Muslim saint, such as the performance of a *wayang*. How much saints' graves were venerated in olden times in Java is seen from the fact that former rulers have freed certain villages from other burdens in return for the maintenance of these *astana's* (*pĕkuntjèn* villages).

From the earliest times the East Indian Muslims thought more of mysticism than the law, more of religious contemplation than of the fulfilment of ritual duties. The influence of Hinduism as well as the fact that it was Indians who sowed the first seeds of Islām favoured this tendency. In the tradition, frequently expressed in poetical language, of the eight or nine *walī's* of Java, pantheistic mystical sayings are attributed to some of them, and in the Malay poems of Hamza of Barus, whose doctrines won many adherents in the xviith century in North Sumatra and formed the subject of lively discussions at the court of Atjeh, the relation of man to God is described in erotic metaphors. In later times under the influence of Mecca and Ḥaḍramawt there was an increasing reaction on the part of orthodoxy against these heretical doctrines but this could not prevent works like the "Book of the Perfect Man" by 'Abd al-Karīm al-Djīlī [see AL-INSĀN AL-KĀMIL] continuing to be zealously read by a wide circle. Religiously inclined Javanese usually enter all kinds of quotations in private notebooks (*primbon's* in Java) which they consider suitable for the guidance of their daily life. Among these, pantheistic or even nihilistically coloured sayings are particularly common. Such wisdom is particularly in vogue under such names as *ilmu ḥaḳīḳat* (doctrine of the highest reality), "doctrine of the seven degrees of being", *ilmu salik*, "doctrine of the wanderer", i. e. on the path to reality. Half-educated people content themselves with learning some formulae by heart or with a kind of mystic catechism. Illiterates carry as amulets mystic figures with such sentences on them (*dawirah's*, from the Arabic *dā'ira*, circle).

Of the mystical orders (*ṭarīḳah's*) the Shaṭṭārīya gained the most adherents in Indonesia in the xvith—xviith centuries. It had then prominent representatives in Medina. It has since almost disappeared in the rest of the world of Islām, but still has many followers in the East Indies. Here it has adopted many heretical elements from popular beliefs. In later times the Ḳādirīya, Naḳshbandīya, Shādhilīya, etc. through Meccan influence attained considerable prestige. The Sammānīya with their noisy *dhikr* exercises spread among the lower classes and resulted in the rise of popular amusements like the Atjeh *sadati* performance, which look like a caricature of the *dhikr*.

Ethical mysticism of the type best represented by al-Ghazālī [q. v.] is also zealously studied in the Indies among such circles as lay particular stress on strict observance of religious law and on dogmatic orthodoxy.

The Chinese, Arabs, and Europeans also later found their way to this archipelago with its varied products. The Chinese probably traded with the Archipelago from the viith century. If one may judge

from present conditions, in addition to the traders, the poorest young men from South China emigrated to the Indies to make a living by their work and trade and often married native women. From them is descended the mixed Chinese population of the Archipelago, often prosperous and economically very important on account of their industry and thrift. As these half-caste Chinese people retain the manners and customs of their fathers they do not become merged in the Malays. With the more recent immigrants, some 600.000 in number, they are now settled far into the interior of the great islands and in the important places on the coast, following their industry or commerce. On the present immigrant Chinese see SUMATRA. The Arabs also, mainly from Hadramawt, go to the Dutch Indies to earn money. Clever and enterprising they rely, with much success in their relations with the Malay Muslims, on their religion and nationality, especially if they can call themselves *sharif* or *saiyid*. Although, like the Chinese, they often become well to do and return home, they leave behind them their families from native wives, which however show a greater inclination in the end to merge in the native population. Prominent Arab scholars from Mecca and Medina also visit the islands occasionally, go to the courts, sometimes remaining a long time, and certainly contribute to strengthen Arab influence, but on account of their slight numbers cannot be considered an important element in the population. The Arabs in the Archipelago are estimated at about 31.000.

Europeans. Of the foreigners the ruling Dutch are economically the most important. With isolated other Europeans they control the wholesale trade, the working of the plantations, and industry. Shortly before conquering Malacca in 1511 the Portuguese had reached this Archipelago and went in the following years to the Spice islands, where they made conquests, carried on trade, and endeavoured to spread their religion. Their enemies, the Spaniards, who had reached the Moluccas from the east, soon retired to the Northern Philippines again.

Towards the end of the xvi[th] century several European nations succeeded in reaching these islands. In 1594 the English, in 1596 the Dutch, and later the French, Danes, and Swedes with their armed ships came to the ports of North and East Sumatra, the north coast of Java, and the Moluccas to obtain spices, precious metals, and other products, which had previously been the monopoly of the Portuguese, Chinese, and Southern Asiatics.

The very many small Dutch societies for trading with the Indies united in 1602 into the "Geoctroyeerde Oost-Indische Compagnie" with a capital of 6.000.000 guilders. During the xvii[th] century this trading company extended its political power and influence, besides its trade from Africa to Japan, over the Southern Asiatic coasts and the East Indian Archipelago and maintained its position till the end of the xviii[th] century. The competition of the other European nations, the feuds and quarrels in and between the various native states, and its rigid monopoly system soon forced the company continually to conquer more territory, and the resultant costs of administration and war contributed largely to the fact that they were forced in 1800 to hand over their possessions and their burdens of debt to the Dutch government. Their rule then extended to the coast regions of the larger and entirely over many smaller islands. Their relations to the native population consisted almost entirely simply of contracts and trading agreements with the native chiefs for the monopoly of exports and imports. The European influence on the masses of the people was thus very small. During the Napoleonic wars, when the Dutch lost their independence, the English conquered their Indian possessions, but these were returned at the Congress of Vienna as far as they were situated in the East Indian Archipelago. In the xix[th] century and at the beginning of the xx[th] all the islands have been conquered right into the interior and the influence of the Europeans on the natives thus increased. This is best seen on the island of Java which has always been the centre of Dutch authority.

The Queen of the Netherlands possesses executive power with regard to the Dutch Indies and partly independently and partly in combination with the "Staten-Generaal" in the Hague, the legislative authority. The Indian budget of expenditure (366 million guilders in 1916) is fixed by the Queen in combination with the "Staten-Generaal". The Dutch minister of the Colonies takes upon himself the responsibility of the Queen. A Governor-General represents the Queen in the Indies. He also has legislative power in certain circumstances. In the exercise of his great power he is more or less dependent on the cooperation of the "Raad van Indië", a council of five officials of high rank. Under these authorities appointed by the Queen, seven directors, a commander of the army and a chief of the navy with their nine departments carry on the ordinary business of administration. The "Algemeene Rekenkamer", which controls finance, has, like the others, its seat in Batavia. The Dutch Indies are divided into 34 residencies and 5 gouvernements which are under residents and governors. There are 17 of the former in Java. Under these higher civilian officials are assistant residents, controllers, and deputy controllers, all Europeans. The Indian volunteer army consists of about 12.000 Europeans and about 23.000 natives under 1330 Europeans and a few native officers. The Dutch Indies has a navy of its own of small ships and the battle ships of the motherland are detached there.

Besides the area directly governed there are about 300 native principalities which enjoy a certain amount of independence but are otherwise entirely subject to the Dutch government.

This firm government conducted on European lines secures the natives important advantages in contrast to their previous conditions. There are no longer civil or foreign wars, and the exploitation of the masses by the native princes and nobles is very much limited. Among the primitive tribes there is now security of life and property. Trade and commerce have increased everywhere as a result of this security, and necessities of life such as fabrics, crude metals, salt, tobacco, etc. are imported into the interior of the islands much cheaper than formerly. While formerly nothing was done against the terrible tropical diseases, they are now combatted in many ways, although still to an insufficient extent. The Dutch government is as a rule neutral in matters of religion. The often enormous increase in population, for example in Java excluding immigration, from 4 to 5 mil-

lions in 1812 to 30 millions in 1905, is to be ascribed to these circumstances as well as to native customs such as early and general mariage.

The economic development which these colonies have undergone in the last 50 years through the cultivation by Europeans of products for the world market is of great importance also for the native population. In 1914 the exports of sugar amounted to 185 million guilders, of tobacco 6 million, copra 48 million, coffee 22 million, tea 27 million, rubber 28 million, pepper 11 million. Certain mining districts also yield important products like petroleum (exports 53 million guilders), tin (30 million), anthracite, gold etc.

Bibliography: The literature on the Dutch East Indies in general and its various parts forms a great library. Only the following works may be mentioned here. On Islām: C. Snouck Hurgronje, *De beteekenis van den Islâm voor zijne belijders in Oost-Indië*, Leiden 1883; do., *De Islâm in Nederlandsch-Indië*, Baarn 1913; do., *Nederland en de Islâm*, 2. ed., Leiden 1915, French transl., *Politique musulmane de la Hollande*, Paris 1911; on the introduction of Islām: C. (A. W. NIEUWENHUIS.)

INDJĪL or *Andjīl* is corrupted from εὐαγγέλιον, gospel. From the Ḳur'ān as well as from numerous authors we see that the Muslims had a certain knowledge of the Gospels. It is easy to show with the help of a few quotations the extent of this knowledge. On the other hand, it is often difficult to define positively and not merely by way of induction how this knowledge was obtained. Some of it was certainly obtained orally in controversies or friendly conversations between Christians and Muslims. But this method of transmission for the most part lacks historical record. There were also reminiscences of Christianity which were brought in by Christians converted to Islām. A similar Christian influence made itself felt on the rise of Ṣūfīism, in the teachings of which traces of Christianity can be clearly seen (cf. the writer's, *Gazali*, Paris 1902). Finally, one may certainly assume that there were Muslim seekers after knowledge among the Arabs who read Arabic translations of the Gospels made by Christians. We therefore here give a brief survey of what can be known about these translations, followed by some instances of recollections of the New Testament in the Ḳur'ān or the writings of various writers.

The Christian Arabs translated the Gospels from the Greek, Syriac, or Coptic. The translation from the Greek took place very early, as is shown by the great antiquity of the manuscripts (Vatican,

Arab, 13, and Museo Borgiano-Propaganda), which date back to the viiith century A. D. According to Barhebraeus, there was a still older translation made between 631 and 640 by the Monophysite patriarch Johannes by order of an Arab prince, ʿAmr b. Saʿd.

George, Bishop of the Arab tribes of Mesopotamia, a friend and contemporary of James of Edessa, wrote scholia on the Holy Scriptures; Sprenger (*Das Leben des Mohammed*, i. 131 *sq.*) even thought he could recognise in a passage in Muḥammad b. Isḥāḳ (ed. Wüstenfeld, p. 149 *sq.*) a fragment of a pre-Islāmic translation. This fragment contains the verses 23—27 of John XV. The word *alma-n-ḥ-anā*, by which παράκλητος is translated, is neither Arabic nor Syriac but Palestinian and rather old. But even if so great an age cannot be given them, in any case the first translations from the Greek are hardly later than the Muslim conquest and the spread of the Arabic language, which followed it.

A likewise very old translation from the Syriac exists in a Leipzig ms.; according to Gildemeister's investigations (*De Evangeliis*, p. 35), it must have been made between 730 and 830 A. D. The Muslims were thus able to become acquainted with the principal books of the New Testament at quite an early date through direct reading of Arabic translations.

Besides the canonical gospels we possess Arabic recensions of the following New Testament apocrypha: the gospel of the Childhood, Protoevangelium of James, Apocalypse of Paul, a sermon by Peter, and one by Simon, a Martyrdom of James, and of Simon, as well as a small number of others, which do not appear to have been known in Muhammadan circles. R. Duval, *La Littérature Syriaque*, Paris 1899, p. 96, mentions an Apocalypse of Peter which, according to him, is an Arabic compilation of the xiiith century.

Muḥammad was less acquainted with the canonical gospels than with the apocryphal. He did not obtain his knowledge from purely Christian sources, but must have obtained it orally from Christian Jews. This is shown by the kind of legend preserved in the Ḳurʾān. They must have taken their form from those whom Muḥammad calls *ḥanīf*'s (see ḤANĪF) and who traced their religion to Abraham. This question however is only a particular case of the more general question of the origin and sources of Islām.

Poetry is also one of the ways by which Christian ideas found their way among Muslims. At the time of the rise of Islām poets were fond of visiting Hīra [q. v.], where they were on friendly terms with Christian Arabs. They then related in Arabic the legends which they had heard in the wine booths in Hīra. Among these poets are mentioned Zaid b. ʿAmr b. Nufail and Umaiya b. Abi 'l-Ṣalt, of whom the latter was particularly well versed in Jewish legends also. Poetry thus formed for a fairly long time a link between Muslims and Christians. We know with what favour the Christian poet al-Akhṭal [q. v.] was received at the court of the Omaiyads. Medicine and administration also led to much intercourse between the two religions. We need only recall the names of Sergius Manṣūr, secretary to four caliphs and father of John of Damascus, and the numerous Christian clerks who were employed by the Muslim government, as is evidenced by the order made by al-Walīd b. ʿAbd al-Malik forbidding them to keep their books in Greek. But let us come back to the Ḳurʾān.

Jesus, Mary, and the Gospel are frequently mentioned in the Ḳurʾān, and Muḥammad knows the essential difference between the Gospel and the Ḳurʾān regarding morals, namely compassion and mercy (lvii. 27); he also knows to some extent the parable of the sower (xlviii. 29) and the promise of another messenger of God (vii 156, cf. xxi. 17). He is also aware that the Gospel is put forward as a confirmation of the Pentateuch (v. 50). Of the miracles of Jesus he mentions the healing of the blind and of the leper as well as the raising from the dead.

The most popular tradition in those circles from which the Prophet obtained his knowledge, seems to have been that of the Annunciation. "He has chosen thee among women" the angel says to Mary in Ḳurʾān, iii. 37 (cf. Luke i. 28). He likewise adopts the virgin birth of Jesus (xxi. 91). When the crucifixion is denied in Ḳurʾān (iv. 156 and iii. 47), he is following the view of the Christian sect of the Docetae. The briefly mentioned ascension brings the life of Jesus to a conclusion at the moment when, according to the Gospels, the Passion should begin (cf. al-Zamakhsharī, ed. Lees, i. 169, where a tradition of Ibn ʿAbbās is quoted).

The calling of the apostles is distinctly mentioned (iii. 45-46). The institution of monasticism is connected with this as in the work of the Ikhwān al-Ṣafāʾ [q. v.]. A miracle in the Acts of the Apostles finds mention in the Ḳurʾān: Jesus lets down from heaven a covered table for the apostles (v. 112—115; cf. Acts, x. 9 *sqq.*). The story that Jesus miraculously gave life to a clay bird (iii. 43; v. 110) is taken from the Gospel of the Childhood. The name "second Adam" given to Christ is approximately found in Sūra iii. 52. The expression "strengthened by the Holy Ghost", which Muḥammad uses in ii. 81, was not understood by him. He confuses the Holy Ghost with the Archangel Gabriel.

The commentators still further develop the legends in the Ḳurʾān connected with the New Testament, particularly those of the childhood of Mary. On the whole the figure of the Virgin Mary is a very attractive one in the Ḳurʾān and not very remote from Christian sentiment. On the other hand, the figure of Jesus is much more uncertain and, in comparison with the Gospels, a much lower one (cf. ʿĪSĀ). Jesus is rather only a pious prophet. Muḥammad leaves him the name Messiah (iv. 169 *sq.*), but this name does not seem to have any definite theological meaning with him. Of other New Testament personages, Muḥammad only mentions John the Baptist and Zachariah.

The New Testament had an important influence on Tradition (*Ḥadīth*, q. v.). Various miracles, sayings and ideas which are attributed to Muḥammad or his followers have their origin in the Gospel. The stories that Muḥammad increased supplies of food or water go back to the miracle of the loaves and fishes in the Gospel rather than to that of the wedding at Cana, as Goldziher thinks. Numerous traditions regarding the high position of the poor and the difficulty of the rich in entering heaven, again reflect the doctrine of the Gospel and are in contrast to the views of the heathen Arabs. As Goldziher has shown, an Arab traditionist, Abū Dāʾūd [q. v.], even puts a version

of the Lord's prayer into the mouth of Muḥammad. H. Lammens also points out to me that the tradition, according to which Abū Bakr is moved to tears on hearing the Prophet preach, is of Christian origin. The "gift of tears", which is known to Christian mysticism, was little fitting to the temperament of the Arab conquerors.

On the legends of the Mahdī and on Muslim eschatology Christian apocalyptic literature had a considerable influence.

In several Muslim historians we find a rather extensive knowledge of the Gospels. Al-Ya'ḳūbī, one of the fathers of Arab history, gives a synopsis of them. Such an inquiring spirit as al-Mas'ūdī does not conceal his relations with the Christians. In Nazareth, as he tells us, he visited a church highly venerated by Christians and received a large number of Gospel stories from them. He knows of the birth of Jesus in Bethlehem, his childhood in Nazareth, the saying of God in Mattew III, 17: "This is My beloved Son", which he gives with slight alterations. He has also heard the story of the Magi who visited the infant Messiah, according to the Gospel and other sources. He gives the story of the summoning of the Apostles accurately. He also names the Four Evangelists and speaks of the "book of the Gospel", of which he gives a summary, as if he had seen it. On the other hand, he shows a certain distrust of this book, in contrast to the great reverence with which the Ḳur'ān speaks of it. Al-Mas'ūdī is comparatively well informed about the lives of the Apostles. He twice speaks of the martyrdom of the apostles Peter and Paul, but ascribes to the latter the same kind of martyrdom as, according to tradition, was the fate of Peter only. He knows Thomas as the apostle of India. On the whole, Thomas seems to be the apostle best known to the Muslims next to Peter, and even Paul is less known than Peter.

Al-Bīrūnī is still better informed than al-Mas'ūdī. In order to write his *Chronology*, he had to consult Nestorian Christians. He knows various parts of the Gospels and also of the commentary of Dadīshō' (Jesudad, cf. Duval, *Litt. Syriaque*, 2nd ed., p. 64) and discusses it with a certain spirit of criticism. The four Evangelists to him are four recensions, which he compares with the four copies of the Bible, the Jewish, Christian, and Samaritan. He notices, however, that these recensions differ considerably from one another. Al-Bīrūnī gives the genealogies of Joseph in full from Matthew and Luke, and tells in a very interesting passage how the Christians explain this difference. He speaks of other gospels which the Marcionites, Bardesanites, and Manichaeans possessed, the two first of which differed, according to him, "in some parts" from the Christian Gospels, while the others were contradictory. In view of all these different recensions he concludes that one cannot rely very much on the prophetical value of the Gospels.

The Persian version of Ṭabarī's *Chronicle* (French ed. by Zotenberg) contains New Testament legends, which are more detailed than in the Arabic original and correspond with those found in the stories of the Prophets (*Ḳiṣaṣ al-Anbiyā'*). Certain details from the Passion for example are given, such as the repudiation by "Simeon", the betrayal by one of the Apostles, who is not mentioned by name, and the story of Mary under the Cross. For the rest the author holds the Muslim view that another person, whom he calls Josua, was substituted for Jesus. As to the history of the Apostles he gives the tradition which makes John come to Edessa.

In the mystic literature, one finds numerous allusions to the Gospel, there are even traces of some knowledge of the exposition of some passages in scripture by the Fathers of the Church. What is given by the Muslim mystics as sayings of Jesus, however, is very far from always agreeing with the Gospel. For example, the sayings ascribed by al-Ghazālī to Christ are almost all incorrect. On the other hand we find in al-Suhrawardī an accurate and complete version of the parable of the sower. The *Rasā'il Ikhwān al-Ṣafā'* contain remarkable passages about the crucifixion of Jesus, the actuality of which they assume, about the Resurrection, the assembling of the Apostles at the last supper and their scattering over the face of the earth. The *Acts of the Apostles* (*Af'āl al-Ḥawāriyīn*) is expressly quoted there (Dieterici, p. 605).

The philosophic literature also shows a large number of controversies between Christians and Muslims. Among the celebrated polemicists we need only mention here Abū 'Alī 'Īsā b. Zor'a, who in 387 composed a reply to Abu 'l-Ḳāsim 'Abd Allāh b. Aḥmad al-Balkhī, and Yaḥyā b. 'Adī, a Christian scholar and pupil of al-Fārābī. The latter produced an apology for Christianity, which he dedicated to Shaikh Abū 'Īsā Muḥammad b. al-Warrāḳ. He also replied to strictures by al-Kindī on the Trinity. [See also the articles 'ĪSĀ and AL-MAHDĪ].

The Muslims in general respect the Gospels and revere Jesus and Mary. The Turks call it *Indjīl sherīf*. Various writers who have lived in Turkey say that many Turks in secret recognise the superiority of the Gospels to the Ḳur'ān. In particular they mention the case of Ḳābiḍ [q. v.], who in the reign of Sulaimān I openly professed his preference for the Gospels and was therefore executed (D'Ohsson, *Tableau général de l'Empire Ottoman*, i. 153).

Dieterici, Berlin 1886, p. 594 *sqq.*

(CARRA DE VAUX.)

INDJŪ. This name, which is properly a name for the royal estates under the Mongols, is usually given to the dynasty which reigned from about 703—758 = 1303—1357 in Fārs (Shīrāz), as its founder, Sharaf al-Dīn Maḥmūdshāh, had been first of all sent there by Ūldjaitū to administer the royal estates. According to a statement in the *Taʾrīkh-i Guzīda*, he was a descendant of ʿAbd Allāh Anṣārī [q. v.] Under Ūldjaitū's successor Abū Saʿīd he not only retained his office, but was able continually to extend his power so that by about 725 (1325) he was practically independent ruler of Shīrāz and almost the whole of Fārs. After the death of Abū Saʿīd he was put to death by order of his successor Arpa Khān in 736 (1335-6). According to the *Shīrāz-nāma*, he had four sons: Djalāl al-Dīn, Masʿūdshāh, Ghiyāth al-Dīn Kaikhusraw, Shams al-Dīn Muḥammad and Abū Isḥāḳ Djamāl al-Dīn. The first named was already ruling in Shīrāz in the lifetime of his father down to about 735, when during his absence his brother Kaikhusraw took his place. On his return however the latter refused to restore him his authority and a war broke out between the brothers, which ended in 739 (1338-9) with the death of Kaikhusraw. Masʿūd had imprisoned the third brother Muḥammad in Kalʿat Safīd, but he was able to escape and found support from the Čupānid Pīr Ḥusain. The latter collected a Mongol army and advanced on Shīrāz with Muḥammad, so that Masʿūd had to take to flight and Pīr Ḥusain entered Shīrāz.

But his rule did not last long, for, when shortly afterwards in 740 (1340) he put Muḥammad to death, the population took up such a threatening attitude that he found it advisable to retire, only however to return next year with new forces. But on this occasion also he had no good fortune, as he quarrelled with the Čupānid Ashraf and, when the two sides were drawn up in line of battle, he was left in the lurch by his own men, so that he had to seek refuge with Shaikh Ḥasan, who had him put to death. In the meanwhile, Masʿūd Shāh had retired to Luristān and made an alliance there with Yaghībasti, a brother of Ashraf, while Ashraf himself took the side of his brother Abū Isḥāḳ. Masʿūd, however, succeeded in reaching Shīrāz with the help of Yaghībasti, but there met the same fate as his brother: he was treacherously murdered by Yaghībasti in 743 (1343). The latter thereupon quarrelled with Ashraf but made peace again and they jointly attempted to subjugate Fārs, but their troops dispersed when the news of the murder of their brother Ḥasan Kūčūk [q. v.] reached them.

Abū Isḥāḳ, a younger son of Maḥmūdshāh, who had previously received the town of Iṣpahān from Pīr Ḥasan, now became lord of Shīrāz and of the whole of Fārs. As he endeavoured to extend his rule over Yazd and Kirmān, he came into conflict with the rising power of the Muẓaffarids [q. v.] with varying success. The result was that Abū Isḥāḳ was not only driven from Kirmān and Yazd, but was ultimately besieged in Shīrāz. The town had to be surrendered to the Muẓaffarids in 754 (1353). Abū Isḥāḳ had in the meanwhile fled to Kalʿat Safīd, received some support from the Ilkhān Shaikh Ḥasan from Baghdād and went to Iṣpahān. There also he was besieged and finally captured, handed over to the relatives of a shaikh who had been put to death by his order, and was killed by them 758 (1357). The Persian poet ʿUbaid Zākānī commemorated his Maecenas in an elegy.

INDO-CHINA. Further India. — Islam in French Indo-China. French Indo-China comprises the whole eastern zone, by far the greater part of the double peninsula which lies between British India and China. The western zone belongs to England and the rather small part in the centre to Siam, which serves as a buffer state between the two. French Further India comprises in the south Cochin China (Annamese Nam kỳ) which is a direct possession, in the centre the kingdom of Cambodia (in the dialect Srŏk Khmêr, Nokor Kampučā (Sanskrit, Kambuja)), in the north the kingdom of Laos (Laotic: Möüng Lao); to the east the empire of Annam (Annamese: Nu'ó'c Annam); in the north east the province of Tonking (Annamese Bắc kỳ), all of which are protectorates.

This country, one and half times the size of France, is only inhabited by about 12,000,000 Annamese, 1,500.000 Cambodians, 1,500,000 Laotians, and about 200,000 Tjams[1]) and Malays, 275,000 Chinese, 1000 Hindus, mainly Tamils, and about 500 000 savages[2]) or half civilised men.

[1]) In French Indo China *čăm* (*chame*) is written and pronounced *tiam*. It should be noted that: *ă* = *ia*, *ĕ* = *ä*, *ŏ*, *ō*, *ö* = *ü*, *j* = *dj*, *nh* = *ñ* in the above quoted Indo Chinese words.

[2]) The natives call themselves *Moi*, *Pnong* or *Kha*, which in Annamese, Cambodian and Siamese means "savage".

As regards religion, the Annamese like the Chinese are Buddhists or Confucianists, only a very small number being Christians; the Cambodians and Laotians are Buddhists, the semi-civilised are almost all animists, with a very few Christians; the Tjams, Malays, and a few Tamils are Muslims, except 20 to 25 thousand of the Binh-Thuận who have remained faithful to a very ancient Brahmanism. Some Tamils and Bengalese are Hindus.

The Tjams (*orang tjam*) live partly in Binh Thuận, in modern Annam, the last refuge of their nationality, partly in Cambodia, along the bank of the Mekong, and on the edge of the great lake (*Tonlé Sap*) partly around the towns of Châu đốc and Tây-ninh in Cochin China, and finally in a few villages in Siam.

The Malays who are almost equal in numbers live entirely near them in Cambodia as well as in Cochin China and are in constant relations with them. They are not found in Annam.

Islām at present plays only a slight part in Further India. It was at one time more important but never predominant, as long as the kingdom of the Tjams dominated the peninsula.

The Tjams, whose physical features and language are obviously connected with those of the Polynesian Malays, at one time founded a powerful kingdom in Further India, which seems to have comprised Cochin China, the modern Annam, with the exception of Tonking, and a part of Cambodia. A memorial of its greatness is the stele of Nhatrang, of the second or third century. In the thirteenth century the kingdom, although already declining, still aroused the astonishment of Marco Polo. In the fourteenth, however, it was broken up when the Cambodians and Annamese attacked it together and in 1471 there were only a few tribes in the valleys of the Binh Thuận who were much oppressed by Annam. At that time many of them fled to Cambodia, where their descendants still live.

The oppressed Tjams greeted the French rule with joy, but the French are not succeeding in elevating them. Physically they are not degenerates. They are taller and better proportioned than the Annamese, the skin is soft and of a light brown colour, the hair soft and often wavy, the face rather broad, the eye well formed, and with an open look, the mouth of medium size. They belong to those Asiatics whose type is nearest to ours, but their fertility is only very moderate. In spite of a certain childish liveliness and a great softness of character they are intellectually extremely apathetic. They practise neither commerce nor industry, live in very miserable villages (in Annam they are built on the ground and in Cambodia on piles), weave a few stuffs, and only do as much agriculture and cattle rearing as is necessary to maintain life without worrying whether they can improve their lot.

When was Islām introduced among the Tjams? This question has not yet been solved. One thing however is certain. It was preceded by Hinduism, the most accepted form of which was Çivaism, which is still practised with the most remarkable endurance by some thousands of Tjams who have remained true to this old faith and therefore call themselves *Tjam-Djat* (Sanskrit *jâti*), pure-bred Tjams. But by their Muslim fellow countrymen they are called *Akaphir* or *Kaphir* (Ar. *kâfir*) "infidels", without the one side or the other seeing an insult in the appellation.

Two hypotheses may explain the introduction of Islām into Further India. It was either brought in the xth or xivth century by Arab merchants, Indians or Persians, in the great movement of the general spread of Islām, or it came later as a result of a Malay immigration.

It is certain that the Arabs were acquainted with Further India at a very early period. As early as the viith century there were regular relations between Arabia, China, India and the Archipelago. By 758 the Arabs and Persians were so numerous in Canton that they laid the city waste with fire and sword. In the ixth century they raised a rebellion in Khan-fu, in which 120 000 of them perished by the sword. In these circumstances they must have been acquainted with Indo-China and if they knew it, they must also have endeavoured to win it for their religion with the well known missionary enthusiasm of the Muslims.

A passage in the *Annals of the Sung dynasty*, Chap. 489, which was ingeniously explained by Ed. Huber (*Bulletin de l'École française d'Extrême Orient*, III, 55, N°. 1), shows that Islām was first brought to them by the Arabs or Persians. In the *Annals* it is stated: "There are (among the Tjams) also buffaloes which live in the mountains. They are not used for agriculture but only as sacrificial animals. When one is sacrificed, the men utter this prayer "*A-la-ki-ki-pa*" which means "may it soon rise again". According to Huber, this *A-la-ki-ki-pa* corresponds to *Allāhu akbar* and warrants the conclusion that there were already Tjams converted to Islām in the time of the Sung. In the same account of the Tjams it is said: "the customs and dress of the Tjams are similar to those of the population of the kingdom of Ta-che (Tādjīk i. e. Arabs)".

The historical statements of the Tjams are not to be taken too seriously. But it must be remarked that their legendary chronicles place at the head of the list of kings who had Śrī-Banöy as their capital, the Pô or lord Ovlah (Allāh) who reigned from 1000 to 1036. In the year of the Rat a man of the nature of Ovlah lived a perfect life in the Tjam kingdom, but the land was not converted. This man recommended his soul and body to the lord of heaven and settled for 37 years in Mokkah (Mecca), then came back to the Tjam kingdom..." Did the Muslim Tjams wish to number Allāh among their national rulers out of religious pride or merely give a place among their kings to the Persian or Arab pilgrim who brought them Islām? Both hypotheses are possible.

Another text which comes from the Tjams of Cambodia (see Delaporte, *Voyage au Cambodge*, Paris 1880, p. 417 *sq.*), reports that Nur Savan (Nūshirwān), the divine *luu* (youth), the first king of the Tjams, was the inventor of the alphabet, which is still used in profane books. The inhabitants who were previously worshippers of Buddha, were later converted to Islām by Fatemu Ali (cf. the Malay *Bag'inda 'Alī*), the father-in-law of Muḥammad. At the latter's birth Nur Savan had gone to Mecca to worship him as all the kings of the earth did, and was installed by him in his residence Bal-och Bali (= Śrī Banöy, the modern Qu-nhơn, Annam), the capital of Panpanang (the

modern Phan-ri and Phan-rang, Annam), to the east of Cambodia, and the Tjams still say that this is their place of origin.

In short, it is quite possible that Islām had already been introduced in the xith century by Arab, Persian, or Indian merchants. But it made only slight progress and but for the Malay immigration in the xivth and xvth centuries which kept it up and spread it, it would have probably disappeared again. It is moreover due to this immigration that Islām has retained its purity through the relation which the Malays keep up with the Tjams of Cambodia and Cochin-China.

But it is also possible that the law of Muḥammad reached them through the Malays of the Archipelago or of Malacca. The latter, as Prof. Kern has convincingly proved, themselves come from Indo-China and are related to the Tjams and, as inscriptions and legends show, were from the viiith century onwards in uninterrupted close relations with the kingdoms of Champa and Cambodia, partly through intermarriages of the ruling families and partly through invasions. These turbulent Malays, whose Islāmism was not of an intolerant type, thanks to the community of religion, kept in such close touch with the Tjams after their political decline that the two are usually confused in the history of Cambodia and Annam. Their common seditions and intrigues in the xviith and xviiith centuries disturbed the peace of the two kingdoms, particularly that of Cambodia. The chroniclers and more especially the Spanish theologians, who at the beginning of the xviith century had hoped to see Indo-China brought under the sway of Philip III, bitterly acknowledge at this period (1603) the influence of the "Moros" i. e. the Muslims whom the tolerance of the kings of Cambodia and of the Tjams allow to build mosques everywhere, who endeavour to proselytise and who hate the Christians to the extent of wishing to drink their blood (cf. *Brève et véridique relation des événements du Cambodge* par Gabriel Quiroga de S. Antonio .... New Edition of the Spanish text (of 1604) with a translation and notes by Antoine Cabaton, Paris 1914, p. 106, 124, and *passim*). Matters went so far that about 1624 a prince of Cambodia, Preḥ Rām, seized the throne supported by them, married a Malay woman, and adopted Islām to the great scandal of the true Cambodians who were faithful followers of Buddha.

The Muslim Malays and Tjams down to the xixth century took an active part in all the internal strife which disturbed the peace of Cambodia in its decline. For a time they played such an important part that one of them, Tjam Saiḥ Aḥmit (= Shaikh Aḥmad) — according to the chronicles, a Malay of royal descent, but perhaps simply a Tjam with some Malay blood —, in 1820 became regent and right hand man of Ang-Čan, the ruler of Cambodia. He aroused the jealousy of the Cambodians and the distrust of the Annamese, who would have liked the lands of Ang-Čan for themselves, to such an extent that his political enemies succeeded in having him condemned and beheaded without his fellow-Muslims, who would certainly have rescued and saved him, learning anything of it until too late. His sons and followers raised a rebellion in the province of Thbong-Khmum where the Tjams and Malays of Cambodia joined together and united with the Tjams of Chău-đôc and laid the country waste until Norodom ascended the throne in 1859 and French rule finally put an end in 1863 to the political importance of the Muslim element in Indo-China.

From the religious point of view, these Malay immigrants into Indo-China, who are mainly found in Saigon, Cho'lớn, Chău-đôc, Tây-ninh (towns in Cochin-China), Phnom Penh, Kampong-Luong, Kampong Tjam, Lovêk, Pursat and in other centres of Cambodia, show no original features. They entirely resemble their brethren in the Peninsula of Malacca, are in constant relations with them, and often receive from there missionaries whose duty it is to maintain the purity of their creed. They are intelligent, active, clever and prudent, but are considered to be treacherous, cruel, cunning and inhospitable. They keep quite apart from the Cambodians among whom they live and only maintain closer relations with their co-religionists among the Tjams. They are mainly traders, farmers, herdsmen, boatmen, drivers, growers of vegetables, and are respected if not loved in Cambodia for their intelligence and industry. Although they were well treated by their rulers, their fidelity seems to have been often rightly doubted and their interests do not seem to go beyond that of their community. They are Shāfiʿīs and in general are acquainted with the precepts of Islām and they read the Ḳurʾān and its commentaries. Among them we find for example the *ʿAḳīda* of al-Sanūsī, the *Si Burung Pingai*, Fiḳh and Ḥadīth books, the *Ṣirāṭu 'l-mustaḳīm*, various poetical works or legends such as *Sri Rama*, *Si Miskin Muḥammad Ḥanafiyyah* etc.

These religious ideas and, to a less degree their religious development, the Malays of Cambodia have in common with the Tjams of Cambodia and Indo-China. Both observe the five daily prayers, the ablutions and circumcision, which is performed at the age of 15. They do not eat the flesh of pigs, dogs, crocodiles, tortoises, elephants, peacocks, vultures, eagles, and ravens, and they refrain from intoxicating drinks. If any one worships a strange idol, he is expelled from the community. Some make the pilgrimage to Mecca or pay a certain sum, for which a representative is sent on their behalf. In Cambodia the mosques are almost always built of wood and are placed on slight eminences. The inside are large bare rooms with a platform at the back. The mats which are used as praying carpets are hung up in a rack from the rafters. On the left at the entrance there is usually a large drum painted red (Tjam *gandaŋ* = Malay *gĕndang*, Javanese *kĕndang*). Outside is a little basin of masonry for ablutions.

Within these precincts the imāms give the children instruction in reading Arabic and in reciting the Ḳurʾān. The assembly of *djumʿah* cannot take place without a quorum of 40 believers. Ramaḍān is strictly observed by all, pious families are quite abstemious in this period. On Mondays they refrain from sexual intercourse.

The Tjams of Cambodia also observe the *bulan eh haji* (fasting month of the pilgrims) also called *bulan Ovlōh* (month of Allāh) three months after Ramaḍān. They also observe the *mulot* or *molut* (= Arab. *mawlid*?), when a lock of hair is cut from the children of 3 to 15 and they are given a religious name, which for boys is always ʿAbd Allāh or Muḥammad, for girls Phwatimah (Fāṭima). The imāms, at least four in number, are invited to pray

in the house in which the ceremony is being performed. This custom of hair cutting seems to be borrowed from the Cambodians.

The *tamat* (Arab. *tamma*) is a ceremony nearly always confined to the family circle, at which a boy, who has learned the Kur'ān entirely by heart, which however happens very rarely, is led round the village on horseback amid the acclamations of men and women. He is dressed in his best clothes and is greeted with the greatest reverence by men and women.

The *zerah* (pursuit), which is celebrated in the first Tjam month, is accompanied by two days' fasting and commemorates the migration of the Prophet (Hidjra).

By the *tapat*, which we also find among the Tjams of Annam, who call it *rawah* = Ar. *tawba*, old persons are purified from their sins by means of numerous prayers and sprinkling with holy water.

Malays and Tjams have common religious officials in Cambodia who are given the following names according to their office.

Malay	Tjam	Function
1. *mufti*	*muphati*	jurist
2. *tuan kadli*	*tuk kalli*	judge
3. *raja kadli*	*radja kalik*	„
4. *tuan fakih*	*tuan pakī*	jurist
5. *hakim*	*hakem*	doctor
6. *khatib*	*katip*	preacher
7. *bilal*	*bilal*	mu'adhdhin
8. *lebai*	*lebe* [1]	officiant

All are exempt from taxation. The four first have the following Cambodian names: 1. *okña vāñ kalay*, 2. *okña raja kalay*, 3. *okña tok kalay*, 4. *okña pakī*. They are appointed by the King, belong to his council and are the official superiors of the Muslims. They are regarded by the faithful as representing the four caliphs of the Prophet and enjoy a great spiritual authority.

The religious dignitaries are usually chosen from the most prominent families whose sons can become imāms at the age of 15 and whose daughters are educated with special care to make them worthy wives. The Muslims of Cambodia respect the graves of infants which they call *ka-lak*; they believe in witches, the werwolf, evil spirits, and in magic and have retained certain agricultural customs which are also found among the neighbouring peoples such as the Cambodians and Annamese. They are relics of an old animism.

The family bonds among the Muslims of Cambodia are very strong; the father has great authority. The wife is well treated but kept strictly within the house as well as the daughters, who are very early initiated into household duties and, being under strict control, are only allowed to marry Muslims.

The Muslim Tjams have adopted from the Cambodians the custom of filing and lacquering their daughters' teeth at the age of 15, an operation which is accompanied by prayers from the imāms and sprinkling with holy water.

The marriage customs are in general Muslim. The boys do not as a rule marry before 18 or the girls before 15. The wedding feast is accompanied with great expenditure. Divorce is possible but rare. If it is demanded by the woman, she loses her dowry (Tjam *sakarin*, Malay *mas kawin*) which the husband settled on her at the betrothal.

The burial ceremony is very simple. The corpse is washed twice with a decoction of jujube leaves or benzoin water, then in clear water, wrapped in a piece of linen and placed in a grave about ten and a half feet deep, with the head to the north. A mound of earth is then erected over the grave, which is covered with thorny branches to protect it from wild animals. On the third, seventh, tenth, thirtieth, fortieth, and hundredth day the imāms are invited to pray and eat with the family at the grave. The exhumation practised by the Tjams of Annam is not found here.

The husband mourns in white 40 days for his wife, the latter three months and ten days for the husband and she cannot marry again before a hundred days.

The Islām of the Tjams in Annam has quite a different stamp. It appears to have a Shī'i character, as Aḥan (Ḥasan), Aḥai (Ḥusain) and 'Alī are particularly revered and invoked there; they also play the main part in the few manuscripts of legends still preserved in Annam. It is however considerably penetrated by animistic and Hindu ideas and customs which preceded it and still survive alongside of it. The Muslim Tjams of Annam are Muslims mainly through the naive conviction that they are Muslims. They call their Hindu country men *kaphir* without the slightest derogatory intention and themselves *banis* = *bani*, the sons of religion, or Tjams Asalam (= Islām), Tjams of Islām. They say that they worship Ovlah (Allāh), but also Pŏ Devata Tuwor (Çvor) (Sanskrit *Devata Svarga*), God, Lord of Heaven, and they offer presents in certain agrarian rites, e. g. two eggs, a cup of rice brandy, and three leaves of betel, to Pŏ Olwah Tak Alā, the mysterious king of the underworld; in reality it is the Muslim expression *Allāh ta'ālā*, out of which they have made a god. They also worship the Brahman goddess Pŏ Ino Nogar = "Mother of the Land" (Umā, Bhagavatī), and her husband Pŏ Yang Amo, "the Lord God, the Father [of the land]" (Śiva), whom they identify with Pŏ Haraḥ (= *Ḥawwā'*), i. e. Eve and Pŏ Adam, the ancestors of mankind.

The Tjam Kaphir of Annam with as broad a tolerance have taken into their Pantheon Pŏ Ovlaḥ (= Allāh) an undefined bodiless god, the creator of Pŏ Rasullak (= *Rasūl Allāh*) and of Pŏ Latila (= *lā ilāha*), who lives in Mokah (Mecca) and who was created by Pŏ Ovlahuk (= *Allāhu*) the father of nabi Muhamat (= *Nabī Muḥammad*); we thus see that the Kaphir have made three gods out of the misunderstood formula: *Lā ilāha illa 'llāhu, Muḥammad rasūlu 'llāh*.

The Tjams Bani of Annam have a very high, but vague notion of Nabi Muhamat i. e. the prophet Muḥammad, and to them the Kur'ān is *tapuk* (= *kitāb*) *nabi Muhamat* = the book of the Prophet Muḥammad; they call it also *tapuk*

---

[1] I translate this word by officiant for lack of a more suitable term. In Indo-China, the *lebai* of the Malays and the *lebe* of the Tjams is a pious man like the Javanese *santri*, who conducts the Friday service in the villages. According to van Ronkel (*T. v. I. Taal-, Land- en Volkenk.*, 1914, p. 131), *lebai* or *lebbai* is of Tamil origin and originally meant "Muslim merchant", which confirms the supposition that Islām came originally from India, not from Arabia, to the Malay Islands and also to Indo-China.

asalām (= *kitāb al-islām*), the 'book' of Islām, *kitāb alamadu* = *kitāb al-Ḥamd*, the book of praise, *casak gāmarat*, the talisman book. They never use his real name. The Ḳur'ān moreover is hardly to be found among them at all. The few copies which exist are incorrect, and written on chinese paper with the brush and not with the reed pen. The Bani seem to esteem equally highly a mystical compendium which much resembles the Javanese *primbon* and is called *nūrshāmsu* by them. The "priests" copy it only during *ramawan* (= *Ramaḍān*) and they receive the princely remuneration of a buffalo for each copy.

The Tjams of Annam pray only on Fridays and during Ramaḍān the five *vaḳ* or *waḳtū* (= *waḳt*) "salāt", the names of which they corrupt as follows: *ṣubuhik*, *ṣobahīs* (= *ṣubḥ*) "morning prayer", *vaḳ ṣarīt* (= *ẓuhr*), "midday prayer", *asarik* (= *'aṣr*) "afternoon prayer", *magarip* = *maghrib*, "sunset prayer", *ikā*, (= *'ishā'*) "evening prayer". They are in the main content with reciting a few *sūra*'s, especially the *fātiḥa*, without understanding them, and the Arabic form is so corrupted in their pronunciation that it is almost unintelligible, e.g.

1. *ahiā simillā hyūr raḥ māmyōr rāḥ himiḥ* = Ar.: *bi 'smi 'llāhi 'r-raḥmāni 'r-raḥīmi*;

2. *hulaku akbabar*; *lā ilāha illāwaḥuḥ wāwaḥukal akkabar* = ar.: *allāhu akbar*; *lā ilāha illa 'llāh*.

They hardly observe any ablutions but are content with making signs as if they were taking water out of a hole in the ground. Circumcision (*katan*, *katat* = Ar. *khitān*) which is performed on boys at the age of 15 and must always precede marriage, is however only symbolical and consists in the imām with a wooden knife making the circumcision. The boy receives a new name (*asmal* = *asmaal*), usually 'Alī or Muḥammad. The Tjam Bani do not make the pilgrimage to Mecca and, while they do not eat pork, the priests as well as the faithful enjoy brandy made from rice, as well as other intoxicating liquors; the religious dignitaries do not however drink in the mosque. If the number of "40" is not present on Friday in the mosque, those missing are replaced by sacrificial cakes and the usual service, followed by a meal, takes place.

The people only observe Ramaḍān for 3 days. The imāms however must observe it till the end on behalf of the whole community. During this time they shut themselves up in the mosque with their prayer books, their rosary, their tea pot, their sleeping mats, their copper spittoon and their betel set, which they require to prepare the chewing material indispensable to all Eastern Asiatics. For a whole month they never cross the threshold except to perform complete ablutions in the river. The others are taken in the great cisterns under the penthouse roof of the mosque.

These mosques or *sang mugik* (*samigik*, *sangyik*; cf. Mal.: *masjit*) which are turned towards Mecca are usually rather poor straw huts with walls of bamboo lattice-work.

Even the names of the religious dignitaries in Annam suggest the strange alteration which Islām has suffered there. At their head is the *pō gru* or *ong gru* (Skr. *guru*), then come the *imām* (*imām*), from whom he is chosen and who are the men who really perform the ceremonies, then the *katip* (*khaṭīb*), who have to give the religious readings in the mosque; next come the *mādin* i. e. mu'adhdhin, the *ācar* (Skr. *ācārya* = "religious teacher"), a kind of religious instructors who belong to the mosque. In general, the word *ācār* in Annam is applied to all Muslim "clergy" in contrast to *baṣaiḥ*, which is the name of the Hindu priests.

All the religious dignitaries in Annam shave their heads and faces. In addition to the simple white fez worn in Cambodia, they also wear a voluminous turban with gold, red or brown fringes. The various ranks are distinguished by the length of the fringes. Like their Hindu brethren they carry a long Spanish reed, the lower part of which is woven into the form of a basket only in that of the *ong gru*. A white sarung, a long white tunic which is buttoned and cut open at the neck is their sole costume. On high feast days the minbar and the interior of the mosque are covered with white cloth; on these occasions they exchange the turban for a kind of disc, which is bored through the middle and fastened to the fez by a piece of linen. The whole looks like the biretta of a judge. These "priests" are almost as ignorant as their simple followers; they can hardly read Arabic, hardly study it at all, and only roughly understand their *sūra*'s which they repeat only "because their fathers also did so". They are free from taxation and forced labour and are held in fairly high esteem by the people; they are the more educated class, however slight the education may be. As they are quite indifferent and tolerant, they do not think ill of the faithful when the latter make offerings to the *Pō Yang* or various Hindu deities, endeavour to propitiate evil spirits and perform certain agrarian rites or magic ceremonies which have nothing Muslim in them. They live in perfect harmony with the Hindu *baṣaiḥ*, invite them to their religious and domestic festivities and are invited in turn, — only the food for the *imām* must be prepared by a Muslim woman — and give each other places of honour. From mutual tolerance both communities refrain from eating pork or beef.

Only from the Hindu cremations do the Muslim priests carefully absent themselves and this religious horror of corpses was previously, it is said, the reason why they alone could enter the royal palace to pray with women in child-bed and to watch his wives and children during the absence of the king.

Either as a result of ancient customs or of the Malay-Polynesian matriarchal system or through contact with the Hindus of Annam who have priestesses called *paḍjā*, the Muslims of Annam have priestesses for a domestic cult; they are called *raḍja* or *ridja*. If a sick member of the family has to be healed, for example, or a journey or business enterprise to be undertaken auspiciously, the *imām* first of all recites various prayers, then this *raḍja* — often the housewife herself — accompanied by the *mādin* who sings and beats the drum, perform certain ritual dances, or falls into a state of great excitement in order to influence the 'deities' or 'spirits of the dead', to whom sacrifices are at the same time made. This ceremony is always followed by a great feast. The *raḍja*'s, who must not eat the flesh of the pig or of the sand lizard, even play the principal part at the great annual festivals, which are celebrated in December—January and are probably of Malay or Indonesian origin — the name Java is repeatedly mentioned in them — and are regarded by the Muslim Tjams as the "New Year's festival of the ancestors".

The festival lasts two days and three nights. A great booth is built in an enclosure, if possible of quite new material, and the interior is hung with white cotton cloth. The altar is a simple large tray, with dishes on which are betel, food and fruits. Wax lights are stuck on the edge of the dishes and they also are bound round with cotton threads of different colours. A swing hung to two pillars is intended for the *rija*; she is assisted by three *imām*'s and the *madin*, who with his tom-tom conducts an orchestra consisting of a clarionet, a violin, cymbals and an oblong drum (*ganing*).

The festival which is interrupted by numerous meals is opened with the *bismillāh*, then follows the invocation of the mountain and forest spirits and of the shades of the "spirits beyond the sea, which may not be mentioned by name"; and finally the invocation of 38 deities or spirits by name; at each of them the three *imām* recite prayers.

The most characteristic part of the festival takes place on the second day at the rise of the morning star. After the *madin* has invoked the deities and the *rija* has performed a special dance in their honour, they take a small rowing boat made out of a single piece of wood, which is said to come from Java or China to collect tribute. The master of the house in which the festival is held, pretends not to understand Javanese and the *madin* acts as interpreter. Amid joking all round, eggs, cakes and the figure of an ape with jointed limbs are put in the boat, the participants then break up the walls and roof of the booth and fight for the cakes. On the third day the *rija* goes, accompanied by the officiants and the orchestra, to the river and solemnly places the boat with the ape on the water. This ends the festival.

While circumcision is only symbolical with the Tjam Bani of Annam, the *katat* for the old men is practised as in Cambodia and the *karoh* (literally, "enclosing") marks the declaration of a girl's fitness for marriage. Not till then dare they put up their hair and marry; until then they are *tabong* i. e. unapproachable, and the seducer would be severely punished. This festival takes place under the presidency of the *ong gru* and of two *imām*'s for a considerable number of girls on each occasion and lasts two days. It is opened with prayers to Allāh, Muhammad, the Hindu deities and the shades of their ancestors as well as with a feast at which the priests eat apart. Two booths are erected, the one for the ceremony itself, and the other as a dressing room for the girls, who sleep there under the supervision of four matrons. The *imām* spend the night praying; at 7 a. m. the girls appear wearing their finest clothes and ornaments, their hair loosened and covered with a triangular mitre. Before them goes an old woman and a man clothed in white, who carries a year-old child dressed exactly like the girls except for the mitre. They throw themselves down before the *ong gru* and the *imām*'s. The *ong gru* places a grain of salt in the mouth of the child, cuts off a lock of its hair and gives it some water to drink. The same is done with the girls, who then return in procession to their booth. If a girl has been seduced the lock is cut off at her neck as a mark of shame. A second feast, at which the priests eat before the faithful, concludes the ceremony.

Birth customs in Annam among the Bani are similar to those among the Kaphir except that the Bani do not sacrifice to the gods on such occasions. The seduction of girls is also severely punished. They do not marry till they are 17 or 18. In Panrang, evidently the result of the old Malay matriarchal system — which has left other traces also, like the right of inheritance of women and the tracing of descent through them and their practising the cult of ancestors — the custom prevails that the girls seek the young men in marriage, but everywhere else in Indo-China the reverse is the custom. The wedding (Tjam, *likhah* = Arab. *nikāḥ*), which is the occasion of long and costly festivities, is usually replaced by public cohabitation, which causes no scandal; the pair are free to celebrate it later when they can afford it, and they may already have two or three children to take part in it. It is far more elaborate among the Bani than among the Kaphir. The *imām*'s repeat prayers; the *ong gru*, who represents the "lord Muhammad", asks the bride, who is considered to be Fāṭima, whether she accepts the presents of the bridegroom, the lord 'Alī. Rich feasts take place at the weddings. The dowry given to the woman remains her property in case of a divorce. Divorce is fairly easy and leaves nearly two thirds of the joint property in the hands of the woman. Mixed marriages are rare and in them the children follow the religion of the mother. It sometimes happens that a Muslim woman marries a Hindu, very rarely the contrary.

The burial service is as simple among the Bani as it is elaborate among the Kaphir. The corpse is wrapped in white cotton sheets and placed in a small hut, where the *ong gru* and the *imām*'s repeat prayers. As soon as night falls the dead man is buried, with four *imām*'s present, almost secretly, without a coffin and with the face turned to the north. The relatives beseech his spirit not to come and afflict them. On the 3rd, 7th, 10th, 20th, 40th and 100th day as well as on the anniversary of his death a *padhi* i. e. a service at the tomb with prayers, a meal and presents for the *imām*'s is observed at his grave. The 7th and the 40th day are the most important. The dead person is almost always exhumed after a certain period on an anniversary of his death. His bones as well as his golden or silver ornaments are placed in a small coffin which is again buried in a particular place and considered sacred.

We thus see that Islām, while it has remained fairly pure in Cambodia, has been overlaid in Annam with a mass of elements and customs, partly animistic and partly Hindu. The Tjams nevertheless desire to be good Muslims; only their ignorance and long usage are the causes of their errors. Malay ḥādjdjīs who have come from the Archipelago to Cambodia on a religious mission have repeatedly succeeded in putting an end to sacrifices to heathen deities in various villages, although they have been unable to stop the enjoyment of rice brandy.

If France should succeed in regenerating the Tjams, as she is endeavouring to do by her humane and wise policy, the revival of their nationality could only be to the advantage of Islām and could only come through Islām in close combination with their brethren and the Malays of Cambodia.

AL-INSĀN AL-KĀMIL. This expression, which means literally "The Perfect Man", is used by Muḥammadan mystics to denote the highest type of humanity, i. e., the theosophist who has realised his essential oneness with God. Abū Yazīd al-Bisṭāmī (ob. 261 = 874), quoted in the *Risāla* of al-Ḳushairī (Cairo, 1318, p. 140, l. 12 *sqq.*; cf. R. Hartmann, *Al-Kuschairis Darstellung des Ṣūfītums*, *Türkische Bibliothek*, vol. xviii., p. 168 *infra sq.*), speaks of the mystic who after having been invested with certain divine names, passes away (*faniya*) from them and becomes "the perfect and complete" (*al-kāmil al-tāmm*). We may identify the person so described with *al-insān al-kāmil*, a phrase which occurs, perhaps for the first time, in the writings of Ibn al-ʿArabī (cf. *Fuṣūṣ al-Ḥikam*, Ch. 1) and forms the title of a well-known work, *al-Insān al-Kāmil fī Maʿrifat al-Awākhir wa 'l-Awāʾil*, by ʿAbd al-Karīm al-Djīlī, who died about 820 (1417). These authors base their theory of the Perfect Man on a pantheistic monism which regards the Creator (*al-Ḥaḳḳ*) and the creature (*al-Khalḳ*) as complementary aspects of Absolute Being. A similar but by no means identical doctrine had already been set forth by al-Ḥallādj (see *Kitāb al-Ṭawāsīn*, ed. by Massignon, p. 129 *sqq.*). "Man", says Ibn al-ʿArabī, "unites in himself both the form of God and the form of the universe. He alone manifests the divine Essence together with all its names and attributes. He is the mirror by which God is revealed to Himself, and therefore the final cause of creation. We ourselves are the attributes by which we describe God; our existence is merely an objectification of His existence. While God is necessary to us in order that we may exist, we are necessary to Him in order that He may be manifested to Himself."

Al-Djīlī, who differs from Ibn al-ʿArabī in certain details, gives a full and systematic exposition of the theory. His argument runs somewhat as follows:

Essence (*dhāt*) is that to which names and attributes are attached, although in reality there is no distinction between the Essence and its attributes. It may be either existent or non-existent. The existent is either Pure Being (God) or Being joined to not-being (created things). Absolute or Pure Being is the simple Essence, without manifestation of names, attributes, and relations. The process of manifestation involves a descent from simplicity, which has three stages (1) *aḥadiya* (2) *huwiya* (3) *anīya*. At this point appear the names and attributes whereby the Essence is made known. They are communicated by means of mystical Illumination (*tadjallī*). The Perfect Man, who typifies the emanation of Absolute Being from itself and its return into itself, moves upward through a series of Illuminations until he ultimately becomes merged in the Essence. In the first degree, called the Illumination of the Names, "he is destroyed under the radiance of the name by which God reveals Himself, so that if you invoke God by that name, the man answers you, because the name has taken possession of him". The second degree is called the Illumination of the Attributes. These are received by the mystic in proportion to his capacity, the abundance of his knowledge, and the strength of his resolution. To some men God reveals Himself by the attribute of life, to others by the attribute of knowledge, to others by the attribute of power, and so on. Moreover, the same attribute is manifested in different ways. For example, some hear the divine speech (*kalām*) with their whole being, some hear it from human lips but recognise it as the voice of God, some are informed by it concerning future events. The final degree, which is the Illumination of the Essence, sets the seal of deification upon the Perfect Man. He now becomes the Pole (*ḳuṭb*) of the universe and the medium through which it is preserved; he is omnipotent, nothing is hidden from him; it is right that mankind should bow down in adoration before him, since he is the vicegerent (*khalīfa*) of God in this world (cf. Ḳurʾān 2, 28). Thus, being divine as well as human, he forms a connecting link between God and created things. His universal nature (*djamʿīya*) gives him a unique and supreme position in the order of existence. Al-Djīlī divides the attributes of God into four classes; attributes of the Essence (Oneness, Eternity, Creativeness, and the like), attributes of beauty (*djamāl*), attributes of majesty (*djalāl*), and attributes of perfection (*kamāl*). While the attributes of beauty, majesty, and perfection are manifested both in this world and the next — Paradise and Hell, for instance, being respectively absolute manifestations of beauty and majesty — the Perfect Man alone displays the whole sum of divine attributes and possesses the divine life in all its fullness. This microcosmic function, according to the Ṣūfistic interpretation of Ḳurʾān 33, 72, he freely accepted as a trust from the hands of his Maker. He contains the types of every spiritual and material thing. His heart corresponds to the Throne of God (*ʿarsh*), his reason to the Pen (*ḳalam*), his soul to the Tablet (*al-lawḥ al-maḥfūẓ*), his nature to the elements (*ʿanāṣir*). He is the copy of God (*nuskhat al-Ḥaḳḳ*); cf. the tradition that God created Adam in His own image.

This theory shows the influence upon Ṣūfism of Gnostic ideas (cf. Bousset, *Hauptprobleme der Gnosis*, p. 160 *sqq.*). The *Insān al-Kāmil* is the *Insān al-Ḳadīm* of the Manichaeans, the *Adam Ḳadmōn* of the Ḳabbālā. It was inevitable that on Islamic ground the representative Superman should be the Prophet Muḥammad, the dogma of whose pre-existence established itself, even in orthodox circles, at an early date (see Goldziher, *Neuplatonische und gnostische Elemente im Ḥadīt* in *Zeitschrift für Assyriologie*, xxii. 324 *sqq.*). Many Ṣūfīs, adopting the Plotinian doctrine of emanation, identify Muḥammad, the Perfect Man, with Universal Reason or the Logos. Al-Djīlī takes care to state that Muḥammad is the Most Perfect Man

(*aḳṭāb*), to whom the saints and the rest of the prophets are subordinate. He holds that in every age Muḥammad assumes the form of a living saint and in that guise makes himself known to mystics (cf. Goldziher, *loc. cit.*, concerning the doctrine of the transmission of the *nūr muḥammadī*). We find a further concession to Islām in the principle that the Perfect Man must continue to obey the religious law. "Perception of the sublime Essence", al-Djīlī says, "consists in thy knowing, by way of divine revelation (*kashf*), that thou art He and that He is thou, and that this is not *ḥulūl* [q. v.] nor *ittiḥād*, and that the slave is a slave and the Lord a lord, and that the slave does not become a lord nor the Lord a slave".

(NICHOLSON.)

INSHĀ (A.) Invention. According to the book entitled, *Mafātīḥ al-ʿUlūm*, by ed. van Vloten, p. 78, *inshāʾ* has the special meaning of the preparation of a document which is afterwards examined by the head of the office and drawn up in its final form with or without alteration; that is to say, a rough draft of a document. The *ʿilm al-inshāʾ* is epistolography, the art of drawing up letters and documents. Among the Arabs the celebrated private secretary of the last Omayyad ruler Marwān II, ʿAbd al-Ḥamīd b. Yaḥyā (on him cf. Ibn Khallikān s. v.), is regarded as the first who distinguished himself in this art. On the subject we have a large number of works in Arabic, Persian, and Turkish, which incidentally include much valuable data for the history of culture. Such are the great work by al-Ḳalḳashandī [q. v.], *Ṣubḥ al-Aʿshā*, and the much shorter handbook by the Faḍl Allāh [q. v.] entitled *al-Taʿrīf bi ʾl-Muṣṭalaḥ al-Sharīf*. Arabic guides to letter writing were also composed by Marʿī b. Yūsuf, *Badīʿ al-Inshāʾ wa ʾl-Ṣifāt fi ʾl-Mukātabāt wa ʾl-Murāsalāt*, repeatedly printed at Būlāḳ, Cairo and Constantinople, sometimes together with a similar work by Ḥasan al-ʿAṭṭār [q. v.] which is known by the simple title of *Inshāʾ al-ʿAṭṭār*. Older than the books mentioned is the *Ḥusn al-Tawassul ilā Ṣināʿat al-Tarassul* of Ibn Fahd al-Ḥalabī (Cairo 1298, 1315). In Arabic there are also a large number of collections of model letters. Cf. the sections concerned in the catalogues of Arabic MSS. Recent works: S. Sharṭūnī, *Manuel de style épistolaire*, Bairūt 1880; J. Harfūsh, *Correspondance Commerciale*, Bairūt 1902; E. Fumey, *Choix de Correspondances Marocaines*, etc. 1903 etc. In Persian in addition to the collections of letters by Ibn Muʾaiyad al-Baghdādī, by Hindūshāh al-Munshī al-Nakhdjiwānī, by Abu ʾl-Faḍl [q. v.] etc. we have the letterwriters by Harkarn [q. v.], by Khalīfa Shāh Muḥammad (*Djāmiʿ al-Ḳawānīn*, ed. Lucknow 1846 and Cawnpore 1864), *Saiyid al-Inshāʾ-i wara ḥukūr*, Tabrīz 1327 etc. Turkish letterwriters were composed by Nerkesīzāde, Kinalīzāde. On the celebrated collection by Ferīdūn enough has been said above ii. 93. Cf. also Khairī Efendi, *Inshāʾ* (Būlāḳ 1242). Modern works: Aḥmed Rāsim, *ʿIlmeh Khazīnet-i Mektūb* (Stambul 1331); Maḥmūd Fuʾād, *Rehber-i Kitābet-i ʿOthmāniye yakhod Mekmūʿa-i Munsheʾāt* (Stambul 1328); Saʿīd Efendi, *Guide complet de correspondance turc-français* (Constantinople 1331), etc.

The professional letterwriters (*kātib*, q. v.) in the chancelleries (*dīwān al-inshāʾ*) are called *munshī*, but in India every educated native, especially a native teacher of languages is called *munshī*. Cf. *Hobson-Jobson*, s. v. Munshee. Cf. also the articles DAWĀTDĀR and KĀTIB, where further references are given.

IN SHĀʾ ALLĀH, "If Allāh wills". The duty of frequently using this phrase, even when no doubt can really enter, is based upon Ḳurʾān xviii. 23 and xlviii. 27. In these passages Allāh, addressing the Prophet, uses it; in the second passage the event so conditioned was certain to happen and is even qualified by Allāh himself with a *bi-l-ḥaḳḳ*, "in verity". This Allāh is said to have done to admonish (*li-taʾdīb*) the Prophet in the use of the phrase. A tradition is also quoted in which Muḥammad, addressing the dead buried in the cemetery of al-Madīna, saluted them with the Peace, and added, "and we, if it be the will of Allāh, shall join you" — a thing of which there could be no doubt. It is therefore used *a*) in cases where a doubt can really enter; *b*) to show modesty in replying to a question or remark of a flattering nature, but never when what is answered was unflattering; *c*) to show good manners (*taʾaddub*) towards Allāh in submitting verbally and formally to his will, and thereby to gain a blessing (*tabarruk*). This formal submitting of all things to the will of Allāh makes the phrase in usage equivalent to the expression of a desire or hope. If some one tells you that the death of a friend is imminent, you must not say *in shāʾ Allāh*, but you should if you are told that he is getting better. The Saiyid al-Murtaḍā (see reference below) says that a sect, al-Marāsiḳa, existent in his time in Egypt, followers of a certain ʿUthmān b. Marsiḳ, pushed the use of the phrase so far as to fall into heresy (*bidʿa*).

Bibliography: *Iḥyāʾ* of al-Ghazālī with commentary of the Saiyid al-Murtaḍā, ii. 262 *sq.* (D. B. MACDONALD.)

INSHĀʾ ALLĀH KHĀN, Indian poet, born in Murshidābād; about 1200 he settled in Lucknow, where he secured the patronage of Prince Sulaimān Shikōh; he died about the year 1230. In addition to a Persian and an Urdū *dīwān*, he wrote a Persian *mathnawī* entitled *Shīr u Birindj*; by order of the Nawwāb of Oudh, Saʿādat ʿAlī Khān (1212—1229), he wrote a grammar of the Urdū language, entitled *Daryā-yi Laṭāfat*, and published a collection of the witty sayings of the same prince, under the title *Laṭāʾif al-Saʿādat*.

Bibliography: Rieu, *Cat. Pers. Mss. Brit. Mus.*, p. 961, 968 *sq.*, 1096b; Garcin de Tassy, *Hist. de la Littérature Hindoustanie*, ii. 33—38.

IʿRĀB (A.) Technical term in Arabic grammar, frequently translated by "inflexion", has however a much narrower meaning. For in the nouns it only applies to the formation of cases but not to numbers and in the verb it refers exclusively to the distinction of the moods of the imperfect and therefore is not applied, as Flügel, *Die gramm. Schulen der Araber*, p. 15, erroneously assumes, to the formation of the genders of the

verb and its tenses and even to that of the personal forms, which are regarded as nominal elements added to the verb proper.

According to the view of the Arab grammarians in practice every occurrence of *iʿrāb* presupposes as effective cause a governing word, *ʿāmil* [q. v.], in contrast to *iʿrāb* is *binā'* [q. v.] which is applied to all words which retain their form irrespective of syntactical influences. According as it is capable of *iʿrāb* or not, a word is called *muʿrab* or *mabnī*. The two conceptions *ʿāmil* and *iʿrāb* have thus to be regarded as the central points round which the theory of syntax of the Arab grammarians turns. Where a distinction is made between declension (*taṣrīf*) and syntax (*naḥw* in the narrower sense), the theory of the *iʿrāb*, as ʿAlī al-Djurdjānī, *Kitāb al-Taʿrīfāt*, ed. Flügel, p. 61, so rightly says, is, in contrast to our view, excluded from the former. On the other hand, *ʿilm al-naḥw* is sometimes actually called *ʿilm al-iʿrāb* (Flügel, *Gramm. Schulen*, p. 15, note 1).

The Arabs further differ from our grammatical notions in having no comprehensive terms for "case" and "mood"; but use the same terms without distinction for the various cases and moods if they agree in phonetic character. These terms are taken from the terminations of the cases of the triptote singular of the strong nouns and from that of the affixless forms of the moods of the imperfect of the strong verb. This results in the following division: 1. *rafʿ* (*u*) = nominative (e. g. *raḏjulu-n*) and indicative (*yaḳtulu*); 2. *djarr* (*i*) = genitive (*raḏjuli-n*); 3. *naṣb* (*a*) = accusative (*raḏjula-n*) and subjunctive (*yaḳtula*); 4. *djazm* (lack of vocalisation) = jussive mood (*yaḳtul*). The three first named are originally simply names of the vowels concerned; they are still used as such not infrequently by older grammarians, without reference to the *iʿrāb* and even for vowels in the interior of a word, and this use is even found in Sībawaih, in spite of the fact that (i. 2, 4) he expressly reserves them for *iʿrāb*. The usual usage in Sībawaih however proves that even then they were felt to be genuine terms for the corresponding cases and moods. They are in fact used by him in cases where the declension is formed in quite a different way from that of the above scheme. Thus e. g. the nominative of the sound masc. plural (*muslim-ū-na*) is called *rafʿ*, the oblique case (*muslim-ī-na*) sometimes *djarr* or *naṣb*, although here, according to the view of the strict Arab grammarians the declension is made through the consonants *w* and *y*. It is similar with the dual.

In the noun two kinds of declension are distinguished for the singular (in the widest sense, i. e. including the broken plural). The noun (*ism*) is either *munṣarif* i. e. it has all three cases (triptote) and has nunation (*tanwīn*); or it is *ghair munṣarif*, i. e. it has as its declension vowel only *a* for the genitive and accusative, that is, it has actually only two cases (diptote) and has no nunation. In this connexion it should be noted that those nominal forms of roots with weak third radical, which, like *ʿaṣā*, really show no case changes at all, and according to our view are indeclinable, are traced to corresponding strong forms through the application of definite phonetic laws and like the latter — although according to the terminology of the finished system only *taḳdīran* (virtually) — are considered *muʿrab* and further as *munṣarif* or *ghair munṣarif*. Moreover a noun has not *iʿrāb* as an unalterable character; although *raḏjulun* is in general considered *muʿrab*, this does not prevent that in the vocative: *yā raḏjulu-u* and in combination with the *lā* of the general negation: *lā raḏjula hunā*, the Arabic grammarians do not regard the *raḏjulu* or *raḏjula* as *rafʿ* or *naṣb* but as *mabnī* sui generis. The Arab grammarian always riveted his attention on the individual form and not on its place in a system of declension or conjugation, for which he has not even a name. It is therefore quite natural that he should in the imperfect also interpret the 2 and 3 pl. fem. (*yaḳtul-na*, *taḳtul-na*) as *mabnī*, because here the verb remains unaltered before the *na*, which is considered the representative of the pronoun, also in the strong stem in all three moods. In the other forms of the imperfect, which have the affixes *-na*, *-ni*, *-na*, *ī*, *ā* and *ū* or, according to the Arab view, the consonants *y*, *alif*, *w*, represent the pronominal subject, while the retention of the *n* with its auxiliary vowel is considered a mark of *rafʿ* and its omission as a sign of *djazm* and then of *naṣb*. The Arab grammarians do not recognise at all an energetic "mood" with a name of its own; to them there is simply a strengthening *n* (*nūn muʾakkida*) added to the imperfect forms, which become *mabnī* before it. As their *n* is not a formative element merged in the verb but is regarded as a separate particle, the energetic mood is discussed in Arabic grammars under the particles, which seems strange to us.

On the reason why the linguistic phenomenon here discussed has been given the name *iʿrāb*, later native scholars puzzled their heads and gave various unsatisfactory suggestions; cf. Ibn al-Anbārī *Asrār al-ʿArabiya*, p. 9, 15 ff. According to Wetzstein (*Ztschr. f. Völkerpsychologie*, vii. 461), *iʿrāb* means Beduinising, transferring into the language of the Beduins. V. v. Rosen similarly interprets it (*Ztschr. d. Deutsch. Morgenl. Ges.*, xxxiii. 170): "to speak as a genuine desert Arab". Vollers (*Volkssprache und Schriftsprache im alten Arabien*, p. 141) entirely agrees with Wetzstein; on the other hand, Nöldeke (*Beiträge zur semitischen Sprachwissenschaft*, p. 5) says that the application of the term to the Beduins as the only men speaking pure Arabic at the time is "indeed possible but not certain". The obvious thing may be here too the most probable: *Arraba*, the verbal noun of which is *iʿrāb*, means primarily, to arabicise, to give a word an Arabic form, to pronounce it in the genuine Arab way; the word is commonly enough applied, particularly also by Sībawaih, to foreign words adopted into the Arabic vocabulary in which case there is of course no possibility of a reference to the Beduins; as the contrast between *ʿadjam* and *ʿarab*, non-Arabs and Arabs, is obvious. If we reflect that the cradle of Arab learning was in the ʿIrāḳ with its population, predominantly Aramaic and Persian, whose language completely failed to distinguish cases and moods, that the latter must have been the most striking characteristic of Arabic in contrast to the foreign languages with which they were acquainted, especially as according to good and abundant evidence it was particularly difficult for the non-Arab proselytes, who contributed a strong contingent to the linguistic scholars, so that they frequently found it a stumbling block, one will find it quite natural that *iʿrāb* "arabicising", by narrowing of meaning should come to have the above limited technical meaning; *iʿrāb*

is therefore at bottom only arabicisation κατ' ἐξοχήν. How much *iʿrāb* was considered the exclusive advantage of the Arabic language is clear from the passionate polemic of Ibn Fāris [q. v.] against the assertion that the Greeks also had an *iʿrāb* (Goldziher, *Muh. Studien*, i. 214).

Bibliography: A very useful survey is given in the first sections of the *Adjurrūmiya* of Ṣanhādjī in Brünnow [Fischer]'s *Chrestomathie*; chapters 2 to 7, 40 and 41 of the *Asrār al-ʿArabīya* of Ibn al-Anbārī are more detailed and very suitable as an introduction to the controversies of the Arab grammarians. For the rest the student must be referred to the larger grammars in Arabic. (J. Weiss.)

AL-ʿIRĀḲ, also called *al-ʿIrāḳ al-ʿarabī* in contrast to *al-ʿIrāḳ al-ʿadjamī*. In the older period *al-ʿIrāḳān*, "the two ʿIrāḳs", meant the two oldest Muslim towns in the country, Kūfa and Baṣra (Yāḳūt, iii. 628, 11 sq.). Later this name was applied to al-ʿIrāḳ and al-Djibāl [q. v.] together; Yāḳūt iii. 15, 14 knows al-ʿIrāḳ alone as the name usual among the Persians for al-Djibāl and explains this by saying that the Saldjūḳ ruler who held the ʿIrāḳ also conquered al-Djibāl. As he lived in Hamadhān, the people referred his title as "Lord of al-ʿIrāḳ" to the province of which this was the capital; it is however rather to be assumed that the Saldjūḳ called himself "Lord of the two ʿIrāḳs" (with a well-known *mubālagha*) and that the people began to call the eastern part of the kingdom ʿIrāḳ also, at the same time differentiating *al-ʿIrāḳ al-ʿadjamī* and *al-ʿIrāḳ al-ʿarabī*.

The meaning of the name is uncertain. The Arab hypotheses are not satisfactory: *ʿirāḳ* = low lying ground, according to Ibn al-Aʿrābī in Yāḳūt, iii. 628, 17 sq.; "coastland", according to al-Khalīl in Yāḳūt, iii. 628, 21 sq. At the same time the ʿIrāḳ is called al-Sawād, i. e. the country of a dark colour, owing to the cultivated land, in contrast to the bright white-yellow steppes, the contrast between the two being expressed in the name by the Beduins, who are very susceptible to colour effects. But the two names are not synonymous: *sawād* is a movable term, *ʿirāḳ* is fixed; one talks of the *sawād* of Kūfa, but not of the *ʿirāḳ* of Kūfa. Balkhī's statement (Iṣṭakhrī, p. 85, 5; Ibn Ḥawḳal, p. 166, 7 sq.) is typical: "between Baghdād and Kūfa lies a sawād with a network (of cultivated fields) which shows no gap"; this is a statement based on a correct general conception. It consists only of one long, not very broad, strip of valuable fertile country running from N. to S. in the ʿIrāḳ and, if one wishes to describe the canal system, this continuous fruit garden must be taken as a basis. In Ibn Khurradādhbih there is still a memory of the name which ʿIrāḳ had under the Persian kings: *dil Īrānshahr*, which he translates "the heart of the ʿIrāḳ" (5, 10 sq.; cf. Ibn Rosta, p. 104, 3); this agrees with the fact that al-Khwārizmī understands by Īrānshahr Persia including the ʿIrāḳ, and that, according to Yazīd al-Fārisī, the whole of Īrānshahr was compared to a body of which the heart was the ʿIrāḳ, similarly also Aṣmaʿī (according to Yāḳūt, i. 417). The first Persian name of the ʿIrāḳ was Sūristān (Balādhurī, p. 276, 7; Ibn Rosta, p. 103, 11 sq.; Masʿūdī p. 177, [illegible]; Ṭabarī, i. 819, 7; cf. Nöldeke, p. 15, Note 3).

The following details of the *Geography* and *History* of the country may be given here:

Al-ʿIrāḳ is the flat country which is bounded in the west by the Syrian steppe, in the south by the steppe and desert areas of Arabia and the north shore of the Persian Gulf, in the east by the southern spurs of the Zagros (Djabal Ḥamrīn) and west Khūzistān, in the north by a line from al-Anbār to Takrīt. This northern border line marks the rising ground which in the oldest period formed the limits of the dry land; south of it alluvial land was gradually formed, which on account of its wealth of water, easy to distribute, possessed the most favourable conditions for profitable cultivation; it does not however appear that the administrative frontier ran along the natural boundary and the northern frontier is usually given as a line from Takrīt to al-Ḥadītha, which is about 60 miles N. W. of Hīt and was even included in al-ʿIrāḳ. From the geographical point of view Khūzistān (Susiana), which adjoins it on the east, also belongs to the ʿIrāḳ, as it is not separated by any natural boundary; the same is true of the Taff, i. e. the high lying ground of steppe-like character which begins before the gates of Baṣra and Kūfa. Wherever in the district the ground rises above the level of the river valleys in such a way as to form a barrier against inundation, and at the same time serves as a road, the Arab geographers speak of the *ẓahr* or "ridge" and frequently give the route along it as well as that by the river. If one takes together the many arms of the delta of the Shaṭṭ al-ʿArab and the banks of the great rivers with their tributaries and canals, the extent of coast is extraordinarily large in proportion to the whole; the sea with the rivers also forms a system. The possibilities of development appear unlimited; only the regulation of the rivers requires constant attention to prevent the banks being washed away by floods, which would make economic development impossible; breaking of the banks led to the formation of great swamps; the land between the rivers assumes a steppe-like character when there is no irrigation by canals. This was not sufficiently done even in the best period of the country. At present only about a tenth of the whole area of the ʿIrāḳ is under cultivation (agriculture and systematic cattle-rearing). The total area of the ʿIrāḳ from al-Ḥadītha to ʿAbbādān cannot be reckoned to be more than 26,000 square miles (about the size of Bavaria); of this only about 2690 sq. m. are under cultivation. I append the estimate of Drunsch (following Willcocks), *Mag. f. Technik und Industriepol.*, No. 7 of 4, x 1913: Babylonia has 21,500 sq. m. with 850000 inhabitants of which 1690 sq. m. are north, south and west of Baghdād. Tholens (*Zeitschr. d. Ges. f. Erdkunde Berlin*, 1913, p. 329 sqq.) estimates the area affected by the great irrigation scheme at 5290 square miles (cost of the scheme £ 26,500,000; to take 30 years to carry out). Tholens tells me that one of the main conditions for the complete opening up of the country is that the bed of the Tigris be dredged; along with this should go also the revival of the course which is usually thought to have been the principal one in Arab times, that of the modern Shaṭṭ al-Ḥaiy; although this riverbed at Kūt al-ʿAmāra (the Madhāriyā of the geographers) branches off from the present main course of the river, it is still doubtful whether it is the main bed of the Arabs and not rather a channel made by man (so de Sarzec in Heuzey, *Origines Orient. de l'Art*, p. 17); on

it lay Wāsiṭ; unfortunately however the exact site of this town is not known; the latest travellers to visit the ruins (Koldewey and Moritz) did not describe them (Sarre and Herzfeld, *Archäolog. Reise*, i. 247). The Shaṭṭ al-Ḥaiy, on which Lynch in 1838 was able to travel in a steamer and on which it is still said to be possible for a part of the year to reach Sūḳ al-Shuyūkh, entered the swamps (al-Baṭā'iḥ [q. v.]) at al-Ḳaṭr, through which it reached, under the name Nahr Abī 'l-Asad, the Didjla al-'Awrā', the "one-eyed" Tigris, identical with the pre-Muslim and modern Tigris. The Euphrates divided somewhat below al-Musaiyib into the two arms, the western, Shaṭṭ Hindiya, and Shaṭṭ al-Ḥilla, the eastern; since the main stream was turned forcibly into the Hindiya arm, the bed of the Ḥilla arm has been in danger of drying up; it was not till the Hindiya Dam was finished at the end of 1913 that the waters were fairly distributed. According to Ḳudāma, the western arm, which makes a slight curve to the west, is called al-Alḳamī (p. 233, 12 sq.; so also Mas'ūdī, *Tanbīh*, p. 52, 3), and the eastern arm is called Sūrā; the former runs towards al-Kūfa and is lost in the swamps; the Sūrā arm, more accurately Nahr Sūrā al-A'lā (Ibn Serapion, p. 28), passes the important town of Ḳaṣr Ibn Hubaira (ruins a little north of Babel, Tell 'Imrān 'Alī); 6 *farsakh* below Ḳaṣr Ibn Hubaira the upper Sūrā passes into the lower Sūrā canal; its direct continuation eastwards is called Ṣarāt al-Kabīra, and after passing the town of al-Nīl it is called Nahr al-Nīl and reaches the village of al-Ḥawl (4 miles from al-Nu'māniya on the Tigris), where one can tranship cargo and sail direct to the Tigris or turn to the south, reaching the Tigris at Nahr Sābus (opposite Mādharāyā, which lies on the east bank) (on the subsidiary name *Zāb*, Syr. *zābā*, see Marquart, p. 164). The lower Sūrā (Sūrā al-Asfal) passes several places, among which the locality called al-Djāmi'ān by Ibn Serapion is the al-Ḥilla of the later geographers (founded about 495 = 1102 by the Mazyadid Saif al-Dawla); this arm is the modern Ḥilla arm; at al-Ḥilla a canal branched off to the S. E., the Nahr Nars, said to be called after the Sāsānid Narses (292) who ordered it to be made. The Sūrā and the Nars finally pour their waters into the Budāt canal (*Badāt*, Yāḳūt, i, 770), which crosses the northern edge of the Baṭā'iḥ and is taken from the western arm of the Euphrates, a day's journey north of Kūfa near al-Ḳanāṭir, which is apparently identical with the Aramaean Pumbedita (= *fam al-Budāt*), the celebrated centre of Jewish scholarship (mentioned by Benjamin of Tudela in the xii[th] century); after it takes the waters of the Sūrā and Nars, the Budāt (Euphrates arm) after a course of about 40 miles enters the great swamp.

The two main rivers were joined higher up by canals, in addition to the above waterways. The important canal, Nahr Dudjail, which branched off from the Euphrates near al-Rabb (9 miles from Anbār, 16 from Hīt) and reached the Tigris between 'Ukbarā and Baghdād, does not belong to the 'Irāḳ but to al-Djazīra which adjoins it on the north; it sent off numerous branch canals into the districts belonging to the 'Irāḳ (Maskin, Ḳuṭrabbul); this canal, it appears, was silted up in 340 (951), and its name was transferred to an arm which branched off from the Tigris not far from Sāmarrā. From al-Anbār onwards four canals leave the Euphrates: 1. Nahr 'Īsā: its course is not certain but it may in general be identified with the modern Nahr Ṣaḳlāwiya; it is called after 'Īsā b. 'Alī (Ibn Serapion: Mūsā) b. 'Abdallāh b. al-'Abbās, whose *ḳaṣr* lay only a little above the junction of the canal and the Tigris, within the zone of the city of the Caliph; according to Ibn Serapion (p. 14, and Yāḳūt, iv. 842), it left the Euphrates at Ḳanṭarat Dimimmā (Abu 'l-Fidā', p. 52, 14, has *Dahamā*, which is probably simply a mistake for Dimimmā); Abu 'l-Fidā, *l. c.*, also says (on the authority of Sulaimān b. Muhannā) that the canal comes from a place below al-Anbār (on the English map the ruins of al-Anbār are entered as "Sifera" on the north bank of the Ṣaḳlāwiya, 6 miles from its beginning) near al-Fallūdja; it irrigated the *ṭassūdj* Fīrūzsābūr; at al-Muḥawwal, a number of canals branched off towards Baghdād; it entered the Tigris below the Ḳaṣr Ibn Hubaira: on the English map the Ṣaḳlāwiya canal runs through the lake of Akkar Kuf, i. e. 'Aḳarḳūf of the geographers (e. g. Yāḳūt, iii. 697) which is assumed to be at the south end; Le Strange wishes to locate the Muḥawwal of Ibn Serapion there; on R. Kiepert's map in Oppenheim's book, the Khōr of the Ṣaḳlāwiya is called in the southern part Khōr al-'Asadj: not far from the beginning of the canal, west of the Euphrates, on the English map is marked the Habbania (Hibbāniya) lock, which is one of the main works in Willcocks's irrigation scheme; on Midḥat's plan for draining the Ṣaḳlāwiya swamp, see Oppenheim, ii. 281; a different account is given by Balkhī (Iṣṭakhrī, p. 84 sq.; Ibn Ḥawḳal, p. 165); according to him, small streams run off from the Nahr 'Īsā which again join together to form a stream, the Nahr al-Ṣarāt, which enters the Tigris, while the main stream, Nahr 'Īsā, itself reaches the Tigris in the middle of Baghdād: ships can sail on it to its end, while navigation is not possible on the Nahr al-Ṣarāt on account of the weirs; 2. Nahr Ṣarṣar branches from the Euphrates 3 farsakh (about 12 miles) below Dimimmā, flows through a part of the district of Bādūrayā (spelled -rayā in Yāḳūt, i. 460, this is not correct, it can only be -rayā or -rāyā) and reaches the Tigris 4 *farsakh* (16 miles) above al-Madā'in, so Ibn Serapion, p. 15; according to Balkhī (Iṣṭakhrī, p. 85; Ibn Ḥawḳal p. 166), the network of canals which intersects the continuous Sawād between Baghdād and Kūfa (*cf.* above p. 513[a]) begins with the Nahr Ṣarṣar, on which lies the little town of Ṣarṣar, 3 *farsakh* from Baghdād according to Yāḳūt, iii. 381, who says that the Nahr 'Īsā is sometimes called Nahr Ṣarṣar; there is obviously confusion with the Nahr al-Ṣarāt, on the connections of which with the Nahr 'Īsā, see just above; 3. Nahr al-Malik, branches from the Euphrates 5 *farsakh* below the Nahr Ṣarṣar and reaches the Tigris 3 *farsakh* below al-Madā'in; it is also the name of a *ṭassūdj* in the Sawād (so Ibn Serapion, p. 16); Le Strange's statement (p. 68), that the Nahr al-Malik began at al-Fallūdja is incorrect; this is impossible, for this place is only about 12 miles from the head of the Nahr 'Īsā, while the head of the Nahr al-Malik is at least 30 miles from that of the Nahr 'Īsā and should be sought on the maps somewhere about Khān Maḥmūd; Nahr al-Malik was also the name of one of the four *ṭassūdj*'s of Bihḳubādh al-Awsaṭ, while the two Fallūdja were *ṭassūdj*'s of Bihḳu-

Isḥāḳ al-Aʿlā; 4. Nahr Kūthā leaves the Euphrates about 3 *farsakh* south of Nahr al-Malik and reaches the Tigris to *farsakh* below al-Madāʾin; it flows through an extraordinarily rich country and many canals go off from it watering the *ṭassūdj* of Kūthā in the Kūra of Ardashīr Bābakān and a part of the *ṭassūdj* Nahr Djawbar; it flows past Kūthā Rabbā (Ibn Serapion, p. 15); Ibn Ḥawḳal, p. 168 (Yāḳūt, iv. 317), mentions besides Kūthā Rabbā, where Abraham was born and buried, a Kūthā al-Ṭarīḳ (Arabicised Aramaic?); Kūthā Rabbā is perhaps to be sought in the Tall Ibrāhīm of the maps (due east of Musaiyib). Of the canals from the Tigris which are independent of the Euphrates, one has already been alluded to: Nahr Dudjail [see p. 514ᵃ]; in Balkhī (Iṣṭakhrī, p. 77 *sq.*; Ibn Ḥawḳal, p. 156) its exit (*fūha*) is a little below Takrīt; it waters parts of this town and then the Sawād of Sāmarrā up to the vicinity of Baghdād (Iṣṭakhrī: "a large part of the Sawād of Baghdād is irrigated by it"). This was the earlier state of affairs; later the name was limited to the southern part of the canal or (more correctly) of the Tigris arm; this is reflected in the account in Yāḳūt (ii. 555), where the river rises between Takrīt and Baghdād below Sāmarrā returning to the Tigris after flowing through a large area. Abu 'l-Fidāʾ, who only compiled without troubling about discrepancies, gives both accounts; p. 56, 7, according to Yāḳūt's *Mushtarik*, p. 289, according to Ibn Ḥawḳal. Abu 'l-Fidāʾ has however combined Ibn Ḥawḳal's version with a note by Ibn Saʿīd, to the effect that the Nahr al-Isḥāḳī is in the south of and east of Takrīt; the latter is fully dealt with by Ibn Serapion, p. 18 *sq.* (translation and commentary, p. 265 *sq.*); although the ms. of Ibn Serapion agrees in saying "east" with Abu 'l-Fidāʾ (or Ibn Saʿīd), "west" is certainly the correct reading. The difference in the statements may be explained by the various stages; in the older stage there was a large canal (arm) of the Euphrates, which was called sometimes Isḥāḳī after its maker, and sometimes by the diminutive Dudjail. Sāmarrā wrought great havoc: the senseless extravagance exploited the land for purposes of luxury; when the days of splendour were over, many a good work of the older period disappeared, including the northern works of the Isḥāḳī-Dudjail; only antiquaries still knew anything of it; the rest of the world only knew of the Dudjail which even the extravagance of Sāmarrā had not been able to destroy and which is said still to exist (entered on Kiepert's map in Oppenheim). To restore all these once lifegiving watercourses is the task to be solved by civilisation in the next decades. The scheme has been drawn up by the English engineer Willcocks (cf. his *Irrigation of Mesopotamia*, Cairo 1905). So far the Hindiya dam has been completed (opened in December 1913); the lock of Habbāniya is being built and it was intended to have it finished in 1916. One of the greatest tasks, the drainage of the marshes between Kūfa and the Tigris around Ḳurna and Baṣra and the restoration of a sufficiently deep and broad channel for the Euphrates, now becomes of subsidiary importance, for, although the waterway still retains its importance beside the railway which is to connect the two important cities of the land, the railway, which is to run along the south edge of the marshes and north edge of the Arabian steppe, will suffice to carry the traffic and waterways through the marshes will be mainly regarded as feeders for the railway. For certain goods the waterroute from and to Nedjef will be a necessity, if they are to be able to compete in the markets. The canals to be revived cannot be intended as transport channels; the principal rule for the ʿIrāḳ has been rightly laid down that the watercourses are there for irrigation purposes and not for navigation. But people have gone too far in their zeal against the latter use, and the two great rivers must not remain any longer unused, but they must be made to carry the valuable cargoes if we are not to be reproached with neglecting an economic factor of the first importance. The lower course of the Euphrates between Ḳurna and the junction of the modern main canal and Tigris at Gurmat ʿAlī (10 m. north of Baṣra) is a swampy area [Baṭīḥa, q. v.] which probably at an earlier period stretched to Muḥammara. Compared with the earlier extent of the Baṭīḥa as given by the Arab geographers (Ḳudāma, 5100 sq. miles? as only linear measure is given, uncertain; Sprenger's calculation, according to Masʿūdī (*Babylonien*, p. 47) is wrong; see thereon Wagner in *Nachr. Gött. Ges. Wiss.*, 1902, p. 239: the marshes began quite near Kūfa) the modern extent is limited, about 1730 sq. m. (but the area north of the Baṭīḥa, between Shaṭṭ al-Ḥaiy and the Tigris is not yet investigated: there are said to be extensive marshes there also). Even now there are still a number of *khawr* (vulg. *khōr*, also *hawr*: for some notes on the word, see Lidzbarski, *Johannesbuch*, p. 144, note 5) i. e. lakes formed by inundation; the English map shows in addition to Khōr Abū Kelām and Khōr Djazāʾir also Khōr al-Hamar, the largest area of water. There are also lakes formed by inundation in the whole area between the Hindiya arm and the Shaṭṭ al-Ḥaiy; they are to be distinguished from the waters called *baḥr*, like Baḥr Nedjef and Baḥr al-Shināfiya; the Baṭīḥa and the borders of the *khawr*'s are intersected by navigable canals. The Khōr Huwaiza or Khōr al-Aʿẓam through which the Kherkha flows to the Tigris also belongs to the ʿIrāḳ. *Khōr* is also the name of the watercourses in the delta of the Shaṭṭ al-ʿArab, which have a different character from the lakes formed by inundation.

The rich soil of this country provides a fertile crop of corn of the first quality. Knowledge of this at one time penetrated into Arabia, the Beduins of which were on terms of intercourse with the principality of al-Ḥīra [q. v.], which lay on the borders of the blessed country and saw both sides. Every rising political power in Arabia when it felt strong enough had to make its first attack on the rich ʿIrāḳ. Here the material basis was to be found for a government which wished to set out on a policy of conquest; here were found the means to satisfy the "warriors of the faith" to whom the booty offered them by the conquest of this country seemed more valuable than the prospect of the joys of Paradise. Arab tradition makes this clear in the story that the Beduins were urged by their wives to get them the rich corn that grew in the ʿIrāḳ. But ʿIrāḳ was at the same time the door for an invasion into the Persian empire. Muḥammad, who had a good political instinct, could not fail to notice that in his period a great struggle was raging between the two world powers of which he might be able to reap the benefit as

tertius gaudens. The only clear revelation on foreign politics which survives (others have been lost) hopes for the victory of the defeated Byzantines (Sūra xxx. 1): a weakened Persia was in the interest of the Arabian policy of conquest, the guiding spirit in which from the first was ʿOmar. The war on two fronts was taken up with a boldness which cannot be sufficiently admired. The conquest of Syria and of the ʿIrāḳ was completed so thoroughly that 25 years after the death of the Prophet the crisis of the first civil war could be passed without serious consequences. The conquerors fell upon the ʿIrāḳ in full strength and here they won their first great victories. In strong, sudden blows the Persian outposts on the Euphrates were taken and the advance relentlessly continued until in the battle of Nahāwand (21 = 642) the Sāsānid power was overthrown. With great skill the Arab generals created a strong base of operations about 400 miles long with the camps of Baṣra and Kūfa as its eastern and western termini (the whole of the materials on the founding of these two cities is given by Caetani, years 16, p. 238 *sqq*.; 17, p. 13 *sqq*.). The rich capital of the country, Ktesiphon, which consisted of a group of towns, was ruthlessly plundered and destroyed and the foundations of a new fortified town were not laid upon it, but on the ruins the unimportant al-Madāʾin (see Nöldeke, p. 16, note 1; Streck, p. 246—279) dragged on a miserable existence till it was absorbed by Baghdād. Great care was devoted to the administration of this part of the young empire by the far-seeing ʿOmar. Kūfa and Baṣra received separate governors, that of Kūfa was at first Saʿd b. Abī Waḳḳāṣ, whose place was taken at the wish of the constantly grumbling Kūfis by ʿAmmār b. Yāsir [q. v.] who was not fit for the office; he was succeeded by Mughīra b. Shuʿba, who had been dismissed from Baṣra on account of a scandal, until Saʿd was restored to office (25 = 646); then followed al-Walīd b. ʿUḳba (25—30 = 646—650) and Saʿīd b. al-ʿĀṣ (30—33 = 651—654). Baṣra was more stable; there Abū Mūsā al-Ashʿarī [q. v.] ruled from 17—29 (= 638—650); he played an active part in settling the quarrel between ʿAlī and Muʿāwiya after the battle of Ṣiffīn. He was succeeded by ʿAbd Allāh b. ʿĀmir [q. v.], who hurried to the help of ʿOthmān but arrived too late. In 35 (655) ʿAlī sent to Baṣra ʿOthmān b. Ḥunaif, and ʿAmmār b. Shihāb to Kūfa. Ziyād Ibn Abīhi (cf. Lammens' monograph) sent by Muʿāwiya as governor to Baṣra in 45 (665) became ruler of the whole of the ʿIrāḳ in 50 (670) and by a salutary firmness restored order in the turbulent country. He died in Kūfa in 53 (673), before his "brother" Muʿāwiya; his son ʿUbaid Allāh became governor of Baṣra and Kūfa in 55 (675); under him Ḥusain b. ʿAlī [q. v.] met his death and he persecuted the Shīʿa. An important change in the fortunes of Baṣra took place when in the period of confusion after Yazīd's death (64 = 683), the Tamīm, the northern Arabs of Baṣra, fell to ʿAbd Allāh b. al-Zubair [q. v.], as did the people of Kūfa. The ʿIrāḳ seemed to be lost to the Omayyads for a time. The efficient ʿAbd Allāh b. al-Zubair, who was firmly established in Mecca, appointed his governors in the ʿIrāḳ; the bold and cunning guerilla leader Mukhtār in 66 (686) was able to expel the governor of Baṣra, but in the next year he fell in the battle of Ḥarūrāʾ near Kūfa. The death of Muṣʿab b. al-Zubair essentially altered the situation; his best officer, al-Muhallab, joined ʿAbd al-Malik [q. v.] and a governor of the Damascus government returned to Baṣra (72 = 691). The Khāridjis were a source of continual unrest; they were spread over the ʿIrāḳ and adjoining Khūzistān; they never permanently held a dominating position and were opposed by all the other parties. The governorship of Kūfa was sometimes combined with that of Baṣra, but in that case the governor-general had deputy governors under him. We know of the following governors of Kūfa: 53—55 (673—675) ʿAbd Allāh b. Khālid, 55—58 (675—678) al-Ḍaḥḥāk b. Ḳais, 58—59 (678—679) Ibn Umm al-Ḥakam, 59—60 (679—680) al-Nuʿmān b. Bashīr; 64 (684) we find ʿAmir b. Masʿūd (Ibn al-Athīr, iv. 109) as deputy (*khalīfa*) of ʿUbaid Allāh (cf. under Baṣra) in Kūfa; in the same year Mukhtār appeared in Kūfa, where ʿAbd Allāh b. Zubair had a governor. In Kūfa in 75 (694), the activity of al-Ḥadjdjādj b. Yūsuf [q. v.] began; he had been appointed governor of the whole of the ʿIrāḳ by ʿAbd al-Malik and his able and energetic administration suppressed all rebellion. The revolt of the Baṣris, who had joined the pretender ʿAbd al-Raḥmān b. Muḥammad b. al-Ashʿath [q. v.], was finished by the battles of Dair al-Djamādjim [q. v.] and Maskin (83 = 702). Al-Ḥadjdjādj took efficient measures to put an end to the seditious activities of the towns of Kūfa and Baṣra: he created a centre of economic and intellectual life for the ʿIrāḳ in Wāsiṭ on the Tigris (Shaṭṭ al-Ḥaiy), from which Kūfa and Baṣra, which were not too far distant (Kūfa 120 miles and Baṣra 180), could be ruled. ʿAbd al-Malik's administrative reforms were also of great benefit to the ʿIrāḳ; their fundamental principle was that of unity, which was indispensable for a healthy development; the most important was the reform of the currency, which began in the year 75 (694) and replaced the Byzantine and Persian coins current in the empire by coins with Arabic legends (the older emblems were retained on some of the copper coinages; on the silver in some parts of the empire the bust of Khosraw and the fire altar were retained and only the confession of faith was placed on the margin). ʿAbd al-Malik acquired further merit by organising the postal service although it was only used for carrying persons and messages in the interest of the government. Finally Arabic was ordered to be the official language; previously official documents had been in the language of the country or in it and in Arabic. Under al-Walīd also (86—96 = 705—715) al-Ḥadjdjādj retained his peculiar position. The figure of this man, in spite of the contradictory, on the whole unfavourable, accounts of the Arab annalists is still quite distinct to us. We know that there was a whole school which systematically depicted in black colours all that the Omayyads did, especially all the actions of their great statesmen; this is the ʿIrāḳ school, the chief representative of which is Saif b. ʿOmar (clearly elucidated by Wellhausen, cf. Caetani, year 11, p. 305). Unbiassed historical research will do justice to the merits of al-Ḥadjdjādj, but it must confess that one element in his administration had a pernicious influence on the development of the whole empire: that was the way in which he favoured his north Arabian countrymen, the Ḳais. Therefore all the Yamanis in the army and the government and all elements in the population who sided with the

Yamanīs were against him, as were also the ʿAlids, whose pretensions he ruthlessly combated. He took energetic measures against all men who fought for their particular interests, like al-Muhallab, who used every party when it seemed to be for his advantage. The tension produced by al-Ḥadjdjādj's ruthless procedure did not find full vent in explosion, as al-Walīd, a true son of his father, by his cautious and clever policy was able to avoid fatal outbursts of the principal feud, viz. that between the Ḳaisīs and the Yamanīs. The storm burst as soon as al-Walīd had died, for his brother Sulaimān who followed him (96—99 = 715—717) was under the influence of the enemies of al-Ḥadjdjādj, the embittered Yamanīs. Al-Ḥadjdjādj was spared the pain of the change, for he died six months before al-Walīd. The new epoch which began with Sulaimān first showed itself in the appointment of Yazīd b. al-Muhallab, one of the most dangerous intriguers and agitators, as governor of the ʿIrāḳ (95 = 714). The new lord began a reign of terror; the most prominent men of the North Arab party were persecuted and ill-treated. With Sulaimān's death there began a period of government by factions, which at every change in the throne resulted in intolerable uncertainty and dangers. ʿOmar II, son of ʿAbd al-ʿAzīz b. Marwān, checked the activities of Yazīd b. al-Muhallab for a time by imprisoning him (in the citadel of Aleppo, Ibn al-Athīr, v. 39); scarcely had ʿOmar died (101 = 720) when Yazīd escaped; the rebellion which he at once stirred up in Baṣra was suppressed by Maslama b. ʿAbd al-Malik (102 = 721); as a reward his brother Yazīd II (101—105 = 720—724) appointed him governor of Khorāsān, Baṣra, and Kūfa, separate deputy governors for them being placed in them by Maslama. The appointment of Khālid b. ʿAbd Allāh al-Ḳasrī as governor of the ʿIrāḳ by Hishām (105—125 = 724—743) had a beneficial result. With the death of Hishām, however, the completest confusion prevailed throughout the empire; passions were vented without restraint, and the factions of North and South Arabs into which all prevailing antithesis almost all other differences were merged, fell on one another. Al-Walīd II who followed Hishām was a Ḳaisī fanatic who had al-Ḳasrī cruelly executed. In Marwān II (127—132 = 744—750) a Marwānid once more took energetic steps against the rebellions. In the ʿIrāḳ he also put down Khāridjī risings. But the flame which the cunning ʿAbbāsids Abu 'l-ʿAbbās (al-Saffāḥ) and Abū Djaʿfar (al-Manṣūr) kindled in Khorāsān was no longer to be extinguished. Their general Abū Muslim in 130 (748) won the decisive battle against Marwān's governor, Naṣr b. Saiyār. The governor of the ʿIrāḳ, Ibn Hubaira, could not check the evil. The Yamanīs in Kūfa rebelled and gave up the city to the enemy and it became for a time the headquarters of the ʿAbbāsids. Marwān himself was decisively defeated on the Great Zāb in 132 (750). The ʿAbbāsids took the place of the Omayyads. Going back for a moment we may mention a political principle introduced by Muʿāwiya and maintained by his successors as a regular rule, but for which the rule of the Omayyads would certainly have disappeared more quickly. Muʿāwiya succeeded in consolidating his rule in the ʿIrāḳ and in stabilising and tranquilising the country in a relatively short time by his policy of wise moderation, which was seen especially in the consideration he paid to the inclinations of the people and in the introduction into the army of the principle of territorial military service. While at first the troops in the ʿIrāḳ were foreigners but stationed only in a few depots, the numerous conversions to Islām soon supplied sufficient men for the local forces. The fact that these troops were not used outside the country or only in campaigns against the east had the disadvantage that the enemies of the Omayyads were able to find a strong support in them. Abū Muslim fought with ʿIrāḳīs and Persians against the Omayyads, who only had the Syrian troops on their side. In the civil administration also Muʿāwiya and his successors showed themselves far-seeing statesmen: although they did not allow the ʿIrāḳīs to choose their own governor, but imposed rulers upon them, yet they wisely gave way to appeals and changed the individuals, an unimportant concession which in no way meant an alteration of the system. In yet another way the Omayyad rule was beneficial to the ʿIrāḳ. These rulers recognised that the ʿIrāḳ with its agriculture, dependent on special methods of cultivation, required to be administered with particular care; neither arbitrary interference nor complete laissez faire were here suitable. In not a few cases the representatives of the central government saw to improvements proposed by the natives, like Maslama, the Caliph's brother, who built a canal. The economic results of the Omayyad rule in the ʿIrāḳ are to be all the more highly appreciated as they had to reckon with the hostility of the population (Kūfa was in the hands of the Shīʿa, Baṣra in the power of the Khāridjīs). The difference between Syria and the ʿIrāḳ during the Omayyad period is that in Syria there was union and coherence and in the ʿIrāḳ continual strife. The Shīʿa and Khāridjī troubles have already been mentioned as well as the fighting between North and South Arabs, who opposed one another in the ʿIrāḳ under the names "Tamīm" and "Azd"; in spite of these troubles the great Marwānid succeeded in lessening the differences and bringing about a certain degree of coherence in the whole empire. The turn given to the Muslim empire by the victory of the ʿAbbāsids seemed likely to make the unity permanent. The transference of the Caliph's capital to the new city of Baghdād consolidated the connection of the regions belonging to the central zone. On the other hand, this measure already concealed the germ of decay, since the west could no longer be commanded from Baghdād, while this move did not result in a firmer authority over the eastern territories. Yet the area within the immediate sphere of the Caliph's influence, with Egypt, Syria, Mesopotamia, the ʿIrāḳ, and Persia, was still so important both in territorial extent and in values inherited from the pre-Muhammadan period that the ʿAbbāsids and their statesmen might have been able to build a permanent structure of indestructible political power and economic prosperity. Under al-Manṣūr and his immediate successors to al-Maʾmūn this great empire was a type of a political magnitude such as had hardly ever been attained before and can only be compared with the Roman empire under Hadrian. The Roman empire and the caliphate under the early ʿAbbāsids are hypertrophied structures, they are colossi with feet of clay. The imminence of collapse is the mark which they bear on their brows. In the causes of their decline they have much in com-

mon, but each of them had besides its own special conditions. The error in the structure of the caliphate, which was bound to prove fatal, lay in basing the sovereignty of the dynasty on aristocracy of birth and religion. Alongside of the clan which championed this was another of the same character which unceasingly endeavoured to make good its claims and to work for the overthrow of the dominant clan. The latter were the descendants of ʿAlī and Fāṭima, whose partisans formed themselves into a politico-religious party and were a great danger, not so much on account of their numbers, for then as now they cannot have numbered more than a tenth of all Muslims, but they formed the most intelligent and most industrious part of the Muslim population. Besides the clan and religious elements in the feud there soon appeared a third, the racial. The predominant majority was Arabic. These Arabs treated the Persians with contempt; the latter had also to attach themselves as clients to an Arab clan. Their ill-treatment led them to join with the other group, the Shīʿat ʿAlī "the followers of ʿAlī", who were severely oppressed by the dominant clan and its government. Their common sufferings formed a strong bond of union. A religious and nationalist party grew out of the at first purely Arab Shīʿat ʿAlī. "Persian" and "Shīʿa" gradually became synonymous. The danger was at first averted: a skilful policy bridged over the differences for a space of about 40 years. The Caliph al-Manṣūr, the second ʿAbbāsid (136—158 = 754—775), summoned a prominent Persian, named Khālid, of the Barmak family, said to be related to the old royal family, to a high office in the Government. Under his successors, unusually capable and clever men, this family attained an almost autocratic position. This period marks the zenith of the political power and economic prosperity of the caliphate, while at the same time a civilisation flourished that was conditioned by a limited external adaptation to the great cultural elements which the conquering Arabs found in Syria and Babylonia; but the foundations for a farther prosperous development were not created. Nor could it be otherwise; for the system of government which at the very beginning of the Omayyad period had replaced the originally democratic principle was based upon the idea that the prosperity of the Muslim community was secured by placing at the head of the government the man most worthy of this office. To exercise his control perfectly he had to have unlimited power and very soon this conception of the caliph became accepted to such a degree that he was actually regarded as the "Shadow of God". In practice this absolute ruler was usually not only not the most worthy but frequently one who had the gravest moral defects and at the same time a plaything in the hands of those who exploited the community in his name. In an administration of this kind two tendencies developed in a most disastrous fashion: the formation of gigantic fortunes and the preponderance of the "priesthood" of one particular theological school. At the same time a number of adventurers arose who troubled little about the superman on the Caliph's throne. The caliphate broke up into a number of communities which existed almost independently alongside of one another. In each of these communities developments followed the course settled by local conditions. The ʿIrāḳ also followed its own devices. From the beginning of the Būyid rule to the end of the Saldjūḳ period it was a province of a kingdom whose centre was in Persian ʿIrāḳ, but there was no marked policy of interference by the rulers: provided that the inhabitants bore patiently the oppression of their foreign masters and their heavy demands for money, they were allowed liberty to maintain their national life. The revival of the authority of the caliph under the vigorous Caliph al-Nāṣir brought no essential alteration. This period, besides, was soon ended by the Mongol invasion.

In the long period of ʿAbbāsid rule the ʿIrāḳ suffered many vicissitudes. When the caliphs were strong, the conflicts between the various elements and the aspirations of ambitious adventurers were speedily crushed; otherwise, the land suffered considerable unrest; for the Kūfa and Baṣra people were incurable as regards their main faults. The new capital attracted the worst elements to itself; at the same time the revival of economic prosperity brought masses into the country who when the time came could be stirred up by ambitious individuals, as for example happened with the rebellion of the Zandj imported from East Africa; finally, the religious fervour which was glowing beneath the ashes, again and again burst forth in burning and consuming flames. The extraordinary skill with which the Barmakids and, under their guidance, three caliphs maintained the delicate balance between Arabs and Persians, was lacking when the Barmak family was destroyed. The extermination of the Barmakids which resulted in an essential alteration in the ethnic balance of power in the ʿIrāḳ, meant that the policy of conciliation and mediation between the two main elements, the Arabic and Persian, was at an end. The overthrow of the balance first showed itself in a series of ʿAlid troubles, which began with the rising of Ibn Ṭabāṭabā (199 = 815). The capital stood by the Sunnī caliphate and even went so far as to oppose the Caliph himself when the latter in pursuit of an untenable policy of conciliation made the mistake of planning to give the succession to the ʿAlid Imām al-Riḍā as husband of his daughter and adopting the green colour of the ʿAlids. As soon as he saw his mistake, he undid his measure not without the use of force. The extermination of the Barmakids did not conduce to the strengthening of the political power of the Arabs in the ʿIrāḳ, but to its destruction, for the dislocation of the intimate relations in the central province led to the introduction of a new element into the court service and thus into political life. Al-Muʿtaṣim created for himself a Turkish praetorian guard and lived under its protection in Sāmarrā which was founded by him. The Turkish force with which the caliphs surrounded themselves stood alone and the existing Arab bodies of troops fell into the background before it, as the former had much more energy and soldierly spirit. The people thus became unfit to defend themselves and were at the mercy of those who ruled the land with the help of foreign troops, either as the appointed representatives of the Caliph or as usurpers who entered the land by force. These foreign bodies also endeavoured to gain control of the other provinces. We have already seen that Turkish families gained the ruling power in Egypt and therefore in Syria, but this did not mean the

coming of a system of regionalism, although the land furnished hardly any troops worth mentioning. In the 'Irāḳ under al-Mutawakkil Turkish praetorians came into power and made any orderly government impossible. The caliphs with a few exceptions (al-Mu'taḍid 892—902) and al-Muktafī (902—908) were utterly incapable and occasionally criminally self-seeking. The struggle for power around the caliph, that is for the office of generalissimo (Amīr al-Umarā'), came to an end for a time through the rise of the Būyids (334 = 945), who ruled the two 'Irāḳs, Babylonia and Media (cf. the beginning of the article). During the great disturbances which attended the complete collapse of the decadent Būyid family and the rise of the strong Turk family of Saldjūḳs (447 = 1055) a peculiar combination arose: a Turk general of the Būyid army, Arslān al-Basāsīrī [q. v.], ruled for a short time in the 'Irāḳ in name of the Fāṭimid al-Mustanṣir (451 = 1059). But as a result of the great distance between the 'Irāḳ and Egypt and southern Syria (the inhospitable Syrian steppe makes it necessary to take a devious route via north Syria) there could be no question of real Fāṭimid rule in the 'Irāḳ. The intervention of al-Basāsīrī was an episode which very soon passed. The Saldjūḳs, who appeared as the main champions of the Turks and held the caliph completely in their power, also considered themselves the protectors of the true Muslim doctrine and persecuted the Shī'a wherever it raised its head in the 'Irāḳ. Although they showed an inclination for Persian culture (the great Saldjūḳs resided not in Baghdād but in Iṣfahān), they did not interfere with the Arab culture of the 'Irāḳ. The temporary redemption of a certain amount of power by the caliphate under Nāṣir al-Dīn made only little alteration in the political and religious conditions. The 'Irāḳ became an easy prey to the Mongol conqueror Hūlāgū (656 = 1258), and its capital Baghdād sank to be a minor provincial town on the extinction of the caliphate. The desolation of the country, which as a result of the complete neglect of organised irrigation had begun as early as the beginning of the xth century, continued. The 'Irāḳ became steppe country with a few large villages and a few cultivated stretches on which the cultivation of the date-palm was alone of some importance. The incorporation of the 'Irāḳ in Persia by the powerful Ṣafawid Shāh Ismā'īl (915 = 1509) was not permanent. The country very soon (941 = 1534) fell to the Ottoman empire, of which it was a province until 1918.

(M. HARTMANN.)

IRAM, the name of an individual or tribe which occupies the same position in Muslim genealogy as Aram in Biblical, as may be seen from a comparison of the Muslim series 'Ūṣ b. Iram b. Sām b. Nūḥ with the Biblical 'Ūṣ b. Aram b. Shem b. Noah. The Muslim line probably, like many others, entered historiography under Jewish influence and therefore gives us no new information regarding the dissemination of Aramaeans in Arabia. The name is identified with that of the Iram Dhāt al-'Imād discussed below, the vocalisation of which was established. Perhaps this explains why the Muslims say Iram instead of Aram.

Tradition has still further developed the connection with the Aramaeans. The people 'Ād [q. v.] were called Iram; when the 'Ādis were destroyed, the name Iram was transferred to Thamūd whose descendants were thought to be the Nabathaeans of the Sawād. It was also known to Muslim scholars that Damascus in ancient times was called Iram i. e. Aram.

Bibliography: see the next article.

(A. J. WENSINCK.)

IRAM DHĀT AL-'IMĀD occurs in the Ḳur'ān only in Sūra 89, 6: "(5) Hast thou not seen how thy Lord dealt with 'Ād, (6) Iram dhāt al-'Imād, the like whereof hath not been created in the lands". — The connection between 'Ād and Iram in these verses may be interpreted in various ways, as the commentaries explain at length. If Iram is taken in contrast to 'Ād, it is intelligible why Iram also has been taken as a tribal name; 'Imād could then be taken in the sense of "tent-pole". According to others, the poles are a description of the giant figure of the Iram, which is thus particularly emphasised. If Iram stands in *iḍāfa* to 'Ād, it is more probable that Iram dhāt al-'Imād is a geographical term: "Iram with the pillars". This is the prevailing opinion among Muslims. What is exactly referred to, however, is a point on which opinions differ widely both in east and west. According to Yāḳūt, the view most frequently held is that which considers dhāt al-'Imād an epithet of Damascus [q. v. i. 903[a]]. Djairūn b. Sa'd b. 'Ād [see DAMASCUS, i. 904[b]] is said to have settled here and have built a town adorned with marble columns. Loth has used this tradition in support of his view that only Aramaic traditions are associated with the name Iram.

Iram, however, is frequently referred by Muslims to South Arabia to which 'Ād also belonged. 'Ād had two sons, Shaddād and Shadīd. After the death of the latter, Shaddād subdued the kings of the world; when he heard of Paradise he had a town built on the steppes of Aden which was to be an imitation of Paradise. Its stones were of gold and silver and its walls studded with jewels, etc. When Shaddād, after neglecting the warning of Hūd [q. v.], wished to see the town, he was destroyed by a tornado with his whole retinue a day's journey from Iram and the whole town buried in sand.

In a tradition given by al-Mas'ūdī (ii. 421) the story does not have a tragic ending. After Shad-

dād had built Iram, he wished to erect a duplicate of the town on the site of Alexandria. When Alexander the Great came to found Alexandria, he discovered traces of a great building with many columns of marble. On one of these was an inscription of Shaddād b. ʿĀd b. Shaddād b. ʿĀd in which he related that he had had this town built on the model of Iram dhāt al-ʿImād; but God put an end to his life: no one should be tempted to undertake too great a thing. — It is easy to see that this tradition is connected with the romance of Alexander, in which it is related (Pseudo-Callisthenes, ed. C. Müller, i. 33) that at the building of Alexandria a temple with obelisks was found which had an inscription of King Sesonchis who ruled the world. The warning mentioned in al-Masʿūdī's inscription is also quite in the tenor of the Alexander legend. We therefore must not expect here a tradition concerning the site of Iram. It must be noted, however, that Ṭabarī also in his commentary on the Ḳurʾān gives the view that Iram was identical with Alexandria.

It is further related that a certain ʿAbd Allāh b. Ḳilāba while seeking two lost camels came by chance on the buried town, from the ruins of which he brought musk, camphor, and pearls to Muʿāwiya. All these however became dust when exposed to the air. Muʿāwiya summoned Kaʿb al-Aḥbār [q. v.] to him and asked him about the town. The latter at once replied: "It must be Iram of the pillars, which was to be found in thy caliphate by a man whose appearance is as follows". The description fitted ʿAbd Allāh exactly. The hardly concealed tone of mockery with which al-Masʿūdī relates all this (*Murūdj*, iv. 88) is worth noting.

According to Muslim scholars, this Iram dhāt al-ʿImād lay near ʿAdan or between Ṣanʿāʾ and Ḥaḍramawt or between ʿOmān and Ḥaḍramawt. It should be noted that the form of the name Iram is South Arabian: Hamdānī mentions a hill and a well of the name Iram in South Arabia. This fact is a refutation of the opinion of Loth, who considers Aramaic references exclusively.

It is likewise clear that we have not to accept the connection between the tribe Iram = Aram and Iram dhāt al-ʿImād which is assumed by Muslim tradition. — The story of the finding of the family tomb of ʿĀd b. Iram is found in D. H. Müller, *Südarabische Studien* (*Sitz. ber. Akad. Wien*, philos.-histor. Klasse, lxxxvi. 134 *sqq.*).

IRĀN. (See PERSIA.)

IRATEN, Berber AIT IRATEN (cf. AIT); Arabic BANŪ RATEN, a tribe of Great Kabylia, whose territory is bounded on the north by the Sebau, in the west by the Wādī Aïssi, which separates them from the Banū Yenni, in the south by the district of the Ait Yaḥyā and in the east by that of the Ait Fraussen, and forms a hilly country from 3000 to 3500 feet in height, yielding olives and figs and some corn. The inhabitants are settled in several villages, of which the most important are ʿAdani, Tawrirt Amoḳrān, Usammir, and Agemun. To-day the Banū Raten form a single dwār community (cf. DAWĀR at the end) of 9781 souls belonging to the mixed community of Fort National.

We know little about the history of the Ait Iraten. Ibn Khaldūn (*Hist. des Berbères*, transl. de Slane, i. 256) mentions them as inhabitants of "the mountains between Bougie and Tedellys". They were nominally under allegiance to the governor of Bougie and were on the list of tribes liable to *kharādj*, while they were actually independent. At the time when the Marinid al-Ḥasan undertook his campaign to Ifriḳiya, they were subject to a woman, called Shamsī, of the family of the ʿAbd al-Ṣamad, from whom the chiefs of the Ait Iraten were descended.

During the whole Turkish period, the Ait Iraten maintained their independence, secure behind their mountains. They formed one of the most powerful federations in Kabylia, which comprised five *arsh*: Ait Irdjen, Akerma, Usammer, Auggasha, and Umalu, and could put in the field a force of 2800 men. They kept their independence until in 1857 the French under Marshal Randon for the first time penetrated into the Kabylian mountains (Djebel Djurdjura: cf. ALGERIA, i. 270ᵃ). To prevent a hostile invasion of their territory the Ait Iraten arranged to give hostages and to pay tribute. Nevertheless, their land remained a hotbed of intrigues against French rule, so that Randon in 1857 decided to subdue them completely. The French troops leaving Tizi-Uzu on May 24 conquered all the Kabyl villages in succession and on May 29 destroyed the army of the Ait Iraten and their allies on the plateau of Sūḳ al-Arbaʿāʾ. On May 26 the Ait Iraten offered to submit. To keep them in check Randon at once began to build Fort Napoléon (now Fort National) in the heart of their country and thus placed "a thorn in the eye of Kabylia". The Banū Raten were then quiet for 14 years, but in 1871 they again had recourse to arms and took part in the siege of Fort National, which however the rebels did not succeed in capturing.

IRBID or *Arbad* (corruption of an older Arbel, see the following article), the old town (of which the ruins only now exist) of Arbela, on a hill on the road from Tiberias through the so-called "Dove Ravine". Among the ruins those of a synagogue are noteworthy (see Kohl and Wat-

singer, *Synagogenruinen in Galilea*, p. 59 *sqq*.). The remarkable rock caves in the neighbourhood played an important role in later Jewish history. Tradition places here the tombs of the mother of Moses and of four of the sons of Jacob, Dan, Issachar, Zebulon and Gad.

Another Irbid-Arbail, likewise an ancient Arbela, lies in the district of Balḳā' [q. v.], 12 Arab miles from Baisān. There the Caliph Yazīd II died.

(Fr. Buhl.)

IRBIL, the name of various places in Mesopotamia:

1. a **town** in the wilāyet of Mōṣul, about 50 miles E. S. E. of Mōṣul, 12 hours N. of Altyn Köprü (see i. 322[b]) in 36° 11' N. Lat. and 42° 2' E. Long. (Greenw.). Irbil (Erbil, in the common language also Arbil) is the Arba-ilu of the Babylonian-Assyrian and the Arbira of the Old Persian cuneiform inscriptions. This place, which is mentioned as early as in Assyrian documents of the ixth century B. C., played no special political role in antiquity. Its main importance was rather based in the pre-Achaemenid period on the possession of a highly venerated sanctuary of the goddess Ishtar. Arbaila was the Delphi of ancient Assyria; at the same time however it was of great importance as the junction of caravan roads. It is mainly to this favourable position at the junction of roads that Arbaila owes the fact that it has survived as an existence and a name alone out of the famous cities of Assyria.

Irbil, almost equidistant from the two rivers named Zāb, formed from the earliest times the centre of the district cut off on north and south by these two rivers. In ancient times this was called either Arbelitis, after the capital, or, from the Zābs, Adiabene (the Hedayab of the Syrians). It practically coincided with the "land (*arḍ*) Irbil" of the Arab geographers. As after the decline of Nineveh, Arbela was the only important town of Assyria proper, the name Arbelitis was later extended to Assyria (even as early as the time of the Diadochi). Adiabene was then also interpreted in this wider sense. In the second half of the second century B. C. a small kingdom arose there, which was able usually to maintain its independence during the Parthian period. Under the Sāsānids Irbil was the residence of governors, who occasionally enjoyed very great independence. One of them, Ḳardagh, who lived in the citadel of Melḳī near Irbil, suffered a martyr's death in 358 under Sapor II for adopting Christianity.

In the Muslim period Irbil does not appear until far on in the time of the later 'Abbāsids. In Ṭabarī's great history it is never mentioned; of the older Arab geographers only Ibn Khordādhbih 12[th] and Ḳudāma (21[b]) mention it in dealing with the division of Arab 'Irāḳ as the capital of a district (*ṭassūdj*) of the province of Ḥulwān; cf. *Bibl. geogr. Arab.*, ed. de Goeje, vi. 6, 5, 235, 4. Irbil was later considered to belong to the Djazīra, particularly to the province of Mōṣul. In 563 (1167) Zain al-Dīn 'Alī Kūčik b. Begtegin founded a small state with Irbil as capital. The most famous ruler of this Kurd dynasty of Begteginids [q. v. i. 688[b] *sq*.] was Muẓaffar al-Dīn Kökbūri, Saladin's brother-in-law. Under him Irbil reached its greatest prosperity during the middle ages. Kökbūri in 586 (1190) considerably extended the kingdom which he had inherited from his brother. He conquered the adjoining minor principalities and also brought the district of Shehrizūr (with Kerkūk) under his rule. A number of foreigners then settled in Irbil, which soon became an important town. Several times a year Kökbūri gave brilliant festivals which brought visitors from far and near. This was especially the case with the feast celebrated with great ceremony on the birthday of the Prophet, which was combined with a great fair (cf. Ibn Khallikān, ed. Wüstenfeld, fasc. vi. 66). The lower town of Irbil at the foot of the citadel hill owes its origin to this prince. He also founded a school which bore his name, the Madrasa al-Muẓaffarīya, at which the father of the celebrated Arab historian Ibn Khallikān (born in 608—1211 in Irbil) was professor. For the Ṣūfīs Kökbūri built a monastery (*ribāṭ*) in Irbil.

When Kökbūri died childless in 630 (1232), he left his kingdom to the caliph al-Mustanṣir whose much shrunken secular power thus received a not inconsiderable accession. The latter had however first of all to use force to gain possession of his heritage, for the inhabitants of Irbil refused to recognise the 'Abbāsid as their suzerain. The general Iḳbāl al-Sharābī, who was sent by al-Mustanṣir, succeeded in occupying the refractory town after a siege; cf. Ibn al-Ṭiḳṭaḳā, *al-Fakhrī* (ed. Ahlwardt), p. 37, 380, 10; Barhebraeus, *Chron. Syr.*, ed. Bedjan, p. 466 *sqq*. and Weil, *Gesch. d. Chalifen*, iii. 468. Soon afterwards the Mongols knocked at the gates of Irbil. By 628 (1230) they had entered the radius of the town in their raids (cf. Ibn al-Athīr, ed. Tornberg, xii. 328). In 633 (1235) they were plundering in its streets (cf. Barhebraeus *Ta'rīkh Mukhtaṣar*, ed. Beirūt, p. 436, 3). In 634 (1236) they appeared again, set the lower town on fire and besieged the citadel, which was valiantly defended, but after 45 days they retired on payment of a considerable ransom; cf. Barhebraeus *Ta'rīkh Mukhtaṣar*, p. 437, 10 *sqq*., and Wüstenfeld in the *Abh. d. Gött. Gesch. d. Wiss.*, xxviii. (1881) p. 120, and also d'Ohsson, *Histoire des Mongols*, iii. 69, 71, 73. When in 656 (1258) Hūlāgū began his advance on Baghdād, he at the same time sent one of his generals to Irbil. The fortress was defended by the Kurds against all attacks for over a year. It was only with the help of Badr al-Dīn Lu'lu' of Mōṣul that the Mongols finally succeeded in taking the hotly contested town. Cf. Rashīd al-Dīn, *Hist. des Mongols de la Perse* (ed. Quatremère), i. (1836), p. 314 *sqq*.; Barhebraeus, *Chronic. syriac.*, p. 506, 5 *sqq*.; Barhebraeus, *Ta'rīkh Mukhtaṣar*, p. 472, and Weil, *Gesch. der Chalifen*, iv. 9; D'Ohsson, *op. cit.*, iii. 256 *sqq*. In the period that followed Irbil had again to suffer a great deal from the horrors of war and the raids of neighbouring Kurd and Arab tribes. The last days of storm and stress were experienced during the Turkish campaign of Nādirshāh in 1743. After a 60 days' siege the victorious Persian king was able to enter the town. Until far into the first half of the xixth century Irbil belonged to the great pashalik of Baghdād and as

one of the most important military points in it was garrisoned by a strong force of Janissaries. When the wilāyet of Mōṣul was separated from that of Baghdād, Irbil went with the former.

The conversion to Christianity of the district of Adiabene and the adjoining regions was mainly conducted from Irbil. A bishop had his seat here at a very early date. The diocese originally comprised only the area between the two Zāb, therefore it was called by the Syrians the diocese of Ḥadayab or, from the two seats of office, of Arbel or Ḥazza (a village near A.). At the beginning of the 4th century Irbil was elevated to the rank of an archbishopric, to which the whole of Assyria proper was subordinated. Not till a later date was the bishopric of Nineveh (Mōṣul) or Āthūr separated from it as an independent ecclesiastical province. On the importance of Irbil in pre-Islāmic Syrian church history, cf. especially the chronicle probably composed by a clergyman of the diocese of Irbil, which A. Mingana published in *Sources Syriaques*, i. (Leipzig 1908) and Sachau discussed in the *Abh. der Berl. Akad. d. Wissensch.*, 1915, N°. 6. This chronicle is primarily concerned with the history of the bishops and martyrs of our bishopric for the period 100—540 (551?) A. D. See also Labourt, *Le Christianisme dans l'empire Perse* (1904), passim (Index, p. 356).

In 1268 the Nestorian Catholicos moved his see from Baghdād to Irbil. But as early as 1271 he removed from here to Ushnū in Ādharbaidjān, since the Christians as a result of the machinations of the Assassins became suspect among the Muslims and had to suffer many insults, cf. Barhebraeus, *Chronic. Eccl.* (ed. Abbeloos and Lamy), ii. 439; do., *Chron. Syr.*, p. 525, 10 *sqq.*, 526, 21 *sqq.*; D'Ohsson, *op. cit.*, iii. 469 *sq.* The position of the Christians of Irbil under the successors of Hūlāgū [q. v.], and specially under Ghāzān [q. v.] and Uldjaitū, was on the whole very miserable. Kurds and Arabs often fell upon them, plundering and murdering, first of all in the years 1274 and 1285; cf. Barhebraeus, *Chron. Syriac.*, p. 528—529, 557, 1 *sqq.* In 1295, as an inscription of the 11th century which still exists in the monastery of Mar Behnam records, the Ilkhān Baidū ravaged the region of Irbil, cf. H. Pognon, *Inscript. Sémit.* (Paris 1907), N°. 76, p. 135. In the year 1296, as a result of a royal edict, all Christian churches of the town were destroyed (Barhebraeus, *op. cit.*, p. 596, 18 *sqq.*, and *Histoire de Mar Jabalaha*, ed. Bedjan, 1895, p. 113); in 1297 the Kurds besieged during several months the Christians who had taken refuge in the upper town (cf. *Hist. de M. Jabalaha*, p. 121—131). In 1310, in the reign of Uldjaitū, the Christians, after bravely defending themselves for over three months on the citadel against the besiegers, Arab, Kurd, and Mongol, were overcome and exterminated. We possess an illuminating description of these dark days for Irbil from the pen of the biographer of the then Catholicos Jabalaha III. (see *Hist. de M. Jabalaha*, p. 154—201). From this time onwards Irbil ceased to be a Christian town. But since then also dates the decline of the town. A few Syriac inscriptions on the walls of a building now used as barracks (*ḳishla*) recall the earlier Christian population; cf. Cuinet, *op. cit.*, p. 857. In Irbil itself there are no longer any Christian families; a few (united Nestorians) so-called Chaldaeans, are however to be found in the village of Ainkawa (also written Aiḳabba, Ankawa, Ankowa) a short hour's journey from Irbil, certainly the Amkaba of the *Hist. de M. Jabalaha*, p. 192, and probably the Amkabādh of Barhebraeus, *Chronic. Syr.*, p. 557, 11) as its exclusive inhabitants. Next to the Christians the Kurds form numerically the strongest element in the population of the town. From the 12th century the Ḥadhbānī or Ḥakamiya Kurds were settled in and around Irbil; on them cf. Ritter, *Erdkunde*, ix. 620; Quatremère in *Notices et extraits des manuscrits*, xiii. 301 note 1, 309—313 (extracts form the geographical and historical work of al-ʿUmarī, died 749—1348); G. Hoffmann, *Syrische Akten persisch. Märtyrer* (1881), p. 230, 272. The chiefs of these Kurd tribes, who possessed a considerable number of citadels in the region of Irbil, were frequently fighting with one another for the possession of the town. Accounts of such local feuds in the middle of the 11th century are given for example by the historians of Ibn Khaldūn and Badr al-Dīn Ainī; see Tiesenhausen in *Mém. présentés à l'Acad. Imp. des Sciences de St. Pétersbourg*, viii. (1859), p. 141, 160—161.

As to the present population of Irbil, it numbers, according to Cuinet (1892), 3260 inhabitants of whom 497 are non-Muslims (Jews). The number of houses is said to be 1822 (Belck and Lehmann, in 1899, estimated those of the upper town alone as 800), besides the serai of the Turkish governor, 2 mosques, 10 Muslim chapels and 16 schools. According to the late administrative division of Turkey, Irbil was the capital of a ḳaḍā belonging to the sandjaḳ of Shahrizūr and was divided into two districts (*nāḥiya*'s) comprising 330 villages and 12000 inhabitants.

Irbil consists of the lower town and an upper town grouped around the citadel. The lower, built by Kökbürī (called Kotrak, according to Cuinet), which lies at the west and south bases of the citadel hill, makes a very poor impression and now lies for the most part in ruins. It was earlier much more extensive, as may be deduced from the fact that the ditch which once surrounded it now lies far beyond the present scanty group of houses. The lower town is the centre of commercial life and contains the bazaars and khāns. Of noteworthy buildings the remains of a large mosque with an imposing minaret, about 203 feet high and 48 feet round (cf. the description in Rich, ii. 15 *sqq.*), are especially striking; according to an inscription on the minaret, it was built by Kökbürī. This mosque is perhaps identical with the *Masdjid al-Kaff* mentioned by Ḳazwīnī (*loc. cit.*), in which, according to him, there was a stone with the imprint of a man's hand. Obviously this refers to a sanctuary with a print of ʿAlī's hand (*Kaff*, *pandja*), of which others are known in the ʿIrāḳ, Mesopotamia, and Persia; cf. for examples, v. Berchem, in Herzfeld-Sarre, *Archaeolog. Reise im Euphrat- und Tigrisgebiet*, i. 24).

The upper town with the citadel rises from a round hill not quite 65 feet with fairly steep sides. It is obviously artificial. In its interior are massive vaulted subterranean passages and chambers. It is crowned by a strong castle which is surrounded by a wall now somewhat ruined, 45 feet high, set with crenellated parapets and bastions. This gigantic *tell* with the picturesque citadel upon it has always aroused the astonishment of travellers; from several hours' journey distant it can be seen commanding the

plain. To some extent it reminds one of the castle hills of Ḥimṣ and Ḥalab — with which it has been frequently compared —, but it surpasses both considerably in the grandeur of its mass. The castle is occupied by the *ḥükûmet-konaghy* and the other officials of the town. The houses of private citizens are quite close to the surrounding wall. Systematic excavations have not yet been undertaken in Irbil nor is anything known of any accidental finds of antiquities.

The importance of Irbil at the present day is mainly based on its position as a commercial depot and centre of a busy through trade. Important caravan routes enter it from different directions. First mention should be given to the very ancient road which runs from Baghdād via Kerkūk, Altyn-Köprü to Irbil and thence to Mōṣul; it is the most direct route between Baghdād and Mōṣul, as it was formerly between Babylon and Nineveh. Two roads run from Irbil to east and north and lead over rough mountain passes to the country of Ādharbaidjān; the one goes in the first place to Rowāndiz in the north east and the other to Khoi Sandjaḳ in the east. On the roads from Irbil and the distances, see especially Rich, ii. 296—297; Jones in the *Journ. of the Roy. Asiat. Soc.*, 1855, p. 380; and Cuinet, p. 793 *sqq.*; the road from Irbil to Marāgha is described by Hoffmann, *op. cit.*, p. 231 *sqq.*

The town of Irbil is the centre of a splendid, very fertile country, which looks to the eye more a flat than an undulating plateau. With an average height of 1300 feet (the lower town of Irbil is 1332 feet above sea level) it forms the watershed between the two Zābs. There is a complete absence of trees, but it affords excellent corn-growing soil; cotton flourishes here exceedingly and is manufactured in the town. The Persian geographer Ḥamd Allāh Mustawfī praises the cotton grown here in his geographical work *Nuzhat al-Ḳulūb* about 1340. Numerous streams run in winter through the plain but there is no perennial river so that irrigation has in part to be conducted by subterranean aqueducts. In the north the spurs of the Kurd Alps come fairly near Irbil; west of the town rises the Demir-Dagh to a height of 1600 feet. In the north east and east the plain is bounded by the Derdedawān Dagh; in the south (at Altynköprü) by the Zergazawān-Dagh. In the Southwest the plateau of Irbil is bounded by the Shemamlik lowland plain which stretches to the bank of the Great Zāb.

The well cultivated plateau is covered by numerous Kurd villages. The Kurd tribes, who camp in the summer in the hills of Rowāndūz, migrate hither in the winter. Most villages are built quite near characteristic tumuli; everywhere one finds extensive mounds of ruins, evidence of better days, when this land so richly endowed by nature was on a much higher level of civilization than at present.

Bibliography: For the Assyrian Period cf. Fr. Delitzsch, *Wo lag das Paradies?* (1881), p. 124, 256, and Streck, *Die Inschriften Assurbanipals* (1916), iii. 721; for the Graeco-Roman periods cf. Pauly-Wissowa, *Realencykl. der klass. Altertumswiss.*, ii. 407—8 (S. Fraenkel) and *Supplem.*, i. 117 (Streck). — For the Muslim period, apart from works already mentioned, the following are particularly important: Yāḳūt, *Mu'djam* (ed. Wüstenfeld), i. 186—188; Dimashkī, *Kosmographie* (ed. Mehren), p. 190; Ḳazwīnī, *Kosmographie* (ed. Wüstenfeld), p. 162—3; *Marāṣid al-Iṭṭilā'* (ed. Juynboll), i. 42, iv. 75; Ibn al-Athīr, *Chronicon* (ed. Tornberg), passim in Vol. vii—xii (s. index); Barhebraeus, *Chronicon syriacum* (ed. Bedjan, Paris 1890), passim, esp. p. 424, 432—3, 466, 506, 525—6, 528—9, 557, 596—7; Ḥādjdjī Khalīfa's *Djihān-numā* (versio latina by Norberg, Lund, 1818), ii. 33—35. — A four volume local history of Irbil, which Abu 'l-Barakāt al-Mubārak al-Mustawfī (d. 637 = 1240), wazīr of Kökbüri, composed, is lost. Yāḳūt received many notes for his geographical lexicon from Mustawfī with whom he was personally acquainted; cf. Wüstenfeld, *Abh. der Göttinger Ges. der Wiss.*, xxviii. (1881), p. 119—120; J. Heer, *Die hist. u. geogr. Quellen in Jāḳūt's Geogr. Wörterb.* (1898), p. 36. Ibn Khallikān, who pursued his first studies under al-Mustawfī in Irbil, also made great use of this chronicle for his biographical work; cf. Wüstenfeld, *loc. cit.* — Of reports by European travellers the following are worth noting: Niebuhr (1766), *Reisebeschreib. nach Arabien und anderen umliegenden Ländern*, ii. (Copenhagen, 1778), p. 342—4; Olivier (1795), *Voyage dans l'empire Othoman*, iv. (Paris, 1803), p. 292—6; J. S. Buckingham (1816), *Travels in Mesopotamia* (London, 1827), p. 325—8; Cl. Rich (1820), *Narrative of a Residence in Koordistan* (London, 1836), ii. 14—18, 293—305; H. Southgate (1838), *Narrative of a Tour through Armenia, Kurdistan* etc., ii. (London, 1840), p. 214 *sqq.*; V. Place (1851), *Lettre à M. Mohl sur une expédition faite en Arbèles* (in the *Journ. Asiat.*, sér. 4, t. xx. 1852, p. 441 *sqq.* and 457—60); J. Oppert (1854), *Expéd. scientif. en Mésopot.*, i. (1863), p. 281—6; H. Petermann (1855), *Reisen im Orient* (Leipzig, 1861), ii. 321; Czernik (1873) in *Petermann's Geogr. Mitt.*, Erg. Heft N°. 45 (1876), p. 1—2; E. Sachau (1898), *Am Euphrat und Tigris* (Leipzig, 1900), p. 111—3; L. Belck and C. F. Lehmann (1899), in *Verh. der Berl. Anthrop. Gesellsch.*, 1899, p. 417; S. Guyer (1911) in *Petermann's Geogr. Mitteil.*, lxii. (1916), p. 294. Cf. also [Rousseau], *Descript. du Pachalik de Bagdad* (Paris, 1809), p. 85; C. Ritter, *Erdkunde*, ix. 691—4, where the accounts of Niebuhr, Olivier, Rich, Dupré (1808), and Shiel (1836) are utilised; V. Cuinet, *La Turquie d'Asie*, ii. (Paris, 1892), p. 847, 848, 856—8. A good map of the environs of Irbil is given by Czernik, *op. cit.*, Pl. ii. On coins struck in Irbil cf. Lane-Poole, *Catal. of Oriental Coins in British Museum* (London, 1875 *sqq.*), iii. vi. ix. 1 and 2 (s. Indices), and the notes by v. Berchem in v. Berchem-Strzygowski, *Amida* (1910), p. 94, Note 4.

2. A place in Ṭūr-'Abdīn (in Mesopotamia), South East of Killit, in 37° 30' lat. N. and 41° 15' long E.

3. and 4. See under IRBID.

5. The statement by Yāḳūt (i. 189, 21) that the town of Ṣaidā (Sidon) was called Irbil is probably an error.

It is not impossible that the places named Arbela (Irbil, Irbid) outside of Assyria were founded by inhabitants of the Assyrian Arbela and were called by them after their native town.

(M. STRECK.)

IRTIFĀʿ (A.) = height: in astronomy the height of a constellation, that is its distance from the horizon measured on a circle passing through zenith and nadir (vertical, *al-dāʾirat al-irtifāʿ*); in geometry it is also used for the height of a plane figure (triangle, parallelogram) or of a body (prism, cylinder), but *ʿamūd* (pillar, plumb line) is much more commonly used. (H. SUTER.)

IRTISH a large river in Siberia, in the basin of the Ob. Its two sources, the Blue and the White Irtish, rise in the Great Altai; after their junction the river as far as Lake Zaisan bears the name "Black Irtish"; after leaving the lake it flows for about 180 miles through steppe country as the "White" or "Slow Irtish", then for 60 miles with a stronger current as the "Rapid Irtish" through a hilly country. At the town of Ustkamenogorsk it enters the Great Siberian plain which sinks away towards the Arctic Sea and besides several smaller tributaries, it receives on the right the Om and Tara, on the left the Ishim and the Tobol and falls into the Ob below the village of Samarowsk. The whole length of the river is 2230 miles of which only 253 are in the Chinese Empire. The railway bridge at Omsk is 765 yards long; the greatest breadth of the river in its lower course is about 875 yards.

The name is mentioned as early as the Orkhon inscriptions of the viiith century A. D. (W. Radloff, *Die alttürkischen Inschriften der Mongolei*, 2nd Ser. p. 19; written without vowels). Masʿūdī in *Kitāb al-Tanbīh* (ed. de Goeje, p. 62) speaks of the "Black" and the "White Irtish" and makes both fall into the Caspian Sea. The author of the *Ḥudūd al-ʿĀlam* (f. 10b) thinks the Irtish a tributary of the Volga; the name is vocalised Artush (or Artush) in the ms. which is in keeping with the story based on a popular etymology (*ar tüsh* "Man, come down", given by Gardīzī (text in Barthold, *Otčet o poězdkě v. Srednjuju Aziju*, p. 82). In spite of the trading route from Fārāb [q. v., ii. 55], mentioned by Gardīzī, to the Irtish, the country was little affected in the middle ages by Muslim culture. The river is only seldom mentioned, e. g. in the history of Tīmūr's campaigns, *Ẓafarnāma*, Ind. ed., i. 475 and 495 (Irtish). The Muslim town found by the Russian conquerors on the lower course of the river, with its main fort near the mouth of the Tobol, was probably founded in the Mongol period by colonists from the Volga region. Whether the stories heard by Radloff (*Aus Sibirien*, i. 146) of the sending of preachers of the Muslim faith from Bukhārā are based on facts, is doubtful. In any case, Islām only began to spread up the Irtish from the north under Russian rule (see BARABA, i. 651b *sq.*). All the towns and villages on the Irtish, as well as in its valley, only arose under Russian rule; down to the xviiith century there was no town farther south than Tara; Omsk and the towns south of it were only founded by Peter the Great.

The Irtish is navigable almost up to the rivers which form it. Between Tobolsk and Ustkamenogorsk there is regular steamship traffic. Sometimes the steamers go up as far Zaisan and then up the Black Irtish to the Chinese frontier and even beyond it. Since the making of the Siberian railway, the Irtish is of still greater importance as a traffic route. (W. BARTHOLD.)

ʿĪSĀ, the proper name of Jesus in the Ḳurʾān, and thence in Islām, is explained by some western scholars (Marracci, ii. 30; Landauer and Nöldeke, *Zeitschr. d. Deutsch. Morgenl. Gesells.*, xli. 720) as a form imposed upon Muḥammad by the Jews and used by him in good faith. They called Jesus Esau (עֵשָׂו) in hatred and said that the soul of Esau had been transferred to him. Others (J. Derenbourg, *Rev. des Études juives*, xviii. 126; Fränkel, *Wien. Zeitschr.*, iv. 334; Vollers, *Zeitschr. d. Deutsch. Morgenl. Gesells.*, xlv. 352; Nestle, *Dict. of Christ and the Gospels*, i. 861) hold that the name originated naturally by phonetic change from the Syriac Yeshūʿ (ܝܫܘܥ) combined with imitation of Mūsā. For the Muslim explanation of the name see al-Baiḍāwī on Ḳurʾān iii. 40 (ed. Fleischer, i. 156, l. 2). Titles and descriptions applied to Jesus in the Ḳurʾān and of importance for his position in the theological system of Islām are: "Son of Maryam" (e. g. iii. 40; iv. 169; xix. 35, and often); he was born of Mary, a virgin, by the direct creative act of Allāh; — "a Word (*kalima*) from Allāh" and "his (Allāh's) Word" (iii. 40, iv. 169); this is the creative word "Be" (*kun*) which Allāh cast (*alḳā*) into Mary; the creation of Jesus is thus compared (iii. 52) to that of Adam; — *al-Masīḥ* (iii. 40, iv. 169 and often), evidently from the Hebrew *māshīaḥ*, but how understood by Muḥammad is quite uncertain; for Muslim explanations see al-Baiḍ., i. 156, ll. 2 *sqq.*, — "a Spirit from Allāh" (iv. 169), as the angels are called spirits and he was a spirit directly from Allāh, so, too, Allāh formed Adam and breathed into him of his spirit (*min rūḥī*, xv. 29; xxxviii. 72); later Islām called him *al-Rūḥ* (*Lisān*, iii. 290, l. 15) and even *Rūḥ Allāh* (*al-Kashshāf* of al-Zamakhsharī, ed. Lees, i. 338); — *ʿAbd Allāh* (xix. 31); "he is nought but an *ʿabd*" (xliii. 59); "he will never disdain to be an *ʿabd* of Allāh" (iv. 170); *ʿabd*, literally "slave", is best rendered theologically by our "creature"; man, for Islām, is the property of Allāh and not simply his servant, cf. *ʿebhedh* in the O. T. and δοῦλος in the N. T. and especially of Jesus in Philippians, ii. 7; — "One of those brought near" (to Allāh, *min al-muḳarrabīn*, iii. 40); again the angelic association; later Islām sometimes explains this of his state after his ascension (*rafʿ*), when he was a semi-angel flying round the throne (*ʿarsh*) of Allāh (*insī malakī*, *Ḳiṣaṣ* of al-Thaʿlabī, ed. Cairo 1314, p. 227); but Muḥammad in his *Miʿrādj* found him in the second heaven (*Ṣaḥīḥ* of al-Bukhārī, v. 53, ed. Cairo, 1315); — *Wadjīh*, "worthy of regard in this world and in that to come", (iii. 40); al-Baiḍāwī explains, "as prophet in the one and as intercedor in the other"; — *Mubārak*, "blessed wherever I am" (xix. 32); but al-Baiḍāwī explains the word here and elsewhere as "possessing much profit for others", apparently possessing a *baraka*; — *Ḳawl al-ḥaḳḳ*, "the sure saying" in xix. 35 is obscure and may be not a title but apply to the statement made — see al-Baiḍ. i. 580, l. 25. He is a *nabī*, "prophet" (xix. 31) and *rasūl*, "messenger" (iv. 156, 169; v. 79), and he has a "book" (*kitāb*, xix. 31), which is the *Indjīl* (v. 50; lvii. 27). The sending of him is a "sign" (*āya*) and "mercy" (*raḥma*, xix. 21); he and his mother are a "sign" (xxiii. 52); he is made an "example", "parable" (*mathal*, xliii. 57, 59). He brought "proofs" (*baiyināt*) and "wisdom" (*ḥikma*, xliii. 63; v. 109), and was aided by Allāh with the

rūḥ al-ḳudus (ii. 81; v. 109), obscure like all mentions of *rūḥ* in the Ḳur'ān but explained by later Islām as Djibrīl; so al-Baiḍ. (*in loco*) and *Lisān*, iii. 290, l. 15. Allāh taught him (iii. 43; v. 110) and he possessed peculiar miraculous powers of raising the dead, healing the sick and making clay birds and, by the permission of Allāh, breathing life into them (iii. 44 *sqq.*; v. 110 *sqq.*).

On the death of Jesus the statements of the Ḳur'ān are contradictory. It is certain that Muhammad rejected the Crucifixion and accepted the Ascension, apparently in the birth-body and not in a glorified body; the crucifixion was prevented by a change of resemblance (*shubbiha lahu*, iv. 156), again an obscure phrase explained later by the commentators that his likeness was put upon another and the other crucified in his place. But his death is referred to: — "before his death" (iv. 157); "on the day I die and on the day I am raised, alive" (xix. 34), yet this verse may have been a mistaken repetition of verse 15. In iii. 48 Allāh says to him, "I am about to take thee to myself (*mutawaffīka*) and lift thee up (*rāfi'uka*) unto me". The first expression is commonly used of a blessed death, but that is not necessarily its meaning here, for it is also used in the Ḳur'ān (vi. 60) of Allāh's taking to himself the souls of sleepers during sleep, to be returned when they awake; cf. Frankel in *Zeitschr. d. Deutsch. Morgenl. Gesell.*, lvi. 77. For his Second Coming the only Ḳur'ānic authority is xliii. 61, a very obscure verse, the reading even of which is in doubt. Some read, "And he is verily a knowledge (*la'ilmun*) of the Hour", i. e. by (the descent of) whom the approach of the Hour is known. But others read, "a sign (*la'alamun*) of the Hour" and even, "a reminder (*ladhikrun*)". Others, again, refer the pronoun to the Ḳur'ān, "it is". His second coming being taken as established, his death is put after it and the references in iv. 157 and xix. 34 are thus explained; so also the descriptive *kahlan* in iii. 41, because he was taken up by Allāh as a "youth" (*shābb*) before he attained *kuhūla*, "middle age" (cf. al-Baiḍ. on these passages). The later doctrine of his return is given soberly by al-Baiḍ. on xliii. 61: that he will descend in the Holy Land at a place called Afīḳ with a spear in his hand; that he will kill with it al-Dadjdjāl and come to Jerusalem at the time of the *ṣalāt* of the morning (*ṣubḥ*); that the imām will seek to yield place to him but that he will refuse and will worship behind him according to the *sharī'a* of Muhammad; thereafter he will kill the swine and break the cross and lay in ruins the synagogues and churches and kill all Christians (Naṣārā) who do not believe in him (ed. Fleischer, ii. 241). To this last point reference is supposed to be made in iv. 157, "there is none of the People of Scripture but will verily believe in him (or: in it) before his death". One of the explanations of this in al-Baiḍ. (i. 241, l. 4) is that after he has killed the false Messiah (*al-masīḥ al-dadjdjāl*) not one of the People of Scripture will be left who does not believe in him, so that the community (*milla*) will become one, the community of Islām. Then will come universal security of man and beast and Jesus will remain for forty years; thereafter he will die and the Muslims will hold funeral service for him and bury him (at Medina, it is universally accepted, beside Muhammad, in a vacant space between Abū Bakr and 'Umar). But others interpret, "before he — the believer — dies", even though it is thus a useless belief, he being at the point of death.

So little can be gathered from the Ḳur'ān. The oldest traditions have but little more, as in the *Ṣaḥīḥ* of al-Bukhārī where 'Īsā is merely mentioned in connection with Dadjdjāl in *Kitāb al-Fitan*, Part ix. 60, ed. Cairo 1315. Muhammad had been interested in the idea of Anti-Christ as the story of Ibn Ṣaiyād shows (Macdonald, *Religious Attitude in Islam*, p. 34 *sqq.*), but the early Muslims, for political and theological reasons, developed elaborately in forged traditions the doctrine of the Last Things, and especially of the Mahdī and Jesus. Thus the *Maṣābīḥ* has much more, see ed. Cairo, 1316, ii. 136 *sqq.*, 140 *sq.* (chaps. on Signs of the Hour and on the Descent of 'Īsā). See, too, al-Tha'labī, *Ḳiṣaṣ*, p. 22 *sqq.*; the full account of 'Īsā, the most complete of all, covers pp. 215—229; Ṭabarī, ed. Leiden, i. 713 *sqq.*, and Ibn Wāḍiḥ, *Historiae*, ed. Houtsma, i. 74 *sq.*, give extracts from the Gospels. But in this development the rôles assigned to Jesus and to the Mahdī came to be confusingly alike, and one party tried to cut the knot with a tradition from Muhammad. "There is no Mahdī save 'Īsā b. Maryam". For this and also for their respective rôles when they were distinguished, see al-Sha'rānī, *Mukhtaṣar* of the *Tadhkira* of al-Ḳurṭubī, p. 118 *sqq.* (ed. Cairo 1324). Ibn Khaldūn in his *Muḳaddima* (ed. Quatremère, ii. 142—176 = De Slane's transl., ii. 158—205) gives a philosophical examination of the whole subject, showing the untrustworthiness of the different traditions and tracing the development of the idea of a restorer of Islām before the end, as it was influenced by Shī'ites of different degrees, by Fāṭimites and by Ṣūfīs. An explanation given by him of the tradition quoted above is: "None has spoken in the cradle (*mahd*, cf. Ḳur. xix. 30) save 'Īsā" (ed. Quatremère, ii. 163); for another see al-Ḳurṭubī, p. 118. On the whole subject Goldziher in his *Vorlesungen*, p. 230 *sqq.* and notes thereon, has a few luminous pages. See the same, p. 313 *sq.*, for the modern Aḥmadiya sect in India which teaches that Jesus escaped from Jerusalem, wandered to the East, settled at Srinagar in Kashmir and died there, where his tomb is still shown. Ghulām Aḥmad, the founder of the sect, professed to be both Jesus returned and also the Mahdī. Finally, Goldziher has well remarked that for Sunnī Islām, as opposed to Shī'ism and other outlying sects, the expectation of a future restorer of faith and life has never become fixed as a dogma but is only the mythological embellishment of an ideal representation of the future. This may well be due to lack of Ḳur'ānic basis.

From the above it is evident that Muhammad had learned a definite story of Jesus from some heretical Christian teacher, in defence of whose position he polemizes vigorously in the Ḳur'ān. He knows more, of sorts, about him than about any other of the religious figures of the past. But it is evident, too, that he omits something. For the appearance on earth of this unique figure, a second Adam, a semi-angel, a Logos much like that of Philo but with a difference, we are given no reason. It is not explained how he is a "sign", a "mercy", and an "example" or "parable" (xix. 21; xxiii. 52; xliii. 57, 59). At his birth he — as had been the case with his mother — was

guarded from the touch of Satan, who seeks by touching every newly born infant to implant a tendency to sin (iii. 31 and al-Baiḍ., *in loc.*). Some even say that he and his mother, in consequence of this, never committed sin (*Ḳiṣaṣ*, p. 210). But it should be noticed that the same is said, even more absolutely, of John the Baptist because he is called *ḥaṣūr*, "chaste" in Ḳur'ān iii. 34; cf. al-Baiḍ. and *Ḳiṣaṣ*, p. 211 *sqq*. But all the Ḳur'ān has is that Mary's mother exclaimed (iii. 31), "Verily, I put her and her seed in thy (Allāh's) care from the stoned Shaiṭān". How much or how little of the later view was in the mind of Muḥammad or was a legitimate development of his position it is impossible to say. He left something untold and classed 'Īsā with all the other prophets, although so essentially different. The story of the table with food sent down from heaven (v. 112 *sqq*.) which is to be to them a festival (*'īd*) and a sign to all generations seems a genuine confusion on the part of Muḥammad himself in regard to the eucharist. It is significant that the commentators (al-Baiḍ., i. 280) most commonly say that the food was a large fish, thus suggesting the ἰχθύς symbol.

Later Islām has pictured 'Īsā as separated from all human ties except to his mother, as constantly wandering, barefoot and without abiding place, passing the night in worship wherever he might be when the sun set, living from day to day for nothing but devotion and miracles of benevolence (*Ḳiṣaṣ*, p. 218). At the Judgment he will be the example of absolute poverty (*faḳr*, al-Ghazālī, *Durra*, p. 90 *sqq*.). At the *mawḳif* on that day men will ask him to intercede for them with Allāh and he will refuse, not for any sin of his own, as in the case of the other prophets, but because his followers have taken him and his mother as gods along with Allāh (*Durra*, p. 62 *sqq*.); cf. many other forms of this tradition in the *Iḥyā'*, ed. with comment. of Saiyid Murtaḍā, x. 489 *sqq*. Margoliouth has gathered a valuable catena of his sayings and doings from the *Iḥyā'*, in the *Expository Times*, vol. v., 1893-94, pp. 59, 107, 177, 503, 561.

'ĪSĀ b. 'Alī [See 'Alī b. 'Īsā.]

'ĪSĀ b. Muhanna, Sharaf al-Dīn, an Arab Amīr, who played an important part during the war between the Mamlūks and the Mongols in Syria. His genealogy in Abu 'l-Fidā' (Constant. 1286 a. H.), iv. 91, is 'Īsā b. Muhanna b. Māni' b. Ḥadītha b. 'Aḍala b. Faḍl. Salamiya and Sarmīn were the seats of his family; he probably belonged to the Rabī'a. His grandfather Māni' and other members of the family are several times mentioned in the history of Ḥalab by Kamāl al-Dīn (cf. Blochet, *Histoire d'Alep*, p. 168, 210, 213). 'Īsā fought on the side of Ḳuṭuz in the battle of 'Ain Djālūt [q. v.] in 658 (1260) and in the following period also was usually on the side of the Mamlūks, although there were frequent quarrels, as the Mamlūk sulṭāns on the one hand had little trust in the Amīrs and the latter like true Beduin chiefs troubled little about the government and, if occasion arose, did not hesitate to join the Mongols. 'Īsā was already on bad terms with Baibars [q. v.] and the feud became fiercer under Ḳalā'ūn as 'Īsā had taken the side of Sonḳor al-Ashḳar. In 679 (1280) the two even called in the help of Abāḳā [q. v.] and his Mongols but this unnatural alliance did not last long; soon afterwards 'Īsā had a reconciliation with Ḳalā'ūn and fought on his side in the battle of Ḥimṣ in 680 (1281) against the Mongols. 'Īsā died soon afterwards and his son Muhannā Ḥusām al-Dīn succeeded him. The latter continued his father's policy; in 692 (1293) treacherously arrested by Sulṭān Khalīl, he was released again and recognised as Amīr of the Arabs. He intervened with Sulṭān al-Nāṣir on behalf of Ḳara Sonḳor, which gained him the former's enmity, so that he joined the Mongol Ilkhān. After the treaty of peace between the Mongols and the Mamlūks in 723 (1323) Muhannā returned to Syria. Muhannā, who made the pilgrimage to Mecca in 697 (see Wüstenfeld, *Chron. der Stadt Mecca*, ii. 275), died in 735 (1334—35). Ibn Baṭṭūṭa (ed. Paris, i. 169 *sqq*.) gives a detailed account of him and (iii. 271 *sq*.) gives interesting information on the fortunes of a member of the family who was at the court of the Sulṭān of Dihlī, Muḥammad Shāh.

Muhannā left several sons but they soon fell out with one another. Nevertheless, the amirate of the Arabs remained for over a century in the family of 'Īsā b. Muhannā and the dynasty is said to have survived till 879 (1474). The authorities available, however, do not enable one to give in any detail the later vicissitudes of the family.

Bibliography: In addition to the sources quoted in the article, cf. the historians of the Mamlūks and Ilkhāns, especially Weil, *Geschichte der Chalifen*, Vol. iv. (Index), and d'Ohsson, *Hist. des Mongols*, Vol. iv.

'ĪSĀ b. Mūsā b. Muḥammad b. 'Alī b. 'Abd Allāh b. al-'Abbās, nephew of the two first 'Abbāsid Caliphs, al-Saffāḥ and al-Manṣūr. In the last year of his reign al-Saffāḥ had homage paid to his brother Abū Dja'far and after him to his nephew 'Īsā b. Mūsā as heirs-apparent. 'Īsā, who a few years previously had been appointed governor of Kūfa, retained this office after the accession of Abū Dja'far al-Manṣūr. When the 'Alid Muḥammad b. 'Abd Allāh rebelled in Medīna in 145 (762), 'Īsā was sent with an army against him. On the advance of the Syrians, many of the people of Medīna saved themselves by flight and in Ramaḍān of the same year (Dec. 762) 'Īsā stormed the city. Muḥammad fell in the battle and his head was sent to the Caliph. In the meanwhile his brother Ibrāhīm had raised the standard of revolt in Baṣra. The Caliph's troops were defeated and as the revolt was spreading more and more, al-Manṣūr feared that the easily influenced people of Kūfa might be involved in the revolution, so he went in person to the city. He succeeded in keeping the city under control while 'Īsā hurried with help from Medīna. His advance guard under Ḥumaid b. Ḳaḥṭaba was defeated in Bākhamrā [q. v.] and a part of the main army also at first retired, but 'Īsā mastered the situation, Ibrāhīm's troops were put to flight and he himself was slain. By the victory of Bākhamrā on 25 Dhu 'l-Ḳa'da 145 (Feb. 14, 763) al-Manṣūr's rule was secured. Nevertheless he treated 'Īsā slightingly and wanted

to exclude him from the succession. The Caliph had even said when he sent him against Muḥammad b. 'Abd Allāh: "I do not care which of the two kills the other", and in 147 (764—765) he had homage paid to his son Muḥammad al-Mahdī as successor and even deposed 'Īsā from his governorship, because he declined to abandon his rights. In the end 'Īsā had to give in and pay homage to al-Mahdī, on condition however that he was to follow the latter. After al-Manṣūr's death he wished to renew his claims as his consent had been extorted from him by threats; his attempts met with no success and in the reign of al-Mahdī he had again to renounce the succession in favour of Mūsā al-Hādī, son of al-Mahdī. He died in 167 (783—784).

(K. V. Zettersteen.)

'ĪSĀ b. 'Omar al-Thaḳafī, Arab grammarian and reader of the Ḳur'ān, died 149 (766). He is regarded as one of the first representatives of the grammatical school of Baṣra and is said to have taught Sībawaihi [q. v.]. To the data collected about him by Flügel, *Die grammatischen Schulen der Araber*, p. 29 *sqq.* and after him by Brockelmann, *Gesch. d. Arab. Litt.*, i. 99, may be added that Yāḳūt, *Irshād*, ed. Margoliouth, vi. 100 *sq.* has an article on him.

'ĪSĀ b. al-Shaikh b. al-Salīl al-Shaibānī was appointed governor of Ramla in 252 (866) and a few years later (256 = 870) gained possession of Damascus also. But when he embezzled the Syrian taxes, al-Mu'tamid sent Amādjūr as governor to Damascus, who put to flight 'Īsā's troops commanded by his son Manṣūr. 'Īsā himself retired to Armenia, where the governorship of this province was given him by the Caliph. On the part which he played here, see Thopdschian in *Mitteil. des Seminars für Orient. Sprach.*, vii. 2, p. 119. In 266 (879) 'Īsā was in Āmid and with other Arab amīrs waged an unsuccessful war against Kundādjīḳ, governor of Mōṣul. Three years later, in 269 (882), he died. His son Aḥmad held his own in Diyār Bakr however, seized Mārdīn (279 = 892) and Marāgha (280 = 893) and fought successfully with the Armenian Sempad I (cf. Thopdschian, *op. cit.*, viii. 2, p. 173 *sq.*). He died in 285 (898). According to a statement by Ibn al-Mu'tazz (see his poem *Zeitschr. der Deutsch. Morgenl. Gesellsch.*, xl. 756, and the editor's note, *ibid.*, xli. 242 *sq.*), he had to hand over to the Caliph the treasures captured from Ibn Kundādjīḳ and found himself so hard pressed then in 281 (894) that he was on the verge of applying for assistance to the Christians. The Caliph after Aḥmad's death advanced against his son Muḥammad and besieged him in Āmid. In the end Muḥammad and his family were captured. The Shaibānids, nevertheless, still played a part later in Diyār Bakr, and Ibn Baṭṭūṭa (ed. Paris, i. 163) found them still in South Armenia.

ISAAK. [See isḤāḳ.]

ISĀF, name of an idol at Mecca, which is almost always mentioned along with *Nā'ila*. Tradition relates that a man and a woman of the Djurhum were so called and were turned into stone as a punishment for indecent conduct in the temple. They were first of all placed as a warning on al-Ṣafā and al-Marwa, but were later idolatrously worshipped by order of 'Amr b. Luḥaiy. It is therefore a question of two sacred stones, but the origin of their names is so far unexplained. Attempts are given in Dozy, *De Israeliten te Mekka*, p. 197.

ĪSĀGHŪDJĪ, Isagoge, from the Greek εἰσαγωγή, is an Arabic adaptation of the *Introduction* (*al-Mudkhal*) to the categories of Aristotle composed by Porphyry of Tyre. According to Ṣā'id al-Andalusī (*Ṭabaḳāt al-Umam*, Beyrout 1912, p. 49), the Arabic translation was made directly from the Greek by Ibn al-Muḳaffa' [q. v.] and, according to the *Fihrist* (i. 244), it was made from a Syriac version by Aiyūb b. al-Ḳāsim al-Raḳḳī. In any case, it is certain that Arabic versions of Porphyry's work were multiplied quite early, in commentaries, epitomes and adaptations. Of the latter we only possess the two following: 1. that of Abu 'l-Ḥasan Ibrāhīm b. 'Omar al-Biḳā'ī al-Shāfi'ī (cf. Brockelmann, *Gesch. d. Arab. Litt.*, ii. 142—3, N°. 14; with a commentary by al-Sanūsī, cf. *op. cit.* and Bibl. Nat. of Algiers, *Cat.*, N°. 1382 N°. 1); 2. that of al-Abharī [q. v. and add Ibn Khallikān, *Wafayāt*, Cairo 1310, ii. 137), which is the best known and the most annotated. This little treatise on logic discusses very succinctly the following subjects: term, definition, proposition or judgment, opposition, inversion, syllogism, controversy, rhetoric, poetics, sophistry. The *Īsāghūdjī* of al-Abharī was put into *radjaz* verses by al-Akhḍarī [q. v.].

'ĪSĀWĪ. [See naṣrānī.]

'ĪSĀWIYA, 'ĪSĀWA (Aïssaoua), a collective name from the singular *'Īsāwī* (cf. Marçais, *Textes Arabes de Tanger*, p. 397 *sq.*): a name given to the *ikhwān* [q. v.] or members of the Moroccan religious brotherhood founded by Sīdī Muḥammad b. 'Īsā and derived from this last name.

In spite of the fame of this brotherhood, the life of Muḥammad b. 'Īsā al-Fihrī and his origin are little known. The ethnic al-Fihrī suggests a Spanish Arab origin. He travelled a great deal in his youth and was initiated in the east into the ecstatic exercises of the religious orders of the

zūliya and the Sa'diya. Returning to the Gharb, he became a disciple of the Shaikh Abu 'l-'Abbās Aḥmad al-Ḥārithī, who was a pupil of al-Djazūlī [q. v.]. On the death of his master, Muḥammad b. 'Īsā succeeded him at the head of his zāwiya of Miknāsa az-Zītūn (Mequinez). He died here about 1524—1525 and was buried in the zāwiya beside one of his shaikhs, named Boghān al-Ḥalabī, a native of the east. Muḥammad b. 'Īsā had greatly extended the organisation of his pupils. He formed them into an autonomous religious order administered by the shaikh or his khalīfa (lieutenant) with the assistance of a kind of council of 40 members. The latter live in seclusion in the zāwiya or mother-house of Mequinez and only leave their retreat once a year, on the day of the festival of the mūlūd or anniversary of the birth of the Prophet. This brotherhood follows the rule of the Shādhiliya Ṣūfīs, adding the special ecstatic exercises for obtaining physical insensibility. This insensibility is obtained with the help of a dance accompanied by jerking movements backwards and forwards, the adepts holding one another's hands and forming a chain round a brazier. Once they become insensible, the 'Īsāwiya devour living scorpions, pieces of glass, stick long needles into their bodies, beat themselves with the blades of swords, etc. At public festivals these ceremonies often end with a meal of a sacrificial and sacramental character when these highly wrought dervishes devour like madmen the raw flesh of an unskinned animal (sheep or goat) and tear and rend it in the most horrible and repugnant manner imaginable. According to the legend, God, at the prayer of Muḥammad b. 'Īsā, granted the disciples of this shaikh a complete immunity from wounds and disease. Accordingly these dervishes have the power of driving out illness, caused almost always by the djinn, by taking it upon themselves. This is why they are called to houses where there is illness or an epidemic and where they are begged to go through their usual exercises.

Since their appearance in the xvith century the 'Īsāwiya, who at first spread through the Mequinez and Fez regions, have enjoyed great influence on ignorant and fanatical populations. Muḥammad b. 'Īsā used his prestige to stir up the people to a holy war against the Portuguese and Spanish Christians. His successor, Abu 'l-Rawā'in, raised the people of Fez against the last Marīnids in favour of the new dynasty of Sa'dī Sharīfs. Since that date the political activity of the 'Īsāwiya has not been mentioned by historians; in any case they have not taken part in the various political revolutions — at least not as an organised brotherhood.

During the lifetime of Saiyidī Muḥammad b. 'Īsā one of his disciples, named Abu 'l-Ḥadjdjādj Yūsuf b. Abī Mahdī 'Īsā, founded a zāwiya of this brotherhood at Figuig (S. E. Morocco). From there the 'Īsāwiya spread through the regencies of Algiers and Tunis. Their present field comprises primarily Morocco, where they are numerous, especially in the west. In Algeria they have their principal zāwiya's at Remchī (in Oran); in the Dra' of Usera (province of Algiers) there is a zāwiya founded by a grandson of the founder of the order; they have also zāwiya's of less importance almost everywhere, notably at Constantine, Bona, etc. In Tunisia they are found especially at al-Kef, at Tunis, Bizerta, Susa, Sfax, Gabes and the island of Djerba. They are not widely disseminated in Tripolitania and are almost unknown in Egypt. Like all the great Moroccan religious orders they have a zāwiya at Mecca.

(A. Cour.)

IṢBA' (A.) "finger", the inch, an Arab measure of length, as in Europe the twelfth part of the foot (*ḳadam*), $^1/_{24}$ of the ell (*dhirā'*). The inch belongs to the earliest of the Arab measures of length and was marked, probably from the earliest period, on the Nilometer of the island of al-Rawḍa built in 96 A. H. [see MIḲYĀS]. Its length there is 2.2925 cm. = 1 inch (the ell is 54.07 cm. = 21.8 inches). Being a derived measure the inch is not an invariable magnitude, for example to-day in Cairo the inch of the *dhirā' mi'mārī* = 3.195 cm. = 1.25 inches, of the *dhirā' istanbūlī* = 2.82 cm. = 1.1 inch, of the *dhirā' hindāsa* = 2.618 cm. = 1.03 inch, and the *dhirā' baladī* or *miṣrī* = 2.404 cm. = .95 inch. In Turkey the most usual is the *dhirā' ḥalabī* of 68.58 cm. which gives an inch of 2.857 cm. = 1.15 inch. It should be noted however that the name *iṣba'* has long become obsolete in everyday life and the ell in the east is very commonly divided into quarters (*rub'*) and twenty-fourths (*ḳīrāṭ*), wherever the metric system has not completely driven out the native system.

(E. v. Zambaur.)

IṢFAHĀN, 'Aspadana, Ptolemy, vi. 4; Firdawsī Sipāhān; in Arabic Iṣbahān), an important town in Persia, formerly the capital under the Ṣafa-

wids, now the chief town of the province of ʿIrāḳ ʿAdjamī. Its name means "the armies" (Ḥamza al-Iṣfahānī) and has been referred by a popular etymology and in derision to *sebāh*, which in the local dialect means "dog" (Median σπάκα, Herod. i. 110). It was formerly composed of two adjacent towns, Djayy, on the site later occupied by the *shahristān*, the "city properly so called", and Yahūdiya, "the Ghetto", a Jewish colony established there, it is said, by Nebuchadnezzar (Schreiner, *Revue des Études Juives*, xii. 259; Ibn al-Faḳīh, p. 261, sq.) or under Yazdigird I at the request of his Jewish wife Shōshan-dukht (E. Blochet, *Liste des Villes*, § 54 in *Recueil des Travaux*, xvii., 1895; J. Marquart, *Ērānšahr*, p. 29). Ancient legends, which are transmitted by Ibn Rosta, attribute the building of the citadel to Kay-Kāūs [q. v.] and it was later rebuilt by Bahman, son of Isfendyādh. There are two versions of the story of the capture of Iṣfahān by the Muslims. According to the historical school of Kūfa, the capture took place in 19 (640); by order of the Caliph ʿOmar, ʿAbd Allāh b. ʿItbān marched on Djayy, which was commanded by one of the four *pādhospān* of the Persian empire (= governors, Nöldeke, *Gesch. d. Perser u. Araber*, etc., p. 151, nº. 2; cf. A. Christensen, *L'empire des Sassanides*, p. 87), who, after several battles, capitulated on condition that the *djizya* was replaced by an annual tribute. Ṭabarī (ed. Leyden, i. 2637 *sqq.*) gives the date as 21 A. H. The Baṣra school says that in 23 (644) Abū Mūsā al-Ashʿarī [q. v.], after Nehāwand, took Iṣfahān or that his lieutenant ʿAbd Allāh b. Budail received the capitulation of the town on the usual conditions of the establishment of *kharādj* and *djizya* (al-Balādhurī, p. 312): on these varying versions see Caetani, *Annali*, v., yr. 23, § 4—25. It was taken again, after a rebellion, in the Caliphate of al-Muʿtazz, during Mūsā b. Boghā's campaign against the ʿAlids of Ṭabaristān (247 = 861). Its population was decimated and its notables deported (al-Balādhurī, p. 314). It was henceforth an important town, the capital of a large province and a centre of industry and commerce. Ibn Rosta, who lived there and wrote his book probably about 290 (903), enumerates its four gates and 100 towers; the geometrician Ibn Ludda measured its diameter (it was round in plan) and found it to be 6,000 cubits or half a parasang. The Būyid Rukn al-Dawla increased the town and repaired its walls, which were still standing in the vith (xith) century. There was a building there like a fortress, which bore the same name as the citadel of Hamadhān, Sārūḳ (Sārūye, *Fihrist*, p. 240, 11, 27, 241, 14; Ḥamza, p. 197; Ibn al-Faḳīh, p. 219, 241, 244). Silver mines were found in the neighbourhood, the exploitation of which had been abandoned since the Muslim conquest, and mines of copper, antimony, zinc, etc. The distribution of the water from the Zinda-rūd for irrigation purposes and the name Zarrīn-rūd, river of gold (cf. Flandin, *Voyage*, ii. 336), adopted by Ibn Rosta, were attributed to Ardashīr, son of Bābak. To the present day the cultivation of the poppy, cotton, and tobacco constitutes the wealth of the country.

Passing under the rule of the Sāmānids after 301 (913), it was taken by Mardāwīdj b. Ziyār in 316 (928) and taken from the Būyids by Maḥmūd of Ghazni shortly before his death in 421 (1030). It was the favourite residence of the Saldjūḳ Malik Shāh. The Ismāʿīlīs made numerous converts there at the beginning of the vith (xiith) century. During the Mongol invasion a battle fought under its walls by the Sulṭān of Khwārizm, Djalāl al-Mangobirti, although indecisive, saved the town (625 = 1228); it nevertheless became part of the Mongol Empire. Muḥammad b. Muẓaffar took it from Abū Isḥāḳ Indjū in 757 (1356). When occupied by Tīmūr, the inhabitants rebelled and were massacred (pyramids of 70,000 heads, 790 = 1388). It was taken by the Ottoman Sulṭān Sulaimān during the rebellion of prince Ilḳāṣ-Mīrzā (955-1548). After the battle of Gulūnābād (1134 = 1721) the Afghān Maḥmūd besieged Iṣfahān and it suffered terribly from famine and capitulated, which resulted in the abdication of Shāh Ḥusain. Its population was massacred for a fortnight after the victorious rising in Ḳazwīn (1136 = 1723); it was liberated by Ṭahmāsp Ḳulī Khān (Nādir Shāh) in 1141 (1729).

Choosing Iṣfahān for his capital, Shāh ʿAbbās I [q. v., i. 7b *sq.*] made it a large and beautiful town, with a large population (at least 600,000 in the xviith century), whence the Persian proverb *Iṣfahān nisf-i djahān* "Iṣfahān is half the world". It lies along the Zinda-rūd (now called Zāyinda-rūd), which is crossed by three fine bridges, one in the centre of the town, Pul-i Djulfā or Pul-i Allāhwerdi Khān, because it leads to the suburb of Djulfā [q. v.] and was built by the general of ʿAbbās I, now called Pul-i sī o sih Čashma (bridge of the 33 arches), the two others at the two extremities of the town, the lower, the bridge of Bābā Rukn, which led to the cemetery in which the mausoleum of this dervish stood, now called Pul-i Ḥasanābād; the bridge of Pul-i Mārnān (*Marnon* in Chardin, i. e. Mārnān, the name of a district) also called the bridge of Shahristān, higher up the river. A fourth bridge called Pul-i Čūbī („wooden bridge") connected the two parts of the palace of Saʿādatābād.

The town was surrounded by a wall of earth, badly kept and encroached on by houses and gardens. This wall had eight gates, — formerly twelve —, but four were built up (see their names in [Dupré] *Voyage en Perse*, 1819, ii. 158). Iṣfahān was divided into two parts, Djawbāra and Dardasht, which were inhabited by the hostile factions of Niʿmat Allāhī and the Ḥaidarī. The Maidān-i Shāh, "Royal Square", is a long rectangle enclosed by a canal built of bricks coated with a kind of plaster called *khāk-i siyāh*, "black mortar"; behind it along its margin are ranged the houses which separate the square from the bazaar which surrounds it outside, as well as large buildings like the gateway of the royal palace, the mosque of the Ṣadr, the clockwork pavilion, the royal mosque in the south and the imperial market on the north. The centre of the square was marked by a tall pole used for target shooting and two great columns of marble used as goals for the game of polo (*čawgān*). The Royal Mosque (*Masdjid-i Shāh*), which is still in existence, completely covered with enamelled bricks, was built by Shāh ʿAbbās I at the end of the xvith century; it is one of the most beautiful buildings in the world. Shāh Ṣafī I covered its gates with silver. The mosque of the Ṣadr, also called the mosque of Fatḥ Allāh, is much smaller. The pavilion of the clock was built for the amusement of ʿAbbās II; it was a clock which struck with musical chimes at each hour of the day; a clockwork arrangement caused large marionettes fastened to painted

figures to move along the wall, as well as birds and other animals in painted wood. The imperial market (*kaiṣāriyya*) was, like the other buildings in this square, entered by a gateway covered with bricks of faience; the centre was surmounted by a dome. The finest stuffs were sold there. The royal palace also had an entrance on this square through a large gateway (*ʿālī ḳapy*, the many coloured gateway), always open, day and night, used as a place of refuge (*bast*). In the centre of the garden was the pavilion called the Pavilion of the Forty Pillars (*čihil sutūn*), although there are only eighteen of them; it consists of a hall and two rooms covering the royal throne; its walls were covered with paintings.

The Kārwān-serāi of al-Khurāsānī and that of Maḳṣūd ʿAṣṣār (the presser of oil), the palace of the *Ṣadr mawḳūfāt*, "superintendent of religious endowments", built by Rustum Khān, the Kārwān-serāi Ḥalīlī built by order of ʿAbbās II, the tower of Khwādja ʿAlam, usually called *Gulbār*, "laden with flowers", the Tower of the Horns, covered from top to bottom with heads of wild beasts with their horns, a memorial of great hunts, the citadel called Tabarak (Chardin, Ḳalʿa-i Tabarruk, "Castle of the Benediction") were the most beautiful monuments adorning the capital. The garden of Hazār Djarīb was formed of twelve terraces and fifteen avenues of trees, of which some were watered by a canal; pavilions and fountains completed the decorations.

The misfortunes of Persia during the Afghān conquest and the removal of the capital to Teherān under the Kadjārs ruined Iṣfahān. The Avenue of the Čahār Bāgh still exists, as well as the Madrasa-i Mādar-i Shāh, the "college of the king's mother", but many of the beautiful plane trees which adorned it were cut down and taken to Teherān for the building of the palace of Ẓill al-Sulṭān. The three bridges are in a good state of preservation. One can still see the Madrasa of Sulṭān Ḥusain, which dates from a little before the Afghān invasion, the palace of Hasht Bihisht, which belonged to Ṣārim al-Dawla, Ẓill al-Sulṭān's minister, and in the village of Gulādān, in the environs of Djulfa, the two *Minār-i djunbān*, "moving minarets" (explanation of the phenomenon in Mme Dieulafoy, *La Perse*, p. 278). The Maidān-i-Shāh has preserved its fairy-like aspect; in the evening and morning the royal musicians (tambourines and trumpets) still play in the *naḳḳāra khāna* opposite.

The poet Khāḳānī (vi = xiith century) devoted a long ode of 82 verses to the praises of Iṣfahān (*Kulliyāt*, ii. 522).

On the Armenian colony New Djulfa see the article DJULFA.

AL-IṢFAHĀNĪ, ABŪ BAKR MUḤAMMAD B. DĀʾŪD B. ʿALĪ. Born in 255 (868), this *faḳīh* succeeded his father at the age of 16 as head of the Ẓāhirī school (cf. DĀʾŪD B. KHALAF); he died in Baghdād in 297 (909). His juridical polemics against Ibn Suraidj, al-Nāshī al-Akbar, al-Ḥallādj and al-Ṭabarī are recorded, but what has made his memory endure is a work of his youth, the *Kitāb al-Zuhra* (ms. Cairo, *Fihr.*, iv. 260), containing in 50 chapters 5000 verses selected from the poets on "the aspects of love, its laws and variations" accompanied by personal notes in very elegant prose. He there expounds the Platonic conception of *amour courtois* (*ḥubb ʿudhrī*) with a grace which has never been surpassed. The friendship which linked him till his death to Muḥammad b. Djāmiʿ al-Ṣaidalānī, to whom this book is dedicated, has become famous (cf. Ibn Faḍl Allāh al-ʿUmarī, *Masālik al-Abṣār*, Vol. *fuḳahāʾ*, Ch. v., n. 7.; Brockelmann, *Gesch. d. arab. Litt.*, i. 520). (L. MASSIGNON.)

AL-IṢFAHĀNĪ. [See ABU 'L-FARADJ.]

ISFARĀYĪN, formerly a small fortified town in the N. E. Khurāsān, south of the Atrek, in the province of Naisābūr, five miles distant from this town. Its name, which is still given to the plain in which it was situated, is derived by popular etymology from *isparāyīn* "shield-like" on account of the custom of the

inhabitants of carrying shields, but it used to be called Mihradjān, a name which since the time of Yāḳūt has been given to a village in the vicinity. The citadel which defended it was called Ḳal'a-i Zar "fortress of gold"; in the great mosque, there was a vessel of brass 12 cubits (*gaz*) in circumference. The district produced excellent grapes; there were many rice fields there. The inhabitants were Shāfi'is and have produced a certain number of jurists. Sacked by the Mongols in 617 (1220) it was destroyed in the Uzbeg invasion a little before 1006 (1597). Its site is now represented by the ruins of Shahr-i Bilḳīs.

ISFENDIYĀR OGHLU, the name of a Turkoman dynasty, which founded the independent kingdom of Ḳasṭamūnī on the decline of the Saldjūḳ kingdom of Ḳōniya, at the end of the vii[th] (xiii[th]) century in N. W. Asia Minor, in the ancient Paphlagonia. The name is taken from that of the best known ruler of this dynasty, Isfendiyār Bey; in the xvi[th] century we find the name Ḳizil Aḥmedli, from Ḳizil Aḥmed, the brother of Ismā'īl Bey. The Byzantines called the Isfendiyār Oghlu "the sons of Amurias" or of Omur. The founder of the dynasty appears to have been Shams al-Dīn b. Yaman Djāndar, who held a grant of the district of Alṭās; he went to war with Mas'ūd II (681—697 A. H.), captured the town of Ḳasṭamūnī and in 690 A. H. (Münedjdjimbashi) was appointed

GENEALOGY OF THE ISFENDIYĀR-OGHLU.

- 1. Yaman Djāndār (for Yaman b. Djāndār?)
  - 2. Shams al-Dīn (= Sonḳor Bey Shemsī Pasha?)
    - 3. Shudjā' al-Dīn Sulaimān Pasha
      - 5. Ibrāhīm Pasha
      - 6. 'Alī Bey
      - 7. Nastratios (= Nāṣir al-Dīn?)
    - 4. Emir Ya'ḳūb
      - 8. 'Ādil Bey ('Alī)
        - 9. Bāyazīd Kötürüm (Valī)
          - 10. Sulaimān Pasha
            - 14. daughter, married to Murād I.
          - 11. Mubāriz al-Dīn Isfendiyār (reg. 795—843 A. H.)
            - 16. Ibrāhīm, reg. 843—847 A. H.
              - 21. Kamāl al-Dīn Abu 'l-Ḥasan Ismā'īl; reigned 847—864; in 844 A. H. married a daughter of Murād II.
                - 26. 'Othmān
              - 22. Ḳizil Aḥmad
                - 27. Meḥemmed, called Mīrzā, married a daughter of Bāyazīd II.
                  - 28. Shemsī Pasha
                  - 29. Muṣṭafā Pasha
              - 23. Khadīdja
            - 17. Ḳiwām al-Dīn Ḳāsim Bey, married (828 A. H.) a sister of Murād II.
              - 24. Iskandar, called Mīrzā Bey
            - 18. Khiḍir Bey
            - 19. Murād
            - 20. Ḥalīma, married 828 A. H. Sulṭān Murād II.
              - 25. Ḥasan, killed 855 A. H.
          - 12. Iskandar
          - 13. (daughter)
            - 15. Ḳara Yaḥyā

On this cf. the genealogy of Ismā'īl Bey in the *Ḥulefānāme-i Sulṭānī* in Rieu, *Catal. of Turkish MSS. in the British Museum*, p. 11, and that of Shemsī Pasha in Peçewī, ii. 10 *sqq.*; 4 perhaps the brother of Sulaimān Pasha, called al-Efendī by Ibn Baṭṭūṭa; the sons of Sulaimān Pasha, 5—7, in Ibn Baṭṭūṭa, ii. 340, 348, Shihāb al-Dīn, and Pachymeres, ii. 327 *sqq.*, 611; 8 according to Münedjdjimbashi, son of Sulaimān Pasha; 13 according to Sa'd al-Dīn, i. 192; another sister of Isfendiyār and her son is mentioned by Clavijo, p. 92, but without giving her name; 14 according to *Ta'rīkh-i Ṣāf*, i. 39 *sq.*; on 17 see Sa'd al-Dīn, i. 277 *sq.*, 284 *sq.*, 318 *sq.*, 320 *sq.*; Hamid Wahbi, p. 1330 *sq.*; on 18 Sa'd al-Dīn, i. 287; on 19 Sa'd al-Dīn, i. 318 *sq.*; 21, the epithet in Ferīdūn, i. 250; on his marriage with a daughter of Murād II: Dukas, p. 243; Sa'd al-Dīn, i. 343; on 25 cf. *Rom. Hist.*, p. 390 *sq.*; on 24 Hamid Wahbi, p. 1354; on 26 Sa'd al-Dīn, i. 474, 476.

governor of the districts seized by him by the Il-khān prince Kaikhātū. He seems to be identical with Sonḳor Bey Shamsī Pasha, who conquered Bolī according to Ewliyā, ii. 173. His son, Shudjāʿ al-Dīn Sulaimān Pasha (700—740 A. H.), at first acknowledged the suzerainty of the Ilkhāns, but afterwards made himself independent and conquered Sinope, which was still in possession of a daughter of Masʿūd II. He is mentioned in the Baṭṭūṭa (ii. 343 *sqq.*), Shihāb al-Dīn (*Not. et Extr.*, xiii. 340 and 361 *sq.*) and Abu ʾl-Fidāʾ (*Géographie*, ed. Reinaud, ii. 1, p. 35; 2, p. 142, 145)] Pachymeres, ii. 345 *sqq.* and 456 *sq.*, knows him by the name Σολυμάμπαξ. His successors were: his son Ibrāhīm Pasha; ʿĀdil Bey, son of the Emīr Yaʿḳūb and grandson of Shams al-Dīn (about 746 A. H.); Djalāl al-Dīn Bāyazīd, son of ʿĀdil Bey, called Kötörüm by the Ottomans, died 787 A. H.; Sulaimān Bey, son of Bāyazīd, from 787—795 A. H.; Sulṭān Bāyazīd I killed him and seized the land (according to *Rev. Hist.*, p. 389; the Ottoman chronicles make no mention of Sulaimān Bey and make Bāyazīd Kötörüm reign till 795 A. H.). Mubāriz al-Dīn Isfendiyār, son of Bāyazīd, was restored by Tīmūr in 805 A. H. He died on Ramaḍān 22 843 A. H. About 820 A. H. he had to cede the towns of Tosia, Kiangri and Ḳalʿedjik and the district of Ḳōsh to Meḥemmed I and later the rich copper mines to Murād II; Ibrāhīm, son of Isfendiyār, 843 — beg. 847 A. H.; Ismāʿīl, son of Ibrāhīm; was deposed by Sulṭān Meḥemmed II at the instigation of his brother Ḳizil Aḥmad in 864 or 865 A. H. and died in Philippolis, which was allotted to him as a residence by the Sulṭān. He was the author of a widely circulated book, *Hulāṣatüʾl-Sulṭānī*, on the ritual prescripts of Islām. His brother Ḳizil Aḥmed fled to Uzun Ḥasan after the confiscation of Ḳasṭamūnī, returned to Constantinople after the death of Meḥemmed II, and was honourably received by Bāyazīd II; his son Mīrzā Meḥemmed married a daughter of the Sulṭān and his grandsons Shemsī and Muṣṭafā Pasha filled high offices under Selīm II and Murād III; Shemsī Pasha in particular had great personal influence as the confidant (*muṣāḥib*) of Murād III. He fabricated a genealogy of the "Ḳizil Aḥmedlu Isfendiyār-Oghlu" which went back to Khālid b. al-Walīd, and invented the name Ḳizil Aḥmedlu for the dynasty of Isfendiyār-Oghlu. Descendants of this family still exist and, when at the beginning of the xiith century it was feared that the Ottoman ruling house might become extinct, the Ḳizil Aḥmedlu were considered amongst others as possible claimants to the throne on account of their frequent marriages with relatives of the Sulṭāns.

(J. H. MORDTMANN.)

ISFĪD DIZ. [See ḲALʿAT SEFĪD.]

ISḤĀḲ, the Biblical Isaac, whose birth, according to the Talmud (*Kitāb ʿarāʾis al-madjālis*, p. 11), took place at the feast of Passah and, according to Muslim tradition, in the night of ʿĀshūrā (al-Thaʿlabī, p. 60 and al-Kisāʾī, p. 150), was promised to his father Ibrāhīm a year previously by Allāh (also in *Gen. R.* 45). Ibrāhīm was in the habit of eating only when the poor and hungry shared his meals. On one occasion fifteen (al-Thaʿlabī, p. 48) or three (al-Kisāʾī, p. 146) days happened to pass without a guest appearing. Three strangers then appeared before whom he set a roasted calf. But they did not touch it (Ḳurʾān, xi. 73). They said "We eat nothing without paying its price". He said "The price is that you should utter a blessing before and after the meal" (al-Thaʿlabī, *l. c.*; *Gen. R.* 54). They then foretold to him the birth of a son. Sāra laughed at this, as she was 90 and Ibrāhīm 120 years old. The latter said: "Then he shall be sacrificed as an offering to God!" (These features probably have their origin in the accounts in the Midrash [*Gen. R.* 53; *Tanchuma Gen.* 40]). When seven years old, Isḥāḳ visited the sacred place. Ibrāhīm then received in a dream the order to make a sacrifice to God. In the morning he sacrificed a bullock and divided its flesh among the poor. In the night the voice again said to him: "God demands a more valuable offering". He killed a camel. In the following night the voice said: "God demands thy son as an offering". Ibrāhīm awoke in horror and said: "O my son, I saw in a dream that I must sacrifice thee" (Ḳurʾān, xxxvii. 101). The latter replied: "Father, do what was ordered thee. Thou wilt find me a patient person, if God will" (102). Taking a knife and a rope they went together to the mount. Isḥāḳ said: "Father, take my shirt from my body, lest my dear mother find blood upon it and weep for me. Bind me firmly, so that I do not move, and look away while sacrificing me, lest thou lose thy courage" (al-Kisāʾī and al-Thaʿlabī, *l. c.*, following *Gen. R.* 56; cf. also *Sifre ha-yāshār*, *Wayyērā* and *Pirḳē de R. El.* 31). "May God comfort thee for my loss! Give my mother my shirt that it may comfort her and do not tell her how thou didst sacrifice me. Never look at boys of my age, lest grief overwhelm thee!" Ibrāhīm directed the knife against the throat of his son but three times it slipped and glanced aside. Then a voice called to him: "Ibrāhīm, Thou hast satisfied the vision" (Ḳurʾān xxxvii. 105). Then a ram appeared, which said it had been the offering of Hābīl and had hitherto been in Paradise; it was offered as a sacrifice (*Aboth* V; *Pirḳē de R. El.* 32, and al-Kisāʾī). When a rumour arose that Isḥāḳ was a foundling adopted by Ibrāhīm, God gave father and son the same figure so that they were very like one another. But Ibrāhīm was grey (*Baba M.* 87; *Gen. R.* 53; al-Kisāʾī, p. 152).

As the Ḳurʾān verse above quoted does not state, which son was to have been sacrificed, many Muslim theologians refer the intended sacrifice to Ismāʿīl (al-Zamakhsharī and al-Baiḍāwī on the passage; al-Ṭabarī, i. 291; Ibn al-Athīr, i. 88; al-Thaʿlabī, p. 55—58; al-Kisāʾī, p. 150). But it must be said that the oldest tradition — al-Thaʿlabī expressly emphasises the "Aṣḥāb and Tābiʿūn", i. e. the Companions of the Prophet and their successors from ʿOmar b. al-Khaṭṭāb to Kaʿb al-Aḥbār — did not differ from the Bible on this question.

Bibliography: al-Zamakhsharī, i. 224; al-Baiḍāwī, i. 233; al-Thaʿlabī, *Ḳiṣaṣ al-Anbiyāʾ* (Cairo 1312), p. 48—60; al-Kisāʾī, *Ḳiṣaṣ al-*

Anbiyā', p. 136—140; al-Ṭabarī, ed. Leyden, i. 272—292; Ibn al-Athīr, i. 87—89; Grünbaum, *Beiträge*, p. 110—120; Eisenberg, *Abraham in der arab. Legende*, 1912, p. 30—33; *Encyclop. Hebrew*, New-York, v. 18, s. v. Isak. (J. EISENBERG.)

ISḤĀḲ B. ḤUNAIN B. ISḤĀḲ AL-'IBĀDĪ, ABŪ YA'ḲŪB, the son of Ḥunain b. Isḥāḳ [q. v.], a physician and philosopher, but more important as the translator of Greek, mainly philosophical and mathematical works into Arabic. He was in great favour with the caliphs al-Mu'tamid and al-Mu'taḍid and the vizier of the latter, Ḳāsim b. 'Ubaid Allāh. He died in Rabī' II 298 or 299 (Nov. 910 or 911) in Baghdād. Of his most important translations we may mention the *Elements* of Euclid, afterwards improved by Thābit b. Ḳurra, his *Data*, the *Almagest* of Ptolemy, also improved by Thābit, Archimedes' books On the sphere and cylinder, Menelaus' *Sphaerica*, Plato's dialogue *Sophistes* with the commentary of Olympiodorus, the *Categories* of Aristotle, his *Topics*, *Hermeneutica* and *Rhetorica*, *de Coelo et Mundo*, *de Generatione et Corruptione*, a part of the *Metaphysics*. Of these translations the following has been edited: — *Aristotelis Categoriae cum versione arabica Isaaci Honeini et variis lectionibus textus graeci e versione arab. ductis* a J. Th. Zenker, Lipsiae 1846. — Into the question, which of these translations were made from the Syriac and which direct from the Greek, we cannot enter here, but refer the reader to the *Bibliography*. In the case of several of these translations there are still doubts as to whether they are by Isḥāḳ or his father Ḥunain.

Übersetzgn. aus d. Griech.* (*Centralblatt f. d. Bibliothekwesen*, Beiheft 12, Leipzig 1893), p. 16—102, and *Ztschr. d. Deutsch. Morgenl. Gesellsch.*, l. 161—219 and 337—417; Brockelmann, *Gesch. d. arab. Litt.*, i. 206; Suter, *Abhandlgn. z. Gesch. d. math. Wissensch.*, x (1900), 39. (H. SUTER.)

ĪSHĀN, Persian pronoun 3rd pers. plur. The word is used in Turkestān in the meaning of *shaikh*, *murshid*, *ustādh*, *pīr*, teacher, guide [see DERWĪSH i. 950a], in contrast to *murīd*, adherent, pupil. When the term first appears has still to be investigated; it certainly existed in the middle ages; the celebrated Khodja Aḥrār (died 895 = 1490 in Samarḳand) is always called *īshān* in his biography. The rank of *īshān* is frequently transmitted from father to son. The *īshān* lives with his followers in a dervish monastery (*khānaḳāh*, in Central Asia pronounced *khonaka*), sometimes also at the tomb of a saint. Most *īshān*'s make journeys from time to time into the steppes, where they have more adherents among the Kirgiz and receive richer presents than from the settled population. Greater attention was attracted to the *īshān*'s by a rebellion stirred up by an *īshān* in Farghāna in 1898; but the literature on the subject is still extremely scanty. Cf. J. Geijer, *Materiali i izsledovanija otnositel'no musul'manskago naselenija Turkestanskago kraja. I. Ishani* (*Sbornik materialov dlja statistiki Sir-Dar'inskoi oblasti*, Vol. i.); *Sbornik materialov po musul'manstvu*, St. Petersb. 1899; Sattar-Chan, *Musul'manskie ishani* (*Pravoslavnij Sobesednik*, Sept. 1895, and later N. P. Ostroumov, *Sarti*, 2nd. 3e, Tashkent 1908, p. 206 *sq.*); Prince V. Masal'skij, *Turkestanskij krai*, St. Petersb. 1913, p. 355 *sq.*; Fr. v. Schwarz, *Turkestan*, Freiburg in Breisgau 1900, p. 198. (W. BARTHOLD.)

AL-**ISHRĀḲIYŪN** (scil. al-Ḥukamā') i. e. the adherents of the *Ḥikmat al-Ishrāḳ* or *mushriḳiyya* (read by many, e. g. Pococke, Munk, Renan, as *mushraḳiyya* = eastern). The name is given especially to the disciples of al-Suhrawardī (died 1191) but the name and the matter are older. On the name cf. ḤIKMA; it is really a question of the syncretic philosophy of Hellenism, which reached the east from Neo-Platonic, Hermetic and allied sources and was there amalgamated with old Persian and other speculations. It is a spiritualistic philosophy with a mystical theory of knowledge. God and the world of spirits are usually interpreted as light and our process of cognition as an illumination from above through the intermediary of the spirits of the spheres. The following are regarded as particular authorities for this doctrine: Hermes, Agathodaemon, Empedocles, Pythagoras, etc., and Plato more than Aristotle (at least the genuine one). These authorities are often described as prophets or inspired sages. From the beginning to the present day, this philosophy of revelation has influenced Muslim philosophy to a great extent. The so-called Peripatetics in Islām are in part under its influence, Ibn Rushd perhaps least of all.

AL-**ISKĀFĪ**, ABŪ ISḤĀḲ MUḤAMMAD B. AḤMAD [or IBRĀHĪM] AL-ḲARĀRĪṬĪ, al-Muttaḳī's vizier. In 323 (934—935) he is mentioned as secretary to Muḥammad b. Yāḳūt, chief of police in Baghdād, and in Shawwāl 329 (June—July 941) the Caliph gave him the office of vizier, but after only six weeks, in Dhu 'l-Ḳa'da (July—Aug.) of the same year, the Amīr al-Umarā' Kūrtekīn dismissed him. Some time after Kūrtekīn's fall he received his rank again but could only hold it for 40 days. In Shawwāl 330 (June—July 942) he was again given the same office and after he had held it for 8 months 16 days, the Ḥamdānid Nāṣir al-Dawla [q. v.] dismissed him.

(K. V. ZETTERSTÉEN.)

AL-**ISKANDAR**, ALEXANDER THE GREAT (the Arab authors usually see the Arabic article in the first two letters of the name). In the Muhammadan accounts of the world-conqueror there are here and there echoes of genuine historical tradition but as a rule we have to deal with legendary tales, which originate in the romance of Alexander (see the article ISKANDAR-NĀMA below) and were considerably extended and embellished by later writers. We confine ourselves here to giving in its broad outlines what the older Arab historians relate on the subject. In the first place it should

be noted that Alexander's genealogy is artificially made up in various ways as may be seen from Friedländer's *Die Chadhirlegende und der Alexanderroman*, p. 294 *sqq*. As a rule, however, the name of his father Philip is correctly given, frequently in the form Fīlḳūs, Failaḳūs or otherwise corrupted, as well as that of his mother Olympias (also almost always in a corrupt form); some authorities even give the name of his grandfather Āmintas or Āmintās. Even in the earliest historians however we find also the view, which owes its origin to Persian national pride, that Alexander was not the son of Philip, but of Dārāb (Dārā al-Akbar) so that he was the half-brother of Dārā (Dārā al-Aṣghar), the last Persian king. It is said that, when Philip was conquered by Dārāb and had to pay a yearly tribute in golden eggs, his daughter, who is given the name of Halai (otherwise in Firdawsī) to get a fantastic etymology for the name Alexander, was married by Dārāb but on account of her repulsive odour was at once repudiated by him and sent back to her father. They endeavoured in vain to cure her defect by a medicine called *sandarūs*; when the princess bore a son, he was called Alexandros after the name of his mother and that of the medicine. The boy was brought up at the court of his grandfather; his tutor was Aristotle, and after Philip's death he succeeded him. Alexander soon omitted to pay the tribute and, when his half-brother, who had in the meantime become king of Persia, demanded it Alexander sent the messenger home with the answer that he had killed and eaten the hen which laid the golden eggs. We omit here the story of the symbolic gifts which Dārā sent to Alexander and Alexander's reply, although it is found as early as al-Ṭabarī i. 699. Alexander then prepared for war, collected a great army and went first of all to Egypt, where he founded buildings (see AL-ISKANDARĪYA). In the meanwhile Dārā also had assembled his troops and Alexander advanced against him, until the two armies met on the Euphrates where a sanguinary battle took place (its site is also placed elsewhere), in which Alexander was victorious, Dārā fled, but was treacherously wounded to death by two of his own people who sought thereby to gain the favour of Alexander. According to some accounts, several encounters took place between Alexander and Dārā but in the end the result was the same and Alexander met his dying foe. The latter recommended his wife to his care and asked him to see to the punishment of the murderers and to other matters; in particular he expressed the wish that Alexander should marry his daughter Rawshang (Roxana). Alexander promised to fulfil his requests and ordered Dārā's obsequies to be carried out in regal fashion. As a result of his marriage with Rawshang he now acted as the legitimate ruler of Persia, ordered the affairs of the government, and advanced on India to conquer Fūr (Porus), who was allied with Dārā. He had a fierce battle with Porus and only succeeded in disposing of him by rendering his elephants innocuous by stratagem and finally overcoming his opponent in single combat. Another Indian king, named Kaid, submitted to him voluntarily and sent him four valuable gifts (a virgin of wondrous beauty, a vessel which never became empty, a physician and a philosopher who could answer every question). He then took an interest in the Brahmans (gymnosophists) and had a conference with them in which he put various questions which they answered. After thus becoming acquainted with India he began his expeditions throughout the whole world, which are however usually but briefly mentioned by the historians. After India, came China and Tibet (Dīnawarī mentions the meeting with Candace) and finally he went to the Land of Darkness and met Khiḍr (Khaḍir). The historians apparently knew a great deal about all this, but they omit to narrate it, either because they thought that it was not the contemporary of Dārā but an older Dhu 'l-Ḳarnain who was the real hero of these incidents, or for other reasons. We shall deal with this question below: here it is sufficient to say that Alexander finally died on his return to Persia at Shahrazūr or in Bābil, according to al-Dīnawarī, in Jerusalem, at the age of 36, after reigning 13 or 14 years (many other figures are also given). According to some accounts, he died from poison and having a presentiment of his approaching end, sent a letter of consolation to his mother in Alexandria. The corpse was placed in a golden sarcophagus, over which the philosophers spoke in turn and in brief speeches emphasised the vanity of earthly greatness. The sarcophagus was taken to Alexandria and buried there in a tomb, which, according to al-Mas'ūdī, still existed in 322 (964).

Among Orientals, Alexander is not only the world-conqueror and founder of cities — he is said to have founded 12, all called Iskandarīya —, but the hero who reached the ends of the earth (cf. I. Macc. i. 3). It was not lust of conquest but the thirst for knowledge that was his motive. Philosophers therefore accompanied him everywhere and the wonders of nature and enigmatical problems attracted his special interest. Mubashshir b. Fātik and al-Shahrazūrī, quoted by Mīrkhwānd, therefore deal with Alexander in their biographies of Greek philosophers. Cf. Meissner in *Zeitschr. der Deutsch. Morg. Gesellsch.*, xlix. 583 *sqq*. At the same time he appears as the champion of the true faith, because his epithet, Dhu 'l-Ḳarnain, which is variously interpreted [cf. i. 961ᵇ *sq*.] led to his being identified with the prophet of the same name mentioned in Ḳur'ān xviii. 82 *sqq*. This is however not approved of by all expositors; the majority distinguish an earlier and a later Dhu 'l-Ḳarnain; the latter is thus identical with Alexander. For further details and the peculiar confusion with Mūsā in Ḳur'ān xviii. 59 *sqq*. see the articles KHIḌR (Khaḍir) and YĀDJŪDJ WA-MĀDJŪDJ. The connection indicated by Lidzbarski, Meissner and others of these stories with very ancient Oriental ideas and myths (Gilgamish epic) will there be dealt with.

Bibliography: All universal histories deal with Alexander so that we need here only mention the older Arab historians: al-Ya'ḳūbī, ed. Houtsma, i. 96, 161 *sqq*.; al-Dīnawarī, ed. Guirgass, p. 31 *sqq*.; al-Ṭabarī, ed. Leiden, i. 693 *sqq*.; al-Mas'ūdī, ed. Paris, ii. 250 *sqq*., Eutychius, ed. Pocock, p. 281 *sqq*.; al-Tha'labī, *'Arā'is*, ed. Cairo 1314, p. 203 *sqq*., etc. Cf. also the references given in the article ISKANDAR-NĀMA.

ISKANDAR AGHĀ. [See ABKHĀSIA.]

ISKANDAR BEG [See SCANDERBEG.]

ISKANDAR BEG MUNSHĪ, was born about 968 (1560). After following the profession of an accountant for a time, he devoted himself to acquiring the art of composition, in which he soon became proficient and was appointed a *Mun-*

shî to Shâh ʿAbbâs I (996—1038 = 1587—1628). He was by the side of Wazîr Iʿtimâd al-Dawla at the time of his sudden death during the siege of Urmia, 1019 (1610). Abû Ṭâlib Khân, the son and successor of the Wazîr, was his patron. He died 1038 (1628).

He is the author of *Târîkh-i ʿÂlam Ârâ-i ʿAbbâsî*, a detailed history of the reign of Shâh ʿAbbâs I with accounts of his predecessors. Extracts from this work have been published by Dorn, *Muh. Quellen zur Gesch. der südl. Küstenl. des Kasp. Meeres*, iv. 238—374. Lithogr. Teherân 1314.

Bibliography: *Mirʾât al-ʿÂlam*, fol. 483; *Journal Asiatique*, v. (1824), 86—89; Morley, *A descr. Cat.* etc., p. 133; v. Erdmann, *De Manuscripto Iskenderi Monschii* etc., Casan, 1822; do., *Iskender Munschi u. sein Werk* in *Zeitschr. der Deutsch. Morgenl. Gesells.*, xv. 457—501; Rieu, *Cat. of Pers. Mss. Br. Mus.*, p. 185; *Grundr. der Iran. Philol.*, ii. 361.

(M. Hidayet Hosain.)

ISKANDAR KHÂN, a Shaibânid, ruler of Mâ-warâʾ al-Nahr, 968—991 (1561—1583). During his reign the authority was really exercised by his son ʿAbd Allâh [q. v. i. 25], who in Shaʿbân 968 (Apr. 17 — May 15, 1561) had declared his uncle Pîr Muḥammad, prince of Balkh, deposed and had his father Iskandar proclaimed Khân of all the Uzbegs. Iskandar himself like his father and grandfather was a weak-minded man; according to Abu 'l-Ghâzî (ed. Desmaisons, p. 183), the Khân had only two good qualities: he observed with painful exactitude all prescribed (*farḍa*) and recommended (*nâfila*) prayers and was unrivalled in his skill in falconry. He died on Wednesday 1st Djumâdâ II 991 (22nd June 1583); in one of the chronograms made on the occasion of his death he is called "prince of dervishes" (*pâdishâh-i darwîshân*).

For the *Bibliography* of the events of this period see the article ʿABD ALLÂH, i. 25.

(W. Barthold.)

ISKANDAR-NÂMA, the Romance of Alexander. The Ḳurʾân, Sûra xviii., gives evidence of the early acquaintance of the Muhammadans with the romance of Alexander (Pseudo-Callisthenes). What is there (vs. 59 *sqq.*) related of Mûsâ is really taken from this story. This is not the place to discuss the earlier history of this romance. For this see Nöldeke, *Beiträge zur Gesch. des Alexanderromans* (*Denkschr. der Kais. Akad. der Wiss.*, Vienna, xxxviii) and the older works quoted there.

According to this investigator, the source of the Syriac and Arabic tales of Alexander is to be sought in an original Pahlavi recension which, according to Fraenkel, *Zeitschr. der Deutsch. Morg. Gesellsch.*, xlv. 319, may have been written by a Christian of Syrian nationality who wrote in Persian. The oldest Arab accounts in the Ḥadîth have been collected by Friedlaender in *Die Chadhirlegende und der Alexanderroman*, p. 67 *sqq.*; and the oldest Arab historians have been mentioned in the preceding article. Later versions in Arabic are also discussed by Friedlaender, *op. cit.* The oldest poetic version of the Alexander saga in Persian is from the pen of the celebrated poet Firdawsî and is briefly analysed by Spiegel, *Die Alexandersage bei den Orientalen*. Another version was composed by Niẓâmî, also briefly discussed by Spiegel, *l. c.* On the works on the subject by Ethé, Bacher and Clarke, see the article NIẒÂMÎ. Amîr Khusraw [q. v.] and Djâmî [q. v.] have also dealt with this subject. A Persian prose romance is mentioned by Rieu, *Cat. Pers. Mss. Brit. Mus.*, p. 568, and Pertsch, *Verzeichn. Berlin*, N°. 1033—1036.

A little known version in Eastern Turkî we owe to the celebrated Mîr ʿAlî Shîr [see NEWÂʾÎ]. The Ottoman Turkish version by Aḥmedî [q. v.] is based on the Persian of Firdawsî (see Gibb, *A History of Ottoman Poetry*, i. 203 *sqq.*). A similar work by Fighânî [q. v.] is also mentioned (Gibb, *op. cit.*, iii. 36).

On the Indian adaptations cf. Garcin de Tassy, *Litt. Hind. et Hindoustanie*², i. 494, ii. 431, iii. 473; J. F. Blumhardt, *Cat. of Hindustani printed Books in the British Museum*, mentions a *Sikandarnâma-i Sikandarî* by Gokulaprasâda (p. 102ᵃ) and a versified *Ḳiṣṣa-i Sikandar* by Djamâl al-Dîn (p. 147ᵃ). The Malay, Javanese and Buginese tales of Alexander are fully described in Vreede, *Cat. van de Javaansche en Madoereesche Hss.* (Leiden), p. 32 *sqq.*; H. H. Juynboll, *Cat. van de Maleische en Sundaneesche Hss.* (Leiden), p. 194 *sqq.*; and v. Ronkel, *Cat. van de Mal. Hss.* (Batavia), p. 355 *sqq.* See also the article *Alexander de Groote* in the *Encyclopaedie van Nederlandsch-Indië*, 2nd ed., i. 29 *sq.* ('s-Gravenhage—Leiden 1917).

Bibliography: In so far as it is not given in the article, it is most fully given in Friedlaender's book. Cf. also Chauvin, *Bibliographie des ouvrages arabes*, vii. 79 *sqq.*

al-**ISKANDARÎYA**, occasionally al-Askandarîya, often Sikandarîya, Alexandria, the principal seaport of Egypt, in Ptolemaic times the second city of the world, now among the most important trade centres of the Mediterranean, with a population of nearly 400,000 including a strong foreign element, is situated at the Western angle of the Delta in latitude 30° 11′ N. and longitude 29° 51′ E. It was founded in 332 B.C. by Alexander the Great. When it came into the hands of the Arabs, it was the capital of Egypt and, though its glory had diminished, it was still a great and splendid town. Under Muhammadan rule it declined to the verge of utter ruin. Its revival dates from the beginning of last century. The present Alexandria is almost entirely modern and needs no description here. It covers the site of mediaeval Alexandria, of which nothing is left but the most scanty remains.

Topography. The port of Alexandria is formed by a peninsula, consisting originally of an island, called Pharos, joined to the mainland by a mole or causeway seven stadia long and known for that reason as the Heptastadium. On the north eastern point of the island stood the Pharos, the great lighthouse built by Ptolemy Soter. This famous building, prototype of all our lighthouses and generally acknowledged to have been one of the wonders of the world, survived the Arab conquest by several centuries. The Arab writers call it the *manâra* or *manâr*. Their accounts show that it consisted of a large and lofty structure of white stone, square in plan and massive in frame, above which rose a pile of brick and plaster in the form of an octagonal tower, tapering into a round tower towards the top, with a dome at the summit; they differ greatly as to its height. There are records of the Pharos having been damaged by earthquake and having been repaired on various occasions in the Muhammadan period. A

large part of it fell in 724 (1324), but some portion seems to have been standing a century later. Soon afterwards it had collapsed entirely and in 882 (1477) the present Fort Pharos was built by Ḳā'it Bāy [q. v.] on its ruins. The harbour to the east of the peninsula was originally the principal harbour of Alexandria, and (contrary to what is sometimes stated) was the one generally used in Muhammadan times. Even up to the middle of the xvii[th] century the western harbour was resorted to only by galleys, but later it came into use for trading ships, though Christian vessels were not admitted to it until 1803. The Heptastadium broadened in the course of time by the accumulation of silt from being quite narrow into an isthmus, some three-quarters of a mile in width; it was vacant of buildings in the middle ages. The town lay to the south, covering an oblong area of about 3 km. by one km. Its walls remained in existence till 1811. They consisted of an outer wall some 20 feet high, backed in most parts of the circuit by a thicker and higher inner wall distant some 20 to 25 feet from it; both inner and outer walls were flanked by frequent towers. A further defence was afforded by a moat or ditch designed to be filled from the Nile in case of need. The town had four gates: Bāb al-Baḥr leading to the Heptastadium, Bāb Rashīd, Bāb al-Sidra at the beginning of the road to al-Maghrib and Bāb al-Akhḍar leading to the cemetery. The walls had been repaired in the reign of Baibars [q. v.] and again in 703 (1303) after an earthquake, in which 17 of the towers had been thrown down; al-Ghūrī also repaired the towers during his reign. The whole system was a curious specimen of mediaeval fortification. It is not possible to say for certain when it was built. A solitary remnant was the so called Tour des Romains, which recently stood near Ramla railway station.

Statements by Arab writers of the ix[th] to xiiith centuries, when pieced together, give a general description of the town itself. It was laid out on a regular plan; eight straight streets intersected eight others at right angles, producing a chess board pattern with direct and continuous thoroughfares, a marked contrast to the meandering roads and blind alleys usual in Eastern towns. The streets were colonnaded, columns were used in most of the buildings; many of the columns were marble. Marble was abundant in the buildings and was employed also in paving some of the highways. There was a market street, a league (so it is said) in length, all built of marble, both its walls and floor. The columns and stones were often of prodigious size and enormous blocks were poised at great heights. Much variety and beauty of colour and fine workmanship were displayed. For instance, pillars like emerald and others resembling onyx are mentioned, all of the highest polish and finish. In the inside of the town there were gardens (*bustān*) and sycamores. A remarkable feature was that the houses were built on vaults supported by columns, rising above one another in as many as three tiers. The object of this subterranean architecture was to provide cisterns for the storage of water, which was derived from the Nile, and also from the rain, for Alexandria has a fairly considerable rainfall in winter. Materials for reconstructing the plan of the town are quite insufficient. The monuments and buildings noticed may be divided into three classes. In the first, those which dated back to ancient times, there come Pompey's pillar or the column of Diocletian (*'amūd al-sawārī*), the one important ancient remain still standing in its place; Cleopatra's needles (*al-misallatān*), the two well known obelisks removed in recent times, one to London and the other to America; the Caesarium, a most famous edifice, originally a temple and afterwards the patriarchal church or cathedral, which appears to be mentioned once under the name of al-Ḳaisariya and is probably to be identified with Kanīsat Asfal al-Arḍ, alluded to as a wonder; the remains of the still more famous Serapeum, consisting of a forest of columns known as Sawārī Sulaimān, many of which were still standing in position in the xiii[th] century; a magnificent dome called Ḳubbat al-Khaḍrā', spoken of by several writers; a colossal brass statue known to the Arabs as Sharāḥīl, which stood on a rock in the sea; its foot was as long as the utmost stretch of a man lying down at full length; this statue was melted down in the time of al-Walīd. In the second category come the churches, buildings but rarely alluded to by Muhammadan writers. Besides the patriarchal church referred to above, which was dedicated to St. Michael, there were two churches of St. Mark, a church of St. John, a church of Al-Sūṭīr (the Saviour), churches of St. Cosmas and St. Damian, St. Mary Dorothea, St. Faustus, St. Theodore, St. Athanasius, a Greek church of St. Saba. The list might be extended, but as a rule little more is known of the churches than their names, though one or two of them are described as beautiful or highly ornamented. The great church of St. Mark, which contained the tomb of the saint, was situated a short distance within the Eastern gate on the right hand of one entering. The shrine was known in the xvi[th] century. Whether the modern church of St. Mark occupies the same site does not appear, but it seems that none of the existing churches, even if they mark the site of old ones, preserve any features of interest. There are instances of churches having been built at Alexandria in Muhammadan times; on the other hand, some were destroyed in popular commotions or deliberately demolished and some were converted into mosques. The third class of buildings consists of additions made by the Muhammadans. In it may probably be placed the citadel (*ḥiṣn*), described as strong and swept by the sea from the west, whence it would seem that it was situated at the north west corner of the town. It was in existence as early as the viii[th] century. An ancient citadel, presumably pre-Muhammadan, which was in being in the x[th] century, contained a government house (*dār al-imāra*), built by one of the early Arab governors. The Mamlūk sulṭāns had a similar house (*dār al-sulṭān*), which was situated on the sea-shore and contained many columns of variegated marble and had courts paved with marble, — some ancient palace reserved for their use, but rarely, if ever used. One reads of a *ḳā'a* or hall of al-Mu'aiyad. There was an arsenal or armoury "sufficient to equip the people of Egypt". The places of worship included an oratory or *muṣallā*, which, as at Fusṭāṭ, had fallen into ruin within a couple of centuries of the conquest. There was a mosque attributed to 'Amr b. al-'Āṣ [q. v.], but whether it stood on the same site as the present mosque

of ʿAmr seems doubtful. The second principal mosque, the western mosque or mosque of the Septuagint, also known as the mosque of the 1001 columns, had been a monastery up to the end of the ixth century, and seems to have been converted into a mosque between this time and the middle of the xth. A large mosque "built" by Badr al-Djamālī (q. v.) in 477 (1084) is presumably represented by the existing Djāmiʿ al-ʿAṭṭārīn, which would seem to be identical with the mosque and former church of St. Athanasius. Ibn Ṭūlūn built a mosque on the Pharos. Early shrines were a mosque of Mūsā near the Pharos, mosques of Sulaimān, of al-Khiḍr, and of Dāniyāl, still in existence — one notes the Jewish association of these names —; of Dhu 'l-Karnain or Alexander, and the mosque of al-Raḥma, marking the spot where ʿAmr stopped the slaughter when he entered Alexandria the second time.

In the xivth century, Alexandria is described by a European traveller as "exceeding beauteous and strong" and "exceeding clean" and "carefully kept". In 1507, according to another, there was "nothing to be seen but a prodigious heap of stones" and "it was rare to see a continuous street"; in 1634, the town was "almost nothing but a white heap of ruins". There is mention of many houses of Jews on the Heptastadium in (about) 1580, built there "in respect of the air", the earliest allusion, it seems, to habitations on the peninsula. The scanty remnant of the population concentrated there not long after, forming "a new city of very mean appearance" and leaving the town within the walls almost entirely deserted. Enough has come under European observation fully to prove the former splendour of Alexandria. At the present moment the principal remains, apart from the column of Pompey, are a few of the cisterns.

Alexandria was joined to the Nile by means of a long canal. This work had a tendency to silt up and, instead of being kept open by regular clearing, it was allowed from time to time to become more or less thoroughly blocked and then it was re-excavated. Occasionally after re-digging, it was open to traffic all the year round, but as a rule only for a part of the year. In 1800, the navigable period was only about 20 days. Sometimes communication by water was cut off altogether and the people of Alexandria had to depend on their cisterns for their drinking supply. In the earlier part of the Muhammadan period, the canal left the river at Shābshīr. In the xith century an alternative waterway from the Nile below Fūwa, through the lakes of Idkū and Abū Ḳīr to the neighbourhood of Alexandria, came into use. Al-Nāṣir in the xivth century either improved or reconstructed this channel, the original canal from Shābshīr being abandoned. Various lesser alterations took place subsequently. The damage resulting from the neglect of the canal can be easily understood. It is one of the reasons why the surroundings of Alexandria had become, generally speaking, a desolate waste at the beginning of the xixth century. Maryūṭ was once busy and thriving and the progress of its gradual decline can be traced. Buḥairat al-Iskandariya, identical with the now dry lake of Abū Ḳīr, has alternated between water and dry land more than once in the Muhammadan epoch.

History. When Alexandria was surrendered to the Arabs in 21 (642), a considerable number of Greeks took advantage of the terms of the capitulation and left it, abandoning their homes. The Arabs on taking possession did not molest the inhabitants. The well known story of the burning of the great library by order of the Khalīfa ʿUmar, which belongs to this time, cannot be accepted as true. On their re-entry into Alexandria after the invasion of Manuel in 25 (645), the Arabs revenged themselves on the inhabitants by a massacre; churches were burnt and the town walls, it is said, were thrown down. In the first century of the Hidjra, Alexandria was of great importance to the Arabs as a naval station. Hence, no doubt, the rapid increase in the number of its garrison, part of which was drawn from Madīna, and the frequency of visits by the Umaiyad governors of Egypt. The Arab occupation at first was purely military. An Augustal was in office late in the century, a sign that the civil administration continued unchanged for a long while. When the last of the Umaiyad khalīfas fled to Egypt, al-Aswad, a grandson of ʿUkba b. Nāfiʿ, declared for the ʿAbbāsids at Alexandria. His followers included 30.000 Muslims of Buḥaira and Maryūṭ. This host, however, was dispersed by a detachment of 500 troops sent to Alexandria by Marwān; the Khalīfa's men entered the city and there was slaughter there again. The ʿAbbāsids rewarded al-Aswad with grants of lands at Alexandria, which seem to have been Umaiyad possessions previously. In the course of the struggle between al-Amīn and al-Maʾmūn, Alexandria was contended for by the Arab tribes of Lakhm and Mudlidj. A band of Arab adventurers or pirates from Spain, who happened to be in the port, took advantage of the opportunity to seize the town and managed to hold it against all comers for 16 years (196—212 = 811—827). Four or five sieges occurred during their tenure and, although there are not many details, it is clear that it was a period of tyranny, misrule and excesses, and altogether most disastrous to Alexandria. At this time a band of religious revolutionary fanatics styling themselves Ṣūfīs come into view. There are some signs of similar associations at Alexandria more than a century earlier. Al-Mutawakkil (not Ibn Ṭūlūn) built the walls of Alexandria in 244 (858), for fear of attacks by the Greeks. If these walls were the origin of the walls of 1800 — which is not proved — the town had already become reduced to half the size it had been at the conquest. But little appears during the next two centuries. Alexandria was occupied two or three times by the Fāṭimids (q. v.) before they achieved the conquest of Egypt. A notable event of the Fāṭimid period was the transfer of the Coptic patriarchate from Alexandria to Cairo. For a while during the slave revolt (about 460 = 1067) Alexandria was in the hands of the blacks. It was the centre of revolts in 479 and in 487 and on each occasion was taken by siege. A descent by Sicilian Normans on Alexandria in 550 (1155) is mentioned. Amaury, King of Jerusalem, in conjunction with Shāwar and forces of Egypt and aided by the Pisan fleet, besieged it in 562 (1166), when it was occupied by a Syrian garrison, which included Saladin himself. A formidable Sicilian attack on Alexandria in 569 (1173) was beaten off. Baibars built up the galleys at Alexandria and restored them to what they were before. In

762 (1365) Alexandria was surprised and plundered by the King of Cyprus. There is evidence that it had declined greatly in importance by this time, inasmuch as its governors were persons of quite minor rank. The Mamlūk sulṭāns very rarely visited it. They made constant use of it as place of imprisonment for political offenders. Guns were included in its defence in the xvth century, and al-Ghūrī, when he feared an attack by the Turks, sent a large quantity of ordnance to it in 922 (1516). After the Turkish conquest, the taxes of Alexandria were not included in the revenue of Egypt, but were paid direct to Constantinople. In the xvith century it served as the port of Turkish galleys, which were dismantled and hauled up during the winter. The corsairs of these vessels extended as far as the Straits of Gibraltar and the prisons of Alexandria held many Christians they had captured. The ruins of the town now began to be used to provide materials for beautifying mosques and other buildings at Constantinople. The French took Alexandria in 1798. It was taken from them by the British and held by them till 1803. The British took it again in 1807, but gave it up in the same year on the disastrous failure of their expedition in support of the Mamlūk Beys. Muḥammad ʿAlī restored its fortunes: he rebuilt the walls (1811), constructed the Maḥmūdiya canal (1819), built the arsenal or dockyard (1829), also the Palace of Ra's al-Tīn, and encouraged development in various ways. The population was estimated as low as 6000 in 1777, probably an underestimate, but after the events of 1798—1801, it is not likely to have been much more. In 1828 it is stated to have been 12,528 — smaller than that of Rosetta. By 1839, it was estimated at 40,000 and in 1862 at 164,400 in 1871, it was 219,600. As a result of disturbances during the rebellion of ʿArābī Pasha [q. v.] in 1882, the forts of Alexandria were bombarded by the British fleet in July; next day part of the town was destroyed by the mob.

Manufactures, trade. Alexandria was noted for its weaving. Its textiles are described as incomparable and are said to have been exported to all quarters (cf. EGYPT, ii. 17[b]). Some of the linen manufactured at Alexandria was so fine that the flax for the stuff was sold for its weight in silver and that for the embroidery in it for many times its weight. Alexandrian silks occur in Fāṭimid inventories (xth to xiith centuries) and it is believed that some of the fabrics presented by Popes to churches of Italy in the viiith and ixth centuries were executed by Alexandrian workmen. A great number of miscellaneous manufactures, the character of which is not specified, are said to have been carried on. It was as a market for the products of the Indies rather than those of Egypt that Alexandria was of special importance in trade, particularly for the spices, pepper, cloves, nutmegs, cinnamon, ginger and so forth, — though the list of commodities included other articles such as pearls and precious stones. After being landed on the west side of the Red Sea and carried to the Nile by caravan, this merchandise was transported to Alexandria by the river and canal. It was in constant demand in Europe and elsewhere, so that Alexandria was resorted to by people from all parts for commerce. This trade can hardly have been maintained during the early part of the Muhammadan epoch and for various reasons is not likely to have become active until the era of the Fāṭimids. Towards the end of the reign of the Umaiyads or the beginning of that of the ʿAbbāsids, Christian ships began to visit the port, and in the removal of the relics of St. Mark to Venice in 828, according to the well known story, there is evidence that commercial relations with Venice subsisted then. It seems, contrary to what might have been expected, that the trade with the west was stimulated and developed as a result of the Crusades. In the xiith century it was well established, and people from all Christian kingdoms resorted to Alexandria; a contemporary names 28 Christian towns or states represented by traders there. Among the number were Amalfi and Genoa, which with Venice appear to have been the earliest in the field, Ragusa, Pisa, Provence, and Catalonia. Besides Christians were to be met Muhammadans from Spain and Barbary and from Mesopotamia, Syria, and the countries towards India. It is known that ships belonging to Alexandria went at the same epoch as far as Almeria in Spain. Each of the various Christian communities at Alexandria had its own fondaco (*funduḳ*), a building in which the merchants warehoused their goods and also resided. The Venetians, as the leading commercial power, obtained a second fondaco in the xiiith century, besides other privileges, and they had also a fondaco at Fūwa. Their colony was presided over by a consul, and the Pisans, Marseillese and Genoese likewise had consuls there in the xiiith century. Florence established a consul in the xvth century. The first English consul was appointed in 1583. There are many details of commercial treaties, the customs, measures taken with regard to the trade by the Sulṭāns, disputes between Christians and the inhabitants and between the Christians themselves, and other similar matters showing the conditions under which the merchants carried on their work and the difficulties they suffered. The discovery of the route by the Cape of Good Hope in 1498 diverted the Indian trade from Alexandria and reduced the commercial importance of the port to small proportions. When the trade in coffee and other commodities began in some measure to flourish in about 1680, a certain revival at Alexandria manifested itself.

Bibliography: The materials for a history of mediaeval Alexandria are widely scattered. Contributions are to be found in almost every one of the principal Arab histories of Egypt: see the article EGYPT. To be noticed particularly are Ibn ʿAbd al-Ḥakam (ed. Massé, Cairo 1914, in progress; ed. Torrey, in preparation); al-Masʿūdī, *Murūdj al-Dhahab* (Cairo 1303; Paris, 1861—77); *Bibliotheca Geographorum Arabicorum*, i.—viii.; al-Idrīsī, ed. Dozy and De Goeje (Leyden 1866); Ibn Djubair, Gibb series, v.; Yāḳūt, *Muʿdjam al-Buldān*; ʿAbd al-Laṭīf, *Kitāb al-Ifāda wal-Iʿtibār etc.* (ed. White, Oxford 1800; and Cairo 1232, transl. and annot. by de Sacy, Paris 1810); al-Maḳrīzī, *al-Khiṭaṭ wal-Āthār*; Ibn Iyās, *Badāʾiʿ al-Zuhūr fī Waḳāʾiʿ al-Duhūr*. The Christian writers Severus, ed. Evetts and ed. Seybold [cf. IBN AL-MUḲAFFAʿ, 3], and al-Makīn (Elmacin), Lugd. Bat. 1625, supply a few facts not to be found elsewhere. Benjamin of Tudela (many editions) has a brief but important notice. European travellers and accounts in Eu-

ropean languages include Arculfus (680), Bernard the Wise (870), Ludolf von Suchem (1350), all three in *Palestine Pilgrims' Text Society's Series*; M. Baumgarten (1507) in Churchill's *Travels*; Leo Africanus (1517), Hakluyt Soc. 92—4; various articles in Hakluyt's *Voyages*, Vol. v., relating to the xvi[th] century; Sandys' (1610) Travels; Blount (1634) in Pinkerton's *Voyages*, vol. x.; Maillet (1692); Pococke (1737); Volney (1783), and others.

Modern Works: *Description de l'Égypte, État Moderne*, Tome ii. (2e partie), p. 270 *sqq.*, contains full description of Alexandria in 1800, and Planches 84—91, map 1 : 10,000, views and plans, also *Antiquités*, Tome ii.; T. D. Néroutsos, *L'ancienne Alexandrie* (Paris 1888, with map); A. J. Butler, *Arab conquest of Egypt* (Oxford 1902), p. 368 *sqq.*, contains a careful and full description of Alexandria at the conquest, with remarks on the subsequent period; map of Alexandria by R. Blomfield in *Bulletin de la Société Archéologique d'Alexandrie*, N°. 8, 1905; Guide books, Murray and Baedeker; Heyd, *Geschichte des Levantehandels*, Map of Alexandria 1 : 1000, Survey Department of Egypt, 1909 — in progress; ʿAlī Bāshā Mubārak, *al-Khiṭaṭ al-Djadīda*, Section vii.

(Ehuvon Guest.)

al-**ISKANDARĪYA** = Iskandarūna [see Iskandarūn]. According to *Tādj al-ʿArūs*, iii. 270, al-Iskandarīya was the name of 16 distinct places called after Alexander the Great, including the town of Balkh as well as the two towns mentioned above.

(Ehuvon Guest.)

ISKANDARŪN (Alexandretta), the Iskandarūna or Iskandarīya of the Arabs (see the variants of the MSS. of al-Iṣṭakhrī and Ibn Ḥawḳal), the port of Aleppo on the Mediterranean, is the ancient Ἀλεξάνδρεια κατὰ Ἰσσόν, which was afterwards also called little Alexandria (Ἀλεξάνδρεια ἡ μικρά in Malalas, ed. Bonn, p. 297), which was reproduced by the Aramaic diminutive form of the Arabic Iskandarūna; it should not be confused with the place of the same name between Ṣūr and ʿAkkā, cf. Maḳrīzī, *Hist. des Mamloukes*, ed. Quatremère, ii. 2., p. 256 *sqq.*; Dimishḳī, transl. by Mehren, p. 280. The Ἀλεξανδρών of Skylitzes, ii. 677, is formed from Iskandarūna and from Ἀλεξανδρών there then arose the form ἡ Ἀλεξανδρέτ (Michael Attal., p. 120; Zonaras, iii. 601; Georgius Cyprius and the episcopal list, *Byz. Ztschr.*, i. 248); the form usual with us (the Roman diminutive formation) is used as early as the Western pilgrims of the middle ages (Wilbrand von Oldenberg, i. ch. xviii). Under Arab rule Iskandarūn belonged to the *djund* of Ḳinnasrīn-Ḥalab; the castle is said to have been built in the reign of the Caliph al-Wāthiḳ (Abu 'l-Fidā', ed. Reinaud, ii. 2, p. 33). In the wars between the Byzantines and the Arabs the town was repeatedly taken by the former (Muralt, *Chronogr. Byz.*, year 1068; Ibn Ḥawḳal p. 121). In Abu 'l-Fidā's time it was deserted. In the period following it again gained importance as the port of Aleppo, which was beginning to flourish, but the unhealthy climate, a result of the surrounding swamps, and the not very favourable conditions at the port have so far impeded the commercial development of this important place. It is the capital of a ḳaḍā with 10—15,000 inhabitants. It is connected with Aleppo by a road 60 miles long.

(J. H. Mordtmann.)

ISLĀM is the name which Muhammadans in every country give to their own faith. The word means "submission", "resignation", (to God), and occurs eight times in the Ḳur'ān, in such verses as iii. 17, "The (true) religion with God is Islām"; v. 5, "This day have I perfected for you your religion and have completed My favour upon you and it is My pleasure that Islām be your religion"; vi. 125, "Whomsoever God wishes to guide, He opens his breast unto Islām". See further art. muslim.

In the present article merely a statistical account will be given of the extent to which the Muslim religion prevails in the various countries of the world at the present day. For an exposition of the religious tenets and ordinances of Islām, the development of dogma etc., the reader is referred to articles such as Allāh, Muḥammad etc., and for the biography, history, geography etc., of Muhammadan peoples, to the appropriate articles under each head.

Various estimates of the total number of Muhammadans in the world have been made, differing as widely as from 175 to 270 millions; but there is a large element of uncertainty about any estimate, as in several countries where Muhammadans are to be found in large numbers, no religious census has ever been taken, and accurate statistics are accordingly wanting. This is particularly the case in the land in which Islām had its origin, and any estimate of the total Arab population must be conjectural only. Some reliance may be placed on the figures given for the districts under European control, as 56,000 (Aden and the neighbouring islands, Perim, Soḳoṭra, etc.), and 89,000 (Baḥrain Islands), but estimates of the population in the independent parts of Arabia, e.g. Nadjd, Ḥaḍramūt, etc. — 2,500,000 (Zwemer), 3,500,000 (Hartmann) — and those (e.g. Ḥidjāz, Yaman), under Turkish suzerainty, — 1,050,000 — can be tentative only. The Arabs are not however confined to the limits of the country that bears their name; as early as the third century of the Christian era had commenced those scattered migrations of Arabs to the north which gradually led to the formation of settlements in Palestine, Syria, and Mesopotamia; as time went on, advantage was taken of the conflicts between the Byzantine and Persian empires, and larger numbers of nomad Arabs settled in the more fertile countries bordering on the arid land of their origin. This migratory movement culminated in the vast expansion of the Arab race, rendered possible by the conquests of the seventh century, when the Arabs despoiled the Byzantine empire of some of its fairest provinces and subjugated the whole of the territories of the Persian king. The fact that the Arab language was gradually adopted throughout the greater part of Syria, Egypt and North Africa

is some evidence of the interpenetration of Arab blood in the population of these countries, and a steady, though intermittent, stream of migration from Arabia into Africa set in across the Red Sea. Another stream moved eastward across the Indian Ocean and by the middle of the eighth century Arab traders had made their way as far as China and were present in large numbers in Canton. Arab trading settlements are found scattered throughout the Malay Archipelago, and at different historical periods small groups have established themselves on the coasts of British India, and individual Arabs have made their way to most parts of the Muhammadan world, especially those accessible by sea. But no attempt has ever been made to estimate the total number of these Arabs living outside the limits of the Arabian Peninsula, as separate groups in the Muslim populations of which they form a part.

For some countries of Asia which are under European rule, we have accurate statistics. In India, where varieties of religious belief are carefully noted, the Muhammadans, according to the Census of 1911, numbered 66.647.299, out of a total population of rather more than 315 millions. (For details as to the varied composition of the population, see article INDIA, § 1). The Muhammadan community shows a tendency to increase in numbers relatively to their Hindu fellow-countrymen; in the decade ending 1901, while the total population of India increased by 2.4%, the Muhammadans increased by 8.9%; in the following ten years, their number rose by 6.7%, as compared with only 5% in the case of Hindus. Proselytism may partly account for this, but the chief reason for the rapid growth appears to be that their social customs are more favourable to a higher birth-rate than those of the Hindus; they have fewer marriage restrictions, and widows frequently re-marry. Conversions to other religions are not frequent, but Christian converts from Islām are numbered by thousands in Northern India, especially in the Pandjāb (*The Mohammedan World of To-day*, pp. 170, 294), and a certain number of Muhammadans of Hindu origin have been re-absorbed into Hinduism through the missionary activity of the Ārya Samādj (v. art. INDIA, § 5*a*). In Ceylon, in spite of the intimate trade relations with Arabia, Islām has not achieved any great extension among the inhabitants and there were in 1912 only 284.000 Muhammadans, out of a population of over four millions.

For the Malay Peninsula and Archipelago, complete statistics are wanting. One estimate (Zwemer) gives 673.159 as the Muhammadan population of the Federated Malay States and the Straits Settlements, while another (Hartmann) gives nearly double that figure. Introduced into Malacca from India, Islām spread along the great trade route to Java and the other islands of the Archipelago. The Muslim population of the Dutch Indies in 1905 was 35.034.025, including 20.605.653 in Java, and was said to be rapidly increasing as the result of conversions to Islām from among the sections of the population that still remain heathen; on the other hand Christian missionaries have been in recent years winning converts from Islām in Java, where more than 300 baptisms are said to take place every year, and in 1906 there were living 18.000 Christians who had been converted from Islām (*The Mohammedan World of To-day*, p. 237); in Sumatra the various missionary societies working in this island claim to have made 6.500 Christian converts, together with 1150 catechumens, formerly Muhammadans, since the year 1860 (*ib.*, pp. 222, 228).

In Siam, Islām has never succeeded in exercising much influence; converts have been won in the north through contact with the neighbouring Malay States, and in the coast towns as the result of intercourse with the Malay Archipelago; but the total number of Muhammadans is probably not more than 300.000.

In other parts of Asia under European rule, there are found in the French possessions in Indo-China 1.146.000 Muhammadans out of a population of 17.800.000; in the Asiatic possessions (including the Caucasus) of the Russian Empire 11.966.700 Muhammadans out of a population of nearly 25 millions; and in the Philippine Islands, under American rule, 277.547 Muhammadans out of 8¼ million inhabitants.

But when we pass to countries in which accurate census returns after the European method are entirely wanting, there is still more uncertainty as to the figures. In Persia, an estimate made by Christian missionaries assigns to Islām all but 500.000 out of the five millions of inhabitants. In Afghānistān it is conjectured that there are about four million Muhammadans.

The first serious attempts to ascertain the number of the Chinese Muslims were made by Broomhall and d'Ollone; the former suggests 8.421.000 (*Islam in China*, p. 215), the latter (*Recherches sur les Musulmans Chinois*, p. 430), 4.000.000 only. These figures are in striking contrast to the exaggerated estimates made in the 19th century when their number was alleged to be as much as 20 or 30 millions or even 70 millions; but some Christian missionaries consider that the more recent estimates are too low. But whatever proportion the present Muslims bear to the total population of China, it is probable that their numbers were considerably larger before the massacres that accompanied the suppression of the many Muhammadan insurrections of which a list is given by d'Ollone (*op. cit.*, p. 436), in which millions of persons are said to have perished. In Tibet there are believed to be as many as 28.500 Muslims, most of them settlers from China and Kashmir, with a few converts, and descendants of converts. Islām has succeeded in gaining but few adherents in Japan, and these in quite recent years; there are probably not more than 200 Muslims in Japan itself, but about 25.500 in Formosa.

In regard to some of the oldest parts of the Muhammadan world, now included in the Asiatic possessions of the Sulṭān of Turkey, and excluding the independent parts of Arabia, various estimates of the Muslim population are given e.g. 11.190.000 (Hartmann) and 12.278.800 (Zwemer), but in the absence of accurate census returns these figures can be considered as approximate only. (v. A. de la Jonquière, *Histoire de l'empire ottoman*[2], p. 457 *sqq.*, Paris 1914).

Next to Asia, Africa is the continent that contains the largest number of Muslims, but materials for an exact judgment are so wanting that estimates given even by the most recent investigators vary from 42 to 76 millions. The most rigid investigation has been made by Professor D. Westermann, and his figures, with a total of 42.039.349, have been adopted by Zwemer as follows: Abyssinia,

500,000; Egypt, 10.269.445; Liberia, 280.000; the rest of this continent forms part of the empire of one or other of the powers of Europe, but for the greater part of these vast dominions no exact census returns are available; Belgium, 60.000; France, 15.085.000; Germany, 1.480.000; Great Britain, 12.539.904; Italy, 1.365.000; Portugal 330.000; Spain, 130.000. While much of these estimates is necessarily conjectural, some reliance can be placed upon the figures given for those parts of the continent in which the population is almost entirely Muhammadan, e.g. Morocco (in which there are 3.100.000 out of a total of 3.220.000), or in cases where whole sections of the population such as the Hausas or the Fulbe have adopted Islām. This faith is still making progress among the heathen tribes and new converts every year come in to swell the numbers of the faithful.

In Europe, on the contrary, the influence of Islām continues to decline. What the population of Muslim Spain may have been in the days of its widest extent, it is impossible even to conjecture, but in 1492 the Jewish and Muslim community together numbered over two millions, and when Philip III expelled the last remnant of the Moriscos in 1609—1615, the number of those who left the country was probably about 500.000. (H. C. Lea, *The Moriscos of Spain*, p. 359. London 1901).

At the present time, the Muhammadans in Europe are almost entirely confined to Russia and those countries that formed part of the Turkish dominions at the beginning of the 19th century. In Russia in Europe, the total number of the Muhammadans is about 3.500.000, but there has been no religious census in the Russian empire since 1897; they are mainly Tatars by race, but proselytism has taken place to a considerable degree among Finnish tribes such as the Cheremiss, the Votiaks and the Chuvash. Since the promulgation of the edict of religious toleration in 1905, there has been an increasing number of accessions to the faith of Islām. There is a considerable amount of uncertainty about the religious statistics of the Balkan Peninsula, and even the official estimates are open to grave suspicion of being manipulated to suit some political or racial interest.

In Turkey in Europe (in 1900) there were said to be about 3.200.000 Muhammadans; Hartmann, writing in 1909, gives 3.295.000. In Bulgaria, the Muhammadans number 603.876 out of a total population of nearly 4½ millions. In Rumania there are about 43.700 Muhammadans, living for the most part in the Dobrudja. In Serbia in 1910 there were 14.435, and in Montenegro 14.000. In Albania the total Muhammadan population is said to be 334.000, of whom 12.000 are Gypsies, 40.000 Serbs and 26.000 Albanians. Greece still contains 24.000 Muhammadans, while in the island of Crete the number has shrunk to 27.852; but as recently as 1909 there were 33.496 Muhammadans on the island, and in 1881 more than 73.000. In Bosnia and Herzegovina the indigenous Serb population includes 612.137 Muhammadans, and in the rest of the Austrian empire there are about 1450 more. In the other countries of Europe, chiefly France and Great Britain, there are some small scattered groups of Muhammadans, mostly of African or Asiatic origin, temporarily resident in these countries.

Emigration and commercial activity have added 8000 Muhammadans to the population of North America, and 166,000 to that of Central and South America (including the West India Islands, where there are 10.499 in Trinidad and 3000 in Jamaica). In Australia there are 195.000, chiefly at Perth.

Bibliography: The first comprehensive attempt to give a statistical survey of the followers of the faith of Islām, was made by Hubert Jansen, *Verbreitung des Islāms in den verschiedenen Ländern der Erde* (Berlin 1897), but his figures are often very exaggerated, and later investigations have shown that much smaller estimates are nearer the truth. Martin Hartmann, *Der Islam: Geschichte—Glaube—Recht* (Leipzig 1909), gives detailed statistics, but does not mention his sources of information. S. M. Zwemer in chapter iii. of *Mohammed or Christ* (London 1916), gives a census of the Muslim World, with a bibliography. Separate studies have been made of the statistics of certain parts of the Muhammadan world e.g. by M. Broomhall, *Islam in China* (London 1910); S. Bobrovnikoff, *Moslems in Russia* (*The Moslem World*, vol. i. London 1911); D. Westermann, *Der Islam in West- und Zentral-Sudan* (*Die Welt des Islams*, i. 85 *sq.*, Berlin 1913); and G. Kampffmeyer, *Statistik der Mohammedaner auf der Balkanhalbinsel und in Österreich* (*ib.*, i. 32—33). For Africa and Asia see *The Mohammedan World of To-day* (New York 1906). Details as to the spread of Islam are given for their respective territories by the British and Dutch governments in their decennial official publications, the *Census of India* and *Koloniaal Verslag* respectively. Religious statistics are given in *The Statesman's Year Book*, published annually in London. The *Revue du Monde Musulman* contains articles giving statistics of the Muhammadan population of several countries, see *Index général des volumes I à XVI* (Paris 1912). (T. W. Arnold.)

ISLĀMĀBĀD, a town of some importance in the south-eastern part of the valley of Kashmīr situated at the head of the navigable channel of the River Djehlam. Its Hindu name was Anantnāg, but it was named Islāmābād after the Muhammadan conquest, probably by Sulṭān Zain al-ʿĀbidīn, 820—872 (1417—1467). The town was formerly famed for its shawl manufacture, but this has died out, and at present the only manufacture is that of white felt, embroidered rugs and embroidered tablecloths. In the immediate neighbourhood are the celebrated Hindū Shrine of Mārtand and Djahāngīr's gardens at Achbal.

ISLĀMĀBĀD. The name Islāmābād was given on more than one occasion by the Emperor Awrangzēb to towns conquered from Hindūs. Of these the most important are Čittagong (Čātgām) [q. v.], at the head of the Bay of Bengal, Čākna in the Deccan, and Mathurā on the Djamnā. Islāmābād became a mint in gold and silver from the time of Awrangzēb to that of Shāh ʿĀlam II, and copper was also struck there by the last mentioned emperor. It is generally supposed that Čittagong was the place of mintage of these coins, but Mr. C. J. Rodgers ascribed them to Mathurā. Čākna

however received the name Islāmābād in 1070 (1659) and Čitgāṅ not till 1075 (1664). The name is not now in actual use for any of these three towns.

Chron.*, 1902; Elliot and Dowson, *History of India*, vii. 263, 275; Whitehead, *Catalogue of Coins in Lahore Museum*, Vol. ii. (Oxford, 1914).

(M. Longworth Dames.)

ISLAMBOL. [See Istanbul.]

ISLĀM GIRĀY, the name of three Khāns of the Crimea.

1. Islām Girāy I b. Muḥammad Girāy, brother of Ghāzī Girāy I (q. v., ii. 151ᵃ). During the troubled period that followed the death of his father, he succeeded, as his brothers had done before him, in occupying the throne for a short time (a few years till 939 = 1523), but he was not recognised by the Sulṭān. After the appointment of his uncle Ṣāḥib Girāy, he rebelled against the Sulṭān and was murdered in 944 (1537).

2. Islām Girāy II b. Dewlet Girāy, brother and predecessor of Ghāzī Girāy II (q. v., ii. 151ᵃ), 992—996 = 1584—1588. In contrast to his successor he was not popular in his country and was only able to maintain his position with Turkish help.

3. Islām Girāy III b. Selāmet Girāy, 1054—1064 = 1644—1654; in contrast to the two other Khāns of this name, was a vigorous, warlike ruler who also took up a more independent attitude than his predecessors to the Porte and played a prominent part in the political events of his time, notably in the liberation of Little Russia from Polish rule. In his youth he spent seven years in Polish imprisonment. Several raids into Russia were made by him. About 1650 he even made an attempt but without success to enter into relations with Queen Christina of Sweden and to procure money from her for the campaigns against Russia. Islām Girāy died in the beginning of Sha'bān 1064 (begun 17 June 1654) at the age of 50 after reigning 10 years and five months. For the Bibliography see the article ĠHĀZĪ GIRĀY, i. 562 *sq.*; see also the documents edited by Veliaminof Zernof, *Matériaux pour servir à l'histoire du Khanat de Crimée*, p. 340 *sq.* The last document composed shortly before the death of Islām Girāy is specially important, it is a threatening letter from the Khān to the Czar Alexei Michaelovič (p. 475 *sq.*). (W. Barthold.)

ISLY, in Berber *isli* (the betrothed), a river in North Africa. It rises in western Morocco in the S. W. of Udjda, runs from S. W. to N. E. through the land of the Angad, passing near Udjda, then under the name of Wād Bū Nu'aim joins the Mulūya, a tributary on the left bank of the Tafna.

Several battles have been fought on the banks of the Isly. The 'Abdalwādī Sulṭān Yaghmurāsan was defeated there by the Marīnids in 648 (1250) and 670 (1271). On Aug. 14, 1844 Marshal Bugeaud won a decisive victory there over the Moroccan troops commanded by Mūlāy Muḥammad, son of Sulṭān Mūlāy 'Abd al-Raḥmān. The Moroccans were encamped at Djarf al-Akhḍar on the right bank of the river. The Moroccan camp was captured and the army scattered. This victory won for Bugeaud the title of Duc d'Isly.

(G. Yver.)

ISM (A.) plur. *asmā'*, properly "name", technical term in Arabic grammar for the first part of speech, the *nomen*, noun. The term corresponds exactly to the Greek ὄνομα used as early as Aristotle, and to the Sanskrit *nāman*, which is found as an established term in the *Nirukta* of Yāska, who lived many generations before Pāṇini, an authority of the fourth century B. C. There is however no interconnection; the term occurred spontaneously and obviously in every day speech, in which *nāman*, *ism* and ὄνομα comprise all words — not merely proper names — which signify a thing, especially one perceived by the senses. In fact, such words represent in the first class of words the predominant element for thinking and speaking (cf. *Zeitschr. d. Dtsch. Morgenl. Ges.*, lxiv. 380 *sq.*). It is not therefore a consideration based on grammatical science but the simple and most obvious semasiological point of view which underlies the term among the Indians, Greeks, and Arabs. The same is true of the Arabic term for the second part of speech, *fi'l*, which means "action", while the word ῥῆμα (saying), which goes back to Aristotle, the precursor of our "verb" and the Sanscrit *ākhyātam*, used already by Yāska, which means "communicated, related", point to the predicative function, i. e. they are chosen from a logical or syntactical point of view.

To the *asmā'*, first of all of course belong the substantives, for which there is no special term, and the proper name, *al-ism al-'alam* (see 'ALAM) is distinguished from the *ism al-djins* as class name; the latter again is divided into *ism 'ain* and *ism ma'nā* (*Mufaṣṣal*, § 3) accordingly as it denotes a concrete or an abstract. As with the Greeks and Romans the adjective (*ṣifa* [q. v.], also *waṣf* or *na't*) belongs to the *ism* and the numeral (*ism al-'adad*). Differing from them, the Arabic system includes the personal pronoun (*ḍamīr*, q. v.) under the *ism* — the reason being partly the meaning of the words concerned as characterising things and partly their conditions of inflexion — and the demonstrative pronouns (*asmā' al-ishāra*), classed as *mubhamāt* (q. v.), the relative (*al-asmā' al-mauṣūla*), and the infinitive (*maṣdar*, q. v.) and (as had been done by the Stoics) the participle, active and passive (*ism al-fā'il* and *ism al-maf'ūl*); at the same time the Arabs were by no means unaware of the close relations of the participle with the verb as regards etymology, meaning and syntactical application, which led the Greek grammarians to insert a part of speech called significantly μετοχή between the noun and the verb. Finally there are considered as nouns, even the exclamations and appeals of very different linguistic character, classed in our grammars under the inappropriate name of interjections, and even purely onomatopoeic formations like *ghāḳ* of the crows' caw. The Arabs called these words, when they have a verbal (usually imperative) significance, *asmā' al-af'āl*, otherwise *aṣwāt* i. e. tones, sounds (sing. *ṣawt*). That their classification under the nouns was really only made because they could not be placed anywhere else in the threefold scheme, is rather bluntly confessed by Ibn al-Ḥādjib in the commentary to the *Kāfiya* (Constantinople 1311) p. 75,2 a f.: *wa 'lladhī yadullu 'alā 'smiyyatihā in'idāmu 'l-ḥarfiyyati wa 'l-fi'liyyati fīhā* "and what shows their character as nouns is the circumstance, that the character of particle and of verb is impossible with them".

In order, however, to be just to the Arab grammarians, one must not forget that the division of the parts of speech usual among us, which goes back to the ancient grammarians, is of an arbitrary character, and that the attempt to build up a strictly logical system is quite impossible of execution (H. Paul, *Prinzipien der Sprachgeschichte*[4], § 244).

Sībawaihi does not give a definition of *ism* in his survey of the three parts of speech in his first chapter, because the term was intelligible without more ado. He contents himself with three examples: *radjul* (man), *faras* (horse), and *ḥāʾiṭ* (wall), merely names of species of concrete things. The two definitions, made by the Baṣrī al-Mubarrad (d. 285 = 898) and the Kūfī Thaʿlab (d. 291 = 904) and given by Ibn al-Anbārī in *Kitāb al-Inṣāf*, p. 2, have, as Ibn al-Anbārī himself says, more the character of an etymological explanation. The former, who derives *ism* from the root *smw*, the second conjugation of which, *sammā* means "to name", says: *al-ismu mā dalla ʿalā musammā*[n] *taḥtahu* "*ism* is that which indicates something named that underlies it". Thaʿlab, who derives *ism* from the root *wsm*, "to mark with a brand (*stigma*, *nota*)", says: *al-ismu simatun tūḍaʿu ʿalā 'l-shaiʾi yuʿrafu bihā*, "*ism* is a mark (*nota*) put on a thing by which it is recognised". This explanation by its remarkable similarity recalls that of Priscian (ed. Keil), i. 57, 5: *est*, *ut alii*, *nomen quasi notamen*, *quod hoc notamus uniuscuiusque substantiae qualitatem*. It is not till a later date that we recognise the Aristotelian definition: φωνὴ σημαντικὴ κατὰ συνθήκην ἄνευ χρόνου κτλ among the Arab grammarians. Thus al-Sīrāfī (d. 368 = 978) says: *Kullu shaiʾin*, *dalla ʿalā maʿnan*[n] *ghaira muḳtarinin*[n] *bi-zamānin*[n] *muḥaṣṣalin*[n] *min muḍiyyin*[n] *aw ghairihi*, *fahuwa 'ism'*, "everything that indicates a conception without being associated with a definite time namely the past etc., is an *ism*" (Jahn, *Sîbawaihi's Buch über die Grammatik*, Note 3 to § 1; Ibn Yaʿīsh, p. 25, 19). This is the definition which with slight variations became usual later (see Ibn Yaʿīsh, p. 16, 13). Instead of "with a definite time", the *Kāfiya* says "with one of the three times" (present, past, and future); Ibn al-Ḥādjib (*l. c.*, p. 7) gives a full explanation of the reason of this extension of the ἄνευ χρόνου and of the difficulties resulting from the nature of the Arabic language in regard also to this definition.

The points of view from which the Arab grammarians regard the declensions of nouns are given in their general lines in the article IʿRĀB. It may be further mentioned that Arab terminology has no equivalent for our "number" and "gender". The word *djins* borrowed from the Greek γένος is never used for grammatical gender, as Merx, *Historia artis grammaticae apud Syros*, p. 145 and 151, erroneously assumes; even with the grammarians the word only means the genus to which the species (*nauʿ*) is subordinate (Ibn Yaʿīsh, p. 22—7). For all details of the theory of the noun in the system of the Arab grammarians, the reader must be referred to the original works, to which Fleischer's *Beiträge zur Arab. Sprachkunde* give valuable elucidation.

(J. WEISS.)

ʿIṢMA (A.), in dogmatics, immunity from error and sin, such as is ascribed in Sunnī Islām to the prophets and in the Shīʿa to the Imāms also. As to the extent of their immunity, the orthodox theologians differ in opinion as regards the prophets except Muḥammad (on such points as whether it also exists before or only after their prophetic calling or whether it includes immunity from all kinds of sin or only applies to minor slips). It is applied in unlimited fashion to Muḥammad only, in opposition to his own judgement. Among Sunnī authorities Fakhr al-Dīn al-Rāzī in particular extends the *ʿiṣma* to all prophets in the greatest degree. According to the Shīʿa teaching, *ʿiṣma* is inherent in the Imāms to a higher degree than in the prophets on account of their exalted qualities of substance. Abū Zaid al-Balkhī (d. 322 = 934) wrote a *Kitāb ʿIṣmat al-Anbiyāʾ* (Yāḳūt, *Irshād*, i. 142, 5 *a fine*), as did Fakhr al-Dīn al-Rāzī (Brockelmann, i. 507, n°. 14). Every work on Muslim dogmatics contains a chapter on these questions and the different views in regard to them (e. g. Ibn Ḥazm, *Milal*, ed. Cairo 1321, iv. 1—31; *Mawāḳif*, ed. Soerensen, p. 220 *sqq.*); a mystic definition of *ʿiṣma* is given by al-Ghazālī, *Mīzān al-ʿAmal* (Cairo 1328), p. 116 *pen.*

(I. GOLDZIHER.)

ISMĀʿĪL, the son of the patriarch Ibrāhīm, is mentioned several times in the Ḳurʾān. In Sūra ii. 130 (= iii. 78) and iv. 161 it is said of him that he received revelations. In xix. 55 he is called a messenger and prophet, who summoned his people to *ṣalāt* and *zakāt*. These references fit in very well with Muḥammad's account of the religion of Ibrāhīm. In Sūra ii. 127, he is called one of the fathers of Jacob, along with Ibrāhīm and Isḥāḳ; and in ii. 119, he, along with Ibrāhīm, is commanded to purify the Holy House at Mecca.

Tradition knows nothing of Ismāʿīl as a messenger nor of his revelations nor has it explained his relations to the spread of the religion of Ibrāhīm. It knows that his mother Hādjar bore him to Ibrāhīm as his first-born and that a feud arose between Hādjar and Sara. With the intention of disfiguring Hādjar, Sara even pierced her ears; so this then became the fashion with women. Ismāʿīl and Isḥāḳ are also said to have fought with one another occasionally. In the end, Sara's jealousy induced Ibrāhīm to decide to travel to Arabia with Hādjar and Ismāʿīl. The party was guided by the *Sakīna* or, according to others, by Gabriel (on the form of the *Sakīna*, cf. *The Navel of the Earth*, *Verh. Kon. Akad. v. Wetenschappen*, Afd. Letterkunde, Nieuwe Reeks, xvii. n°. 1 p. 60 *sqq.*).

When Ibrāhīm and Ismāʿīl had dug the foundations of the Holy House, Ismāʿīl helped his father in the building of the temple. When this work was completed, Ibrāhīm abandoned the boy with his mother in the barren country, afflicted by thirst. In her need, Hādjar stood on the hills al-Ṣafā and al-Marwa and looked for water and ran hither and thither between them, the origin of the *saʿy* (q. v.). Gabriel then called "Who art thou? To whom did Ibrāhīm entrust thee?" The boy then impatiently thrust his foot (or finger) into the sand and a spring arose; if Hādjar had not hurriedly scooped up the moisture in her jug, the Zamzam would have become a bubbling spring. It is also said that Gabriel pushed his heel into the ground and the Zamzam burst forth beneath it.

In those days the Djurhum (q. v.) lived near

the sanctuary; after Hādjar's death, Ismāʿīl married one of their daughters. In his absence Ibrāhīm visited his wife but did not find a very hospitable reception; when the woman afterwards repeated to her husband some words which Ibrāhīm had said, he understood that the latter was suggesting he should divorce his wife. He did this; afterwards he married another woman of the Djurhum. Ibrāhīm visited her also and in the same allusive fashion gave his approval to the new choice.

Ibrāhīm and Hādjar, according to Muslim tradition, are buried in the *ḥidjr* of the Holy House, a distinction which they share with most of the prophets: the prophet belongs to the home of the prophets.

Muslim tradition also knows the story given in Genesis xxii. But there are several theologians who say, it was not Isḥāḳ but Ismāʿīl that was the *dhabīḥ*. For this view, the sayings of ʿAbd Allāh b. ʿOmar, Ibn ʿAbbās, al-Shaʿbī, Mudjāhid, etc. are quoted. It is related, for example, that ʿOmar b. ʿAbd al-ʿAzīz asked a Jew convert to Islām about this difference of opinion and he answered: "The *dhabīḥ* is Ismāʿīl; the Jews know this also, but as they are jealous of you, they say it was Isḥāḳ".

Ibrāhīm is also considered the ancestor of the North Arabian tribes. In the native genealogies, the Arabs are divided into three groups: *al-bāʾida* (those who have disappeared), *al-ʿāriba* (the indigenous) and *al-mustaʿriba* (the arabicised). Ismāʿīl is considered the progenitor of the last group, whose ancestor is called ʿAdnān. The chain between Ismāʿīl and ʿAdnān is given in very divergent forms, sometimes in partial agreement with the list in Genesis xxv.

Fleischer, p. 192; Ibn Ḳutaiba, ed. Wüstenfeld, p. 18, 30; *Die Chroniken der Stadt Mekka*, ed. Wüstenfeld, passim.

(A. J. Wensinck.)

ISMĀʿĪL, formerly a Turkish fortress, now the district town in the Russian government of Bessarabia, on the left bank of the Kilia arm of the Danube, between the lakes of Jalpuch and Kutlabuch, with about 40.000 inhabitants (in 1897: 31293). The name *Ismāʿīl* (Moldavian Smail, Smil, or Smeil, also Simil) is said to be derived from the Slav *zmij*, a snake or dragon, the epithet of several Moldavian princes; according to a Turkish folk etymology, from the alleged conqueror, a Ḳapudan Ismāʿīl, who took the town under Bāyazīd II in 1484.

The origin of the town is unknown. It is said to have been at one time in the hands of the Genoese. It only attained importance under the Turks as a fortress to curb the Budjak Tatars, who had been settled there in 1569, and particularly as a *point d'appui* of the Turks against the advance of Russia, owing to its splendid strategic situation as the best gate of sortie from the north into the Dobruja and the intersection of the roads from Galatz, Khotin, Bender and Kilia. After Ismāʿīl had been taken by the Russians without a blow in 1770 in the First Russo-Turkish War, the Turks endeavoured with the help of foreign engineers to make the town, which was restored to them by the peace of Küčük Kainardja in 1774, the strongest fortress on the left bank of the Danube, an „army fortress" (*ordu ḳalʿesi*), i. e. the permanent quarters of large bodies of troops of a defensive character. The fortress, thought to be impregnable, was taken as early as Dec. 11 (22), 1790 by the Russians under Suworov in spite of a most valiant defence by the Serʿasker Aidosli Meḥmed Pasha; in the three days' massacre over 26.000 Turks, including the whole Muslim population, were killed, 9000 taken prisoners and only one escaped by swimming the Danube bearing the appalling news. This deed of arms, celebrated by Byron and Djerzhavin, aroused a tremendous sensation in Europe; in Constantinople it resulted in a revolution and the execution of the Grand-Vizier.

By the peace of Jassy in 1791 Ismāʿīl was restored to the Turks and fortified again by them. (The splendid stones with the *ṭughra* of Selim III, testifying to the restoration of the fortress in 1794—5, are in the Odessa Museum). But in 1809 Ismāʿīl again capitulated to the Russians, to whom it remained by the peace of Bucarest in 1812, whereupon many colonists settled there, viz. Russian fugitives and sectarians, especially Raskolniki, Rumanians, Greeks, Bulgarians, Armenians, Jews and Gipsies. In 1810 General Tutchkov founded at a short distance from Ismāʿīl the town of Tutchkov, which bears his name and gradually expanded to form one town with Ismāʿīl. By the peace of Paris in 1856, Ismāʿīl after the demolition of its fortifications was added to Moldavia with a portion of Bessarabia and remained Rumanian till its capture in the last Russo-Turkish War on 14 April 1877, by the Russians, to whom it finally passed by the treaty of Berlin.

Only a few ruins of the fortress exist. The town, which in spite of many vicissitudes of war (such as being plundered by the Cossacks) was at one time an important centre for traffic in fish etc., fruit and corn and a populous town (always with a very mixed population, in contrast to the purely Tatar population around), suffered severely through the wars and the forcible expatriation of the former population of Bessarabia. At the present day its commerce is again highly developed in spite of the by no means favourable shipping conditions.

(Theodor Menzel.)

ISMĀʿĪL I, founder of the Ṣafawī dynasty of Persia, born of a Ṣūfī family, settled in Ardabīl [q. v., i. 425 sq.] in Ādharbaidjān since the time of the shaikh Ṣafī al-Dīn, who was said to be descended from the imām Mūsā al-Kāẓim. He was the son of the shaikh Ḥaidar [q. v.]; after the death

of his maternal grandfather, Uzun Ḥasan (about 883 = 1478), in the confusion of the anarchy that followed, supported on the one hand by the followers of his father and on the other by the seven Turkish tribes which had taken his side (Ustādjlu, Shāmlu, Tekkelu, Bahārlu, Dhu 'l-Kadr, Kādjār and Afshār), Ismā'īl collected an army of 7,000 men, who received the name of Ḳizil-bāsh [q. v.]. In 908 (1502) he was master of Shirwān, Ādharbaidjān and 'Irāḳ 'Adjamī and now took the title of shāh ("king"). In 914 (1508) he extended his kingdom eastwards as far as Harāt, westwards to Diyār Bakr and Baghdād; but the forcible propagation of the Shī'a tenets which he conducted in the newly won territories brought him the enmity of his nearest neighbours on the north and west, the Khān of Bukhārā and the Ottoman Sulṭān, both Sunnis.

The former, Muḥammad Shaibānī Khān, who had made himself master of Turkistān after his victory over Bābur [q. v.], was defeated near Merw by Ismā'īl in a great battle, in which he himself was killed (Sha'bān 916 = Dec. 1510). This success brought Ismā'īl into the possession of the whole of Khurāsān, but he could not prevent the Uzbegs from founding an independent kingdom in Khwārizm with Khīwa as its capital. He fought with less success against the Ottoman Sulṭān Selīm I. In the plain of Čāldirān (east of Lake Urmiya) the Persian cavalry gave way before the infantry of the Janissaries supported by artillery (2 Radjab 920 = 23 Aug. 1514). Tabrīz, Ismā'īl's capital, and Mesopotamia and West Armenia as far as Mosul were occupied by the Turks (921 = 1515). Ismā'īl compensated himself to some extent for this loss by the conquest of Georgia, but he sought to attain the realisation of his plans of revenge against his most dangerous enemy by an alliance with European powers. An offer of this kind was made him by Charles V, after Leo X and Maximilian I had previously in 923 (1517) thought of gaining Ismā'īl as an ally against the Turks, but on account of the great distance which separated the Shāh and the Emperor (it took almost six years for a letter to reach Charles V from Ismā'īl), no definite agreement was reached.

Ismā'īl died in 930 (1524) at Ardabīl where the tombs of the Ṣafawīs are. The beautiful and valuable MSS. on the history of the Ṣūfī family now in the Imperial Library at Petrograd came from the library attached to the tomb of Shāh Ṣafī. Ismā'īl restored the Persian kingdom and his dynasty ruled till its overthrow by the Afghāns over two centuries later.

ISMĀ'ĪL II. Ṣafawī of Persia, son and successor of Shāh Ṭahmāsp I. After the latter's death on 15 Ṣafar 984 (14 May 1576) his son Ḥaidar Mīrzā with the support of the Turkish tribe of the Ustādjlu sought to usurp the throne, but on the day after his accession he was seized in the ḥaram on the information of his sister Perī-Khānum and murdered during a rising in which the Ustādjlu and Afshār fought the Ḳizil-bāsh. Ismā'īl, to whom his father had refused the rank of walī 'ahd (heir-apparent), as he knew him to be cruel and hard-hearted, had been a prisoner for nineteen and a half years in the fortress of Ḳahḳaha. But he was released by the Ḳizil-bāsh and proclaimed Shāh on 27th Djumādā 984 (22 Aug. 1576). A greedy and covetous man, he filled his treasury with all the gifts offered him without offering anything in compensation. He also neglected to visit his aged mother who had retired to the mosque of Shāh 'Abd al-'Aẓīm. He thus made himself hated by all his subjects. The princes of the ruling house were put to death by him in 985 (1577) under the pretext that they had planned a rising with the support of Turkish derwīshes. He forbade the Shī'a to curse the persons reverenced by the Sunnīs. He was particularly fond of giving himself the title 'Ādil (the noble), which he certainly did not merit. He died, after a reign of a little over two years, in his capital Ḳazwīn of apoplexy after taking an electuary in Ramaḍān 986 (Nov. 1578).

ISMĀ'ĪL b. 'Abbād. [See ibn 'Abbād.]

ISMĀ'ĪL b. Aḥmad, Abū Ibrāhīm, a Sāmānid prince (amīr) of Mā warā' al-Nahr, who laid the foundations of the power of his dynasty, born in Farghāna in Shawwāl 234 (28 Apr.—26 May 849), from 260 (874) to 279 (892) governor for his brother Naṣr in Bukhārā; he continued to reside in this town even after he became amīr of Mā warā' al-Nahr by the death of his brother and in 280 (893) was confirmed in this position by the caliph. In the same year he undertook a campaign as far as Ṭarāz (the modern Awliyā-Atā, q. v.), conquered this town and changed its principal church into a mosque. On his struggle in Mā warā' al-Nahr with the Ṣaffārid 'Amr b. al-Laith see the latter article, i. 335b. Although Ismā'īl was declared to be dismissed from his office by the Caliph and his province granted to 'Amr, the Caliph expressed his satisfaction to the victor at the result of the struggle. The heritage of the Ṣaffārids in Khurāsān was disputed by Muḥammad b. Zaid, prince of Ṭabaristān. Ismā'īl's general, Muḥammad b. Hārūn, not only succeeded in driving the enemy out of Khurāsān but even conquered Ṭabaristān; but he then rebelled against his master, adopted the white colour, the colour of the rebels against the legitimate government (Ṭabarī, iii. 2208) and occupied Raiy: Ismā'īl had to take the field in person against the mutinous general; after his defeat, Raiy and Ḳazwīn were incorporated in the Sāmānid kingdom and its frontiers thus settled in the west (289 = 902). In 291 (904) an inroad by a numerous Turkish people was repulsed with the help of volunteers from other Muslim countries (Ṭabarī, iii. 2249). The date of Ismā'īl's death is given as 14 Ṣafar 295 (24 Nov. 907). In Bukhārā, which was made the capital of the Sāmānid kingdom by him (cf. i. 777a), his tomb is still shown, but its authenticity is not vouched for by inscriptions either on the building or on the sarcophagus.

(W. Barthold.)

ISMĀ'ĪL B. Bulbul, Abu 'l-Ṣaḳr, vizier of al-Mu'tamid. In 265 (878—9) Abu 'l-Ṣaḳr was appointed vizier; but the real ruler was al-Muwaffaḳ, the Caliph's brother. At the beginning of Ṣafar 278 (May 891) a rumour gained currency that al-Muwaffaḳ, who was then very ill, had died in Baghdād. His son Abu 'l-'Abbās, the future caliph al-Mu'taḍid, had also a strong following among the population of the capital and, when Abu 'l-Ṣaḳr had the Caliph brought with his family from al-Madā'in to Baghdād and placed them in his own palace and not in that of al-Muwaffaḳ, the adherents of Abu 'l-'Abbās believed that Abu 'l-Ṣaḳr was going to take the side of the weak and insignificant Caliph, and forcibly liberated Abu 'l-'Abbās, who had been imprisoned in 275 (889) for disobedience to his father. But when they learned that al-Muwaffaḳ was still alive, Abu 'l-Ṣaḳr was abandoned by many of his followers and had to take refuge with al-Muwaffaḳ, while his house was plundered. After the death of al-Muwaffaḳ in Ṣafar, Abu 'l-Ṣaḳr was arrested however and all his houses given over to be plundered.

ISMĀ'ĪL B. al-Ḳāsim. [See Abu 'l-'Atāhiya.]

ISMĀ'ĪL B. Nūḥ, Abū Ibrāhīm al-Muntaṣir, a Sāmānid, after the fall of his dynasty in 389 (999) was carried a prisoner to Uzgend in Farghāna; he succeeded in escaping from there in disguise and for several years contested the rule of Mā warā' al-Nahr with the Turkish conquerors. After his last defeat, he fled with only eight followers across the Oxus and was murdered in Rabī' I or Rabī' II 395 (16 Dec. 1004 — 12 Febr. 1005) by the leader of an Arab tribe at Merv. Cf. the collection of the original sources in W. Barthold, *Turkestan v epokhu mongol'skago nashestviya*, ii. 282 *sq.*

(W. Barthold.)

ISMĀ'ĪL B. Sharīf, Mūlāy, Sulṭān of Morocco, second of the dynasty of 'Alawī or Filālī Sharīfs, also called Ḥasanī [q. v. for the genealogy of these Sharīfs].

On the death of Sulṭān Mūlāy al-Rashīd, the empire of Morocco was divided. Mūlāy Ismā'īl, governor of Meknes and brother of the deceased sulṭān, was proclaimed sulṭān in this town. He advanced at once on the capital Fās, which had declared against him and seized it. He was proclaimed there on 11 Dhu 'l-Ḥidjdja 1082 (Apr. 14, 1672), being then 26 years of age.

But three rivals, his brother Mūlāy al-Ḥarrānī in Tāfīlālt, his nephew Aḥmad b. Maḥraz, proclaimed in Morocco and in Sūs, and thirdly the guerilla chief al-Khiḍr Ghīlān in the northwest, took the field against him. They were supported by the Turks of the Regency of Algiers who feared the establishment of a solid power in the west of the Maghrib and endeavoured to make trouble there. Mūlāy Ismā'īl at first drove his nephew Aḥmad b. Maḥraz out of the town of Morocco, defeated Ghīlān in the north of Fās and had him put to death. But Aḥmad b. Maḥraz once more raised the lands of the south and the Atlas. To obtain peace Ismā'īl had to recognise his nephew as Amīr of the lands south of the Atlas and his brother al-Ḥarrānī as Amīr of Tāfīlālt.

These civil wars, which had lasted five years, had hardly terminated when a descendant of the Marabouts of Dilā, Muḥammad al-Ḥādjdj al-Dilā'ī, also supported by the Turks of Algiers, fomented a terrible rebellion in the country of Tādlā and the provinces of western Morocco. But his Berber troops could not withstand Ismā'īl's disciplined troops, especially his artillery. Mūlāy Ismā'īl, being victorious, terrorised the people to keep them quiet; more than ten thousand were beheaded; thousands of prisoners of war along with Christian slaves had to help to build the palace of Meknes, which the Sulṭān made his military capital. At the same time the plague carried off thousands of victims (1090 = 1679) in the regions of the Gharb and the Rīf.

The vigorous repression of the Berber revolts and the epidemic afforded Mūlāy Ismā'īl a certain respite. He took advantage of it to raise a professional army. He enlisted former negro slaves gave them wives, allotted estates to them, trained them in the use of arms, and made of them the famous Black Guard of the 'Abīd-Bukhārī which was to assure him supremacy over all Morocco.

At the same time, nominally to favour the intransigeant religious party, but in reality to watch the dealings of the Turks and Europeans in the seaports, and to counteract the influence of the marabouts, he organised the corps of the *Mudjāhidūn* or "volunteers of the faith". The latter corps, the cadre of which was formed by several hundred carefully selected 'Abīd, waged an unceasing irregular warfare against the European possessions. They took La Mamora (al-Ma'mūra), the modern al-Mahdiya, by surprise from the Spaniards. Mūlāy Ismā'īl collected over 100 pieces of artillery there (1681). They harassed the English at Tangiers and the latter evacuated the town after blowing up the mole and the fortifications (1684) (cf. Davis, *The History of the Second Queen's Royal Regiment*, i., London, 1883, p. 128 *sqq.*). Larache also was forced to succumb to the blows of the "volunteers of the faith" in 1689, Arzila in 1691. But all attempts against Mlila and Ceuta failed. It was in vain that Mūlāy Ismā'īl endeavoured to get Louis XIV to aid him against Spain. French commerce had to suffer for some time as a result.

But the Peace of Ryswick in 1697 raised considerably Louis XIV's prestige above his enemies. Mūlāy Ismā'īl then sought his alliance against the Turks of Algiers who were mixed up in all the plots made in the Atlas against the Sharīfs of Fās. An entente between France, the Bey of Tunis and the Sulṭān of Fās was then concluded. The latter even tried to cement it by a matrimonial alliance and demanded the hand of the Princesse de Conti (cf. Plantet, *Moulay Ismaël et la Princesse de Conti*, Paris, 1893). In spite of the failure of the latter plan, the entente secured to France great commercial benefits at Salé, Tetwān and Safī. Frenchmen superintended the building of the palaces, roads, and forts of the Sulṭān and sometimes (like Pillet) accompanied his artillery. On his part, the Sulṭān organised

several expeditions against the Turks with the help of France, whose merchants supplied him with arms and munitions. But the slowness of the Moroccan armies did not enable Ismāʿīl to reap the advantages expected. He even allowed his ally, the Bey of Tunis, to be defeated near Constantine, which enabled the Turks of Algiers to come to fight the Moroccans in the west in full strength in 1701 and to drive them back.

The expeditions of Mulāy Ismāʿīl against the Turks, in spite of their relative lack of success, enabled him to pacify his frontiers where he built or renovated the fortifications. He built the fort of Reggāda in the mountain of the Banū Yaʿla commanding the high valley of the Wed Sharef and the lands of the Arab tribes of the High Plateaus. He built the fort of ʿAyūn Sīdī Mallūk in the plain of Angād and that of Salwān in the land of the Trīfa. He thus closed the exits on his north-east frontier. Forts built in the lands of each tribe kept the country quiet, especially the Marabouts, the natural allies of the Turks, whose privileges were tending to pass into the hands of the Sharīfs. The latter gradually took over the direction of the religious elements, which were organised into brotherhoods. Ismāʿīl completed his system of domination by the creation of military zones. Tāzā, notably, had its walls rebuilt. This town became the headquarters of the eastern march. A garrison of 2500 ʿAbīd secured the passage from western to eastern Morocco by the pass of Tāzā. It also had to keep in control the Berbers of the Rīf in the north of this region, and the Berbers of the middle Atlas in the south.

For this organisation and these works, Ismāʿīl raised his revenues from a monopoly of the commerce at his ports and from continual raids on the tribes of doubtful loyalty. The monopoly besides filling his treasury enabled him also to prevent contraband traffic in horses and arms.

But hardly had the Sulṭān, after reigning 50 years succeeded in imposing, either by skill or terror, peace within his territory than the rivalries of his sons brought his hopes to naught. He had centred all his policy on the struggle against the Turks of Algiers. He could not realise his dream. He died on 27 Radjab 1139 (March 30 1727) just when the dissensions that were breaking up the Regency of Algiers might have secured his success. He was succeeded by his son Mulāy Aḥmad al-Dhahabī.

ISMĀʿĪL ʿĀṢIM EFENDI. [See ČELEBIZĀDE.]

ISMĀʿĪL ḤAḲḲĪ, SHAIKH ISMĀʿĪL ḤAḲḲĪ AL-BRUSAWĪ or AL-USKŪDĀRĪ, a celebrated Ottoman scholar and poet and one of the most prolific of mystical writers. Born in 1063 (1652—3) in Aidos in Rumelia, to which his father had retired after the great fire in Constantinople, he had at quite an early age the benefit of instruction by the Djelwetī Shaikh Faḍl Ilāhī ʿOthmān. In Adrianople he was initiated into the higher branches of knowledge and Djelwetī mysticism. At the age of 20 he began his fruitful activity as an author in Brusa. On account of some of his mystical tracts he was banished at the instigation of the ʿulamā' to Rodosto. The impulse to wander peculiar to many members of Muhammadan orders never allowed him to settle permanently anywhere, especially as he had not infrequently to suffer from the fanaticism of the ʿulamā'. After a two years' pilgrimage to Mecca and long stays in Üsküdar, Damascus and Scutari he finally settled in Brusa, where he built a mosque and monastery in 1135 and died in 1137 (1724—5). The date 1127 also given is in contradiction to the date of composition of several works.

Ḥaḳḳī composed over a hundred theological works and mystical treatises, which still enjoy considerable esteem and some of which are printed. The best are *Rūḥ al-Bayān* (Būlāḳ 1276 = 1859—60 in four volumes), a celebrated commentary on the Ḳur'ān; *Rūḥ al-Mathnawī*, a commentary on Djalāl al-Dīn Rūmī, and *Faraḥ al-Rūḥ* (Delight of the Soul), a commentary on the *Muḥammadīye* of Yāzidji Oghlu Meḥmed b. Ṣāliḥ b. Kātib, Būlāḳ 1252 and 1258, Constantinople (lithography) 1258. The following are also often mentioned: *Sharḥ al-arbaʿīn ḥadīth*, Constantinople 1253, ed. by Mollā ʿAlī al-Ḥāfiẓ; *Kitāb Ḥaḳīḳat al-Bāṭin* and *Kitāb ʿAin al-Ḥayāt* (1294); *Tuḥfe-i Ismāʿīlīye* (1292); *Sharḥ al-Kabā'ir*, 1257 (1841); *Sharḥ Shiʿb al-Īmān*, 1303; finally a commentary on the *Pend-nāme* of ʿAṭṭār.

Bibliography: M. Nādjī, *Esāmī* (1308), p. 58—9; Semy, *Ḳāmūs al-Aʿlām*, ii. 950; Hammer-Purgstall, *Gesch. der Osmanischen Dichtkunst*, iv. 135—137; Flügel, *Die arab., pers. u. türk. Handschr. . . . zu Wien*, iii. 145, 150 *sq.* 476—482.

(THEODOR MENZEL.)

ISMĀʿĪL ḤAḲḲĪ, a modern Turkish man of letters and literary historian, editor of the periodical *Mekteb*, a moderate follower of the old Asiatic school and a former officer of artillery. Besides a few poems, tales, translations, and articles in periodicals, a series of treatises on literary history have been written by him.

In 1308 (1890—91) appeared his collection of poems *Sonbahār Ḳhazān yakhod Tevbe* (Autumn Love or, Repentance too Late). Two Millī stories written under French influence: *Iki Ḥaḳḳī* (Two Truths) published in N°. 7 of the *Arabṭ kitāb khānesi djeb romanlary*, 1311 (1893—94). In the periodical *Mekteb* appeared his translation of Octave Feuillet's *Roman d'un jeune homme pauvre* under the title *Ḥāl-i ṣaʿb*. He translated Lamartine's *Raphaël* and *Graziella*. His literary studies are more important, as there is by no means a superfluity of such works in Ottoman literature. In the four volumes of his *On dördündji ʿaṣrda Türk Muhar-*

yazilari (The Turkish writers of the xixth century), 1308—1311 [1890—3], he deals with Aḥmed Midḥat Efendi, Ekrem Bey, Djewdet Pasha and Shams al-Dīn Sāmī Bey. Of his *Muʿāṣir Shāʿirlerimiz* (Our contemporary Poets) only the first part appeared in 1311 (1893), which gives specimens of Nāʾilī-zāde Nāẓim Bey, ʿAlī Kemāl Bey, Emīr Humāyūn Bey and Muʿallim Nādjī Efendi. His *ʿOthmānli Muʾellifler-i Meshhūresi* (The most famous Ottoman Authors) stopped after the first volume: *Muʿallim Nādjī*, 1311. His *Muntakhabāt-i Terādjim-i Meshāhīr* also was not completed. Ḥaḳḳī also wrote on Mīr ʿAlī Shīr and the Čaghatai poets. In 1907 he published a very poor history of Russia to the time of Paul I from a French source: "Records of the North or the History of Russia".

Bibliography: Besides his own works are a few cursory notes in Horn, *Türkische Moderne*, p. 51, and Gordlewski, *Očerki po novoi osmanskoi literature*, Moscow 1912, vi. 71, 116.

(Theodor Menzel.)

ISMĀʿĪL PASHA, Khedive of Egypt (1863—1879), second son of Ibrāhīm Pasha [q. v.]; born in 1830, he was educated in Paris, and was employed by his uncle, Saʿīd Pasha [q. v.] in various diplomatic missions, to the Pope, Napoleon III and the Sulṭān of Turkey. In 1861 he suppressed an insurrection in the Sūdān, and two years later succeeded his uncle as wālī of Egypt; he was the first of the descendants of Muḥammad ʿAlī [q. v.] to be styled Khedive, a title bestowed upon him in 1867, by Sulṭān ʿAbd al-ʿAzīz [q. v.], whom he had gratified in the previous year by increasing the tribute paid to Turkey from £ 376,000 to £ 720,000, obtaining in return permission to change the law of succession to direct descent from father to son, instead of to the eldest male of the family, according to the Turkish custom. In 1873, another firmān from the Sulṭān made the Khedive in many respects an independent sovereign.

Ismāʿīl was a man of large ideas, with extensive schemes for reform; he remodelled the customs system, and established a post office; introduced gas and water and other improvements into Cairo, Alexandria and Suez, created the sugar industry and otherwise stimulated commercial progress, by extending railway and telegraph lines, building docks and harbours, and digging canals for irrigation purposes. He encouraged education, established the first schools in Egypt for girls, the polytechnic school for the training of military officers and the medical college; on his accession there were only 185 public schools, but during his reign the number rose to 4,817. In 1869, he opened the Suez Canal, with great pomp and magnificence, in the presence of the Emperor of Austria, the Empress Eugénie and other princes, and availed himself of this occasion to take rank among European sovereigns. In 1875, in place of the old system of consular jurisdiction in civil cases, he established the Mixed Tribunals.

He endeavoured also to develop the Sūdān on the same lines as Egypt, and to suppress the slave trade there. In 1865 he had obtained from the Sulṭān of Turkey a firmān assigning to him the administration of Sawākin and Maṣṣawaʿ, and subsequently (1870—1872) extended his authority over the coast of the Red Sea from Suez to Cape Guardafui. In 1874 he sent an expedition to Dār Fūr [q. v.], defeated the forces of the slave-trader, Zubair Pasha [q. v.], and annexed this country, but further progress eastwards was checked by the resistance of the Abyssinians.

But these various schemes for the aggrandisement of Egypt were costly, and the Khedive had borrowed and squandered money recklessly, both for public purposes and personal ostentation, so that by 1876 the debt of Egypt to foreign financiers had risen to nearly one hundred million pounds, and the country was so impoverished that its ordinary resources were no longer sufficient for the most urgent needs of the administration. Being no longer able to raise loans in the European market, on April 8, 1876, he suspended payment of his Treasury bills. The European powers intervened on behalf of the bondholders and instituted a Commission of the Public Debt, and established the Dual Control, in accordance with which an English official was appointed Controller-General of the revenue and a French official Controller-General of the expenditure of the country. A Commission of Inquiry in 1878 led to the vast landed property of the Khedive being placed under a similar control, and Ismāʿīl accepted a constitutional ministry, including English and French ministers, under the presidency of Nūbār Pasha [q. v.]; but in February 1879 Ismāʿīl dismissed him, on the occasion of a military disturbance headed by ʿArābī Pasha [q. v.], and two months later dismissed his European ministers also, and resisted the demand of the Governments of England and France that the British and French ministers should be reinstated. On June 26, 1879, he was deposed, and four days later he left Cairo for Naples, where the King of Italy had placed a residence at his disposal; later, he went to Constantinople, where he died March 2, 1895.

(T. W. Arnold.)

ISMĀʿĪL PASHA, called Nishāndji, Grand Vizier of the Turkish Sulṭān Sulaimān II, a native of Ayāsh in the province of Angora. After first of all filling the office of a *čokadar* (personal attendant) to the Sulṭān he was entrusted with the rank of Beylerbey of Rumili. In 1089 (1678) he [illegible]

the office of *teshrīfāt*-writer and on the occasion of arrest in the reign of Sulṭān Muḥammad IV received the rank of a vizier (1098 = 1687). After the assassination of Siyāwush Pasha in the rebellion of the Janissaries, which took place on the accession of Sulaimān II to the throne, he was appointed Grand Vizier, but dismissed after holding the office for 69 days (1 Radjab 1099 = May 2 1688), imprisoned in the citadel of Ḳawāla and soon afterwards banished to Rhodes. Prosecuted by the heirs of Zain al-ʿĀbidīn Pasha, Beylerbey of Rūmili, who had been unjustly executed by his orders, he was beheaded in accordance with the *lex talionis* by order of the Grand Vizier Köprülü Muṣṭafā Pasha at the age of over 70 in Radjab 1101 = April 1690. Although of a mild temperament in his youth he grew tyrannical and cruel in the exercise of power. Instead of taking supreme command of the troops himself, he chose quite incompetent people as generals like the rebels Yegen ʿOthmān Pasha.

ISMĀʿĪL AL-SHAHĪD, MAWLĀNĀ, was born on the 28th Shawwāl 1196 (1781) in a renowned Dihli family which traces its pedigree to the Caliph ʿUmar. He was the only son of Mawlānā ʿAbd al-Ghanī and nephew of the illustrious Mawlānā Shāh ʿAbd al-ʿAzīz (d. 1239 = 1823). While a mere boy he lost his father and was brought up as an adopted son under the care of his uncle Mawlānā ʿAbd al-Ḳādir (d. 1242 = 1826). In childhood he was very inattentive and fond of swimming in the Jamna, but as he had a retentive memory and a sharp intellect, in time he became a learned man. He was shocked at the gross *shirk* (idolatrous tendency) which then prevailed amongst the Muslims of India. He preached the doctrines of Islām against all opposition. It was at this time that he came in contact with al-Saiyid Aḥmad al-Mudjaddid. The religious sanctity of the Saiyid won his admiration and he became his disciple and was his constant companion throughout his life. In 1236 (1820) they made a pilgrimage to Mecca, whence they proceeded to Constantinople. There the Ḥādjīs were received with marked consideration. Six years later they returned to Dihli and began to deliver religious lectures with redoubled energy. Many people were reclaimed from the darkness of ignorance to which they had been reduced owing to the indolence of the professional Mullās. Mawlānā Ismāʿīl's rapid success excited the envy of the Mullās who afraid of being discredited with the public tried to lower him in their estimation by severe criticism and malicious censures. But truth triumphed and they were all silenced. In 1243 (1827) Mawlānā Ismāʿīl, with his religious guide, proceeded to Peshāwar and declared a religious war against the Sikhs. They were joined by large numbers of people and succeeded in establishing their authority at Peshāwar. But owing to some innovations upon the usages of the Afghāns, their authority was overthrown. They had to fly across the Indus but fell in with a Sikh detachment; a skirmish took place in which Ismāʿīl with his spiritual guide met with his death in 1247 (1831).

He is the author of the following works: 1) *Risālat Uṣūl al-Fiḳh*, a treatise on the principles of Muhammadan law according to the Ḥanafī school, printed, Dihli s. a. 1314. 2) *Manṣab-i Imāmat*, a Persian treatise on the problem of the imāmat. 3) *Taḳwiyat al-Īmān*, an Urdū treatise on theology, printed 1293, translated into English by Mīr Shahāmat ʿAlī (v. *Journ. Roy. As. Soc.*, xiii. 310 *sqq.*). 4) *Ṣirāṭ al-Mustaḳīm*, a treatise in Persian on the Islamic doctrines; on its contents cf. *Journ. of the As. Soc. of Bengal*, i. (1832) 479 *sqq.*

Bibliography: Ṣiddīḳ Ḥasan, *Itḥāf al-Nubalāʾ*, p. 416; Sir Saiyid Aḥmad, *Āthār al-Ṣanādīd*, ii. 97, and *Journ. Roy. As. Soc.*, xiii. 310 *sqq.* (M. HIDAYET HOSAIN.)

ISMĀʿĪLIYA, a *Shīʿa sect*, so called because it stopped the series of Imāms at Ismāʿīl, eldest son of Djaʿfar al-Ṣādiḳ [q. v.], the sixth imām, so that Ismāʿīl to them was the seventh; his father had at first nominated him as his successor, but having learned of his eldest son's intemperance, he changed his decision and declared Mūsā, his second son, as his successor. The Ismāʿīliya refused to admit this alteration, claiming that the imām, being infallible, could not have prejudiced himself by drinking wine and that it was not permitted to God to change His opinion, contrary to what Djaʿfar had stated. Ismāʿīl died five years before his father at Medina in 143 (760/1) and was buried in the cemetery of Baḳīʿ al-Gharḳad. In spite of the precautions taken by the father to have the death of his son confirmed by numerous witnesses, his partisans would not admit his decease, claiming that he was still alive five years after his father's death and that he was seen in the market at Baṣra, where he cured a paralytic by taking his hand. The sons of Ismāʿīl, involved in the political persecutions of which the ʿAlids were victims, left Medina; Muḥammad, the elder, went to hide in the district of Damāwand, near Raiy; his descendants concealed themselves in Khurāsān, then in the Ḳandahār region and migrated to India, where they still exist at the present day. ʿAlī, his brother, set out for Syria and the Maghrib. From their places of retreat, the descendants of Ismāʿīl sent out missionaries (*dāʿī* q. v., plur. *duʿāt*) to traverse the Muslim world and there preach the doctrine known as that of the esoterics (Bāṭiniya), whose starting point was the allegorical exposition of the Ḳurʾān. One of these missionaries was Maimūn, called al-Ḳaddāḥ "the oculist", whose son ʿAbd Allāh [q. v. i. 26] became chief of the branch of the Ḳarmaṭians [q. v.]. With the assistance of a rich Persian, Muḥammad b. Ḥusain, called Zaidān, who had read in the stars that the Iranians were going to regain the empire [*Fihrist*, p. 188; O. Loth, in *Morgenländische Forschungen*, p. 307, M. Amari, *Storia dei Musulmani di Sicilia*, p. 114), he made them adopt his system, at once religious and social. At the end of the third century A. H. ʿUbaid Allāh b. Muḥammad al-Mahdī, recognised as imām by the Berbers of the tribe of Ketāma [q. v.], founded in Tunisia the empire of the Fāṭimids [q. v.] or ʿUbaidids, soon afterwards extended to Egypt.

Ismāʿīliya of Persia. Ḥasan b. Ṣabbāḥ [q. v.] was born in Raiy and was there instructed in the doctrine of the Bāṭiniya; to perfect himself in it, he went to Egypt in the caliphate of al-Mustanṣir in 471 (1078—1079), after a stay of

a year and a half there, he was expelled and returned to Persia to act as a missionary and surreptitiously introduced himself into the fortress of Alamūt [q. v.], where he had already numerous partisans (6 Radjab 483 = Sept. 4 1090). Taking this castle as a base, he made raids in all directions with his disciples, taking the existing fortresses by surprise and building new ones. It is said that he made beautiful gardens in which the *fidā'ī*'s [q. v.], initiates of the first degree, enjoyed in anticipation the delights of Paradise; but it is more probable that this paradise was purely imaginary and was a result of the hallucinations caused by taking *ḥashīsh* [see the article ASSASSINS].

Thinking this a dangerous establishment, the Saldjūḳ Sulṭān Malik-Shāh ordered the Amīr Arslan-Tash to attack Ḥasan b. Ṣabbāḥ (485 = 1092). He laid siege to Alamūt but was completely routed in a nocturnal sortie by the garrison. In the same year another centre of Ismā'īlī propaganda, the fortress of Dara, was besieged in vain by another lieutenant of the Sulṭān, Ḳizil Sārygh. The death of Malik-Shāh put an end to these attempts of repression. Forty days previously the assassination of the vizier Niẓām al-Mulk by a *fidā'ī*, named Ṭāhir Arrānī, had been the first of these mysterious executions which were to plunge the Muslim world in terror. Two of the disciples of the master, the *ra'īs* Muẓaffar and Kiyā Buzurg-Umīd (see BUZURGUMMĪD), seized respectively the fortress of Gird-kūh and Lamsar (Lanbasar, Ḥamdallāh Mustawfī, *Nuzhat al-Ḳulūb*, p. 61) (495 = 1102). Sulṭān Muḥammad sent against the Ismā'īlīya Niẓām al-Dīn Aḥmad, who for seven years ravaged the country round Alamūt, and next the Atābeg Nushtigīn Shīr-gīr, who was about to take Lamsar and Alamūt at the end of the year 511 (April 1118), when the Sulṭān's death interrupted the campaign. Sandjar, terrified by the sight of a dagger which a *fidā'ī* had plunged in the ground in front of his throne, made peace with the Ismā'īlīya.

Ḥasan dying on 26 Rabī' I 518 (June 12 1124) Kiyā Buzurg-Umīd succeeded him and reigned without being disturbed till his death on 26 Djumādā I 532 (May 11 1138); it was the same with the latter's son, Muḥammad (died 557 = 1162). Muḥammad's son Ḥasan, called 'Alā dhikrihi al-Salām introduced innovations into the cult. He placed the *minbar* opposite the *ḳibla*, while the rule is that the pulpit should be placed to the left of the *miḥrāb* (559 = 1164) and he claimed to be a descendant of Nizār, son of al-Mustanṣir, which gave him the quality of Imām; the sermon in which he took this title and fixed the Ismā'īlī doctrines, is called by his followers the sermon of the resurrection. At the end of four years he was assassinated at the castle of Lamsar by his brother-in-law, a descendant of the Būyids. His son Muḥammad II avenged his death by the execution of the members of the family of the murderer and reigned undisturbed for 49 years. While the latter had carried on his father's tradition, his son Djalāl al-Dīn Ḥasan III on the contrary announced at his accession his intention of re-establishing the true religion of Islām. He ordered the mosques to be rebuilt and re-established public worship on Fridays. He was therefore given the name Naw-Musliman (new Muslim). He died of poison like his father. His son 'Alā' al-Dīn Muḥammad III was only nine years old; his youth as well as a loss of blood caused by an accident in the fifth year of his reign forced him to withdraw from public affairs, thenceforth he lived confined to his palace and was murdered during a fit of intoxication (last day of Dhu 'l-Ḳa'da 651 = Jan. 21 1254) at the instigation of his son Rukn al-Dīn Khūr-Shāh. Hūlāgū [q. v.] having received orders from the Mongol emperor to destroy the stronghold of these dangerous fanatics (654 = 1256) laid siege to the fortress of Maimūndiz, where Rukn al-Dīn was. The grand-master surrendered, was kept a prisoner and taken to the court of Mangū, who refused to receive him; on his way back he was murdered on the banks of the Oxus. The fortress of Alamūt capitulated; that of Gird-kūh in Dāmghān held out for three years. The last traces of Ismā'īlīya disappeared from Kuhistān in the reign of the Mongol Khān Abū Sa'īd, who sent a proselytising mission to Ḳāin. Shāh-Rukh, son of Tīmūr, also had the last followers of heresy hunted out in the same province; the only persons that could be suspected were a few soldiers, Saiyids or darwīsh.

Ismā'īlīya of Syria. Their establishment in this country followed soon after their installation in the mountains of Dailam. They are found at Aleppo towards the last years of the 11th century of our era in the reign of the Saldjūḳ prince Riḍwān b. Tutush, who was converted to their doctrines by a physician-astrologer. Their first victim was the father-in-law of this prince, Djanāḥ al-Dawla Ḥusain, lord of Ḥimṣ, as he was about to march against the count of St. Gilles to make him raise the siege of Ḥiṣn al-Akrād [q. v.]. He was assassinated while at prayer by three Persians disguised as Ṣūfīs. The astrologer was not long in dying suddenly (he was perhaps assassinated) and handed on his power to a companion, also of Persian origin, Abū Ṭāhir Ibn al-Ṣā'igh. The Ismā'īlīya took Apamaea by a ruse in 499 (1106), but the Crusaders took it from them again very soon afterwards. Their excesses provoked a massacre of their partisans at Aleppo (507 = 1113). The missionary Ibrāhīm, having escaped, tried to seize Shaizar on the Orontes by taking advantage of a Christian festival. In spite of the successful surprise, the inhabitants, led by the Amīrs of the family of Munḳidh, regained the barbacan (*bāshūra*) and were hauled up by ropes into the interior by the women who had remained there. Although the Ismā'īlīs had again gained a certain amount of influence in Aleppo the ruler Īlghāzī prevented their gaining possession of the Ḳal'at al-Sharīf [cf. p. 231[b] *infra*]. — On Ramaḍān 23, 515 (Dec. 5 1121) Ismā'īlī *fidā'ī*'s assassinated the Fāṭimid vizier al-Afḍal b. Badr al-Djamālī [q. v.].

A rising of the population of Āmid (Diyār Bakr) resulted in the massacre of the proselytes they had made in this town (518 = 1124) but the acquisition of the fortress of Bāniyās [q. v.] re-established their fortunes; Tughtigīn, prince of Damascus, wishing to save his favourite Bahrām from the ill-treatment of the Damascenes, had left it to him. Bahrām fell in battle in 522 (1128) against the rebel natives. Ismā'īl the Persian succeeded him; after the massacre of his partisans at Damascus (15 Ramaḍān 523 = Sept. 2 1129) he handed the citadel of Bāniyās over to the Crusaders.

To make up for this loss the Ismā'īlīya purchased from Saif al-Mulk b. 'Amrūn the castle of

Kadmūs (527 = 1132), where Benjamin of Tudela still found a few decades later the residence of the head of the sect, and captured by a trick that of Maṣyāth (Maṣyāf). At this time they held no less than six fortresses in Syria; — as many as ten according to William of Tyre —. To avenge the murder of Raymond I, count of Tripoli, the Templars attacked them and forced them to pay tribute.

At this period, the Ismā'īliya (from 1169) had at their head Rashīd al-Dīn Sinān, son of Sulaimān, grandmaster of the Assassins, who came from the neighbourhood of Baṣra and had studied at Alamūt. The immoralities to which they abandoned themselves roused against them the inhabitants of the town of al-Bāb, between Bāliś and Aleppo, who smoked them out of their retreats and exterminated them as far as possible (cf. also Ibn Djubair, ed. Wright—de Goeje, p. 249 *sq.*). On 11th Dhu 'l-Ka'da 571 (May 22 1176) Ṣalāḥ al-Dīn just missed being a victim of an attempt against him by the fanatics and was saved by the strips of iron which lined his bonnet; to avenge himself he was going to lay siege to Maṣyāth, but refrained from taking the town on account of the fatigues undergone by his army or perhaps in face of threats of the Assassins. He even seems to have made a pact with his enemies, for he stipulated in the treaty concluded with Richard Coeur de Lion that it should apply equally to the lands of the Ismā'īliya.

On Rabī' II, 13, 588 (Apr. 29 1192) two Ismā'īlīs attacked Conrad of Montferrat, lord of Tyre, just as he was coming from dinner with a bishop and assassinated him. Later Raymond, elder son of Bohemund IV le Borgne, prince of Antioch, was killed in the church of Antarsūs.

Hūlāgū, before putting to death Rukn al-Dīn Khurshāh, grandmaster of Alamūt, received from him an order to the commandants of the fortresses in Syria to hand them over to the Mongols. Four of these castles were actually surrendered as soon as the Mongols appeared in Syria in 658 (1260) but were retaken soon afterwards by their old masters on the victory of the Mamlūk Sulṭān Kuṭuz. It was Sulṭān Baibars who finally conquered these fortresses from 668 to 671 (1270—1273). From that date the Ismā'īliya recognised Egyptian sovereignty and continued to supply assassins to rulers willing to employ them; Ibn Baṭṭūṭa (ed. Paris, i. 166, 167) knew that they were in the pay of al-Malik al-Nāṣir Muḥammad b. Kalā'ūn.

Ismā'īliya in India. They are known by the names of Khodja [q. v.] or Mawlā; their chief is the Agha Khān [q. v.], whose official title is His Highness Aga Sir Sulṭān Muḥammad, a great sportsman and devoted to travelling, a contributor to the *Nineteenth Century* and to *East and West*; he fills an important position in politics and in 1906 was president of the deputation sent to the Viceroy by the Muslims of India. He is the descendant of the old Imāms and can trace his descent direct to Abu 'l-Ḥasan, governor of Kirmān under the Zand dynasty, who afterwards retired to his estate of Maḥallāt near Kumm. The latter's son was Shāh Khalīl Allāh, called Saiyid Kahkī, murdered in 1817 at Yazd; to the latter's son, Agha Khān Maḥallātī, Fatḥ 'Alī Shāh gave the hand of one of his daughters; rebelling in 1838 he had to leave Kirmān and take refuge in Sindh, where he found some Nizārī Khodjas; he lived successively in Bombay, Poona and Bangalore. Muḥammad is the son of this Agha Khān; from his father he has inherited his taste for sport.

Present Distribution of the Ismā'īliya. There are still several thousands in Syria, who live in the ancient fortresses of Maṣyāth, Kadmūs, etc. They are inoffensive, and faithful subjects of the Ottoman empire; the plundering of the first of these cities by the Nuṣairīs in 1809 produced the ms. publ. and transl. by Stanislas Guyard (*Fragments relatifs à la doctrine des Ismaélis* in *Notices et Extraits*, xxii. i. 1874). In Persia there are some in the district above mentioned of Maḥallāt near Kumm; in Central Asia they are found in Badakhshān, Khokand and Karātegīn, as well as in a district near Balkh; in Afghānistān, they are known under the name of Mufradī. In Kāfiristān (valleys of Djalālābād and Kunar) there are many Mawlās, as well as in several valleys of the upper Oxus (Sarīkol, Wakhān and Yārūn). In India there are 50475 in the districts of Adjmīr, Merwāra, Bilūčistān, the Pandjāb and Kashmir, and 52058 in those of Bombay, Baroda and Coorg (*Census of India*, 1901, I. 561 *sqq.*). They are not all followers of the Agha Khān. Among the Bohora [q. v.] of Gudjarāt, the Da'ūdī, who form the bulk of the community (130,000), are Ismā'īlī (*Rev. du Monde Musulman*, v. 472).

They are numerous in 'Omān: there are some in all the towns; their headquarters are at Maṭraḥ, near Muscat. They are also found at Zanzibar and in what used to be German East Africa, where they number tens of thousands and are increasing in numbers by conversions.

Doctrine. God is entirely without attributes, incomprehensible and incapable of being cognised. He did not create the universe directly; by an act of will called *amr*, he made manifest Universal Reason, in which are all the divine attributes and which is God in his implied outward manifestation. As prayer cannot be addressed to an inaccessible being, it is turned toward his exterior manifestation, Reason, which thus becomes the real divinity of the Ismā'īliya. As one cannot attain to knowledge of God, but only of Reason, the latter is given the names of the Veil, the Place, the Antecedent, Spirit, the First.

Reason creates the universal Soul, whose essential attribute is life, as that of reason is knowledge; being imperfect in the latter respect, it necessarily strives to reach perfection. Whence arises a movement which is the inverse of emanation. The Soul produced primal matter, which forms the earth and the stars; it is passive and receives the impress of forms, the ideas of which exist in Reason.

There are two secondary and primitive entities, space and time. The combined action of these five entities produces the movements of the spheres and of the elements. The appearance of man is explained by the need which the universal soul feels to attain perfect knowledge in order to rise to the nature of universal Reason. When this end is attained all movement will cease. To gain salvation knowledge must be acquired, which can only come from the earthly incarnation of Reason, the Prophet, with his successors the Imāms. Incarnate reason is called *nāṭiḳ* "speaking", and the incarnate soul *asās* „foundation"; the first is the Prophet, manifesting the revealed word, the second is the interpreter of this word by means of the inner meaning which this word contains (*ta'wīl*).

the three last principles became the *ḥudūd*, the *ḥudjdja*, charged with giving proof of the mission of the *imām*, and the *dāʿī* or "missionary". Muḥammad was the *nāṭiḳ* and ʿAlī the *asās*.

There were several degrees of initiation (at first seven; then nine). The missionary began by putting embarrassing questions to the neophyte on knotty points of Muslim theology (the usual process with the Bāṭiniya) and led him quite gradually to admit that these difficulties were easily solved by the allegorical and symbolical interpretation of the Ḳurʾān. Calculations made from the numerical value of letters played an important part (see *Fragments* ii. of St. Guyard and the article ḤURŪF above ii. 338b). When the proselyte had acknowledged the force of his arguments, the missionary made him take an oath not to reveal any of the mysteries which were going to be entrusted to him and taught him that in order to be saved it was necessary to submit blindly, *perinde ac cadaver*, to the spiritual and temporal guidance of the Imām. The majority of the adepts did not pass beyond the first or second stages of initiation; the missionaries hardly reached the sixth. Only a few superior individuals could hope to reach the higher degree (cf. the theories of the Shīʿa and mystics on the *insān kāmil* [q. v.]).

Paradise allegorically signified the state of the soul which had reached perfect knowledge, hell was ignorance. No soul was condemned to hell eternally; it returned to earth by metempsychosis until it had recognised the imām of the epoch and had learned theological knowledge from him. Evil did not exist as a principle and would one day disappear through the progressive assimilation of all creation to universal reason. In spite of the reputation as assassins, which furnished the fame of the Ismāʿīliya, it should not be imagined that their crimes were the application of a dogma; one should rather see in this the excesses of the absolute political power which the grandmasters had arrogated to themselves. Rousseau (*Annales des Voyages*, xiv. 286) has noted that those whom he knew were hospitable and of a gentle temperament. They do not care to travel, are active at home, much attached to their religion, which however differs very much from the old creed, and are brave at need and obedient to their chiefs.

ISMAʿĪLIYA, a town situated about the middle of the Suez Canal. It was laid out in 1863 during the construction of the Canal, and named after the Khedive Ismāʿīl. It was a place of much importance whilst the work of excavation went on, but as soon as the canal was completed, it quickly decayed. In recent years it has recovered some of its prosperity through the traffic between Cairo and the mail steamers. It is connected by railway with Port Saʿīd, Cairo and Suez, and there are good hotels, baths, etc. The town is surrounded by plantations and gardens, Lake Timsāḥ being on the south side.

ISPAHĀN [see IṢFAHĀN.]

IṢPAHBAD (Pahlavi *spāh-pat*, head of an army, Procopius' ἀσπεβέδης), general of cavalry. Under the Sāsānians, as a proper noun, it meant one of the seven privileged families of Arsakid origin; as a common noun, it was applied to the fifth of the great hereditary offices, the command of the cavalry (Theophylactus, iii. 8); the second of these offices, that of military affairs in general, was that of the *Ērān-spāhbadh*. Under Khusraw I Anōshirawān, Persia was divided into four great military commands, the chiefs of which had the title *iṣpahbad* and had each under their orders a *pādhgospān* (viceroy), who was formerly independent. After the conquest of Persia, Ṭabaristān, separated from the rest of the country by the high chain of Elburz, maintained its independence for a considerable time under princes who had the title *iṣpahbad* (Arab. *al-iṣbahbadh*, al-Balādhurī, p. 336 *passim*). Māzyār (Mayazdyār) b. Ḳārin was appointed by the Caliph al-Maʾmūn governor of this province with the same title (*ib.*, p. 339). The coins struck by these princes give the names of Khwarshēdh I in 93 (711) and 97 (715), Farrukhān (105—110 = 723—728), Dādh Burzh Mihr in 120 (738), Khwarshēdh II (122—148 = 740—765); after 151 (768) the names are those of Muslim governors. When in the vith (xiith) century, the family of Bāwand reconstituted an independent state in Ṭabaristān, these princes, who added Muslim titles to their Iranian proper names, received the title *iṣpahbad* (ʿAlāʾ al-Dawla ʿAlī b. Shahriyār b. Ḳārin, Nuṣrat al-Dīn Rustam, Tādj al-Mulūk ʿAlī b. Mardāwīdj, Ḥusām al-Dawla Ardashīr b. Ḥasan).

ISPANDĀRMADH (P.), twelfth month of the Persian solar year, also name of the fifth day of each month.

ISPARTA (in Ibn Baṭṭūṭa: Sabarta; Sabarta in the Arabic translation of the Acts of the Apostles, xxi. 1, for the Greek Πάταρα, cf. *Zeitschr. d. Deutschen Morg. Gesellsch.*, ix. 731), the ancient Baris Pisidiae (Pliny, *Nat. Hist.*, v. § 147; Ptolemy v. 5 § 5), was taken from the Byzantines by the Saldjūḳs of Ḳōnya in the reign of Ḳilidj Arslān III (600—601 = 1203—1204) (Houtsma, *Rec. de Textes rel. à l'Hist. des Seldjoucides*, iii. 62 = iv. 26). After the downfall of the kingdom of Ḳōnya Isparta belonged to the Ḥamīdoghlu [q. v.] and was sold by the last ruler of this dynasty in 783 (1381—2) with the greater part of his lands to Sulṭān Murād I (Leunclavius, *Hist.*, p. 258; Saʿd al-Dīn, i. 98). Under Ottoman rule Isparta was the residence of the *sandjaḳ-bey* of Ḥamīd-eli, now it is the headquarters of the *mutaṣarrif* of Ḥamīdābād and of the Greek Metropolitan of Pisidia. The population of the prosperous town is estimated at 30,000, of whom 6000 are Greeks and 500 Armenians; it has numerous mosques (13 *djāmiʿ*, 63 *masdjid*), the mosque of Firdawsbey being a work of Sinān, 9 medreses and a library of 600 volumes; also 8 Greek churches and one Armenian, the former not without interest. Among the products of industry may be mentioned carpets (600 looms), *ālādja* and *boghasi* (250 workshops), silk, attar of roses, and alcohol.

ISRĀʾ. The term *isrāʾ* is taken from the Ḳurʾān, Sūra xvii. 1: "Glory to Him who caused His servant to journey by night (*asrā bi ʿabdihi lailan*) from the sacred place of worship to the further place of worship, which We have encircled with blessings, in order that We might show him some of our signs! Verily He (i. e. God) is the Hearer and the Beholder". — We do not know whether this verse originally formed part of chap. xvii or was first promulgated in some other context, nor need we enquire what may have been the real sense of the verse. In any case it is noticeable that the tradition gives but three explanations.

1°. The older one, which disappears from the more recent commentaries, detects in this verse an allusion to Muḥammad's Ascension to Heaven. This is the more interesting, as these traditions (Bukhārī, ed. Cairo 1278, ii. 185, *Bāb ḥadīth ʾl-isrāʾ* … *sūrat Banī Isrāʾīl*, vi. 2; Muslim, ed. Būlāḳ 1290, i. 59; Ṭabarī, *Tafsīr*, xv. 3; cf. *Der Islam*, vi. 12, 14) retain also the original signification of the story of the Ascension which has been shown to be the initiation to the prophetic career (Bevan, *Mohammed's Ascension to Heaven*, p. 58; Schrieke, *Der Islam*, vi. 1 *sqq.*; see the art. MIʿRĀDJ). This explanation interprets the expression *al-masdjid al-aḳṣā* "the further place of worship" in the sense of "Heaven" and, in fact, in the older tradition *isrāʾ* is often used as synonymous with *miʿrādj* (*Der Islam*, vi. 14).

2°. The second explanation, the only one given in all the more modern commentaries, interprets *al-masdjid al-aḳṣā* as "Jerusalem" and this for no very apparent reason. It seems to have been an Umaiyad device intended to further the glorification of Jerusalem as against that of the holy territory (cf. Goldziher, *Muh. Stud.*, ii. 55 *sqq.*; *Der Islam*, vi. 13 *sqq.*), then ruled by ʿAbd Allāh b. Zubair. Ṭabarī seems to reject it. He does not mention it in his "History" and seems rather to adopt the first explanation (see *Der Islam*, vi. 2, 5, 6, 12, 14; Ṭabarī, *Annales*, i. 1157 *sqq.*, a passage which appears to represent the historian's final verdict formed on full consideration of the evidence before him, cf. Bevan, *op. cit.*, p. 57).

Explanations 1° and 2° concur in interpreting *ʿabd* in xvii. 1 by Muḥammad and this seems to be right (*Der Islam*, vi. 13, note 6). The *ḥadīth* admitted both interpretations and, when the Umaiyad version had arisen, harmonised the two by assigning to *isrāʾ* the special sense of night journey to Jerusalem. The Ascension, having lost its original meaning, was altered in date, being made to fall at a later period (see art. MIʿRĀDJ) and it became possible to combine both stories as appears, in fact, to have been done previously by Ibn Isḥāḳ in the oldest extant biography of Muḥammad (Bevan, *op. cit.* p. 54).

The story of the night journey to Jerusalem runs as follows:

One night as Muḥammad was sleeping in the neighbourhood of the Kaʿba at Mecca (or in the house of Umm Hāniʾ, *Der Islam*, vi. 11) he was awakened by the angel Gabriel who conducted him to a winged animal, called Burāḳ (Bevan, *op. cit.*, p. 55, 57, 59; *Der Islam*, vi. 12 *sq.*, with the literature quoted there and the art. BURĀḲ), and with Muḥammad mounted on this animal they journeyed together to Jerusalem. On the way thither they encounter several good and several wicked powers (*Mishkāt al-Maṣābīḥ*, ed. Dihli 1268, p. 521 *sq.*; Baghawī, *Maṣābīḥ al-Sunna*, ed. Cairo 1294, ii. 179, with a harmonising interpolation) and visit Hebron and Bethlehem (Nasāʾī, *Sunan*, ed. Cairo 1312, i. 77 *sq.*; Nuwairī, MS. Warner 2°, p. 35, l. 5—10). At Jerusalem they meet Abraham, Moses, and Jesus, of whom a description is given (e. g. Bukhārī, ed. Cairo 1278, ii. 147). The *ṣalāt* is performed, Muḥammad acting as imām and thereby taking precedence of all the other prophets there assembled. This meeting with the Prophets at Jerusalem resembles and may well have been modelled on the transfiguration of Jesus on Mount Tabor (Matth. xvii. 1; Mark ix. 1; Luke ix. 28), cf. *Der Islam*, vi. 15.

3°. The third interpretation of Sūra xvii. 1 is based on xvii. 62, where *ruʾyā* "vision" is explained as *isrāʾ*. This implies that the night journey was not a real journey but a vision.

Standing at the *hidjr* Muḥammad saw Jerusalem and described it to the unbelieving Ḳuraishites (Bukhārī, ii. 222, iii. 102; Muslim, i. 63; Ṭabarī, *Tafsīr*, xv. 3, l. 14 a. f., etc.). The story is woven into a connected whole as follows: Muḥammad journeys by night to Jerusalem, returns and at Mecca describes his adventures; the Ḳuraishites disbelieve him and Muslims apostatise; Muḥammad seeks to defend the truth of his story, but he has forgotten the particulars; whereupon Allāh causes him to actually behold Jerusalem (see *Der Islām*, vi. 15 *sq.*).

In the more modern and longer narratives the story is further amplified (see e. g. A. Müller, *Der Islam im Morgen- und Abendland*, i. 58 *sq.*). The prophet is said to have held 70 000 conversations with Allāh, although the whole journey proceeded so quickly that, when he returned, his bed was still warm and the watercup which he had overthrown with his foot at his hurried departure, was not yet empty. By Muslim theologians the question has been discussed, whether the *isrā'* happened while Muḥammad was asleep or awake and whether it was his spirit or his body which journeyed. The orthodox opinion is that the journey was performed by Muḥammad with his body and awake. Ṭabarī in his commentary (xv. 13) very decidedly supports this meaning for the following reasons: 1) If the prophet had not been carried away in a corporeal sense the event would afford no proof of his divine mission and those who disbelieved the story could not be accused of infidelity. 2) It is stated in the Ḳur'ān that God caused his servant to journey, not that He caused his servant's spirit to journey. 3) If the Prophet had been carried away in spirit only, the services of Burāḳ would not have been required, since animals are used for carrying bodies not for carrying spirits (Bevan, *op. cit.*, p. 60; Schrieke, *Der Islam*, vi., 13; Ṭabarī, Baiḍāwī, and Baghawī, *Tafsīr*, ad xvii. 1). Mystics and philosophers often favour an allegorical interpretation (Goldziher, *Geschichte der Philosophie im Mittelalter* in *Kultur der Gegenwart*, i. v., p. 319).

(B. SCHRIEKE.)

ISRAEL. [See YA'ḲŪB.]

ISRĀFĪL, the name of an **Archangel**, which is probably to be traced to the Hebrew *Serāfīm* as is indicated by the variants Sarāfīl and *Sarāfīn* (*Tādj al-'Arūs*, vii. 375). The change of liquids is not unusual in such endings. His size is astounding; while his feet are under the seventh earth, his head reaches up to the pillars of the divine throne. He has four wings: one in the west, one in the east, one with which he covers his body and one as a protection against the majesty of God. He is covered with hair, mouths and tongues. He is considered to be the angel who reads out the divine decisions from the well-kept Tablet and transmits them to the Archangel to whose department they belong. Three times by day and three times by night he looks down into Hell and is convulsed with grief and weeps so violently that the earth might be inundated by his tears.

For three years he was the companion of the Prophet, whom he initiated into the work of a prophet. Gabriel then took over this task and began the communication of the Ḳur'ān.

Alexander is said to have met him before his arrival in the land of darkness; there he stood upon a hill and blew the trumpet, tears in his eyes. If he is called Lord of the Trumpet, it is mainly because he continually holds the trumpet to his mouth in order to be able to blow at once as soon as God gives the order for the blast which is to arouse men from their graves. It is however also said that Isrāfīl will be first aroused on the day of the Resurrection. He will then take his stand upon the holy rock in Jerusalem and give the signal which will bring the dead back to life.

In modern Egypt it is said that his music will refresh the inhabitants of Paradise.

(A. J. WENSINCK.)

ISRĀ'ĪL, the name of the **patriarch** of Israel only appears once in the Ḳur'ān, apart from the frequent name, Banū Isrā'īl, for the people of Israel. In Sūra iii. 87 it is said: "All foods were permitted to the Israelites except that which Israel declared forbidden for himself before the Tora was revealed". According to the commentators, this means that the restrictions on food were only revealed as a result of the wickedness of the Israelites. Their ancestor himself only refrained from eating camel flesh or drinking camel milk; according to some, because he was afflicted with the disease called *'irḳ al-nasā*, which kept him awake by night and left him during the day. He therefore made a vow to abstain from his favourite food, if he should be cured. According to others, he did not eat the *'irḳ al-nasā* (*nervus ischiadicus*) by the advice of his physicians, or he abstained from all sinews (*'irḳ*). The word is a translation of the Hebrew *gīd* and *al-nasā* is a transcription of the Hebrew *nashè*. This points to *Genesis* xxxii., the well known story of the dislocation of Jacob's thigh by the angel as an explanation of the fact that the Israelites "to this very day" do not eat the *nervus ischiadicus*.

The question remains how could Jacob's private abstinence be obligatory for the Israelites. According to some, a prophet, as Jacob was, is by nature qualified to decide questions of law (Arabic *mudjtahid*). According to others, Jacob received God's permission to make this regulation.

The rest that is told of Isrā'īl in the Ḳur'ān is found under the name Ya'ḳūb. At first Muḥammad seems to have regarded Ya'ḳūb as a son of Ibrāhīm. In the prophecy made to Sara, he says: "Then we promised her Isḥāḳ and afterwards Ya'ḳūb" (xi. 74; cf. Snouck Hurgronje, *Het Mekkaansche Feest*, p. 32). The commentaries hasten to explain that according to the Arabic usage "afterwards" must refer to the grandson.

It is further stated in the Ḳur'ān that Ya'ḳūb on his death bed warned his sons to be steadfast in the faith of Ibrāhīm (ii. 126 *sqq.*); like most of the patriarchs he received revelations (ii. 130 etc.).

Muslim legend is acquainted with the main points of Jacob's history. Only divergent and non-Biblical

features will be noted here. Yaʿḳūb was actually older than his twin brother Esau. When he was going to be born in front of the latter, Esau was angry and the two brothers quarrelled even in the mother's womb. Esau then said: Wallāh, if thou wishest to be born first, I shall close up my mother's womb and kill her. Yaʿḳūb then yielded and Esau was the first born. — This story is also found in Jewish literature. — After winning the first born's blessing by trickery, Yaʿḳūb fled to his uncle. From fear of Esau he concealed himself by day and travelled by night (*yasrī* or *sarā al-lail*), hence the name Isrāʾīl. The Muslim legend therefore does not know of the change of name at Penuel. — As to his marriage with two sisters, it is said that Moses was the first to forbid this. But it is also said that Yaʿḳūb did not marry Raḥīl until after Lyā's death.

ISSIK-KUL (Turkish "warm lake"), the most important mountain lake in Turkistan and one of the largest in the world, situated in 42° 30′ N. Lat. and between 76° 15′ and 78° 30′ E. Long., 5316 feet above sea level; the length of the lake is about 115 miles, the breadth up to 37 miles, the depth up to 1381 feet, and the area 2400 square miles. From the two chains of the Tian-Shan, the Kungei-Alatau (in the north) and the Terskei-Alatau (in the south) about 80 large and small mountain streams pour into the Issik-Kul, of which the most important, Tüp and Djergalan, flow into it from the east; of the others there may be mentioned: on the south bank, the Karakol, Kizil-Su, Djuka (or Zauka), Barskoun and Ton, on the north bank, two Aḳ-Su's and three Koi-Su. On the origin of the depression Kutemaldi, which now connects the Ču with the Issik-Kul [cf. *EI*, i. 880b *sqq.*], views differ; it is said that the Kočkar, now the upper course of the Ču, previously flowed into the Issik-Kul and the latter had an exit to the Ču; at present the Kočkar sends an arm to the Issik-Kul through the Kutemaldi only when it is flooded; at other times there are only a few ditches there filled with water, without any definite current. The question is only of importance for geology and physical geography; in the historical period the Issik-Kul has, as all accounts show, always been a salt lake without an exit.

The oldest of these descriptions we owe to the Chinese writer Hiuen-Tsang (viith cent. A. D.); the Chinese name (Je-Hai = warm sea; the lake never freezes) corresponds exactly to the Turkish name. The latter first appears in the *Ḥudūd al-ʿĀlam* (372 = 982—3); in Ḳudāma (ed. de Goeje, p. 262) the lake is only mentioned, but not named. The ms. of the *Ḥudūd al-ʿĀlam* has *Iskūl* (f. 3b) or *Iskūl* (f. 18a); the form was probably the same in the *Mudjmal al-Tawārīkh* (the ms. has S-kūl, cf. W. Barthold, *Turkestan* etc., i. 19); Gardīzī (in Barthold, *Otčet*, etc., p. 89 all.) writes Isigh-Kūl. Ḳazwīnī quotes Iskūl from al-Gharnāṭī in Nallino, *al-Battani*, p. 175, but with *taḳdīd* over the *k*. In the history of Tīmūr's campaigns, in Sharaf al-Dīn (*Ẓafar-Nāma*, Ind. ed., i. 494, ii. 634), as well as in Ibn ʿArabshāh (Egypt. ed., p. 136) the form is Isi Kūl, in the *Taʾrīkh-i Rashīdī* (cf. the text in Barthold, *Otčet* etc., p. 50, note 1) Isigh Kūl.

In the oldest Chinese accounts (from the iind century A. D.) the land appears in the possession of the nomadic people of the Wu-sun. But from the viith century A. D. on, permanent settlements, even towns are mentioned. One of the trade routes from China to Western Asia at that time led through the Bedel pass to the south bank of the Issik-Kul and from there into the valley of the Ču; the most important market on the Issik-Kul was Barskhān, the name of which is probably identical with the modern name of the river Barskoun. Gardīzī gives a legend due to a popular etymology about Alexander the Great and Persians left behind by him on the Issik-Kul; this popular etymology makes certain the reading Barskhān against the form Nūshdjān given by de Goeje according to Yāḳūt, iv. 823. According to Gardīzī, Barskhān could put 6000 men in the field; according to Ḳudāma, the principal place on the shore of the lake could itself raise 20,000 men (Barskhān, according to Ḳudāma, consisted of nine towns, four of some size and five small ones). Three days journey west of Barskhān lay Tūnk, the name of which obviously corresponds to the name of the river Ton; between Barskhān and Tūnk there were only to be seen tents of the nomad Djikil; 12 *farsakh* west of Tūnk was the town of Yār, which could raise 3000 men. In *Ḥudūd al-ʿĀlam* there is further mentioned "a prosperous place, visited by merchants", the town of Sikūl, on the border between the settlements of two nomad peoples, the Djikil and the Khallukh (Karluḳ); the town probably bore the name of the lake; a town "Yssicol" on the north shore of the lake of the same is still given in the *Carte Catalane* of the year 1375 A. D.; there was said to be an Armenian monastery with relics of the Apostle Matthew (*Notices et Extraits*, xiv. Pt. ii., p. 132 *sq.*).

Of this civilisation, which probably was destroyed about the same time (viiith = xivth century) and under the influence of the same causes as the civilisation on the Ču [cf. i. 881], only a few walls and mounds of brick, and some cemeteries have survived, including a Muhammadan cemetery on the Kungei-Aksu with inscriptions of the viith (xiiith) century (*Protokoll Turk. Kružka Ljub. arkh.* xi. 5 *sq.*) and a Nestorian cemetery discovered in 1907 on the Tjuka, with inscriptions in Syriac and Turkish; one of these inscriptions (of 1330 A. D.) was published by P. Kokowzoff (*Bulletin de l'Académie*, etc. 1909, p. 774 *sq.*, 788 *sq.*).

The Turkish and Mongol nomads liked to use the shores of the Issik-Kul as a winter resort on account of the favourable weather conditions (the snow here rarely lies to any considerable depth); so that the Issik-Kul is several times mentioned in the military history of Central Asia. A fortress was built by Tīmūr "in the middle of the lake", i. e. on an island, to which, amongst others the Tatars deported from Asia Minor were banished. It is probably the same fortress as is called Koi-su by Ḥaidar Mīrzā (q. v., ii. 219) (*Taʾrīkh-i Rashīdī*, transl. Ross, p. 78); a Mongol amīr is said to have sent his family there in the 16th (17th) century, to put them in safety from the inroads of the Kalmucks. At the present day there are no islands in the lake; the disappearance of the island mentioned, with the fortress upon it was probably caused by an earthquake.

Connected with this perhaps is the fact that pieces of bricks and other fragments are frequently washed up on the shores of the Issik-Kul. On the Issik-Kul itself it is said that a great town here was overwhelmed by the waters of the lake and its walls and buildings can be seen in clear weather; but this story has so far not been confirmed and is probably based on folklore about sunken cities (which is to be found in the most diverse countries). The catastrophe, if there was one, can only have happened comparatively recently; Haidar-Mirzā, to whom we owe the latest and fullest account of the Issik-Kul in Muhammadan literature (*Ta'rīkh-i Rashīdī*, p. 366 *sq.*), knows neither of the disappearance of an island nor of rubble being washed up, nor of any sunken towns. What Haidar-Mirzā has to say about the Issik-Kul corresponds in general to the facts, but there are a few peculiar assertions. He says for example that on account of the great proportion of salt in it, the water is unsuitable for washing in; in reality the proportion of salt is very slight.

In the xviith—xviiith centuries the shores of the lake were under the rule of Buddhist Kalmucks; Tibetan inscriptions in the country south-east of the lake still recall this period. The Mongol name of the Issik-Kul was Temurtu-Nor, "iron lake"; many of the mountain streams flowing into the Issik-Kul carry ferriferous sand; small knives, etc. are made from this iron by the Ḳara-Kirghiz; the Turkish peoples about the same time also called the lake Tuz-Kul ("Salt-lake"). Even in the Kalmuck period the Ḳara-Kirgis [q. v.] had grazing grounds here; the land remained in their possession after the conquest of the Kalmuck kingdom by the Chinese; Chinese rule was never firmly established here in spite of several attempts. About the middle of the xixth century the Russians advanced across the Ili; the Issik-Kul was reached in 1856 by Colonel Khomentowski; a part of the Ḳara-Kirgis was forced to submit to Russian rule as early as 1855 and the remainder in 1860. The Russians founded the town of Ḳaraḳol, called Pržewalsk since 1888, so far the only town in the country round the Issik-Kul (according to the census of 1897, 7987 inhabitants, now about 15000) and several villages; all these settlements are in the eastern part of the Issik-Kul valley; the western part is still inhabited only by nomads. The settlements are still, as in the middle ages, called after the rivers on which they lie; the official Russian names are rarely used, even by Russians; even the Russian peasant always says "Tüp" for Preobrashenskoye" and "Ḳizil-su" (which is corrupted to "Kaszilsu") for "Pokrowskaya". Thanks to the fertility of the soil, the villages are in a flourishing condition, in spite of the frequent earthquakes.

(Cf. L. Berg, *Ozero Issyk-Kul'* (*Zemlevêdênie*, 1904, Nov.).   (W. Barthold.)

ISṬAKHR, a town in Fārs [q. v., ii. 70]. The real name was probably Staḵhr, as it is written in Pahlavī; the Armenian form Stahr and the abbreviation ST on Sāsānian coins point in the same direction. The form with prosthetic vowel is modern Persian; it is usually pronounced Istakhar or Istakhr, also with inserted vowel Sitakhar, Sitakhr, Sitarkh; cf. Vullers, *Lex. Pers.-Lat.*, i. 94^a, 97^b, ii. 223, and Nöldeke in *Grundr. der Iran. Philol.*, ii. 192. The Syriac form is Isṭahr (rarely Isṭahr), in the Talmud probably Isṭakhar (אסטכר, *Megilla* 13^b, middle). According to the statements of Persian authors, the town received its name from the lakes or swamps there. Perhaps, however, it is better to be derived with Spiegel (*Erânische Altertumskunde*, i. 94, note 1) and Justi (*Grundr. der Iran. Philol.*, ii. 448) from the Avestan *stakhra* "strong, firm"; for the latter word cf. Chr. Bartholomae, *Altiran. Wörterbuch*, p. 1591.

Iṣṭakhr lies in 29° 50' N. Lat. and about 53° E. Long., a short hour's journey north of Persepolis, in the narrow valley of the Pulwār or Murghāb (also called Siwand-Rūd), which soon emerges into the fair fertile, but now partly inundated plain of Marwdasht. We have no accurate information regarding the foundation of the town. But it may be assumed with certainty that it took place very soon after the decline of the Achaemenid capital Persepolis, which was caused by Alexander the Great. The ruins of the latter in any case formed a quarry which was much used for the building of the new town. Iṣṭakhr was at first merely the chief town of the district of Fārs, the centre of which had probably always been in this neighbourhood. A few decades before the collapse of the Arsakid kingdom, it figures as the residence of local chiefs. The Sāsānians came from the region of Iṣṭakhr. Sāsān, grandfather of Ardashīr I, was superintendent of the fire-temple of the goddess Anāhīd in the town of Iṣṭakhr (Tabarī, i. 814), the fire of which is said to have suddenly been ominously extinguished in the night of the birth of Muḥammad. After the foundation of the Sāsānian kingdom this town was also considered its religious centre; the heads of slain enemies, including those of Christian martyrs were hung upon it by the Sāsānian kings as trophies of victory. Iṣṭakhr was henceforth considered the official capital of the New Persian monarchy, as Persepolis had been in the age of Achaemenids, but just as, with the latter, Susa had in practice been the centre of government, so with the Sāsānians, Ktesiphon was the real capital. The remote district of Fārs, difficult of access, is too little suited to be the centre of a powerful empire. The Byzantines seem to have known nothing of Iṣṭakhr, for them Ktesiphon alone was the centre of Sāsānian rule. Indeed Iṣṭakhr does not play a prominent part in history; it is only occasionally mentioned.

Soon after occupying the 'Irāḳ the Arabs conquered Fārs. The inhabitants of Iṣṭakhr in particular opposed a stubborn resistance to the advance of the Muslims. The first attempt to take the city, undertaken in 19 (640) by al-'Alā' b. al-Ḥaḍramī, governor of Baḥrain, with insufficient forces and against 'Omar's express orders, failed completely. The strong army raised by Shahrak, the prince of Fārs at that time, could not be checked by Ibn al-Ḥaḍramī. It was only with difficulty that he succeeded in fighting his way along the coast of the Persian Gulf to Baṣra with the help of troops sent to meet him from that place. It was not till 23 (643) that Iṣṭakhr had to capitulate to an Arab army commanded by Abū Mūsā al-Ash'arī and 'Othmān b. al-'Āṣ. But its citizens afterwards rebelled and slew the Arab governor set over them. The governor of Baṣra, 'Abd Allāh b. 'Āmir [q. v.], whom the Caliph sent against the rebels, was only able to take the town after severe fighting. In the suppression of the revolution many Persians met their death. The estimates, no doubt exaggerated, of the Arab authors

speak sometimes of 40,000, sometimes of 100,000 of the enemy slain. This second capture of Iṣṭakhr probably took place in 29 (649); but according to some accounts, it was in 28 (648); cf. J. Wellhausen, *Skizzen und Vorarbeiten*, vi. (1899) 114 *sq.* For other details of the Arab expeditions against Iṣṭakhr see: Balādhurī (ed. de Goeje), p. 389 *sq.*; Ṭabarī, *Annales* (ed. Leiden), i. 2546 *sq.*, 2549, 2690 *sq.*, 2830; Ibn al-Athīr (ed. Tornberg), ii. 420 *sq.*, iii. 30 *sq.*, 77 *sq.*; *Chronique de Tabari* (Pers. vers. by Bel'amī), transl. Gesellsch.*, vi. 455—6; Caetani, *Annali dell' Islām*, iv. 151 *sq.*, v. 10—27, vii. 219—20, 248—56.

Iṣṭakhr, which in the Sāsānian period can have yielded little in size to the ancient Persepolis, remained a fairly important place during the early centuries of Islām also. However it gradually sank to be merely the chief town of a province and was the capital of the *kūra*, bearing its name, the largest of the five districts into which the province of Fārs was divided, comprising its northern and north eastern parts. The heaviest blow suffered by the erstwhile Sāsānian capital was the foundation in 64 (684) of Shīrāz (2 day's journey south of Iṣṭakhr), which soon became the capital of the province of Fārs and attained great prosperity, particularly from the iiird (ixth) century. Henceforth Iṣṭakhr declined visibly. From the description of the geographer al-Iṣṭakhrī, a native of the town, it was about the middle of the ivth (xth) century a town of medium size of the area of an Arab (= Roman) mile; the wall around it was in ruins. Al-Muḳaddasī, writing about thirty years later (985), praises the splendid bridge over the river in Iṣṭakhr and the fine park. Concerning the chief mosque, situated in the bazaars, he mentions the remarkable pillars with "bull"-capitals. This probably refers not to an original Achaemenid building, but to a Sāsānian, — al-Muḳaddasī mentions that the mosque was thought to have been previously a fire-temple —, in the building of which pieces of carving from Persepolis had been used. Only a few years after the date of al-Muḳaddasī's account, a fatal catastrophe overwhelmed the town, brought upon it by the rebellious attitude of its citizens to their suzerain Ṣamṣām al-Dawla, a son of 'Aḍud al-Dawla [q. v.]. The latter sent against it an army under the amīr Ḳutulmysh, who laid it in ruins. This sealed the ruin of Iṣṭakhr. In a description of the province of Fārs dating from the beginning of the vith (xiith) century, in the Persian *Fārs-Nāma*, it is described as a modest village with barely a hundred inhabitants. Probably the whole area of the former town was quite uninhabited before the end of the middle ages.

As to the mint of Iṣṭakhr, coins struck here in the Sāsānian period bear the abbreviation ST (סט) in Pahlavi characters; this certainly means Iṣṭakhr. Numerous specimens of these coins exist from the reign of Yezdegird II (from 438 A. D.) to the end of the dynasty. In the Muhammadan period also the Pahlavi legend with the above abbreviation was retained for a considerable time. Such coins struck in the name of the Caliph or of governors are known down to the year 70 (689); cf. for example the references in *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, viii. 13, 147 *sq.*, xii. 36, xix. 400, xxxi. 148, xxxiii. 120, 131. On the other hand, the Pahlavi coins with mint-names Irān (אירן) and Ṣiṭin (סטן) — contrary to Mordtmann (*ibid.*, xxxiii. 114—5 and *Sitz.-Ber. d. Bayr. Akad. d. Wiss.*, 1874, p. 250—1) — are not to be attributed to Iṣṭakhr, cf. Nöldeke, *Zeitschr. d. Deutsch. Morgenl. Gesellsch.*, xxxiii. 691—2. Of Arab coins struck in Iṣṭakhr specimens are known from 88 (706) and 90 (708) to 167 (783); Stanley Lane-Poole, *Cat. of Orient. Coins in the Brit. Mus.*, x. p. ciii; H. Lavoix, *Cat. des monnaies musulmanes de la Bibl. Nat.*, i. 518; and the notes in *Zeitschr. der Deutsch. Morgenl. Gesellsch.*, ix. 249, 250, xvi. 778, xxii. 288, xxxix. 19, 38.

The present system of ruins at Iṣṭakhr, which still awaits a detailed investigation, is fairly extensive (about 5—6 miles around); the Pulwār and a small irrigation canal led off from it across the ruins and divide the area into two almost equal parts. The remains of the town are mainly recognisable in the mounds of earth of varying height. Here and there parts of the surrounding walls still exist. The most remarkable seems to be a place lying towards the village of Ḥādjīābādh — called Ḥarīm-i Djamshīd = "Djamshīd's Harem" (cf. below) by the travellers J. Morier and Ker Porter —, where a column stands erect in the midst of an area covered with fragments of pillars. Its capital, composed of bodies of bulls, at once shows it to have been removed from Persepolis. We shall not go wrong, if we look here for the mosque mentioned above, described by al-Muḳaddasī. The most detailed account of the ruins of Iṣṭakhr is that of Flandin and Coste, who spent two months in the neighbourhood about the end of 1840; cf. the pictures in the great volume of plates, *Voyage en Perse*, ii. (Paris 1843 *sq.*), Pl. 58—62, and the archaeological text accompanying it, p. 69—72, and also Flandin's *Relation du Voyage*, ii. (1852), 137.

In the vicinity of Iṣṭakhr there are several other sites remarkable for their monuments or history. For example about 700 yards north of the village of Ḥādjīābādh, which lies quite near the north-west corner of the ruined area of the former Sāsānid capital, there are natural caves in the valley of Tang Shāh-i Sarwān. One of them, which contains an inscription of historical importance of Sapor I (241—272 A. D.), is usually called Shaikh 'Alī by the Persians, as a pious ascetic of this name is said to have ended his days in it; at the same time one hears it called Zindān-i Djamshīd, "Djamshīd's prison". Similar popular names like "Zindān, Ḥarīm" (cf. above Djamshīd's Ḥarīm) are also found elsewhere in Persia and in the 'Irāk; cf. HAMADHĀN, ii. 236, and my *Seleucia und Ktesiphon* (Leipzig 1917), p. 55. Prominent buildings and monuments of antiquity are frequently attributed to Djamshīd, a mythical ruler of ancient Iran whom the Muslim Persians identified with the Sulaimān of legend (cf. below, Takht-i Djamshīd).

Another place of historical importance is the Naḳsh-i Radjab, "Sculpture of Radjab" (a legendary personage), about ¾ mile S. W. of Iṣṭakhr. This is a ravine-like split in the wall of rock on the south bank of the Pulwār, which is adorned with three Sāsānian reliefs. Sarre thinks (Sarre u. Herzfeld, *Iranische Felsreliefs*, p. 98) that this decoration may be explained by the special purpose of the place (a sanctuary of the God Ormuzd?) as the consecrated place of coronation of the Sāsānian king-

On account of its considerable remains from the ancient and mediaeval Persian periods, the best known sites are Takht-i Djamshīd and Naḳsh-i Rustam; the former a short hour's journey south of Iṣṭakhr on the south bank of the Pulwār, the latter on the north bank of this stream about 1½ miles from Iṣṭakhr.

Takht-i Djamshīd is the most usual name among Orientals for the complex of Achaemenid palaces of Persepolis. Persian popular fancy frequently gives imposing buildings the name of *takht*, i.e. bench or throne, of a celebrated legendary king of the past. Besides Takht-i Djamshīd one also hears the older name Čihil, or abbreviated, Čil Minār (also Menāre), "the 40 pillars", which is found as early as the Persian historians of the xivth century. This name is taken from the most noteworthy parts of the whole site, the colonnade of King Xerxes I with its pillars originally 72, now only 13 in number. 40 is a round number very popular in the east to express a considerable number; a cave called Čihil Sutūn (the 40 pillars) is shown, for example, in the valley of Shīrwān in Luristān (cf. H. Grothe, *Wanderungen in Persien*, Berlin 1910 p. 62). The number 1000 is also used in quite a similar fashion to 40. This explains another name, common at an earlier period, Hazār Sutūn, "the 1000 pillars", which first appears at the beginning of the ivth (xth) century in the annals of Ḥamza al-Iṣfahānī, as well as several times in later Persian chronicles. There is also the name Haft Sūr, "the seven walls", found as early as about 1100 A. D. The Arab geographers of the middle ages from about the iiird (ixth) century know the ruins of the Persepolitan terrace by the name Malʿab Sulaimān, "Sulaimān's playing-ground", with which we may compare the name Kursī Sulaimān, "Solomon's stool (throne)", found in the Persian history *Mudjmil-i Tawārīkh* (beginning of the vith = xiith century), which in its turn may have been the model for the present synonymous name Takht-i Djamshīd. It may be noted that Takht-i Sulaimān is also found elsewhere on Iranian soil as a geographical name: for example, a part of the group of ruins called Takht Mādar-i Sulaimān (Murghāb: q. v.), a mound of ruins in the S. E. of Ādharbaidjān, a mountain east of Kābul, and finally the town of Ūsh (see above, ii. 638) in Farghāna; cf. Ritter, *op. cit.*, vii. 482, viii. 132, 443, ix. 808; 1040.

The "Bench" or "Throne" of Djamshīd (Solomon) is an artificial stone terrace of polygonal, almost rectangular shape, which lies at the foot of a steep, dark grey mountain of rock. The latter, according to the reports of recent travellers, now bears the name Kūh-i Raḥmat, "hill of mercy", but this is not to be found in literature; it apparently dates only from the post-mediaeval period (first mentioned by Sir Thomas Herbert in the beginning of the xviith century). The name still heard by Ouseley, Shāh Kūh, "royal hill", might be older; it coincides with the *βασιλικὸν ὄρος* of Diodorus (xvii. 71). At the same time, according to the same authority, the inhabitants also use the name Kūh-i Takht, "hill of the throne (of Djamshīd)". The section of the Kūh-i Raḥmat which forms the back wall of the platform contains three tombs of Achaemenid kings. The people know these by the names of the "mosque", the "bath" and the "mill of Djamshīd", according to Stolze (*Verhandl. der Gesellsch. f. Erdkunde in Berlin*, x., 1883, p. 273). The terrace, which at the same time bears a markedly fortress-like character, was, as already mentioned, only intended for royal palaces and monumental buildings; the town of Persepolis lay in its immediate vicinity. Ancient remains of it may be still recognised. Older travellers were able to identify even more of these ruins lying outside the Takht-i Djamshīd in the area of the town. It may be expressly mentioned that the view held by Stolze and Andreas (*o. c.*, p. 256 *sq.*, and *Persepolis*, i. 3) that the citadel and town of Persepolis are to be sought at Naḳsh-i Rustam, to be exact, the former at Naḳsh-i Rustam and the town on the site of the later Iṣṭakhr, while the buildings in Takht-i Djamshīd were intended for solemn ceremonials closely connected with the cultus, does not appear tenable; cf. against it most recently Herzfeld in Sarre-Herzfeld, *o. c.*, p. 100 *sq.* The Persian historians make a similar mistake when they identify Persepolis with Iṣṭakhr without more ado, and in order to be able to explain all the ancient and mediaeval monuments and ruins in the plain of *Marwdasht* and its more immediate vicinity as the remains of a single town, ascribe to it the fabulous extent of 16 parasangs in length and 16 parasangs breadth.

Iranian tradition varies regarding the founder of Persepolis-Iṣṭakhr; sometimes it is Kayūmarth, the mythical ancestor of the Persians, sometimes the builders or extenders are legendary rulers of the past like Kayūmarth's descendants Hōshang (Ushhandj), Ṭahmūrath, Djamshīd, Kai Khusraw. Solomon also is named, for whom the spirits (*djinn*) subject to him carried out marvellous works. A legendary princess, Humāy, who plays the rôle of Semiramis as a builder in Irān, is also mentioned. Persian tradition transfers to Persepolis-Iṣṭakhr the residence of the old Iranian kings and makes them be buried there also. According to Firdawsī's *Shāhnāma*, the town was the residence of the reigning dynasty from the time of Kai Kubādh. Muslim writers connect the origin of Persepolis with Solomon; the name given by them, Malʿab Sulaimān, has been mentioned above. According to their legend, this king dwelled alternately here and in Syria and was rapidly carried by the *djinn* from one place to the other. Separate buildings on the terrace of Takht-i Djamshīd bear in Arabic writings the names "mosque" and "bath of Solomon" (cf. with these the above mentioned names of two royal tombs of Kūh-i Raḥmat). Solomon — so the story goes — shut the wind up in a room there; Persian sources of the viiith and xivth centuries still speak of a "prison of the wind" here (*Zindān-i Bād*) (cf. the reports in Ouseley, *o. c.*, ii. 381, 387).

Unfortunately the Arab accounts of the monuments of Persepolis are rather defective and moreover in parts distorted into fairy tales; cf. especially the accounts of the geographers al-Iṣṭakhrī, al-Maḳdisī and al-Ḳazwīnī (see Schwarz, *l. c.*); various not uninteresting information is given by Persian historians of the later middle ages, especially Ḥamd Allāh Mustawfī and Ḥāfiẓ Abrū (see Ouseley, ii. 380 *sq.*, 387 *sq.*). According to these two, the pillars of the ruins there were celebrated as a source of the *mūmiyā* (*mūmiyā*) important for medical purposes. The vandal disfigurement of the heads of the figures on the bas-reliefs of Takht-i Djamshīd (and still more so in Naḳsh-i

Rustam] is primarily due to the fanaticism of the Muslims with its objection to the representation of human faces.

The caliph al-Manṣūr (754—775) wished to use the ruins of Persepolis, like those of al-Madāʾin-Ctesiphon, as a quarry, but was persuaded against it by the advice of his vizier Khālid al-Barmakī, who said that Persepolis was used as place of prayer by ʿAlī; see *Fragm. Hist. Arab.* (ed. de Goeje), p. 256.

Various Muslim rulers have perpetuated their visits to the ruins of Persepolis by having inscriptions incised. Here are to be seen three Arabic inscriptions in Kufic characters by members of the Būyid dynasties (ivth = xth century); three inscriptions, two Persian and one Arabic, of Abu 'l-Fatḥ Ibrāhīm, a grandson of Tīmūr (ixth = xvth century), also three inscriptions (2 Arabic and 1 Persian) of ʿAlī b. Khalīl, a grandson of Uzūn Ḥasan (ixth = xvth century). These inscriptions were thoroughly discussed by de Sacy in his *Mém. sur diverses antiquités de la Perse* (Paris 1793), p. 139 *sqq.* Some emendations thereon were given by Nöldeke in Stolze, *Persepolis*, ii. 6. H. Petermann, *Reisen im Orient*, ii. 188, also mentions an inscription of the Muẓaffarid Muḥammad b. al-Muẓaffar b. al-Muẓaffar b. al-Manṣūr (d. 765 = 1363). The various verses scratched on the walls show the high respect in which Persepolis has always been held among the Persians; their modern poets often make allusions to the ancient capital of the country.

As to Naḳsh-i Rustam, its primary significance is only the steep south wall of the long, high mass of rock, Ḥusain Kūh, which has in niches four Achaemenid royal tombs and Sāsānian reliefs. But the name is often extended to the whole of Ḥusain Kūh. The name Naḳsh-i Rustam is due to the popular idea that the sculptured figures there represent the Iranian national hero Rustam. Before the wall of the tombs there rises a remarkable towerlike building, now called Kaʿba-i Zardusht, "the Kaʿba of Zoroaster". As to its real purpose the opinions of of scholars vary: probably it has something to do with a former fire temple. Two other small buildings are perhaps to be similarly regarded, not far from the Kaʿba-i Zardusht on the summit of a rock called Sang-i Sulaimān, "the stone of Sulaimān"; cf. Ouseley, *o. c.*, ii. 300. We may also mention that the Sāsānian sculptures of Bermi Delek 5 miles E. S. E. of Shīrāz are also called Naḳsh-i Rustam.

A stone platform in two layers on the south bank of the Pulwār (about 500 yards W. of Naḳsh-i Radjab) is called by the inhabitants of the district, *Takht-i Rustam*, "the throne of Rustam". The latter, in view of its limited dimensions, can only have served as the pedestal of a sepulchral monument or of a fire temple. Cf. Flandin et Coste, *Voyage en Perse*, ii. 72—73 (and Pl. 63). Instead of Takht-i Rustam, the name Takht-i Ṭāʾūs, "peacock-throne", is also used. The name Takht-i Rustam is found elsewhere in Īrān also; cf. Ouseley, *o. c.*, ii. 522).

At a somewhat greater distance from Iṣṭakhr, about 3—4 hours journey N. W., on rocky peaks stand three forts within 1½ to 2 miles of each other. All three, which lie practically in a straight line, are frequently comprised under the name Ḳalʿa or Kūh-i Iṣṭakhr, "the citadel" or "the mountain of Iṣṭakhr", also Kūh-i Ramdjird, from a district of this name on the left bank of the Kur (into which the above mentioned Pulwār flows). Firdawsī in a distich speaks of the Sih Diz-i (Gumbadhān) Iṣṭakhr, "the three fortresses of Iṣṭakhr" (cf. Ouseley, *o. c.*, ii. 386). At the same time the separate castles have each their own names, which have however changed frequently in course of time according to the reports of the older historians and travellers. The most important of the three, the Ḳalʿa-i Iṣṭakhr in the narrower sense, is also called Miyān Ḳalʿa, "the central fort", from its position between the other two. Flandin and Coste heard it called Ḳalʿa-i Sarw, "the cypress castle", from a single cypress tree standing there. For the two other citadels Persian authors, for example, give the names Ḳalʿa-i Shikastah, "the broken (ruined) castle, and Ashkunawān (Ishkunawān and similar names). To judge from the traces of foundations and pieces of walls found between the forts there were once all linked up by fortifications.

In the Muslim history of Fārs, especially in that of Iṣṭakhr, these inaccessible fortresses played an important part. They were regarded as most essential military points d'appui for the holding of the surrounding country. The most prominent is the "citadel of Iṣṭakhr" proper, the origin of which Persian legend places in mythical times by assuming it was built by King Djamshīd. The old Iranian ruler Gushtāsp is said to have deposited the *Avesta*, written on cowhides with golden ink in the castle of Iṣṭakhr, after his conversion to the doctrine of Zoroaster; the citadel is therefore also called Diz-i Nibisht (Castle of the writing) or Kūh-i Nibisht (Hill of the writing; so in Ḥamd Allāh Mustawfī); cf. Ṭabarī, i. 676; and Ibn al-Athīr, i. 182, as well as the Persian reports in Ouseley, *o. c.*, ii. 344, 364, 370—1, 375, 384. Under the caliphate the governor of the province of Fārs very frequently resided in this stronghold, which was easily defended by its natural situation. Thus the governor Ziyād b. Abīhi was able to hold out up here against Muʿāwiya for a considerable time after ʿAlī's death; cf. *Wellhausen*, *Das arabische Reich*, etc. (Berlin 1902), p. 74. The Buyids, who not infrequently stayed in the region of Iṣṭakhr (cf. the inscriptions dating from their time mentioned above, at Takht-i Djamshīd; ʿImād al-Dawla [q. v.] was buried in Iṣṭakhr), paid particular attention to the citadel of Iṣṭakhr. ʿAḍud al-Dawla [q. v.] in the ivth (xth) century built on it a great system of cisterns, taking advantage of a natural pond already there, which could provide water for several thousand persons for a whole year and which aroused the admiration of contemporaries and of later generations. In 467 (1074) the rebel Faḍlūya, who had seized the government of Fārs, was besieged by the troops of Niẓām al-Mulk in the antiquarian of Malik Shāh in the citadel of Iṣṭakhr. An earthquake which suddenly caused the cisterns to overflow forced the besieged to a premature capitulation. Faḍlūya was then kept a prisoner in the fortress and put to death next year after an unsuccessful attempt to escape. The castle was later much used as a state prison for high officials and princes. About 1500 the citadel was still in good condition and inhabited. Some time afterwards a rebel general of Fārs took refuge in it and it was besieged by Shāh ʿAbbās I, stormed and destroyed. Pietro della Valle, who stayed here in 1621, therefore found it in ruins.

The citadel of Iṣṭakhr has so far been only rarely visited by European travellers, e. g. by Morier, Flandin (and Coste), and Vambéry. According to the account by Flandin and Coste, to whom we also owe drawings and plans of the citadel, it stands on a plateau 300 yards round, about 1300 feet above the plain. Of the old defences there have survived the powerful ramparts solidly built of stone; the great system of cisterns of the Būyids, among which a well hewn deep into the rock is specially remarkable, is still to be seen. All the ruins that survive seem only to date from the Muslim period. Cf. on the castles of Iṣṭakhr the accounts from Persian sources in Ouseley, *o. c.*, ii. 371, 376, 385 *sq.*, 389, 395—7, 399, 404—5, 497, 531; Ritter, viii. 863—5, 868, 873; Flandin et Coste, *Voyage en Perse*, ii. 71—72; Flandin's *Relation du Voyage*, ii. (1852), p. 140—2; Vambéry, *Meine Wanderungen und Erlebnisse in Persien* (Pest 1867), p. 250; Cl. Huart in *Revue sémitique*, i. (1893), p. 259 *sq.*, 337 *sq.* and in *Hist. de Bagdad* (Paris 1901), p. 28, 31; G. Le Strange, *o. c.*, p. 276; Herzfeld in Sarre and Herzfeld, *o. c.*, p. 114—5 (Pl. xvi. and Fig. 45).

[M. Streck.]

al-IṢṬAKHRĪ, Abū Isḥāḳ Ibrāhīm b. Muḥammad al-Fārisī, an Arab geographer, whose biography is nowhere to be found, because in the geographical handbook ascribed to him, which bears the title *Masālik al-Mamālik* and is printed in the first volume of de Goeje's *Bibliotheca Geogr. Arab.*, no biographical data are given. De Goeje however has shown that his work is only a new edition of an older one by Abū Zaid al-Balkhī, just as later Ibn Ḥawḳal [q. v.] took al-Iṣṭakhrī's work as a basis for his own after giving up his first intention of only making some corrections to it, as al-Iṣṭakhrī himself, whom he had met in 340 (951—952), had asked him to do. It is thus at least certain that he must have lived in the first half of the 10th (4th) century. The text which was published in facsimile by J. H. Moeller as early as 1839 only contains a synopsis of the book.

ISTAMBOL. [See CONSTANTINOPLE].

ISTANKÖI, Turkish name for the island of Stanco = Cos; cf. Cuinet, *La Turquie d'Asie*, i. 435 *sqq.*

ISTĀR (στατήρ), a weight in the apothecary's or troy system, taken over from the Greeks and usually estimated according to two different scales. On the one hand we find the equations 1 *istār* = 6 *dirham* and 1 *dānaḳ* = 4 *mithḳāl* (an apothecary's stater); on the other, we have 1 *istār* = 6½ *dirham* = 4½ *mithḳāl* (commercial *istār* in the East). The first equation will only be correct if the coined *dirham* and the *mithḳāl* marjīl are taken $\frac{(2.97 + 2 \times 2.97)}{6} = 18.18 = 4.72 \times 4 = 18.18$); the second equation is approximately correct only if we take the coined *dirham* and the old *mithḳāl* (gold dīnār) ($2.97 \times 6.5 = 19.3 = 4.25 \times 4.5 = 19.125$). In both cases the result is a much larger amount than that of the usual Greek stater. The further ratio that 20 *istār* go to the *raṭl* (pound) is only true of the *istār* of 6½ *dirham* and the Baghdād *raṭl* of 130 *dirham*.

[E. v. Zambaur.]

ISTIBRĀʾ (A.) means the "inquiry whether the uterus of a slave woman is empty", prescribed by Muslim law. If a Muslim acquires a slave girl by purchase, inheritance or by any other means, the law forbids him to cohabit with her, until it is ascertained that she is not pregnant, in order that there may be no uncertainty about the paternity of the children. The prescribed period of waiting ends after the first menstruation or, in the case of pregnancy, after the birth of the child, and lasts a month for non-menstruating women. Further a slave, after she is manumitted, may only enter into a marriage after the expiry of the legal *istibrāʾ* period.

(TH. W. JUYNBOLL.)

ISTIFHĀM (from the root *f h m* "to understand"; x. "to ask to be made to understand", i. e. to ask a question), technical term of Arabic grammar denoting "interrogation", "interrogative sentence". An interrogative sentence is nominal or verbal, and is subject to the grammatical rules governing the sentence in general. An interrogation may be indicated merely by the tone of the voice, but more often it is introduced by one of the interrogative particles (*ḥurūf al-istifhām*) *'a*, *hal*, *'am*, etc., or by an interrogative pronoun or adverb, e. g. *man* = who?, *mā* = what?, *kaifa* = how?, etc.

(ROBERT STEVENSON.)

ISTIḤSĀN (A.), i. e., to consider something *ḥasan* (i. e. good). This is the name given to a method of argument used in the Ḥanafī school to settle *fiḳh* rules in conformity with the requirements of every day life, equity or social conditions. The object of *istiḥsān* is much the same as that of *istiṣlāḥ* (i. e., to think that something is *ṣāliḥ*, i. e. in the general interest or most appropriate) applied in the Mālikī school. According to both methods, the results of *ḳiyās* (i. e. analogy) were often simply disregarded, when it was considered necessary or simply desirable to depart from the strict demands of theory. For this arbitrariness *istiḥsān* and *istiṣlāḥ* are objected to by many and have never been generally recognised as reliable fundamentals in the science of law (*uṣūl al-fiḳh*).

(TH. W. JUYNBOLL.)

ISTIḲBĀL (A.), in astronomy means the opposition of sun and moon i. e. their relative positions when the difference of their longitudes is 180°, as is the case notably during an eclipse. *Muḳābala* is also occasionally used but this word is a common term among the astrologers for the opposition of two planets. The opposite of *istiḳbāl* is *iǵtimāʿ* = conjunction, i. e. the relative positions of sun and moon when they have equal longitudes, as is the case for example in an eclipse of the sun. In astrology other expressions are commonly used for the conjunction of planets among themselves or with the sun and moon, viz. *muḳārana*, *iǵtimāʿ* and *ḳirān*.

Besides these positions (opposition and conjunction), astrology further distinguishes the hexagonal (*tasdīs*), the tetragonal (*tarbīʿ*), and the trigonal (*tathlīth*) aspect, according as the angle between the two planets and the earth is 60°, 90° or 120°.

(H. SUTER.)

ISTIKHĀRA (A.), the prayer (*duʿāʾ*) of a man who has not yet made up his mind, in order to be inspired with a salutary decision regarding an intended enterprise, a journey, etc. This term is connected with the first conjugation of the verb خار, especially in its use in phrases like *Allāhumma khir li-wa-khtar li* (Ṭabarī, *Annales*, i. 1832, 6); *khir lahu* (Ibn Saʿd, ii. ii, 73 11, 75, 4), *khāra 'llāhu li* (ibid., viii. 92, 15). The proverb *istakhir allāha fi 'l-ʿamal wa-stakhir lahu bi-ʿizzihi fi 'l-ḳaḍāʾ* (Ibn Saʿd, viii. 171, 16; Ḳālī, *Amālī*, ii. 106 *penult.*) is even given from the pre-Islāmic period, but it is hardly to be believed that such an aphorism could date from that time. In Islām the formality of the religious *istikhāra* consists of a form of prayer of some length, traced back to the Prophet in Bukhārī, *Tawḥīd*, nº. 10, *Daʿawāt*, nº. 48 (ed. Krehl-Juynboll, iv. 202, 450), Ibn Mādja (Dihlī 1282, p. 99 *infra*) — the authenticity of which however is doubted even by Muslim critics, as Ibn Ḥadjar al-Haitamī, *Fatāwī ḥadīthiyya*, Cairo 1307, p. 216 —, whereas Tirmidhī (Būlāḳ 1292), ii. 260, gives only the brief formula: *Allāhumma khir li wa-khtar li* (cf. Dhahabī, *Mīzān al-Iʿtidāl*, ed. Lucknow 1884, i. 315, 4) only as a ḥadīth of doubtful authenticity. It is introduced by two *rakʿa's* (*ṣalāt rakʿatai al-istikhāra*, Subkī, *Ṭab. al-Shāfiʿīya*, vi. 175, 6 *infra*). Directions are also given regarding the verses of the Ḳurʾān to be recited within the two *rakʿa's* (Nawawī, *Adhkār*, p. 56). In ʿAwfī, *Lubāb al-Albāb* (ed. Browne), i. 210, 14, people go to the mosque to perform the *namāz-i istikhāra*; but this is not obligatory. It is the rule that the *istikhāra* appeal should be made from case to case before a definite purpose, and not in a summary fashion (e. g. in the morning for all cases which may crop up in the course of the day) (ʿAbdarī, *Madkhal*, iii. 240 *infra*).

In keeping with the above mentioned traditional saying, Muslim practice shows the *istikhāra* in use from the earliest times. The oldest example, probably quite independent of that *ḥadīth*, seems to be *Aghānī*, xix. 62, 7 *sqq.* The poet ʿAdjdjādj (*Dīwān*, Nº. 12, 25; *Arādjīz al-ʿArab*, p. 120) praises Ḥadjdjādj, because he undertakes nothing without securing God's approval (*illā wa-ḳabla stakhārā*). And when ʿAbd Allāh b. Ṭāhir enters on his office of prefect of the ʿIrāḳ, his father impresses upon him repeatedly in a letter of advice he sends him, to observe the *istikhāra* in all official business (Ṭaifūr, *Kitāb Baghdād*, p. 49, 7, 52, 3 *infra*, 53, 4). In this way literature gives numerous examples of the custom that the Muslim before important as well as unimportant resolutions, in private as well as public enterprises, also conquerors before their expeditions, thought to secure the divine approval by *istikhāra*. This habit indeed is sometimes fictitiously credited to them, as for example when Muʿāwiya is made to observe the *istikhāra* before designating Yazīd as his successor (*Aghānī*, xviii. 72, 4). The Caliph Sulaimān tears up the patent of succession drawn up in favour of his son Aiyūb, when he feels that the salutariness of his decision was not suggested to him by *istikhāra* (Ibn Saʿd, v. 247, 6). Maʾmūn observes *istikhāra* for a month before appointing ʿAbd Allāh b. Ṭāhir, Ṭaifūr, *op. cit.*, p. 34, 6). Cf. the lamp *istikhāra*

prayer of al-Muḳtadir on his accession (with four *rakʿa's*, ʿArīb, ed. de Goeje, p. 22, 14). In the *1001 Nights* in the tale of Uns al-Wudjūd and Ward fi 'l-Akmām the latter's mother performs a "*ṣalāt al-istikhāra* of two *rakʿa's*" in order to obtain an effectual indication in regard to her daughter's love affair (373th Night, ed. Būlāḳ 1279, ii. 260). The choice of a baby's name seems occasionally to be made after an *istikhāra* by the nurse (Snouck Hurgronje, *Mekka*, ii., 139, 1). There is no lack of examples to show that in deciding thorny theological questions the learned arguments were strengthened by *istikhāra* (e. g. Nawawī, *Tahdhīb*, ed. Wüstenfeld, p. 257, 3 *infra*). Authors in the introductions to their books very frequently mention *istikhāra* as the motive or excuse for the publication (cf. Dhahabī, *Tadhkirat al-Ḥuffāẓ*, ii. 288, 3). A story, of course quite unhistorical, makes ʿOmar II only allow the publication of a work of Alḳama b. Aʿyun which he had in his library, after he had exposed it for 40 days with an *istikhāra* at his place of prayer (Ibn Abī Uṣaibiʿa, i. 163 *infra*).

The form of the *istikhāra* laid down by religious usage (*istikhāra sharʿīya*) is usually in actual practice accompanied by all kinds of forms not sanctioned in the Ḥadīth, for example the expectation of receiving the divine inspiration in a dream (*ὀνειρομαντεία*) after a prayer (Snouck Hurgronje, *Mekka*, ii. 16, note 4; Doutté, *Magie et Religion dans l'Afrique du Nord*, p. 413) or strengthening the *istikhāra* formula by an auxiliary casting of lots, in which the alternatives are written on cards (Ṭalmasī, *Mafātīḥ al-Ḥikma*, Cairo, 1303, p. 100). Such additions are strongly condemned by rigid Sunnī orthodoxy (ʿAbdarī, *op. cit.*, iii. 91 *sqq.*). There is also the *istikhāra* by opening the Ḳurʾān (*al-ḳurʿa . . ., fi 'l-muṣḥaf . . . wa-mubādarat istikhārat*, in Ibn Bashkuwāl, p. 243 ult., cf. *Farādj baʿd al-Shidda*, i. 44; an anecdote on the subject is given by Ḳazwīnī, ed. Wüstenfeld, ii. 125, 18 *sqq.*); other works (see Suyūṭī, *Bughyat al-Wuʿāt*, p. 10, 17), as in the case of the *Sortes Virgilianae*, are employed for the purpose by the Persians, especially the *Dīwān* of Ḥāfiẓ, or the *Mathnawī* of Djalāl al-Dīn Rūmī (cf. *Bankipore Catalogue*, i. nº 151). This use of the Ḳurʾān is likewise rigorously forbidden by most Sunna authorities (cf. Damīrī s. v. *Ṭair*, ii. 119, 1 *sqq.*, ed. Būlāḳ 1284; Murtaḍā, *Itḥāf al-Sāda al-Muttaḳīn*, Cairo 1311, ii. 285 *infra*): this custom in connection with the *istikhāra* has led among the people to an excessive use of *faʾl* magic with the Ḳurʾān, of which a full account is given in Lane, *Manners and Customs*[5], Ch. xi., i. 328. — There is a proverb *mā khāba man istikhāra wa-lā nadima man istashāra* (as *ḥadīth* in Ṭabarānī, *Muʿdjam Ṣaghīr*, ed. Dihlī, p. 203 *infra*). Abū ʿAbd Allāh al-Zubairī in the beginning of the 4th (10th) century wrote a *Kitāb al-istishāra wa 'l-istikhāra* (Nawawī, *Tahdhīb*, p. 744, 3).

Bibliography: The above mentioned Ḥadīth passages; Ghazālī, *Iḥyāʾ ʿUlūm al-Dīn* (Būlāḳ 1289), i. 197; Murtaḍā, *Itḥāf*, iii. 467—469; and the pertinent sections of the Fiḳh books. — Cf. *Journ. Asiat.*, 1861, i. 201; Note 2; 1866, i. 447; Phillott, *Bibliomancy, Divination, Superstitions among the Persians* in *Journ. As. Soc. of Bengal*, 1906, ii. 339 *sqq.*; *Bulletin de la Société de Géographie d'Oran* (1908), xxviii. Number 1.

(I. Goldziher.)

ISTIʾNĀF (A.) means in Muslim law: the performance over again from the beginning of a religious act (e. g. a *ṣalāt*) which has in some way been interrupted. If, on the other hand, only the part still to be performed when the interruption took place is later carried through, this is called *bindruʾ* (i. e. the continuation of an interrupted act).

Bibliography: *A Dictionary of the Technical Terms* (Calcutta 1862), i. 80.

(Th. W. Juynboll.)

ISTINDJĀʾ (A.) means a purification fully described in the *Fiḳh* books in the chapter on ritual purity. It is a religious duty (according to Abū Ḥanīfa, however, only a recommended action) for every Muslim who has attended to the call of nature. A Muslim is in general allowed to delay this purification until he is about to perform the *ṣalāt*, or has to be in a state of ritual purity for some other reason.

Bibliography: al-Dimashḳī, *Raḥmat al-Umma fī 'Khtilāf al-Aʾimma* (Būlāḳ 1300), p. 7; A. J. Wensinck in *Der Islam*, i. 101 *sq.*

(Th. W. Juynboll.)

ISTINSHĀḲ (A.), the inhaling of water through the nose, is considered by most *faḳīhs* as a *sunna* (i. e. a commendable act, according to Aḥmad b. Ḥanbal however, a religious duty) both at the *ghusl* [q. v.] and the *wuḍūʾ* (i. e. the major and minor ritual purification).

Bibliography: al-Dimashḳī, *Raḥmat al-Umma fī 'Khtilāf al-Aʾimma* (Būlāḳ 1300), p. 8; al-Khwārizmī, *Mafātīḥ al-ʿUlūm* (ed. van Vloten), p. 10, 1.

(Th. W. Juynboll.)

ISTIṢḤĀB (A.), i. e. the seeking for a link (i. e. to something which is known and certain). This is the name of a process of settling *fiḳh* rules by argument, which was especially used in the Shāfiʿī school and with certain limitations among the Ḥanafīs also. This seeking for a link means the endeavour to link up a later set of circumstances with an earlier, and is based on the assumption that the *fiḳh* rules applicable to certain conditions remain valid so long as it not certain that these conditions have altered. If for example on account of the long absence of some one it is doubtful whether he is alive or dead, then by *istiṣḥāb* all rules must remain in force which would hold if one knew for certain that he was still alive. The Ḥanafīs only recognise *istiṣḥāb* in so far as it concerns the retention of rights already granted, the Shāfiʿīs on the other hand even where it is a question of assigning new rights. An absent man for example would not be recognised by the Ḥanafīs as legitimate heir to an inheritance falling due while he was away, but he would be according to the Shāfiʿīs, as the latter assume that even during his absence he can obtain new rights.

Bibliography: I. Goldziher, *Das Prinzip des Istiṣḥāb in der Muhammedan. Gesetzwissenschaft* in the *Wiener Zeitschrift f. d. Kunde d. Morgenl.*, i. 228—236. (Th. W. Juynboll.)

ISTISḲĀʾ (A.), prayer for rain. The treatises on canon law expound in what circumstances the *ḥadīth* prescribes the *istisḳāʾ* prayer as an obligatory act or leaves it to individual discretion. They also give details of the special ritual to be observed in this prayer. This ritual comprises 1. a prayer of two *rakʿa's* performed in the morning outside the town; 2. the faithful ought to put on ordinary dress, without elaboration or luxury; 3. the prayer

is followed by two *khuṭba*, of which the first is accompanied by a turning of the cloak (a sympathetic rite to produce a change in the weather); 4. the *duʿāʾ* which follows the prayer is a supplication for rain; 5. the usual *takbīr* is replaced by an invocation intended to implore God's pardon (*istighfār*). This prayer ought to be completed by a series of pious works recommended to the faithful (fasting, almsgiving). Prayers for rain by non-Muslims according to their religions (Jewish or Christian) are admitted and even recommended in orthodox Islām.

Rites and ceremonies to obtain rain are as ancient as man himself and vary not only according to different religious beliefs, but even among the different groups of human beings belonging to the same religion, as I have shown in my *Quelques rites pour obtenir la pluie en temps de sécheresse chez les musulmans maghribins* dans *Recueil de Mémoires et de Textes publié en l'honneur du XIVe Congrès des Orientalistes, par les professeurs de l'École supérieure des Lettres et des Médersas*, Alger 1905, p. 49—98). The ceremonies and rites, rather varied for the Muslim countries and all, even in the orthodox ritual, much impregnated with animism and magic, may however be grouped under several rubrics: adaptation to the cult of saints; physical and moral sufferings which the faithful impose upon themselves; formulae, songs and hymns; rites relating to a kind of divinity of rain named *ghondja* or an analogous name in Barbary; sacrifices of victims and communal meals; sympathetic and symbolic acts.

In the article referred to, there will be found, in addition to useful bibliographical notes, references to analogous ceremonies in non-Muslim countries. There it will also be seen that for the Maghrib these religious services have rather the character of agrarian festivals and that they take place at a fixed period of the year, but not in every season.

(ALFRED BEL.)

ISTIṢLĀḤ (A.), i. e., to think that something is in the general interest. [See ISTIḤSĀN.]

ITĀʾ (A.), a term in prosody, meaning the presence of the same word with the same sense used as a rhyme at the end of several lines of the same poem.

Bibliography: Ibn Kaisān in Wright, *Opuscula Arabica*, p. 56, 59 *sqq.*; Cheikho, *ʿIlm al-Adab* (Bairūt 1897); Coupry, *Traité de versification arabe* (Leipzig 1875), p. 185—9; *La Khazradjīya*, trans. with comm. by R. Basset (Alger 1902), p. 149. (MOH. BEN CHENEB.)

ITĀḲ. [See ʿABD, i. 18.]

ITHNĀ ʿASHARĪYA (Arabic *ithnā ʿashara*, twelve), "the Twelvers", a name given in contrast to the Sabʿīya [*q. v.*], the partisans of the seven imāms, to those Shīʿīs who allow the series of twelve imāms and say that the imāmate passed from ʿAlī al-Riḍā to his son Muḥammad al-Taḳī, to the latter's son ʿAlī al-Naḳī, then to his son al-Ḥasan al-ʿAskarī al-Zakī, and finally to Muḥammad al-Mahdī, who disappeared and will come again at the end of time to announce the last judgement and to fill the earth with justice. The series of twelve imāms is made up as follows: 1. ʿAlī al-Murtaḍā; 2. al-Ḥasan al-Mudjtabā; 3. al-Ḥusain al-Shahīd; 4. ʿAlī Zain al-ʿĀbidīn al-Sadjdjād; 5. Muḥammad al-Bāḳir; 6. Djaʿfar al-Ṣādiḳ; 7. Mūsā al-Kāẓim; 8. ʿAlī al-Riḍā; 9. Muḥammad al-Taḳī; 10. ʿAlī al-Naḳī; 11. al-Ḥasan al-ʿAskarī al-Zakī; 12. Muḥammad al-Mahdī al-Ḥudjdja [see these names].

Such has been the succession which has been definitely admitted since the vth (xith) century; but this sect has not always been in agreement with itself, and at one time numbered no less than eleven parties, without special names but distinguished from one another as follows: 1. al-Ḥasan al-ʿAskarī is not dead, he is only absent; 2. al-Ḥasan died without children, but he will return and rise from the dead; 3. al-Ḥasan nominated his brother Djaʿfar by will; 4. the latter died without leaving heirs; 5. Muḥammad son of ʿAlī is the imām; 6. al-Ḥasan had a son, two years before his death, who was called Muḥammad; 7. there was indeed a son, but he was born eight months after his father's death; 8. al-Ḥasan died without children and the world is without an imām, on account of the sins of men; 9. al-Ḥasan had a son, but he is not known; 10. an imām is necessary, but it is not known if he is descended from al-Ḥasan or not; 11. a stop is made at ʿAlī al-Riḍā and the coming of the last imām is awaited, whence the name Wāḳifīya given to this party, i. e. those who suspend their judgement regarding the imām's death. They were at first called Ḳaṭʿīya (Ḳiṭṭīʿīya), because, unlike the Wāḳifīya, they admitted the reality of the imām's death or, according to others, because they interrupted the line of the imāms at Mūsā al-Kāẓim, son of Djaʿfar, in order to keep it exclusively in the line of his descendants. Others admitted after Mūsā, the imāmate of his son Aḥmad, excluding ʿAlī al-Riḍā; it is also said that Muḥammad, the latter's son, being very young at the time of his father's death, had not been able to receive from him the training for the imāmate; others admitted his quality of imām, but asked which of his sons Mūsā or ʿAlī should succeed him. After ʿAlī the same question arose between Djaʿfar and al-Ḥasan. Those who admitted the imāmate of al-Ḥasan al-ʿAskarī were called by objectors al-Ḥimārīya because they describe the chosen imām as an ignoramus. After the death of al-Ḥasan, some adopted Djaʿfar, the pretended son of a concubine, al-Ḥasan according to them not having left any children.

The Ṣafawids, who claimed descent from Mūsā al-Kāẓim, made the Shīʿa and more particularly the doctrine of the Ithnā ʿasharīya the state religion of Persia, as it still is. After his accession Shāh Ismāʿīl (906 = 1500) gave formal orders to the preachers of Ādharbaidjān to preach the sermon in the name of the twelve imāms, and to the muʾadhdhins to add the Shīʿa formula: "I testify that ʿAlī is the saint of God". The troops were ordered to put to death any objector.

The cult of the twelve imāms has attained an extraordinary importance among the Persians; hypostases of the Divinity, they direct the destinies

of the world, and preserve it and guide it. With them all is salvation, without them all is perdition (Gobineau, *Religions et philosophies*, p. 60). Their ministry, their intercession (*shafā'a*) are indispensable. Prayers with special formula are reserved for them; Sunday is sacred to 'Alī and Fāṭima; the second hour of each day to al-Ḥasan, the third to al-Ḥusain, the fourth to Zain al-'Ābidīn and so on. Pilgrimage to their tombs (*ziyāra*) procures special rewards.

Mahdilehre des Islams*, Heidelberg 1901); 'Alī al-Baḥrānī, *Manār al-Hudā*, p. 314 *sqq.*; Khwāndemīr, *Ḥabīb al-Siyar*, iv. 5, 54; Goldziher, *Vorlesungen*, Ind. s. v. "Zwölfer". (CL. HUART.)

I'TIḲĀD is "belief" that a thing is so. It may be only in the sense of the English "thinking", the German "Glauben", or it may be a feeling perfectly assured, and so the word is used especially of belief in religious dogmas (Lane, Dozy, *Supplément*). It is then exactly equivalent to *taṣdīḳ*, firm acceptance in the mind of a thing as true, and is distinguished from *īmān*, "faith" in that some hold *īmān* to cover works (*'amal*) and confession (*iḳrār*). Al-Taftāzānī, in his commentary on the *'Aḳā'id* of al-Nasafī (ed. Cairo 1321, p. 7) explains that some of the revealed precepts (*aḥkām shar'iya*) connect with manner of action and are called *far'iya*, "derivative", and *'amaliya*, while others connect with belief (*al-i'tiḳād*) and are called *aṣliya* "basal" and *i'tiḳādiya* (cf. al-Bādjūrī, *Ḥāshiya 'alā Sharḥ Ibn Ḳāsim*, Cairo 1311, i. 20; *Ḥāshiya 'alā Matn al-Sanūsiya*, Cairo 1283, p. 14 *sq.*; Luciani, *Les prolégomènes théol. de Senoussi*, p. 4 *sqq.*; *Dict. of Techn. Terms*, s. v. *ḥukm*). In consequence *al-i'tiḳādāt* is used much in the sense of *al-'aḳā'id*, the doctrines of the faith. The exact scholastic definition of the word evidently gave difficulty. In the *Dict. of Techn. Terms* (p. 954) two uses are distinguished: one generally known, "firm belief", and a rarer, "conviction, certainty". The first is a mental judgment, absolute (*djāzim*), but susceptible of doubt (*yaḳbal al-tashkīk*); the second is a mental judgment, absolute or preponderant (*rādjiḥ*) and includes *'ilm*, "knowledge", which is a mental judgment incompatible with doubt or belief or opinion (*ẓann*). The second is sometimes called "certain knowledge" (*al-'ilm al-yaḳīnī*) and excludes "compound ignorance" (*al-djahl al-murakkab*), the ignorance that does not know that it is ignorance. Others distinguished the first *i'tiḳād* into two; that which corresponds to fact and that which does not. See ĪMĀN.

Bibliography: has been given in article. (D. B. MACDONALD.)

I'TIḲĀD KHĀN, title of a Kashmīrī named Muḥammad Murād, who gained such an ascendancy over the emperor Farrukhsiyar (q. v.) that he became his confidential adviser, received from him the title of Rukn al-Dawla I'tiḳād Khān Farrukhshāhī, and ultimately became his *wazīr*. When Farrukhsiyar was blinded and deposed in 1124 (1713), I'tiḳād Khān was thrown into prison and his property confiscated, but he was subsequently released, and died in the reign of Muḥammad Shāh [q. v.].

Bibliography: Khāfī Khān, *Muntakhab al-Lubāb*, ii. 700 *et seqq.*; Elliot-Dowson, *History of India*, vii. 469—473, 476—479; Ghulām Ḥusain Khān, *Siyar al-Muta'akhkhirīn* (Eng. trans. Calcutta 1789), i. 123 *et seqq.*

I'TIKĀF (A.) is the name of a religious custom of which the main feature is that the believer retires for a time from the world in a mosque. The *I'tikāf* is always considered meritorious (*sunna*) and is numbered among those good works which are recommended in the law-books to be performed during the last ten days of Ramaḍān, in order to participate in the blessings of the holy *Ḳadr* night. According to the Muslim tradition, the Prophet also used to spend the last third of the month fasting in the mosque in Medina. On the *Lailat al-Ḳadr* (Night of the Divine Decree) see Ḳur'ān, xliv. 2, xcvii. 1—5, cf. Ḳur'ān, ii. 181. The question what night is to be considered the *Ḳadr* night is not settled. According to the view of most Muslim scholars, it must be assumed that one of the last ten nights of the month of fasting (especially one of the five odd nights, *i. e.* 21, 23, 25, 27 or 29 Ramaḍān) is meant. According to others — and this was Abū Ḥanīfa's view —, there are no indications that the *Ḳadr* night belonged to this period of the year.

Bibliography: The chapter on the month of fasting and the *I'tikāf* in the collections of Traditions and the *Fiḳh* books; al-Dimashḳī, *Raḥmat al-Umma fi 'khtilāf al-A'imma* (Būlāḳ 1300), p. 50; Th. W. Juynboll, *Handbuch des islām. Gesetzes*, p. 125. (TH. W. JUYNBOLL.)

I'TIMĀD al-DAWLA (Arabic: support of the kingdom), title of the Persian Prime Minister under the Ṣafawids; also called *wazīr-i a'ẓam*, "great minister", *wakīl* ("Nabob", deputy) or *rukn al-dawla*, "the hinge of Persia". As the chief administrator of the kingdom he possessed far-reaching powers and no document of the king was valid without his seal; his position however was exceedingly precarious as his fate depended entirely on his master's humour. A controller (*nāẓir*, supervisor) appointed by the king assisted him as secretary. The residence of the Prime Minister was near the royal palace in Iṣfahān, in the vestibule of which he held his reception. At public audiences he stood on the right of the ruler and when the latter rode out through the city he accompanied him on the right, whence his epithet *wazīr-i rāst*, "minister of the right". His dismissal resulted in his banishment to some town where he lived as a simple citizen. His salary consisted of a definite sum called *ṣādirāt*, "fees", which he drew annually from the khāns or tribal chiefs whose interests he pledged himself to represent at court. In 1650 his income was estimated at 900 to 1000 tomans or £ 14,000 to £ 16,000.

ITK. [See ʿAbd, i. 18.]

ITTIḤĀD, 'becoming one'. Muslim scholastics distinguish two kinds of *ittiḥād*, 1) 'real' (*ḥaḳīḳī*); 2) 'metaphorical' (*madjāzī*). The former class has two subdivisions, according as the term is applied *a*) to two things which become one, *e.g.*, ʿAmr becomes Zaid, or Zaid becomes ʿAmr; *b*) to one thing which becomes another thing that was not existent before, *e. g.*, Zaid becomes some individual who did not previously exist. *Ittiḥād* in this 'real' sense is necessarily impossible; hence the saying, *al-ittiḥād bāṭil* (or *muḥāl*). The 'metaphorical' class has three subdivisions, according as the term denotes *a*) one thing's becoming another thing by instantaneous or gradual transformation, *e.g.*, water becomes air (in which case the real nature of water is destroyed by the removal of its specific form from its substance, and to this substance the specific form of air is added), or black becomes white (in which case one attribute of an object disappears and is replaced by another attribute); *b*) one thing's becoming another thing by means of composition, so that a third thing results, *e.g.*, earth becomes clay by the addition of water; *c*) the appearance of one person in the form of another, *e.g.*, of an angel in the form of a human being. All these three species of 'metaphorical' *ittiḥād* actually occur. In the technical language of the Ṣūfīs, the name *ittiḥād* is given to the mystical union by which the creature is made one with the Creator, or to the theory that such a union is possible. This conception of the unitive state, like the parallel doctrine of *ḥulūl*, *i.e.* the doctrine that the Creator becomes incarnate in the creature, is generally regarded by the Ṣūfīs as heretical, on the ground that it involves homogeneity and is therefore inconsistent with the true notion of divine unity (*tawḥīd*), which admits no real existence except that of God. *Ittiḥād*, thus understood, presupposes the existence of two beings which are made one, whereas, according to the more orthodox mystics, human individuality is only a phenomenon that passes away in the One Eternal Reality (*fanāʾ fi 'l-ḥaḳḳ*). Sometimes the term *ittiḥād* is employed like the Ṣūfistic *waḥdat* or *tawḥīd*, in reference to the doctrine that all things are non-existent in themselves, but derive their existence from God and, in this respect, are one with God (ʿAbd al-Razzāḳ al-Kāshī, *Iṣṭilāḥāt al-Ṣūfiya*, ed. by Sprenger, p. 3). According to ʿAlī b. Wafā (quoted by Shaʿrānī in *al-Yawāḳīt wa 'l-Djawāhir*, Būlāḳ, 1277 A. H., p. 80, l. 18 *sqq.*), the meaning of *ittiḥād* in the terminology of the Ṣūfīs is "the passing away of that which is willed by the creature in that which is willed by God".

ʿIWAḌ (A.) means in Muslim law all that must be given or done as a guarantee of the fulfilment of what the other party is pledged to, in a contract of sale or other agreement.

(Th. W. Juynboll).

IYĀD, a great Arab tribe belonging to the Maʿaddī (Ismāʿīlī) group. Their genealogy is Iyād b. Nizār b. Maʿadd b. ʿAdnān. The Bakr's, Anmār and Muḍar were consanguineous tribes of the Iyād. A section of the Iyād professed Christianity. The poet Abū Duʾād, famous for his descriptions of the horse, and the celebrated Ḳuss b. Sāʿida were members of the Iyād.

At first they dwelt in Tihāma up to the borders of Nadjrān [q. v.]. In the first half of the third century they emigrated in large bodies to Eastern ʿIrāḳ and thence to Mesopotamia. Among their settlements were: Anbār (they are said to have the first to introduce the Arabic characters there), ʿAin Ubāgh (behind Anbār), Sindād, Takrīt, Bandar Iyād (lying towards Kūfa), Bāriḳa, Dīr in al-Djabal (in the ʿIrāḳ), Djazīrat Zarād, al-Ḥaṣā, Khidād, Mawṣil (Mawṣila), al-Mustaʿid, al-Salawiya, Shibāk, al-Shiḳḳa (in the ʿIrāḳ), Sawwa 'l-Adjdād, al-Thaʿlabiya (between Mekka and Medina), al-ʿUdan. Among the waters of the Iyād were Laḳīṭ and al-Litb.

A section of the Iyād, probably before these large emigrations to the ʿIrāḳ, joined the Ḳuḍāʿa when the latter migrated from Tihāma to Baḥrain; another remained in Wādī Bīsha [q. v.]. We also find scattered settlements of the Iyād in Syria, e. g. in Antioch, Ḥimṣ (Emesa), Ḥalab, and in Greek territory at Ancyra (Angora in Asia Minor), Bagras (Πάγρας), etc.

History: Towards the beginning of the third century of our era a quarrel arose between the Iyād and Muḍar regarding the possession of the Kaʿba, which also involved dominion over Mecca, after the two tribes in alliance had driven the Djurhum from Mecca. The Iyād were defeated and emigrated to the ʿIrāḳ, where they established themselves mainly in ʿAin Ubāgh and in scattered settlements south of al-Ḥīra. During the first period of their sojourn in the ʿIrāḳ the Iyād were exposed to the invasions of Djadhīma b. Mālik of the Azd, whose rule extended over all the Arabs in the ʿIrāḳ. Djadhīma demanded from them the surrender of their relative, ʿAdī b. Naṣr; after long hesitation the Iyād submitted and delivered ʿAdī up, who then married Raḳāsh, sister of Djadhīma.

In the ʿIrāḳ the Iyād seem to have acknowledged the suzerainty of the Lakhmid princes of al-Ḥīra. During the wars of Mundhir b. Māʾ al-Samāʾ against the Kinda chief al-Ḥārith b. ʿAmr b. Ḥudjr we find them in Mundhir's train. At the beginning of the viith century the Iyād made inroads into Persian territory. They crossed the Euphrates. A detachment of Persian cavalry sent against them was completely destroyed by them near Kūfa [see DAIR AL-DJAMĀDJIM]. To defend himself against their inroads and to take vengeance on them, Khusraw (Kisrā) Anōsharwān sent an army against them under Mālik b. Ḥāritha, which is said to have included a detachment of the Bakr b. Wāʾil [q. v.]. In spite of the warning given them by their fellow tribesman, the poet Laḳīṭ, the Iyād were surprised and put to flight. The Persians followed them and, according to a tradition, inflicted a considerable defeat on them at the village of al-Ḥuraiḍiya. In consequence of their defeat, they are said to have retired into Syria. One section of them reached Byzantine territory at Ancyra, where they found others of their tribe already settled. An isolated tradition mentions a punitive expedition by the Persian king Sapor (Sābūr) Dhū 'l-Aktāf in the 4th century against the Iyād, but there is probably confu-

tion lay between Salīḥ and Kasr. In the battle of Dhū Ḳār (see BAKR b. WĀʾIL) they fought along-side the Ḳuḍāʿī tribes of Mesopotamia under Khālid b. Yazīd al-Bahrānī on the side of the Persians. A section of the Iyād had made secret arrangements with the Bakr and took to flight during the battle, thereby throwing the Persian lines into disorder. After the battle of Dhū Ḳār they, like the other Christian Arab tribes of Mesopotamia, remained a few more years under Persian suzerainty. In the battle of ʿAin Tamr (near Anbār) we find them on the side of the Persians along with the Mesopotamian tribes under Mihrān b. Bahrām Djūbīn. In the reign of Abū Bakr, in the year 12 (634), a large number of the Iyād, like many of the Tamīm and the Christian Arab tribes of Mesopotamia, joined the false prophetess Sadjāḥ [q. v.]. In the same year Khālid b. al-Walīd [q. v.] inflicted a serious defeat on them and the Persians, on whose side they fought, at Firāḍ (on the East bank of the Euphrates). In the caliphate of ʿOmar, in the spring of the year 17 (638), the Byzantine Emperor Heraclius made the last effort to regain the province of Syria, which had been lost to the Muslims. For this purpose he sent a large army which included Iyād along with the tribes on the Euphrates and Tigris to Ḥimṣ, the siege of which was begun. In the meanwhile the Muslims invaded Mesopotamia and conquered Takrīt, secretly supported by the Christian Arab soldiers in the city, among whom were Iyād, who then adopted Islām. When the Mesopotamian tribes besieging Ḥimṣ heard of a raid into Mesopotamia and the approach of an army, they abandoned the Byzantine army in order to defend their threatened homes. The Arabs in Ḳinnasrīn, Ḥalab, and other Syrian cities, who had previously joined the Byzantine army, negotiated secretly with Khālid b. al-Walīd and attacked the Byzantines, who were beaten and had to take to flight. The remnants of the Byzantine troops including Iyād retired to Cilicia, whither they were followed by the Muslims and almost entirely wiped out. When in the following year 18 = 639, Iyād b. Ghanm succeeded Abū ʿUbaida [q. v.] as governor of Ḥimṣ, Northern Syria and Mesopotamia, all the Mesopotamian tribes submitted and adopted Islām with the exception of the Iyād, who fled to Cappadocia in Asia Minor. Here, however, they only enjoyed their security for a brief space, for the Caliph ʿOmar demanded their extradition from the Emperor Heraclius under a threat of reprisals against the Christians in his provinces, and Heraclius was forced to agree. Four thousand of the Iyād then went to Syria and Mesopotamia and submitted to the Caliph. In later times we hear almost nothing of them.

ʿIYĀḌ b. MŪSĀ, ABU ʾL-FAḌL ʿIYĀḌ b. MŪSĀ b. ʿIYĀḌ AL-YAḤṢUBĪ AL-SABTĪ AL-MĀLIKĪ, known as al-Ḳāḍī ʿIyāḍ, a Mālikī jurist, traditionist, historian, man of letters and poet, born at Ceuta on Shaʿbān 15, 476 (Dec. 29, 1083) and died at Marrākush, 7 Djumādā II (13 Oct.) or Ramaḍān 11 Dec. 544 (1149).

After studying in his native town he went in 507 (1114) to Cordova where he devoted himself particularly to Ḥadīth and attended the lectures of Abū Muḥammad ʿAbd Allāh b. ʿAttāb and Abu ʾl-Walīd Ibn Rushd. His teachers numbered a hundred. He returned to his native town and held the office of Ḳāḍī where his administration was much appreciated. In 531 (1136-7) he became Ḳāḍī of Cordova but after a time again became Ḳāḍī of Ceuta. He was one of the first to welcome the arrival of the Almohads and went to Salā to pay homage to their chiefs, but when he saw in 543 (1148-9) that the Almohad dynasty was weakened by discords he fled from his native town and took refuge in Marrākush, where he died and was buried near the Bāb Aïlān.

Of the twenty works attributed to him we only know the following: 1°. *Kitāb al-Shifāʾ bi-Taʿrīf Ḥuḳūḳ al-Muṣṭafā*, apologetic history of the Prophet, publ. at Constantinople, n. d. and in 1329, Cairo, 1276, 1312 and 1327 (var. ed.); 2°. *Mashāriḳ al-Anwār fī Ṭafsīr Ṣaḥīḥ* (var. ʿalā Ṣaḥīḥ) al-Āthār, dictionary of rare terms found in the *Muwaṭṭaʾ* of Mālik, *Ṣaḥīḥ* d'al-Bukhārī and *Ṣaḥīḥ* of Muslim, Algiers, Fagnan, *Cat.*, n°. 549; Khed. Libr., *Fihr.*, i. 420; 3°. *Kit. Tartīb al-Madārik wa-Taḳrīb al-Masālik li-Maʿrifat Aʿlām Madhhab Mālik*, biographical dictionary of Mālikī scholars, Zaouyah d'el-Hamel, *Giorn. della Soc. asiat. Ital.*, x. 56-7, Madrid, Real Academia, Codera, *Misión hist.*, p. 175, n°. 35; Part i., stopping at the end of 200, in my possession; extracts with transl. in *Centenario della nascita di Michele Amari*, Palermo 1910, i. 251—276 and 365—384, ii. 133; 4°. *Kitāb al-Ilmāʿ ilā Maʿrifat Uṣūl al-Riwāya wa-Taḳyīd al-Samāʿ*, theory of the transmission of *ḥadīth*, Aya-Sofya, n°. 433[bis]; Cairo, *Bibl. Arab.-Ḥuf.*, i. n°. 1567; 5°. *Ikmāl al-Muʿlim fī Sharḥ Ṣaḥīḥ Muslim*, Constantinople, Nūr ʿOthmānīya, n°. 1035 and Rāghib Pasha, n°. 310; Cairo, i. n°. 1003—6; 6°. *al-Tanbīhāt al-mustanbaṭa ʿalā ʾl-Kutub al-mudawwana*, Cairo, i. n°. 983, al. n°. 686; 7°. *Bughyat al-Rāʾid li-mā taḍammanahu Ḥadīth Umm Zarʿ min al-Fawāʾid*, commentary on the story of Umm Zarʿ related by the Prophet, Berlin, n°. 1385-6; 8°. *Kit. al-Iʿlām bi-Ḥudūd Ḳawāʿid al-Islām*, exposition the five bases (*ḳawāʿid*) of Islām, probably Cairo, *v. s.*, i. n°. 1535, i.; with the comment of al-Kabbāb, Algiers, Fagnan, *Cat.*, n°. 570; 9°. *Ḳaṣīda* on the first 1st words of Ḳurʾān lxv. 7, Berlin, n°. 7691, i.; 10°. *Aḥādīth*, Cairo, Khed. Libr., *Fihr.*, vii. 295 (with anonymous commentary).

IYĀS b. MU'ĀWIYA was appointed ḳāḍī of Baṣra by 'Omar b. 'Abd al-'Azīz and died at the age of 76 in 121 or 122 (739-740). He has become proverbial in Arabic literature on account of the many examples of ready wit and intuition (*adhkan min Iyās*, Freytag, *Prov. Arab.*, i. 593) related of him, which were collected by so early a writer as al-Madā'inī in a work (*Zakan Iyās*). In this way he has become a familiar figure in literature (cf. R. Basset, *Revue des Traditions populaires*, vi. 67).

Bibliography: Ibn Khallikān, *Wafayāt*, ed. Cairo 1299, i. 143 *sqq.*; Ibn Nubāta, *Sharḥ al-'Uyūn 'alā Risālat Ibn Zaidūn*, Alexandria 1290, p. 73 *sqq.* (on the margin of al-Ṣafadī, *Sharḥ Lāmiyat al-'Adjam*, i. 142 *sqq.*); al-Sharīshī, Comm. on al-Ḥarīrī, *Maḳāmāt* (vii.).

IZMID (older forms: ISKINIMID, IZNIKMID; in Ibn Khordādhbeh and Idrīsī: NIḲUMIDIYA; in modern times officially written IZMIT), the ancient Nicomedia, capital of the independent *Liwā* (*mutaṣarrifliḳ*) of the same name (cf. KODJA-ILI). The town was taken by the Saldjūḳs on their invasion of Asia Minor at the end of the xith century and belonged to the lands of Sulaimān b. Ḳutlumush (470—479 = 1078—1085) who had chosen Nicaea as his capital; shortly after his death it was recaptured by Alexius I Comnenus (Anna Comnena, ed. Reifferscheidt, i. 212, cf. 247, ii. 72) and, apart from the brief period when the Latin Emperors of Constantinople held the town (1204—1207), remained in possession of the Byzantines till it was taken from them by the Ottomans under Orkhan, according to the Turkish sources, in 727 (1326-26) or 726 (1326-7) or 731 (1330-31), according to Byzantine sources, in 1338; cf. v. Hammer, *Gesch. des Osm. Reiches*, i. 85 and 580; (for the legends associated with the Turkish conquest see Leunclavius, *Hist.*, p. 186-190; Sa'd al-Dīn, i. 34—37; Christo Papadopulos, p. 65 *sq.*). In 1399 Marshal Boucicaut had to turn back from the strong walls of the city (J. Delaville Le Roulx, *La France en Orient au XIVe Siècle*, p. 371); in 1402 it was sacked by a body of Tīmūr's troops (Ducas, Bonn ed., p. 72). Under Turkish rule Izmid acquired special importance as an arsenal for the navy and as a yard for building small merchant vessels from the wood supplied by the rich forests of the neighbourhood. The arsenal, said to have been founded by the Kilidj 'Alī's, abandoned since the middle of last century, was to have been restarted again by English engineers. The population of the town may be put at 25 000, of whom the majority are Muslims, and the non-Muhammadan element is represented by a strong Armenian community (which immigrated from Persia at the beginning of the xviith century), several hundred Greeks, and a small Jewish community. Since 1873 Izmid has been connected by rail with Constantinople (terminal station Haidar Pasha; distance 70 miles) and since 1892 with Angora. — Only insignificant ruins exist of the ancient and mediaeval buildings; the Byzantine fortifications on the hill are better preserved, which Busbecq and Belon still saw in their original form in the xvith century. Of the Turkish buildings we may mention the madrasa founded by Sulṭān Orkhān in the upper city (originally a church, restored by 'Abd al-Madjīd); the mosques of Pertew Pasha, Muḥammad Bey and 'Abd al-Salām Bey, built by the architect Sinān, the baths of Rustam Pasha and the Khān of Pertew Pasha. The pleasure palace with park (*serāi baghčesi*) built by Murād IV has disappeared; another was built by Maḥmūd II and restored by 'Abd al-'Azīz. Among the Greek churches the oldest is that of St. Pantaleimon, said to be also the tomb of this patron of the city, destroyed in the reign of Murād IV, it was rebuilt in 1700 and again restored in 1861. In the neighbourhood of Izmid lay the Champ des Fleurs (*Čičeḳ Maidānī*), where Emmerich Thököly, prince of Transylvania, spent his last years, till his death on Sept. 13, 1705 in a voluntary exile (De la Motraye, *Voyages*, i. 309; Paul Lucas, *Voy. dans la Grèce, l'Asie Min.*, etc. Amsterdam 1714, i. 49); his remains buried in the Armenian cemetery were brought to Hungary in 1906 with his tombstone (cf. von Hammer, *Umblick*, p. 192).

(J. H. MORDTMANN.)

IZMĪR (SMYRNA), the most important commercial town in Asiatic Turkey and the residence of the Wālī of the province of Aidīn. The form Izmīr (in Ibn Baṭṭūṭa: Yazmīr) corresponds to the form used by Western writers in the middle ages, *Smire*, Σμύρνη, etc. (Tomaschek, p. 28; *Zmire* in Ram. Muntaner, c. 202; *Ismira* in Schiltberger). On the incursion of the Saldjūḳs into Asia Minor at the end of the xith century the Turk Tzachas (Τζαχᾶς, only in Anna Comnena), the father-in-law of Ḳilidj Arslān I, who lived in Nicaea, established himself in Smyrna and undertook from there his campaigns of conquest against the islands of the Archipelago and the Hellespont. It was only after the Saldjūḳs were driven from Nicaea (June 1097) that Smyrna was restored to Byzantine rule. John Vatatzes Dukas, emperor of Nicaea (1222—1255), laid out the great system of defences on the Pagus hill (*Corp. Inscr. Graec.*, N°. 8749), which commands the town. After the dissolution of the Saldjūḳ king-

dom of Ḳonya, Aidin, Amir of Ephesus, seized the town about 1320 and it once more, as in the days of Tzachas, became the base for piratical raids against the islands of the Archipelago and the merchant ships of the Franks. To put an end to this the naval powers concerned combined under the aegis of the Pope and stormed Smyrna on Oct. 28th 1344 (Heyd, *Histoire du Commerce du Levant*, i. 538). The Knights of Rhodes, to whom the defence of the town was entrusted, built at the harbour the fort of St. Peter, near the later custom-house, which survived up till about fifty years ago. The citadel, on the other hand, remained in the hands of the Aidin-oghlu: Bāyazīd I, who dispossessed them, installed a *subashi* (city governor) there. It was not till January 1403 that Timurlenk stormed the Frankish fort and drove the knights out of Smyrna (Sharaf al-Dīn, *Ẓafar-nāme*, ii. 464—477; Dukas, p. 72 *sqq.*; Chalkokondylas, p. 161, cf. von Hammer, *Gesch. d. osm. Reiches*, i. 332 *sq.* and 626 *sq.* After the withdrawal of Timurlenk from Asia Minor the adventurer Djunaid [q. v., i. 1063b *sq.*] seized the town; on his overthrow, about 1425, the town passed definitely under Ottoman rule.

The further history of the town is of little general interest. On Sept. 13, 1472, Smyrna was attacked by the Venetian fleet under Pietro Mocenigo, plundered and set on fire (Hopf, *Chroniques Gréco-Romanes*, p. 207; Cippico, *Delle Guerre de' Veneziani nell' Asia*, p. xxvi *sqq.*; Zinkeisen, *Gesch. d. Osm. Reiches*, ii. 405). In the later wars of the Turks with the European sea-powers, the latter, in view of the numerous European inhabitants have repeatedly refrained from attacking the town, for example the Venetians in the autumn of 1694, when after the fall of Chios the Turkish fleet had retreated before them into the Gulf of Smyrna (Kantemir, *Gesch. des Osman. Reiches*, p. 649; Zinkeisen, *op. cit.*, v. 175) and the Russians in 1770 after they had destroyed the Turkish fleet near Česhme (Ypsilanti, Τὰ μετὰ τὴν ἅλωσιν, p. 466 *sq.*; cf. v. Hammer, *Gesch. d. Osman. Reiches*, viii. 358). As a defence against such attacks from the sea, the Porte after the battle in the Dardanelles (June 26, 1656) in the war with Venice built defences at the narrowest part of the Gulf on Cape Sandjaḳ Burnu, called Sandjaḳ Ḳal'esi (saluting fort) or Yeniḳal'e, which was completely destroyed by the earthquake of July 10, 1688 and then imperfectly rebuilt. In modern times the batteries were remounted and mine barriers laid during the recent wars.

From the land Smyrna has been repeatedly ravaged by the turbulent Djalāli and Re'āyā, who were a plague to Anatolia from the beginning of the xviith century, e. g. in 1600 by the hordes of Ḳalenderoghlu and Ḳara Sa'īd (Sandys, *Travailes*, 6th ed., London 1658, p. 12; cf. v. Hammer, *op. cit.*, iv. 398), in 1625 by Djennet-oghlu of Ḳarasi (Roe, *Negotiations*, p. 410; Zinkeisen, *op. cit.*, iv. 55 *sq.*), and in 1736 by Saribey-oghlu of Khōnās (Pococke, ii. 2 p. 58; Ypsilanti, *op. cit.*, p. 334). Equally dreaded were the regular visits of the Barbary corsairs, who till the conquest of Algeria by the French had the permission of the Porte to recruit their crews from Smyrna and the neighbourhood (Dumont, *Voyages*, 1699, iv. 106 *sqq.*; Tournefort, ii. 198; Djewdet, *Ta'rīkh*, iv. 23, vii. 185, x. 233). The Jewish community of Smyrna produced in the xviith century the Messianic pretender Sabbatai Ṣebī, the founder of the Dönme [q. v.] sect (crypto-Jewish Muslims), which is still represented by a small body (cf. the contemporary narrative of Rycaut, the English consul at Smyrna, in the continuation of Knolles, *History of the Turks*, ii. 174 *sqq.*).

The town was twice visited by earthquakes and almost destroyed. In the first, that took place in July 10, 1688 (Ramaḍān 12, 1099), the Sandjaḳ Ḳal'esi was overwhelmed by the waves, most of the buildings collapsed, and thousands of people — at the lowest estimate 5000 — perished among the ruins (Rāshid, *Ta'rīkh*, i. 147a; Rycaut, *Turkish History*, p. 301 *sq.*; Carayon, *Relations inédites des Missions de la Compagnie de Jésus*, p. 291 *sqq.*; Pantinus Smit, *Vier jaren in Turkije*, p. 178 *sqq.*, 246 *sq.*; De la Motraye, *Voyages*, i. 182 *sq.*; Slaars, p. 76, 128). The second took place on July 3 and 5, 1778 and did equal damage, chiefly through the conflagration which broke out among the falling buildings (Björnståhl, *Briefe*, iv. 131—147; Slaars, p. 132 *sq.*). Almost equally dangerous was the rioting which broke out on March 14, 1797 as a result of a quarrel between Cephalonians and Croats, and spread fire and death through the town (Djewdet, *op. cit.*, vi. 270 *sq.*; Zinkeisen, *op. cit.*, vii. 13 *sq.*). During the war of the Porte with Egypt, on Febr. 19, 1833, emissaries of Ibrāhīm Pasha, after he had defeated the Turks at Ḳonya (21 Dec. 1832) and advanced to Kütahya, occupied Smyrna for Muḥammad 'Alī but retired again after a few weeks (Rosen, *Gesch. der Türkei*, i. 174).

Smyrna is singularly poor in historical monuments. Nothing worth mentioning is left of the remains of antiquity. The amphitheatre and the circus, in which St. Polycarp, the patron saint of Smyrna, suffered martyrdom, were destroyed in the xviith century and the materials used to build the Bezestān and the Wazīrkhān (v. *infra*). The alleged tomb of Polycarp near the circus was changed into the grave (*türbe*) of a Muslim saint at the beginning of the xviiith century. The Byzantine castle on Mt. Pagus has for years been abandoned and left to decay; the old mosque and the great cistern (*bir dewi*), both presumably of Byzantine origin, are in ruins, and the historical foundation inscription of John Vatatzes, as well as the ancient colossal head of the so-called Amazon, which was formerly built into the wall over the entrance gate of the castle and formed the badge of the town, have in recent times been ruthlessly destroyed. The Turks considered this head to be that of Ḳaidafa, queen of Saba and therefore called the castle Ḳaidafa Ḳal'esi, which in the popular language has been corrupted into Kadife Ḳal'esi (Velvet Castle). Among the numerous mosques (ca. 20 large, *djāmi'*, and 40 small, *masdjid*) the following are specially mentioned: Hiṣār Djāmi' (said to be the old Frankish cathedral), Shadirwān Djāmi', Kestanepazari Djāmi' (traditionally said to have been at one time a Greek church), Kemeraltı Djāmi', Ḥadjdji Ḥasan Djāmi'; the large Wazīrkhān and the Bezestān were built in the years 1675—1677 by the Grand Vizier Aḥmad Köprülü. Other old *Khān*'s (warehouses) are the Derwīshoghlu Khān, Mādamā Khān, and the Ḳara 'Othmān-zāde Khān. A peculiarity of Smyrna are the numerous ... of the Frankish quarter, the so called *Ḳoḳhāne*'s (corrupted from *Ḳonaḳkhāne*). In the year 1808

(1696—7) a mint was instituted in Smyrna to strike ducats (*ashrafī*) and silver piastres (*ghurūsh*); it closed after a few years however (Fiḳhī, *Ta'rīkh*, i. 226; cf. Ismā'īl Ghālib, *Taḳwīm-i Meskūkāt-i 'Othmāniye*, nº. 597—600). Its great importance as a place of export for the products of the soil and industries of the interior (grain, figs, cotton, poppy seeds, opium, valonia, licorice, carpets, etc.) was attained by Smyrna in the 19th century. The goods of more distant lands, e. g. Persian silk and the camelots of Angora in those days and down to modern times found their way to the west via Smyrna. Numerous English and Dutch merchants settled there and the English colony has played a distinguished part in the development of the country, economic and cultural. Trade with Persia and Angora resulted in a considerable immigration of Armenians. The Jews (Sefardim) had the exclusive right to serve as brokers. The Europeans lived in the Frank quarter and conducted themselves there with the same freedom as in their own land. They were later joined by a strong community of trading Greeks, while the Muhammadan element was gradually driven into the back ground. Giaur Izmir ("infidel Smyrna") therefore became a name of the town; the quarter of the town inhabited by the Rhodians was already so called by Tīmūr's time in contrast to the upper town, which remained in the hands of Muslims (*Izmir-i Gāwrān* in Sharaf al-Dīn). — The present population is estimated at about 300 000, of whom 90 000 are Muslims, 110 000 Greeks, 30 000 Jews, 12 000 Armenians, 55 000 foreigners, including 30 000 Hellenes.

(J. H. Mordtmann.)

IZNIK, the ancient and Byzantine Nicaea (*Niḳiya* in Ibn Khordādhbeh and al-Idrīsī), was besieged in vain by the Arabs in their first campaigns against Byzantium in 717 and 725 (Theophanes, ed. de Boor, i. 397 and 405 *sq.*) and fell at the beginning of 1081 into the hands of the Saldjūḳ Sulaimān, son of Ḳutlumush, who made his residence there. The first Crusaders under Walther Habenichts were severely defeated before Nicaea in 1096 by Alp Arslān, son and successor of Sulaimān; next year, however, the town could not withstand the onslaught of the Crusaders, led by Godfrey de Bouillon, and surrendered on June 19/20, 1097 to the Byzantines in alliance with the Crusaders, in whose possession it remained till the Ottoman invasion. Sulṭān 'Othmān I is said to have attacked Nicaea, but it was not till the time of Orkhan that it was taken after a prolonged siege in 731 (1331); he moved his capital thither for a time ('Ashiḳpashazāde and Leunclavius, *Hist.*, p. 195; cf. Nicephorus Gregoras, iii. 508 *sq.*). In 1402 the town was taken and devastated by a raiding body of Tīmūr's troops (Ducas, p. 72; Sharaf al-Dīn, *Zafarnāma*, ii. 454), but it soon recovered from this blow, and it is described as flourishing and prosperous at the time of the rebellion of Prince Muṣṭafā (Leunclavius, *Hist.*, p. 525, l. 46); Bāyazīd II is said to have intended after the death of his father, Muḥammad II, to renounce the throne and retire to Nicaea.

The decline of the town began about the middle of the 17th century; the population then estimated at 10,000 (Grelot) has since sunk to 1500. The once flourishing manufacture of faience tiles (*Ḳāshī*), which Otter (*Voyage en Turquie*, i. 44) still found working in 1736, has now ceased. Only a slight memory of it, no longer understood, remains in the name Čīnilik (for Čīnī Iznīḳ, "faience Iznik"), which the town popularly bears. The present village occupies a small part of the area surrounded by the town walls and forms with its district a community (*nāḥiya*) of the Ḳaḍā of Yenishehr, in the wilāyet of Khudāwendigiār (Brussa), while Iznīḳ was formerly the capital of a ḳaḍā of the *eyālet* of Ḳodja-eli. The general decay has also affected the ancient buildings. The best preserved are the Roman and Byzantine walls consisting of a double rampart (best described by Prokesch and Texier, cf. Schneider, *Mitt. des Deutsch. Arch. Instituts*, Athens, xxiv. 398—400) with their monumental gateways and 238 towers (Texier). The Byzantine part of these defences dates from the time of Leo III the Isaurian, who had them built here after the Arab invasion of 726 (*Corp. Inscr. Graec.*, nº. 8664); Michael III in 858, and later Theodore Lascaris (*Corp. Inscr. Graec.*, nº. 8745—8747) completed and improved them. Of the foundations of Sulṭān Orkhān only a madrasa is still in use; the mosque (restored in the 16th century by Sinān for Sulaimān I) has with its 'Imāret been dilapidated for centuries; of the buildings of the family of Djandarli Khair al-Dīn Pasha, the Yeshil Djāmi' (built in 780—794 A. H.) and the mosque of Mahmūd Khātūn, dedicated to Ḳyzyl-Ḳashī Khān (flourished in the reign of Muḥammad II; cf. *Mitt. d. Seminars f. Or. Sprachen zu Berlin*, v. 2.

p. 164), are tolerably well preserved; the tomb of Eshrefzāde is still a much visited place of pilgrimage. Of the three churches which the Greeks still had at the end of the xviith century (Crusius, *Turcograecia*, p. 204), those of St. Theodore and of St. George have disappeared; the third, that of the Κοίμησις τῆς Θεοτόκου, restored in 1807, is a Byzantine building of the ixth century with additions of the xith and of interest on account of its old mosaic decorations.

[J. H. Mordtmann.]

'IZRĀ'ĪL (in European literature one also finds 'Azrā'īl), the name of the angel of death, one of the four archangels (next to Djibrīl, Mīkā'īl, Isrāfīl). The name is perhaps a corruption of עזראל, which is given by Eisenmenger, *Entdecktes Judenthum*, ii. 333, as the name of the prince of Hell. Like Isrāfīl, whose office of trumpet-blower at the last judgment is sometimes given to him, he is of cosmic magnitude; if the water of all the seas and rivers were poured on his head, not a drop would reach the earth. He has a seat (*kursī*) of light in the fourth or seventh heaven, on which one of his feet rests; the other stands on the bridge between paradise and hell. He is however also said to have 70 000 feet.

The description of his appearance agrees almost exactly with that in Jewish literature: he has 4000 wings and his whole body consists of eyes and tongues, the number of which corresponds with that of the living. He, however, is also said to have four faces.

At first he was an angel like others. When Allāh wanted to create man, he ordered Djibrīl to snatch from the earth for this purpose a handful of its main constituents. The earth, however, stirred up by Iblīs, offered resistance, so that neither Djibrīl, nor Mīkā'īl nor Isrāfīl could carry out the commission. But 'Izrā'īl managed to do it. On account of his hard-heartedness (*ghilẓat al-ḳalb*) Allāh then appointed him angel of death.

On account of his strength he is also master of death. When Allāh had created Death, he summoned the angels to look at him. When they saw his overwhelming strength, they fell down unconscious and remained lying for thousand years. Then they awakened and said: "Death is the most powerful of creatures". But Allāh said: "I have appointed 'Izrā'īl to be lord over him".

Several angels of death are mentioned, as in Jewish literature; and it is said that 'Izrā'īl deals with the souls of the prophets while the souls of ordinary men are under his *Khalīfa*. Special stress is laid on the beginning of Sūra lxxix. as authority for a number of angels of death: "By those who tear forth and by those who draw forth" etc. The former are said to be those angels who drag the souls of the unbelievers by force from their bodies, while by the latter are meant those who have to separate the souls of the believers from their bodies. The explanation of the verse however is not certain. In Sūra xxxii. 11 mention is made of the angel of death (in the singular).

'Izrā'īl keeps a roll of mankind. But he does not know the date of death of the individuals. Whether one belongs to the blessed or the damned, he sees from the fact that the names in the first category are surrounded by a bright and those in the second by a dark circle.

When the day of a man's death approaches, Allāh causes to fall from the tree below his throne the leaf on which the man's name is written. 'Izrā'īl reads the name and has to separate the person's soul from his body after 40 days.

But there are some people who strive against the separation, and object that the angel of death is acting arbitrarily. The latter then goes back to Allāh and tells him his experience. Allāh then gives him as a credential an apple from Paradise on which the *basmala* [q. v.] is written; when the man sees this, he yields.

Man also has other means of making it difficult for the angel of death to carry out his task. If the latter wants to creep into his throat to fetch out his spirit, the dying man recites a *dhikr* [q. v.] and thus closes the entrance. The angel then returns to Allāh, who advises him to try it with the dying man's hand. If the latter however is just making a *ṣadaḳa* [q. v.] the angel's entrance is again impossible. Finally however 'Izrā'īl writes the name of God on the man's hand. Then the bitter feeling of separation disappears and the angel can enter to fetch the spirit. — On the other hand, it is also said that he pierces men with a poisoned lance. Another account is as follows. When a believer is on his deathbed, the angel of death stands at his head and draws his soul out as gently as water runs out of a skin. He hands it to his assistants who carry it through the seven heavens up to the highest and then place it with the body in the grave (the soul's journey to heaven, cf. Bousset in *Archiv f. d. Religionswissenschaft*, iv.).

But if an unbeliever die, the angel of death tears the soul out of his body in the roughest fashion. The gate of heaven closes before the soul, as it is carried up, and it is thrown down to earth again.

Characters like Idrīs, Ilyās, 'Īsā and al-Khaḍir [q. v.], as is well known, were not subject to death. As regards Moses the same thing could not be asserted; but the Bible throws a veil over his death. Muslim tradition accordingly says that Moses defended himself against the angel of death, who came with the fatal message to him, and bruised his eye. Allāh said to the angel when he came back:

"If he places his hand on a cow, as many years are to be granted him as his hand covers hairs". "And then?" asked Moses. "Death", said Allāh. — It is also related that the angel of death came to Moses with an apple from Paradise; when he had smelled this, he died.

On an experience of Solomon's with the angel of death, see al-Baiḍāwī on Sūra xxxi. 34; on his visit to Idrīs, see that article.

(A. J. Wensinck.)

'IZZ al-DAWLA, honorific name frequently assumed by Muhammadan princes, e.g. Bakhtiyār [q.v.].

'IZZ al-DĪN, honorific name, for princes often combined with the preceding (*'Izz al-Dawla wa 'l-Dīn*). However, not only princes bear this name, but scholars also.

'IZZET MOLLA, Keçhedji-zāde Meḥmed, *'Izzet Efendi*, an important Ottoman statesman and poet in the reign of Maḥmūd II. Born in 1200 (1785-6) in Constantinople, the son of the ḳalpaḳ-maker Ṣāliḥ Efendi, he devoted himself to a theological and legal career, following in his father's footsteps. When he had reached the position of Mollā of Galata, he was subsequently involved in the fall of his patron Ḥālet Efendi, as he had written satirical verses on his behalf. He was therefore banished to Keshān near Rodosto. Pardoned a year later he regained Sulṭān Maḥmūd's favour, who chose him as a companion. Then received the highest religious offices. In 1245 (1829) he acted as a representative at the peace negotiation with Russia. His openly displayed bias in favour of peace at any price brought upon him the enmity of the war party, whose intrigues succeeded in getting him banished to Siwas. There he died soon after his arrival in 1245 (1829-30), of poison, it is said. One of his sons is the statesman Fu'ād Pasha.

In addition to numerous chronograms he composed two dīwāns, *Bahār-i Efkār* (Springtime of Thoughts), concluded about 1240 (1824-5), and *Khazān-i Āthār* (Autumn of Actions), only put together after his death. Neither transcends mediocrity. 'Izzet however won great renown through his two romantic Mathnawī: *Gülshen-i 'Ashḳ* (Rose-garden of Love), completed 1227 (1812), lithogr. Constantinople 1265, is a short romance on the old Persian model with a strain of Mewlewī mysticism. The subject matter shows a pretty and original imagination. But still more attractive is his thoroughly characteristic Mathnawī composed during his exile in Keshān with the ambiguous title *Miḥnet-Keshān* ("The Sufferer" or "Suffering in the place of exile at Keshān"). This is the poetical diary of an exile, in which ghazals, ḳaṣīdas and chronograms are scattered through the Mathnawī verses, and it gives an interesting insight into the world of ideas of a highly educated dignitary of the time and at the same time truthfully reflects provincial life in European Turkey at the period of the beginning of Maḥmūd's reforms. The work, the language of which is already remarkably national Turkish and is interspersed with Turkish every-day idioms, secures 'Izzet Mollā a distinguished place among the reformers of the language and the modernists. It was lithographed in 1269 at Constantinople. Ziyā Pasha also published it in his *Kharābāt: Türk Mathnawīyāt* (1292).

'IZZĪ (Wak'a-Nüwīs Süleimān 'Izzī Efendi), Turkish historiographer-royal and poet. He was the son of Khalīl Agha, commander of the Baltadji Guard, and of Khadīdja, daughter of Aḥmad III, and entered the Imperial Dīwān as secretary. In 1156 (1743) he was appointed the seventh holder of the office of historiographer-royal (*wak'a-nüwīs*) in succession to Ṣubḥī. In 1160 he became master of ceremonies (*teshrīfātī*). He died in Djumādā II 1166 (March/April 1753) and was buried beside Sheikh Murād-zāde, who had initiated him into the Naḳshbandī order. 'Izzī left a *Dīwān* and a chronicle covering the years 1157—1165 (1744—1752). It was printed in 1199 (1784) as a continuation of Ṣubḥī's history. 'Izzī's prose is more praised than his poetry. But his style is the most exuberant and to us the most unpleasing of all Ottoman historians. His fondness for chronograms is notorious. He enjoyed a considerable reputation as a calligrapher.

J.

JACOB. [See Ya'ḳūb.]

JAEN, situated at the foot on the north east of the Jabalcuz (= Djabal Kūz), west of the Guadalbullón, is the capital (1700 feet above sea level; 30,000 inhabitants) of the Spanish province of the same name (300,000 inhabitants), the area in which the Guadalquivir-Baetis takes its rise in Upper Andalusia; Andalusia is

the narrower use of the word (*al-Andalus*) comprises the whole basin of the Baetis and its tributaries and from west to east includes the five modern provinces of Huelva, Cádiz, Sevilla, Córdoba and Jaén, while Andalusia in the wider sense includes also the ancient kingdom of Granada, finally reconquered in 1492 by the Reyes Católicos, Ferdinand and Isabel, with the mountainous three modern provinces on the Mediterranean, Málaga, Granada and Almería, so that greater Andalusia corresponded to the ancient classical (Provincia Hispania) Baetica.

The name Jaén is derived from the Arabic Djayyān (in Spain pronounced Djeyyēn with imāla [q. v.]), the origin of which is unknown (old Spanish usually Gien), as Dozy's derivation from Gaëtanos (Edrīsī, *Descr. de l'Afrique et de l'Espagne*, transl., p. 248 *sq.*) seems impossible to us, especially as the ancient Ucia is rather to be sought on the Baetis itself near Andújar. Jaén is rather the ancient Aurgi or Flavium Aurgitanum, which still survives in Awrala (Yāḳūt, ed. Wüstenfeld, i. 400; ii. 180), if we read *Awriya* instead of *Awrala*. Awriyūlala is said by Yāḳūt to be the capital of the Kūrat Djayyān, also called simply al-Ḥādira, the capital. At the Arab conquest, the province of Jaén was colonized by immigrants from the Syrian Djund [q. v.] of Ḳinnasrīn. The most celebrated among its numerous scholars is the grammarian Ibn Mālik [q. v.].

The history of Jaén is naturally closely bound up with that of the adjacent capital of the western amirate and caliphate of Cordova, after the fall of which it formed for a time a small kingdom of slight importance until in 1246 it was conquered by the Ferdinand III the Saint, of Castile. In D. Miguel Lafuente Alcántara's *Historia de Granada*, based quite uncritically on Conde, the history of Jaén as well as that of Málaga and Almería is superficially discussed.

(C. F. SEYBOLD.)

JANINA (*Ioannina*, Ἰωάννινα, Turkish *Yānya*), a town in lower Albania, on the west bank of the lake of the same name, at the foot of Mount Mitsikeli, 1900 feet above the sea-level. It was formerly the capital of the vilāyet of the same name. The palace of the Pasha and two of its mosques are situated on a peninsula which runs out to the middle of the lake; it was defended by several forts. It replaced the ancient Dodona which had become the see of a bishopric, and the ruins of which are still to be seen 12 miles away; after the invasion of the Goths under Totila in 551, it took the name Joannina, derived from that of St. John (ὁ Ἅγιος Ἰωάννης) who had become the patron saint of the town. In the reign of Sulṭān Murād II, after the capture of Salonika, the deputies of the town offered to surrender Janina to him, if he allowed the inhabitants to enjoy their privileges and liberties. The Sulṭān accepted their conditions, received the keys of the town and handed over to the deputies a *ḥaṭṭ-i sherīf*, signed with his own hand (1st Ṣafar 835 = 9 Oct. 1431); it is said that the ceremony took place at a place near Salonika called Kilidi (key). Eighteen officers under the charge of Sinān Beg were ordered to take possession of the town and to build outside the walls, in accordance with the treaty, the houses they were to live in; in spite of the pledge, the commissioners had the church of St. Michael in the middle of the town demolished and the fortifications dismantled, taking advantage of a festival celebrated in the church of the Pantokrator, they attacked the crowd and carried off the daughters of the best families. Janina had no particular history till the time when 'Alī Pasha of Tepe-Dilen [see 'ALĪ TEPEDELENLI], desiring to escape from the yoke of the Sublime Porte, made it his capital. He brought prosperity and life to the town, promoting agriculture and commerce. The siege of 1236 (1820) ruined the town. Of the 16 churches which formerly existed only six are left. The mosque of Aṣlān Agha was built in 1712 on the site of the ancient basilica of St. John; many ancient columns are still found there. Other noteworthy buildings are the Bairaḳly Djāmi' (the "mosque of the standard"), built by Bāyazīd II, and that of Muṣṭafā Efendi. Besieged by the Greeks at the end of 1912 it capitulated on March 6, 1913, and was definitely ceded to Greece by the Turkish Empire (Treaty of Athens, Nov. 14, 1913).

Local industries include the manufacture of blankets called *velenze*, fine carpets, a serge called *shayak*, slippers called *yāniya bashmaḳy*, mirrors, gold and silver thread, and garments embroidered with gold for the use of the Albanians. The population was given as 16,230 in 1874 by L. Moreau, French vice-consul in *Bull. de la Société de Géogr.*, 6th Ser., xii. (1876), 543 *sqq.* cf. *Petermann, Mitt.*, suppl. Vol. xxii. 42 *sq.* and *supra* i. 451ª).

The former province of Janina comprised the sandjaḳ of Yāniya, of Ergeri (Argyrokastro), of Prevesa and of Berat, and also, before the cession of Thessaly to Greece, that of Tirḥāla (Trikkala).

(CL. HUART.)

JANISSARIES (Turkish *yeñi-čeri* [?], "new troops"), the name given to the regular infantry created by the Ottoman Turks in the xivth century, which became their principal force and rendered possible the vast conquests made in this and the following centuries. Their organisation goes back to Sulṭān Orkhan (726 = 1326), son and successor of 'Othmān, his brother and prime minister 'Alā' al-Dīn, and Ḳara Khalīl Čandereli [see ČENDERELI], brother-in-law of Shaikh Edebali. Before this time the chief Ottoman troops were, as in the Persian armies, bodies of horsemen called *akindji* (light cavalry); they were supported by infantry called in Persian *piyāde* and in Turkish *yaya* (foot-soldiers) who, although organised in companies of ten, a hundred, and a thousand men were in reality mere levies without any

great cohesion. It is Kara-Čendereli's merit that he created regular regiments of infantry at an age when mediaeval Europe was still at the stage of armed bands, before the organisation of the companies of archers in England, and a century before the first standing armies in France under Charles VII. It was very probably the contact with the legions of the Byzantines, although far sunk from their former glory, that gave the Turks the idea of supporting the Turkoman cavalry with well-trained infantry. But recruiting for the latter was carried out on entirely different lines, of which, moreover, the Janissaries are the only example in history.

In the article DEWSHIRME [q. v.] it has been explained how the Ottoman government used to levy from Christian peoples conquered by them a tribute of children, who were converted to Islām and educated in special schools and continued to be regarded as slaves of the sovereign (*ḳul*; the children of Janissaries married to native women in the Barbary regencies and their descendants are called *ḳul oghlu* "sons of slaves" [cf. i. 260ᵇ, 271ᵃ]). An institution of this kind was contrary to Muslim law which does not allow a sovereign to force the *dhimmī* [v. DHIMMA] to give their children into slavery; the Turks who were in the service of the ʿAbbāsid Caliphs came from captures made on enemy territory (*dār ḥarb*) and not from conquered territory (*dār islām*); it was only possible to form the Janissaries by an act of the ruler (*ʿurf*), in disregard of canon law (*sharīʿat*).

From the first the new troops were under the patronage of the dervish Ḥādjdjī Bektāsh and regarded as affiliated to the religious order which he had founded (cf. BEKTĀSH and BEKTĀSHĪS); as headgear they were given a bonnet of white felt, to which there was attached behind a piece of cloth in memory of the benediction, during which the saint had left his sleeve hanging on the back of his neck. This bonnet had a wooden spoon as a badge. The names of the officers were taken from various departments of the kitchen: *čorbadji-bashi* (chief soup-maker), *ashdji-bashi* (chief cook), as we shall see later. The most sacred object in the regiment was the great cauldron of bronze (*ḳazan*) around which they assembled not only at meals but also to take counsel. Upsetting the cauldron was a sign of revolt, which became more frequent in course of time when, from the reign of Sulṭān Muḥammad IV (1051—99 = 1641—87), the ancient practice of *dewshirme* fell into disuse.

The corps of Janissaries was called *odjaḳ*, "hearth"; it was divided into several tactical units called *orta*, "regiment", fixed in number and of varying strength (according to the period, 100, 500 and up to 3000 men); these *orta* were lodged in barracks called *oda* "rooms" (East Turk. *otaḳ*). In the field the regiments encamped under huge round tents on which were embroidered their distinctive emblems. Numbering 165 at first, the *orta* were increased in number to 196, not including 50 *orta* formed by the ʿAdjemi-oghlan [q. v.] and divided into three classes: *djemāʿat*, "reunion, assembly" comprising 101 *orta*; 2. *bölük*, "division", comprising 61 *orta*; 3. *segbān*, "huntsmen, hound-keepers", popularly called *sekbān*, to the number of 34 *orta*.

This corps was commanded by a general with the title *yeni-čeri-aghasi*, "*agha* [q. v.] of the Janissaries", who had a special residence in the capital and offices where the business of the corps was conducted. The Sulṭān was not obliged to choose him from among the officers of the *odjaḳ*. He was also in control of the police and of the maintenance of order in the capital; he was always followed by aides-de-camp carrying the *falaḳa* (see FALAKA). In war this general was preceded by a white standard surmounted by a horse-tail (*ṭugh*) and followed by footmen (*čoḳadār*) having the tails of their robes tucked up and fastened in their girdles. — The *segbān-bashi* was originally, as his name indicates, the chief of the *segbān*, but as, in time, the *orta* of the *segbān* were placed under the direct command of the *agha*, this post lost some of its importance; however when the *agha* set out for war at the head of the *odjaḳ*, the *segbān-bashi* acted as his deputy in the capital with the title of *ḳāʾim-maḳām*. The *ḳul-kiaya*, "superintendent of the slaves", commanding the *bölük*, was also adjutant to the *agha*; in war he was chief of staff of the corps; he enjoyed great influence, being chosen for the post by the Janissaries themselves and having the right, after reporting the matter to the agha, to appoint subalterns of a rank lower than that of the *čorbadji*. The other general officers of the corps were in order of precedence, the *zaghardji-bashi*, "chief of the bloodhound-keepers", commanding the 64th *orta*; the *muḥḍir-agha*, "chief of the ushers", who represented the interests of the corps with the Grand Vizier; the senior and junior *khāṣṣeki*, "charged with special duties", who were sent into the provinces to settle questions concerning the *odjaḳ* there; the *bash-čawush*, chief of the sergeants", commanding the 5th *orta*, the crier of of the council, who carried out its decisions and enrolled the recruits; the *kiaya-yeri*, "the lieutenant of the intendant", representing the *ḳul-kiaya* with the *agha*, who transmitted the latter's orders to the provinces; the *kiātib*, "secretary", who had to keep the registers called *kütük*, "tree-trunk".

The officers of each *orta* were 1. the *čorbadji*, colonel of the regiment, an expression which has survived in vulgar Turkish with the meaning "notable of a village"; 2. the *oda-bashi*, "chief of the barrack-room", adjutant to the preceding, who kept order on parade and saw that the rules were obeyed; 3. the *wekīl-kharčdji*, "controller of expenditure", who looked after the rations; 4. the *bayraḳdār*, "standard-bearer"; 5. the *bash-eski*, "chief of the veterans", the oldest soldier in the *orta*, who enjoyed great consideration on account of this title; as he was in command of the *ḳarawul*, "guards", he was also called *bash-ḳaraḳullukdji*; 6. the *ashdji-bashi*, "chief cook", the quarter-master of the regiment, having under his command the *yamaḳ*, "assistants", who was also head of the guardroom and of the prison of the regiment; his sign of office was a large knife; 7. the *saḳḳā-bashi*, "chief water-carrier".

The offensive and defensive weapons of the Janissaries varied at different epochs; we shall give here a few indications of their nature taken from Djewād, from a stock-taking made in the depot for old arms (Museum of St. Irene) in Constantinople: sling, bow and arrows (employed alongside of firearms until 935 (1528), according to Solaḳ-zāde, *Taʾrīkh*, p. 396, 429, 510, but kept as a sport down to our own times in the clubs of the archers called *ḳemān-kesh*, at the old exercise ground at the Oḳ-Meidān marble pillars mark the

thāmer of the Sulṭān Maḥmūd II's shot]; claw-footed and screw-jack and winding arbalests (*kem-ān*), javelin (*djerīd*), matchlock, flint-lock, blunderbuss (cf. Montecuccoli, *Memorie*, bk. II), pistol, bayonet (introduced in 1151 = 1738, then dropped and taken up again in 1168 = 1755), maces (*gürz*, *shishper*, *bozdoghān*), whips, flails, axes, scythes, halberds, bills, straight swords, for one or two hands, sabres (*kylyč*, *pāla*, *yataghān*), daggers (*ḥanǧer*), lances, bucklers, coats-of-mail covered in places with metal plates, helmets of copper or steel (the peak in imitation of the shape of a *fes*, terminating in a sharp point).

Each *orta* had an emblem which was placed upon its flags as well as upon the doors of the barracks; the Janissaries also had a habit of tattooing it on their arms and legs. Promotions in rank were always made by seniority. The Janissaries were only punished by their own officers; the punishments were imprisonment, the bastinado and death; in the last case the execution took place secretly at night at Rumili-ḥiṣār and the body was thrown into the Bosphorus with a cannon ball at its feet; a cannon shot however announced the execution of the sentence. Soldiers who became old and infirm or disabled, were retired with a pension; they were called *oturaḳ*.

The admission of foreign elements, outside of the recruits from the ranks of the *ʿadjemī-oghlān* [q. v.], gradually caused the corps of Janissaries to lose its value; the origin of these abuses dates back to the Sulṭān Murād III, who in 990 (1582) forced the *aghā*, in spite of the regulations and in spite of the resignation of the agha Ferhād, to receive into their ranks acrobats and wrestlers who had amused the people at the festivals on the circumcision of the prince who was later to become Sulṭān Muḥammad III. Since then individuals of every kind, to gain the privileges of the corps succeeded in gaining admission to it by patronage or purchase. In 1153 (1740) the authority to deal in salaried offices (*ʿulūfe*) which anyone could buy or sell, completed the ruin of the Janissaries as a military force. Those who were really soldiers no longer drew their pay but lived by exactions; soon hardly a dozen were found in every body of police to keep order in the streets and take their pay from the passers by.

Mutinies were frequent under the pretext of claiming an accession gift (*bakhshīsh*) which the Sulṭān used to distribute to the troops on his enthronement, since the abortive attempt, energetically suppressed, which the Janissaries made against Sulṭān Muḥammad II, on the occasion of his second reign (855 = 1451). From the time of the assassination of Sulṭān ʿOthmān II (1031 = 1622) the Janissaries played a part in politics, terrorised sovereigns, made and unmade grand viziers. They served as the tools of the factious, who remained in the background, escaping responsibility. The only exception was the glorious reign of Murād IV (1032—49 = 1623—40) who restored their discipline. The unfortunate wars against Russia at the end of the xviii[th] century persuaded the authorities that they ought to replace this useless and degenerate institution, incapable of reforming itself and ready to impede all progress, by new military formations. Sulṭān Selīm III, acting on the decisions of a grand council, decided to form a regular army on the estate of Levend-Čiftlik, lying on the heights of Orta-köi and Arnaut-köi (Bosphorus, on the European side) under the name of *niẓām-i djedīd* (new organisation). This attempt at reform, unpopular and opposed by the Janissaries, who did not wish to submit to military drill, led to the rebellion of Kabakči and the imprisonment of Selīm III in the Serāi, where he was not long in being assassinated. Bairaḳdār Pasha in vain gave the name *segbān* to the new militia, he had resolved to form, for it did not survive its creator.

Sulṭān Maḥmūd II finding himself pressed by the Russians, Egyptians and revolted Greeks, resolved to take up his brother's plans again; he created a body of regular soldiers who were called *eshkendji* "active soldiers", reviving an old designation given to the Janissaries when on active service; but the announcement of the beginning of regular drill provoked a mutiny (9[th] Dhu 'l-Ḳaʿda, 1241 = 10[th] June 1826) on the Et-Meidān (the meat-square) in the centre of the barracks. The Sulṭān at once went in a caique to the Serāi, consulted the ʿulamā, brought out the standard of the Prophet and summoned the Muslim population, victims of the exactions of the Janissaries, to come and fight them. The gunners and marines of the navy, formed one column; the bombardiers and sappers formed a second and marched on the Et-Meidān. The great gate was barricaded but soon fell before the canon; the barracks were set on fire and the rebels overwhelmed. A great assembly, whose decision was ratified by an imperial firman, pronounced the complete suppression of the Janissaries. Since then the Ottoman empire has been able to create a regular army modelled on those of Europe.

JAPHET. [See Yāfith.]

JAVA, the most important island in the Malay Archipelago, 2390 geographical square miles in area, in 5° south. Lat. is oblong in form, as it lies with Sumatra and the Little Sunda Islands on the southern Sunda fold mountains [see Indies (Dutch)]. In contrast to the western (Sumatra) and the eastern (Timor) end, the oldest rocks on the island of Java are entirely covered by tertiary and later volcanic products and coral limestones. The latter show that the island was at one time for the most part sunk below the sea-level and was afterwards raised at least 4000 feet; the former come from the 109 volcanoes of the island of which 13 are still ac-

tive, and cause by their weathering the great fertility of the plains and of the slopes of the volcanoes. The two groups of rock are fairly equally distributed in the mountains of the island. Flat country is found almost only along the north coast as the swell and the depth of the Indian Ocean prevents its formation in the south. The rivers are very numerous, almost all flow north and are of no great length. They are therefore of no importance for navigation except the largest, such as the Solo or Bengawan and the Brantas in Eastern Java. But they give the water to irrigate the ricefields and are therefore of economic importance.

The oblong shape, the fertility and the excellent climate of the island have all contributed much to its great economic development. As early as the beginning of the xixth century a road was made along the north coast for military purposes by Governor-General Daendels. Since then there has developed the system of roads between the chief towns of the interior, which has been supplemented in the last quarter of last century by railways. At the end of 1917, the state railways in the west amounted in length to 1240 kilometres, in the east to 989, and in Central Java there is a privately owned line 262 kilometres long. The tramlines of the whole island measure 2135 km. (1 km. to each 58.4 sq. km. and to 7350 inhabitants). On the north coast there are harbours at Tandjong Priok near Batavia and at Surabaya and in the south at Tjilatjap. Other trading centres like Cheribon and Samarang in the north and Patjitan in the south have only natural roadsteads.

The island of Java enjoys a very favourable tropical climate without excessive heat or drought. The average temperature of the coast towns is 26°—27° C., the daily and annual variation does not exceed 5° C. The monsoon climate of the Dutch Indies [q. v.] prevails here only in a modified form; as it becomes narrower towards the west, Western Java enjoys a more regular rainfall than Eastern Java, where during our summer months little rain falls in the plains. The annual rainfall amounts in low-lying districts like Batavia to at least 80 inches and rises to 178 inches at a height of 875 feet at Buitenzorg, while in isolated estates in the northern mountains of Central Java up to 360 inches is recorded. Its climate and fertility give Java a luxuriant vegetation which in the west displays the character of the tropical rain forests and towards the east with trees like *Tectona grandis* (teak) and, in the cool zone, with pines like *Casuarina*, approximates to the monsoon forests. In consequence of the dense population and the European settlements these forests have been almost entirely uprooted except in the southwest and east, and therefore great floods occur in the rainy season. The high slopes of the mountains are well fitted for intensive agriculture, of which the tropical zone (in West Java up to 2100 feet and 27°—23° C. temp.) bears plants like rice, sugar-cane, tobacco, coffee, indigo, rubber, sweet potatoes, palms, screw-pines and mangrove forests, the subtropical (up to 5000 feet and 23°—18° C.) plants like tea, coffee and cinchona, European potatoes and vegetables, the cool (up to 8200 feet and 18°—15° C.) coffee, oaks and other trees of temperate climates. Above 8200 feet, mosses and lichens are found. The fauna of Java belongs to the Asiatic zone of India [v. INDIA]. Among the larger kinds are apes, tigers, panthers, rhinoceros, wild cattle, deer and wild boar.

The earliest mention of the name Java is found in a passage in the *Rāmāyaṇa* which Kern dates about 150. There Yavadvipa appears as the island of gold. About the same time Ptolemy (vii. 2, 29) mentions the island of Iabadiu as very fertile and yielding much gold. He interprets the name as barley-island, which is literally correct, but as barley does not grow on Java, the equally possible interpretation millet island may be more appropriate. How far these names agree with the modern geographical denotation is not clear. Java and Sumatra or a part of it are apparently regarded as a whole. (Cf. H. Kern, *Java en het Goudeiland volgens de oudste berichten*, and *De naamsoorsprong van Java*, in *Verspreide Geschriften*, v. [The Hague 1916], 303—21.) In the old Javanese inscriptions of King Er-Langga of the 1031 the name is Yawa and in the Kawi poem *Nagarakṛtāgama* (1365) Java alternates with Yava as the name of the island.

The oldest Arabic source in which we find the name Djāwa seems to be Yāḳūt's (d. 626 = 1228) *Mu'djam*. But here as in some other sources it is not quite clear, what is to be understood by it, as the mention of an article of export like camphor points to Sumatra. From the time of Ibn Sa'īd (viith = xiiith century) Djāwa is usual as a name for Sumatra (Rashīd al-Dīn, Abu 'l-Fidā', Ibn Baṭṭūṭa), but in 'Alī Ra'īs (1554) we find Djāwa for Java. But so early a writer as Ibn Khordādhbeh (272 = 885/6) gives Djāba as the name for the island of Java (ed. de Goeje, trans. p. 46) and it is found in several later works (Ibn Wāṣif Shāh, al-Idrīsī, al-Ḳazwīnī, Ibn al-Wardī, Ibn Khaldūn). The name Java is also concealed in the name Zābadj, which most probably arose out of Djāwaga (Javaga) and means Javanese (Malay) (see H. Kern *Verspr. Geschriften*, iii. (The Hague 1915), 283 sq., and *Iabadiou* in *Bijdragen tot de Taal-, Land- en Volkenkunde van Nederl.-Indië*, 7th Ser. iv [1905], 365 sq., cf. thereon C. Snouck Hurgronje, *Een mislukt Arabisch prinsje*, in *Tijdschr. voor Ind. Taal-, Land- en Volkenkunde*, xliii [1900], 85 sqq.). Al-Zābadj however refers sometimes to Central and South Sumatra and sometimes to Java and occasionally comprises the whole archipelago. Cf. on the above: *Relations de Voyages et Textes géogr. arabes, persans et turcs relatifs à l'Extrême-Orient du VIIIe au XVIIIe siècles*, trans. by G. Ferrand, i., ii., Paris 1913—14; G. P. Rouffaer, Article *Tochten (Oudste Ontdekkings-)* in *Encycl. van Nederl.-Indië*, 1st ed., iv. 363 sqq.). See also the article DJĀWA.

The trading journeys made by the Hindus along the coast, in dependence on the monsoon, to the Malay archipelago on the way to the Spice Islands, touched at this island also, which soon came to bear their most important colonies, presumably because of its fertility and the shelter offered by its north coast. The great accessibility of the interior enabled the Hindu peoples to settle here also, and thus their power and culture expanded quite early over this Malay island. A Chinese source mentions the presence of Hindus on the island of Java in the year 132 A. D. (cf. G. Ferrand, *Le K'ouen-Louen* etc., *Journ. Asiatique*, 11th Ser., xiii. 155 sq.). At a later period the Chinese Buddhist Monk Fa Hien says that in 414 A. D. he found many Hindus but few Buddhists on

this island, which he calls Yavadi. This Hindu period comes down to Portuguese times but offers great difficulty to the historian as literary and oral traditions have been distorted almost to unintelligibility by fantastic additions. The best data are afforded by the numerous ruins of temples, statues, copper plates (often charters of endowment) and bronze objects with inscriptions and dates, which are found principally in central and eastern Java. They are even sufficient to enable us to sketch the changing political conditions in this Hindu period. Only a few engraved stones are older than 700 A. D., and some copper-plates from Central and Eastern Java, of which the oldest are one of the year 732 from Central Java and another of 760 from Eastern Java.

Numerous inscriptions dated later than 760 exist and are evidence of a flourishing state of Hindu civilisation in Central Java which lasted to the year 860. Eastern Java then came into prominence. It has been established that the celebrated kings Sindok, Airlangga and Djaya-Bhaya ruled here in the xth, xith and xiith centuries. In 1222 the kingdom of Singasari in Pasuruan gained the ascendancy over that of Daha in Kediri. In 1294 arose the kingdom of Mādjapahit in Surabaya, which afterwards became a great power in the Archipelago. The latter existed down to the beginning of the xvith century.

The temple ruins by their situation and architecture considerably increase the importance of these facts. They may be divided into two groups, an older in Central Java and a younger in East Java. Both are rich in marvellous buildings, which however are executed in different styles. In Central Java they are built of tufa and are closely related to Hindu architecture in British India; in Eastern Java, on the other hand, they are mainly of bricks, and here a more independent Javanese style has developed, which shows Chinese influence. Of the latter we only know that the Emperor Khubilai of China in 1293 sent a military expedition to Eastern Java, which was only partially successful. We have only a few small antiquities from Western Java.

In Central Java are the ruins of the Buddhist temples of Bārā Budur, Tjandi Mĕndut, Tjandi Kalasan, Tjandi Sari, Tjandi Sewu and the Śivaite Tjandi Prambanan. In Eastern Java the most important are Tjandi Panataran, Tjandi Singhasari and Tjandi Tumpang or Djago.

Ruins like those of Bārā Budur are among the most beautiful Buddhist ones. From the mixed character of their very numerous statues of gods and religious and profane reliefs, it is clear that, as still the case on the island of Bali [q. v.], Brahmanism and Buddhism on Java were closely connected and existed side by side. The Buddhism of the Javanese at that time was of the Mahāyāna school.

In addition to these remains in stone, numerous objects in bronze, gold and silver, such as statues of deities, temple bells, plates etc., are found buried in the ground. Only few remains of secular buildings, even of royal palaces, have been discovered; probably these were of wood and other perishable material. (Cf. on archaeology and epigraphy, the works of Cohen Stuart, H. Kern, J. Brandes and N. J. Krom).

The above remarks show us how highly developed must have been the civilisation and how flourishing the prosperity of the island to enable so many costly works to be erected. In view of the lengthy period of their existence in Java it is not surprising that these Hindu kingdoms exercised a transforming influence on the Javanese culture. We shall probably not be wrong if we assume that the Javanese at the beginning of the Hindu period were probably in about the same stage of culture as the modern Dayaks or Toradja. It seems however certain that even then they knew how to grow rice on irrigated fields, as the technical terms used in this connection are not of Sanskrit but of Indonesian origin. But it must have been considerably advanced by the Hindus.

The formation of despotic Hindu kingdoms among Indonesian tribes organised on a patriarchal system was also of economic importance, as on the one hand it abolished the great insecurity and isolation of these tribes and secondly brought the masses of the people under the rule of their kings and nobles. The latter brought about the development of native arts and crafts whose ornamental motifs are still Hinduistic. That architecture and sculpture were greatly stimulated is shown by their products, temples and statues, and their disappearance after the introduction of Islām. Foreign trade arose through communications with the outer world in the West, and Java became the centre of the wholesale trade in spices, precious stones, timbers, cotton, etc. The Javanese still use an Indian alphabet and the vocabulary of their language contains a large number of Hindu words and expressions. The introduction of writing was of the greatest importance for the advancement of civilisation and on it is based the literary development of the modern Javanese.

When the Brahman sects finally attained preponderance in the island of Java, they gradually introduced the caste system in the form in which it is still found on the island of Bali. With the introduction of Islām this distinction of the classes disappeared. The gulf that exists between the common people and the nobility and official classes with the princes at their head and the submissiveness of the former must be regarded as consequences of the caste system. They are foreign to the aboriginal Indonesians.

Islām spread to Java from Malacca, into which it had been introduced by merchants from India (such as Persians and Gujarathi), and was predominant in the beginning of the xvith century. Besides the Indians, after the rise of Malacca, Malay traders also by their residence in Java created an opening for Islām. Around the families founded by such merchants at the ports, communities of native believers gradually grew up, which finally developed into small states. Influential traders no doubt succeeded in entering into close relations with princes of the seaports through marriage, whereby Islām could gain influence in the upper circles. The relations of the Mādjapahit kingdom to its vassal states also gave occasion for the advance of Islām; it is often reported that princes of Mādjapahit married Muslim princesses of conquered or allied states. At the same time commerce between Java and the states dependent on the island (Pasai) and an important commercial town like Malacca contributed in no small degree to the spread of Islām. In the last named place there was about 1500 large settlements of Javanese who were for the most part Muslims, according to Portuguese accounts. The same in

doubt influenced their mother country in religious matters. Influences like the above were of all the more effect in a period when there was no strong central authority in the kingdom of Mādjāpahit.

Following the trade route Islām first gained a footing on the coast of Eastern Java. There, in the xivth century, Tuban was the most important harbour of Mādjāpahit and in the following century the most important commercial town next to Grēsik. The oldest relic of the Muslim settlement in Java is the tomb of a certain Fāṭima bint Maimūn, d. 475 or 495 (1082/3 or 1101/2), in Lēran. The tomb of Mālik Ibrāhīm in Grēsik dates from 822 (1419); according to native tradition, he was a merchant. According to a statement of a Chinese Muslim, there were in 1416 not yet any native Muhammadans, but a settlement of Muslims who had come from the West and a group of Chinese, some of whom were converts to Islām. In view of the position of Islām in the Moluccas about 1450, it is very probable that about the same time the Muslims "were beginning to assert their influence in Java also in the coast region from Djapara(?) to Surabaya, Tuban and Grēsik particularly". In the course of the next fifty years the communities of native Muslims with the support of immigrant Muhammadans developed into small states on the coast, which soon endeavoured to assume authority over Eastern Java. (On the above cf. B. J. O. Schrieke, *Het Boek van Bonang*, Leiden dissertation, Utrecht 1916, p. 1—30 and the literature there quoted; H. Kraemer, *Een Javaansche Primbon uit de Zestiende Eeuw*, Leiden diss. 1921).

Legend ascribes the conversion of Java to Islām to the joint activity of eight or nine *walīs*. The names of these saints who are called by the honorific title *sunan* (*susuhunan*) and are usually named after their place of burial or activity, are as follows: (1) The already mentioned Mālik Ibrāhīm (also called Mawlānā Maghrabī) who died in 1419. (2) Sunan Ngampel (Raden Raḥmat) who about 1450 married a princess of the family ruling at Tuban and died about 1470. His tomb is in Ngampel (Surabaya). (3) Sunan Bonang, son of Sunan Ngampel's marriage with the Tuban princess and born probably about 1465. His activity in Tuban, probably as head of the Muslim community there, must fall between 1475 and 1500. He perhaps lived to about 1525. His tomb is shown in two different places (cf. Schrieke, *op. cit.*, p. 39 ff.). (4) Sunan Giri (Raden Paku), who is considered the ancestor of the so-called priest-kings of Giri and whose tomb is on the hill of Giri near Grēsik. (5) Sunan Gunung Djati, who left his native place Pasei in 1521 and after his studies in Mecca came to Djapara and probably also to Dēmak; he had great success with his religious teaching and he married a sister of the king of Dēmak. He then went to Bantĕn, where with the help of his brother-in-law he succeeded in gaining power. In 1527 he took Sunda Kalapa from the king of Padjadjaran, at whose expense he gradually extended his power. He finally settled in Tjirĕbon where he died about 1570; his tomb is to be seen near by on the hill called Gunung Djati. (See Hoesein Djajadiningrat, *Critische Beschouwing van de Sadjarah Banten*, Leiden Diss. 1913, Haarlem 1913, Index s. v. Goenoeng Djati). 6. Sunan Kudus, buried in Kudus (Res. Sĕmarang). 7. Sunan Muria, called after his tomb in the Muria Hills (Djapara). 8. Sunan Drādjat, a second son of Sunan Ngampel; his tomb is in the desa Dradjat on the road from Tuban to Sedayu. 9. Sunan Kali Djaga, whose tomb is in Kadilangu (Sĕmarang) (on him cf. Hoesein Djajadiningrat, *op. cit.*, Index). — These nine, it should be noted, are also given with partly varying names (cf. the article *Heiligen* in *Encyclop. van Nederlandsch-Indië*², ii., and the literature quoted there).

About 1520 a coalition of Muslim kings of the coast states under the leadership of the king of Dēmak, Raden Patah, destroyed the Hindu Javanese kingdom of Mādjāpahit. An attempt made about 1546 to conquer Pasuruan did not succeed. It appears certain also that the kingdom of Dēmak was overthrown by that of Padjang (c. 1568) and the latter again by that of Mataram (c. 1586), out of which the present "Vorstenlanden" of Central Java have arisen.

For the development of political and religious conditions among the Javanese of the xviith and xviiith centuries Mataram has undoubtedly been the most important sultanate. It was brought to its greatest prosperity by Tjākrā Kusumā (1618—1646), also called Sulṭān Agung after 1641, and extended its rule over almost the whole of Java. During his reign there existed in the West the independent sultanate (since 1631) of Bantĕn and the sultanate of Tjirĕbon dependent on him. The kings of Giri-Grēsik at this time had great religious prestige.

By Agung's conquest of the Northern ports of Lasĕm (1616), Tuban (1618), Grēsik (1622), Surabaya (1625), and Madura (1627), and by their destruction, the foreign commerce and the shipping of Java received a severe blow, which was not repaired by the foundation of the state harbour of Djapara.

The European competition of the Dutch, English, Danes etc. was thereby much encouraged. By the foundation of the town of Batavia in 1619 on the site of the former Sunda Kalapa or Djakatra the former obtained a commercial and political centre in the sphere of the despot of Mataram, who had as little success in driving them out by a siege in 1628/1629, as had the Bantĕnese of the West.

The histories of the Javanese kingdoms of Mataram, Tjirĕbon and Bantĕn since that date show us classical examples of the destructive influence of the unbridled passions of their rulers and the latter's officials. Agung's kingdom suffered already from his many costly conquests, his successors and their relations only reigned to increase their revenues and gratify their lusts. Domestic conflicts in the royal house itself and several wars with enemies outside, incited thereby, weakened the kingdom more and more.

These circumstances had consequences which were of interest to the „Nederlandsche Generale Geoctroyeerde Oost-Indische Compagnie", founded for trading purposes only and managed from Holland, and were important for the development of modern Java. These and the endeavour to maintain a monopoly drove it to a policy of conquest, which became one of the main causes of its decline at the end of the xixth century. As early as Sulṭān Agung's death in 1646, the Company made a treaty of mutual support with his successor Amangkurat I. The latter in 1677 found himself forced

to call for the Company's help when pressed by the Madurese and Macassarese. He died a fugitive and his son Amangkurat II was only able to ascend the throne with the help of the Dutch Company. The kingdom was next shaken by two wars of succession (1704—1708 and 1746—1755). When the three claimants to the throne were all maintaining their position in the field during the latter of these wars, the Company found itself forced to divide the kingdom of Mataram between two of them in 1755. Thus arose the kingdom of the Susuhunans of Surakarta and of the Sulṭāns of Djokyakarta. In 1758 the third pretender had to be pacified, by granting him the semi-independent position of a prince Mangku Negārā. At that time the Dutch East India Company already possessed the North coast of the Mataram kingdom and the central part of the West down to the South coast. Up to the end of the xviii^th^ century the influence of this trading company on native culture remained relatively small, as their officials only dealt with the natives as far as was necessary for the compulsory deliveries of agricultural products by the kings and the monopoly of imports of clothes, opium, etc.

In the course of the xix^th^ century, when the kingdom of the Netherlands had assumed the suzerainty in the Indian Empire of the East Indian Company, the conditions of life among the Javanese population have altered very much. During English rule (1811—1816), the sultanates of Bantän and Tjirebon in the West were completely incorporated in the territory of the Indian government and considerable stretches in Central and East Java. The foundation of the independent kingdom of Paku Alam (1813) also broke the resistance of the Sulṭān of Djokya. When, after the rising of 1825—1830, the present residencies of Banyumas, Bagelen, Madiun and Kĕdiri were incorporated by the Dutch in their territories as a war indemnity, only 7% of the surface of the island remained to native princes. As they have since then been still further restricted in their powers, the situation of the masses of the people has been much improved. Before this can be judged, we must deal with the population. It consists of 33,000,000 natives, 318,700 Chinese, 72,700 Europeans, 20,370 Arabs and 3000 other foreigners; with a population of 254 to the square kilometre it is therefore one of the most thickly populated parts of the earth's surface. If we consider that in the first and second decade of the xix^th^ century, the Governor-Generals Daendels and Raffles estimated the native population at four and five millions and that this enormous increase has taken place without immigration, its explanation certainly appears desirable.

The foreign inhabitants of Java, if we except those only temporarily settled there, are for the most part half-breeds, sprung from intermarriages with native women. The Japanese are included with the Europeans. The Chinese, whose families in many cases have been living for centuries in Java, come from the South Chinese province of Kwan-Tung, the Arabs from South Arabia (Ḥaḍramawt) and the other foreigners from British India. With a very few exceptions, these all came with the object of earning a living by commerce or industry, and they often succeed very well.

The natives with few exceptions (Baduy in the West, the majority of the Tĕnggĕrese in the East and the Christian Javanese) are all Muslims. Their languages, customs and physique divide them into three groups: in the West the Sundanese, in the Centre the Javanese, in the East the Madurese. The differences are to be ascribed more to the influences of foreigners (Hindus) and surroundings, than to race. They all belong to the Malays of the Archipelago, but those in the West were less exposed to these influences than those in the East and Centre. The Sundanese therefore remained truer to the original type and more accessible to Islām. The Madurese on their relatively less fertile island have devoted themselves less to agriculture than to cattle-rearing and fishing and formerly to piracy, and thus became more energetic, vigorous and ruder than the Hinduised Javanese. In Western Java the latter only spread along the North and East coasts, while the Madurese are found in East Java in the residencies of Besuki, North Pasuruan and East Surabaya also. The native populations of the large towns like Batavia and Surabaya deserve special mention; in these commercial and administrative centres of the Dutch the native population arose out of traders, slaves, soldiers, political internees of the most varied origins in the course of the last three centuries. As the language formed here has become the *lingua franca* (Malay) of Europeans and natives for the whole archipelago, these conditions are of special importance.

The natives are an intelligent, circumspect, easily contented, agricultural people who cling firmly to their traditions. They are fond of festivals, games and the use of opium, which sometimes are lead to abuses. The long period of despotic rule has divided the people into two classes, the princes with the nobility and officials on one side and the bulk of the people on the other, and has caused a very complicated system of ceremonial to grow up, which has laid a firm hold on all their customs and also finds expression in their language. The subservience of the masses to their superiors is a further result of these political conditions. In keeping with their geographical situation the Javanese are more submissive than the Madurese and Sundanese. The awakening of Eastern Asia is now being felt even in Java.

The despot was possessor of the soil, granted it to the peasants in return for half the produce in kind and in addition levied taxes in labour and produce on his people regularly and irregularly. His relations and officials were granted lands, and in the "Vorstenlanden", where this system still prevails, these have since the beginning of the xix^th^ century been let more and more to European planters. Outside these principalities, the possession of land is private among the Madurese and Sundanese and partly communal among the Javanese. The most popular crop is rice, grown on inundated fields; other food-stuffs are sweet potatoes, beans, spices and fruits; for export tobacco, coco-nuts (copra), cotton and capok are grown. Of all these a number of varieties are known. The rearing of cattle and buffaloes is only subsidiary to agriculture. The horse is used for riding and as a beast of burden but is also eaten like the sheep and the goat. All these domestic animals except cattle were imported from Asia. Hunting as a means of livelihood is of very subordinate importance. The same applies to fishing in the rivers and in the sea. Many fish are reared in artificial ponds of fresh

water or on the seashore. The wholesale traffic of the island is in the hands of Europeans and Chinese, the retail is mainly carried on by Chinese and a few natives, and the huckstering in the markets is mainly in the hands of native women.

Javanese industries consist of handicrafts almost exclusively concerned with supplying local needs. Weaving and iron-smelting have decreased very much owing to the large imports of clothes, raw iron, and articles of iron. A few genuine Javanese arts like the making of krises (daggers), the manufacture of copper musical instruments and ornamental articles of copper, wood carving and batiking of cotton clothes are still practised. Only a few of their products such as brass gongs and batick clothes are exported. They bear witness to the abilities of the Javanese in these fields.

The language of the Javanese has developed out of the Old Javanese (Kawi) of the pre-Mādjāpahit period and the Middle Javanese current down to the new Kingdom of Mataram. At the courts of the Hinduistic princes the vernacular was frequently used for the adaptation of Indian and indigenous legends; when poets and men of letters of the Muhammadan kingdom of Mataram continued in this way, the contents of those literary products became modified, but the language remained Indonesian under these Hinduistic and Muhammadan influences. Both in vocabulary and subject matter, the very rich Javanese literature has adopted much from Hindus and Muhammadans. Javanese literature contains the modern Javanese recensions of the products of three periods. From the first came Kawi poems like the *Arjunawiwāha*, *Nāgarakṛtāgama*, *Bhāratayuddha* (an adaptation of the *Mahābhārata*) and *Rāmāyana* in addition to mythological poems like the *Manik Maya* on creation and mythology, and *Bandung* and *Adji Saka* which contain the mythical history of old Java. The versions of the *Mahābhārata* are prose works from this period. From the second period comes the *Pandji* cycle which celebrates the chivalrous, sentimental love of the Javanese prince Pandji for the princess Angrèni and his adventures. To the third period belongs the *Menak Hamzah* of Muhammadan Malay origin, which deals with a Muslim hero endowed with supernatural powers who only achieves his wonderful deeds through his belief in Allāh. The Javanese chronicles or *Babad*'s are in rhyme but are of no poetical value, and they are only of historical value when their writers are describing their own experiences. *Anbiya* contains the Javanese recension of the Muslim legends of prophets. The history of Moses is given in a prose work *Radja Pirangen*. In addition to the epic the Javanese have also didactic poetry (*Wulang Rèh*; also the beast fable with the dwarf deer, *kantjil*, as the main character). Poetry is principally cultivated at the Javanese courts, but a good deal is composed elsewhere also. The lack of Javanese prose works is striking. (Cf. also under INDIES (DUTCH), p. 493 *sqq.* and MALAY).

In the West of the island the language is Sunda and in the East Madura, both languages closely connected with Javanese and having a similar literature, which however in keeping with the less refined civilisation of the Madurese and Sundanese shows a simpler character as regards form and matter. On account of its general interest the language of the town of Batavia and the surrounding district deserves special mention.

The Islām of the native population possesses the same character as has already been described under INDIES (DUTCH) and indicated in its most important features for the island of Java. It is so important in the lives of the natives up to the highest classes of society that the prevailing political and economic conditions can only be understood if full account is taken of it. This Muhammadanism is grafted upon animism which often appears under Hinduistic forms.

From the economic point of view, agriculture, by far the most important industry, shows most significantly how powerfully the animistic mental attitude makes itself felt. As a result of lack of knowledge of the real conditions of growth, it causes and maintains the neglect of good tillage, of careful choice of plants, of care during growth and precautions at harvest time. Agriculture also labours under the burden of the many animistic sacrificial festivals and ceremonies, which are given a Muslim significance for the people, because a religious person prays for Allāh's blessing at them. The yield of all native crops is therefore much smaller than it would be under European management. It is the religious significance of agricultural customs to the natives that forms a great obstacle to their improvement under European guidance. The government has seriously attacked the question of the study and advance of it. It is similar with cattle-rearing; with the help of the ruling and other native chiefs, very satisfactory results have been obtained in Central Java in improving the breed of cattle and their care.

Politically Islām is only of importance so far as its teaching regarding infidel rulers makes it appear a subsidiary factor in all troubles which arise out of economic or political grounds. Further, the belief in the personal help of the Almighty and his saints, in amulets, in invulnerability etc. leads in local disturbances to the phenomenon so inexplicable to Europeans, that sometimes a very small number of people, often lead by a *guru*, vigorously resist the authorities.

The rule of the Dutch is to the advantage of the natives of the Archipelago in several respects, as has already been mentioned at the end of the article INDIES (DUTCH), and on p. 578a. As regards the island of Java, in the last fifty years, economic conditions have largely contributed to this result. The very dense population of the island could not possibly support itself on the yield of their fields and other sources. But in addition there have arisen the constantly increasing sources of revenue which the natives owe to the plantations of tropical products of the Europeans. What huge sums are involved may be gathered from the amounts paid out in wages and rent to the natives by the sugar industry, which moreover is the most highly developed one.

If we consider all these facts together with what has already been said under INDIES (DUTCH), the astounding increase of the population of Java in the last century will be understood. It could only have been attained however by the fact that marriages are general and early among the natives.

As regards administration, the islands of Java and Madura differ from the other islands (Buitenbezittingen); the civil officials are accordingly divided into two classes. There are 17 residencies in Java and

Madura and in districts under European residents and assistant-residents who have controllers under them. Alongside of these, the native officials with the regents at their head form the link with the people. The often peculiar organisation of the 32,000 native villages has been left untouched as far as possible.

The native princes occupy a special position. The four kingdoms arose out of that of Mataram, as was briefly outlined above. The residency of Solo or Surakarta contains the kingdom of the Susuhunan of Surakarta and in the South that of the Pangeran Adipati Aryā Mangku Negārā; the residency of Djokyakarta contains the kingdoms of Djokya or Djokyakarta and of Pangeran Aryā Paku Alam in the South-West.

Justice is administered with slight exceptions, in the native states as well as in Java and Madura, by jurists trained in Holland.

Public instruction in the present century is being continually extended by the government, missions and private persons. In the larger places, Dutch is often the language of instruction (at the end of 1917 in 5 secondary boys' schools and two secondary girls' schools and in 198 elementary schools with European teachers). The education of the natives was conducted in 130 schools in seven year courses with Dutch, and in 991 schools in four year courses. There were 4815 village schools with three year courses, 183 schools for Chinese and 30 for Arabs.

JEREMIAH, the prophet. His name is vocalised in Arabic IRMIYĀ, ARMIYĀ or URMIYĀ (see *Tādj al-ʿArūs*, x. 157) and these forms are occasionally given with *madd* also (*Irmiyāʾ*).

Wahb b. Munabbih gives an account of him which turns upon the main points of the Old Testament story of Jeremiah: his call to be a prophet, his mission to the king of Judah, his mission to the people and his reluctance, the announcement of a foreign tyrant who is to rule over Judah. Jeremiah then rends his garments and curses the day on which he was born; he would rather die than live to see this. God then gives him the promise that Jerusalem shall not be destroyed except at Jeremiah's own request.

Bukht Naṣṣar then attacks the city on account of the increasing sinfulness of the people. God sent an angel in the form of an ordinary Israelite to Jeremiah to find out his opinion on the fall of Jerusalem. He twice sent the angel away to enquire how the people were behaving. The latter returned with the worst reports and communicated them to Jeremiah who was sitting on the wall; the prophet called out: O Lord, if they are on the right path, let them live, but if they are on the path of evil, destroy them! Hardly had he spoken these words than God sent a thunderbolt (*ṣāʿiḳa*) from heaven which laid the altar and part of the city in ruins. In despair Jeremiah rent his garments, but God said: 'You yourself gave the word'. He then realised that his companion was an angel in disguise. He fled into the desert (Ṭabarī, i. 658 *sqq.*). — The second episode in the Muslim legend of Jeremiah refers to his meeting with Bukht Naṣṣar. The king found the prophet in prison in Jerusalem, where he had been interned on account of his prophesies of ill fortune. Bukht Naṣṣar at once released him and showed him honour. He thereafter remained in Jerusalem with the miserable remnants of the population. When the latter besought Jeremiah to implore God to accept their repentance, God said to the Prophet: 'Tell them only that they are to remain here'. They refused to do this and took Jeremiah with them into Egypt (Ṭabarī, i. 646 *sq.*). According to Yaʿḳūbī, Jeremiah had hidden the ark in a cave before Nebuchadnezzar's entry into the city. — The third episode runs as follows. When Jerusalem was destroyed and the army had retired, Jeremiah came back riding on an ass. In his hand he carried a bowl of grape-juice and a basket of figs. When he stopped at the ruins of Īliyā (Aelia), he became irresolute and said: "How can God call all this to life again?" God thereupon deprived him and his ass of life. After a hundred years had passed, God awakened him and said: "How long hast thou slept?" He replied: "A day". God then told him what had happened and brought his ass to life again before his eyes; the grape-juice and the figs had remained fresh. God then granted him long life; he appeared to men in the city and in the desert (Ṭabarī, i. 666).

Of the first two episodes one can say that they are a development of Biblical statements. The third however is based on an misunderstanding connected with Sūra ii. 261: .... "like him who passed by a city which had been laid in ruins; then he said: How could God revive this after its death? Then God caused him to die for a hundred years; He

then wakened him and said: "How long wast thou dead?" He said: "A day or so". He replied, "Nay, a hundred years; look on thy food and thy drink; they are not corrupted; and look on thine ass: we will make thee a sign unto men: And look on the bones, how we will join them together, then clothe them with flesh".

The commentaries on the Ḳur'ān identify this doubting man with various Old Testament figures, including Jeremiah. But we know that the story in Oriental legend was associated with 'Ebed Melek, who appears in the story of Jeremiah (Jeremiah, xxxix. 10 *sqq.*; cf. *The Paralipomena of Jeremiah the Prophet*, ed. Rendel Harris). The confusion of Jeremiah with 'Ebed Melek has apparently given rise to another one. 'Ebed Melek, according to the Jewish view, is one of the immortals who never saw death. In Muslim legend al-Khadir is one of the immortals. This is probably why Wahb b. Munabbih explains al-Khadir, "the green", as an epithet of the prophet Jeremiah. This also explains the emphasis laid on his retirement to the desert where, as in the towns, he sometimes meets men; for this is a statement which elsewhere refers to al-Khadir in contrast to Ilyās [q. v.] who is the patron saint on the sea.

K.

KA'ĀNĪ, ḤABĪB ALLĀH, a modern Persian poet, son of the versifier Mīrzā Muḥammad 'Alī Gulshan; born at Shīrāz, was court poet to Muḥammad Shāh, successor to Fatḥ 'Alī Shāh (1250—64 = 1834—48) and to Nāṣir al-Dīn Shāh. He was very precocious and attracted attention from the age of eight. His father died when he was eleven (*Perīshān*, Bombay, 1277, p. 19) and he had to go to Khorāsān to complete his studies. Prince Shudjā' al-Salṭana Ḥasan 'Alī Mīrzā, governor of Mashhad, took him under his protection. This was the beginning of his good fortune. In addition to the three classical Muslim languages, he learned French. He was addicted to opium but was not guilty of debauchery. He died at Ṭehrān in 1270 (1854). He left a collection of anecdotes in prose and verse entitled *Kitāb-i Perīshān*, "Book of Scattered Leaves", a parody of the *Gulistān* of Sa'dī (lithographed at the top of an edition of the *Dīwān*, Bombay 1277, and separately at Teherān in 1302), and a *Dīwān* containing his collected poems (lithographed at Bombay 1277, 1298, 1306 and at Teherān in 1277).

He is incontestably the greatest of the modern poets of Persia, and is perhaps the most witty of all Persian poets. His irony is deep and biting, unfortunately it is often coarse.

(CL. HUART.)

KAARTA, the region of the French Sudan between the upper waters of the Senegal and the Sahara. The boundaries of Kaarta are in the north the land of the Dowaish Moors and the Hōdh [q. v.], in the east Bakhunu, in the south Beledugu and Fuladugu, and in the west the Senegal from the western branch of the Kulu pool to the confluence with the Baule. It is a vast schistose plateau inclining towards the S. E. so that the majority of its rivers run towards the Senegal. The climate is that of the Sahelian zone: a very short rainy season followed by long periods of drought; the showers are not abundant. Surface water is rare; hence the settlements have clustered round wells which serve to irrigate gardens, planted with millet and vegetables. Although the country is steppelike in character, it is not yet unsuited to agriculture. Stretches of soil on the banks of the rivers and areas uncovered when the streams are low are especially fertile and yield two crops a year. The principal products are rice, maize, millet, earthnuts, cotton and indigo. Cattle and horse-rearing are fairly well developed. The population is not a dense one. Before the conquest of the country by the Tuculor, Faidherbe estimated the population at 300 000 and the area at 20 700 square miles. To-day it does not seem to exceed 5 to 6 inhabitants to the square mile. This very mixed population comprises Khassonké, Peuhl and Moors in addition to the Bambara [q. v.] and Soninke, who form the most important element. Islām is observed by the Moors and Peuhl, while the Bambara refuse to have anything to do with it. The principal subdivisions of Kaarta are: — Diafunu (Tambaraka) and Diombuko (Koniakari) on the right bank of the Senegal, the Giudiumé (Niogomera) to the north of Diafunu; Tomora (Diala) in the centre; Baghé and Kaarta-Biné to the north of Fuladugu; Diangbirné in the east; Kingui (Nioro) on the Moorish borders. Adjoining the French possessions in Senegal, Kaarta was traversed at the end of the xviiith century by Houghton and Mungo Park (1795) and visited in the xixth by Duranton (1828), Raffenel (1846),

Mage and Quintin (1863), and Lenz (1880).

History. Kaarta after being included in the empire of Ghāna [q. v.] and in the Mandingo empire broke up into several small kingdoms on the dissolution of the empire of Malli, which at the end of the xviith century were conquered by the Bambara Massassi who came from Segu under a chief named Sunsa. The latter conquered Fuladugu, Kaarta, and Bambuk and took up his residence in a place called Suntanian. His successors had to wage continual war against the Bambara of Segu. Conquered at first, they regained the advantage under the direction of Sië Banmana (1709—1760) who collected the remnants of the Massassi and reconstituted their empire with Guemu as capital. He annexed Dianghirté, Diara, Diomboko and Bambuk. Towards the end of the xviiith century, the Massassi were again overwhelmed by the people of Segu, but their chief Dassé reconstituted his army by means of slaves taken from the merchants. His successor Musa Kurabo recaptured the lost territories and added Koniakari to them. The rulers who reigned after him, suppressed the rebellions which broke out in various provinces. The last of them, Kandia (1844—54), took Nioro as his capital and after seven years of war conquered the Diawara and forced them to migrate to the Sahara. Kaarta was then a powerful state measuring 190 miles from E. to W. and 110 from N. to S. (Raffenel). Power was exercised by a chief belonging to the family of Kulubari. He bore the title of *fama* and his dignity was hereditary in the collateral line. His authority was absolute but in matters of importance he summoned a council formed of the Kulubari, representatives of certain tribes, and the „chiefs of the captives".

The Kaarta kingdom fell before the blows of the Tucalor. Kandia having put to death an envoy from al-Ḥādjdj 'Omar, Kaarta was invaded by the bands of this marabout. The *fama*'s army which took the field against the enemy was routed and the *fama* himself obliged to submit. The town of Nioro was occupied by the Tucalor and the members of the royal family massacred. Kandia, spared at first, was not long in suffering the same fate. Kaarta henceforth formed a province in the Tucalor kingdom and was administered by a viceroy until 1894. At this date the Sulṭān of Segu, Aḥmadu, disturbed by the power of his brother Montaga to whom he had confided the government of Kaarta, decided to dispossess him of it. Montaga besieged in Nioro blew himself up rather than capitulate. Aḥmadu then installed himself at Nioro and lived there till the French undertook the conquest of the Tucalor empire. In 1890, the troops of Colonel Galliéni entered Kaarta and seized Koniakari. On Jan. 1, 1891, they took Nioro and completed the subjection of the country. Aḥmadu had to take refuge in Masina. Kaarta was incorporated in the French possessions and divided into the administrative districts of Nioro, Kita and Kayes.

(G. Yver.)

KA'B AL-AḤBĀR, Abū Isḥāḳ Ka'b b. Māti' b. Haisū', the oldest authority for the Jewish-Muslim traditions among the Arabs, a Jew of Yemen who became a convert to Islām in the Caliphate of Abū Bakr or 'Omar and was called Ka'b al-Aḥbār or Ka'b al-Ḥabr, "the rabbi Ka'b", on account of his wealth of theological, particularly Biblical, knowledge. Lidzbarski (*De propheticis, quae dicuntur, legendis arabicis*, Berlin diss., Leipzig 1893, p. 34 *sq.*) supposes that his name was originally Hebrew, Aḳībā or Ya'ḳōb, and was afterwards changed into the Arabic name Ka'b. *Ḥabr* or *ḥibr* (plur. *aḥbār*) is taken from the Hebrew *ḥābēr*, a title of scholarship among the Babylonian Jews, lower than that of *rabbi*. Al-Khwārizmī also describes it as a Jewish title equivalent to the Arabic *'ālim* (*Mafātīḥ al-'Ulūm*, ed. van Vloten, p. 35). We have very little information regarding Ka'b's life and work. According to al-Ṭabarī, he was on intimate terms with the Caliph 'Omar; he was in his retinue when 'Omar entered Jerusalem in 15 (636) (*Annales*, i. 2408), became a Muslim in 17 (638) (*ibid.*, p. 2514) and is said to have prophesied the death of 'Omar to him in 23 (644) three days before it happened (*ibid.* p. 2722). According to al-Nawawī (*Tahdhīb*, ed. Wüstenfeld, p. 523), he was alive in the time of the Prophet, but never saw him. The Anṣārī Abu 'l-Dardā' [q. v.] said of him that he possessed great knowledge and that there was only one opinion regarding the vastness of his learning and his reliability (al-Nawawī, *ibid.*). From Yemen he moved to Medina in the reign of 'Omar and then from there to Ḥimṣ in Syria. The Omayyad Mu'āwiya, then governor of the province of Syria, is said to have taken Ka'b as teacher and counsellor to his court. In the conflict between 'Othmān and his opponents Ka'b vigorously championed the Caliph, which on one occasion brought upon him corporal chastisement by the pious Abū Dharr [q. v.] (Ṭab., i. 2940 *sq.*). He died under 'Othmān in the year 32 or 34 (652 or 654; Ṭab., iii. 2474 *sq.*) at Ḥimṣ and was buried there or, as others say (Ibn Baṭṭūṭa, ed. Defrémery et Sanguinetti, i. 222; Yāḳūt, *Mu'djam*, ii. 595), in Damascus. His most important pupils were 'Abd Allāh b. 'Abbās [q. v.], one of the earliest expositors of the Ḳur'ān, and Abū Huraira [q. v.].

Ka'b's teaching was given orally only; that he ever wrote a book, is, at least, nowhere stated. Many sayings seem to be credited to him; in many, notably those given by al-Ṭabarī, an older origin can be proved from rabbinical or church-patriarchal traditions (for examples see Lidzbarski, *op. cit.*, p. 38 *sq.*). Reliable historians like Ibn Ḳutaiba and al-Nawawī do not quote him at all or, like al-Ṭabarī, only rarely; on the other hand, he is all the more frequently quoted as an authority by story-tellers like al-Tha'labī and al-Kisā'ī. In almost uninterrupted succession however he appears as narrator in the aljamiadic *Leyenda de José* (edited in Spanish transcription by F. Guillén Robles, *Leyendas de José hijo de Jacob y de*

Alejandro Magno, Zaragoza 1888) so that it almost seems as if this *leyenda* was in its whole substance a tradition descending from Ka'b. The editor translates Ka'b al-Aḥbār (in Spanish transcription *Cāb Alaḥbar*, p. 4 note 2) by *Caab el historiador*, as he — like formerly von Hammer (cf. Lidzbarski, *op. cit.*, p. 26 note 4) — confuses *Aḥbār* with *Akhbār* and calls him *el narrador* or *el cronista*. This Morisco legend is however for the most part, especially the first chapter, a literal translation of al-Tha'labī's Yūsuf legend, and also where al-Tha'labī mentions other traditionists or none at all, refers to Ka'b, who is mentioned as an authority only five times in al-Tha'labī's story, the first time in his introductory description of the creation and beauty of Joseph (*Ḳiṣaṣ al-Anbiyā'*, Cairo 1324, p. 61, l. 4 *infra*). This passage is lacking in the *Leyenda*, as the first page of the MS is lost. The agreement with al-Tha'labī begins in the former at the very beginning, p. 3 l. 4 *infra*: *Y después kee Allah ouo* etc., in al-Tha'labī, *op. cit.*, p. 62, l. 23: *inna Allāha ta'ālā anbata* etc., where it is related that God made a tree grow up for Jacob in the courtyard of his house and whenever a son was born to him, made a branch sprout from the tree. As the boy grew, so did the branch and when the boy attained manhood, Jacob cut off the branch and gave it to his son. While al-Tha'labī here gives a quite general reference to the statements of people "who know the legends of the prophets and the history of past ages", the *Leyenda* as early as p. 4 and on almost every other page gives Ka'b as the narrator. This frequent reference to Ka'b is however, as a further comparison with al-Tha'labī's story shows, quite arbitrary in the *Leyenda*. Al-Kisā'ī in his legend of Yūsuf (*Ḳiṣaṣ al-Anbiyā'*, Cod. Bonn 30 7, p. 315—382) quotes Ka'b once as an authority viz. at the beginning, where it is related that God gave Abraham five precious gifts, which afterwards all passed into Joseph's possession and that this aroused the envy of his brothers; then follows the story of Joseph and Jacob's dream (cf. Weil, *Biblische Legenden der Muselmänner*, p. 101). We find Ka'b as narrator in one passage in Firdawsī's *Yūsuf u Zalīkhā* (ed. Ethé, in *Anecdota Oxoniensia*, Aryan Ser., Part vi., Vol. I., Oxford 1908, p. 258, l. 2509) where he says: "Ka'b-i Aḥbār was the first to say this, from Ka'b I have the following true tradition"; here follows the description of the ruler of Egypt (here called Khaiṭūs or Khuṭrīsh with the *kunya* Abu 'l-Ḥasan) and of his vizier Raiyān b. al-Walīd (the Potiphar of the Bible) and his wife Zalīkhā and of the preparation for the sale of Joseph by public auction. The fact that al-Ṭabarī in his story of Joseph (i. 371—413) does not mention Ka'b at all, and al-Tha'labī, al-Kisā'ī and Firdawsī, on the other hand, in the same story quote Ka'b as authority in different, never in parallel passages, strengthens the hypothesis that this name is a late invention not only in the Morisco legend but also in the three authors last named.

KA'B B. AL-ASHRAF, a Medina opponent of Muḥammad, according to one statement a Naḍīrī, according to another, a member of the Ṭaiyi' family of Nabhān but the son of a Naḍīrī woman. In any case, he was an ardent champion of Judaism (cf. the expression *raiyis al-aḥbār*, Ibn Hishām, p. 659, 12). Aroused by the result of the battle of Badr, he went to Mecca where he used his considerable poetic gifts (in the *Kitāb al-Aghānī* he is called *faḥl faṣīḥ*) to incite the Ḳuraish to fight against the victor. He then returned to Medina, where he is said to have compromised the wives of the Muslims by love-songs. After the prophet had uttered his fateful "Who will rid me of this man?", Muḥammad b. Maslama offered to do so and he with several others including Ka'b's foster-brother succeeded by a despicable intrigue in enticing him out of the house on a bright moonlight night and killing him in spite of his valiant resistance: cf. the confirmatory allusions in Ka'b b. Mālik's poem, Ibn Hishām, p. 658 sq., while Ḥassān b. Thābit (ed. Hirschfeld, n°. 97) gives an account of this murder and its counterpart, the assassination of Ibn al-Ḥuḳaiḳ, with startling frankness. According to al-Wāḳidī, the murder took place on the night of the 14 Rabī' I of the year 3 A. H., but this date, which is in contradiction to his own dating of the raid against Dhū Amarr, is probably due to the events being all compressed within the same period in the source he followed (cf. Ibn Hishām), which might make it appear that Ka'b was murdered soon after his return from Mecca. It is however clear from the poem (Ibn Hishām, p. 658, 16, 659, 11), as well as from a tradition in al-Ḥalabī according to which the Naḍīrī's were in deep mourning for Ka'b's death, when Muḥammad began to attack them, that his murder did not take place till the year 4 as a kind of prelude to the attack on his kinsmen. It is also natural that punishment only overtook him after the battle of Uḥud to which he had contributed by his instigation.

Wüstenfeld, p. 548—51, 657—9; al-Wāḳidī, transl. by Wellhausen, p. 95—9; al-Ṭabarī, ed. de Goeje, i. 1368—72; al-Ḥalabī, *Insān al-'Uyūn* (Cairo 1308), iii. 176—9; al-Mas'ūdī, *al-Tanbīh*, ed. de Goeje, p. 243); *al-Aghānī*[1], xix. 106 sq.; Caetani, *Annali dell' Islām*, i. 534—7; Margoliouth, *Mohammed*, 3rd ed., p. 280 sqq.; Wensinck, *Mohammed en de Joden te Medina* (Leiden 1908), p. 152—5; R. Leszynsky, *Die Juden in Arabien zur Zeit Muhammeds*, Berlin 1910, p. 66—9. (FR. BUHL.)

KA'B B. MĀLIK, ABŪ 'ABD ALLĀH, a native of Medina of the Khazradj tribe of Salima. After taking an active part in the sanguinary tribal

battles in Medina, he was won over to Islām even before the Hidjra and took part in the momentuous second meeting at the 'Aḳaba [q. v.]. He was a poet and along with Ḥassān b. Thābit [q. v.] and 'Abd Allāh b. Rawāḥa [q. v.] was employed by Muḥammad to glorify his military exploits and answer the polemical poems of the enemies. He did not fight at Badr [q. v.] but was in most of the other battles. At Uḥud, wounded himself, he found the wounded Prophet, who was thought to be slain. On the other hand, he was one of the few followers of Muḥammad who, in spite of their devotion to him, could not bring themselves to take part in the difficult campaign against Tabūk. But he later regretted it and after severe penance received the forgiveness of the Prophet (cf. Sūra, ix. 103, 107, 118 sq.). It is noteworthy that he who is fond of emphasising the connection of his tribe with the Ghassānids [q. v.], was at that time summoned by a Ghassānī chief to abandon Medina and Muḥammad. In the caliphate of 'Othmān we again hear of him when he with Ḥassān and Zaid b. Thābit vigorously championed the Caliph, when he was assailed; after 'Othmān's death he wrote an elegy on him and declined to pay homage to 'Alī. He died blind in 53 (673); according to others, as early as 50 A. H. His poems have a somewhat nobler tone than those of Ḥassān and show a real enthusiasm for the religion of Muḥammad besides a strong local patriotism.

Bibliography: Ibn Hishām, p. 294—301, 310, 575, 896, 907—13 (the poems, p. 520—871 passim, vgl. al-Mubarrad, *al-Kāmil*, p. 66, and on the other side Ibn Ḳutaiba, *Kit. al-Shi'r*, ed. de Goeje, p. 180); al-Ṭabarī, ed. de Goeje, i. 1217—1225, 1406, 1695, 1705, 2037, 3040, 3062, 3070; al-Wāḳidī, transl. by Wellhausen, p. 113, 123, 136, 160, 326, 393, 411—4; *al-Aghānī*, xv. 26—32; al-Nawawī, *Biogr. Dict.*, ed. Wüstenfeld, p. 23 *sq.*; *Bibl. Geogr. Arab.*, vii. 224. (FR. BUHL.)

KA'B B. ZUHAIR, son of the celebrated poet and author of a *Mu'allaḳa*, Zuhair b. Abī Sulmā, and of Kabsha bint 'Ammār. Poetic talent seems to have been one of the privileges of the family, for, not to speak of Ka'b and his father, we have verses by eleven of its members, including the famous Tumāḍir (al-Khansā'). We do not know the date of his birth; he was the eldest of three brothers, the other two being Budjair and Sālim. Traditions, more than suspicious, report that he early gave proof of his poetic talents, in spite of the opposition of his father who ended in being convinced after a decisive test. He was involved in the wars of his tribe against the Ṭaiyi', the Ḳuraish and the Khazradj, as we see from various poems in his *Dīwān*. At the time of Muḥammad's mission, Budjair was converted shortly before the year 7, but Ka'b refused vigorously to imitate him and launched satirical verses against the Prophet. The latter solemnly authorised his assassination. Henceforth "the earth became too narrow for Ka'b" and he resolved to submit. He appeared unexpectedly in the year 9 in a mosque of Medina where Muḥammad was and recited to him his famous poem known as *Bānat Su'ād* (Su'ād has gone). The Prophet was overcome with admiration on hearing this eulogy of himself and the Ḳuraish and threw on his shoulders his own striped Yemen cloak, the *burda*, whence the name often given to this *Ḳaṣīda*. The date of Ka'b's death is unknown, but he seems to have reached an advanced age. The *Bānat Su'ād* has nothing of a religious poem; it is inspired with the sentiments of pagan poetry and begins with such a commonplace that Ḥammād al-Rāwiya [q. v.] claimed to know 700 poems with the same opening. It was frequently reproduced in the form of *takhmīs* and *tashṭīr*. Its commentators are numerous. The best known are: Tha'lab, Ibn Duraid, al-Tibrīzī (published by Krenkow, *Zeitschr. d. Deutsch. Morgenl. Ges.*, lxv. 241—279), Ibn Hishām (of which the best edition is that of Guidi, Leipzig 1871), Ibn Ḥidjdja, al-Suyūṭī, al-Bādjūrī. It was first published by Lette (Leiden 1740); of later editions we may mention those of Freytag with a Latin translation (1823), Nöldeke, *Delectus Veterum Carminum Arabicorum*, Berlin 1890, p. 110—114). I have given an edition with a French translation and two unpublished commentaries (Algiers 1910). The *Dīwān* is not yet published.

Bibliography: R. Basset: *La Bānat So'ād*, Introduction, p. 14—82, and the authors quoted, p. 9—13; Ibn Sallām al-Djumaḥī, *Ṭabaḳāt al-Shu'arā'*, ed. Hell (Leiden 1916), p. 20—26. (R. BASSET.)

KA'BA, the palladium of Islām, situated almost in the centre of the great mosque in Mecca.

1. The Ka'ba and its immediate neighbourhood.

The name, not originally a proper name, is connected with the cube-like appearance of the building. It is however only like a cube at the first impression; in reality the plan is that of an irregular rectangle. The wall facing northeast, in which the door is (the front of the Ka'ba) and the opposite wall (back) are 40 feet long; the two other are about 35 feet long. The height is 50 feet.

The Ka'ba is built of layers of the grey stone produced by the hills surrounding Mecca. It stands on a marble base 10 inches high, projecting about a foot (*shādharwān*). Four lines drawn from the centre through the four corners (*rukn* pl. *arkān*) would roughly indicate the four points of the compass. Four perpendiculars from the centres of the four walls would run north-east, north-west, south-west and south-east. The north corner is called *al-rukn al-'irāḳī*, the western *al-rukn al-sha'mī*, the southern *al-rukn al-yamānī*, and the eastern *al-rukn al-aswad* (after the Black Stone).

The four walls of the Ka'ba are covered with a black curtain (*kiswa*) which reaches to the ground and is fastened there with copper rings, which are fastened in the *shādharwān*. Gaps are left in only for the water-spout and the door. The *kiswa* is prepared in Egypt every year and brought to Mecca by the pilgrim caravan. The old covering is taken down on the 25th (or according to al-Batanūnī, the 28th) Dhu 'l-Ḳa'da, and the Ka'ba temporarily covered with a white covering which hangs down to within 6 feet of the ground; the Ka'ba is then said to have put on the *iḥrām* [q. v.]. At the end of the Ḥadjdj it is covered with the new cloth. The door is covered by a separate covering also of Egyptian manufacture, which in Egypt is called *al-burḳu'* (the veil).

The *kiswa* consists of black brocade, into which the *shahāda* is woven (see Snouck Hurgronje, *Bilderatlas zu Mekka*, n°. xvii). At two-thirds of its height a gold embroidered band (*ḥizām*) runs round, which is covered with verses from the Ḳur'ān

in fine calligraphy. Every inch of the garment, which is taken down each year, is of course regarded as a relic and small pieces are sold by the Banū Shaiba, the door-keepers of the Kaʿba, as amulets.

In the north-east wall, about 7 feet from the ground, is the door, parts of which have mountings of silver-gilt. In Burckhardt's and Ali Bey's times the threshold was lit up every night by a row of candles. When the Kaʿba is opened, a wooden staircase (*daradj, madradj*) running on wheels is pushed up to the door; when not in use, it is kept between the Zamzam building and the Gate of the Banū Shaiba (see Snouck Hurgronje, *Bilderatlas zu Mekka*, nº. ii.). For a picture of the staircase, see Ali Bey, *Travels*, ii. 80.

In the interior of the Kaʿba are three wooden pillars, which support the roof, to which a ladder leads up. The only furnishing is the numerous golden and silver lamps suspended. On the inner walls there are many building inscriptions. The floor is covered with slabs of marble.

In the eastern corner, about 5 feet above ground, not far from the door, the Black Stone (*al-ḥadjar al-aswad*) is built into the wall; it now consists of three large pieces and several small fragments stuck together and surrounded by a ring of stone, which in turn is held together by a silver band. The stone is sometimes described as lava and sometimes as basalt; its real nature is difficult to determine, because its visible surface is worn smooth by hand touching and kissing. Ali Bey (ii. 76) gives a profile sketch of it which clearly shows the surface hollowed out in undulations. Its diameter is estimated by al-Batanūnī (p. 105) at 12 inches. The colour is reddish black with red and yellow particles.

The part of the wall between the Black Stone and the door is called *al-multazam*, because the visitors press their breasts against it while praying fervently.

In the east corner too, about five feet above the ground, another stone (*al-ḥadjar al-asʿad*), the "lucky", is built into wall. It is only touched and not kissed during the perambulation.

Outside the building there is still to be mentioned the gilt water-spout (*mīzāb*), which juts out below the top of the north-west wall, and has an appendage which is called the "beard of the *mīzāb*". The spout is called *mīzāb al-raḥma*, "spout of mercy" (on it cf. Ben Chérif, *Aux Villes Saintes de l'Islam*, p. 73); the part between it and the west corner is the exact *ḳibla* [q. v.]. The rain water falls through the spout on the pavement below which here is inlaid with designs in mosaic. The ground all round the Kaʿba is covered with marble slabs.

Opposite the north-west wall, but not connected with it, is a semi-circular wall (*al-ḥaṭīm*) of white marble. It is three feet high and about five feet thick; its ends are almost six feet from the north and west corners of the Kaʿba. The semi-circular space between the *ḥaṭīm* and the Kaʿba enjoys an especial consideration, because for a time it belonged to the Kaʿba [see ii.]; in the perambulation therefore it is not entered; the *ṭawāf* goes as close as possible along the outer side of the *ḥaṭīm*. The space bears the name *al-ḥidjr* or *ḥidjr Ismāʿīl*. Here are said to be the graves of the patriarch and his mother Hagar. The pavement on which the *ṭawāf* is performed is called *maṭāf*; a depression in it just opposite the door has still to be mentioned; it is called *al-miʿdjan* "the trough"; according to legend, Ibrāhīm and Ismāʿīl (q. v.) here mixed the mortar used in building the Kaʿba.

Around the *maṭāf*, and a little higher than it, runs a paved border, a few paces broad, on which stand 31 or 32 slender pillars. Between every two pillars hang seven lamps, which are lit every evening — to make the darkness visible, as Burton says. The row of columns is closed by the Bāb Banī Shaiba, an arch which stands opposite the north-west wall of the Kaʿba and affords an entrance to the *maṭāf*. Between this archway and the Kaʿba is a little building, a kind of pagoda, with a small dome, the *maḳām Ibrāhīm*. In it is kept a stone, on which Ibrāhīm is said to have stood at the building of the Kaʿba. Admission is granted to visitors on payment. Europeans have however not been able to see the stone. Burton says that the five dollars asked was too high for his finances. According to Oriental travellers and historians, it is a soft stone on which the footprints of Ibrāhīm can still be seen. During al-Mahdī's caliphate it was provided with a gilt band holding it together. Beside the Maḳām Ibrāhīm, also opposite the north-east wall of the Kaʿba and within the row of pillars, but farther north of the Maḳām, is the pulpit (*minbar*) of white marble. It consists of the usual staircase, shut at the foot by a door, and above the staircase are four short pillars supporting a spire like that of a Gothic church tower.

The pavement on which the row of pillars stands is somewhat lower than that which runs round them, to which eight paved paths from the colonnades round the mosque give access. On this outer paved part are four small buildings. Close beside the Bāb Banī Shaiba, on the left of the entrance and just opposite the Black Stone, stands the *ḳubba* built over the Zamzam well. In the room on the ground floor is the well, which is walled in; its water is drawn up in buckets, fastened to a pulley. On one part of the flat roof is a small chapel partly open, which has a roof with a small dome.

In d'Ohsson's as well as in Ali Bey's plan of the sacred mosque we find two farther buildings north-east of the Zamzam building, at the edge of the outer paving, which are called *al-Ḳubbatain*, "the two Kubba's", by him, Burckhardt and Burton. They are not marked in Snouck Hurgronje's pictures because they were demolished in the eighties and removed entirely. One held various objects, such as chronometers, jars for Zamzam water; the other, books.

The three other small buildings on the outer pavement are the so-called *maḳām*'s, the standing-places of the imāms of the various ritual schools during the *ṣalāt*. The *Maḳām* or *Muṣallā 'l-Ḥanbalī* stands south of the Zamzam building, opposite the south-east wall of the Kaʿba. It consists of a roof tapering to a point and supported by slender marble columns. The *Maḳām al-Mālikī* is of the same form and is opposite the south-west wall of the Kaʿba. The *Maḳām al-Ḥanafī* looks out on the *ḥaṭīm* and the north-west wall of the Kaʿba; it has two roofs, one above the other. — The Shīʿīs have no *maḳām* of their own; during the *ṣalāt* they stand under the *ḳubba* on the roof of the Zamzam well or at the Maḳām Ibrāhīm.

Finally we may mention receptacles placed here and there beside the pavements, in which various articles are kept (see Snouck Hurgronje *Bilderatlas*, nº. i., ii.; *Bilder aus Mekka*, nº. i., iii.).

II. History.

The Arabs possess no historical or semi-historical records of the origin of the Ka'ba, and we as little. According to Snouck Hurgronje's supposition, the Zamzam spring in a waterless valley may have been the cause of the rise of a sacred place. It is to be noted that Ptolemy (*Geography*, vi. 7) in place of Mecca mentions Macoraba, which is probably to be interpreted, as does Glaser, (*Skizze der Gesch. u. Geogr. Arabiens*, Berlin 1890, ii. 235) as the South Arabian or Ethiopic *mikrāb*, "temple". From this one may conclude that the Ka'ba already existed in the second century A. D. The accounts of Abraha's campaign, which has been elaborated with legendary features, also suggest the existence and worship of the Ka'ba in the sixth century but tell us nothing of its appearance or equipment. The Tubba' As'ad Abū Karib al-Himyarī, who came to Mecca, is said to have for the first time provided the building with a *kiswa* and with a door with a lock. The information available regarding the distribution of the offices [see below iii.] among the sons of Ḳuṣaiy shows that the worship of the sanctuary had developed into a carefully regulated cult several generations before Muḥammad.

As to the history of the building of the Ka'ba the legends referring to the pre-Muḥammadan period are dealt with below [iv.]. Whether Ḳuṣaiy demolished and restored the building, as the historians say, is a question that cannot be definitely settled.

The historical references only begin with Muḥammad. When Muḥammad had reached man's estate, the fire of a woman incensing the Ka'ba is said to have caught the building and laid it waste. It happened that a Byzantine ship was thrown ashore at Djidda [q. v.] and the Meccans brought its wood hither and used it for the new building. In connection with this the name of a man Bāḳūm (it is given in various forms) is always mentioned, sometimes as the captain of the ship, sometimes as the carpenter whose advice was taken; he is said to have been a Coptic Christian.

The old Ka'ba is said to have only been of the height of a man and to have had no roof. The threshold is said to have been on the level of the ground so that the water had an easy entrance in the frequent floods (*sail*). The Ka'ba was then built of alternate layers of stone and wood, its height was doubled and a roof covered it. The door was placed above the level of the ground so that whoever wished to enter had to use a ladder. Unwelcome visitors were tumbled down from the high threshold. When the Black Stone was to be put in its place, the Meccans quarrelled among themselves as to who should have the honour. They had just decided that the first comer should be given the task when Muḥammad (who had been engaged in helping to carry the stones) came past. With superior wisdom he is said to have placed the precious object in a cloth — or in his cloak — and to have ordered the heads of tribes each to take an end. He himself then took out the stone and placed it in position. Legend and history are probably hopelessly confused in this story.

At the conquest of Mecca in 8 A. H. [see iii. below], Muḥammad left the Ka'ba as a building unaltered. But according to tradition, he later said that only the very recent conversion of the Meccans prevented him from instituting all kinds of innovations. These real or alleged intentions of Muḥammad were brought to realisation in 64 (683) by 'Abd Allāh b. al-Zubair [q. v.]. As anti-Caliph he was besieged by al-Ḥuṣain b. Numair [q. v.] in Mecca. Catapults were erected on the hills round Mecca, which hurled a hail of stones on the town and sanctuary and so damaged the house of Allāh that it finally looked "like the torn bosoms of mourning women". 'Abd Allāh and his helpers pitched their tents beside the sanctuary (he henceforth called himself *al-'Ā'idh bi 'l-Bait*, "he who took refuge at the temple") and again a conflagration did its best to complete the destruction. In the fire the Black Stone was split in three pieces.

When the Omayyad army was withdrawn, 'Abd Allāh discussed with the Meccan authorities the demolition and rebuilding of the Ka'ba. When he had made his decision and the ruins had to be cleared away, no one dared to begin the work. The bulk of the populace, with Ibn 'Abbās at their head, had left the town because they feared a punishment from heaven. But 'Abd Allāh climbed up himself, axe in hand, and began the grim task. When his people saw that he remained unharmed, they took courage and assisted.

During the building a covered scaffolding was left on the spot to mark the *ḳibla* and the *maṭāf* at least. The masons are said to have worked behind the covering. 'Abd Allāh guarded the Black Stone, wrapped in a piece of brocade, in the council hall (*Dār al-Nadwa*). When put back into its place it, or rather the three pieces, into which it was broken, was bound with a band of silver.

The Ka'ba was then built entirely out of Meccan stone and Yemen mortar and built to a height of 27 ells. According to the tradition of the Prophet, the *ḥidjr* was included in the building and two doors were made on the level of the ground, the eastern as an entrance and the western as an exit. In the *ṭawāf* the four corners were kissed.

These alterations lasted only a short period. In 74 (693) al-Ḥadjdjādj b. Yūsuf [q. v.] conquered Mecca and killed 'Abd Allāh b. al-Zubair. In agreement with the Caliph 'Abd al-Malik he again separated the *ḥidjr* from the Ka'ba and walled up the west door. The building, in keeping with the wish of the Omayyads, thus practically received its pre-Islāmic form again and this form has survived to the present day. The piety of the populace has always resisted any considerable innovations. Only to an unimportant degree have the authorities now and then made improvements. As was the case in the heathen period, floods have continued to be a danger to the building. When in 1611 it threatened to collapse, a girdle of copper was used to avert the disaster. But a new *sail* made this support also insufficient, so that in 1630 renovations were decided upon. But the old stones were used as much as possible for the rebuilding.

The Ka'ba successfully withstood the Karmatian invasion of 317 (929); only the Black Stone was carried off. After an absence of some twenty years it was sent back to Mecca (cf. de Goeje, *Mém. sur les Carmathes*, etc.[2], p. 104—111, 145—8).

The custom of covering the Ka'ba is said to have been introduced by the Tubba'. The annual re-covering of the Ka'ba only became an established custom in modern times; for the oldest Muslim period, the 'Āshūrā day is mentioned as

the day of covering, but in Radjab also and in other months the building has changed its covering. The *kiswa* consisted sometimes of Yemen and sometimes of Egyptian or other cloth; during 'Omar's Caliphate the building threatened to collapse on account of the many coverings hung on it. All sorts of colours are mentioned also. The Wahhābīs even covered the Ka'ba with a red *kiswa*.

The *maḳām*'s around the Ka'ba are mentioned as early as the 'Abbāsid period; sometimes under the name *ẓulla* ("a shade"). The present buildings are said to date from 1074 (1663). A dome over the Zamzam well is mentioned at an equally early period, the present one was built in 1072.

The Ka'ba had offerings dedicated to it in the heathen as well as the Muslim period. Al-Azraḳī devotes a detailed chapter to this subject (p. 155 *sqq.*). Many a worldly ruler has used these treasures for political purposes. Tradition reports that 'Omar said: "I will leave neither gold nor silver in the Ka'ba but distribute its treasures". To this, however, 'Alī is said to have raised vigorous objections so that 'Omar desisted from his plan.

III. The Ka'ba and Islām.

We do not know the personal feelings of the youthful Muḥammad towards the Ka'ba and the Meccan cult, but they were presumably of a conventional nature. What the biography of the Prophet tells us about his Meccan period in this respect can lay no claim to historical value. The Meccan revelations tell us nothing about these relations during this important period in the life of the Prophet. In any case he felt no enthusiasm for the Meccan sanctuary.

During the first period after the Hidjra Muḥammad was busy with very different problems. But when the expected good relations with Judaism and the Jews did not come about, a change set in. Henceforth — about a year and a half after the Hidjra — the Ka'ba and the Ḥadjdj are mentioned in the revelations.

The change of attitude was first shown in the *ḳibla* edict: the faithful were no longer to turn towards Jerusalem in the *ṣalāt* but to the Ka'ba. "We see thee turning thy face towards every part of heaven, but we will have thee turn towards a *ḳibla* that will please thee. Turn then thy face towards the sacred mosque and wherever ye be turn your faces towards that part. They verily to whom the Book hath been given know this to be the truth of their Lord: and God is not regardless of what ye do" (Sūra ii. 139). From the dogmatic point of view this volte-face was justified by an appeal to the "religion of Abraham", which was specially invented for the occasion (Sūra ii. 129, iii. 89 etc.), as Snouck Hurgronje has shown in his *Mekkaansche Feest*. This religion of Abraham, the prototype of Judaism and Islām, is said to have been obscured by the Jews and to have been brought to light again by Muḥammad. The Meccan cult was now drawn into it. Ibrāhīm and Ismā'īl laid the foundations of the Ka'ba (Sūra ii. 121). The Maḳām Ibrāhīm is described as a place suitable for the *ṣalāt* (ii. 119). Ibrāhīm prescribed the pilgrimage to mankind at Allāh's behest (xxii. 28); and the Ka'ba is said to be the first sanctuary that was founded on earth (iii. 90); it is now called the Holy House (v. 98), or the Ancient House (xxii. 30, 34).

In this way there was created for the reception of the old heathen cult into Islām a basis in religious history, which was at the same time a political programme; henceforth the eyes of the faithful were turned towards Mecca.

In the year 6 A. H. a prospect of taking part in the Mecca cult was held out to the Muslims by the pact of al-Ḥudaibiya [q. v.]; in connection with it, the *'Umrat al-Ḳaḍā'* took place in the year 7. Muḥammad's political endeavours culminated in the conquest of Mecca in the year 8.

All the accumulation of heathendom, which had gathered round the Ka'ba, was now thrust aside. 360 idols are said to have stood around the building. When touched with the Prophet's rod they all fell to the ground. The statue of Hubal which 'Amr b. Luḥaiy is said to have erected over the pit inside the Ka'ba was removed as well as the representations of the prophets. When they began to wash the latter with Zamzam water, Muḥammad is said to have placed his hands on the pictures of Jesus and Mary and said: "Wash out all except what is below my hands". He then withdrew his hands. A wooden dove also which was in the Ka'ba is said to have been shattered by Muḥammad's orders. The two horns of Abraham's ram did not crumble to dust until the rebuilding of the Ka'ba by 'Abd Allāh b. al-Zubair.

At the capture of Mecca, Muḥammad made arrangements regarding the religious and secular offices which had been filled in Mecca from ancient times. The historians say that in the old heathen period Ḳuṣaiy after a fierce struggle with the tribe of Khuzā'a became master of the Ka'ba and held all the important offices, religious and secular: the administration of the *Dār al-Nadwa* and the tying of the standard, the provision of the pilgrims with food (*rifāda*) and with drink (*siḳāya*) as well as the supervision of the Ka'ba (*sidāna* and *ḥidjāba*). His descendants

'Abd Manāf — Hāshim — 'Abd al-Muṭṭalib — 'Abbās, Abū Ṭālib
'Abd al-Dār — 'Uthmān — 'Abd al-'Uzzā — Abū Ṭalḥa — 'Abd Allāh

administered the offices after his death, 'Abd Manāf and his descendants getting the *rifāda* and *siḳāya* etc., while 'Abd al-Dār and his descendants saw to the *sidāna* and *ḥidjāba* etc.

When Muḥammad conquered Mecca his uncle 'Abbās [q. v., i. 9[b] *sq.*] or, according to another tradition, 'Alī asked for the administration of these offices. But Muḥammad said that they must all be crushed beneath his feet except the *siḳāya* and the guardianship of the Ka'ba. The former remained in the hands of 'Abbās; the latter he gave to 'Uthmān b. Ṭalḥa who allowed his cousin Shaiba b. Abī Ṭalḥa to act as his deputy. The Banū Shaiba are the doorkeepers at the Ka'ba to this day. The *rifāda*, which was in the hands of Abū Ṭālib, was taken over by Abū Bakr in the year 9; after his death the Caliphs looked after the feeding of the pilgrims.

Muḥammad's control over Mecca and the Meccan cult was first clearly marked at the *Ḥadjdj* of the year 9. As plenipotentiary of the Prophet, who did not participate in the pilgrimage, Abū Bakr announced to the assembled pilgrims the latest arrangements, which were put in the form of a revelation. They are contained in Sūra ix., which

from them is often called the Sūra of Immunity (*barā'a*) (v. 1—12, 28, 36 *sq.*).

According to it, idolators are henceforth forbidden to participate in the Meccan festival as they are impure (*nadjas*). Moreover, they are declared outlaws. A period of four months is given them during which they can go freely about the country; but after that "kill them wherever ye find them". Excepted are those with whom an alliance has been made in so far as they have punctiliously observed its terms and helped no one against the Muslims.

In the year 10 A. H. Muḥammad himself led the pilgrimage, at which therefore according to tradition not a single idolator was present: the Ka'ba had become an exclusively Muslim sanctuary, and Mecca was and is for Islām what Rome is to the Roman Catholic and Jerusalem to the Jew. At every *ṣalāt* the Muslims throughout the world turn towards Mecca and at the ceremonies of the pilgrimage the Ka'ba forms the beginning and the end of the holy rites.

Two special ceremonies concerning the Ka'ba may here be mentioned, the opening and the washing of the building. The opening takes place on definite days and men are first admitted, then the women. On this occasion the above mentioned staircase is pushed up to the building. The days in question change at the will of the Meccan authorities — but some usually fall in the month of the pilgrimage and one on the 10th Muḥarram ('Ashūrā day, q. v.). It is considered particularly meritorious to perform the *ṣalāt* in the Ka'ba.

After the Ḥadjdj is completed, at the end of the month Dhu 'l-Ḥidjdja, the Ka'ba is washed, a ceremony in which the Grand Sharīf, the governor and other authorities as well as a number of pilgrims take part (or took part). The first to enter is the Sharīf, who after a *ṣalāt* of two *rak'a's*, himself washes the ground with Zamzam water which flows away through a hole in the threshold. The walls are washed with a kind of broom made of palm leaves. The Sharīf then sprinkles every-thing again with rose water and finally the building is fumigated with all manner of perfumes (cf. *al-Ḳibla*, nº. 409, p. 1). The Sharīf throws the broom away among the crowd of pilgrims who fight among themselves for possession of it. Al-Batanūnī says (p. 109) that the Zamzamīs and the Mudjāwirīs sell the pilgrims similar brooms for a minimum of half a real.

As is evident from this example, the veneration for the sacred building extends to all that comes in contact with it: — to the Black Stone, the water-spout, the *multazam*, and above all to the Zamzam water. It is however said — and probably with truth — that 'Omar thus expressed himself on the Black Stone: "I know that thou art a stone, that neither helps nor hurts, and if the messenger of Allāh had not kissed thee, I would not kiss thee". But then he kissed the stone. And hardly a single pilgrim will think of 'Omar's words during the *ṭawāf*. The *ṣalāt* under the water-pipe is described as particularly efficacious: "Anyone who performs the *ṣalāt* under the *mīzāb* becomes as pure as on the day when his mother bore him" (al-Azraḳī, p. 224). The Zamzam water, which the pilgrim has poured over him again and again, is useful for every purpose for which it is drunk (*mā' Zamzam li-mā shuriba lahu*, Ḳuṭb al-Dīn, p. 34).

There is abundant testimony in Muslim as well as European litterature to the intensification of devotional feeling which the sight of the Ka'ba produces in the pilgrims. We may here quote al-Batanūnī's description of the *ṣalāt* at the Ka'ba as particularly characteristic (p. 26). "The whole assembly stood there in the greatest reverence before this highest majesty and most powerful inspiror of awe before which the greatest souls become so little as to be almost nothing. And if we had not been witness of the movements of the body during the *ṣalāt* and the raising of the hands during the prayers, and the murmuring of the expressions of humility and if we had not heard the beating of the hearts before this immeasurable grandeur we would have thought ourselves transferred to another life. And truly we were at that hour in another world: we were in the home of God and in God's immediate presence, and with us were only the lowered head and the humble tongue and the voices raised in prayer and weeping eyes and the fearful heart and pure thoughts of intercession" (cf. also Macdonald, *The Religious Attitude and Life in Islam*, Chicago, 1909, p. 216 *sqq.*; Ben Chérif, *Aux Villes Saintes de l'Islam*, p. ii, *sq.*, 45 *sq.*, 68).

Even the Shī'is and the Wahhābīs have left the Ka'ba its place in Islām. For the Ḳarmaṭians alone has an exception to be made, as can be well understood.

Although moderns like al-Batanūnī (p. 24) put the question: Why is God particularly worshipped in Mecca, when the whole world is His sphere, they themselves give the answer: "But Mecca is His citadel and the place of revelation of His dominion and power. And the Ka'ba is His temple and the place of His grandeur and grace. And is there in any of the four quarters of the earth a place not quite seven square miles in extent where half a million people assemble on a pilgrimage, all of whom call to God with one heart and one tongue? And although they differ in race and language, they all turn towards one *ḳibla* and at the *ṣalāt* move with one motion, without any hope other than the grace of the one God, who has not begotten and is not born and is without equal".

As to the mystics, their attitude to the Ka'ba depends on their position regarding the law. For the, so to speak, nomistic mystics like al-Ghazālī, the Ka'ba is, it is true, the sacred building which one has to go round in the *ṭawāf*. The *ṭawāf* and its object however only receive their value for man when they give them an inducement to rise to a higher spiritual level. Ibn al-'Arabī goes a step further when he says that the true Ka'ba is nothing other than our own being (*al-Futūḥāt al-Makkiya*, i. 733); the Ka'ba however also plays a part in his mystic experiences. Hudjwīrī however quotes some sayings of mystics, who no longer require the Ka'ba as an inducement to rise, and even despise it. Muḥammad b. al-Faḍl says: "I wonder at those who seek His temple in this world: why do they not seek contemplation of Him in their hearts? The temple they sometimes attain and sometimes miss, but contemplation they might enjoy always. If they are bound to visit a stone, which is looked at only once a year, surely they are more bound to visit the temple of the heart, where He may be seen three hundred and sixty times in a day and night. But the mystic's every step is a symbol of the journey to Mecca, and when he reaches

the sanctuary he wins a robe of honour for every step". Abū Yazīd (al-Bisṭāmī) says: "If anyone's recompense for worshipping God is deferred until to-morrow he has not worshipped God aright to-day", for the recompense of every moment of worship and mortification is immediate. And Abū Yazīd also says: "On my first pilgrimage I saw only the temple; the second time, I saw both the temple and the Lord of the temple; and the third time I saw the Lord alone". In short, where mortification is, there is no sanctuary: the sanctuary is where contemplation is. Unless the whole universe is a man's trysting-place where he comes nigh unto God and a retired chamber where he enjoys intimacy with God, he is still a stranger to Divine love: but when he has vision the whole universe is his sanctuary. "The darkest thing in the world is the Beloved's house without the Beloved".

Accordingly, what is truly valuable is not the Kaʿba, but contemplation and annihilation in the abode of friendship, of which things the sight of the Kaʿba is indirectly a cause. (Hudjwīrī, transl. Nicholson, p. 327).

IV. The Kaʿba in Legend and Superstition.

The alleged religion of Abraham gave a basis for the esteem in which the Muslims held the Kaʿba. Legend attached itself to the Ḳurʾānic statements and spun them out. As Snouck Hurgronje has proved in his *Mekkaansche Feest* against Dozy's hypotheses (see his *Israëliten te Mekka*), there can be no question of a local Meccan tradition in this connection. There was, it is true, a local tradition, but it consists of semi-historical reminiscences of the last few centuries before Islām. But all that tradition relates regarding the origin of the Kaʿba and its connections with Biblical personages, belongs to Islāmic legend.

The latter first of all attached itself to the statement that Ibrāhīm and Ismāʿīl raised (*rafaʿa*) the foundations of the Kaʿba (ii. 121). God's command to Ibrāhīm to build the Kaʿba is by some placed before the episode of Hagar and by others after it. The patriarch came to Arabia led by the *Sakīna*, which had the shape of a stormy wind with two heads; it is also described as having a snake's head. When it reached the site of the Kaʿba it wound itself round its foundation [see below] and said "Build on me". According to others, Ibrāhīm built on its shadow. He was helped by Ismāʿīl in this; the stones were taken from five (or seven) hills: Ḥirāʾ, Thabīr, Lebanon, Mount of Olives and the Djabal al-Aḥmar near Mecca (other names are also given). When the building had risen to some height, he stood at his work on the stone, which still shows the impress of his feet, the *Maḳām Ibrāhīm*. The Black Stone, which was still white in those days and only received its present colour as a result of contact with the impurity and sin of the pagan period, was brought to him by Gabriel after having been kept in Abū Ḳubais [q. v.] since the Deluge. Within the building (which was not high and had no roof) Ibrāhīm dug the hole, which afterwards served as a treasury. When the work of building was completed, he took his stand on the *maḳām*, which now rose high above the mountains, and proclaimed the pilgrimage to all men. From all sides they answered: *Labbaika, Allāhumma! Labbaika!*

On the other hand Muslim legend has developed the passage, Sūra iii. 90: "Truly, the first temple that was founded for men is that in Bakka; a blessed house and a guidance for (all) creatures". The ambiguous expression according to which Ibrāhīm and Ismāʿīl "raised" the foundations of the Kaʿba left room for the view that the foundations already existed on which he erected the building. Al-Ṭabarī in his commentary on Sūra ii. 121 (i. 408 *sq.*) however recognises that there are two views: according to the one, Adam, according to the other, Ibrāhīm laid the foundations. Legend relates the following regarding the foundation by Adam. When after the fall Adam was hurled out of Paradise on the earth, he came to Mecca. Gabriel with his wing uncovered a foundation, which had been laid in the seventh earth, and the angels threw blocks on it from Lebanon, the Mount of Olives, Djabal Djūdī [see DJŪDĪ] and Ḥirāʾ until the hole was filled level with the earth. God then sent from Paradise a tent of red jacinth in which Adam lived; what was afterwards the black stone, then a white jacinth from Paradise, served as a seat. When God made his covenant with men, the latter acknowledged God's sovereignty; the document on which their acknowledgment was written was given by God to be swallowed by the Black Stone. At the Last Day it will be given a tongue, to bear witness against men; according to others, because it was originally an angel.

There was a particular reason for sending down the prototype of the latter Kaʿba. Originally Adam's stature was so great that he could hear the song of the heavenly hosts around God's throne. As a result of the Fall, however, his stature was shortened; he then lamented to God that the higher spheres were now closed to him. God then sent down the tent around which Adam now performed the *ṭawāf*, following the example of the angels. But Mecca was without inhabitants and the sanctuary without worshippers. When he gave vent to his regrets on this point, he was promised by God that in time this place would be the site of a cult; that the sanctuary would enjoy a particular *karāma*; that it would be a *ḥaram* [q. v.] whose *ḥurma* would extend above, below and around, and to which men would make pilgrimage with dishevelled hair and covered with dust, breaking out of every cleft with weeping and *tahlīl* [q. v.] and *talbiya* [q. v.].

After Adam's death his descendants (Shīth is specially mentioned) built the Kaʿba. But the deluge washed the building away while the sacred stone was concealed by the angels in Abū Ḳubais. According to others, however, the flood did not touch the Kaʿba and Nūḥ performed the *ṭawāf* round the holy house. According to the first tradition, only a red mound was left of the Kaʿba, which Abraham afterwards found.

But the legends also extend to the period after Abraham. The hole in the Kaʿba, which is called *al-Akhsaf* or *al-Akhshaf*, is said to have been several times plundered under the Djurhum [q. v.]. Therefore at God's command a snake took up its abode there and guarded the treasures. When the Ḳuraishites wanted to pull down the Kaʿba, the monster opposed this plan, until God sent a bird which carried it off to one of the surrounding hills. — Every renovation of the Kaʿba is said to have been carried out amid ter-

rible portents, such as lightning-flashes. It is also said that on such occasions the foundation of the Ka'ba was brought to light and it looked like the necks of camels intertwined.

For the legend connected with the origin of the Zamzam well, see the article ZAMZAM. The following may however be added here. Once when 'Abd al-Muṭṭalib was sleeping in the *ḥidjr*, one appeared to him and in mysterious words ordered him to dig out the Zamzam, which was "at the battle-ground of the Ḳuraishīs", at the "Ravenhole", and at the "Ants' nest". Now when the Ḳuraish contested his right to it (or the claim to the well already dug) both parties went to the *Kāhina* of the Banū Sa'd b. Hudhail. On the way their water gave out. But the water which sprang from the impression of the hoof of 'Abd al-Muṭṭalib's mount was an indication from heaven that the latter was right. They therefore turned back to Mecca; and when 'Abd al-Muṭṭalib had begun to dig, he found there two golden gazelles which the Djurhum had concealed there, as well as swords and armour. All this was deposited at the Ka'ba or used to decorate the buildings.

This legendary story of the origin of the Ka'ba was easily brought into conformity with the cosmological views current among Christians and Jews in the East, the central point of which was the sanctuary itself. Muslim tradition at first adopted this cosmology completely, as is evident from the statements which are still wholly under the influence of the predominance of Jerusalem. They were however not content with this and transferred a considerable part of these sayings to Mecca. These traditions are grouped round the navel theory, the main ideas of which are as follows. The earth has a navel, whose functions are parallel to those of the human navel. It forms the part of the earth which was created before the rest of it and around which the rest stretches. It is also the highest point, the place which provides the whole world with its nourishment; and its forms the place of communication with the upper and under world.

This navel was at first Jerusalem and later Mecca. But not all the properties of the navel are attached in equal degree to Mecca. They may be briefly summed up as follows. About 40, according to others, 2000 years before the creation of the world, the sanctuary was an agglomeration (*ghuthā'*) in the world ocean. The beginning of the creation consisted in the stretching out of the earth around this point as centre, in the following order: after the substance of the earth (which coincides with the navel) heaven was formed and lastly the earth itself. In agreement with this theory is the fact that in the Ḳur'ān Mecca is called the mother of cities (*Umm al-Ḳurā*) (vi. 92, xlii. 5) and in popular literature the navel of the earth (Yāḳūt *Mu'djam*, iv. 278; *al-Khamīs*, i. 37; al-Ḥalabī, i. 195, etc.).

That the sanctuary is the highest point in the world cannot be scientifically maintained. The popular traditions however like to move in this direction. Thus, in the story of the creation, it is said that the earth is extended b e l o w the sanctuary. The semi-scientific cosmography says that the position of the Ka'ba corresponds to the Pole Star; as the latter is the highest point in the heavens, so the Ka'ba is the highest point on earth (al-Kisā'ī, *'Adjā'ib al-Malakūt*, MS. Leiden, f. 15*b*). This view is probably connected with the conception of heaven and earth as domes or tents put one upon the other, which can be shown to exist in Muslim literature.

The view that the sanctuary connects on the one side with heaven and on the other with the lower world is not so clearly stated with regard to Mecca as to Jerusalem. But it is said that no place on earth is nearer heaven than Mecca; and in the pagan period men are said to have gone up on to Abū Ḳubais to offer particularly urgent prayers. Whether the pit in the Ka'ba was really regarded as the entrance to the underworld, like the corresponding arrangements in Jerusalem and Hierapolis is uncertain.

One typical characteristic of the lower world is certainly possessed by Mecca. It is described as a tomb. Not only Ismā'īl, but a whole series of prophets, numbering hundreds, is said to have been buried round the Ka'ba. Every prophet belongs to Mecca. This is his essential starting point and termination of his career. Muḥammad therefore also belongs to Mecca and Mecca is his real grave as theoreticians say (al-Ḥalabī, i. 197) in opposition to the fact that he is buried in Madīna.

Traditions which emphasise Mecca's importance for the nourishment of the world are hardly represented at all.

These theories had to be brought into consonance with the later cosmology of Islām, which regards the universe as a series of stories of seven heavens and seven earths. The Ka'ba is now not only placed in the centre of the earth (according to the navel theory) but it forms the central point of the whole universe. Its foundations as well as those of Abū Ḳubais lie in the seventh earth and form a kind of axis which runs through all these worlds.

The so-called stories are exactly like one another in plan. Every one has a sanctuary in the centre so that if the top one fall down, it would fall exactly on the lowest in the seventh world. The highest of the sanctuaries is the throne of God. Of those which lie between the throne and the Ka'ba two are mentioned by name; the *Bait ma'mūr*, the name of which is taken from the Ḳur'ān (lii. 4) and *al-Ḍurāḥ*. Jewish literature was already acquainted with a heavenly sanctuary in which the angels act as priests. In Islām these priestly functions are usually replaced by the *ṭawāf*.

V. Comparative History of the Cult.

From the fact that Ptolemy calls Mecca Macoraba (i. e. *Mikrāb*, temple) we may conclude that in his time the Ka'ba was regarded as the dwelling of one or more deities. According to a statement of Epiphanius (*Haereses*, V, following the text in *Philologus*, 1860, p. 355), Dhu 'l-Sharā had his χααβου in Petra, in which word Ka'ba is also probably concealed. It is however not clear from Epiphanius, whether the temple in Petra was meant or the quadrangular black stone, which represented Dhu 'l-Sharā. Al-Bakrī (*Mu'djam*, ed. Wüstenfeld, p. 46) relates that the tribe of Bakr Wā'il [q. v.] as well as the main body of the tribe of Iyād had their centre of worship in Sindād in the region of Kāẓa and that their holy tent (or temple, *bait*) here was called Dhāt al-Ka'abāt (cf. however al-Hamdānī, *Ṣifa Djazīrat al-'Arab*, p. 171, 14. 17, 230, 22). According to Wellhausen,

the Ka'ba owed its sanctity to the Black Stone; this may be right, for the religion of the ancient Arabs was essentially stone-worship.

The form of the building may be compared with the apse of the Jerusalem temple, which was twenty ells in each direction.

It is not related that the Black Stone was connected with any special god. In the Ka'ba was the statue of the god Hubal who might be called the god of Mecca and of the Ka'ba. Caetani gives great prominence to the connection between the Ka'ba and Hubal. Besides him, however, al-Lāt, al-'Uzzā, and al-Manāt were worshipped and are mentioned in the Ḳur'ān; Hubal is never mentioned there. What position Allāh held beside these is not exactly known. The Islāmic tradition has certainly elevated him at the expense of other deities.

It may be considered certain that the Black Stone was not the only idol in or at the Ka'ba. The Maḳām Ibrāhīm was of course a sacred stone from very early times. Its name has not been handed down. Beside it several idols are mentioned, among them the 360 statues.

The Ka'ba possessed in a high degree the usual qualities of a Semitic sanctuary. First of all it made the whole surrounding area into consecrated ground. Around the town lies the sacred zone (*ḥaram*) marked by stones, which imposes certain restrictions on each one who enters it [see IHRĀM]. Moreover, the sanctity of the area is seen in the following points. In the *ḥaram* the truce of God reigns. When the Arab tribes made a pilgrimage to the Ka'ba, all feuds were dormant. It was forbidden to carry arms. Next, the *ḥaram* — and the Ka'ba especially — is a place of refuge. Here the unintentional manslayer was safe just as in the Jewish cities of refuge. On the Ka'ba there was a kind of handle to which the fugitives clung (Al-Azraḳī, p. 111), an arrangement which recalls the purport of the horns on the Jewish altar.

Blood was not allowed to flow in the *ḥaram*. It is therefore reported that those condemned to death were led outside the *ḥaram* to execution. The idea of peace extended even to the flora and fauna. Animals — except a few injurious or dangerous sorts, — are not to be scared away; hence the many tame doves in the mosque. Trees and bushes were not cut down except the *idh-khir* shrub, which was used for building houses and in goldsmiths' work. These regulations were confirmed by Islām and are in force to this day.

As to the rites, it is said that in the heathen period victims were slain at the Ka'ba. Among the ancient Arabs the idol of stone replaced the altar; on it they smeared the blood of the sacrificial animals. In Islām the killing takes place in Minā.

It is a question, whether and how far the Ka'ba was connected with the *ḥadjdj* in the pre-Islāmic period. Wellhausen (*Reste Arab. Heidentums*, 2nd ed., p. 79) defends the view that originally only the *'umra* [q. v.] was concerned with the Ka'ba while the scene of the *ḥadjdj* was 'Arafāt, Muzdalifa and Minā. The connecting of pilgrimage and *'umra* is regarded by him as a rather clumsy correction made by Islām. It must be conceded that Wellhausen with justice points to the fact that the *'umra* far down into Islām was closely connected with the month of Radjab. Moreover, the *ḥadjdj* is called simply *ḥadjdj 'Arafāt* and, according to the Shāfi'ī school, the *wuḳūf* in 'Arafāt is the main ceremony of the *ḥadjdj*. On the other hand, it should be remarked that in the Ḳur'ān (iii. 91) pilgrimage is connected with the Ka'ba (*ḥadjdj al-Bait*) and that tradition nowhere gives us the slightest hint of this being an innovation. The facts emphasised by Wellhausen may however be interpreted otherwise. He himself has pointed out that the ancient Arabs were fond of connecting sacred places situated close to one another by ceremonial rites. It is therefore more probable that the rather clumsy alteration had taken place by the pre-Islām period and is to be regarded as the result of a connection of the cult of 'Arafāt with that of Mecca.

As was said above, the Tubba' is regarded as the first who covered the Ka'ba. Whether this tradition is historically correct is beyond our knowledge. It is noteworthy that the coloured cloths are mentioned which were placed over the building, a rite which one has to consider in connection with similar rites used in other cases. The Jewish tabernacle, the high places of Canaan (Ezekiel xvi. 16), the throne of Solomon, the throne of the bishops, the *maḥmal*, and sacred tents in ancient Arabia as well as the *Sidrat al-Muntahā* in Paradise are all covered with coloured cloths. It is misleading to give a general explanation of all such things. But the idea of a connection with the sun shining in the heavens seems obvious here; particularly for the *Sidra* this notion can be traced further. The question might even be asked whether and how far the Ka'ba was regarded as an astral symbol. For the affirmative there is the fact that the Ka'ba is the object of the *ṭawāf* and that *ṭawāf* and Ka'ba are represented by Muslim tradition itself as connected with the host of spirits round the throne of God. The throne of God is, as is well known, a cosmic magnitude, and the Ka'ba and the Black Stone are described as the throne of God's *khalīfa* on earth, Adam. The dance of the heavenly spirits can easily be interpreted as a dance of the planets. Moreover, golden suns and moons are repeatedly mentioned among the votive gifts (al-Azraḳī, p. 155 *sqq.*). According to al-Mas'ūdī (*Murūdj*, iv. 47), certain people have regarded the Ka'ba as a temple devoted to the sun, the moon and the five planets. The 360 idols placed round the Ka'ba also point in this direction. It can therefore hardly be denied that traces exist of an astral symbolism. At the same time one can safely say that there can be no question of any general conception on these lines. The cult at the Ka'ba was in the heathen period syncretic as is usual in heathenism. How far also North Semitic cults were represented in Mecca cannot be exactly ascertained. It is not excluded that Allāh was of Aramaic origin. The dove of aloe wood which Muḥammad found existing in the Ka'ba may have been devoted to the Semitic Venus.

ḲABAḲBĀZĪ, or *Ḳabaḳandāzī*, the gourd-game, the oriental form of the Popinjay. It was a sort of tilting at the ring, but the weapon was an arrow, and the archers were on horseback. A ring was shot through, but the mark was a pigeon or other bird set on a high mast. In Bābur's time the mark was a duck (v. *Bābur-nāma*, Gibb Mem. i. and Mrs. Beveridge's transl. i. 34, and P. de Courteille, i. 39). The game was much practised in Egypt (v. Quatremère, *Hist. des Mamlouks*, i. 243, note 118; also Dozy's *Supplément*). It was also practised in India and Persia, (v. *Akbarnāma*, i., transl. p. 440; Vuller's *Lex.*, ii. 710). The game is alluded to in the *Gulistān*, iii. Story 28. (H. BEVERIDGE.)

ḲABATASH. [See CONSTANTINOPLE, i. 875*b*].

ḲABḌ (A.) means the legitimate taking possession of a thing, for example by inheritance or as the result of a contract. *Ḳabḍ* is usually discussed in the Muslim law-books in close connection with delivery by a contract of sale, for example in al-Bādjūrī's *Ḥāshiya* on Ibn Ḳāsim's *Fatḥ al-Karīb*, at the beginning of the chapter on *Baiʿ* (Būlāḳ edition 1307, i. 338); cf. E. Sachau, *Muhammed. Recht nach Schafiitischer Lehre*, p. 283 *sq.*; Th. W. Juynboll, *Handb. des islam. Gesetzes*, p. 263. (TH. W. JUYNBOLL.)

ḲABḌ (A.) "contraction, oppression", in Ṣūfī terminology means a state (*ḥāl*) which is the opposite of *basṭ*, "expansion, gladdening". (In the phrase *Allāhu yaḳbiḍu wa-yabsuṭu*, quoted by Ṣūfī authors from Ḳurʾān ii. 246, however, the words have a more general meaning). Both happen to the *ʿārif* (gnostic) only, while in the novice the corresponding emotions are fear and hope, but with the distinction that the latter refer to the future, while *ḳabḍ* and *basṭ* express a present feeling of spiritual dullness or joy. In the language of Western mysticism, they might be said to correspond approximately to the expressions *consolatio* (consolation) and *desolatio* (spiritual dryness).

(H. BAUER.)

ḲABḌ, a term in prosody. It is the suppression of the fifth quiescent letter in the primitive feet *faʿūlun* and *mafāʿīlun* and is therefore found in *ṭawīl*, *hazadj*, *muḍāriʿ* and *mutaḳārib*.

In *faʿūlun*, *ḳabḍ* is recommended (according to some, it is obligatory) when this foot is the penultimate of the second hemistich of the third *ḍarb* of a *ṭawīl*; everywhere else it is optional. In *mafāʿīlun*, *ḳabḍ* is obligatory in the last foot of the first hemistich of a *ṭawīl*. In all other cases it is only permitted if the foot is not liable to *kaff* or suppression of the seventh quiescent letter (*n*); nevertheless, it is very rarely found in *ṭawīl*, *hazadj* and *muḍāriʿ*.

(MOH. BEN CHENEB.)

AL-ḲĀBIḌ one of the names of God, see the article ALLĀH, i. 303*b*.

ḲĀBIḌ (ḲĀBIZ) a Turkish Sunnī theologian, founder of the sect of Khubmesīḥīs (popularly called Chapmesīḥīs). By order of Sulaimān he was tried before an extraordinary court, sentenced to death on 8th Ṣafar 934 (3 Nov. 1527) and executed on the following day as a *zindīḳ* [q. v.]. He maintained the (moral) superiority of Jesus over Muḥammad (*afḍalīyat ʿĪsā ʿalā Muḥammad*). On the occasion of this trial Ibn Kamālpashazāde wrote his treatise on Zindīḳism.

ḲĀBĪL, i. e. Cain. [See HĀBĪL.]

AL-KABĪR, one of the names of Allāh, see the article ALLĀH, i. 303*a*.

KABĪR, an Indian mystic, of the xvth century, who was claimed both by the Hindus and Musalmāns as belonging to their faith. A large collection of Hindi verses is attributed to him, but their authenticity is doubtful, and a like uncertainty attaches to his biography, which is obscured by legends. He is said to have been the son, or adopted son, of a Muhammadan weaver, and to have become the disciple of Rāmānanda, the Vaishnav reformer, at whose feet he sat in

Benares, joining in the theological and philosophical arguments that his master held with Brahmans and Ṣūfīs. He appears to have earned his living as a weaver, and to have been a married man, the father of a family, and to have been as contemptuous of the professional asceticism of the Yōgī as he was disregardful of the doctrines and ordinances of orthodoxy, whether Hindu or Muslim. The boldness with which he sang his mystical doctrine of the divine unity exposed him to persecution, and he is said to have been driven from Benares in 1495, when he was about 60 years of age, and to have died at Maghar, in the district of Basti, in 1518. Legend says that his Hindu and Muslim disciples disputed as to the disposal of his body, which the former wished to burn and the latter to bury; when they lifted the cloth that covered the body, they found in place of the corpse only a heap of flowers; of these, the Hindus burnt half in Benares, while the Muslims buried the rest at Maghar, where the shrine is still in the charge of Muhammadan Kabīr-Panthīs. Modern scholars, like Kabīr's contemporaries, claim him for one or other of the rival creeds: H. H. Wilson (*op. cit.*, pp. 69, 74) and R. G. Bhandarkar (*op. cit.*, p. 69) maintain that he was a Hindu; G. H. Westcott that he was a Muslim (*op. cit.*, p. 29 *sqq.*); G. A. Grierson's theory (*Journ. Roy. As. Soc.* 1907, pp. 325, 492) that he derived his opinions from Christian sources, may be dismissed as a pious fiction. A study of his poems makes it clear that he had no desire to attach himself to any organised religion: "Let me make self-reflection my saddle, And put my foot in the stirrup of divine love .... Saith Kabīr, they are good riders Who keep themselves aloof from the Vedas and the Ḳur'ān"; nor did he attempt to formulate any religious or philosophical system of his own, but he popularised the current Vaishnav teaching of his age, without however connecting it with any particular incarnation, and he spoke of God indifferently as Rām, Hari, ʿAlī or Allāh. He rejected the outward signs of Hinduism, e. g. the sacred thread, the distinctions of caste, the ritual observances of temple worship, etc., and his references to Muslim authorities and institutions (e. g. the Ḳur'ān, circumcision, pilgrimage, the Mullā, the Ḳāḍī etc.) are accompanied with a denial of their validity. He represented God as the omnipresent reality, but maintained the separate individuality of the human soul, which could attain union with God through love, not by knowledge or by ceremonial observances. Through his homely illustrations and his close contact with daily life, he presented his doctrines in a form readily acceptable to unlettered persons, who appear to form the majority of his followers.

(T. W. ARNOLD.)

KABĪRPANTHĪS (Hindī *panth*, a path, sect). Despite the non-sectarian character of Kabīr's teaching, his followers now form a distinct sect, the majority of whom are Hindus. The best account of their organisation is given by Westcott, *op. cit.*, chaps v. and vi. According to the Census of 1911, there were 597,199 in the Central Provinces, and 49,605 in the United Provinces; in the other provinces they either are not found at all, or their number is too inconsiderable to call for separate enumeration.

(T. W. ARNOLD.)

AL-ḲABĪṢĪ, whose full name was ʿABD AL-ʿAZĪZ (also ʿABD AL-RAḤMĀN) B. ʿOṮẖMĀN B. ʿALĪ, ABU 'L-ṢAḲR, an important astrologer probably of Persian descent. He was known to the Christian world of the middle ages as ALCABITIUS (also ALCHABITIUS). He lived for a considerable period at the court of Sulṭān Saif al-Dawla b. Ḥamdān (d. 356 = 969) and dedicated his principal astrological work to him: *al-Madkhal ilā Ṣināʿat Aḥkām al-Nudjūm* (Introduction to the art of Astrology) of which copies still exist in Oxford, Gotha and Cairo. It was translated into Latin by Joh. Hispalensis. This translation was printed in Venice in 1481, 1485, 1491 and 1521. The edition of 1485 is entitled *Libellus ysagogicus Abdilazi, id est servi gloriosi Dei, qui dicitur Alchabitius, ad magisterium iudiciorum astrorum. Interpretatus a Joanne Hispalensi*, Venetiis 1485. The edition of 1521 is called *Praeclarum Alchabitii opus ad scrutanda stellarum magisteria isagogicum*. A commentary on it was compiled by Joh. de Saxonia in 1331 and printed at Bologna in 1473, and again in 1485 and 1521 at Venice at the end of the editions of Alcabitius. Al-Ḳabīṣī also wrote several smaller astrological treatises. The dates of his birth and death are unknown.

Bibliography: A special article on this astrologer is given by al-Baihaḳī (c. 1150) alone among the Arab biographers, in his *Taʾrīkh Ḥukamāʾ al-Islām* (Ms. Leiden, 133*d*, Gol.), cf. E. Wiedemann, *Beitr. z. Gesch. der Naturwissensch.*, xx. 68; scattered notices are found in *Fihrist*, p. 265 (Art. *Buḳhdār*); in Ibn Khallikān (Cairo 1310), i. 365, transl. by de Slane, ii. 335; Yāḳūt, *Muʿdjam*, ed. Wüstenfeld, iv. 35. Cf. also H.

Suter in *Abhandl. z. Gesch. d. mathem. Wissensch.*, x. 60, xvi. 165. (H. SUTER.)

AL-ḲABḲ, DJABAL (DJIBĀL) AL-ḲABḲ or AL-ḲABḲ, as al-Ṭabarī, i. 2660, 15, 2664, 4, 2666, 16 and Yāḳūt iv. 31, 23 have it, and as should be read everywhere in al-Masʿūdī (ed. Paris) for al-Ḳabkh, is a name for the Caucasus, common in Muslim authors. Hübschmann, *Armen. Gramm.* (Leipzig 1897), i. 45 derives Ḳabḳ from Armenian *Kapkoh*, Pehl. *Kāfkōh*.

An older geographical conception regards this chain as belonging to the Ḳāf (q. v.) range which encloses the world (cf. B. Munkácsi, *Der Kaukasus u. Ural als "Gürtel der Erde"*, in *Keleti Szemle*, i. 236 *sqq.*). The name Alburz is no doubt connected with this idea, which Mustawfī, and apparently following him Kātib Čelebi, give to the Caucasus, while the name Ḳabḳ (*Djihānnumā*, *ḳ-y-t-ḳ*) is limited to its eastern (transl. p. 182 wrongly "western") side. Here the range appears to be considered the continuation of the North Persian mountain chain of the same name, with which also are associated notions of its being the boundary range of the world; (Cf. the article ALBURZ; F. Justi: *Beitr. zur alten Geographie Persiens*, i. 4 *sqq.*, ii. 4 *sq.*; Melgunof, *Das südliche Ufer des Kaspischen Meeres*, p. 27). To similar considerations is probably to be ascribed the fact that the Caucasus is connected with mountains which, beginning with Djabal al-ʿArdj between al-Madīna and Mecca (Ibn Khordādhbeh, p. 172 *infra sq.*; Ibn al-Faḳīh, p. 25, 7 *sqq.*, 295, 4 *sqq.*) or in Yemen (al-Hamdānī, *Djazīrat al-ʿArab*, p. 126, 25 *sq.*) run northwards through Arabia and Syria. The connecting of these mountains with Ḳāf led to the localisation in the Caucasus region of the rock, sea and village (Ḳurʾān xviii. 59 *sqq.*) known from the legend of Moses (Alexander) (Ibn Khordādhbeh, p. 124, 3 *sqq.*; Ibn al-Faḳīh, p. 287, 14 *sq.*; al-Muḳaddasī, p. 46, 16 *sq.*; Yāḳūt, i. 220, 22 *sq.*, 454, 3 *sq.*, iii. 282, 9 *sqq.*).

The Caucasus has further been regarded as the range beyond which dwell Yādjūdj and Mādjūdj (q. v.). The *al-Saddain* of Ḳurʾān xviii. 89, explained as "the two mountains", between which Dhu 'l-Ḳarnain caused a barrier to be built to check the inroads of Yādjūdj and Mādjūdj is identified with Armenia and Ādharbaidjān (al-Ṭabarī, *Tafsīr*, xvi. 121 *sqq.*; al-Baiḍāwī on Ḳurʾān xviii. 89). But when geographical knowledge was extended, Yādjūdj and Mādjūdj were placed further north.

The Sasanians in particular had closed the Caucasus passes with fortifications to prevent the inroads of the northern nomadic peoples. The most famous of these passes (cf. Ibn Khordādhbeh p. 123, 13 *sqq.*; Yāḳūt, i. 439, 2 *sqq.*) are Bāb al-Abwāb or Bāb Ṣūl or Derbend (q. v.) and Bāb Allān, the gate of the Alans, or the Darial pass.

The multiplicity of ethnic groups and languages in the Caucasus is mentioned by most Muslim geographers. According to an oft recurring statement, 70 (72) different languages are found there (Ibn al-Faḳīh, p. 25; al-Masʿūdī, ii. 2); according to al-Muhallabī's *Kitāb al-ʿAzīzī* (in Abu 'l-Fidāʾ), as many as 300. Wherefore the mountain ranges are also called Djabal al-Alsun "Mount of Languages" (Abu 'l-Fidāʾ, *Taḳwīm al-Buldān*, ed. Reinaud and de Slane, p. 71, 15 *sqq.*, 393, s. v. Tamīmasān, 405, s. v. Sarīr Allān).

For groups of peoples, states, and towns in the Caucasus the reader is referred to the separate articles and the literature given below. See the articles ABKHĀZ, ALLĀN, ARMENIA, ARRĀN, BĀKŪ, BARDHAʿA, DAGHESTAN, DERBEND, GANDJA.

KĀBUL. 1. A river of Afghānistān which rises near the Unai Pass in Lat. 34° 21′ N., Long. 68° 20′ E. and flows past the city of Kābul, near which it receives the Loghar River on the south and the Pandjshīr on the north. From the plateau of Kābul it flows by rocky passes to the lower valley of Djalālābād in which it receives the Surkhāb on the south and the Kunar on the north. It then passes through a gorge in the Mohmand hills into the Peshāwar District of British India near Michni. Here it divides into two branches, the northern one of which receives the Swāt R. Afterwards the branches re-unite. After a course of 316 miles the Kābul falls into the Indus near Aṭak.

It is the Skr. Kubhā, and is called Kōphēn and Kōphēs by Arrian and Strabo, Kōa by Ptolemy. The Kubhā was undoubtedly one of the Seven Rivers of the *Rigveda*. The Arab geogra-

phers call this river by various names. Al-Bērūnī speaks of the River Ghorwand which falls into the Indus below Waihand, the capital of al-Ḳandahār (i. e. Gandhāra). This name is taken from the Ghorband Pass near which the Pandjshēr River rises. Al-Mas'ūdī says "the fourth river of the Pandjāb comes from the country of Kābul and its mountains which form the frontier of al-Sind". The modern name of the river in Pashto is Sind, (also a general term for "river"). Bābur speaks of the Sind river as rising in a mountain to the west of Kābul, and no doubt alludes to the Kābul R., though elsewhere he applies the name Sind to the Indus. The name Kāma given by Elphinstone (Appendix on Rivers) appears to be a misnomer, as Kāma is the name of a tributary only.

The town and district of Kābul seem to have taken their name from the river.

2. An important city, now the capital of Afghānistān, situated in 34° 30' N. 69° 13 E. 5780 ft. above sea-level, in a fertile and well watered plateau. Population about 150,000.

Although the Kābul River under various names [q. v.] is known from the earliest times, there is no mention of any town which can be identified with Kābul. Ptolemy's Karoura has been supposed by some to be Kaboura, and the people he names Bolitai are conjectured to be properly Kabolitai or people of Kābul, but these guesses rest on no evidence. Kōphēnē is probably the name of the whole valley derived from the river Kōphēn.

This territory was reoccupied by the Bactrian King Demetrios and formed a Greek kingdom until about the commencement of the Christian Era. The Parthian Gondophares seems to have held it for a time and the Kushan invaders were in possession of it during the 1st century. A vase bearing an inscription of King Huvishka has been found at Wardak near Kābul. Buddhism was the religion at this period. The Kushans were supplanted by the Ephthalites for a period, but some branches of the race seem to have recovered power afterwards, and held it when Hiuen Thsang passed through in 657 A. D. Kao-fu is the name given to Kābul by the Chinese at this period. Buddhism was gradually replaced by Brahmanism, and this was the religion of the later Kushan kings, known by the title of Shāhi, who, as we learn from al-Bērūnī, were superseded by their Brahman wazīrs, probably about the time of the first Muhammadan invasions. It is probable that after the first invasions the Hindū kingdom of Gandhāra was ruled from its capital Udabhanda (or Waihand) on the Indus, and extended to the foot of the mountains west of Djalālābād, but did not include Kābul proper, which continued as a separate principality under its own Shāh, sometimes under Muhammadan influence and sometimes independent, till Sabuktigin's time. By the earliest Arab chroniclers the country as a whole is termed Kandahār i. e. Gandhāra, which has often been mistaken for the town of Kandahār. Thus Ṭabarī tells us that under 'Omar in the year 23 'Āṣim b. Amr and 'Abd Allāh b. 'Omair pressed on through Sīstān as far as the Indian frontier and Ḳandahār. The town of Kābul is not distinctly mentioned, the Kābul Valley and the adjacent Kōhistān up to the Hindūkush passes being described as the country of the Kābul-Shāh and the capital as an inaccessible mountain fort of an uncertain name (read Ghurwas by Le Strange). Ya'ḳūbī says that it was conquered under 'Othmān by 'Abd al-Raḥmān b. Samura, but when he wrote it was known only by the export of the Chebulic (or Kābulī) myrobalans. Another expedition followed in Mu'āwiya's time, and again in 176 (793) under Hārūn al-Rashīd an army from Balkh invaded the valley from the north via the Bāmiyān Pass. There was another invasion in the time of al-Ma'mūn, which led to the submission of the Kābul-Shāh and his acceptance of Islām. These expeditions seem to have led to a nominal submission and acceptance of Islām but there seems to have been no actual occupation before that of the Ṣaffārīs in 257 (871). Pandjhīr with its silver mines was no doubt a powerful attraction and coins were struck there by Ya'ḳūb b. Laith. But it cannot be said that the name of Kābul applied to any particular town until later, and in any case it was not an important centre. It may be noted that the attack made by Ya'ḳūb b. Laith was from the north by way of the Hindukush passes, and not by the more obvious route from Sidjistān, by way of the Arghandāb Valley and Ghazna. The ruler of Kābul at this period is described as a Turk by race and a Buddhist by religion, and it is probable that he was a successor of the later Kushan [cf. AFGHĀNISTĀN, i. 161].

It was never a mint town before the time of the Mughal Emperors. Coins were first struck there by Bābur [see art. BABER]. Throughout the rule of the Ghaznavids [q. v.] and Ghōrids [q. v.] Ghazna was the capital. Al-Idrīsī mentions Kābul as a large Indian city on the border of Ṭukhāristān, and adds that no ruler could take the title of Shāh till he had been inaugurated at Kābul. His information was probably derived from authorities much earlier than his own period, when the kingdom of the Shāhis had long ceased to exist.

It seems probable that the frequent destruction of Ghazna led to the rise of Kābul and after Tīmūr's time it became the centre of a principality under some members of his family. After the death of Abū Sa'īd [q. v.], his son Ulugh Beg obtained possession of Kābul and held it till his death. His son was expelled by Muḳīm, a son of Dhu 'l-Nūn Beg Arghūn, who in his turn was driven out by Bābur in 910 (1504). This formed the foundation of Bābur's Indian empire, and even when his son Humāyūn was driven out of India, Kābul was not lost by the family, but was held first by Kāmrān and afterwards by Humāyūn himself till India was recovered. Bābur was fond of Kābul, and gives an enthusiastic description of its climate, its streams, its fruits and flowers. After his death at Agra his body was brought to Kābul and his tomb still exists in a garden laid out by himself near the town. From this time the history of Kābul is bound up with that of the Mughal Empire of India. It became a mint for gold, silver and copper, and coins of most of the emperors are found up till the time of Muhammad Shāh. In 1738 it fell into the hands of Nādir Shāh, and although a rupee of the emperor 'Ālamgīr II was struck there after Nādir Shāh's death, it never again belonged to the empire, but was very soon taken by Aḥmad Shāh Durrānī [q. v.]. It soon superseded Ḳandahār as capital of the Durrānī dominions, and has continued to hold that position under Sadozais and Barakzais till the present day. [For history see under art. AFGHĀNISTĀN, i. 169b sqq.]. The town grew in prosperity as the capital of an important kingdom, although it suf-

ered much during the various wars, especially those between 1839—1842 between the Sadozais and Barakzais, in which the British army of occupation took part, and in the civil war between Shēr ʿAlī and his brothers. Under ʿAbd al-Raḥmān Khān [q. v.] and Ḥabīb Allāh the town has been improved and good roads and bazaars constructed. The Bālā Ḥiṣār or old palace citadel on a rocky hill has been dismantled, the upper part has become an arsenal. A new fortified palace known as the ʿArk was built by ʿAbd al-Raḥmān outside the town between Shērpūr and ʿĀlamgandj.

In addition to the tomb of Bābur mentioned above, the tomb of Tīmūr Shāh Durrānī is also near Kābul.

3. Kābul is also the name of the province in which the capital is situated. It is bounded on the north by Afghān Turkistān, on the west by Herāt, on the south by Ḳandahār and on the east by Djalālābād. It includes the Paghmān Mts. to the north-west and the Hazāradjāt in the south-west. Ghazni is comprised in its limits, and the boundary between Kābul and Djalālābād is at Djagdalak.

ḲABŪL (A.). Acceptance of the offer (in contracts); see IDJĀB.

ḲĀBŪS b. WASHMGĪR, SHAMS AL-MAʿĀLĪ, ABU ʾL-ḤASAN, nephew of Mardāwīdj b. Ziyār and fourth ruler of the Ziyārid dynasty (his genealogy is given by his grandson, Ḳābūs Unṣur al-Maʿālī in his preface to the *Ḳābūsnāmah*). Called to the throne by a military conspiracy, in 366 (976) he succeeded his brother Ẓahīr al-Dīn Bahistūn as ruler of Djurdjān and Ṭabaristān. When the Būyid Fakhr al-Dawla [q. v.] had quarrelled with his brother ʿAḍud al-Dawla [q. v.] and the latter deprived him of his whole kingdom in 369 (979/80) Fakhr al-Dawla took refuge with his father-in-law Ḳābūs. As the latter declined to hand him over to the victor, ʿAḍud al-Dawla sent a force against Ḳābūs who after a defeat at Astarābād in 371 (981/2) fled with his protégé to Nīshāpūr to Ḥusām al-Dawla, governor of Khorāsān under the Sāmānid Nūḥ b. Manṣūr. The latter sought to conquer Ṭabaristān for himself, but Ḥusām was defeated. On the death of the Vizier, Abu ʾl-Ḥusain al-ʿUtbī, Ḥusām was summoned to Bukhārā to succeed him and took Fakhr al-Dawla and Ḳābūs with him. Soon after the death of ʿAḍud al-Dawla at Baghdād (373 = 983) Fakhr al-Dawla gradually reconquered Djurdjān and Ṭabaristān and wished to restore them to Ḳābūs but was persuaded by his vizier Ibn ʿAbbād al-Ṣāḥib [q. v.] to keep them for himself. After the death of Fakhr al-Dawla however Ḳābūs regained his inheritance after seventeen years' exile in 388 (998) and held it till in 403 (1012) his tyranny and the many executions ordered by him produced a rising of the troops, who deposed him and put on the throne his son Minočihr, who was summoned from Ṭabaristān. Soon afterwards he was put to death by the rebels in the fortress of Djenāshk between Djurdjān and Astarābād by being deprived of his clothes, while engaged in his religious ablutions, and then allowed to perish of cold. He was learned in several branches of knowledge, particularly astrology, and left several short treaties (*rasāʾil*) as well as Persian and Arabic poems. He was also a distinguished calligrapher. The poets Abū Bakr Muḥammad b. ʿAlī of Sarakhs and Ziyād b. Muḥammad of Djurdjān sang his praises (Muḥammad ʿAwfī, *Lubāb al-Albāb*, ii. 18, 19).

KABYLIA, a mountainous country in the Algerian Tell. The name Kabylia or land of the Kabyls (Arab. *Bilād al-Ḳabāʾil*) is of comparatively modern origin; it is not found in the Arab historians or geographers, nor is it usual among the natives. It seems only to have been introduced as a geographical name by European scholars since the sixteenth century. The name Kabyle is taken from the Arabic *ḳabāʾil*, plur. of *ḳabīla*, "tribe", which some Arab writers use as a synonym for Berbers; this is found as early as the author of the *Kirṭās*, who several times (e. g. p. 217 and 238 of the Arabic text), in detailing the contingents of troops in the Marīnid armies, carefully distinguishes the Kabāʾil from the Arabs.

The European geographers sometimes give the name Kabylia to the whole mountain system of the Algerian coast from the mouth of the Isser to the Tunisian frontier. These elevations show in fact several common characteristics: predominance of the older strata with a few less extensive chalk zones intervening, an irregular outline, a striking development of forest flora, a population consisting of settled tribes who for the most part have retained their Berber dialects. According to the different mountain ranges, Kabylia is divided into the following fairly well defined areas: Great Kabylia or Kabylia of the Djurdjura, Little Kabylia or Kabylia of the Babor mountains between the Summam in the west and the Wād al-Kabīr in the east, Kabylia of Collo, Kabylia of the Djebel Edugh and Kabylia of Bōna. The first named of these areas is the most extensive and has the most marked character; it is therefore called Kabylia by preference and we shall deal with it alone in the following.

Great Kabylia is bounded on the north by the Mediterranean from the mouth of the Wād Būdūāu to Bougie, i. e. for a length of 100 miles. In the east it is bounded by the valley of the Wād Sāḥel (called Summam in its low course) and by the upper course of the Isser, in the west

by the valley of the Wād Būdūāu and the Mitīdja plain. The area thus included measures about 41 miles from N. to S. between Dellys and Bwīra (Bouira) and covers some 2307 square miles. Access is rather difficult except from the west. Here the gateway of Ménerville (pass of the Beni 'Ā'isha 450 feet high), the valley of the lower Isser, the depression of the Wād Shander and the pass of Haussonvillers (600 feet) afford an easy access to the Sebau plain, i. e. the heart of Kabylia.

Kabylia falls into three separate areas very different from each other: the Kabylian mountains in the narrower sense, the Djurdjura chain and the coast range. The Kabylian mountains "consist in the centre chiefly of gneiss and micaceous schists with larger or smaller intrusions of granulitic rocks and, on the flanks, of archaic schists and primary argillaceous schists, the layers of which form the outer spurs with their gentler slopes. In the west of these mountains and separated from the main group by tertiary deposits rise several isolated rocky peaks: Bū 'Arīs, the massif of the Khashna (2050 feet), the Djebel Belūwa (2310 feet) north of Tizi Uzū". The Kabylian massif is connected as it were by an isthmus with the central part of the Djurdjura and cut off on the other sides by a continuous depression, in the north by the valley of the Sebau, as much as 11 miles broad, in the west by the valley of Dra' al-Mīzān and in the south by the depression of Bughni. The whole system, sloping from west to east (from 4225 to 1950 feet) is divided by deep and narrow valleys into mountainous blocks (hills of the Ma'atka, the Fliesa and of the Zwāwa, etc.).

The Djurdjura forms in the south the edge of the Kabyl massif for about 40 miles from Tizi (Berber = pass) Djabūt (3850 feet) to Tizi-n'Shria (4010 feet). It consists of lias limestone, split up into a series of sharp combs or steep rocky walls, and maintains an elevation of a little over 6500 feet. The highest summits, which run in two rows, are the Haizer (6955 feet) and the Akukar (7490 feet) in the north and in the south the Lalla Khadidja (7500 feet). This altitude and the scarcity of the passes, which are impassable in the winter (the most important is the Tirurda Pass (8655 feet), make traffic between the two slopes very difficult. In the east of the Djurdjura proper, in the Djebel Arbala, there reappear scattered layers of limestone, running down to the sea where they end in the Gūraya of Bougie.

At a lower elevation (2600—3900 feet) the coast range stretches along the sea-coast from the mouth of the Sebau to the Djebel Akfadū and covers the greater part of eastern Kabylia with its sandstone formations.

From this variation in elevation and geological structure result marked differences in climatic conditions. In the valleys, notably in the basin of the Sebau, cut off from the sea by the coast range, the summer is very hot (mean July temperature in Tizi Uzū 35° C.). In the Kabyl mountain country on the other hand there is a long cold winter, during which the ground is often continually covered with snow, which lies on the summits of the Djurdjura from December to June. The rainfall is unevenly distributed — being particularly heavy in the east of the district where it averages 40 inches p. a., while the lowlands, notably that of the Wād Sāhel-Summam, which is sheltered from the moist winds by the wall of the Djurdjura, are relatively dry. Nevertheless Kabylia is one of the best watered areas in Algiers. Four river-systems are distinguished: — the Isser, the Wād Sāhel Summam, the coast rivers, and the Sebau. The latter collects the water from the north slope of the Djurdjura, supplied by tributaries, flowing at the bottom of narrow valleys cut through the Kabylian mountains. None of all these water-courses is navigable; they are all mountain torrents and are liable to considerable variations in their amount of water. The winter-rains and the melting of the snow produce a considerable, often devastating, increase in their volume.

Lying within the so-called Numidian zone which is marked by luxurious forests, Kabylia does not have the treeless appearance of most Algerian landscapes. The flint and sandstone formations of the eastern part support great wooded mountains (Yakūren, Tizi Ufella, Akfadū etc.) which are covered with different kinds of oaks such as the cork, the *zān* (*chênes zéens, quercus Mirbeckii*), the *afares* (*quercus castaneofolia*) and *ballūṭ* or hazelnut oak. Several cedar plantations, which however are on the verge of extinction, cover the slopes of the Djurdjura up to a height of 5900 feet. Trees are especially cultivated in the Kabyl mountains where they afford the inhabitants the greater part of their resources. The leaves of the ash-trees are used to feed the cattle, while its wood is used for agricultural and domestic implements and vines sometimes cluster round their stems. The fig and olive trees, the first of which is grown up to 3250 feet and the latter to 1950 feet, play an important part in the life of the Kabyls. Dried figs and oil form the basis of the food of the population; the superfluity is sold abroad. These fruit trees are therefore cultivated with the greatest care and in increasing numbers, so that we find fig and olive trees even on almost inaccessible slopes, where the soil has to be supported by mortarless stone walls. Vegetable fields and orchards surround the houses and villages and their produce serves to supply the daily wants of the inhabitants. Wheat is grown only on the low-lying ground and as a rule only in the districts settled by Europeans. As the scarcity of meadows hardly allows cattle to be reared, the native stock consists of a few cattle and sheep and a large number of goats. The mule is the only suitable beast of burden for this mountainous region.

Kabylia is the most populous part of Algeria as it has about 660,000 inhabitants or 230 to the square mile. The population however is very unevenly distributed. Scattered in Djurdjura, comparatively thin in the forest region, it is however very dense in the Kabylian mountains where the soil of the nature and abundant springs afford more favourable conditions for human settlements. The mixed community of Fort National and that of Djurdjura number, the former 61,728 to 145 miles, the latter 66,353 to 125 miles that is about 418 and 530 to the square mile or about the density of population in Holland. The natives live in groups in villages, sometimes up to several thousand in one village. These settlements lie on the hill-tops or on the mountain ridges which separate the valleys from one another. The choice of site was settled by consideration for the most profitable use of the arable part of the slopes and also for the necessity for securing a defence

against neighbouring tribes. Surrounded by a belt of gardens protected by cactus hedges and encircling walls of stone without mortar, accessible only by steep paths, these villages were really fortresses, sometimes impregnable to an opponent unless provided with artillery. Since however the French occupation guarantees the peace of the land, the natives show a certain tendency to leave the summits and move their dwellings nearer to the valley. In spite of the picturesque appearance which the closely huddled together white houses with their brown tiles make, these villages are in reality only piles of wretched dirty hovels. Most of the houses consist of one storey only and have neither windows nor chimney. As a rule they are divided into two by a wall breast high, of which one part is for men and the other for cattle. The very scanty furnishing consists chiefly of mats, which take the place of bedding, and stone vessels, which hold the family provisions. The groups of houses are separated from one another by narrow passages, which are just broad enough to allow a loaded mule through and are encumbered with dung and rubbish. The only public building is the mosque which, only recognisable by its minaret, is in almost as miserable a condition as the private dwelling houses. As there are no shops in the village where the natives could make their necessary purchases, they have to go to a market (*sūḳ*) which is held weekly at a definite place, usually in the neighbourhood of a river or spring. This market has a great attraction for the Kabyls as they come to it not only to purchase food and other necessaries but also to meet the inhabitants of other villages and learn what is going on. The market usages have therefore been very strictly regulated. The market formed a neutral area, visitors to it enjoyed a special protection called "*'anāya* of the market".

The Kabyl population is increasing steadily and rapidly, but the soil, which is of only average fertility, in spite of the aptitude of its inhabitants cannot support them all. The once flourishing native industries such as weaving, making carpets, ornaments, and arms (especially among the Flissa and the Banī Yenni) are disappearing more and more before European competition. The natives thus find themselves forced to leave their native land and seek work outside it, as moreover they used to do in earlier times also. Under Turkish rule hill dwellers used to come in considerable numbers to Algiers to gain a livelihood as servants, porters or gardeners. Others, notably the Banū Yaḥyā, the Banū Ilīten and the Banū 'Aṭṭāf went about among the Arab tribes as pedlars (*i'aṭṭāren*) and combined money-lending with commerce, as their descendants still do. The French conquest and the expansion of colonisation have opened new outlets for the industry of the natives. While they work in the coast towns as bricklayers, hodmen, and dock labourers, the Kabyls at the same time supply the farmers of the Tell of Algiers and Constantine with the labour so necessary for the harvest and vintage. They also readily labour on public works as well as in the mines of Algeria and Tunisia and for some years past in those of France also. Others again enlist in the native regiments, especially the *tirailleurs*. But the Kabyl's emigration is only temporary; — as soon as the pedlar, the agricultural labourer or the miner has saved a little capital, he returns to his village to buy a strip of land or at least a few trees at the earliest opportunity. The impulse to acquire property is very strong in them and the land is thus broken up into very small shares.

The Kabyls form the most important and at the same time the most compact Berber group in all Algeria. Yet they cannot be regarded as absolutely pure descendants of the old African race which inhabited North Africa before the foreign conquests and the immigrations of the historical period. The very formation of the country made it a place of refuge for the inhabitants of the plateaus and valleys, who were pushed back by the continual inroads of foreign peoples into North Africa. In addition, as Hanoteau points out, Kabylia was at all times an asylum for outlaws and evil doers. The present Kabyl type is therefore the result of numerous crossings and far from being homogeneous. Many individuals can hardly be distinguished from Arabs, others and indeed the greater number, with their large bones, their square heads and their coarse features resemble the peasants of Central France. As to the colour of their hair, two types can be distinguished, the brown and the much rarer blonde. Yet in spite of these differences, the natives of Kabylia have all the linguistic, social and religious peculiarities common to all the tribes described as Berber. They talk different Berber dialects, of which the Zwāwa spoken in Djurdjura and in the Kabyl mountains is the commonest. "The Zwāwa, especially the Banū Raten, are those who, owing to their isolation, are considered to have preserved the purest Berber dialect; this gradually changes by almost imperceptible degrees as one goes westward into the dialect of the Aït Khalfūn and eastward into the dialect of the Wād Sāhel (Wādī Sāḥil) and that of Bougie". (R. Basset, *Étude sur les dialectes Berbères*, Paris, 1894, Introd., p. viii.). The linguistic frontier even crosses the geographical boundaries of Great Kabylia and follows the watershed between the basin of the Wād Bū-Sellām and that of the Wād al-Kabīr. The persistence of these dialects is all the more remarkable as the French occupation, the extension of Muslim as well as European education and finally the continual development of emigration seemed likely to bring about a rapid decline in the use of Berber. Although many natives have a more or less superficial knowledge of Arabic and French, Kabyl is nevertheless still the language of the home, and the only language used by the women and children in the villages. In many districts a decline in Arabic has been noted. In the arrondissement Tīzī Uzū, for example, several Arabic speaking groups comprising some 18,400 persons have become completely berberised in the last few years (E. Doutté and E. F. Gautier, *Enquête sur la dispersion de la langue berbère en Algérie*, Algiers 1913).

The Kabyls possess no written literature but have a fairly varied and copious popular literature (songs, often inspired by current events, fairy tales, riddles, etc.). These productions, composed by illiterate people, often women, have been handed down by oral tradition and transmitted from village to village by wandering singers whose profession is often hereditary. Some of these singers (*meddāḥ, fāṣiḥ*) who sang the praises of the Deity, the feuds of the tribes and the heroic deeds of the warriors, were held in high esteem by their

countryman; others again who sang songs of love or humour to the accompaniment of the tambourine or the oboe were as despised as the butchers, measurers of corn and other individuals, who followed a trade regarded as degrading.

As Muslims, the Kabyls, like the other Berber tribes, adopted the creed without recognising the Ḳur'ānic system of law (see BERBERS, i. 702). Their customs are in many points contrary to orthodoxy. Lending money at interest, condemned in the Ḳur'ān, is generally allowed. "The acceptance of the principle that money is to be considered as goods", writes Hanoteau, "is a characteristic feature of Kabyl society which in order to remain true to its traditions has not shrunk from showing its contempt for the punishment of exclusion from the Muslim community, threatened as a punishment for usury". (Hanoteau and Letourneux, *La Kabylie et les coutumes kabyles*[2], ii. 497). The social and material position of women is far behind that assured her by Muslim law. Woman has no civil rights, being continually in tutelage; excluded from participation in the paternal inheritance, she herself is one of the family chattels. Marriage is merely an act of purchase. The man who divorces his wife still remains her owner and he fixes the price which must be paid him before she can marry again. Polygamy is legal but little practised and only a few marabouts are rich enough to afford it. The position of woman thus appears a very miserable one; she is, according to Hanoteau, "a human chattel" (*Poésies populaires de la Kabylie du Jurjura*, p. 287). In practice, however, it appears that her position is easier than one would expect from the rigour of customary law. She holds an important place in the family and even in the villages, and, according to some authors (Rinn, Masqueray, Boulifa), she exercises a by no means negligible influence in domestic life and even in political life.

In spite of the liberties they take with orthodoxy, the Kabyls are not, as is sometimes alleged, lukewarm Muslims. They have always been and still are to-day very susceptible to the influence of fanatics. Perhaps they, at one time, like many other Berber groups, embraced Khāridjī doctrines but they were regained for orthodox Islām at the beginning of the modern era and have since then remained steadfast in their faith. Their ignorance, it is true, leaves them defenceless against the incitements of marabouts. The latter held and still hold a special position in Kabyl society. Enjoying numerous privileges (exemption from taxation, entertainment allowances etc.) they were not expected to bear arms except in the holy war and, thus placed outside tribal wars and quarrels of the *ṣoff*, they kept for themselves the fruitful roles of intermediaries and peacemakers. The only representatives of education in the midst of an illiterate population, they gave the rudiments of instruction in the village schools and in the schools attached to the *zāwiya*, a word which among the Kabyls means a village exclusively inhabited by marabouts. Education in these schools (Kabyl *thimammert*, Arab. *maʿmera*) is confined to the elements of Arabic language and grammar, theology and law. The marabouts live either scattered among the people or grouped in families or tribes. Some claim for themselves an Arab or even Sharifian origin. These Sharīfs form a privileged caste and only marry among themselves. At all periods the part played by marabouts — male and female — has been considerable. It was they who stirred up the native resistance to the foreigners, Turk or French, who tried to conquer them. They were supported by the religious orders, of which the largest is that of the Raḥmānīya, which originated in Kabylia itself. Its founder was the marabout Sīdī Muḥammad 'Abd al-Raḥmān Bū Ḳobrain, sprung from the tribe of the Aït Smā'īl, who lived from 1126—1208 (1715—1798). Recruited at first from the Guechtūla, a confederacy of which the Aït Smā'īl were part, the order gradually extended throughout Kabylia. Its chiefs were the fiercest opponents of the French in 1857 and in 1871; although its influence has declined, the brotherhood of the Raḥmānīya, of which the parent lodge is at Akbū, is still that which numbers most adepts (9000 members and 43 *zāwiya* in 1897, according to Depont and Coppolani, *Les Confréries religieuses du Maghreb*).

History. Practically nothing is known of the history of Kabylia before the xvith century A. D. There are no native chronicles and the notices supplied by Arab, Latin or European writers are few and fragmentary. The characteristic fact of Kabyl history during this long period seems to have been the resistance of the Kabyls to foreign penetration. In ancient times even the Romans did not succeed in establishing themselves in the massif. Their principal settlements Saldae (Bougie) Rusazus (Tigzirt), Rusucurru (Dellys) were situated on the coast. Military posts kept a watch on the valley of Wād Sāhel and of the Isser, but the Djurdjura (Mons Ferratus) remained practically independent under the rule of native chiefs, vassals of Rome. The inhabitants of the mountainous region formed the confederation of the Five Nations or Quinque Gentes: — the Massissenses (perhaps the Malsna of the Wād Sāhel), Isaflenses (Iflissen?), Jubaleni (Beni Jubar), Toudenses and Jesalenses. These natives rose in revolt several times, notably in the first century A. D., during the rebellion of Tacfarinas, then again in the time of Diocletian. From 288—297, they ravaged eastern Mauretania and western Numidia. To subdue them, Maximian had to deport them *en masse*. In the following century they adopted Donatist doctrines and again took up arms under their national leaders, Firmus (372—375 A. D.) and later Gildon.

We do not know at what period and under what conditions, Islām was introduced into Kabylia, taking the place of Christianity and paganism. We may, however, conjecture that this land must have for some time escaped the Arab conquest and served as a place of refuge for the last remnants of Roman and Byzantine population as well as for the Berber tribes fleeing before the invaders. In the ixth century however, the conversion to Islām was an accomplished fact, since Ibn Khaldūn (*Hist. des Berbères*, transl. de Slane, i. 256) mentions the Zwāwa at the same time as the Kutāma among the partisans of 'Obaid Allāh and the founders of the Fāṭimid empire. Well treated by the Ṣanhādja Zīrids, the Kabyls then passed under the rule of the Ḥammādids, who reduced to obedience the mountain peoples of the Bougie region, and then under the sway of the Ḥafṣids. But Ibn Khaldūn himself says that the authority of the sovereigns of Bougie over the Kabyl tribes was quite nominal [cf. ISSER, ZWĀWA].

At the beginning of the xvith century, the people of Kabylia were divided into three political groupings called by western writers, the kingdom of Kūko, the kingdom of Labbès, and the principality of the Beni Jubar. The kingdom of Kūko stretched from Djurdjura to the sea, and through the port of Azeffūn was in touch with European countries. The kingdom of Labbès comprised several tribes of little Kabylia of which the most important was that of the Beni ʿAbbās in the east of the Wād Sāḥel [cf. the article ḲALʿAT BANĪ ʿABBĀS]. The principality of the Beni Jubar comprised the population of the coast east of Bougie. The Turks who appeared in Algeria at the same period and there founded a powerful state, relied on these different groups in turn. ʿArūdj contracted a close alliance with the Sulṭān of Kūko, Aḥmad b. al-Ḳāḍī, who gave him auxiliaries and took part in the expeditions against Algiers and Tlemcen [see ʿARŪDJ], but he thereby alienated the Sulṭān of the Beni ʿAbbās, who took the side of the Spaniards. After the death of ʿArūdj, Ibn al-Ḳāḍī quarrelled with his successor Khair al-Dīn [q. v.]; he inflicted a bloody defeat on him on the land of the Flissat Umellil and remained for several years master of Algeria and of Mitidja. An alliance with the Beni ʿAbbās enabled the Turks to regain the advantage. Pursued right into their mountains, the Kabyls were forced to submit and to pay tribute. During the period of the Beylerbeys, the inhabitants of great Kabylia lived on good terms with the Turks. Khair al-Dīn and his successors recruited from among the Zwāwas soldiers whose fidelity they appreciated and on whom they could rely if necessary against the undisciplined soldiery of the Janissaries. The alliance with the Sulṭān of Kūko enabled Ḥasan b. Khair al-Dīn to triumph over the Sulṭān of Labbès who became in his turn a tributary of the Turks (1559). As to the ʿAbd al-Djabbār, they had shown themselves friendly to the Spaniards and after the reoccupation of Bougie by the Turks never ceased to wage war on its garrison.

The rulers of Algiers did not however succeed in definitely imposing their supremacy on the Kabyls. The latter during the closing years of the xvith century and during the whole of the next century, were in a state of almost permanent insurrection against the Turks. The expeditions undertaken by the Pashas to chastise the rebels yielded no permanent result. The conquered tribes agreed to pay tribute but cast off the obligation as soon as the Turkish columns had quitted the country. In the course of these struggles, important changes modified the political organisation of Kabylia. The kingdom of Kūko disappeared and was replaced by the confederation of the Zwāwa. A new confederation that of the Guechṭūla (Igūshdal) was founded in the middle of the xviith century by a shaikh named Gassem and united together the population of the western part of the Djurdjura. In the xviiith century, the Turks made some progress. They succeeded in taking the mountainous region between the Wād Bugdura and the Wād ʿAīsī (1745—46) but could not subdue the Banī Rāten. Their military posts at Bughnī, Sīwīra, Burdj Sebau were destroyed on several occasions. The first years of the xixth century were still more unfortunate. The Flissa invaded Mitidja several times; in 1816 the Guechṭūla seized the burdj of Bughnī and only spared the garrison at the intervention of the marabouts.

Turkish authority in Kabylia was therefore up to the end very precarious. The tribes which recognised it were distributed over two ḳāʾidats: the ḳāʾidat of Bughnī, which included the confederations of the Guechṭūla, the Banū Saʿadḳa and a part of the Maʿatka, and the ḳāʾidat of the Sebau, including, besides the town of Dellys, the Banū Khalfūn, the Banū Waguennūn, the Flissat al-Baḥar, the peoples of the upper Sebau and those of the Wād al-Ḥammām. In the north-east, finally, the Turks occupied Bougie. To maintain order and collect taxes, the ḳāʾids had at their disposal a few hundred janissaries installed in fortified posts (burdj), and zmala's, of which several were composed of negroes (ʿabīd). They levied taxes — which were however quite light — on the produce of the plain, collected dues in kind (sheep, grain, figs & oil) for the use of the garrisons, claimed the right of investiture of shaikhs and granted for a fee passports to natives, etc. In return the Turks interfered very little in local affairs and only did so when they thought they could make profit out of it. The most efficacious means employed by them to bring recalcitrant tribes to order was the blockade. As the country did not produce enough grain to feed its inhabitants they were not long in submitting. The Turks, moreover, observed local divisions with the greatest care and showed themselves full of consideration for influential marabouts, to whom they gave exceptional privileges. They heaped gifts on their zāwiya's and built ḳubba's on the tombs of the most venerated saints. Turkish rule therefore has left no feeling of hatred among the Kabyls. "The Turk", says Hanoteau (*Poésies populaires de la Kabylie du Jurjura*, p. 63—64 note), "is the type of bravery and dignity in the popular songs; when the poet wants to praise one of his compatriots, he compares him to a Turk".

Whether nominally subject to the Turks or completely independent, the Kabyl tribes preserved intact their political and administrative institutions. Kabylia, far from forming a state, was simply an aggregation of little municipal republics, grouped in confederations of small size. The political and administrative unity was the village (*thaddarth*), whether a single village or a union of several hamlets (*ṭūfā*) and subdivided again into divisions called by different names in different districts (*adrūm*, *tharift*, *takherrūbt*, *kharūba*). Several villages bound together by mutual obligations formed a tribe (*ʿarsh*). At the time of the French conquest there were 1400 villages divided among 120 tribes. A confederacy of several tribes was called a *thaḳebilt* (Arab. *ḳabīla*). The chief of these confederations were those of the Guechṭūla, the Aīt Sedḳa, the Zwāwa, the Eastern Zwāwa, the Aīt Irāten, the Aīt ʿAīsī, the Maʿatka, the Flissat Umellil and the Flissat al-Baḥar (Iflissen), the Aīt Waguennūn, the Aīt Djennād, the Aīt Ghobrī, etc.). In certain cases several confederations could unite for some common defensive or aggressive purpose, but such leagues had never more than a temporary character. All tribes however were not grouped into confederacies and some were content merely to contract, when in case of need, temporary alliances with their neighbours.

The village, the fundamental element in the

Kabyl organisation, was a kind of municipal republic subject to the authority of the assembly of its citizens (*thajemait*, Arab. *djamā'a*), which had most extensive powers. It appointed a president (*amokrane*, *amrar*, *amin*), who was charged with carrying out its decisions, and *temman* (plural of *tamen*), a kind of assistants, who had to support the *amin* in the exercise of his duties. The *djamā'a* fixed the quota and the apportionment of taxes, declared war, made peace, administered public charity and, lastly, modified, if necessary, local customs. All male inhabitants old enough to observe the fast of Ramaḍān took part in the assembly and were bound to be present, but in practice decisions were made by a minority of rich and influential persons, so that the government of the village was only democratic in theory. The authority of the *djamā'a* was, besides, limited by the obligation under which it found itself, to respect the rights of individuals or families, individual or collective guarantees sanctified by long custom, market-laws, etc. The tribe and the confederacy were organised on the model of the village, with deliberative assemblies and *amin*'s, but the bonds which united such groupings became more and more slack as the groups increased in size. There were frequently serious dissensions within these groups. The existence in the smallest village of *ṣoff*, that is to say, parties supporting the interests of influential personages, the exercise of the right of private vengeance (*rekba*) or of the right of reprisals (*nefqa*), the care taken to make respected the *'anāya* of individuals or of the community, provoked continual conflicts, which the intervention of the marabouts settled with great difficulty. The relations of the tribes and confederations were hardly more satisfactory than those of the villages with one another. Kabylia was, in a word, handed over to anarchy and there was a permanent state of war there.

The capture of Algiers by the French in 1830 put an end to Turkish rule. On hearing of this event, the garrisons retired to the Titteri, leaving the country to itself. The Kabyls, however, proved themselves no more able to unite than they had in the past. Various chiefs, Ben Sālem of the Banū Djād, Ben Zamun of the Flissa, Sī Djīlālī of the Zwāwa, Belkāsim or Kasi of the Amrāwa disputed for the supremacy with one another, but did not succeed in imposing themselves on all the tribes. 'Abd al-Ḳādir himself was no more fortunate [see 'ABD AL-ḲĀDIR, i. 43 *sq.*]. He appointed a *khalīfa* of the Sebau, but could not get himself recognised as Sulṭān by the tribes of the Djurdjura, who refused to pay him taxes as they had refused to pay them to the Turks. He was even nearly massacred by the people of Wād Sāḥel in 1839. The French, for their part, had been in occupation of Bougie since 1833, while the Kabyls of the east made frequent incursions into the Mitīdja. To dispose of such dangerous neighbours the government therefore decided to conquer Kabylia at a time when 'Abd al-Ḳādir seemed definitely reduced to impotence. A first expedition conducted by Bugeaud in the valley of the Sebau resulted in the submission of the Flissat al-Baḥr and the occupation of Dellys (1844). Interrupted by the Franco-Moroccan War, then by the struggle with 'Abd al-Ḳādir, who in 1849 again tried to raise the Kabyl tribes, operations were resumed in 1847 and brought the tribes of Wād Sāḥel to recognise French authority. But the Kabyl massif and the Djurdjura served as an asylum for all malcontents and continued to be a smouldering fire of rebellion, which was continually blazing out again. In 1849, the Zwāwa, the Gechtūla, and the Banū Mellīkeuch attacked the tribes who had already submitted; in 1851, the Sharīf Bū Baghla, with several thousands of mountaineers threatened Bougie, then, repulsed by French troops, sought refuge in the Djurdjura. Pélissier in 1851, Bosquet in 1852 had to take the field against him. To facilitate penetration of the country, roads were built from Algiers to Bougie, from Dellys to Aumale and finally from Sétif to Bougie across Little Kabylia, only recently pacified. The natives, however, were not yet subdued; they took advantage of the reduction of effective troops during the Crimea war to take up arms again. The rising of the tribes of the upper Sebau necessitated the despatch of a column which crossed the country between Bougie and Dellys and penetrated as far as the Benī Yaḥyā in the very heart of the Kabyl massif (June—July 1854). New disturbances provoked by the Raḥmānīya brotherhood in 1855 and 1856 forced the French once more to fight the tribes of the Sebau and the Gechtūla. The results obtained however would have remained insecure so long as the Banū Rāten, the most turbulent of tribes of the massif, were not reduced to impotence. A new expedition was therefore organised in 1857 by Marshal Randon, then governor-general, supported by Generals Macmahon, Renault and Yūsuf. While reconnoitring troops surveyed the southern slope of the Djurdjura, three divisions left Tizi Uzu and scaled the slopes of the massif. The Banū Rāten were the first to be attacked and defended themselves energetically for two days. The capture of their villages and the defeat inflicted on them on the plateau of Sūḳ al-Arbā'a forced them to sue for peace (25 May). The Aït Menguellet, their allies, continued the struggle and were crushed at Icheriden (24 June). The Aït Yenni had to submit in their turn in the beginning of July. The defeat of the Aït Illiten, who had been stirred up by the female marabout Lalla Fāṭma, terminated the campaign. The tribes delivered hostages and paid a war indemnity, but retained their municipal autonomy and their *kānūn*. The building of Fort Napoléon (now Fort National) on the plateau of Sūḳ al-Arbā'a enabled the French troops to control the whole massif. The country was opened up by roads, put under military rule and divided into four administrative districts.

The most complete tranquillity reigned until 1871, when the Kabyls rose again at the incitation of the grand-master of the Raḥmānīya, Shaikh al-Ḥaddād and especially of his son al-'Azīz, who made an alliance with Moḳrānī, the rebel bashagha of the Medjana. A holy war was proclaimed on April 8 at the market of Ṣeddūḳ and soon the rebels numbered 180 000 fighting men. Bougie, Delly, Tizi Uzu, Fort National, and Drā' al-Mīzān were blockaded by the natives, the village of Palestro was taken and sacked by the rebels in spite of the resistance of the Europeans. The rebels even threatened Mitīdja but were held up on the Alma by Colonel Fourchault's flying column. Troops sent from Algiers delivered the towns and garrisons besieged by the insurgents, who were routed at Icheriden on June 24. Shaikh al-Ḥaddād

surrendered to the French on July 13 and at the end of the same month, the valley of Wād Sāḥel was cleared of rebels. Kabylia lost its municipal autonomy and a war indemnity of 36 582 000 francs was levied on it. Besides, 446 000 hectares of land were sequestered and appropriated for European colonisation, for which centres were created in the valley of the Isser and in the valley of Wād Sāḥel. Since that date peace has not been disturbed and civil government has been organised in Kabylia as in the rest of the Tell (cf. the article ALGERIA). Primary schools with technical instruction have been established in the principal villages and education is compulsory for the natives. The latter seem to have adapted themselves to the new situation; their resources have increased to such a pitch that in some districts European colonisation has receded and considerable areas of land have been bought back by the natives. The isolation in which the Kabyls lived so long is tending to disappear and, if it is chimerical to hope even in the remote future for an assimilation of the Berber and European elements, perhaps it may be permitted to foresee for them sufficient community of interest to prevent new conflicts.

(G. YVER.)

KAČČH (sometimes written Kač; al-Balādhurī and al-Ya'ḳūbī: قصّ; al-Bērūnī: كچ; Yāḳūt, ed. Wüstenfeld, iv. 126, 11 al-Ḳaṣṣa, but i. 505, 20, iv. 94, 20: al-Ḳaṣṣ; in Anglicised spelling CUTCH), an Indian State attached to the Pālanpur Agency of the Bombay Presidency, lying between 22° 47' and 24° N. and 68° 25' and 71° 11" E. Its area is 7616 sq. m. and the population in 1911 was 513, 429 (Musalmans 126, 133). It is separated from the mainland of Sindh and Kaṭhīāwāḍ by the great salt-swamp known as the Rann of Kačč́h (Great and Little) which makes it a quasi-island. The Rann is included in its boundaries, but not in the area given above. The country is hilly in some parts, but is flat for the most part. There are signs of former volcanic action. Earthquakes have frequently occurred: that of 1819 wrought great destruction, including the capital Bhūdj.

The Rann was undoubtedly at one time an arm of the sea and may with probability be identified with the great lake described by Arrian as visited by Alexander near the mouths of the Indus. It has been identified by S. Julien, V. de St. Martin, Watters and V. Smith with the Ki-ch'a of Hwen Tsang, which he describes as under the suzerainty of the Vallabhī kings, but this is open to doubt as the province described by Hwen Tsang does not seem to have been near the sea.

Al-Balādhurī mentions a king of Ḳaṣṣa called Rāsak (Rāsil) in the time of the Caliph al-Walīd I (86—96 = 705—715). The town of Surasta (Sorashtra) situated in the Bay of Kačč́h still existed in the ixth century. It was inhabited by the Maid (Mēd), who were reputed as pirates. According to al-Balādhurī, the people of Kačč́h were Muslims in the time of Hishām 105—125 (724—743). When the power of the Muslims in the region of the Indus declined in this period, they endeavoured to maintain themselves in Ḳaṣṣ (al-Ya'ḳūbī). Al-Bērūnī describes the eastern branch of the Mihrān of Sindh (the Indus) as flowing into the ocean at a place called Sindhu-sāgara (the Sea of Sindh) in Kačč́h, and this is clearly the Rann of Kačč́h. The Rann was therefore an arm of the sea as lately as 1000 A. D., and a branch of the Indus still flowed into it. Kačč́h is described by al-Bērūnī also as the home of pirates (*bawāridj*). The Samma Rādjpūt rulers of Sindh conquered the country probably in the xivth century; the majority of them became Musalmans, but the Djhādēdjā clan, whose power was established by Mōda about 1270 to 1298, adopted a modified form of Hinduism. They have continued to rule the country under the suzerainty first of the Kings of Gudjarāt, then of the Mughal Emperors and lastly of the British Government. The Kalhōras of Sindh invaded Kačč́h in the xviiith century (1762—5). The early reputation of Kačč́h for piracy was revived in more recent times and led to the British occupation in 1815—1818. The *Rāo* was however soon restored.

The Djhādēdjā rulers bear the title of *Rāo*. Their capital is at Bhūdj and coins are struck there in the name of the *Mahārāo* joined first with those of the later Emperors of Dihlī and more recently with those of Queen Victoria and her successors. The port of Mandvi is a considerable town with a large coasting trade.

The Kačč́hī language is peculiar to the province. It belongs to the Western Indian group of languages and is commonly classed as a dialect of Gudjarātī, although, according to Grierson,

it may perhaps be more correctly considered a dialect of Sindhī. In accordance with its geographical position it forms a link between the two languages.

(M. Longworth Dames.)

KAČČHĪ or **KAČČH GANDĀWA**, A province in Balōčistān extending from 27° 53' to 29° 35' N. and from 67° 11' to 68° 28' E. with an area of 6,415 sq. m. It forms a level plain enclosed on the N. and E. by the southern Sulaimān Mts. and on the W. by the Kīrthar Ranges. To the S. it is open being bounded by the plain of N. Sindh. Politically it forms part of the Khānate of Kalāt [q. v.] with the exception of the small area of Sībī in the north which was nominally part of Afghānistān and was transferred to the British Government under the treaty of Gandamak in 1879. This district is part of British Balōčistān. The tribes in the eastern half of Kaččhī, the Dōmbkī, Umarānī and Kahīrī are only nominally subject to the Khān. These tribes lie to the east of the railway from Jacobabad to Quetta, which traverses the province from south to north. The territory west of this line is also mainly occupied by Balōč tribes with the exception of the area near Dhādhar in the north, where nomadic Brahōīs are found. Everywhere there is a large settled population of Djatts. There are no large towns; Gandāwa, Shorān, Dhādhar, Sībī and Lahrī are the principal places. Cultivation is carried on by irrigation from the small streams and hill-torrents which issue from the mountains; the Nārī and Bōlān on the north, the Mūla and Sukleḍjī on the west, and the Lahrī and Čhattār on the east. Without irrigation, cultivation is impossible as the climate is intensely hot and the rainfall very scanty. The valleys of the Mūla, Bōlān and Nārī form passes by which communication with the uplands has been carried on from time immemorial. The two first-named are now traversed by railways which lead to Quetta and Peshīn by the Bōlān and Harnai countries. The strip of territory called Naṣīrābād is politically part of the Sībī district. It lies adjacent to the British District of Jacobabad in Sindh, and receives its irrigation from the Sindh Canals fed by the Indus.

The population is scattered but denser than in most parts of Balōčistān. Including the Sībī and Naṣīrābād tahsīls, and the Dōmbkī-Kahīrī country, all of which are geographically part of the Kaččhī plain, the total is 175,860 (census of 1911). The history of this tract is dealt with under arts. Balōčistān and Kandābīl.

Bibliography: *Census of India 1901 and 1911. Baluchistan.* (See also s. v. Balōčistān.)
